Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Introduction to Avestan Language	04	3	1	0	Nil	Nil

Learning Objectives:

The followers of Zoroastrian (Parasi) religion possessed an extensive sacred literature-Avesta similar to Veda. A close affinity in many respects in language, thought and cultural aspects in the Veda and Avesta showed a new path in the field of socio-historic linguistics, which was a very popular area of learning in the 18th to 20th century. But now-a-days the study of this subject is very less among contemporary higher learning institutions.

This course aims to facilitate the young generation to learn and research in the area of comparative linguistics.

Learning outcomes:

The learner will be able to learn the language of the Avesta which is closely allied to Vedic Sanskrit. He will also be well equipped to study side by side with the Vedic literature for the proper understanding of both the cultures.

Detailed Syllabus:

Unit-I:

Hours: 11

History of Zoroastrian Religion and its Literature
Socio- Political History of Zoroastrian (Parsi) Society.

Innovation and Interdisciplinary Approaches

- Interface between Sanskrit Grammar and modern linguistics.
- Vyākaraṇa and philosophy of language—relation to cognition, logic, and communication.
- Cross-cultural linguistic studies and comparative grammar.

Unit: IV

Hour 12

Research Methodology and Future Directions

- Techniques for critical analysis, translation, and interpretation of grammatical texts.
- Use of digital databases and tools for Sanskrit research (e.g., Sanskrit Heritage Platform, GRETIL, SARIT).
- Proposal writing and presentation of innovative research in Vyākaraṇa.

Tutorial

- Textual Analysis Workshop
- Sutra-parsing and metarules (paribhasha) Application
- Dhatu Research Assignment
- Karaka-vibhakti Field Analysis
- Seminar Presentation Themes

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Research in Sanskrit Computational Linguistics	04	3	0	1	Nil	Nil

Learning Objectives

The learning objectives of research in Sanskrit Computational Linguistics are primarily a blend of applying computational methods to Sanskrit texts and leveraging the insights from traditional Pāṇinian grammar for the advancement of general linguistic theory and AI/Natural Language Processing (NLP). The fundamental objective is to develop and apply computational techniques to process and analyze the vast Sanskrit literature.

Learning Outcomes

By the end of this course, the students will be able to:

- Do the Computational Analysis of Sanskrit Texts.
- Apply the advancing linguistic theory to the SCL research.
- Building Practical Applications and Tools for Sanskrit.
- Creating digital resources for Sanskrit.

Detailed Syllabus

Unit: I

Hours: 11

Sanskrit Language Analyzer and Generator

Morphological Analyzers and Generators
Sandhi, Samamsa etc.

Machine Translation (MT)

Unit: II

Hours: 12

Optical Character Recognition (OCR)

Text Digitization and Search for Sanskrit:

Tools and techniques for creating and managing large-scale Sanskrit digital texts

Information Retrieval and Concept Mining in Sanskrit Texts

- Introduction to Information Retrieval: scope, principles, and relevance for classical Sanskrit literature.
- Basics of Concept Mining: definition, methodologies and stages
- Overview of digital Sanskrit corpora, lexical resources, and text repositories
- Data arrangement and tagging
- Role of metadata, ontology, and semantic annotation in Sanskrit e-resource
- Challenges in Information Retrieval and Concept Mining

Unit: III

Hours: 11

Speech Technology for Sanskrit

Traditional Indian Linguistics: Study of Śikṣā (phonetics) and Vyākaraṇa (grammar), including key texts and their relevance to modern computational approaches

Sanskrit Computational Phonetics and Phonology

Speech Recognition and Synthesis

Acoustic Phonetics: Understanding the physical properties of Sanskrit sounds (dhvani) and their production mechanisms (uccāraṇa).

Speech Recognition: Principles of Automatic Speech Recognition (ASR), including acoustic modeling, phonetic libraries for Sanskrit, and challenges specific to the language.

Speech Synthesis (Text-to-Speech): Techniques for building systems that can generate natural-sounding Sanskrit speech from text input.

Unit: IV

Hours: 11

AI, Chatbot and Sanskrit:

Exploring the applicability of Sanskrit grammar to contemporary artificial intelligence (AI) and natural language processing (NLP) models, a topic of significant recent discussion.

Chatbot Tool for Sanskrit Shashtras

Phonetics and Speech Technology Research	04	3	0	1	Nil	Nil

Learning Objectives

The course aims to provide a comprehensive understanding of the scientific study of speech sounds and their practical applications in modern technology. Students will learn about the production, transmission, and perception of speech sounds, with a focus on articulatory, acoustic, and auditory phonetics. The course emphasizes the integration of phonetic principles into speech recognition, synthesis, and processing technologies. It also explores speech disorders, language acquisition, and multilingual speech systems. By the end of the course, students will develop skills to analyze speech patterns, apply phonetic knowledge to develop speech technologies, and address challenges in human-computer interaction.

Learning outcomes

By the end of this course, students will:

1. Acquire comprehensive understanding of Sanskrit phonetics as a foundation for speech sound analysis.
2. Explore the theoretical and practical aspects of speech processing.
3. Gain useful insights to analyze, synthesize, and process speech signals..
4. Have hands-on experience of cutting edge speech technologies in Indian languages.
5. Be able to contribute to the development of speech technology systems in Indian languages.

Detailed Syllabus

Unit: I

Hour 11

Basics of Sanskrit Phonetics and Human Speech Production

- Process of Speech Production in human beings.
- Places and Manner of Articulation of Speech sounds.
- Comparative Phonetics in Indo-European languages.
- Articulatory and Acoustic Sanskrit Phonetics.
- Division of Speech Sounds and Phonetic Variations in Sanskrit language.
- Sanskrit Phonetics and
- Speech Processing.

Unit: II

Hour 12

Fundamentals of Digital Speech Processing

- Basics of Speech Signal.
- Digitization of Speech.
- Speech Features and Representations.
- Speech Segmentation and Phoneme Recognition.
- Speech Signal Processing Techniques.

Unit: III

Hour 11

Applications of Digital Speech Processing

- Text-to-Speech Synthesis.
- Automatic Speech Recognition.
- Automatic Speaker Recognition.
- Speech Based Translation systems: Speech-to-Text, Text-to-Speech, Speech-to-Speech.
- Video Subtitles/Captions.

Unit: IV

Research Trends in Dharmaśāstras	04	3	1	0	Nil	Nil

Learning Objectives

This paper introduces students to the major trends in research on *Dharmaśāstra* literature, covering textual criticism, historical development, comparative jurisprudence, and socio-ethical interpretation. It emphasizes the evolution of dharma as a legal, moral, and philosophical concept, exploring both classical sources and contemporary scholarship.

Learning Outcomes

By the end of this course the students will be able to:

- **Analyze research trends and methodologies** applied to Dharmaśāstra studies in both traditional and modern academic contexts.
- **Interpret Dharmaśāstric concepts** such as *Dharma*, *Vyavahāra*, *Ācāra*, and *Prāyaścitta* in relation to contemporary social, ethical, and legal frameworks.
- **Employ comparative and interdisciplinary approaches** linking Dharmaśāstra with jurisprudence, sociology, and gender studies.
- **Develop independent research proposals** demonstrating textual, analytical, and interpretative skills grounded in primary sources.

Detailed Syllabus

Unit: I

Hours: 11

Introduction to Research Approaches in Dharmaśāstra

Understanding Dharmaśāstra as a Research Field

Nature and Sources of Dharmaśāstra Research

Relevance of Dharmaśāstra research in the modern academic and interdisciplinary context: legal, ethical, and social thought.

Unit: II**Hours: 12****Modern Research Approaches and Methodologies**

Historical Approach: Tracing the evolution of Dharmaśāstric thought and institutions.
Philological Approach: Studying language, textual variants, and commentarial traditions.
Comparative Approach: Comparing Dharmaśāstra with Western jurisprudence and ethics.
Sociological Approach: Examining social customs, duties, and legal practices in context.
Hermeneutic Approach: Interpreting Dharmaśāstra as a system of moral reasoning and meaning.

Unit: III**Hours: 11****Thematic Research Areas in Dharmaśāstras**

Jurisprudence: Concepts of justice (Nyāya), punishment (Daṇḍa), and evidence (Pramāṇa)
Sociology: Social order and Institutes (Varṇāśrama-dharma)
Labour studies
Women, inheritance, and family law in Dharmaśāstra research
Environmental and ecological dharma in recent studies
Intersections of Dharmaśāstra with Arthaśāstra and Nītiśāstra

Unit: IV**Hours: 11****Contemporary Trends, and Interdisciplinary Approaches**

Dharmaśāstra in modern legal and ethical discourse
Dharmaśāstra in labour and policy discourse
Comparative study of Dharmaśāstra and Western legal systems
Relevance of Dharmaśāstra in Indian Constitution and customary law
Dharmaśāstra and sociology: social control, justice, and reform
Emerging research: gender, caste, and reform movements
Computational Linguistics: digital archiving, indexing, mining, TTS, lexicography

Trends and Innovations in Indian Epigraphy	04	3	1	0	Nil	Nil

Learning Objectives

This paper aims to introduce students to the major research studies in Indian epigraphy, with a particular focus on Sanskrit inscriptions. It seeks to familiarize them with the evolution of epigraphical research, tracing its development from early explorations to contemporary scholarly trends. The course examines how inscriptions and coins have been employed as primary sources in historical and socio-cultural studies, shedding light on various aspects of India's past. Furthermore, it enables students to critically evaluate published research, assess methodological approaches and identify existing gaps to inspire meaningful and innovative future research in the field of Indian epigraphy.

Learning Outcomes

By the end of the course, students will be able to:

- Survey and categorize major research work in Sanskrit epigraphy across India.
- Analyze the contributions of epigraphical studies to understanding history, literature and society.
- Identify methodological approaches used in research.
- Critically assess research publications and develop skills for independent research projects.
- Appreciate the importance of documentation and interdisciplinary approaches.

Unit-wise Syllabus

Unit I: Introduction to Epigraphical Research

11 hours

- Definition and its scope.
- History of epigraphical research.
- Formulating research questions and objectives.
- Identifying primary and secondary sources.

Unit II: Trends of Regional Dynasties**11 hours**

- Methods of collecting inscriptions and coins.
- Fieldwork and site survey.
- Conservation and handling of damaged inscriptions and coins.
- Contribution of various Indologists.

Unit III: Different Research Approaches**11 hours**

- Paleographical studies.
- Contextual interpretation.
- Comparative analysis of various languages.
- Critical review of editions and secondary sources.

Unit IV: Contemporary Trends in Research**12 hours**

- Editing and publishing of inscriptions and coins.
- Interdisciplinary approaches between Epigraphy and Numismatics.

Tutorial Activities

- Field based observational activity.
- Comparative study.
- Writing assignments.
- Learning to collect materials based on the research studies. .
- Transcription practice of inscriptions
- Reading and review of research articles.

Research Trends and Survey in Indian Manuscriptology	04	3	1	0	Nil	Nil

Learning Objectives

This course introduces students to Indian manuscriptology and explains why manuscripts are important for preserving our literary, philosophical and religious heritage. It gives a basic overview of how scholars study manuscripts and the main research trends in this field. Students learn how manuscripts help us understand history, language, literature and cultural aspects. The course also encourages them to read manuscript catalogues, edited texts and research articles so that they can understand manuscripts in a simple and clear way.

Learning Outcomes

After completing the course, students will be able to:

- Identify major manuscript repositories in India and abroad and understand their cataloguing systems.
- Recognize important manuscripts in Sanskrit and other Indian languages.
- Analyze manuscripts for palaeographic approaches.
- Survey the evolution of research methodologies in manuscript studies.
- Critically evaluate published research and identify areas for future study.

Unit-wise Syllabus

Unit I: Introduction to Indian Manuscriptology

12 Hours

Definition and its significance.

Types of manuscripts.

Material diversity in Indian manuscripts.

Overview of major manuscript repositories.

Unit II: Historical Development

11 Hours

Study of research traditions.
Contributions of scholars.
Survey of catalogues and critical editions.
Evolution of textual criticism and palaeographical studies.

Unit III: Various Research Approaches

11 Hours

Paleographical research.
Thematic studies.
Relationship between epigraphy, numismatics and manuscriptology.
Digital tools and databases.

Unit IV: Contemporary Trends

11 Hours

Script evolution and its impact on Manuscriptology.
Interdisciplinary approaches between Manuscriptology and Palaeography.
Ethical issues.
Survey of recent journals and periodicals.

Tutorial Activities

- Research paper writing
- Survey of multidisciplinary papers
- Paper presentation
- Group Discussion

Research Methodology in Jyotish Śāstra	04	3	1	0	Nil	Nil

Learning Objectives

1. To understand the fundamental principles and scope of research in Jyotish Śāstra.
2. To develop methodological skills for conducting authentic and systematic research in traditional and modern contexts of Jyotish Śāstra.
3. To explore interdisciplinary approaches linking Jyotish with astronomy, mathematics, psychology and cultural studies.
4. To train students in source analysis, data collection and hypothesis formulation based on classical Jyotish Śāstra texts.
5. To encourage innovative research integrating traditional Jyotiṣa knowledge with contemporary scientific methods and technologies.

Learning Outcomes

After completing the course, students will be able to:

- Identify and apply suitable research methodologies in the study of Jyotish Śāstra.
- Critically analyze primary sources such as Bṛhat Parāśara Horā Śāstra, Sūrya Siddhānta, and Jātaka Pārijāta etc.
- Formulate research questions and hypotheses relevant to the field of Jyotish.
- Employ qualitative and quantitative tools to interpret astrological data.
- Produce scholarly research papers adhering to academic standards in Jyotish research.
- Integrate modern scientific tools (software, statistical analysis, digital archives) into Jyotish-based studies.

Unit-wise Syllabus

Unit I: Fundamentals of Research in Jyotish Śāstra

12 Hours

Nature, scope and purpose of research in Jyotish Śāstra.

Types of research as textual, analytical, comparative etc. in Jyotish Śāstra.

Importance of interdisciplinary studies with Jyotish Śāstra to another subject.
Defining problems, objectives and hypotheses in Jyotish research.

Unit II: Sources and Tools of Research in Jyotish Śāstra

11 Hours

Primary sources: Vedāṅga Jyotiṣa, Bṛhat Parāśara Horā Śāstra, Sūrya Siddhānta, Jātaka Pārijāta, Phaladīpikā.

Secondary sources: commentaries, modern research papers and digital repositories.

Data collection methods: horoscopes, astronomical charts and regional case studies.

Use of software and computational tools in astrological research.

Citation methods and referencing in Jyotish Śāstra research and modern research formats.

Unit III: Methodological Approaches

11 Hours

Textual criticism and hermeneutics in Jyotish Śāstra texts.

Comparative and historical research methods in Jyotish Śāstra.

Quantitative and qualitative analysis in astrological research.

Correlation of planetary configurations with empirical data.

Ethics, authenticity and accuracy in Jyotish research.

Unit IV: Modern Trends and Innovation in Jyotish Research

11 Hours

Integration of Jyotish Śāstra with modern sciences.

Contemporary research themes: medical astrology, meteorological astrology and socio-cultural astrology etc.

Digital humanities and Jyotish databases.

Research paper writing, documentation, and publication standards.

Future directions and challenges in Jyotish Śāstra research.

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Vedabhāṣyabhūmikā & Brhaddevatā	04	3	1	0	Nil	Nil

Learning Objectives

The course intends to provide the learners with an insight upon the tradition of Vedic interpretation. It will develop understanding about style of interpretation in ancient as well as modern periods. Learners will study Sāyaṇa's Ṛgveda Bhāṣya Bhūmikā and the Ṛgvedādi Bhāṣya Bhūmikā of Swāmī Dayānanda. The course will also develop an understanding of Śaunakīya Brhaddevatā and provide an opportunity to develop a comprehensive understanding of the selected kārīkās of Śaunakīya Brhaddevatā.

Learning outcomes

After completion of this course, the students will:

- tell names of Vedic commentators of ancient as well as modern times.
- compare and contrast the style as well as methodology of commentaries in ancient and modern time.
- explain the key concepts of Sāyaṇa's and Swāmī Dayānanda's Ṛgvedādi Bhāṣya Bhūmikā.

- express views about devatā, its types, characteristics and intonation on the basis of Shounaka's Brihaddevata.

Detailed Syllabus

Unit: I	Hour 11
Rgvedabhāṣyabhūmika (Sāyaṇa) - Vedāpauruṣeṣyasiddhi Paryanta)	
Unit: II	Hour 11
From Āpauruṣeṣyasiddhi to the end of the text.	
Unit: III	Hour 11
Rgvedādibhāṣyabhūmikā (Dayānanda) – Vedotpatti, Veda-nityatva-vicāra, Veda-viṣaya and Veda-samjñā.	
Unit: IV	Hour 12
Brhaddevatā, Prathama Adhyāya (1-21, 42-45, 66-70 91-100)	

Tutorial Activities

1. Doubt solving classes
2. Development of writing and reading skills in Sanskrit.
3. Learning to interpret Vedic words and mantras according to Sayana.
4. Developing the skill to compare the mantras with interpretations of other commentators.
5. Learning to recognize Vaidika Devata in mantras and other Vedic texts

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Vedic Sanskrit and Avestan Language	04	3	1	0	Nil	Nil

Learning Objectives:

The followers of Zoroastrian (Parasi) religion possessed an extensive sacred literature similar to Veda. A close affinity in many respects in language, thought and cultural aspects in the Veda and Avesta showed a new path in the field of socio-historic linguistics, which was very popular in the 18th to 20th century. But now-a-days the comparative linguistic study in this area is very less among contemporary higher learning institutions.

Sanskrit students are well equipped with the knowledge of Vedic Sanskrit linguistics. But without the knowledge of Avestan linguistic speculation they are not able to understand the Indo-Iranian socio-cultural history which is complementary to each other.

Learning outcomes:

The learner will be able to learn the language of the Avesta which is closely allied to Vedic Sanskrit. He will also be well equipped to study side by side with the Vedic linguistics for the proper understanding of both the cultures. The learner will be trained to research in the area of comparative linguistics and will produce some new facts for better understanding of Vedic people.

Detailed Syllabus:

Unit I:

Hours: 11

Phonology

- Introduction of Avestan Alphabet and their Pronunciation.
- Comparative study in the light of phonetic divisions & phonetic laws.
- Review of PIE (Proto Indo-European) Language theory.

Unit II:

Hours: 11

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
The Gautam Dharmasūtra	04	3	1	0	Nil	Nil

Learning Objectives

This course aims to provide a foundational understanding of the Gautama Dharmasūtra, one of the earliest and most influential texts in the Dharmaśāstra tradition. Learners will explore the principles of individual and societal conduct, life-stage duties, ritual observances, legal procedures, gender norms, and atonement practices as prescribed in the text. The course seeks to contextualize the Gautama Dharmasūtra within early Indian legal and ethical literature, fostering critical engagement with its historical, cultural, and philosophical dimensions.

Learning outcomes

- By the end of the course, learners will be able to explain the core principles of Dharma as articulated in the Gautama Dharmasūtra, including the ideals of truthfulness, purity, and the duties associated with the varṇa and āśrama systems.
- They will be able to identify the prescribed rituals and observances pertaining to various life stages, such as studenthood (brahmacarya), householdership (gṛhastha), forest-dwelling (vānaprastha), and renunciation (sannyāsa).
- Learners will analyze regulations concerning food, speech, dress, bodily discipline, and interpersonal etiquette, gaining insight into the moral and ritual dimensions of Vedic social life.
- They will interpret the procedures related to marriage, including the distinctions among different forms of union such as anuloma and pratiloma, alongside the roles and responsibilities assigned to women.
- The course will enable learners to assess the legal frameworks established in the text, including issues of property rights, judicial punishment, caste-based justice, and social mobility. Furthermore, they will evaluate the detailed doctrine of prāyaścitta (expiation), examining the classification of sins and the corresponding methods of atonement through penance, fasting, charity, and ritual acts.
- Finally, learners will be equipped to contextualize the Gautama Dharmasūtra within the broader Dharmaśāstra tradition and appreciate its lasting impact on the development of Hindu legal and ethical thought.

		Lecture	Tutorial	Practical/ Practice		
Nāṭaka Prakaraṇa of Pratāparudrayaśobhūṣaṇam	04	3	1	0	Nil	Nil

Learning Objectives

This Course ensures a comprehensive understanding of the Nāṭaka Prakaraṇa of Pratāparudrayaśobhūṣaṇam, linking theoretical insights with practical application to classical Sanskrit dramas. It provides an in-depth understanding of Vidyānātha's Pratāparudrayaśobhūṣaṇam, particularly its Nāṭaka Prakaraṇa (drama portion). It encourages students to compare Vidyānātha's concepts with other dramaturgical texts, such as Bharata's Nāṭyaśāstra and Dhanañjaya's Daśarūpaka. It enables students to critically examine the text in the historical and cultural significance, literary aesthetic, and technical aspects of classical Sanskrit dramas.

Learning outcomes

Upon Successful completion of this course students:

- Comprehend the key concepts and theories of Sanskrit dramaturgy as outlined in the Nāṭaka Prakaraṇa of Pratāparudrayaśobhūṣaṇam.
- Analyze the structural elements of a Sanskrit play in light of Vidyānātha's theories.
- Compare and critique Vidyānātha's ideas with other classical texts on dramaturgy.
- Apply the principles of Sanskrit dramaturgy to the study of classical Sanskrit plays.
- Produce scholarly critiques and interpretations of dramaturgical theories and their relevance to classical Indian aesthetics.

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Chatbot Development for Sanskrit Text	04	3	0	1	Nil	Nil

Learning Objectives

The course aims to introduce students to the foundational principles of Natural Language Processing (NLP) and its application to Sanskrit language datasets. Students will explore the linguistic structure and syntax of Sanskrit, enabling the design of intelligent chatbots capable of interacting in Sanskrit. The course emphasizes the creation and processing of Sanskrit corpora, integration of AI and machine learning models, and building conversational interfaces rooted in traditional texts. By the end, learners will acquire skills to develop innovative Sanskrit-based chatbots, bridging the gap between ancient knowledge and modern conversational technologies.

Learning outcomes

By the end of this course, students will:

- Understand the fundamentals of chatbot architecture and design.
- Learn natural language processing techniques for Sanskrit texts.
- Develop skills in programming chatbots using popular frameworks.
- Address challenges in conversational systems for Sanskrit, including sandhi, morphology, and semantics.
- Create and test a functional chatbot tailored to Sanskrit texts or applications.

Detailed Syllabus

Unit: I

Hour 11

Introduction to Chatbot Development

- Basics of Chatbots: History, Applications, and Types (Rule-Based and AI-Based).
- Overview of Sanskrit Linguistic Features Relevant to Chatbots.
- Natural Language Understanding (NLU) and Intent Recognition.
- Tools and Platforms for Building Chatbots: *Rasa*, *Dialogflow*, *Botpress*.
- Introduction to Devanagari Script and Unicode Handling for Sanskrit Input

Unit: II

Hour 11

Natural Language Processing for Sanskrit

- Text Preprocessing: Tokenization, Lemmatization, and Stemming for Sanskrit.
- Handling Sandhi and Compound Words in Conversational Systems.
- Named Entity Recognition (NER) for Sanskrit Texts.
- Part-of-Speech Tagging and Syntax Parsing for Sanskrit Queries.
- Integrating Transliteration Support for Sanskrit and English Inputs.

Unit: III

Hour 11

Chatbot Implementation

- Designing a Conversational Flow for Sanskrit Applications.
- Rule-Based Chatbot Development for Sanskrit Query Answering.
- AI-Based Chatbot Development Using Machine Learning:
 - Training Intents and Entities.
 - Using Pre-Trained Language Models (for Sanskrit).
- Integrating APIs for Sanskrit Text Retrieval and Processing.
- Hands-On Practice: Developing a Simple Chatbot for Sanskrit Queries.

Unit: IV

Hour 12

Advanced Features and Project

- Adding Advanced Features: Context Management and Multilingual Support.
- Error Handling and Debugging in Sanskrit Chatbots.
- Testing and Evaluating Chatbot Performance: Accuracy, Response Time, and User Experience.
- Final Project:
 - Build a Chatbot for a Specific Sanskrit Application (e.g., querying Sanskrit dictionaries, teaching shlokas, or answering questions from texts).
 - Presentation and Peer Review.

Practical Activities:

- Sanskrit Text Preprocessing: Tokenize and normalize sample Sanskrit sentences.
- Perform basic Sandhi splitting using available tools.
- Rule-Based Chatbot Prototype: Design a small set of intents and responses in Sanskrit.
- Implement a simple rule-based chatbot flow.
- Framework Setup and Implementation: Install and configure a chatbot framework (e.g., Rasa or Dialogflow).

DSE-4: Computational Modeling of Pāṇini's Aṣṭādhyāyī

Credit Distribution, Eligibility and Pre-requisites of the Course

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Computational Modeling of Pāṇini's Aṣṭādhyāyī	04	3	0	1	Nil	Nil

Learning Objectives

Computational modelling of Pāṇini's Aṣṭādhyāyī (AD) is a field of study that aims to represent the grammar of Sanskrit in a logical, consistent, and non-verbal way. The goal is to create a framework that can be implemented algorithmically and used to evaluate hypotheses about the grammatical system. It also aim to create a formal framework for representing the Pāṇinian system of Sanskrit grammar. The framework would use mathematical categories and logical relations to create a non-verbal representation.

Learning outcomes

Pāṇini's Aṣṭādhyāyī is a concise grammar of Sanskrit written in the form of about 4,000 sūtras. Some say that Pāṇini's grammar is similar to a modern computing language and that he laid the groundwork for universal computation. Students will be able to learn techniques of computing the AD.

Detailed Syllabus

Unit: I

Hour 11

Structure of Pāṇinīan Aṣṭādhyāyī

- Phonetic Component
- Phonemes - 14 (śivasūtra: pratyāhāra (*ādirantyena sahetā*))
- Rule-database (Rule database)
- Dataset/Lists: Dhātupāṭha, Gaṇapāṭha
- Lists: Suffixes

Unit: II

Hour 11

System of Pāṇini

- Types of Sutras
- Core Concept of Aṣṭādhyāyī

Unit: III

Hour 11

How to Compute Pāṇinian Rules

- Understanding the rules.
- Analyzing the rules.
- Listing external resources or related rules.
- Developing computational rules.

Selecting programming language

Unit: IV

Hour 12

Survey of Tools Developed on Sanskrit Grammar

Practical Activities

Pratyāhāra Generator

Dhātupāṭha Database Creation

Ashtadhyayi Modelling

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Suśruta Saṃhitā: Chikitsasthanam & Kalpasthāna	04	3	1	0	Nil	Nil

Learning Objectives

The Suśruta saṃhitā is an ancient Indian medical text that aims to provide knowledge of surgery, anatomy, and other aspects of health. It also emphasizes the importance of cleanliness and sterilization in surgical procedures. The Suśruta saṃhitā provides information on surgical techniques, such as wound closure, suturing, and bandaging. It also emphasizes the importance of using sterile tools and maintaining a clean surgical environment.

Learning outcomes

Sushruta has a rich history of medicine that is imbued with his pioneering spirit, which carried enduring influence. His works have been relevant in fomenting generations of surgeons and medical practitioners into the annals of history and solidifying his place as a timeless figure in the evolution of medical science. Students will be able to know the ancient procedures of surgery.

Inscriptions of Pre-Medieval India	04	3	1	0	Nil	Nil

Learning Objectives

The objective of this course is to introduce students to the study of pre-medieval inscriptions, focusing on their historical, cultural and linguistic importance. It aims to provide an understanding of the inscriptions from various regions before the medieval period, covering a wide range of dynasties, rulers and civilizations. The course will explore the content, style and scripts of these inscriptions, enabling students to analyze their significance in documenting political, religious and social developments. Students will learn how these inscriptions contribute to the reconstruction of ancient Indian history.

Learning outcomes

After the completion of this course, the students will:

- Understand the historical, cultural, and linguistic significance of pre-medieval inscriptions.
- Be able to analyze inscriptions from various dynasties and regions prior to the medieval period.
- Gain insights into the political, religious and social content of pre-medieval inscriptions.
- Develop the skills to interpret different scripts and styles used in pre-medieval inscriptions.
- Appreciate the role of pre-medieval inscriptions in reconstructing the history of ancient India.

Detailed Syllabus

Unit: I

Hour 11

- Historical study of Pre-Medieval India
- Significance & Geographical Spread of Inscriptions in the 'Rajput Age'
- Impact of land grants on economy
- Development of regional scripts

Unit: II

Hour 11

- Gwalior Inscription of Mihirbhoja
- Pehwa Inscription of Mahendrapala

Unit: III

Hour 11

- Banswada Inscription of Bhojadeva
- Ujjain Copper Plate Inscription of Bhojadeva
- Ujjain Copper Plate Inscription of Arjunvarmadeva

Unit: IV

Hour 12

- Rajghat Inscription of Bhimadeva
- Delhi Topra Inscription of Bisaldeva
- Bodhgaya Inscription of Lakshmansena
- Palam Bawri Inscription of Uddhar
- Narayana-koop Inscription of Shridhara

Tutorial Activities:

- Learning of dating systems and chronology
- Study of dynastic lineage and genealogy
- Knowledge of geographical location and mapping
- Study of scripts, language and palaeography

Role of museums in preserving Indian Cultural Heritage	04	3	1	0	Nil	Nil

Learning Objectives

The objective of this course is to explore the vital role museums play in preserving and promoting Indian cultural heritage. It aims to provide students with an understanding of how museums collect, conserve, and display artifacts to safeguard India's rich cultural history. The course will also examine the functions of museums in education, research, and public engagement, helping students recognize the significance of museums in protecting and transmitting India's diverse cultural traditions for future generations.

Learning outcomes

After the completion of this course, the students will:

- Understand the role of museums in preserving and promoting Indian cultural heritage.
- Learn how museums collect, conserve, and display cultural artifacts.
- Appreciate the educational and research functions of museums in cultural preservation.
- Gain insights into how museums engage the public and raise awareness of cultural heritage.
- Recognize the significance of museums in safeguarding India's diverse cultural traditions for future generations.

Detailed Syllabus

Unit: I

Hour 11

Introduction to Museums and Cultural Heritage

- Definition and evolution of museums
- Museums and cultural heritage preservation
- History and types of museums in India
- Museums and cultural identity

Unit: II

Hour 11

Museum Collections and Preservation Techniques

- Categories of museum collections
- Advanced preservation techniques
- Climate impact on preservation
- Ethical issues: Repatriation and restitution

Unit: III**Hour 11****Museums and Public Engagement in India**

- Museums as educational and historical spaces
- Role of museums in intangible heritage
- Impact of digital technologies on museums
- Museums and cultural tourism

Unit: IV**Hour 12****Challenges and Future of Museums in India**

- Financial and infrastructural challenges
- Museum management and professionalization
- Digitalization and online exhibits
- Future directions: Sustainability and community engagement

Tutorial Activities:

- Documentation and Cataloguing
- Education and Public Awareness
- Promotion of Cultural Identity and Unity
- Modern Developments
- Museum Visit Fieldwork
- Group Presentation Themes

Learning Objectives

The objective of this course is to introduce the students to geography of ancient puranic time India, some basic elements of Astronomy and some philosophical theories mentioned in Viṣṇu Purāṇa.

Learning outcomes

After the completion of this course the students will:

- able to understand and explain the Geographical elements of Viṣṇu Purāṇa.
- able to know about the basics of astronomical theories in the light of Viṣṇu Purāṇa and compare with the modern theories.
- be able to explain the philosophical theories mentioned in Viṣṇu Purāṇa.

Detailed Syllabus

Unit: I Hour 11

विष्णुपुराण (द्वितीय अंश) : भूगोल का विवरण, भारतादि नौ खण्डों का विभाग, सात पाताल लोकों का वर्णन (2.2-5)

Unit: II Hour 11

विष्णुपुराण (द्वितीय अंश) : भिन्न-भिन्न नरकों का वर्णन (2.6.1-30), भूर्भुवः आदि सात लोकों का वर्णन (2.7)

Unit: III Hour 11

विष्णुपुराण (द्वितीय अंश) : सूर्य, नक्षत्र एवं राशियों की व्यवस्था तथा कालचक्र (2.8.1-92) नवग्रहवर्णन (2.12-1-24)

Unit: IV Hour 12

विष्णुपुराण (द्वितीय अंश) : दार्शनिक सिद्धान्त (2.14-16)

Tutorial Activities:

- Orientation to Viṣṇu-Purāṇa
- Purāṇic Map-Making Workshop
- Solar & Lunar Motion Interpretation
- Concept Mapping
- Thematic Presentation

Computing Sanskrit Grammar	04	3	0	1	Nil	Nil

Learning Objectives

Computational modeling of Pāṇini's Aṣṭādhyāyī (AD) is a field of study that aims to represent the grammar of Sanskrit in a logical, consistent, and non-verbal way. The goal is to create a framework that can be implemented algorithmically and used to evaluate hypotheses about the grammatical system. It also Aim to create a formal framework for representing the Pāṇinian system of Sanskrit grammar. The framework would use mathematical categories and logical relations to create a non-verbal representation.

Learning outcomes

Pāṇini's Aṣṭādhyāyī is a concise grammar of Sanskrit written in the form of about 4,000 sūtras. Some say that Pāṇini's grammar is similar to a modern computing language and that he laid the groundwork for universal computation. Students will be able to learn techniques of computing the AD.

Detailed Syllabus

Unit: I

Hour 11

Understanding the Rules for Analysis

- Paninian Methods for Understanding
- Role of the Various Types of Rules
- Decoding the Meta Concept of the Panini
- Understand the rule
 - Analyse the rules
 - List of external resource/rules

Unit: II

Hour 11

Development of Computational rule for Analysis

- Choosing best methods for generation of computational rules
- Rules Generation
- Exception handling
- Platform for the Rules: Text files/Database

Unit: III**Hour 11****Programming Algorithm**

- Programming Algorithm for Recognition
- Programming Algorithm for Analysis
- Select the Programming Language

Unit: IV**Hour 12**

- Computing the Sandhi Rules using Python
- Basics for the Python Programming Language

Practicals:

- Text Reading: Machine-Readable Grammar Concepts
- Concept Clarification Chart
- Sandhi Processor Exercise
- Database Creation
- Algorithm Design

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Computational Sanskrit Poetics and Poetry	04	3	0	1	Nil	Nil

Learning Objectives

The course Explore the intersection of classical Sanskrit poetics and computational linguistics. It introduces students to the rich tradition of Sanskrit literary theories, including rasa (aesthetics), dhvani (suggestion), and alaṅkāra (figures of speech), while equipping them with computational tools to analyze and process poetic texts. Students will learn techniques for computational modeling of poetic structures, sentiment analysis, and the application of algorithms to study metrics, metaphors, and stylistics in Sanskrit literature. It explores key concepts, meter and alaṅkāra detection, and emerging interdisciplinary approaches, fostering both traditional understanding and digital innovation. By the end, learners will gain a unique perspective on integrating computational approaches with traditional Sanskrit poetics for research and innovation.

Learning outcomes

By the end of this course, students will:

1. Understand foundational principles and elements of Sanskrit poetics.
2. Learn computational techniques for meter detection and analysis.
3. Gain insights into identifying and analyzing śabda alaṅkāras using computational tools.
4. Explore emerging fields like gesture detection and rasa identification in Sanskrit aesthetics.
5. Develop practical skills in computational tool creation and application for Sanskrit poetics.

Detailed Syllabus

Unit: I

Hour 11

Introduction to Digital Sanskrit Poetics

- Digital Sanskrit Poetics: Meaning, Relevance and Scope
- Introduction to Sanskrit Poetics:
Key Elements: Chhanda, Alaṅkāra, Rīti, Rasa, etc.

Unit: II

Hour 11

Meter Analysis and Detection

- Introduction to Sanskrit Meters (Chandas): Definition, Types, and Examples.
- Computational Analysis and Meter Detection Techniques.
- Issues and Challenges in Analyzing Meters.

- Hands-On Practice: Developing Computational Tools for Meter Analysis.

Unit: III

Hour 11

Alaṅkāra Analysis

- Introduction to Śabda Alaṅkāra.
- Computational Detection of Śabda Alaṅkāra.
- Issues and Challenges in Automating Alaṅkāra Analysis.
- Hands-On Practice: Developing Computational Tools for Alaṅkāra Detection.

Unit: IV

Hour 12

New Emerging Fields and Their Issues and Challenges

- NLTK for Sāhitya
- Hands-on Practice: Words Frequency Analysis of Śiśupālavadhāṃ (Māgha-kṛta)
- Gesture Detection from Mudrās in Nāṭyaśāstra
- Exploring Other Emerging Areas in Digital Sanskrit Poetics (Rīti, etc.)

Practicals:

- Practice of the Sanskrit Chanda, Alaṅkāra, Rīti, Rasa, etc.
- Practice of Sanskrit Meters (Chandas): Definition, Types, and Examples
- Practice of NLTK for Sāhitya
- Analyzing the Sanskrit Metre
- Practical exercises on meter (chandas) detection using computational tools.
- Sample datasets preparation for alaṅkāra detection.
- Hands-on practice with Python libraries (e.g., NLTK) for textual analysis.
- Word-frequency and stylistic pattern analysis of selected Sanskrit texts.
- Scripted experiments in rasa and dhvani identification using basic computational models.
- Guided exploration of digital repositories for Sanskrit poetic texts.
- Development of a small prototype tool for analyzing poetic structures.

Learning Objectives

The Charaka Samhita is an ancient Ayurvedic medical treatise that aims to promote and maintain health, and cure disease. It also provides information on anatomy, physiology, and pharmacology. Ultimately the benefit of studying the Caraka Samhita is to achieve Dhatu Saamya (equilibrium of body components). The concept of Swastya is explained in every Sthana of Caraka Samhita which explains the significance or existence of concepts of personal health and well-being. The Charaka Samhita explains Ayurveda as the science of life, and the importance of maintaining a positive health.

Learning outcomes

- Students will be able to learn Charaka Samhita.
- Will promote and maintain health, and cure disease.
- Will be the further researchers in this field.
- Will able to learn basic concept of the Carakasamhitā: Chikitsasthana

The course aims to introduce contemporary theories and facts about Vedic mathematics and the Bhartiya mathematical tradition, addressing both traditional and modern questions. It seeks to demonstrate how Vedic mathematics and the entire Bhartiya mathematical tradition is a living practice.

Learning outcomes

- Will have a comprehensive understanding of the innovative concepts bridging the gap between Bhartiya Mathematics and Modern Mathematics.
- Will acquire knowledge of the different dimensions of Mathematics i.e. effects, cause, definitions, forms and facts present in Bhartiya Mathematics and Vedic Mathematics. They will explore the historical context, key principles, and methodologies that characterize this unique approach.
- Will become acquainted of new concepts and facts found in Mathematics.
- Will be able to compare modern and ancient thoughts of Mathematics.
- Will achieve the ability to critically analyze and explain the prescribed texts.

Yājñavalkyaśikṣā highlights Vedādhyayana, Varṇa, Svāra etc. related to proper pronunciation. The course also provides an understanding of Vedic deities, especially through the science of etymology propounded by Yāska in Nirukta. The course also exposes the students to the various forms of sacrificial and ritualistic aspects pertaining to the life of Vedic Āryans.

Learning outcomes

After completion of this course, the students:

- will be able to appreciate the role of Yājñavalkyaśikṣā for understanding Vedic verses, and related issues.
- will try to recite Mantras in their true form with the knowledge of Vaidika Svāra.
- will be successful in applying this knowledge for exploring other Vedic texts.
- will be able to describe the ancient Indian science of etymology as depicted in Nirukta.
- will be able to realize ancient ideas of linguistics and original form of Divinities.

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Paribhāṣenduśekhara by Nāgeśabhaṭṭa	04	3	1	0	Nil	Nil

Learning Objectives

The primary objective of the paper *Paribhāṣenduśekhara by Nāgeśabhaṭṭa* is to familiarize students with the core interpretative framework and metarules (paribhāṣās) that govern Pāṇinian grammar. It aims to develop an understanding of the philosophical and logical foundation underlying the grammatical system of Sanskrit. Learners will study the structure, methodology, and analytical precision of Nāgeśabhaṭṭa's commentary, appreciating his role in the tradition of Vyākaraṇa-śāstra. The course also seeks to train students in the practical application of paribhāṣās in grammatical interpretation, fostering skills in linguistic analysis, textual reasoning, and exegetical comparison with other grammatical traditions.

Learning outcomes.

Upon successful completion of this paper, students will demonstrate a clear understanding of the fundamental paribhāṣās presented in *Paribhāṣenduśekhara* and their role in interpreting the Aṣṭādhyāyī. They will be able to analyze complex grammatical principles using Nāgeśabhaṭṭa's logical tools and apply them to specific sūtras and derivations. Learners will gain insight into the evolution of grammatical thought and recognize Nāgeśabhaṭṭa's contribution to sustaining and refining the Pāṇinian tradition. They will also acquire interpretative proficiency, enabling them to engage critically with Sanskrit grammatical texts and contribute meaningfully to advanced research in Vyākaraṇa studies.

Learning Objectives

The course on Pāraskaragrhyasūtra aims to provide an in-depth understanding of the domestic rituals and rites prescribed in this ancient text. Students will explore the various Gṛhya-sūtras, with a focus on the guidelines for conducting domestic rites, sacrifices, and ceremonies associated with personal and family life. The course will also highlight the philosophical underpinnings of the text, including its insights into the relationship between rituals and social order. By the end of the course, students will gain a comprehensive understanding of the role of domestic rituals in shaping social and spiritual life in Vedic traditions.

Learning outcomes

- Students will gain a thorough understanding of the various domestic rituals and rites outlined in the Pāraskaragrhyasūtra, particularly those relating to birth, marriage, and death.
- Learners will appreciate the philosophical and social contexts of the Pāraskaragrhyasūtra, understanding how the text shapes and supports social and spiritual norms in ancient Indian society.
- Learners will understand how the rituals prescribed in the Pāraskaragrhyasūtra influence social structure, particularly the roles and responsibilities of family members and communities in maintaining dharma.
- Relevance in Contemporary Context: Students will analyze the relevance of the Pāraskaragrhyasūtra in the modern era, particularly in the context of the preservation and transformation of Vedic traditions in contemporary society.

Insights into Deccan, South Indian and Overseas Inscriptions	04	3	1	0	Nil	Nil

Learning Objectives

The objective of this course is to provide students with a comprehensive understanding of Deccan, South Indian and overseas inscriptions, focusing on their historical, cultural, and linguistic significance. Through the study of various inscriptions, students will gain insights into the political, religious, and social dynamics of South India and its interactions with neighboring regions. The course aims to explore the role of inscriptions in documenting dynastic history, land grants, religious practices, and societal structures, as well as their influence on the development of regional languages and scripts. By examining inscriptions from both South India and overseas territories, students will also be able to appreciate the global cultural exchanges and the spread of Indian civilization during the pre-modern period.

Learning Outcomes

After the completion of this course, the students will:

- Develop a deep understanding of the historical and cultural significance of Deccan, South Indian and overseas inscriptions.
- Analyze the role of inscriptions in documenting political, religious, and social history across different regions.
- Gain proficiency in interpreting ancient scripts and languages found in inscriptions, particularly in the context of South India.
- Understand the interactions between South Indian civilizations and foreign regions through the study of overseas inscriptions.

Computational Tools for Manuscriptology, Epigraphy and Palaeography	04	3	0	1	Nil	Nil

Learning Objectives

This course aims to provide students with an in-depth understanding of computational tools and techniques for manuscriptology, epigraphy, and palaeography. It introduces advanced methods such as Optical Character Recognition (OCR), digital epigraphy, and font creation, focusing on preserving and deciphering ancient Indian scripts. The course also explores computational approaches for language detection, transliteration, and analysis of undeciphered inscriptions. By integrating practical exposure to tools like ITHACA and Aksharamukha, students will develop the skills necessary to digitize, catalog, and analyze manuscripts and inscriptions effectively.

Learning outcomes

By the end of this course, students will be able to:

- Apply OCR techniques for deciphering ancient scripts.
- Digitize and preserve manuscripts using modern tools and methods.
- Utilize Unicode blocks and create custom fonts for ancient languages.
- Analyze and interpret inscriptions using computational epigraphy and palaeography tools.
- Access and navigate online manuscript catalogues and repositories for research purposes.

Detailed Syllabus

Unit: I

Hour 11

Introduction to Optical Character Recognition (OCR)

- Fundamentals of Optical Character Recognition (OCR)
- Applications of OCR in Manuscriptology
- Challenges in OCR for ancient Indian scripts

Unit: II

Hour 11

Digitization and Preservation of Manuscripts

- Methods and tools for manuscript digitization
- Preservation techniques for ancient manuscripts
- Online cataloguing of manuscripts and archives

Unit: III**Hour 11****Digital Epigraphy and Palaeography**

- Introduction to Unicode blocks and their significance in ancient Indian scripts
- Basics of font creation for ancient scripts
- Masked training techniques for filling gaps in undeciphered inscriptions
- Tools and techniques for digital transliteration of ancient Indian scripts
- Script and language detection using computational methods

Unit: IV**Hour 12****Survey**

- Survey of computational approaches to Indus script decipherment
- Overview of computational epigraphy tools (e.g., ITHACA)
- Online manuscript catalogues and repositories of Indian manuscripts and inscriptions
- Computational palaeography tools (e.g., Aksharamukha)

Practicals:

- Practical OCR exercises using open-source tools.
- Demonstration of manuscript digitization methods.
- Unicode identification and basic encoding tasks.
- Introductory font-creation activity.
- Hands-on sessions with ITHACA and Aksharamukha.
- Navigation of online manuscript repositories.
- Short digital documentation project (manuscript/inscription fragment).

DSE-6: Computational Lexicography

Credit Distribution, Eligibility and Pre-requisites of the Course

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Computational Lexicography	04	3	0	1	Nil	Nil

Learning Objectives

This course aims to provide students with a comprehensive understanding of Sanskrit lexicography and its computational applications. It covers traditional Sanskrit lexicons, including Vedic and classical texts, and explores the transition from traditional to modern lexicographical methods. Students will gain practical knowledge of digital glossary creation, automatic indexing, and key challenges in computational Sanskrit lexicography. Additionally, the course will introduce relevant Python libraries and web integration techniques, equipping students with the skills to develop digital lexicographical resources and applications.

Learning outcomes

- Understand the fundamentals and historical development of Sanskrit lexicography, including major texts and concepts.
- Gain insights into the evolution of lexicographical methods from traditional indices to modern digital resources.
- Develop proficiency in computational tools for lexicography, such as digital glossary creation and automatic indexing.
- Analyze challenges in computational Sanskrit lexicography and explore potential solutions.
- Apply acquired skills to develop and integrate digital dictionaries and indices into web-based applications

Detailed Syllabus

Unit: I

Hour 11

Introduction to Sanskrit Lexicography

- Introduction to Lexicography
- Introduction to Sanskrit Lexicography
- Types of Sanskrit Lexicographical Texts
- Major Concepts of Sanskrit Lexicography

Unit: II

Hour 11

History of Sanskrit Lexicography

- Introduction to Nighantu and Nirukta

- Other Vedic Indices and Concordances
- Introduction to Amarkosha
- Other Laukika and Shastriya Koshas
- Introduction to Modern Dictionaries and Indices of Sanskrit

Unit: III

Hour 11

Introduction to Computational Lexicography

- Digital Glossary Making
- Automatic Indexing
- Issues and Challenges in Computational Sanskrit Lexicography (Phrasal Verb, Standardization, Query Handling)

Unit: IV

Hour 12

Survey and Project

- Digital Dictionaries and Indices
- Python Libraries Related to Lexicography
- Politeness Recognition System
- Integration to Dictionaries in Web Apps
- Project: Make a project on any of the above

Practicals:

Survey of Ancient Indian Lexicon
Digital Dictionaries Creation
Digital Glossary Making
Automatic Indexing and Search

DSE-6: Computational Application for Ayurvedic Texts

Credit Distribution, Eligibility and Pre-requisites of the Course

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Computational Application for Ayurvedic Texts	04	3	0	1	Nil	Nil

Learning Objectives

This course aims to provide students with a foundational understanding of computational applications for Ayurvedic texts. It introduces key concepts in Sanskrit Computational Linguistics, covering OCR technologies, text processing techniques, and error-handling strategies. Students will explore both front-end and back-end development, gaining hands-on experience with web technologies such as HTML, CSS, JavaScript, Python, and Flask. Additionally, the course emphasizes practical skills in developing web-based applications for Ayurvedic texts, enabling students to apply computational techniques for digitization, analysis, and dissemination of traditional knowledge effectively.

Learning outcomes

- Gain a comprehensive understanding of Ayurvedic textual corpora and their computational applications.
- Develop skills in OCR technologies, text processing, and data cleaning techniques for Sanskrit texts.
- Acquire knowledge of web development fundamentals, including front-end and back-end technologies.
- Learn to build and manage web applications tailored for Ayurvedic texts using Flask and database systems.
- Apply computational methods to enhance accessibility and usability of Ayurvedic knowledge through digital platforms

Detailed Syllabus

Unit: I

Hour 11

Computational Application for Ayurvedic Texts: A survey

- Introduction to Ayurvedic Corpora
- Introduction to Sanskrit Computational Linguistics
- Introduction to Fields of Sanskrit Computational Linguistics

Unit: II

Hour 11

OCR and Text Processing

- Introduction to OCR: Technologies, Processes, Issues and Challenges
- Post-OCR Processing: Handling errors in OCR, Data Cleaning using spreadsheets formula, Introduction to Masking.
- Text Processing: Indexing, POS Tagging, Morphological Analysis, Sandhi and Samasa Handling.

Unit: III

Hour 11

Introduction to Front End Development

- Introduction to Web Development
- HTML
- CSS
- JavaScript

Unit: IV

Hour 12

Introduction to Back-End Development

- Introduction to Python
- Introduction to Flask Server
- Introduction to Database Management System
- Project: Make a Web-based App for Ayurvedic Texts or Concepts.

Practicals

- Working with Sanskrit Text Data
- Build simple web page using HTML & CSS
- Write scripts for interactive features using JavaScript
- Creating a Searchable corpus of Ayurvedic texts.
- Creating an online index of Ayurvedic texts.
- Creating an online glossary of Ayurvedic terminology.

Learning Objectives

Aims to equip students with the knowledge and skills to

- Learn the significance of numbers and their influence on human life.
- Calculate Life Path Number, Destiny Number, and Soul Urge Number.
- Understand the significance of numbers in personality, strengths, and challenges.
- Apply numerology principles in self-discovery, relationships, and career guidance.
- Analyze patterns and cycles to understand their impact on an individual's life journey and destiny, enabling informed decision-making.

Learning outcomes

After completion of this course the students:

- Understanding of Numerology Principles: Students will demonstrate a thorough understanding of numerology principles and their application in various aspects of life.
- Ability to Calculate Numerological Values: Students will be able to accurately calculate numerological values, such as Life Path Number and Destiny Number.
- Interpretation of Numerological Charts: Students will be able to interpret numerological charts and provide insights into personality, strengths, and challenges.
- Application of Numerology in Real-World Scenarios: Students will be able to apply numerology principles in real-world scenarios, including self-discovery, relationships, and career guidance.
- Critical Analysis of Numerological Patterns: Students will be able to critically analyze numerological patterns and cycles, and understand their impact on an individual's life journey and destiny.

Detailed Syllabus

Unit: I

Hour 11

प्रथम प्रकरण – अंक विद्या रहस्य से तिथियों की संख्या का रहस्य पर्यन्त

द्वितीय प्रकरण – अंक विद्या की सत्यता के साक्ष्य से विविध संख्याओं से सम्बद्ध प्रसिद्ध ऐतिहासिक घटना परंपरा |

Unit: II

Hour 11

तृतीय प्रकरण – मूल अंक बनाने की विधि से अंकों के शुभाशुभ फल विवेचन पर्यन्त ।

चतुर्थ प्रकरण – संयुक्त अंक बनाने की विधि एवं फलादेश से सूर्यादि नवग्रहों के यन्त्र परिचय पर्यन्त ।

Unit: III

Hour 11

पाँचवां प्रकरण – नाम और अंक विद्या का सम्बन्ध से नाम और जन्मतिथि के सामंजस्य तथा

फलकथन पर्यंत ।

छठा प्रकरण – मास वार तथा घंटे के महत्व से अमृत घटी का विचार पर्यंत ।

सातवां प्रकरण – जन्म मास के अनुसार फलादेश से सूर्य राशि आधारित शुभाशुभ के फलकथन की भारतीय परंपरा ।

Unit: IV

Hour 12

आठवां प्रकरण – हस्त रेखा विज्ञान और अंक ज्योतिष का समन्वय से पाश्चात्य ज्योतिष परम्परा में अंक विद्या का प्रयोग पर्यंत ।

नवां प्रकरण – अंकों से प्रश्न विचार से नामाक्षरों से फलादेश विचार पर्यंत ।

Tutorial Activities:

- Evolution of Numeral Forms Worksheet
- Place-Value System Demonstration
- Katapayādi Number Coding Practice
- Indian Arithmetic Methods (Gaṇita-Prayoga)
- Calendar & Date Conversion

Learning Objectives

The course aims to introduce contemporary theories and facts about Vedic mathematics and the Bhartiya mathematical tradition, addressing both traditional and modern questions. It seeks to demonstrate how Vedic mathematics and the entire Bhartiya mathematical tradition is a living practice.

Learning outcomes

After completion of this course the students:

- Will have a comprehensive understanding of the innovative concepts bridging the gap between Bhartiya Mathematics and Modern Mathematics.
- Will acquire knowledge of the different dimensions of Mathematics i.e. effects, cause, definitions, forms and facts present in Bhartiya Mathematics and Vedic Mathematics. They will explore the historical context, key principles, and methodologies that characterize this unique approach.
- Will become acquainted of new concepts and facts found in Mathematics.
- Will be able to compare modern and ancient thoughts of Mathematics.
- Will achieve the ability to critically analyze and explain the prescribed texts.

Scientific Thoughts in Vedic Literature	04	3	1	0	Nil	Nil

Learning Objectives:

The course seeks to introduce the basic knowledge of Vedās and Vedāṅgās. It aims to increase the interest of students in Vedic learning. The syllabus enhances the understanding of students to prove that the modern scientific findings are already imbibed in vedic literature.

Learning outcomes:

After completion of this course the students will:

- describe the basic concept of Vedic Science.
- tell rudimental principles of Vedic Physics, Chemistry, Botany etc.
- give details about the facts of science which have been mentioned in the Vedas.
- explain the meaning of Vedic hymns with scientific viewpoint.

Detailed Syllabus:

Unit: I

Hour 11

Vedic concepts of Physics and Chemistry

- Different Forms of Energy
- Forms of Heat
- Solar Energy
- Velocity of Light
- Physical Chemistry
- Inorganic Chemistry
- Organic Chemistry

Unit: II

Hour 11

Botanical and Agricultural concepts in Vedas

- Taxonomy
- Photo-synthesis
- Kṛṣi and Yajña
- Soil, Seed and Rain

Unit: III

Hour 11

- Vedic Technology

- Vedic Mathematics

Unit: IV

Hour 12

- Vedic Medicine System
- Vedic Astronomy

Tutorial Activities:

- Doubt solving classes.
- Development of writing and reading skills in Sanskrit.
- Finding the conversions between the vedic science and present science.
- Learning the detailed present Ayurvedic system.

NLTK for Indian Languages	04	3	1	0	Nil	Nil

Learning Objectives

This course aims to introduce students to the basics of Python programming and its application in natural language processing (NLP) for Indian languages using the Natural Language Toolkit (NLTK). Students will gain foundational Python skills, explore the features of NLTK, and learn to process Indian language data through various NLP techniques, including tokenization, POS tagging, and sentiment analysis. The course provides hands-on experience in building NLP pipelines tailored to Indian linguistic diversity.

Learning outcomes

By the end of this course, students will:

- Acquire a working knowledge of Python programming for text processing.
- Understand the basic functionalities and structure of NLTK for NLP tasks.
- Learn to process Indian language text data for tasks like tokenization, stemming, and tagging.
- Implement NLP pipelines to solve linguistic challenges in Indian languages.
- Gain hands-on experience in building simple NLP projects for Indian language datasets.

Detailed Syllabus

Unit: I

Hour 11

Introduction to Python:

- Python syntax, data types, variables, and operators.
- Control structures: if-else, loops, and functions.
- Lists, dictionaries, tuples, and sets.
- Working with Strings:
 - String methods and manipulations for text processing.
- File Handling in Python:
 - Reading, writing, and processing text files.
- Introduction to Libraries:
 - Installing and importing libraries (e.g., NLTK, NumPy, Pandas).

Unit: II

Hour 11

NLTK: Basic

- Searching Text: concordance, similar, common_contexts, dispersion_plot
- Counting Vocabulary: len(), sorted(), lexical richness, lexical diversity

Unit: III**Hour 11**

NLTK: Intermediate

- Searching Text: concordance, similar, common_contexts, dispersion_plot
- Counting Vocabulary: len(), sorted(), lexical richness, lexical diversity

Unit: IV**Hour 12**

Using Guide of NLTK

Tutorial Activities:

- Develop a POS Tagger for Sanskrit
- Build a frequency dictionary of words from a Sanskrit śloka collection

Learning Objectives

The course provides an insight into the concept of manuscript. It develops understanding about the importance of these handwrites in providing authentic information on Vedic scriptures. It enables the learners to trace the sources, types and number of Vedic manuscripts. The course also upskills learners to decipher and edit critical editions of Samhitas particularly the Rigveda.

Learning outcomes

After completion of this course, the students will:

- define Vedic manuscript in own words.
- describe importance of manuscripts in preservation of Vedic literature.
- explore persons and institutions involved in preservation of Vedic manuscripts.
- enumerate Vedic manuscripts available at various institutions and museums.
- prepare a manuscript-based critical edition of Rigveda Samhita.

Detailed Syllabus

Unit: I

Hour 15

- General introduction to the Vedic manuscripts.
- A survey on the persons, institutions and e-sources contributing towards preservation of Vedic manuscripts.
- Examining the process of publication of the Vedic Samhitas/Scriptures from Vedic manuscripts.

Unit: II

Hour 15

- Exploring unpublished manuscripts of the Vedic Scriptures.
- Analysing the critical edition of Rigved Samhita.

- Field visit to Manuscript Centers e.g. IGNCA and preparing a report on the procedure of collection, decipherment, preservation and publication of manuscripts.

Practical Activities:

- Writing an article on Vedic manuscripts.
- Preparing report of survey/field visit for institutional magazine.
- Interviewing persons involved in exploration, decipherment and publication of the Vedic manuscripts and present it electronically.

AI Tools for Research & Teaching in Sanskrit	02	1	0	1	Nil	Nil

Learning Objectives

This course aims to familiarize students with AI tools, particularly chatbots, for research and teaching in Sanskrit. It provides foundational knowledge of general-purpose and domain-specific chatbots, emphasizing prompt engineering for effective interaction. Students will explore advanced applications like text analysis, translation, and multimedia generation, addressing challenges and ethical considerations. The course equips learners to harness AI tools for Sanskrit language pedagogy, research, and visualization.

Learning outcomes

By the end of this course, students will be able to:

1. Understand the functioning and types of general-purpose and domain-specific chatbots.
2. Develop effective prompts for interacting with AI tools for Sanskrit-specific tasks.
3. Utilize AI tools for text analysis, transliteration, translation, and summarization in Sanskrit.
4. Integrate multimedia tools like image and video generation into Sanskrit teaching and research.
5. Identify and address challenges, including ethical and technical issues, in using AI tools for Sanskrit.

Web Publishing for Sanskrit Texts	02	1	0	1	Nil	Nil

Learning Objectives

This course introduces the foundational concepts and tools of front-end web development. Students will learn to create responsive and user-friendly websites using HTML, CSS, and JavaScript. Emphasis is placed on understanding the structure of web pages, styling them effectively, and adding interactivity through dynamic scripting. The course is designed to equip students with the practical skills necessary for building modern, aesthetically pleasing web interfaces.

Learning outcomes

By the end of this course, students will be able to:

1. Understand the basic principles and structure of front-end development.
2. Use HTML to create well-structured web pages.
3. Apply CSS to style web pages and improve their visual appeal.
4. Integrate JavaScript to add dynamic functionality and interactivity to websites.
5. Build and deploy responsive web interfaces suitable for various devices.

Detailed Syllabus

Unit: I

Hour 15

Basics of HTML

- Introduction to web development and front-end technologies.
- Understanding HTML structure and syntax.
- Common HTML elements: headings, paragraphs, lists, tables, and forms.
- Adding images, links, and multimedia to web pages.

Unit: II

Hour 15

Fundamentals of CSS and JavaScript

- CSS
 - CSS
 - Basics of CSS: Syntax, selectors, and properties.
 - Inline, internal, and external styling.
 - Box model, positioning, and layout techniques.
 - CSS frameworks: Introduction to Bootstrap.

- JavaScript
 - Introduction to JavaScript: Syntax and variables.
 - Functions, events, and DOM manipulation.
 - Adding interactivity to web pages using JavaScript.
 - Basics of debugging and error handling in JavaScript.

Practical Activities:

- Develop a small static website hosting one Sanskrit text
- Create an interactive Sanskrit Verse Explorer website
- Design a multi-section page for a Sanskrit text- title, author, introduction, verses, and translation

Reading Skills in Grantha Scripts	02	1	0	1	Nil	Nil

Learning Objectives

This paper aims to help students understand the basic forms and features of the Grantha script and learn how to read simple letters and words written in it. The course gives easy practice in identifying characters, reading short passages and doing basic transcription and transliteration of manuscripts. Through simple exercises and examples, students build confidence in using the Grantha script and prepare for further study of South Indian writing traditions.

Learning Outcomes

By the end of this course, students will be able to:

- Recognize basic letters and signs of the Grantha script.
- Read simple words and short passages written in Grantha.
- Perform basic transcription and transliteration into modern scripts.
- Identify simple manuscript and inscription samples in Grantha.
- Build confidence for further study of South Indian scripts and texts.

Unit-wise Syllabus

UNIT I: Basics of Grantha Script

Hours-15

- Introduction to Grantha
- Main letters and their forms
- Simple signs and common combinations

UNIT II: Reading Practice of Manuscripts

Hours-15

- Reading simple words and short passages
- Basic transcription and transliteration in manuscripts
- Practice with easy Grantha samples

Practical Activities

- Reading and Writing of basic forms of Grantha script
- Study of letter evolution and palaeographic features
- Knowledge of vowel and consonant formations
- Practice of reading simple inscriptions and manuscripts
- Learning of decipherment techniques and transliteration

Research Methodology in Sanskrit	04	3	1	0	Nil	Nil

Learning Objectives

This course is designed to develop a robust understanding of the fundamental concepts and principles of research methodology, particularly as they relate to Sanskrit studies. It aims to train students in the art of selecting, formulating, and critically analyzing research problems drawn from various branches of Sanskrit, including literature, linguistics, philosophy, and manuscriptology. Learners will be equipped to conduct comprehensive reviews of both classical and contemporary literature, making effective use of bibliographic tools, digital repositories, and specialized databases necessary for thorough Sanskrit research. The course provides practical training in data collection, collation, critical editing, annotation, and interpretation of Sanskrit texts, extending to the handling of unpublished manuscripts. It further emphasizes developing essential skills for organizing, writing, and presenting scholarly work in clear and structured formats, encompassing theses, research papers, and seminar reports, and familiarizes students with the use of modern writing and reference management tools such as LaTeX, Mendeley, and Zotero. Through this integrated framework, the course intends to prepare students for advanced academic inquiry and quality research dissemination in the field of Sanskrit.

Learning Outcomes

Upon successful completion of this course, learners will gain a comprehensive understanding of foundational research principles as they apply to Sanskrit studies, enabling them to critically select and formulate research questions relevant to diverse fields such as Sanskrit literature, linguistics, philosophy, and manuscriptology.

Students will demonstrate the capacity to conduct thorough reviews of both primary and secondary literature, effectively utilizing bibliographic and digital research tools. They will be adept at applying methodologies for gathering, collating, critically editing, and annotating Sanskrit texts, including handling unpublished manuscripts. Additionally, the course will equip learners to organize and present scholarly research in structured academic formats—such as theses, research articles, and seminar reports—while also cultivating proficiency in integrating classical research methods with contemporary digital humanities approaches. Throughout, students will develop strong skills in communicating their findings clearly in academic settings, thereby contributing meaningfully to and upholding research standards within the field of Sanskrit scholarship.

Detailed Syllabus

Unit: I

Hours: 11

Theoretical Concept of Research

- General introduction of research and objective of the research
- Types of research in Sanskrit pedagogy (Analytical, Applied, Critical, Comparative, Descriptive, Fundamental, Historical, Quantitative, Qualitative)
- Outline of Research Work and Research Major Area of Research Selection
- Objectives and importance of research in Sanskrit studies
- Selection of research area and formulation of research problems

DSE-2: Research in Sanskrit Poetry

Credit Distribution, Eligibility and Pre-requisites of the Course

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Research in Sanskrit Poetry	04	3	1	0	Nil	Nil

Learning Objectives

- To familiarize students with the evolution of Sanskrit Poetry and their major research trends.
- To introduce modern methodologies and interdisciplinary approaches in research related to Sanskrit Poetry.
- To encourage critical engagement with classical Sanskrit poetic theories (Alaṅkāra, Rīti, Dhvani, Vakrokti, Aūchitya, etc.) in light of new perspectives.
- To examine innovative research paradigms, comparative studies, and digital approaches in Sanskrit Poetics.
- To promote the development of independent and creative research ideas in the field.

Learning Outcomes

After completing this course, students will be able to:

- Critically analyze past and present trends in research to relate Sanskrit Poetry.
- Identify and evaluate innovations and interdisciplinary methods applied to Sanskrit Poetry.
- Develop well-structured research proposals using modern tools and perspectives.
- Conduct comparative studies between Sanskrit Poetics and other literary traditions.
- Apply digital humanities and linguistic tools in Sanskrit literary research.

Detailed Syllabus

Unit: I

Hour 11

Foundations of Sanskrit Poetry

- Survey of research done on the works of Ashvaghosa, Kalidasa, Bharavi, Magha, Shriharsa, Subandhu, Dandi and Banabhatta.

- Nature and scope of research in the works of Ashvaghosa, Kalidasa, Bharavi, Magha, Shriharsa, Subandhu, Dandi and Banabhatta.

Unit: II

Hour 11

Literary criticism of Sanskrit Poetry

- To examine the characteristics of Mahakavya, Khandakavya, Gadyakavya, Champukavya etc. in Sanskrit poetry.
- Identification of Rasa, Alankara, Riti, Dhvani, Vakrokti and Auchitya in Sanskrit Poetry.

Unit: III

Hour 11

Traditional trends for criticism Sanskrit Poetry

- Critical, cultural, historical, literary, grammatical, Philosophical, Dharmashastric and linguistic.

Unit: IV

Hour 12

Innovation and Interdisciplinary Approaches

- Post-independence research trends in Sanskrit Poetry.
Nationalism, freedom, women empowerment, social justice, science and technology, environment, human values
- Influence of modern and western literary theories and aesthetics on Sanskrit Poetry.

Tutorial

- Survey
- Research Paper writing
- Group Discussion
- Paper presentation

Research Trends and Innovations in Nāṭyaśāstra	04	3	1	0	Nil	Nil

Learning Objectives

1. To introduce students to major research traditions and emerging trends in the study of Nāṭyaśāstra and Indian dramaturgy.
2. To Develop a critical understanding of classical dramaturgical theories in the light of modern scholarship.
3. To Familiarize learners with interdisciplinary, textual, and applied research approaches in Indian dramaturgy.
4. To Encourage analytical and methodological engagement with performance-based, comparative, and contemporary interpretations of Nāṭyaśāstra.

Learning Outcomes

After completing this course, students will be able to:

1. Students will be able to Identify major research trends interpretation in Nāṭyaśāstra studies.
2. Students will critically evaluate traditional commentaries, critical editions, and modern research writings.
3. Students will apply interdisciplinary and methodological tools to the study of Sanskrit dramaturgy.
4. Students will gain the ability to Analyze contemporary theatrical and performance practices through Nāṭyaśāstric frameworks.
5. Students will demonstrate basic research aptitude, academic writing skills, and ethical awareness in dramaturgical studies.
6. Students will apply various Nāṭyaśāstric theories to analyze Rupaks and Uprupaks

Detailed Syllabus

Unit: I

Hour 11

Nature and Scope of Research in Nāṭyaśāstra

Meaning and Concept of Research

- Research as systematic and critical inquiry

- Research traditions in Śāstric studies: Indian and modern perspectives

Scope of Research in Nāṭyaśāstra

- Nāṭyaśāstra as a multidisciplinary text: aesthetics, performance, music, sociology, and culture etc.
- Major areas of research: Rasa–Bhāva theory, Abhinaya ,Dramaturgy. and plot-structure, Stagecraft and theatrical conventions etc.

Types of Research in Nāṭyaśāstra

- Text-based research (Śāstra and Rūpaka texts)
- Performance-oriented and practice-based research
- Historical, analytical, and interpretative research

Unit: II

Hour 11

Identification of Research Problems and Sources and Tools of Research

Identification of Research Problems

- Selection of research topics from Nāṭyaśāstric texts and Sanskrit dramatic literature,
- Review of previous research works on Nāṭyaśāstric texts and Sanskrit Rupakas and uparupakas.

Sources of Research

Primary Sources

- Nāṭyaśāstra and allied dramaturgical texts
- (Abhinavabhāratī, Daśarūpaka, Nāṭyadarpaṇa, Bhāvaprakāśana Sāhityadarpaṇa etc.)
- Sanskrit dramatic texts (Nāṭaka, Prakaraṇa, and other Rūpakas)
- Manuscripts and critical editions

Secondary Sources

- Commentaries and sub-commentaries
- Modern research works, journals, encyclopedias, and dissertations

Research Tools

- Dictionaries, concordances, indices, and glossaries
- Digital databases, online repositories, and manuscript archives

Unit: III

Hour 11

Manuscriptology and Textual Criticism in Nāṭyaśāstra

Manuscript Tradition of Nāṭyaśāstra

- Transmission of texts and textual variations
- Problems of interpolation, omission, and recension

Manuscript Tradition of Nāṭyaśāstra

- Collection and classification of manuscripts
- Textual criticism and evaluation of variant readings
- Establishment of an authentic and reliable text

Critical Edition of the Nāṭyaśāstra by Ramakrishna Kavi

- Manuscript base and editorial principles

- Integration of traditional scholarship and modern textual criticism
- Contribution of Ramakrishna Kavi's edition to Nāṭyaśāstra research and interpretation

Unit: IV

Hour 12

Methodology, Research Writing, and Contemporary Directions

Methodological Approaches in Dramatic and Performance Studies

- Textual and philological methods: close reading of sūtras and kārikās
- Comparative method:
 - Nāṭyaśāstra and later dramaturgical texts
 - Sanskrit drama and modern Indian theatre
- Performance-oriented research:
 - Performance as text
 - Fieldwork, observation, and documentation
- Interdisciplinary approaches: aesthetics, anthropology, sociology, semiotics

Research Writing and Documentation

- Research design: formulation of research questions and hypotheses
- Structure of research work: chapters and methodology
- Academic writing, citation styles, referencing
- Use of transliteration and diacritical marks

Research Ethics and Contemporary Trends

- Plagiarism and academic integrity
- Ethical issues in performance and field-based research
- Contemporary research trends

Tutorial

- Doubt solving classes.
- Development of writing research paper skills in Sanskrit on Nāṭyaśāstra and dramatic literature.
- Learning to collect materials related to research studies
- Research Paper Presentation
- Analytical Discussion

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Research Trends in Itihāsa-Purāṇic literature	04	3	1	0	Nil	Nil

Learning Objectives

- To introduce students to the contemporary research trends in the study of Rāmāyaṇa, Mahābhārata and Purāṇic literature.
- To analyze the methodological innovations and interdisciplinary approaches used in current scholarship.
- To explore comparative, critical and cultural dimensions of Itihāsa–Purāṇa studies.
- To encourage independent research based on new theoretical perspectives, manuscripts, and digital tools.
- To understand the evolution of interpretative traditions, regional adaptations, and modern retellings.

Learning Outcomes

By the end of the course, students will be able to:

- Identify key areas of modern research on Rāmāyaṇa, Mahābhārata and Purāṇas.
- Evaluate traditional and modern methodologies in Itihāsa–Purāṇa studies.
- Apply innovative research tools such as textual criticism, comparative mythology, and digital humanities.
- Conduct original research integrating classical and modern interpretive frameworks.
- Appreciate the continuing cultural and philosophical relevance of these texts in modern scholarship.

Detailed Syllabus

Unit: I

Hour 11

Historical and Research Background

- Overview of Itihāsa–Purāṇa literature: origin, development, and classification.
- Traditional commentaries and interpretations.

- Historical development of research on Itihāsa–Purāṇa literature.
- Itihāsa–Purāṇa literature as a resource of Historical, Cultural, Philosophical, Epigraphical and Archaeological researches

Unit: II

Hour 11

Survey and scope in research on Rāmāyaṇa

- Survey of researches on Rāmāyaṇa.
- Comparative studies of Vālmīki, Anand, Adhyatm and Adbhut Rāmāyaṇa.
- Interdisciplinary research scope of Rāmāyaṇa like Epigraphical, Archaeological and Historical correlations.
- Objections and solutions regarding interpolations in Rāmāyaṇa.

Unit: III

Hour 11

Survey and scope in research on Mahābhārata

- Survey of research on Mahābhārata.
- Evolution of Mahābhārata research: critical editions and recension studies.
- Ethical, political, and philosophical dimensions of Mahābhārata in modern interpretation.
- Relevance of Mahābhārata in the present era.

Unit: IV

Hour 12

Survey and scope in research on Purāṇic Literature

- Survey of researches on Purāṇic literature.
- Historical development of Purāṇic studies: classification and textual diversity.
- Genealogical, cosmological, and mythological research trends.
- Sociological and anthropological approaches to Purāṇic narratives.
- Innovative research on sectarian (Vaiṣṇava, Śaiva, Śākta) Purāṇas.
- Contemporary reinterpretations and global reception of Purāṇic literature.

Tutorial

- Survey
- Research Paper writing
- Group Discussion
- Paper presentation

Credit Distribution, Eligibility and Pre-requisites of the Course

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Research in Sanskrit Grammar	04	3	1	0	Nil	Nil

Learning Objectives

- To understand the historical development and major schools of Sanskrit Grammar, especially Pāṇinian and post-Pāṇinian traditions.
- To explore contemporary research trends and methodologies applied to the study of Vyākaraṇa.
- To examine the intersections of Sanskrit Grammar with linguistics, computational studies, and philosophy of language.
- To encourage innovative thinking and application of modern tools and technologies in Sanskrit grammatical research.
- To cultivate critical and analytical skills for evaluating classical grammatical texts in the light of new research paradigms.

Learning Outcomes

After completing this course, learners will be able to:

- Demonstrate a comprehensive understanding of traditional and modern perspectives on Sanskrit Grammar.
- Analyze current research trends, innovations, and interdisciplinary approaches in Vyākaraṇa studies.
- Apply linguistic and digital methodologies for research in Sanskrit Grammar.
- Develop innovative research proposals integrating classical and modern frameworks.
- Critically assess scholarly works and contribute to contemporary discussions in the field of Sanskrit linguistics and grammar.

Detailed Syllabus

Unit: I

Hour 11

Historical and Theoretical Foundations

- Development of Sanskrit Grammar: Pre-Pāṇinian, Pāṇinian, and post-Pāṇinian stages.
- Overview of grammatical schools: Pāṇini, Kātyāyana, Patañjali, Bhartṛhari, and later commentators.

- Review of major research publications, dissertations, and projects on Sanskrit Grammar.
- Identification of research gaps and emerging areas.

Unit: II

Hour 11

Trends in Modern Research on Sanskrit Grammar

- Post-independence developments in Vyākaraṇa studies.
- Major research contributions from Indian and international scholars.
- Analytical studies of grammatical commentaries and sub-commentaries.
- Trends in linguistic analysis: phonology, morphology, syntax, and semantics in Sanskrit.
- Application of structuralist and post-structuralist theories to Sanskrit Grammar.

Unit: III

Hour 11

Innovation and Interdisciplinary Approaches

- Interface between Sanskrit Grammar and modern linguistics.
- Vyākaraṇa and philosophy of language—relation to cognition, logic, and communication.
- Cross-cultural linguistic studies and comparative grammar.

Unit: IV

Hour 12

Research Methodology and Future Directions

- Techniques for critical analysis, translation, and interpretation of grammatical texts.
- Use of digital databases and tools for Sanskrit research (e.g., Sanskrit Heritage Platform, GRETIL, SARIT).
- Proposal writing and presentation of innovative research in Vyākaraṇa.

Tutorial

- Textual Analysis Workshop
- Sutra-parsing and metarules (paribhasha) Application
- Dhatu Research Assignment
- Karaka-vibhakti Field Analysis
- Seminar Presentation Themes

Research in Sanskrit Computational Linguistics	04	3	0	1	Nil	Nil

Learning Objectives

The learning objectives of research in Sanskrit Computational Linguistics are primarily a blend of applying computational methods to Sanskrit texts and leveraging the insights from traditional Pāṇinian grammar for the advancement of general linguistic theory and AI/Natural Language Processing (NLP). The fundamental objective is to develop and apply computational techniques to process and analyze the vast Sanskrit literature.

Learning Outcomes

By the end of this course, the students will be able to:

- Do the Computational Analysis of Sanskrit Texts.
- Apply the advancing linguistic theory to the SCL research.
- Building Practical Applications and Tools for Sanskrit.
- Creating digital resources for Sanskrit.

Detailed Syllabus

Unit: I

Hours: 11

Sanskrit Language Analyzer and Generator

Morphological Analyzers and Generators
Sandhi, Samamsa etc.

Machine Translation (MT)

Unit: II

Hours: 12

Optical Character Recognition (OCR)

Text Digitization and Search for Sanskrit:

Tools and techniques for creating and managing large-scale Sanskrit digital texts

Information Retrieval and Concept Mining in Sanskrit Texts

- Introduction to Information Retrieval: scope, principles, and relevance for classical Sanskrit literature.
- Basics of Concept Mining: definition, methodologies and stages
- Overview of digital Sanskrit corpora, lexical resources, and text repositories
- Data arrangement and tagging
- Role of metadata, ontology, and semantic annotation in Sanskrit e-resource
- Challenges in Information Retrieval and Concept Mining

Unit: III

Hours: 11

Speech Technology for Sanskrit

Traditional Indian Linguistics: Study of Śikṣā (phonetics) and Vyākaraṇa (grammar), including key texts and their relevance to modern computational approaches

Sanskrit Computational Phonetics and Phonology

Speech Recognition and Synthesis

Acoustic Phonetics: Understanding the physical properties of Sanskrit sounds (dhvani) and their production mechanisms (uccāraṇa).

Speech Recognition: Principles of Automatic Speech Recognition (ASR), including acoustic modeling, phonetic libraries for Sanskrit, and challenges specific to the language.

Speech Synthesis (Text-to-Speech): Techniques for building systems that can generate natural-sounding Sanskrit speech from text input.

Unit: IV

Hours: 11

AI, Chatbot and Sanskrit:

Exploring the applicability of Sanskrit grammar to contemporary artificial intelligence (AI) and natural language processing (NLP) models, a topic of significant recent discussion.

Chatbot Tool for Sanskrit Shashtras

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Research Trends in Dharmaśāstras	04	3	1	0	Nil	Nil

Learning Objectives

This paper introduces students to the major trends in research on *Dharmaśāstra* literature, covering textual criticism, historical development, comparative jurisprudence, and socio-ethical interpretation. It emphasizes the evolution of dharma as a legal, moral, and philosophical concept, exploring both classical sources and contemporary scholarship.

Learning Outcomes

By the end of this course the students will be able to:

- **Analyze research trends and methodologies** applied to Dharmaśāstra studies in both traditional and modern academic contexts.
- **Interpret Dharmaśāstric concepts** such as *Dharma*, *Vyavahāra*, *Ācāra*, and *Prāyaścitta* in relation to contemporary social, ethical, and legal frameworks.
- **Employ comparative and interdisciplinary approaches** linking Dharmaśāstra with jurisprudence, sociology, and gender studies.
- **Develop independent research proposals** demonstrating textual, analytical, and interpretative skills grounded in primary sources.

Detailed Syllabus

Unit: I

Hours: 11

Introduction to Research Approaches in Dharmaśāstra

Understanding Dharmaśāstra as a Research Field

Nature and Sources of Dharmaśāstra Research

Relevance of Dharmaśāstra research in the modern academic and interdisciplinary context: legal, ethical, and social thought.

Unit: II

Hours: 12

Modern Research Approaches and Methodologies

Historical Approach: Tracing the evolution of Dharmaśāstric thought and institutions.

Philological Approach: Studying language, textual variants, and commentarial traditions.

Comparative Approach: Comparing Dharmaśāstra with Western jurisprudence and ethics.

Sociological Approach: Examining social customs, duties, and legal practices in context.

Hermeneutic Approach: Interpreting Dharmaśāstra as a system of moral reasoning and meaning.

Unit: III

Hours: 11

Thematic Research Areas in Dharmaśāstras

Jurisprudence: Concepts of justice (Nyāya), punishment (Daṇḍa), and evidence (Pramāṇa)

Sociology: Social order and Institutes (Varṇāśrama-dharma)

Labour studies

Women, inheritance, and family law in Dharmaśāstra research

Environmental and ecological dharma in recent studies

Intersections of Dharmaśāstra with Arthaśāstra and Nītiśāstra

Unit: IV

Hours: 11

Contemporary Trends, and Interdisciplinary Approaches

Dharmaśāstra in modern legal and ethical discourse

Dharmaśāstra in labour and policy discourse

Comparative study of Dharmaśāstra and Western legal systems

Relevance of Dharmaśāstra in Indian Constitution and customary law

Dharmaśāstra and sociology: social control, justice, and reform

Emerging research: gender, caste, and reform movements

Computational Linguistics: digital archiving, indexing, mining, TTS, lexicography

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Trends and Innovations in Indian Epigraphy	04	3	1	0	Nil	Nil

Learning Objectives

This paper aims to introduce students to the major research studies in Indian epigraphy, with a particular focus on Sanskrit inscriptions. It seeks to familiarize them with the evolution of epigraphical research, tracing its development from early explorations to contemporary scholarly trends. The course examines how inscriptions and coins have been employed as primary sources in historical and socio-cultural studies, shedding light on various aspects of India's past. Furthermore, it enables students to critically evaluate published research, assess methodological approaches and identify existing gaps to inspire meaningful and innovative future research in the field of Indian epigraphy.

Learning Outcomes

By the end of the course, students will be able to:

- Survey and categorize major research work in Sanskrit epigraphy across India.
- Analyze the contributions of epigraphical studies to understanding history, literature and society.
- Identify methodological approaches used in research.
- Critically assess research publications and develop skills for independent research projects.
- Appreciate the importance of documentation and interdisciplinary approaches.

Unit-wise Syllabus

Unit I: Introduction to Epigraphical Research

11 hours

- Definition and its scope.
- History of epigraphical research.
- Formulating research questions and objectives.
- Identifying primary and secondary sources.

Unit II: Trends of Regional Dynasties**11 hours**

- Methods of collecting inscriptions and coins.
- Fieldwork and site survey.
- Conservation and handling of damaged inscriptions and coins.
- Contribution of various Indologists.

Unit III: Different Research Approaches**11 hours**

- Paleographical studies.
- Contextual interpretation.
- Comparative analysis of various languages.
- Critical review of editions and secondary sources.

Unit IV: Contemporary Trends in Research**12 hours**

- Editing and publishing of inscriptions and coins.
- Interdisciplinary approaches between Epigraphy and Numismatics.

Tutorial Activities

- Field based observational activity.
- Comparative study.
- Writing assignments.
- Learning to collect materials based on the research studies. .
- Transcription practice of inscriptions
- Reading and review of research articles.

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Research Trends and Survey in Indian Manuscriptology	04	3	1	0	Nil	Nil

Learning Objectives

This course introduces students to Indian manuscriptology and explains why manuscripts are important for preserving our literary, philosophical and religious heritage. It gives a basic overview of how scholars study manuscripts and the main research trends in this field. Students learn how manuscripts help us understand history, language, literature and cultural aspects. The course also encourages them to read manuscript catalogues, edited texts and research articles so that they can understand manuscripts in a simple and clear way.

Learning Outcomes

After completing the course, students will be able to:

- Identify major manuscript repositories in India and abroad and understand their cataloguing systems.
- Recognize important manuscripts in Sanskrit and other Indian languages.
- Analyze manuscripts for palaeographic approaches.
- Survey the evolution of research methodologies in manuscript studies.
- Critically evaluate published research and identify areas for future study.

Unit-wise Syllabus

Unit I: Introduction to Indian Manuscriptology

12 Hours

Definition and its significance.

Types of manuscripts.

Material diversity in Indian manuscripts.

Overview of major manuscript repositories.

Unit II: Historical Development

11 Hours

Study of research traditions.
Contributions of scholars.
Survey of catalogues and critical editions.
Evolution of textual criticism and palaeographical studies.

Unit III: Various Research Approaches

11 Hours

Paleographical research.
Thematic studies.
Relationship between epigraphy, numismatics and manuscriptology.
Digital tools and databases.

Unit IV: Contemporary Trends

11 Hours

Script evolution and its impact on Manuscriptology.
Interdisciplinary approaches between Manuscriptology and Palaeography.
Ethical issues.
Survey of recent journals and periodicals.

Tutorial Activities

- Research paper writing
- Survey of multidisciplinary papers
- Paper presentation
- Group Discussion

Research Methodology in Jyotish Śāstra	04	3	1	0	Nil	Nil

Learning Objectives

1. To understand the fundamental principles and scope of research in Jyotish Śāstra.
2. To develop methodological skills for conducting authentic and systematic research in traditional and modern contexts of Jyotish Śāstra.
3. To explore interdisciplinary approaches linking Jyotish with astronomy, mathematics, psychology and cultural studies.
4. To train students in source analysis, data collection and hypothesis formulation based on classical Jyotish Śāstra texts.
5. To encourage innovative research integrating traditional Jyotiṣa knowledge with contemporary scientific methods and technologies.

Learning Outcomes

After completing the course, students will be able to:

- Identify and apply suitable research methodologies in the study of Jyotish Śāstra.
- Critically analyze primary sources such as Bṛhat Parāśara Horā Śāstra, Sūrya Siddhānta, and Jātaka Pārijāta etc.
- Formulate research questions and hypotheses relevant to the field of Jyotish.
- Employ qualitative and quantitative tools to interpret astrological data.
- Produce scholarly research papers adhering to academic standards in Jyotish research.
- Integrate modern scientific tools (software, statistical analysis, digital archives) into Jyotish-based studies.

Unit I: Fundamentals of Research in Jyotish Śāstra

12 Hours

Nature, scope and purpose of research in Jyotish Śāstra.

Types of research as textual, analytical, comparative etc. in Jyotish Śāstra.

Importance of interdisciplinary studies with Jyotish Śāstra to another subject.
Defining problems, objectives and hypotheses in Jyotish research.

Unit II: Sources and Tools of Research in Jyotish Śāstra

11 Hours

Primary sources: Vedāṅga Jyotiṣa, Bṛhat Parāśara Horā Śāstra, Sūrya Siddhānta, Jātaka Pārijāta, Phaladīpikā.

Secondary sources: commentaries, modern research papers and digital repositories.

Data collection methods: horoscopes, astronomical charts and regional case studies.

Use of software and computational tools in astrological research.

Citation methods and referencing in Jyotish Śāstra research and modern research formats.

Unit III: Methodological Approaches

11 Hours

Textual criticism and hermeneutics in Jyotish Śāstra texts.

Comparative and historical research methods in Jyotish Śāstra.

Quantitative and qualitative analysis in astrological research.

Correlation of planetary configurations with empirical data.

Ethics, authenticity and accuracy in Jyotish research.

Unit IV: Modern Trends and Innovation in Jyotish Research

11 Hours

Integration of Jyotish Śāstra with modern sciences.

Contemporary research themes: medical astrology, meteorological astrology and socio-cultural astrology etc.

Digital humanities and Jyotish databases.

Research paper writing, documentation, and publication standards.

Future directions and challenges in Jyotish Śāstra research.

DSC-3: Sanskrit Grammar: Laghusiddhāntakaumudī-2**Credit Distribution, Eligibility and Pre-requisites of the Course**

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Sanskrit Grammar: Laghusiddhāntakaumudī-2	04	3	1	0	Nil	Nil

Learning Objectives

This course intends to equip the students with the knowledge of derivational processes of some basic Sanskrit Morphological words, based on the selected portions from the sections of declension and conjugation Pāṇinīan Sūtras as presented in the premier text of Laghusiddhantakaumudī. One of the important objectives of this course is to make the students acquainted with the techniques of Pāṇinīan grammar that will enable them to pursue the grammar of Pāṇinī on their own.

Learning outcomes

After the completion of this course the students will:

- know the structure of Aṣṭādhyāyī along with the operational techniques of Pāṇini. This will enable them to understand the Sūtras of Pāṇinī without any derivational problem or syntactic gap.
- know the process of deriving the nominal forms under Pāṇini's system. The learning of the derivational processes of the selected representative nominal words from all genders will give the students a thorough idea of Sanskrit declensions.
- equipped with the knowledge of the techniques of conjugation of Sanskrit roots, belonging to various Gaṇas.
- gain the knowledge of conjugating the prefixed roots of Sanskrit denoting various senses, e.g.- desiderative, causative, and intensive etc.
- know the application of Pāṇini's Metarules, which will enable them to understand the techniques of the Indian Grammatical system in general.

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Methods of Critical Text Editing	04	3	1	0	Nil	Nil

Learning Objectives

The objective of this course is to introduce students to the methods and techniques of critical text editing. It aims to equip students with the knowledge and skills required to create accurate and reliable critical editions of texts. The course will cover various approaches to text comparison, textual emendation, and the preparation of critical apparatus, enabling students to engage with manuscript and printed versions of texts. By the end of the course, students will be proficient in applying these methods to produce scholarly and authoritative editions of historical and literary works.

Learning outcomes

After the completion of this course, the students will:

- Understand the basic principles and techniques of critical text editing.
- Be able to compare and analyze different versions of texts from manuscripts and printed copies.
- Learn how to improve and correct texts using textual emendation.
- Gain the skills to create critical apparatus for scholarly editions.
- Appreciate the importance of accuracy and care in producing reliable editions of historical and literary texts.

Detailed Syllabus

Unit: I

Hour 11

Introduction to Text Editing

- What is text editing?
- History of text editing
- Types of texts: Manuscripts and printed editions
- Role of the editor

Unit: II**Hour 11**

Textual Criticism

- Definition and importance of textual criticism
- Identifying and comparing variants in manuscripts
- Creating an archetype and stemma
- How to create a critical edition?

Unit: III**Hour 11**

Tools and Resources

- Traditional tools: Paleography and collation
- Digital tools for editing manuscripts
- Using commentaries and glosses in editing
- Key resources: Libraries and archives

Unit: IV**Hour 12**

Practical Editing

- Steps in preparing a critical edition
- Dealing with damaged or incomplete manuscripts
- Ethical issues in editing manuscripts
- Case studies of critical editions

Tutorial Activities:

- Comparative Discussion
- Terminology Familiarization
- Collation Exercise (Pāṭhāntara Analysis)

DSE-3: Chatbot Development using Sanskrit Corpora

Credit Distribution, Eligibility and Pre-requisites of the Course

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Chatbot Development for Sanskrit Text	04	3	0	1	Nil	Nil

Learning Objectives

The course aims to introduce students to the foundational principles of Natural Language Processing (NLP) and its application to Sanskrit language datasets. Students will explore the linguistic structure and syntax of Sanskrit, enabling the design of intelligent chatbots capable of interacting in Sanskrit. The course emphasizes the creation and processing of Sanskrit corpora, integration of AI and machine learning models, and building conversational interfaces rooted in traditional texts. By the end, learners will acquire skills to develop innovative Sanskrit-based chatbots, bridging the gap between ancient knowledge and modern conversational technologies.

Learning outcomes

By the end of this course, students will:

- Understand the fundamentals of chatbot architecture and design.
- Learn natural language processing techniques for Sanskrit texts.
- Develop skills in programming chatbots using popular frameworks.
- Address challenges in conversational systems for Sanskrit, including sandhi, morphology, and semantics.
- Create and test a functional chatbot tailored to Sanskrit texts or applications.

Detailed Syllabus

Unit: I

Hour 11

Introduction to Chatbot Development

- Basics of Chatbots: History, Applications, and Types (Rule-Based and AI-Based).
- Overview of Sanskrit Linguistic Features Relevant to Chatbots.
- Natural Language Understanding (NLU) and Intent Recognition.
- Tools and Platforms for Building Chatbots: *Rasa*, *Dialogflow*, *Botpress*.
- Introduction to Devanagari Script and Unicode Handling for Sanskrit Input

Unit: II

Hour 11

Natural Language Processing for Sanskrit

- Text Preprocessing: Tokenization, Lemmatization, and Stemming for Sanskrit.
- Handling Sandhi and Compound Words in Conversational Systems.
- Named Entity Recognition (NER) for Sanskrit Texts.
- Part-of-Speech Tagging and Syntax Parsing for Sanskrit Queries.
- Integrating Transliteration Support for Sanskrit and English Inputs.

Unit: III

Hour 11

Chatbot Implementation

- Designing a Conversational Flow for Sanskrit Applications.
- Rule-Based Chatbot Development for Sanskrit Query Answering.
- AI-Based Chatbot Development Using Machine Learning:
 - Training Intents and Entities.
 - Using Pre-Trained Language Models (for Sanskrit).
- Integrating APIs for Sanskrit Text Retrieval and Processing.
- Hands-On Practice: Developing a Simple Chatbot for Sanskrit Queries.

Unit: IV

Hour 12

Advanced Features and Project

- Adding Advanced Features: Context Management and Multilingual Support.
- Error Handling and Debugging in Sanskrit Chatbots.
- Testing and Evaluating Chatbot Performance: Accuracy, Response Time, and User Experience.
- Final Project:
 - Build a Chatbot for a Specific Sanskrit Application (e.g., querying Sanskrit dictionaries, teaching shlokas, or answering questions from texts).
 - Presentation and Peer Review.

Practical Activities:

- Sanskrit Text Preprocessing: Tokenize and normalize sample Sanskrit sentences.
- Perform basic Sandhi splitting using available tools.
- Rule-Based Chatbot Prototype: Design a small set of intents and responses in Sanskrit.
- Implement a simple rule-based chatbot flow.
- Framework Setup and Implementation: Install and configure a chatbot framework (e.g., Rasa or Dialogflow).
- Build a basic conversational flow using Sanskrit inputs.

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Role of Museums in Preserving Indian Cultural Heritage	04	3	1	0	Nil	Nil

Learning Objectives

The objective of this course is to explore the vital role museums play in preserving and promoting Indian cultural heritage. It aims to provide students with an understanding of how museums collect, conserve, and display artifacts to safeguard India's rich cultural history. The course will also examine the functions of museums in education, research, and public engagement, helping students recognize the significance of museums in protecting and transmitting India's diverse cultural traditions for future generations.

Learning outcomes

After the completion of this course, the students will:

- Understand the role of museums in preserving and promoting Indian cultural heritage.
- Learn how museums collect, conserve, and display cultural artifacts.
- Appreciate the educational and research functions of museums in cultural preservation.
- Gain insights into how museums engage the public and raise awareness of cultural heritage.
- Recognize the significance of museums in safeguarding India's diverse cultural traditions for future generations.

Detailed Syllabus

Unit: I

Hour 11

Introduction to Museums and Cultural Heritage

- Definition and evolution of museums
- Museums and cultural heritage preservation
- History and types of museums in India
- Museums and cultural identity

Unit: II

Hour 11

Museum Collections and Preservation Techniques

- Categories of museum collections
- Advanced preservation techniques
- Climate impact on preservation
- Ethical issues: Repatriation and restitution

Unit: III**Hour 11****Museums and Public Engagement in India**

- Museums as educational and historical spaces
- Role of museums in intangible heritage
- Impact of digital technologies on museums
- Museums and cultural tourism

Unit: IV**Hour 12****Challenges and Future of Museums in India**

- Financial and infrastructural challenges
- Museum management and professionalization
- Digitalization and online exhibits
- Future directions: Sustainability and community engagement

Tutorial Activities:

- Documentation and Cataloguing
- Education and Public Awareness
- Promotion of Cultural Identity and Unity
- Modern Developments
- Museum Visit Fieldwork
- Group Presentation Themes

Essential/Recommended Readings/Texts

1. “Indian Museums: The Evolution of Museums in India” by P.N. Chopra
2. “Museums and Cultural Heritage in India” by Ratan Parimoo
3. “भारतीय संग्रहालय और सांस्कृतिक धरोहर” by डॉ. रतन परिमू

Geographical, Astronomical and Philosophical Elements in Viṣṇu-Purāṇa	04	3	1	0	Nil	Nil

Learning Objectives

The objective of this course is to introduce the students to geography of ancient puranic time India, some basic elements of Astronomy and some philosophical theories mentioned in Viṣṇu Purāṇa.

Learning outcomes

After the completion of this course the students will:

- able to understand and explain the Geographical elements of Viṣṇu Purāṇa.
- able to know about the basics of astronomical theories in the light of Viṣṇu Purāṇa and compare with the modern theories.
- be able to explain the philosophical theories mentioned in Viṣṇu Purāṇa.

Detailed Syllabus

Unit: I **Hour 11**
विष्णुपुराण (द्वितीय अंश) : भूगोल का विवरण, भारतादि नौ खण्डों का विभाग, सात पाताल लोकों का वर्णन (2.2-5)

Unit: II **Hour 11**
विष्णुपुराण (द्वितीय अंश) : भिन्न-भिन्न नरकों का वर्णन (2.6.1-30), भूर्भुवः आदि सात लोकों का वर्णन (2.7)

Unit: III **Hour 11**
विष्णुपुराण (द्वितीय अंश) : सूर्य, नक्षत्र एवं राशियों की व्यवस्था तथा कालचक्र (2.8.1-92) नवग्रहवर्णन (2.12-1-24)

Unit: IV **Hour 12**
विष्णुपुराण (द्वितीय अंश) : दार्शनिक सिद्धान्त (2.14-16)

Tutorial Activities:

- Orientation to Viṣṇu-Purāṇa

- Purāṇic Map-Making Workshop
- Solar & Lunar Motion Interpretation
- Concept Mapping
- Thematic Presentation

Essential/Recommended Readings/Texts

Essential Readings:

1. विष्णुपुराण, गीताप्रेस गोरखपुर, सं. २०७१
2. विष्णुपुराण, सम्पा, टी.सी. उप्रेती, परिमल पब्लिकेशन्स, दिल्ली, 2005

Computing Sanskrit Grammar	04	3	0	1	Nil	Nil

Learning Objectives

Computational modeling of Pāṇini's Aṣṭādhyāyī (AD) is a field of study that aims to represent the grammar of Sanskrit in a logical, consistent, and non-verbal way. The goal is to create a framework that can be implemented algorithmically and used to evaluate hypotheses about the grammatical system. It also Aim to create a formal framework for representing the Pāṇinian system of Sanskrit grammar. The framework would use mathematical categories and logical relations to create a non-verbal representation.

Learning outcomes

Pāṇini's Aṣṭādhyāyī is a concise grammar of Sanskrit written in the form of about 4,000 sūtras. Some say that Pāṇini's grammar is similar to a modern computing language and that he laid the groundwork for universal computation. Students will be able to learn techniques of computing the AD.

Detailed Syllabus

Unit: I

Hour 11

Understanding the Rules for Analysis

- Paninian Methods for Understanding
- Role of the Various Types of Rules
- Decoding the Meta Concept of the Panini
- Understand the rule
 - Analyse the rules
 - List of external resource/rules

Unit: II

Hour 11

Development of Computational rule for Analysis

- Choosing best methods for generation of computational rules
- Rules Generation
- Exception handling
- Platform for the Rules: Text files/Database

Unit: III

Hour 11

Programming Algorithm

- Programming Algorithm for Recognition
- Programming Algorithm for Analysis
- Select the Programming Language

Unit: IV

Hour 12

- Computing the Sandhi Rules using Python
- Basics for the Python Programming Language

Tutorial Activities:

- Text Reading: Machine-Readable Grammar Concepts
- Concept Clarification Chart
- Sandhi Processor Exercise
- Database Creation
- Algorithm Design

DSE-4: Computational Sanskrit Poetics and Poetry

Credit Distribution, Eligibility and Pre-requisites of the Course

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Computational Sanskrit Poetics and Poetry	04	3	0	1	Nil	Nil

Learning Objectives

The course explores the intersection of classical Sanskrit poetics and computational linguistics. It introduces students to the rich tradition of Sanskrit literary theories, including rasa (aesthetics), dhvani (suggestion), and alaṅkāra (figures of speech), while equipping them with computational tools to analyze and process poetic texts. Students will learn techniques for computational modeling of poetic structures, sentiment analysis, and the application of algorithms to study metrics, metaphors, and stylistics in Sanskrit literature. It explores key concepts, meter and alaṅkāra detection, and emerging interdisciplinary approaches, fostering both traditional understanding and digital innovation. By the end, learners will gain a unique perspective on integrating computational approaches with traditional Sanskrit poetics for research and innovation.

Learning outcomes

By the end of this course, students will:

6. Understand foundational principles and elements of Sanskrit poetics.
7. Learn computational techniques for meter detection and analysis.
8. Gain insights into identifying and analyzing śabda alaṅkāras using computational tools.
9. Explore emerging fields like gesture detection and rasa identification in Sanskrit aesthetics.
10. Develop practical skills in computational tool creation and application for Sanskrit poetics.

Detailed Syllabus

Unit: I

Hour 11

Introduction to Digital Sanskrit Poetics

- Digital Sanskrit Poetics: Meaning, Relevance and Scope
- Introduction to Sanskrit Poetics:
Key Elements: Chhanda, Alaṅkāra, Rīti, Rasa, etc.

Unit: II

Hour 11

Meter Analysis and Detection

- Introduction to Sanskrit Meters (Chandas): Definition, Types, and Examples.
- Computational Analysis and Meter Detection Techniques.
- Issues and Challenges in Analyzing Meters.

- Hands-On Practice: Developing Computational Tools for Meter Analysis.

Unit: III

Hour 11

Alaṅkāra Analysis

- Introduction to Śabda Alaṅkāra.
- Computational Detection of Śabda Alaṅkāra.
- Issues and Challenges in Automating Alaṅkāra Analysis.
- Hands-On Practice: Developing Computational Tools for Alaṅkāra Detection.

Unit: IV

Hour 12

New Emerging Fields and Their Issues and Challenges

- NLTK for Sāhitya
- Hands-on Practice: Words Frequency Analysis of Śiśupālavadhāṃ (Māgha-kṛta)
- Gesture Detection from Mudrās in Nāṭyaśāstra
- Exploring Other Emerging Areas in Digital Sanskrit Poetics (Rīti, etc.)

Practicals:

- Practice of the Sanskrit Chanda, Alaṅkāra, Rīti, Rasa, etc.
- Practice of Sanskrit Meters (Chandas): Definition, Types, and Examples
- Practice of NLTK for Sāhitya
- Analyzing the Sanskrit Metre
- Practical exercises on meter (chandas) detection using computational tools.
- Sample datasets preparation for alaṅkāra detection.
- Hands-on practice with Python libraries (e.g., NLTK) for textual analysis.
- Word-frequency and stylistic pattern analysis of selected Sanskrit texts.
- Scripted experiments in rasa and dhvani identification using basic computational models.
- Guided exploration of digital repositories for Sanskrit poetic texts.
- Development of a small prototype tool for analyzing poetic structures.

Learning Objectives

The Charaka Samhita is an ancient Ayurvedic medical treatise that aims to promote and maintain health, and cure disease. It also provides information on anatomy, physiology, and pharmacology. Ultimately the benefit of studying the Caraka Samhita is to achieve Dhatu Saamya (equilibrium of body components). The concept of Swastya is explained in every Sthana of Caraka Samhita which explains the significance or existence of concepts of personal health and well-being. The Charaka Samhita explains Ayurveda as the science of life, and the importance of maintaining a positive health.

Learning outcomes

- Students will be able to learn Charaka Samhita.
- Will promote and maintain health, and cure disease.
- Will be the further researchers in this field.
- Will able to learn basic concept of the Carakasamhitā: Chikitsasthana

Learning Objectives

The course aims to introduce contemporary theories and facts about Vedic mathematics and the Bhartiya mathematical tradition, addressing both traditional and modern questions. It seeks to demonstrate how Vedic mathematics and the entire Bhartiya mathematical tradition is a living practice.

Learning outcomes

- Will have a comprehensive understanding of the innovative concepts bridging the gap between Bhartiya Mathematics and Modern Mathematics.
- Will acquire knowledge of the different dimensions of Mathematics i.e. effects, cause, definitions, forms and facts present in Bhartiya Mathematics and Vedic Mathematics. They will explore the historical context, key principles, and methodologies that characterize this unique approach.
- Will become acquainted of new concepts and facts found in Mathematics.
- Will be able to compare modern and ancient thoughts of Mathematics.
- Will achieve the ability to critically analyze and explain the prescribed texts.

Learning Objectives

This paper introduces students to the major domains, methodologies, and emerging trends in Sanskrit research. It aims to train scholars to engage critically with traditional sources and modern academic approaches, integrating classical Indian hermeneutics, textual criticism, digital humanities, and interdisciplinary perspectives.

Learning Outcomes

By the end of the course, students will be able to:

- Identify key areas of Sanskrit research and their interconnections with other disciplines.
- Critically evaluate research methodologies in traditional and modern contexts.
- Utilize manuscripts, commentaries, and digital tools for academic research.
- Develop independent research proposals rooted in Sanskrit tradition and modern scholarship.

Detailed Syllabus

Unit: I

Hours: 11

Introduction to Research Approaches in Sanskrit Studies

Sanskṛta Anusandhāna: Meaning, Nature, and Scope of Sanskrit Research.
Traditional & Modern Approaches: Pāṇinian, Mīmāṃsā, and Western Philological Methods.
Major Research Institutions and Scholars of Sanskrit Studies (Bhandarkar Institute, Oriental Research Institutes, IGNCA, Rashtriya Sanskrit Sansthan).
Use of Digital Tools and Databases in Sanskrit Research (SARIT, GRETIL, Muktabodha, AI-assisted tools).

Unit: II

Hours: 12

Major Areas of Traditional Sanskrit Research

Vedic Studies: Vedas, vedangas
Vyākaraṇa (Grammar)
Epics and puranas

Research in Sanskrit Computational Linguistics	04	3	0	1	Nil	Nil

Learning Objectives

The learning objectives of research in Sanskrit Computational Linguistics are primarily a blend of applying computational methods to Sanskrit texts and leveraging the insights from traditional Pāṇinian grammar for the advancement of general linguistic theory and AI/Natural Language Processing (NLP). The fundamental objective is to develop and apply computational techniques to process and analyze the vast Sanskrit literature.

Learning Outcomes

By the end of this course, the students will be able to:

- Do the Computational Analysis of Sanskrit Texts.
- Apply the advancing linguistic theory to the SCL research.
- Building Practical Applications and Tools for Sanskrit.
- Creating digital resources for Sanskrit.

Detailed Syllabus

Unit: I

Hours: 11

Sanskrit Language Analyzer and Generator

Morphological Analyzers and Generators
Sandhi, Samamsa etc.

Machine Translation (MT)

Unit: II

Hours: 12

Optical Character Recognition (OCR)

Text Digitization and Search for Sanskrit:

Tools and techniques for creating and managing large-scale Sanskrit digital texts

Information Retrieval and Concept Mining in Sanskrit Texts

- Introduction to Information Retrieval: scope, principles, and relevance for classical Sanskrit literature.
- Basics of Concept Mining: definition, methodologies and stages
- Overview of digital Sanskrit corpora, lexical resources, and text repositories
- Data arrangement and tagging
- Role of metadata, ontology, and semantic annotation in Sanskrit e-resource
- Challenges in Information Retrieval and Concept Mining

Unit: III

Hours: 11

Speech Technology for Sanskrit

Traditional Indian Linguistics: Study of Śikṣā (phonetics) and Vyākaraṇa (grammar), including key texts and their relevance to modern computational approaches

Sanskrit Computational Phonetics and Phonology

Speech Recognition and Synthesis

Acoustic Phonetics: Understanding the physical properties of Sanskrit sounds (dhvani) and their production mechanisms (uccāraṇa).

Speech Recognition: Principles of Automatic Speech Recognition (ASR), including acoustic modeling, phonetic libraries for Sanskrit, and challenges specific to the language.

Speech Synthesis (Text-to-Speech): Techniques for building systems that can generate natural-sounding Sanskrit speech from text input.

Unit: IV

Hours: 11

AI, Chatbot and Sanskrit:

Exploring the applicability of Sanskrit grammar to contemporary artificial intelligence (AI) and natural language processing (NLP) models, a topic of significant recent discussion.

Chatbot Tool for Sanskrit Shashtras

Research Trends in Dharmaśāstras	04	3	1	0	Nil	Nil

Learning Objectives

This paper introduces students to the major trends in research on *Dharmaśāstra* literature, covering textual criticism, historical development, comparative jurisprudence, and socio-ethical interpretation. It emphasizes the evolution of dharma as a legal, moral, and philosophical concept, exploring both classical sources and contemporary scholarship.

Learning Outcomes

By the end of this course the students will be able to:

- **Analyze research trends and methodologies** applied to Dharmaśāstra studies in both traditional and modern academic contexts.
- **Interpret Dharmaśāstric concepts** such as *Dharma*, *Vyavahāra*, *Ācāra*, and *Prāyaścitta* in relation to contemporary social, ethical, and legal frameworks.
- **Employ comparative and interdisciplinary approaches** linking Dharmaśāstra with jurisprudence, sociology, and gender studies.
- **Develop independent research proposals** demonstrating textual, analytical, and interpretative skills grounded in primary sources.

Detailed Syllabus

Unit: I

Hours: 11

Introduction to Research Approaches in Dharmaśāstra

Understanding Dharmaśāstra as a Research Field

Nature and Sources of Dharmaśāstra Research

Relevance of Dharmaśāstra research in the modern academic and interdisciplinary context: legal, ethical, and social thought.

Unit: II

Hours: 12

Modern Research Approaches and Methodologies

Historical Approach: Tracing the evolution of Dharmaśāstric thought and institutions.

Philological Approach: Studying language, textual variants, and commentarial traditions.

Comparative Approach: Comparing Dharmaśāstra with Western jurisprudence and ethics.

Sociological Approach: Examining social customs, duties, and legal practices in context.

Hermeneutic Approach: Interpreting Dharmaśāstra as a system of moral reasoning and meaning.

Unit: III

Hours: 11

Thematic Research Areas in Dharmaśāstras

Jurisprudence: Concepts of justice (Nyāya), punishment (Daṇḍa), and evidence (Pramāṇa)

Sociology: Social order and Institutes (Varṇāśrama-dharma)

Labour studies

Women, inheritance, and family law in Dharmaśāstra research

Environmental and ecological dharma in recent studies

Intersections of Dharmaśāstra with Arthaśāstra and Nītiśāstra

Unit: IV

Hours: 11

Contemporary Trends, and Interdisciplinary Approaches

Dharmaśāstra in modern legal and ethical discourse

Dharmaśāstra in labour and policy discourse

Comparative study of Dharmaśāstra and Western legal systems

Relevance of Dharmaśāstra in Indian Constitution and customary law

Dharmaśāstra and sociology: social control, justice, and reform

Emerging research: gender, caste, and reform movements

Computational Linguistics: digital archiving, indexing, mining, TTS, lexicography

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Trends and Innovations in Indian Epigraphy	04	3	1	0	Nil	Nil

Learning Objectives

This paper aims to introduce students to the major research studies in Indian epigraphy, with a particular focus on Sanskrit inscriptions. It seeks to familiarize them with the evolution of epigraphical research, tracing its development from early explorations to contemporary scholarly trends. The course examines how inscriptions and coins have been employed as primary sources in historical and socio-cultural studies, shedding light on various aspects of India's past. Furthermore, it enables students to critically evaluate published research, assess methodological approaches and identify existing gaps to inspire meaningful and innovative future research in the field of Indian epigraphy.

Learning Outcomes

By the end of the course, students will be able to:

- Survey and categorize major research work in Sanskrit epigraphy across India.
- Analyze the contributions of epigraphical studies to understanding history, literature and society.
- Identify methodological approaches used in research.
- Critically assess research publications and develop skills for independent research projects.
- Appreciate the importance of documentation and interdisciplinary approaches.

Unit-wise Syllabus

Unit I:

11 hours

- Definition and its scope.
- History of epigraphical research.
- Formulating research questions and objectives.
- Identifying primary and secondary sources.

Unit II:**11 hours**

- Methods of collecting inscriptions and coins.
- Fieldwork and site survey.
- Conservation and handling of damaged inscriptions and coins.
- Contribution of various Indologists.

Unit III:**11 hours**

- Paleographical studies.
- Contextual interpretation.
- Comparative analysis of various languages.
- Critical review of editions and secondary sources.

Unit IV:**12 hours**

- Editing and publishing of inscriptions and coins.
- Interdisciplinary approaches between Epigraphy and Numismatics.

Tutorial Activities

- Field based observational activity.
- Comparative study.
- Writing assignments.
- Learning to collect materials based on the research studies. .
- Transcription practice of inscriptions
- Reading and review of research articles.

Research Trends and Survey in Indian Manuscriptology	04	3	1	0	Nil	Nil

Learning Objectives

This course introduces students to Indian manuscriptology and explains why manuscripts are important for preserving our literary, philosophical and religious heritage. It gives a basic overview of how scholars study manuscripts and the main research trends in this field. Students learn how manuscripts help us understand history, language, literature and cultural aspects. The course also encourages them to read manuscript catalogues, edited texts and research articles so that they can understand manuscripts in a simple and clear way.

Learning Outcomes

After completing the course, students will be able to:

- Identify major manuscript repositories in India and abroad and understand their cataloguing systems.
- Recognize important manuscripts in Sanskrit and other Indian languages.
- Analyze manuscripts for palaeographic approaches.
- Survey the evolution of research methodologies in manuscript studies.
- Critically evaluate published research and identify areas for future study.

Unit-wise Syllabus

Unit I: Introduction to Indian Manuscriptology

12 Hours

Definition and its significance.

Types of manuscripts.

Material diversity in Indian manuscripts.

Overview of major manuscript repositories.

Unit II: Historical Development

11 Hours

Study of research traditions.
Contributions of scholars.
Survey of catalogues and critical editions.
Evolution of textual criticism and palaeographical studies.

Unit III: Various Research Approaches

11 Hours

Paleographical research.
Thematic studies.
Relationship between epigraphy, numismatics and manuscriptology.
Digital tools and databases.

Unit IV: Contemporary Trends

11 Hours

Script evolution and its impact on Manuscriptology.
Interdisciplinary approaches between Manuscriptology and Palaeography.
Ethical issues.
Survey of recent journals and periodicals.

Researches in Jyotiṣa Śāstra	04	3	1	0	Nil	Nil

Learning Objectives

- To acquaint students with the historical and contemporary trends in Jyotiṣa Śāstra research.
- To develop critical understanding of classical texts of Jyotiṣa Śāstra in the light of modern methodologies.
- To explore innovative approaches, interdisciplinary methods and digital tools applied in studies of Jyotiṣa Śāstra.
- To promote ethical, critical and culturally rooted research practices in Jyotiṣa Śāstra.

Learning Outcomes

After completing the course, students will be able to:

- Identify and evaluate key research trends in Jyotiṣa Śāstra from ancient to modern times.
- Apply innovative research methodologies in the study of traditional Jyotiṣa Śāstra texts and concepts.
- Integrate interdisciplinary approaches (astronomy, mathematics, cultural studies, philosophy) in Jyotiṣa Śāstra research.
- Critically analyze research papers, theses, and publications related to Jyotiṣa Śāstra.
- Prepare scholarly research proposals reflecting innovation, authenticity, and scientific temperament.

Unit-wise Syllabus

Unit I: Foundations of Research in Jyotiṣa Śāstra

12 Hours

- Nature and scope of Jyotiṣa as a śāstra: Gola, Gaṇita and Jātaka divisions.
- Historical overview of Jyotiṣa Śāstra research: from Vedāṅga Jyotiṣa to modern scholarship.
- Research methodology in Jyotiṣa Śāstra tradition: textual, comparative and analytical approaches.
- Traditional commentarial methods and their relevance to modern research.

Unit II: Modern Trends in Jyotiṣa Śāstra Research

11 Hours

- Post-independence and contemporary research trends in Jyotiṣa Śāstra studies.
- Contributions of modern scholars and research institutions in research of Jyotiṣa Śāstra.
- Integration of Jyotiṣa Śāstra with modern astronomy and cosmology.
- Critical evaluation of theses, dissertations and publications in Jyotiṣa Śāstra.

Unit III: Innovation and Interdisciplinary Approaches

11 Hours

- Use of digital tools, astronomical software and data analytics in Jyotiṣa Śāstra research.
- Comparative study of Indian and Western astronomical traditions.
- Interlinking of Jyotiṣa Śāstra with Ayurveda, Philosophy, Dharmshastra etc.
- Case studies: innovative interpretations of graha, rāśi, nakṣatra and daśa systems.
- Challenges and opportunities in applying modern scientific frameworks of Jyotiṣa Śāstra.

Unit IV: Research Writing and Ethics in Jyotiṣa Śāstra Studies

11 Hours

- Formulating research problems and hypotheses in Jyotiṣa Śāstra.
- Methods of data collection, interpretation and citation in Jyotiṣa Śāstra research.
- Academic writing and referencing (traditional and modern styles).
- Ethical concerns in Jyotiṣa research — authenticity, verification and responsible publication.
- Preparation of research proposals and synopsis.

Tutorial Activities

- Research paper writing
- Survey of multidisciplinary papers
- Paper presentation

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Advanced Research Methodology for Sanskrit	02	01	01	0	Nil	Nil

Learning Objectives

This paper intends to provide in-depth exposure to advanced theories, approaches, and techniques in research methodology specifically tailored for Sanskrit studies. The aim is to enable students to engage critically with both classical and contemporary methods, equipping them to design innovative projects with academic rigor. Students will learn how to identify viable research problems, formulate research hypotheses, and construct systematic research frameworks. They will be trained to handle diverse primary and secondary sources, including unpublished manuscripts, and apply advanced textual criticism and philological methods. The curriculum will introduce digital research tools, international standards for transliteration such as IAST, and best practices for managing research data and metadata. Emphasis will also be placed on research ethics, plagiarism prevention, intellectual property rights, patent processes, and open-access publishing. By exploring the global landscape of Sanskrit research (including Scopus, Web of Science, and UGC-CARE), learners will gain the skills to navigate academic publishing, build professional research profiles, and present findings professionally through theses, research papers, and conference presentations. The course aspires to produce researchers capable of advancing the frontiers of Sanskrit studies using both traditional wisdom and cutting-edge research technology.

Learning Outcomes

By the end of the course:

- Upon successful completion, students will be able to independently identify, conceptualize, and execute research projects of publishable quality in Sanskrit studies.
- They will demonstrate the ability to critically review literature, construct and test hypotheses, and use advanced textual criticism to edit and interpret primary sources.
- Graduates will master the use of digital research tools for manuscript digitization, database searches, and computational analysis.
- They will be able to prepare research proposals, theses, and articles in accordance with international academic standards, utilizing proper transliteration, bibliographic citation, and digital references.
- The course will ensure that students understand research ethics, copyright, and patent norms applicable to scholarly work.

- Learners will be adept at managing their academic profiles on global research platforms, avoiding predatory journals, and contributing to open educational resources.
- they will possess the confidence and competence to disseminate their research at national and international levels, participate in collaborative projects, and contribute to the evolving landscape of global Sanskrit scholarship, thereby supporting both academic and professional advancement in the field.

Advanced Theoretical Foundations and Research Design

- Overview of nature, scope, and philosophy of research in Sanskrit
- Critical exploration of types of research: Theoretical, Textual, Historical, Interpretative, Interdisciplinary, Innovative
- Understanding Research Methods: Qualitative and Quantitative
- Formulation of research problems, hypotheses, and objectives tailored to Sanskrit texts and traditions

Unit: II

Hours: 15

Research Formulation

- Data collection, corpus management
- Academic writing skill refinement: preparation of research papers, theses, and seminar presentations
- Abstract: Core Problem, Approach, Key Findings, Impact or conclusion
Introduction: Background, summary, key focus, current scenario
Research Gap: Problem, Hypothesis, research question

Tools for Sanskrit Research	02	0	0	2	Nil	Nil

Learning Objectives

This course aims to introduce students to the diverse set of digital and traditional tools available for Sanskrit research, equipping them with practical skills to enhance their scholarly investigations. Learners will familiarize themselves with various databases, digital libraries, computational linguistics applications, and software that support text digitization, annotation, and semantic analysis of Sanskrit literature. The course will develop their understanding of natural language processing (NLP) techniques, optical character recognition (OCR) for Devanagari and other scripts, digitization standards, and metadata encoding crucial for corpus development. Students will gain hands-on experience with digital platforms like the Muktabodha Digital Library, SARIT, and Sanskrit Heritage Site, learning how to navigate and utilize these resources effectively. Emphasis will be placed on integrating technological tools with traditional philological methods to foster comprehensive and interdisciplinary research. The course also aims to sensitize students to the challenges of digital Sanskrit scholarship, including script variability, data accuracy, and the ethical handling of ancient manuscripts, thereby preparing them for future research endeavors at the interface of classical studies and digital humanities.

Learning Outcomes

Upon successful completion of the course, students will be proficient in selecting and applying appropriate digital tools to support Sanskrit research, including accessing and managing digital collections and databases. They will demonstrate competence in using computational linguistics tools for morphological parsing, Sandhi resolution, and semantic tagging of Sanskrit texts. Learners will be able to perform text digitization practices and understand OCR techniques tailored for Indic scripts, ensuring high data quality. They will effectively leverage digital platforms for annotation, textual criticism, and semantic indexing, improving interpretive accuracy and research productivity. Students will also critically evaluate the limitations and ethical considerations of digital tools in Sanskrit studies. The ability to integrate traditional knowledge with modern technology will enable them to contribute innovatively to Sanskrit scholarship. Moreover, they will be prepared to actively participate in collaborative projects that harness technology for manuscript preservation, analysis, and dissemination, thus advancing the field of Sanskrit digital humanities.

Learning Objectives

- To acquaint learners with the nature, extent and contents of the Vedic literature.
- To introduce them with the current trends and areas of research on the Samhitas.
- To explore research studies conducted pertaining to the Brahmana and Aranyaka texts.
- To investigate into the researches carried upon Upanishads, Vedangas and Anukramani Sahitya.
- To enable students to conduct interdisciplinary else multidisciplinary researches on the Vedic literature.

Learning Outcomes

Upon successful completion of this course the students will be able to:

- describe the nature, extent and content of the Vedic literature.
- give description on the types, trends and characteristics of research studies conducted upon the Vedic Samhitas.
- enumerate research studies being undertaken to explore the implicit knowledge of Brahmana and Aranyaka texts.

- examine the existing tendencies of exploration into the content, extent and exegesis of texts of Upanishads, Vedangas and Anukramanis.
- apply varied tools and techniques of conducting interdisciplinary studies in the areas of Vedic literature.

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Research Survey in Dharmaśāstra	04	3	1	0	Nil	Nil

Learning Objectives

This paper aims to provide an in-depth survey of research in Dharmaśāstra literature, tracing its evolution from classical sources to modern interpretations. Students will explore the textual, philosophical, ethical, and socio-legal dimensions of Dharmaśāstric traditions, review significant modern research works, and develop independent scholarly perspectives through critical and comparative analysis.

Learning Outcomes

After completing this course, learners will be able to:

- Demonstrate an understanding of key research areas and methodologies in Dharmaśāstra studies.
- Critically review and evaluate existing research trends.
- Survey ancient and modern research methodologies applied to Dharmaśāstra studies.
- Examine interdisciplinary linkages of Dharmaśāstra with fields like law, medicine, environment, finance, labour, economics, management, sociology, and ethics.
- Develop independent research projects based on primary Dharmaśāstra sources.

Detailed Syllabus

Unit: I

Hours: 11

Foundations and Methodology of Survey in Dharmaśāstra

- Scope and interdisciplinary nature of Dharmaśāstra studies
- Research methodologies used in Dharmashastric studies: Descriptive, Analytical, Historical, and Comparative
- Relevance of Dharmaśāstra research in the modern academic and interdisciplinary context
- Purpose and importance of research surveys in Sanskrit studies

Unit: II

Hours: 12

Thematic Researches Conducted in Dharmaśāstras

- Ancient Concepts:
Varṇa-Āśrama System, Saṃskāras, Puruṣārtha Catuṣṭaya, Rājadharmā, Arthashāstra traditions, saptanga sidhant, dharma and ethics
- Contemporary Concepts:
Labour and policy, Law and Jurisprudence, Sociology, Gender studies, Environmental sciences, medicine, finance, economics, management, and ethics
- Review of Indian and international scholarly works on theological and various dimensions of Dharmaśāstras

Unit: III

Hours: 11

Understanding Interdisciplinary Dimensions for conducting Research in Dharmaśāstra

- Comparative and psychological studies on social institutions
- Interconnections of Dharma with philosophy, ethics, and social management
- Linking Rājadharmā and Arthashāstra traditions with contemporary Judicial systems (Jurisprudence: Concepts of justice (Nyāya), punishment (Daṇḍa), and evidence (Pramāṇa))
- Ancient perspectives on governance, economics, Labour studies and corporate ethics
- Studies linking Dharmaśāstra with environmental science, medicine, and management
- Research trends connecting Dharmaśāstra with Ayurveda, Pediatrics, and lifestyle science
- Women, inheritance, and family law in Dharmaśāstra research
- Intersections of Dharmaśāstra with Arthasāstra and Nītiśāstra

Unit: IV

Hours: 11

Modern Trends, Digitization, and Future Research Directions

- Critical analysis of existing research surveys and emerging gaps
- Role of technology and digitization in Dharmaśāstra studies
- Digital humanities approaches: text mining, database development, and online indexing of Smṛti and sūtrā literature
- Future directions: interdisciplinary synthesis, sustainability ethics, and cultural applications

Tutorial Activities

- Research paper writing
- Survey of multidisciplinary papers
- Paper presentation
- Group Discussion
- Prepare a concept note on “Digital Repository of Dharmaśāstric Researches.”
- Presentation on global trends in digitization of Sanskrit resources.

Computational Tool Development for Sanskrit Texts	04	3	0	1	Nil	Nil

Learning Objectives

The learning objectives of research in Computational Tool Development for Sanskrit Texts are primarily a blend of applying computational methods to Sanskrit texts and leveraging the insights from traditional Pāṇinian grammar and Sanskrit Shastras. The fundamental objective is to develop and apply computational techniques to process and analyze the vast Sanskrit literature.

Learning Outcomes

By the end of this course, the students will be able to:

- Do the Computational Analysis of Sanskrit Texts.
- Apply the advancing linguistic theory to the SCL research.
- Building Practical Applications and Tools for Sanskrit.
- Do the programming in Python
- Understand the Web technology

Detailed Syllabus

Unit: I

Hours: 11

Basics of Computational Tool Development

- Identification of the problem
- Understanding the theoretical concepts
- Data/Text Selection, Data Preparation: Methods
- Text Digitization & understanding the OCR

Unit: II

Hours: 12

Introduction to Python

Introduction to Python programming
Project-based learning using Python

Unit: III**Hours: 11****Introduction to Web Development**

Introduction to HTML

Using various types of CSS:

Inline, Internal and External

Using various types of JS

Research Methodology in Sanskrit Grammar	04	3	1	0	Nil	Nil

Learning Objectives

- To understand the fundamental principles and methodologies of research in the field of Sanskrit Grammar (Vyākaraṇa).
- To familiarize students with traditional and modern approaches to linguistic and grammatical research.
- To develop analytical and critical skills for examining grammatical texts and commentaries.
- To train students in the preparation of research proposals, data collection, analysis, and interpretation in Sanskrit grammar studies.
- To explore interdisciplinary and technological tools applicable in Sanskrit grammatical research.

Learning Outcomes

After completing this course, learners will be able to:

- Demonstrate a clear understanding of research processes and methodologies relevant to Sanskrit grammar.
- Analyse classical grammatical works of Pāṇini, Kātyāyana, and Patañjali using research-based approaches.
- Apply modern linguistic theories and digital tools in Sanskrit grammar research.
- Formulate independent research questions and prepare scholarly research proposals in the field of Vyākaraṇa.
- Critically review existing literature and contribute innovative perspectives to Sanskrit grammatical studies.

Detailed Syllabus

Unit: I

Fundamentals of Research in Sanskrit Grammar

- Nature and scope of research in Vyākaraṇa

Hours: 11

- Purpose, significance, and types of research (Descriptive, Analytical, Comparative, Historical)
- Sources of Sanskrit grammatical research: Primary and Secondary
- Review of major grammatical systems: Pāṇinian, Non-Pāṇinian (Cāndra, Śākaṭāyana, Jainendra)

Unit: II

Hours: 12

Research Tools and Techniques

- Manuscriptology and textual criticism in grammatical research
- Methods of data collection and interpretation in grammar-based studies
- Use of lexicons, commentaries, and scholastic literature in grammatical research
- Application of linguistic models and modern grammar theories to Sanskrit

Unit: III

Hours: 11

Trends and Innovations in Vyākaraṇa Research

- Modern approaches to Pāṇinian grammar
- Computational and digital research tools in Sanskrit grammar
- Contributions of modern scholars and institutions to Vyākaraṇa studies
- Interdisciplinary research: Relation of Vyākaraṇa with Linguistics, Philosophy, Logic, and Literature

Unit: IV

Hours: 11

Research Writing and Presentation

- Structuring a research paper/thesis in Sanskrit Grammar
- Citation, referencing, and use of traditional and digital bibliographical tools
- Critical review and evaluation of previous research works
- Ethical considerations in research and plagiarism awareness

Tutorial Activities

- Research paper writing
- Survey of multidisciplinary papers
- Paper presentation
- Group Discussion
- Presentation on global trends in digitization of Sanskrit resources.

Trends and Research Survey in Indian Epigraphy	04	3	1	0	Nil	Nil

Learning Objectives

This paper aims to introduce students to the major research studies in Indian epigraphy, with a particular focus on Sanskrit inscriptions. It seeks to familiarize them with the evolution of epigraphical research, tracing its development from early explorations to contemporary scholarly trends. The course examines how inscriptions and coins have been employed as primary sources in historical and socio-cultural studies, shedding light on various aspects of India's past. Furthermore, it enables students to critically evaluate published research, assess methodological approaches and identify existing gaps to inspire meaningful and innovative future research in the field of Indian epigraphy.

Learning Outcomes

After completing this course, learners will be able to:

- Survey and categorize major research work in Sanskrit epigraphy across India.
- Analyze the contributions of epigraphical studies to understanding history, literature and society.
- Identify methodological approaches used in research.
- Critically assess research publications and develop skills for independent research projects.
- Appreciate the importance of documentation and interdisciplinary approaches.

Detailed Syllabus

Unit: I

Hours: 11

- Definition and its significance.
- Historical development.
- Major sources of Epigraphy and Numismatics.
- Survey of journals and publications.

Unit: II

Hours: 12

- North & South India.
- East, Central and West India.
- Coins of various dynasties.
- Study of variations.

Unit: III

Hours: 11

- Study of political, cultural, religious and social approaches.
- Palaeographical analysis.
- Thematic studies.
- Comparative study of the inscriptions and coinage.

Unit: IV

Hours: 11

- Critical evaluation of research articles
- Review of major research work.
- Field visit and practical work.
- Interdisciplinary methods: Integrating Archaeology, Numismatics and Epigraphy.

Tutorial Activities

- Collection and review of various sources.
- Comparative study.
- Writing assignments.
- Reading and review of research articles.
- Presentations and discussions.
- Field visit.

Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Prerequisite of the Course
		Lecture	Tutorial	Practical/ Practice		
Fundamental Techniques for Thesis and Research Paper Writing	02	1	0	1	Nil	Nil

Learning Objectives

This course aims to equip students with comprehensive skills and knowledge essential for effective thesis and research paper writing within Sanskrit studies. Learners will develop an understanding of the structural and stylistic elements necessary for composing clear, coherent, and academically rigorous research documents. The course will train students in critical stages of research writing, including designing research frameworks, organizing and presenting scholarly arguments, and adhering to formatting and citation conventions. Students will gain practical expertise in utilizing various modern writing and reference management tools such as LaTeX, Mendeley, and Zotero to streamline research documentation and improve presentation quality. Additionally, the course emphasizes ethical research practices, plagiarism avoidance, and effective proofreading techniques. Through guided exercises, students will enhance their ability to communicate their research findings persuasively and professionally, preparing them to publish in reputable academic forums and contribute meaningfully to the field of Sanskrit scholarship.

Learning Outcomes

Upon completion of this course, students will demonstrate a strong ability to independently plan, organize, and compose theses and research papers to rigorous academic standards. They will understand and apply the structural elements and stylistic conventions that define scholarly writing, including clear articulation of research objectives, systematic literature review, and logical development of arguments. Learners will hone their skills in drafting, revising, and editing work, with emphasis on coherence, critical analysis, and persuasive communication of their ideas. The course will train them to employ modern digital tools for writing and reference management, such as LaTeX, Mendeley, and Zotero, streamlining the research and citation process and ensuring accuracy in scholarly documentation. Through practical assignments, students will internalize best practices for formatting according to journal and university guidelines, avoiding plagiarism, and respecting intellectual property rights. They will also become adept at integrating feedback from instructors and peers, further refining their academic writing. Ultimately, students will be equipped not only to present complex research findings clearly and professionally—

but also to contribute original scholarship to reputable national and international academic forums in Sanskrit and allied fields, establishing themselves as competent and ethical contributors to the scholarly community.
