

## MA Syllabus (NEP ) w.e.f. 2025

### Introduction

The curriculum for M.A. Philosophy has been prepared keeping in mind the needs, expectations, and aspirations of students in philosophy as well as the modernizing trends and methodological perspectives of philosophy as a subject. The programme learning outcomes specify the knowledge, skills, attitudes, and values that a student completing this degree is expected to inculcate.

The student of philosophy emerges as a critical thinker who accepts nothing at face value. He or she will contribute to society through positive reflection on its various facets through gaining the ability to think logically and analytically and hence use philosophical reasoning in practical situations. Pursuing a degree in philosophy will make students pursue interesting careers in media, education, law, politics, government etc.

The M. A. Philosophy programme covers a full range of philosophy, from classical Indian Philosophy and Greek Philosophy to Modern Logic, to ethical theories of Mill and Kant and contemporary debates in applied ethics and bio-ethics, to analytic philosophy and continental philosophy, philosophy of science and law. The programme especially offers core courses in Indian and western philosophy texts. Current issues in feminist theory have also been included. The contemporary courses offered by the Department reflect immediate social realities touching upon issues of gender, caste, culture, technology, and environment. Students not only identify social problems but are also motivated to reflect on social experiences from their own philosophical perspective. This plays a crucial role in self-learning and knowledge production.

### Programme Objectives

The overall aims of the M. A. Philosophy Programme are:

1. To develop in students the ability to apply critical thinking tools developed in philosophical theorising to handle issues and problems in ethics, social sciences and problems that arise out of the technological effects of natural sciences.
2. To examine and critically analyse the views of eminent philosophers in the history of philosophy from ancient to modern times identifying the major periods, movements, and philosophies.
3. To have an overview of the current state of research in each field and to look for solutions for philosophical problems in contemporary times.
4. To have an in depth understanding of the main issues and problems pertaining to metaphysics, epistemology, logic, and ethics.
5. To understand the nature of mind, matter, language, knowledge, and reality.

### Programme Learning Outcomes

On completion of the programme the students will have:

1. **Disciplinary knowledge:** Students will have good knowledge of the history of the subject, the relevant historical line of development in Indian and western philosophy and will gain an understanding of logic, ethics, philosophy of science, metaphysics, epistemology, and aesthetics.
2. **Communications skills:** Students would have practiced the ability to communicate various concepts of philosophy in writing and orally, along with the ability to present complex philosophical ideas with clarity and logic
3. **Critical thinking and analytical reasoning:** Students will be able to identify relevant assumptions, hypothesis, implications, or conclusions, to formulate logically correct arguments and know the pros and cons of the various arguments given by philosophers regarding mind, existence, necessity, evidence, belief, substance, justice, equality, fairness, beauty, and truth.
4. **Research-related skills:** Students will have the confidence to ask new questions that will take the subject forward. They will have an insight into research methods and their writing capacity will get sharpened. They will learn to appreciate modern developments in the subject with the critical spirit that they will inculcate in the program.
5. **Self-directed learning:** They will come away with the ability to work independently, to search for relevant resources and e-content for self-learning, thereby enhancing knowledge in philosophy and introducing original ideas.
6. **Moral and ethical awareness/reasoning:** Students will have a strong grounding in values. They will understand how serious the effects of plagiarism are and will inculcate a lifelong habit of never indulging in plagiarism.
7. **Lifelong learning:** Students will gain philosophical skills for life. They will acquire a habit of reading and thinking about philosophy and to apply logical and analytical frameworks in their day to day lives.
