Generic Elective Course- 2.1(GE-2.1): Communication in Management

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Communication in Management GE-2.1 | 4 | 3 | 1 | 0 | Pass in XII | Pass in Business Organisation (GE- 1.1) |

Learning Objectives

The course aims to train students to enhance written as well as oral communication in management. This course will help students in understanding the principles and techniques of communication. Also, to understand the use of electronic media for communication.

Learning Outcomes

After completion of the course, learners will be able to:

1. Analyse the need of communication in management.
2. Interpret the need for effective listening.
3. Examine the concepts of written and spoken communication.
4. Demonstrate the role of group discussion and interviews.
5. Summarise business reports and proposals.

SYLLABUS OF GE-2.1

Unit 1: Introduction to Communications (9 hours)

Meaning and Objectives of Communication. Process of Communication. Forms of communication: formal and informal; upward, downward, diagonal and lateral. Role of a Manager. Barriers to effective communication and overcoming them. Effectiveness in Managerial Communication. Make use of grapevine. Role of verbal and non-verbal communication; interpreting non-verbal communication.

Unit 2: Listening (9 hours)

Meaning and objectives of Listening, Features of a good listener. Analysing poor listening. Effective listening skills and barriers to effective listening.

Unit 3: Spoken communication (9 hours)

Oral Presentation: Planning, structuring and delivering presentation. Handling queries. Challenges and etiquettes associated with Telephonic, web-conferencing and Teleconferencing communication.

Written communication: Principles and steps of effective writing. Seven Cs of Letter writing. Business Letters: inquiries, placing orders, sales letters. Job applications and resumes. Memos.

Unit 4: Group Discussion (9 hours)

Nature, forms and classification of Groups. Role of managers in group discussions. Effective group decision making. Group conflict.

Interviews: Interviewing, Nature and types of Interviewing Questions. Verbal and Non-Verbal aspects of interviewing. Types of Interviews: structured and unstructured; group and depth.

Unit 5: Meetings (9 hours)

Planning and conducting meetings. Meeting Process. Ways to effectively lead a meeting. Evaluating meetings and drafting minutes of a meeting.

E-mail, Business Reports and Proposals: E-mail Etiquettes, smartness and presentation. Business Reports and proposals: Writing and purpose.

Practical Exercises

The learners are required to:

1. Analyse the communication channel in your educational institution.
2. Analyse the barriers to effective listening in your educational institution.
3. Organise webinars and draft mock business letters.
4. Participate in group discussions and mock interviews.
5. Conduct a meeting in your institution and draft minutes of the meeting.

The course aims to familiarize learners with different aspects of investment management and risks, and introduce them to the framework of securities analysis, valuation and portfolio management.

Learning Outcomes

After completion of the course, learners will be able to:

1. Evaluate the investment decision making process and analyse the risk and return of securities.
2. Perform bond valuation.
3. Estimate value of equity shares.
4. Create investment portfolios.
5. Analyse mutual funds and financial derivatives as investment alternatives.

SYLLABUS OF BAC: DISCIPLINE (A&F) – A2

Unit 1: Introduction to Investment (9 hours)

Concept of Investment, Investment Decision Process; Avenues for investment- features and classes; Difference between investment, speculation, and gambling; Primary market and Secondary Markets- Trading of securities, Security market indices; Return and risk: concept and calculation.

Unit 2: Bond Analysis and Valuation (9 hours)

Bond Fundamentals; Estimating bond yield; Bond Valuation, bond risks and credit rating.

Unit 3: Equity Analysis and Valuation (9 hours)

Fundamental Analysis, Technical Analysis and Efficient Market Hypothesis; Valuation of Equity Shares using Dividend Discount Model (Zero-growth dividend and constant growth model).

Unit 4: Portfolio Management (9 hours)

Portfolio Management- Concept and need; Measurement of Portfolio Return and risk; Diversification- Markowitz Theory.

Unit 5: Mutual Fund and Derivatives (9 hours)

Mutual Fund- concept and types; Overview of Financial Derivatives-Forwards; Futures and Options.

Practical Exercises

The learners are required to:

1. Compute the risk and return of NIFTY 50 stocks using MS-EXCEL.
2. Perform valuation of select debt instruments by collecting their data from the market and applying statistical tools in MS-EXCEL.
3. Analyse the price and volume movements of equity shares of selected companies and indices using technical charts and graphs.
4. Explore the portfolios of different firms with the help of annual reports of the companies and analyse the portfolio risk and return.
5. Collect the data of top five mutual fund investments based on CAGR and examine their actual CAGR to compare with claimed CAGR.

Assessment Method:

1. There shall be 3 credit hours for lectures + one credit hour for tutorials (per group).
2. Theory exam shall carry 100 marks (including Internal Assessment of 25 Marks). The theory exam will be for 3 hours.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Banking and Insurance

BAC: Discipline (B&I)- A2: Introduction to Banking

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Banking BAC: Discipline (B&I) – A2 | 4 | 3 | 1 | 0 | Pass in XII | Pass in Introduction to Insurance (BAC: Discipline (B&I) - A1) |

Learning Objectives

The course aims to equip the students with an understanding of the Indian Banking system, its evolution, current practices and challenges in the future.

Learning Outcomes

After completion of the course, learners will be able to:

1. Assess the evolution and growth of Banking in India.
2. Evaluate the banking structure in India.
3. Analyse the method of granting loans and advances and the concept of Non-Performing Assets (NPAs).
4. Perform electronic banking transactions.
5. Analyse the new forms of banking.

SYLLABUS OF BAC: Discipline (B&I) – A2

Unit 1: Introduction to Banking Business (6 hours)

Evolution of banking in India; Various types of bank – customer relationships; Types of customer accounts – Time and Term deposit accounts including Non-Resident Individual accounts; Functions of Banks – Traditional and Modern.

Unit 2: Structure of Commercial Banks and Apex Banking Institution (9 hours)

Structure and Composition of Commercial Banks; Types of Banks – Public, Private, Cooperative, Regional Rural Banks (RRBs), Foreign, National Housing Bank, Small Industries Development Bank of India (SIDBI), Export-Import Bank of India (EXIM); Comparison between public and private banks; comparison between Cooperative and Regional Rural Banks.

Unit 3: Loans and Advances (12 hours)

Principles of sound lending; Methods of granting advances; Priority Sector Lending; Introduction to

the Balance Sheet of a Commercial Bank, Concept of Non-Performing Assets (NPAs)-Reasons for Non-Performing Assets and Measures to check Non-Performing Assets. Anti-Money Laundering (AML), CIBIL.

Unit 4: Electronic Banking (9 hours)

Meaning of Electronic banking, Automated Teller Machine (ATM), Internet Banking, Telebanking, Mobile Banking, Electronic Clearing System, National Electronic Fund Transfer (NEFT), Real Time Gross Settlement (RTGS), Immediate Payment System (IMPS), Electronic Cheques and E-Wallet; Digital Payment – concept, advantages and disadvantages; Measures to ensure secured digital payment.

Unit 5: Recent Developments in Banking Industry (9 hours)

Emerging role of Reserve Bank of India in Indian Banking System, Banking Sector Reforms – Narasimham Committee -I, Narasimham Committee- II; Introduction to various forms of Banking – Corporate Banking, Retail Banking, International Banking, Investment Banking, Development Banking, Virtual Banking, Non-Banking Financial Intermediaries

Practical Exercises

The learners are required to:

1. Analyse the growth in the Indian banking sector.
2. Compare the role of different types of banks in the Indian Banking structure.
3. Analyse the problem of NPAs in Indian Banks and the mechanism to deal with it.
4. Evaluate the advantages and risks associated with various modes of performing electronic banking transactions.
5. Evaluate different forms of banking in present times and contrast them with traditional banking.

Advertising, Sales Promotion and Sales Management

BAC: Discipline (ASPSM)- A2: Marketing Communication

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Marketing Communication BAC: Discipline (ASPSM) – A2 | 4 | 3 | 1 | 0 | Pass in XII | Pass in Principles of Marketing (BAC: Discipline (ASPSM) - A1) |

Learning Objectives

The aim of this course is to provide insights into the communication aspects of marketing.

Learning Outcomes

After completion of the course, learners will be able to:

1. Explore the fundamental concepts of marketing communication and learn effective communication.
2. Develop effective marketing communication simulations.
3. Categorize the promotion mix tools to be used for creating public relations, sales promotion and direct marketing.
4. Analyse the consumer buying behaviour which will serve as a guide to develop new and suitable marketing strategies.
5. Demonstrate the process of integrated marketing communication process, and manage cultural diversity through communication.

SYLLABUS OF BAC: Discipline (ASPSM) – A2

Unit 1: Communication (6 hours)

Meaning, Importance, Communication process and its elements, Barriers to effective communication, Ways to overcome barriers, Role of communication in marketing, Effective Communication

Unit 2: Developing Marketing Communication (9 hours)

Concept, its role; Communication response models AIDA, Hierarchy-of-effects, Steps for developing effective marketing communication.

Unit 3: Promotion-mix (12 hours)

Concept of Promotion Mix, Tools of promotion-mix- advertising, personal selling, public relations, publicity, sales promotion and direct marketing: their meaning, distinctive characteristics and functions; Factors affecting promotion mix.

Unit 4: Understanding Consumer Behaviour (12 hours)

Meaning, Importance, Consumer buying process, Factors influencing buying behavior. Types of consumer buying decisions

Unit 5: Integrated Marketing Communication (6 hours)

Types of Media: advantages and disadvantages; Concept, reasons for growing importance of IMC, Process of integrated marketing communication. Managing cultural diversity through communication

Practical Exercises

The learners are required to:

1. Perform a role-play to analyse the communication challenges faced by a firm.
2. Analyse how consumer response models could be used by a company such as Philips in planning the introduction of a new product like an Air Purifier.
3. Describe and analyse the promotion mix used by various organisations.
4. Analyse the role of consumer buying behavior in designing marketing strategies of various firms.
5. Design and develop an Integrated Promotion Campaign for a novelty in rural market.
6. Discuss how marketers of low-involvement products like shampoo or soaps would use the various IMC tools differently than a marketer of a high involvement product like a smartphone or a car.

Human Resource Management

BAC: Discipline (HRM)- A2: Organisational Behaviour

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Organisational Behaviour BAC: Discipline (HRM) – A2 | 4 | 3 | 1 | 0 | Pass in XII | Pass in Human Resource Management (BAC: Discipline (HRM) - A1) |

Learning Objectives

The course aims to enhance the understanding of the basic concept of organisational behaviour (OB) and the working of modern organizations. It focuses on the study of human behaviour at three levels: Individual, Interpersonal and Group.

Learning Outcomes

After completion of the course, learners will be able to:

1. Apply the concepts of OB in managing people at the workplace.
2. Analyse the impact of individual behaviour in the working of organisations.
3. Assess the importance of effective communication in organisations.
4. Critically evaluate the role of motivation theories in guiding human behaviour.
5. Analyse the dynamics of group behaviour and evaluate diverse leadership styles and strategies.
6. Evaluate strategies employed to manage organisational conflict, organisational change and stress.

SYLLABUS OF BAC: Discipline (HRM) – A2

Unit 1: Introduction (6 hours)

Organisational Behaviour: Concepts, history and determinants; Contributing disciplines of OB; challenges and opportunities of OB.

Unit 2: Individual Behavior (9 hours)

Meaning and significance of Individual Behavior; Types of Personality; Job related attitude; Components of learning, Factors influencing perception; Values-nature and types.

Unit 3: Communication and Motivation (12 hours)

Understanding Communication; Process of Communication; Essentials of effective communication; Contemporary means of communication.

Motivation – meaning, significance and process; Theories of motivation (Need Hierarchy, Theory X and Theory Y, Two Factors Theory).

Unit 4: Group Behavior and Leadership (12 hours)

Group behavior, Group norms, Group roles, and Group cohesiveness; Group decision making process. Leadership – concept, styles and contemporary issues in leadership.

Unit 5: Dynamics of Organisational Behavior (6 hours)

Organisational culture- concept and determinants; Organisational conflict - sources, resolution strategies; Organisational change- significance and resistance to change; Stress- causes and management of stress.

Practical Exercises

The learners are required to:

1. Analyse the challenges and opportunities of OB.
2. Undertake a group activity to identify personality type of different individuals.
3. Perform role plays on JOHARI Window Model to understand how to improve communication at workplace.
4. Identify innovative motivational tools practiced by contemporary organizations.
5. Conduct a primary survey to study the dynamics of group behaviour.
6. Analyse different leadership styles used in various organisations.
7. Apply and test various stress management techniques like deep breathing, exercise, and mindfulness.

Commercial Laws and Corporate Governance

BAC: Discipline (CLCG)- A2: Cyber Crimes and Laws

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Cyber Crimes and Laws BAC: Discipline (CLCG) – A2 | 4 | 3 | 1 | 0 | Pass in XII | Pass in Limited Liability Partnership: Law and Practice (BAC: Discipline (CLCG) - A1) |

Learning Objectives

The course aims to create an understanding of cyber crimes and to familiarize the students with the application of cyber laws in business and day to day life.

Learning Outcomes

After completion of the course, learners will be able to:

1. Analyse cyber risk associated with online activities and develop related cyber hygiene.
2. Prepare protocols for safe working in the verticals having varied access points, data sources, network, and system-related issues in online activities.
3. Work safely in global virtual space conforming to the regulatory framework and not falling under the ambit of cybercrimes.
4. Generate and preserve electronic evidence for personal and professional use.
5. Analyse the cases and find pertinent facts for resolutions on managerial cyber issues.

SYLLABUS OF BAC: DISCIPLINE (CLCG) – A2

Unit 1: Introduction to Cybercrimes (9 hours)

Computer crime and cybercrimes; Distinction between cybercrime and conventional crimes; Kinds of cybercrimes - cyber stalking, cyber terrorism, forgery and fraud, crimes related to IPRs, cyber defamation, computer vandalism, cyber forensic.

Unit 2: Contemporary Business Issues in Cyber Space (9 hours)

Web-Centric Business, E-Business, and its significance, Instant messaging platform, social networking sites and mobile applications, security risks, Cyber jurisdiction, E-forms; Electronic Money Transfer and UPI, Privacy of Data and Secure Ways of Operation in Cyber Space.

Unit 3: Legal framework and Cyber Laws in India (9 hours)

Definitions under IT Act, 2000; Authentication of Electronic Records; Electronic Governance; Legal Recognition of Electronic Records; Legal Recognition of Digital Signatures; Applications and usage of electronic records and Digital Signatures in Government and its Agencies; Retention of Electronic Records, Intermediaries, and their liabilities; E-signatures.

Unit 4: Regulatory Framework and International Perspective (9 hours)

Regulation of Certifying Authorities; Appointment and Functions of Controller; License to issue Digital Signatures Certificate; Renewal of License; Controller's Powers; Procedure to be Followed by Certifying Authority; Issue, Suspension and Revocation of Digital Signatures Certificate, Duties of Subscribers; Penalties and Adjudication; Appellate Tribunal; Offences; Regulations of PPI (Pre-Payment Instruments) by RBI, Overview of GDPR and Indian data protection regime.

Unit 5: Case Laws (9 hours)

1. Communication Device-Section 2(ha) of the Information Technology (Amendment) Act, 2008-'State v Mohd. Afzal and others (2003), VIIAD (Delhi) 1, 107(2003) DLT385, 2003(71) DRJ178, 2003(3) JCC1669'
2. Computer Network-Section 2 (j) of the Information Technology (Amendment) Act, 2008 'Diebold System Pvt Ltd. v The Commissioner of Commercial Taxes, (2006), 144 STC, 59 (Kar)'
3. Electronic Record Sec. 2 (t)- 'Dharambir v Central Bureau of Investigation 148 (2008) DLT 289'
4. Penalty for Damage to Computer or Computer System- Section 43-'Umashankar Sivasubramanian v ICICI Bank, 18.04.2010. (Petition No. 2462/2008)'
5. Tampering with Computer Source Documents-Section 65-'Syed Asifuddin and Ors.v The State of Andhra Pradesh &Anr. 2006 (1) ALD Cri 96, 2005 CriLJ 4314'
6. Punishment for sending offensive messages-Sec. 66A- 'SMC Pneumatics (India) Pvt. Ltd v Jogesh Kwatra", Suit No. 1279/2001'
7. Punishment for Identity Theft-Section 66C- 'CBI v Arif Azim Case Judicial Reports (Criminal) 2003 (2) page 272'
8. Punishment for Cheating by Personating by using Computer Resource-section 66D- 'National Association of Software and Service Companies (NASSCOM)v Ajay Sood. (2005) F.S.R. 38; 119 (2005) DLT 596, 2005 (30) PTC 437 Del'
9. Punishment for Publishing or Transmitting Obscene Material in Electronic form section 67-'Avnish Bajaj v State (N.C.T.) of Delhi, (2005) 3 Comp, LJ 364 (Del), 116(2005) DLT427, 2005(79) DRJ576'
10. Punishment for Publishing or Transmitting of Material Containing Sexually Explicit Act, etc., in Electronic Form-Section 67A-'R v Graham Waddon., Southwark [Crown Court, 30/6/1999]'

Practical Exercises:

The learners are required to:

1. Discuss recent cyber crime cases reported in dailies and spread awareness about various cyber offences and remedies available.
2. Conduct a survey to ascertain the awareness about various cybercrimes in their nearby locality and prepare easy do's and don'ts for most problematic areas.

3. Enlist cyber hygiene and usage of e-signatures/digital signatures in daily life for improved cyber hygiene.
4. Describe and evaluate the procedure of recording and maintaining electronic evidence, filing online and offline complaints in Cyber Cells.
5. Analyse recent cases related to various cybercrimes and draw implications for managers.

Tax Procedures and Practices

BAC: Discipline (TTP)- A2: Income Tax Practice and Procedures

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Income Tax Practice and Procedures BAC: Discipline (TTP) – A2 | 4 | 3 | 1 | 0 | Pass in XII | Pass in Income Tax Law and Practice (BAC: Discipline (TTP) - A1) |

Learning Objectives

This paper focuses on various provisions and procedures applicable under the Income Tax Act 1961 for filing return of income, assessment and penalties & prosecutions.

Learning Outcomes

After completion of the course, learners will be able to:

1. Analyse the tax planning framework for HUF and firm.
2. Assess the due dates and amount of payment of advance tax.
3. Explore the provisions applicable in case of tax deducted at source (TDS).
4. Analyse the process of assessment and file return of income.
5. Discuss the penalties applicable in case of different defaults.

SYLLABUS OF BAC: DISCIPLINE (TTP) – A2

Unit 1: Computation of Total Income and Tax Liability of Hindu Undivided Family & Firm (12 hours)

Computation of taxable income and tax liability of HUF, computation of taxable income and tax liability of firms and partners [conditions under sections 184 and 40(b)].

Unit 2: Advance Payment of Tax (9 hours)

Advance payment of tax, liability to pay advance tax and due dates of payment of advance tax.

Unit 3: Tax Deducted at Source (9 hours)

Concept of TDS/ TCS, TDS-obligations of the payer of income, TDS on salaries, TDS on interest on securities, TDS on winnings from lotteries, section 194-IA and 194-IB.

Unit 4: Return of Income and Assessment (9 hours)

Return of income, types of returns, Assessment under section 143(1), regular assessment, best judgement assessment, income escaping assessment, the time limit for notice, the time limit for completion of assessment and reassessment.

Unit 5: Penalties and Prosecutions (6 hours)

Penalties and prosecutions, appeals, revisions, rectifications, search and seizure, Information technology and tax administration, Income Tax authorities, TAN (Tax Deduction and Collection Account Number) and TIN (Tax Information Network).

Practical Exercises

The learners are required to

1. Prepare a case study for the HUF with adjustments for carry forward and set off.
2. File the advance taxes for an assessee.
3. File the TDS return for an assessee.
4. Assess the tax liability under the normal tax provisions of the Income Tax Act 1961 and under the alternative tax regime structure.
5. Prepare a flow chart of the appeal procedure.
6. Prepare a report on the penalties and interest applicable in case of default.

Modern Office Management

BAC: Discipline (MOM)- A2: Modern Office Practices

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Modern Office Practices BAC: Discipline (MOM) – A2 | 4 | 3 | 1 | 0 | Pass in XII | Pass in Business Communication (BAC: Discipline (MOM) - A1) |

Learning Objectives

The aim of the paper is to acquaint the students with Modern Office Practices in an office environment. The knowledge acquired by the students would help them to manage the modern office effectively as office manager, executive or personal secretary by using the skills set acquired by them through this course.

Learning Outcomes

After completion of the course, learners will be able to:

1. Examine the nature of conventional office, modern office, paperless office, automated and virtual office.
2. Analyse recent trends in office environment.
3. Evaluate the significance of office mechanisation.
4. Analyse the procedure of procurement and maintenance of office forms, stationery, office supplies and machines procured and used by employees.
5. Maintain official records and interpret office correspondence system.

SYLLABUS OF BAC: Discipline (MOM) – A2

Unit 1: Modern Office and its Functions (9 hours)

Meaning and Definition of Office, Characteristics of an Office, Requisites of an Office, Significance of Modern Office, Scope and Growth of Office Activities, Office Management, Objectives and Principles of Office Management, Primary and Secondary/Administrative Functions, Development of Office Practices, Office Hierarchy, Changing the Nature And Scope of Office Work, Functions of Office Manager, Essential Qualification, Experience and Supervisory Skills Required For Office Manager, Management and Administrative Functions, Changing Office Scenario, Concept of Paperless Office, Automated Office, Virtual Office.

Unit 2: Office Environment (9 hours)

Location and Office Building, New Trends -Office Spaces, Open and Private Office, Front and Back Office Support, Infrastructure, Safety and Security, Ventilation, Green Office, office layout, concept of open office, front and back office support, Use of modular office furniture, emerging office concepts: green office, home environment at work, work from home, flexible office hours, significance of office location, factors affecting choice of office location, working environment.

Unit 3: Office Mechanization (9 hours)

Introduction, meaning and importance of Office Mechanization, objectives and use of office automation tools – desktop/personal computers, printers, scanner, fax machines, photocopier, calling bell, telephones, mobile phones, video conferencing, CCTV Camera, biometric attendance machines.

Unit 4: Office Supplies, Office Forms and Procurement (9 hours)

Office Forms, Principles of Design and Development of Forms, Control of Forms, Office Stationery and Supplies, Office Mechanization, Advantages and Disadvantages of Mechanization, Criteria of selection of Office Machines, Lease and Purchase of Office Equipment, Procurement of Office Supplies, Modular Furniture, Purchase Procedure, e-Tender and Stock of Supplies.

Unit 5: Office Correspondence, Records Management and Banking (9 hours)

Mails, Office Correspondence, Organizing Correspondence, Production and Drafting of Correspondence, Typing and Stenographic Services, Dictating Letters, Handling and Disposal of Mails, Handling and Supervision of Office Records, Management of office records, Disposal and Retention of Office Records. Banking: UPI, PayTM, Net Banking, Mobile Banking, RTGS/NEFT/IMPS, Demand Drafts and validity of cheques.

Practical Exercises

The learners are required to:

1. Visit the administrative office of their College, any Government office or any Private office, and examine its characteristics.
2. Observe the office building, ventilation and layout of the office building visited.
3. Analyse the mechanisation tools employed in the office visited.
4. Observe the office supplies, stationery, office forms used in different office systems.
5. Analyse the system of maintaining official records and communication in different offices.

Category-II

B.Com. (Prog.)

Discipline Specific Core Course- 2.1 (DSC-2.1): Corporate Accounting

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Corporate Accounting DSC- 2.1 | 4 | 3 | 1 | 0 | Pass in XII | Pass in Financial Accounting (DSC- 1.3) |

Learning Objectives

The course aims to help learners to acquire conceptual knowledge of corporate accounting systems and to learn the techniques of preparing the financial statements of companies.

Learning outcomes

After completion of the course, learners will be able to:

1. Analyse accounting for share capital, debentures, bonus shares, redemption of preference shares and debentures of a company.
2. Prepare financial statements of companies manually as well as using online software.
3. Interpret the Valuation of Intangible Assets and Shares.
4. Describe accounting for Amalgamation and Internal Reconstruction of Companies.
5. Prepare Annual Reports of companies and analyse the voluntary and mandatory information contained in them.

SYLLABUS OF DSC-2.1

Unit 1: Accounting for Share Capital and Debentures (6 hours)

Types of shares; Accounting for Share Capital, Issue of Rights and Bonus Shares; ESOPs and Buy-Back of shares; Issue and Redemption of preference Shares and Debentures. Underwriting of Shares and Debentures. [In reference to Relevant Accounting Standards (AS and Ind AS) and Guidance Notes as applicable.]

Unit 2: Financial Statements of Companies (12 hours)

Preparation of financial statements of corporate entities including one Person Company (excluding calculation of managerial remuneration) as per Division I and II of Schedule III of the Companies Act 2013; Related Parties as per AS-18, Preparation of Statement of Profit and Loss, Balance Sheet, Statement of Equity and Cash flow Statement manually and using appropriate software. Interpreting the ratios calculated as per Schedule III of the Companies Act 2013 [with reference to Relevant Accounting Standards (AS and Ind AS) and the relevant provisions of The Companies Act, 2013, as applicable.]. Calculation of EPS as per AS 20.

Unit 3: Valuation of Intangible Assets and Shares (9 hours)

Valuation of Intangible Assets and Shares. Value Added Statement, Economic Value Added, Market Value Added, And Shareholder Value Added.

Unit 4: Amalgamation of Companies and Internal Reconstruction (9 hours)

- (a) Accounting for Amalgamation of Companies (excluding inter-company holdings) applying AS 14/Ind AS 103.
- (b) Accounting for Different forms of Internal Reconstruction (excluding drafting of Internal Reconstruction Scheme).

Unit 5: Corporate Financial Reporting (9 hours)

Meaning, need and objectives; Constituents of Annual Report and how it is different from financial statements; Contents of report of the Board of Directors; XBRL Reporting. Drafting of Notes to Accounts. Segment Reporting as per AS-17, Sustainability Reporting, Triple Bottom Line Reporting, CSR Reporting.

Notes:

- (1) The relevant Accounting Standards (both AS & Ind AS) for all of the above topics should be covered.
- (2) Any revision of the relevant Indian Accounting Standards/Accounting Standards would become applicable.
- (3) The relevant provisions of The Companies Act, 2013, as applicable for all of the above topics should be covered.

Practical Exercises

The learners are required to:

- 1. Collect prospectus issued by reputed companies, and examine the matters related to issue of shares.
- 2. Prepare financial statements of companies manually as well as using appropriate software.
- 3. Examine the annual reports of business organisations to find out whether applicable accounting standards (AS and Ind AS) are complied with or not.
- 4. Value Intangible Assets and Shares of a company.
- 5. Collect information from business newspapers, periodicals, print and digital media on the amalgamation of companies and prepare a report.
- 6. Download annual reports of reputed companies from the websites and analyse the voluntary and mandatory information contained in these statements.

7. Download and analyse notes on accounts from the annual reports of reputed companies from the websites.

Discipline Specific Core Course- 2.2 (DSC-2.2): Company Law

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Company Law DSC- 2.2 | 4 | 3 | 1 | 0 | Pass in XII | NIL |

Learning Objectives

The course aims to develop and comprehend business and its processes in accordance with the provisions of the Companies Act, 2013 while analysing case laws.

Learning outcomes

After completion of the course, learners will be able to:

1. Analyse the regulatory aspects and the broader procedural aspects involved in different types of companies covering the Companies Act, 2013 and Rules.
2. Prepare the basic legal documents required for formation of a company.
3. Analyse the process and documents required for raising capital for the company.
4. Analyse the managerial composition of companies and examine the process of company meetings.
5. Evaluate the framework of dividend distribution and develop understanding of the winding up process including Insolvency Resolution.

SYLLABUS OF DSC-2.2

Unit 1: Introduction (9 hours)

Meaning and characteristics of a company; Lifting of corporate veil; Overview of administration of Company Law; Types of companies including private and public company, government company, foreign company, one person company, small company, associate company, dormant company and producer company; Association not for profit; Illegal association.

Unit 2: Formation and Incorporation Documents (9 hours)

Formation of company, promoters, their legal position and pre incorporation contracts; Online registration of a company. Memorandum of Association and its alteration, Articles of Association and its alteration, Doctrine of constructive notice, Doctrine of ultra vires and indoor management.

Unit 3: Share Capital (9 hours)

Prospectus, Shelf and Red herring prospectus, misstatement in prospectus; Book building. Allotment and Forfeiture of share, Sweat Equity, ESOPs, Bonus issue, and Further issue of shares, buyback and provisions regarding buyback; Transfer and transmission of shares; Demat system.

Unit 4: Management and Meetings (9 hours)

Directors: Legal position, Disqualifications, Director Identification Number (DIN); Classification of directors-Additional, Alternate and Casual directors, Women directors, Independent director, small shareholder's director; Appointment, Removal of directors; Powers and Duties; Key managerial personnel (KMP); Board Meetings; Shareholders' meetings: AGM and EGM. Convening and conduct of meetings: Requisites of a valid meeting; Resolutions; Postal ballot; e-voting.

Unit 5: Dividends, Audit and Winding up (9 hours)

Provisions relating to payment of Dividend. Company Audit - auditor's qualification and disqualifications, Auditor's appointment, rotation and removal. Winding Up: Concept and Modes of Winding Up; Provisions of winding up under Insolvency and Bankruptcy Code 2016.

Practical Exercises

The learners are required to:

1. Identify the type of company based on information available on NSE/BSE website and analyse the regulatory and procedural aspects covering the Companies Act, 2013.
2. Fill dummy SPICe+ form for incorporation of a company.
3. Write about the timeline and details of the book building process of an actual IPO/FPO.
4. Identify the actual composition of the Board of Directors and examine the minutes of AGM/EGM of listed companies.
5. Analyse a case study on the winding up of a company.

Suggested Readings

Discipline Specific Core Course- 2.3(DSC-2.3): Human Resource Management

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Human Resource Management DSC- 2.3 | 4 | 3 | 1 | 0 | Pass in XII | NIL |

Learning Objectives

The course aims to acquaint the learners with the techniques and principles to manage human resources of an organisation.

Learning Outcomes

After completion of the course, learners will be able to:

1. Evaluate the importance of contemporary and emerging HR issues.
2. Analyse the concept and sources of recruitment and selection process.
3. Devise employee training and development programs.
4. Design performance appraisal techniques and compensation schemes.
5. Design HR policies for grievance redressal, employee health, safety, welfare, social security, and stress-free work life balance.

SYLLABUS OF DSC-2.3

Unit 1: Introduction to Human Resource Management (4 hours)

Basic concepts and significance of HRM, Role and functions of HR manager. Emerging issues in human resource management: Workplace diversity, employee empowerment, downsizing, VRS, work life balance, and work from home.

Unit 2: Procurement of Human Resource (9 hours)

Human resource planning- Quantitative and qualitative dimensions; Job analysis – Job description and job specification; Recruitment – concept and sources; Selection – concept and process; Tests and interview; Placement, induction and socialization; Employee retention.

Unit 3: Aspects of Training and Development (12 hours)

Concept and importance; Role specific and competency-based training; Training and development methods – Apprenticeship, understudy, job rotation, vestibule training, case study, role playing, sensitivity training, In-basket, management games, conferences and

seminars, coaching and mentoring, management development programs; Training process outsourcing.

Unit 4: Performance Appraisal and Compensation Management (12 hours)

Performance appraisal- Nature, objectives, process, and methods; Performance management; Potential appraisal; Employee counselling; Employee enhancement: transfer and promotion. Compensation - concept and policies, Types of compensation: base and supplementary compensation; Individual, group and organisation incentive plans; Fringe benefits; Performance linked compensation: employee stock option; pay band compensation system and job evaluation.

Unit 5: Maintenance of employees and Emerging Horizons of HRM (8 hours)

Employee health and safety; Employee welfare; Social security (excluding legal provisions); Employer-employee relations; Grievance handling and redressal; Industrial disputes: Causes and settlement machinery; e-HRM; Human Resource Information System (HRIS) and e-HRM; Impact of HRM practices on organisational performance; HR Audit, Contemporary issues in HRM - emerging job opportunities, work life balance and work from home.

Practical Exercises

The learners are required to:

1. Design a human resource plan with a focus on contemporary and emerging HR issues.
2. Perform a role play and conduct an orientation cum induction programme for new recruits.
3. Design a training and development plan for a hypothetical organisation.
4. Design performance appraisal techniques and compensation schemes for a hypothetical organisation.
5. Design employee welfare scheme for a hypothetical organisation.

Suggested Readings

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

41. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 38-1-3 dated 08.12.2022 regarding Syllabi of 2nd Semester of Departments under Faculty of Science

Add the following:

Syllabi of Semester-II of the following departments under Faculty of Science based on Under Graduate Curriculum Framework -2022 to be implemented from the Academic Year 2022-23.

FACULTY OF SCIENCE

DEPARTMENT OF BOTANY

**Category-I
B.Sc. (H) Botany**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Microbiology and Plant-Microbe Interactions | 04 | 2 | 0 | 2 | 10+2 from any recognized Board with Biology | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

To impart basic understanding about microbial world and their interactions with plants.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understanding microbes and their roles and applications.
- Understanding about modes of reproduction of Viruses, Archaeobacteria, Eubacteria.
- Understand plant-microbe interaction

SYLLABUS OF DSC-4

Unit 1: Introduction 02 Hours
Microbial world, Growth and nutrition of microbes with reference to nutritional media.

Unit 2: Viruses 07 Hours
Discovery; Physicochemical and biological characteristics; Classification (Baltimore); General structure with special reference to viroids and prions, DNA and RNA viruses; General account and mechanism of replication, lytic and lysogenic cycle; General account of viral diseases of plants (mosaic and vein clearing disease).

Unit 3: Bacteria 09 Hours
Discovery, General characteristics; Types - Archaeobacteria, Eubacteria, Wall less forms (Mycoplasma, Phytoplasma and Spheroplasts); Cell structure; Nutritional types; Reproduction - vegetative, asexual and recombination (conjugation, transformation and transduction); General account of bacterial diseases of plants (Citrus canker, Angular leaf spots of cotton).

Unit 4: Applied Microbiology 04 Hours
Economic importance of viruses with reference to vaccine production, role in research, medicine and diagnostics and agriculture. Economic importance of bacteria with reference to their role in agriculture and industry (fermentation and medicine).

Unit 5: Plant-Microbe interactions 08 Hours
General account of Plant-microbe interactions; Plant growth promoting rhizobacteria (PGPR); Mechanism of nitrogen fixation by Cyanobacteria and Rhizobia; Types of mycorrhizal association with plants; Ectomycorrhiza and Endomycorrhiza and their effects on plant growth.

Practicals:

1. Study of Viruses: Electron micrographs / Model - T-Bacteriophage and TMV; specimens/digital resources/ Line drawings of Lytic and Lysogenic Cycle. 08 Hours
2. Study of Bacteria: Electron micrographs of bacteria; Types of Bacteria from temporary/permanent slides. Endospore, Binary fission, Conjugation, Root nodule through specimens/digital resources. 08 Hours
3. Study of Plant Growth Promoting Rhizobacteria (PGPR) through specimens/digital resources (at least three). 04 Hours
4. Gram staining to differentiate between Gram-positive and Gram-negative bacteria. 08 Hours
5. Study of *Rhizobium* from root nodules of a leguminous plant. 08 Hours
6. Isolation of *Anabaena* from *Azolla* leaves. 08 Hours
7. Histochemical staining to observe Arbuscular Mycorrhizal Fungi (AMF) colonization in roots. 08 Hours
8. Study of Bacterial diseases (Citrus canker, Angular leaf spots of cotton) and viral diseases

of plants (mosaic and vein clearing disease) through specimens/digital resources.

08 Hours

Suggested Readings:

1. Pelczar, M.J. (2001) Microbiology, 5th edition. New Delhi, Delhi: Tata Mc-Graw- Hill Co.
2. Tortora, G.J., Funke, B.R., Case, C.L. (2016) Microbiology: An Introduction, Indian edition, Pearson India Education Services Pvt. Limited, Noida, India
3. Prescott, L.M., Harley J.P., Klein D. A. (2005). Microbiology, 6th edition: McGraw Hill, New Delhi.
4. Gupta, R., Chugh, G. (2022) Plants, Microbes and Diseases 1st Edition, I.K. International Pvt. Ltd., Delhi.
5. Subba Rao, N.S. (2000) Soil Microbiology, Oxford & IBH Publishing Co. Pvt. Ltd., New Delhi

Additional Resources:

1. Talaro, K.P., Talaro, A. (2006). Foundations in Microbiology. Mc-Graw Hill, New Delhi

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5: Plant Resources and Economic Botany

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Plant Resources and Economic Botany | 04 | 2 | 0 | 2 | 10+2 from any recognized Board with Biology | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To familiarize students with the economic importance of diverse plant species and train them in identifying plants of economic importance through field visit/s, live plant specimens, herbarium specimens and digital resources.
- To make students understand the importance of various plant parts and derived products used as food, fibers, medicines, oils and other economically important products.
- To acquaint students with the processing of various economically important plant resources and train them to identify and analyses nutrients using simple microchemical tests.

Learning outcomes

The Learning Outcomes of this course are as follows:

- This course would provide students with information about the economic importance and products derived from plants and their roles in our daily lives.
- Students will learn to perform micro-chemical tests to study presence of various components.
- Students will explore the regional diversity in food crops and other plants and their ethnobotanical importance.

SYLLABUS OF DSC-5

Unit 1: Introduction and Origin of Cultivated Plants

02 Hours

Importance of Plant Resources; Vavilov's concept for the Origin of cultivated plants; Centres of Origin (Primary and Secondary); Centres of diversity, Harlan's concept of gene pools. Plant Genetic Resources and their conservation.

Unit 2: Cereals

04 Hours

Wheats (Origin, Evolution of Wheats (tetra- & hexaploid), Morphology, Production, and Economic Importance of Hexaploid Wheat); Rice (Origin-Monophyletic and Polyphyletic, Production, Morphology, Comparison between *indica* and *japonica* Rice, Parboiling,

Economic Importance); Other cereals: Maize, Barley, Oats, Millets (jowar, bajra, ragi) and Pseudocereals.

Unit 3: Legumes

03 Hours

General account (Nutritive Value of Pulses, Protein Malnutrition, Lathyrism, Favism, Ecological Importance); chick pea and pigeon pea (Production, Morphology and Economic Importance). Other Legumes: Lentil, Cluster Bean, Lathyrus, Beans, Pea, Cowpea, Fodder legumes and Green manure crops.

Unit 4: Sugars and Starches

03 Hours

Sugarcane (Morphology, Ratooning, Nobilization, Products and By-products); Potato (Morphology, Tuber Anatomy, Seed Tubers vs True Potato Seeds and Economic uses).

Unit 5: Spices, Condiments & Flavourings

03 Hours

General Account (Spices, Condiments, Culinary Herbs and Essences, with examples), Importance of Spices, Clove (Morphology, Anatomy of part used and Economic Importance) and Black Pepper (Morphology, Anatomy of part used and Economic Importance). Other examples: Ginger, Turmeric, Cinnamon, Saffron, Cardamom, Chillies & Pepper, Fennel, Coriander, Cumin, Vanilla, Nutmeg.

Unit 6: Beverages

02 Hours

Types of Beverages (Alcoholic and Non-Alcoholic) with examples, Tea and coffee (Morphology, Chemistry, Processing and Economic Importance)

Unit 7: Fibres and Fibre-yielding plants

03 Hours

Classification of Fibres based upon their Origin (surface fibres, bast fibres, and leaf fibres, with examples); Jute (morphology, extraction and economic importance), Cotton (*Gossypium* species, morphology, processing and economic importance) Comparison between Jute and Cotton fibers. Other examples: Flax, Hemp and Coconut.

Unit 8: Oil-Yielding Plants

03 Hours

Fatty Oils and Essential Oils, Comparison between Fatty Oils and Essential Oils; Fatty Oils (Classification with examples, keeping quality), Groundnut (Morphology and Economic Importance); Essential Oils (General characteristics, Methods of Extraction and Economic Importance, with examples). Other examples: Rapeseed & Mustard (canola), Coconut, Olive, Castor, Cottonseed, Sesame, Soybean, Linseed.

Unit 9: Medicinal and Drug-Yielding Plants

02 Hours

Brief Account of Therapeutic Drugs with Examples; Morphology, Chemical Constituents, Economic Importance of *Cinchona*, *Rauwolfia*, *Digitalis*.

Unit 10: Fumigatory & Masticatory

02 Hours

Tobacco (Morphology, species - *Nicotiana tabacum* & *N. rustica*), Processing, Products, Economic Importance and Health Hazards), *Cannabis*, *Papaver* (Morphology, Chemical Constituents, Economic Importance)

Unit 11: Rubber

01 Hour

Para Rubber - *Hevea brasiliensis* (Morphology, Tapping of latex, Processing, Products and Economic Importance)

Unit 12: Fruits & Nuts**01 Hour**

Tropical & Temperate; *Citrus*, Mango, Banana, Apple, Pineapple, Papaya; Nuts: Cashew, Walnut, Almond & Pistachio.

Unit 13: Vegetables**01 Hour**

Common examples of root crops, leafy vegetables (herbage), fruit seed vegetables;

Practicals:

1. **Cereals:** Wheat (Habit Sketch, L.S./T.S. grain, W.M. starch grains, Micro-chemical tests), Rice (Habit Sketch, study of paddy and grain, W.M. starch grains, Micro-chemical tests). Millets - Pearl Millet, Finger Millet and Pseudocereals - Amaranth Grain, Quinoa (specimens/digital resources and grains) **08 Hours**
2. **Legumes:** Chickpea, pigeonpea (Habit, fruit, seed structure, Micro-chemical tests). **04 Hours**
3. **Sugars and Starches:** Sugarcane (Habit Sketch, Products and By-products, Cane Juice- Micro - chemical tests); Potato (Habit Sketch, Tuber morphology, T.S. tuber to show localization of starch grains, W.M. starch grains, Micro-chemical tests). **08 Hours**
4. **Spices:** Clove, Blackpepper (Habit and sections L.S./T.S.), Saffron, fennel (specimen/digital resources) **04 Hours**
5. **Beverages:** Tea (plant specimen, tea leaves), Coffee (plant specimen, beans) **04 Hours**
6. **Fibres:** Jute (specimens/digital resources of *Corchorus capsularis* and *C. olitorius*, T.S. stem, test for cellulose and lignin on section of stem and fibre). Cotton (specimen, W.M. seed to show lint and fuzz; W.M. fibre and test for cellulose) **08 Hours**
7. **Oil-Yielding Plants:** Fatty Oils: Groundnut (Habit-specimen, Fruit, seeds, Microchemical Tests) Coconut-Habit (photograph), Fruit, T.S. nut, Mustard - (Habit- specimen, Fruit, seeds); Essential Oils: Habit Sketch of Rose, Jasmine, Vetiver, Sandalwood and *Eucalyptus* (specimens/photographs) **08 Hours**
8. **Drug-Yielding plants:** Habit - Fever Bark Tree, Poppy, Foxglove and Cannabis (Specimens/ Photographs) **08 Hours**
9. **Tobacco:** *Nicotiana tabacum* and *N. rustica* (specimens/photographs), Tobacco Products
10. **Rubber:** Para Rubber-Habit, Tapping of latex (Specimen/photograph), Rubber Products **04 Hours**
11. **Petro-crops:** *Saccharum officinarum* , *Jatropha* sp. **04 Hours**

Suggested Readings:

1. Kochhar, S.L. (2012). Economic Botany in Tropics. New Delhi, India: MacMillan & Co.
2. Kochhar, S.L. (2016). Economic Botany – A Comprehensive Study, 5th Edition. New Delhi, India: Cambridge University Press.
3. Wickens, G.E. (2001). Economic Botany: Principles & Practices. The Netherlands: Kluwer Academic Publishers.
4. Chrispeels, M.J., Sadava, D.E. (1994). Plants. Genes and Agriculture. Jones & Bartlett-Publishers.
5. Berg L, (2008). Introductory Botany: Plants, People, And The Environment, Thomson Brooks/Cole.
6. Cook F.E.M. (1995). Economic Botany: Data Collection Standard Royal Botanic Garden, Kew, Richmond.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 6: Plant Systematics

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------|-----------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Plant Systematics | 04 | 2 | 0 | 2 | 10+2 from any recognized Board with Biology | Nil |

Learning Objectives

The course will help students gain knowledge about:

- The basics of plant systematics and its inter-relationships with allied subject areas

Learning outcomes

On completion of the course the students will be able to:

- understand technical terminology used in plant taxonomy
- apply the terminologies to describe, identify and classify flowering plants
- search and analyse taxonomic information from internet-based scientific databases and other resources
- interpret and evaluate the concept of species and evolutionary processes in angiosperms
- comprehend and compare various systems of classifications
- recognise diversity in local/regional flora
- appreciate the significance and application of systematics in science and welfare of society

SYLLABUS OF DSC-6

Unit 1: Introduction

02 Hours

Identification, Classification (types) and Nomenclature, Phylogeny; Major contributions - Parasara, Charaka, Theophrastus, Bauhin, Tournefort, Linnaeus, Adanson, de Candolle, Bessey, Hutchinson, Takhtajan, Bremer, MW Chase

Unit 2: Resources in Plant Identification

02 Hours

Literature (Floras, Manuals, *Icones*, Monographs, Revisions, Journals, e-resources); Herbaria and Botanical gardens (in brief)

Unit 3: Systematics - An Interdisciplinary Science

04 Hours

Relevance of palynology, cytology, phytochemistry and molecular data (cite at least (streak, spread & pour), replica plating, serial dilution.

three examples from each with emphasis on application in resolving taxonomic problems - details of techniques to be excluded)

Unit 4: Botanical Nomenclature

05 Hours

Principles and rules (ICN); Ranks and names; Principle of priority and its limitations; Concept of 'Type', Author citation, Valid publication, Rejection of names; Nomenclature of hybrids

Unit 5: Systems of Classification

06 Hours

Taxonomic hierarchy; Concept of species (morphological, biological and evolutionary); Classifications - Bentham and Hooker's (up to series), Engler and Prantl's (upto sub-class) and Angiosperm Phylogeny Group (APG) classification (major clades).

Unit 6: Approaches in Systematics

06 Hours

Terms and concepts (primitive and advanced, homology and analogy, parallelism and convergence, monophyly, paraphyly, polyphyly, clades and grades).

Phenetics - Principles, Methodology, Characters; Selection of OTUs, Character weighing and Coding; Cluster analysis; Phenogram.

Cladistics - Principles, Methodology, Characters; Selection of EUs, Character weighing and Coding; Cluster analysis; Cladogram

Unit 7: Evolution of Angiosperms

05 Hours

Concept of a primitive flower (Euanthial theory and Pseudanthial theory); Basal Living Angiosperms; Herbaceous origin; Co-evolution of angiosperms with animals.

Practicals:

1. Field trip/ Visit to any herbaria/ Botanical Garden. **04 Hours**
2. To prepare at least five herbarium specimens and identify them using available resources (Literature, herbaria, e-resources, taxonomic keys) and classify up to family level (according to Bentham and Hooker's classification and compare it with APG IV System in the field note book). **08 Hours**
3. Description of taxa using semi-technical terms and identification of the families according to Bentham and Hooker's classification and compare the placement of family with APG IV System (Only placement of family according to APG IV system to be mentioned) **48 Hours**

Note: Any **twelve** families from the following list to be studied with **at least two** specimens (**or one** where limitations exist).

List of Suggested Families (*mandatory)

Acanthaceae, Amaranthaceae, *Apiaceae, Apocynaceae, *Asteraceae, *Brassicaceae, *Euphorbiaceae, *Fabaceae, *Lamiaceae, Liliaceae, *Malvaceae, Moraceae, *Poaceae, *Ranunculaceae, *Solanaceae

Suggested Readings:

Category II
B.Sc. Life Science with Botany as one of the Core Discipline

| DISCIPLINE SPECIFIC CORE COURSE – 2: Genetics and Molecular Biology | | | | | | |
|---|---------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
| | | Lecture | Tutorial | Practical/ Practice | | |
| Genetics and Molecular Biology | 04 | 2 | 0 | 2 | 10+2 from any recognized Board with Biology | Nil |

Learning Objective

To apprise students with the basic principles of Genetics and Molecular Biology and its applications in living systems

Learning Outcome:

Students would be able to

- understand the fundamentals of Mendelian inheritance and non-Mendelian inheritance.
- describe the concepts of linkage and crossing over and their usage in constructing genetic maps.
- gain knowledge about chromosomal aberrations and mutations.
- become familiar with structure and function of nucleic acids with reference to replication, transcription and translation.
- understand the mechanisms of gene regulation

SYLLABUS OF DSC-02

Unit 1: Mendelian genetics and extrachromosomal inheritance

06 Hours

Mendel's principles of inheritance; chromosomal theory of inheritance; incomplete dominance and co-dominance; multiple allelism; lethal alleles (dominant and recessive lethals); deviations of Mendelian dihybrid ratio (Epistatic interactions-Dominant, Recessive, Duplicate Dominant, Duplicate Recessive, Duplicate Gene Interaction, Dominant - Recessive); polygenic inheritance; numericals based on above; extrachromosomal inheritance (Chloroplast Inheritance: Variegation in Four O' clock plant; Mitochondrial inheritance: petite mutants in yeast); Maternal effect (shell coiling in snails).

Unit 2: Structure & Function of the gene

02 Hours

Classical and molecular concept of gene - Benzer's cis-trans complementation analyses & fine map of rII locus in phage. Central Dogma.

Unit 3: Linkage, crossing over and chromosome mapping

03 Hours

Discovery; linkage and crossing over; recombination frequency: two factor crosses; sex linkage (eye color in *Drosophila*; colour blindness and haemophilia in humans).

Unit 4: Variation in chromosome number and structure

03 Hours

Haploidy, polyploidy, autopolyploidy (examples: banana, watermelon), allopolyploidy (ancestry of wheat) and aneuploidy (Down's, Turner's and Klinefelter's syndromes); Deletion; Duplication (Bar eye in *Drosophila*); Inversion (paracentric and pericentric); Translocation (*Rhoeo*, *Oenothera*; Robertsonian translocation, Familial Down Syndrome and cancer).

Unit 5: DNA structure and replication**03 Hours**

Discovery of DNA; Watson and Crick model of DNA structure; semiconservative replication (Meselson & Stahl's experiment); DNA replication mechanism in *E. coli* (semi-discontinuous mode and Y-fork).

Unit 6: Mutations**03 Hours**

History; mutation types with examples [spontaneous and induced; somatic and germinal; biochemical mutations; point mutations (base substitutions): transition and transversion; deletion and frameshift mutations), missense and nonsense mutations]; Molecular basis of mutation; Mutagens - physical (UV and X-rays), chemical mutagens [Base analogues, deaminating, alkylating and intercalating agents] and Transposons.

Unit 7: Gene expression**06 Hours**

Genetic code; Structure and types of RNA; Transcription and Translation in Prokaryotes; Transcription, RNA processing and Translation in Eukaryotes.

Unit 8: Regulation of gene expression: Prokaryotes**04 Hours**

Inducible and repressible systems, negative and positive control of lactose operon and tryptophan operon. **Eukaryotes** - Transcriptional gene silencing - Role of chromatin, DNA methylation, histone modifications; cis-acting elements (promoters & enhancers/silencers), trans-acting factors; Post-transcriptional gene regulation (RNA interference/ PTGS), role of small RNAs, Epigenetics.

Practicals:

1. To study mitosis in *Allium cepa* through squash preparation of root tips. **04 Hours**
2. To study meiosis in *Allium cepa* through smear preparation of anthers. **08 Hours**
3. To study incomplete dominance and deviations of Mendelian dihybrid ratio (12:3:1, 9:3:4, 9:7, 15:1, 13:3) through seed samples. **08 Hours**
 - a) Human Genetics b) Study of autosomal & sex-linked dominant & recessive inheritance through pedigree analyses. c) n ABO blood group testing using kits, d) To study the syndromes (Down's, Klinefelter's, and Turner's) through karyotypes **08 Hours**
4. To study chromosomal aberrations: reciprocal translocation through squash preparations of *Rhoeo* anthers. Complex translocation ring, quadrivalents, lagging chromosomes, dicentric/inversion bridge through permanent slides. **08 Hours**
5. To prepare LB medium, inoculate and maintain (spread plate, streak plate, pour plate & serial dilution methods) *E. coli* cultures. **08 Hours**
6. To isolate genomic DNA from cauliflower and *E.coli*. Visualise using agarose gel electrophoresis. **08 Hours**
7. To estimate DNA by diphenylamine method. **04 Hours**

Suggested Readings:

3. Pierce, B. A. (2020). Genetics: A Conceptual Approach Seventh Edition, Macmillan

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY THE DEPARTMENT of BOTANY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Ethnobotany | 04 | 2 | 0 | 2 | 12 th Pass | NIL |

Learning Objectives

- To have the knowledge of the plants used by the local communities, tribals, ethnic groups, their nutritive and medicinal value.

Learning outcomes

After studying this course the student will gain knowledge about:

- Students would have an understanding of the treasure, value and usefulness of the natural products and their efficient use by the local communities as food and medicine and their conservation practices.

SYLLABUS OF GE-6

Unit 1: Introduction to Ethnobotany and Basic Taxonomy

06 Hours

Introduction, concept, scope and objectives; Ethnobotany as an interdisciplinary science, databases and knowledge resource (Traditional Knowledge Digital Library), The relevance of ethnobotany in the present context; Major and minor ethnic groups or Tribals of India, and their life styles, Plants used by the indigenous societies: a) Food plants b) Medicinal plants c) intoxicants and beverages d) Resins and oils and miscellaneous uses.

Unit 2: Applied Ethnobotany

07 Weeks

Role of ethnobotany in modern Medicine, Medico-ethnobotanical sources in India; Significance of the following plants in ethnobotanical practices (along with their habitat and morphology): a) *Azadiractha indica*, b) *Ocimum sanctum*, c) *Vitex negundo*, d) *Gloriosa superba*, e) *Tribulus terrestris*, f) *Pongamia pinnata*, g) *Cassia auriculata*, h) *Indigofera tinctoria*.

Unit 3: The Ecology of Ethnobotany

07 Hours

Ethnobotany—Spirits, Lore, Material Cultures, Folk Magic, Narcotics, Stimulants; Nutritional Ethnobotany – Agriculture, foraging and wild foods; Linguistic

Ethnobotany—Botanical Classification and Ethics; Medicinal Ethnobotany and Ethnopharmacology; Ethnoveterinary knowledge

Unit 4: Research Methods in Ethnobotany

06 Hours

Etic and Emic Perspectives: a) Field work; b) Herbarium; c) Ancient Literature and oral traditions; d) Archaeological finding inferences; e) Religious and sacred places.

Unit 5: Protecting Knowledge

04 Hours

Ethnobotany and legal aspects, Ethnobotany as a tool to protect interests of ethnic groups, Sharing of wealth concept with few examples from India, Biopiracy, Intellectual Property Rights and Traditional Knowledge; Case studies of traditional medicines leading to development of modern pharmaceutical products (use of *Trichopus zeylanicus* by kanhi tribe and *Artemesia* sp. for malaria cure)

Practicals: **60 Hours**

- Collection, identification and preparation of herbarium of three ethno-botanically important plants with appropriate references
- Preparation of crude extract of ethno-botanically important plants with appropriate references (any method to be used)
- Project work-documentation, literature survey, and collection of information on ethno-botanically useful plants from traditional healers)

Suggested Readings:

- Jain, S.K. (2010). Manual of Ethnobotany. Rajasthan: Scientific Publishers.
- Martin, G.J. (1995). Ethnobotany: A Methods Manual. Chapman Hall
- Cunningham, A.B. (2001). Applied Ethnobotany: People, Wild Plant Use and Conservation. Earthscan, London.
- Young, K.J. (2007). Ethnobotany. Infobase Publishing, New York.
- Schmidt, B.M., Cheng, D.M.K. (Eds.) (2017). Ethnobotany: A Phytochemical Perspective. John Wiley & Sons Ltd. Chichester, UK.
- Research papers from various Scientific Journals for case studies.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-7)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Exploring Nature through Lens | 4 | 2 | 0 | 2 | 12 th Pass | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To provide students a comprehensive introduction to photography, including both aesthetic and technique.
- To get students to rethink the environment in which they live through the medium of pictures.
- To become thoroughly familiar with digital camera and smartphone photography technology.
- To develop a working knowledge of digital image modification,
- To understand the importance and use Nature photography in your business and career prospects.
- To enhance appreciation for the tremendous beauty inherent in plants and gardens.

Learning outcomes

On successful completion of this course, a student will be able to:

- understand the digital camera or smartphone camera functions.
- use different photographic equipment to enhance their photographic skills.
- know about the photographic variables with weather and season.
- exploit their photographic work in various professions and for entrepreneurship development.

SYLLABUS OF GE-7

Unit 1: Basics of Photography and Videography

10 Hours

History and development of digital photography, Introduction to lenses and camera, Definitions (Megapixel, Magnification, Resolving Power, Zoom feature, contrast and brightness of image), Types of lenses, analog camera, Digital camera, SLR camera, imaging system in camera. Role of lighting, depth of field, focal length, colour and contrast in photography, types of photography and techniques, working of camera: exposure, shutter speed and aperture.

Understanding Image: Types of shots: distance, angle and movement; digital image basics: image format, resolution, aspect ratio, Pixels, DPI and PPI, composition and aesthetics: rules and guidelines.

Unit 2: Diversity of Nature: Colours and Landscape

10 Hours

Importance of plants as natural products, General characteristic features of various plant life forms (Single celled, colonial forms, filamentous forms and multicellular and complex forms). General account of diverse landscaping patterns based on different geographical locations, plant adaptations and ecological interactions, role of plant pigments (diverse forms of alga, leaf coloration, floral pigments) in aesthetic appeal.

Unit 3: Diversity around us - A magnified view

05 Hours

Principles of Microscopy: Dissection and compound microscope, scanning electron microscope. importance of sample preparation for microscopy, staining techniques.

Unit 4: Photographic visualisation of Nature

05 Hours

Sensitization of Biodiversity conservation; Thematic depiction of nature in Art galleries; Eco-tourism: a general account; role of photography in Eco-tourism and ecological discourse.

Practicals: 60 Hours

1. To study the parts of a digital camera.
2. To study the principle and working of digital camera/ smartphone camera.
3. Working and handling of light microscopes (Dissection and Compound).
4. Study of plant forms through microscopic lens (Single celled, colonial forms, filamentous forms, multicellular and complex forms).
5. To study techniques of capturing shots (using light and lenses effectively, macro and micro photography, wide angle and close-ups).
6. Study of plant adaptations through photographs (Aquatic and desert plants).
7. To capture and understand the Ecological Interactions.
8. Identification of different plant life forms through online available tools/ search engines.
9. Outdoor/ Campus Photography: Plants, Environment, Landscapes and cityscape, Mushrooms.
10. Project Work: To make a portfolio of diverse landscaping patterns/ selected theme through outdoor visits.

Suggested Readings:

1. Ang., T. (2008). Fundamentals of modern Photography. London, Mitchell.
2. Patterson, F. (1999). The Art of Seeing. Key Porter Books.
3. Fitzharris, T. (2011). Landscape Photography. Firefly Books.
4. Kelby, S. (2012). The digital photography book. Peachpit Press.
5. Langford, M., Fox, A., Smith, R.S. (2013). Langford basic photography: the guide for serious photographers. Amsterdam: Focal Press/Elsevier.
6. Peterson, B. (2016). Understanding exposure: how to shoot great photographs with any camera. AmPhoto Books.
7. Karp, G. (2010). Cell Biology, 6th edition. New Jersey, U.S.A.: John Wiley & Sons.

Additional Resources:

1. Sharma, P.D. (2010.) Ecology and Environment. Meerut, UP. Rastogi Publications.

2. Wilson, K., Walker, J. (2018). Principles and Techniques of Biochemistry and Molecular Biology, Cambridge University Press

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-8)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--------------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Agricultural Botany and Weed Science | 4 | 2 | 0 | 2 | 12 th Pass | Nil |

Objectives: To gain the knowledge on

- Requirement of the conditions for seed germination
- Growth hormones, plant development and flowering conditions
- Weeds and the methods to control weeds

Learning Outcomes:

After completion of this course the students would be able to understand:

- how is the quality of seeds judged and how are the suitable conditions for the seed germination created?
- how are the growth, flowering and fruiting in plants managed through the applications of hormones?
- how are weeds managed in commercial crops?

Unit 1: Seed Physiology

04 Hours

Seed dormancy types, factors, mechanism and methods for breaking dormancy, seed viability, seed vigour and seed germination.

Unit 2: Physiology of Crop Growth and Yield

05 Hours

Growth, methods of growth analysis, factors affecting growth, concept of phytotronics and Fertilizers (Nitrogen, Phosphorus, biofertilizers).

Unit 3: Regulation of Growth and Development

04 Hours

Role of hormones in plant growth and development, growth retardant.

Unit 4: Reproductive Physiology and Senescence

06 Hours

Physiology of flowering, Photoperiodism, vernalization, physiology of fruit ripening, senescence and regulation of senescence.

Unit 5: Biology of Weeds

04 Hours

Ecology of weeds, competition, reproduction of weeds. Allelopathy and Invasive Plants.

Unit 6: Crop Management Practices

07 Hours

Mechanical, Cultural, Biological and Chemical Weed control. Some abnoxious weeds and their management, Integrated pest management (IPM).

Practicals: (60 hours)

1. To study the effect of ethylene on shelf life of cut flowers./ To study the effect of cytokinin on leaf senescence.
2. To test the viability of weed seeds.
3. To study the allelopathic effects of weeds on germination of crop seeds.
4. To study the effect of herbicides on seed germination and seedling growth of weeds.
5. Determination of pH and analysis of a soil sample for carbonates, chlorides, sulphates, organic matter and base deficiency by rapid field tests.
6. To perform the qualitative test for Nitrogen (NH_4^+ , NO_3^- , urea) in a fertilizer and the soil sample.
7. Demonstration / photographs for the mechanisms used in herbicide application.
8. Field trip to a crop land to study weeds.
9. Submission of any two properly dried and mounted weed specimens with the herbarium label.

Suggested Readings:

1. Ashton, F. M., Monaco, T. J. (2002). Weed Science: Principles and Practices. New Jersey, U.S.: John Wiley and Sons. Inc.
2. Hopkins, W. G., Huner, N. P. A. (2009). Introduction to Plant Physiology, 4th edition. New Delhi, Delhi: Wiley India Pvt. Ltd.
3. Taiz, L., Zeiger, E., Moller, I. M., Murphy, A. (2018). Plant Physiology and Development International 6th edition. New York, NY: Oxford University Press, Sinauer Associates.
4. Mandal, R.C. (1990). Weeds, weedicides and weed control: Principle and Practice. New Delhi, Delhi: Agro Botanical Publishers.
5. Rao, V. S. (1999). Principles of Weed Science. Oxford and IBH Publishers, New Delhi.
6. Subramanian, S. (2017). All about weed control. New Delhi, Delhi: Kalayani publishers.

GENERIC ELECTIVES (GE-9)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Intelligent Systems in Plants | 04 | 2 | 0 | 2 | 12 th Pass | Nil |

Learning Objectives

- The course aims to lay the foundations on plant intelligence and develops understanding of the intelligent adaptively variable behaviour of plants.

Learning outcomes

The Learning Outcomes of this course are as follows:

- The students will be learning the concepts of intelligence, distinction between development and intelligent behaviour and morphological /adaptive strategies employed by plants to survive.

SYLLABUS OF GE-09

Unit 1: Introduction

04 Hours

An Introduction to Plant Structure (Morphological and Anatomical details), compartmentalization

Unit 2: Plants and Intelligence

03 Hours

Introduction to Plant Intelligence and Memory - Historical Perspective

Unit 3: Sensory Biology

04 Hours

Cell to cell communication, Self-recognition, Recognition of Neighbours and Relatives.

Unit 4: Learning in Plants

06 Hours

Habituation learning, Learning by association (Rhizosphere and Mycorrhizae), Adaptive Intelligence (Hydrophytes, Xerophytes, Parasites, Carnivorous plants, Thermogenic plants), Response to water, heat, salt, cold stress. Mechanical and chemical defence against predators with special reference to secondary metabolites.

Unit 5: Intelligent Behaviour of Plants

13 Hours

A Guided tour to Plant Movements (Tropic Movements, Movement towards gravity, light, tracking sun movements, prey driven movements, liberation movements), Intelligent response to minerals and light (Seed germination, root cap, response of shoot, leaf morphology and anatomy), Unique pollination and seed dispersal mechanisms, Osmosis, Short and long-distance transport of water and food, Metabolic redundancy, Life Cycle Signaling in response to external stimuli (Reactive Oxygen Species, peptides, receptors, hormones).

Practicals:(60 hours)

1. Study the structure of plant cell using temporary mount
2. Study of the cell as an osmotic system (Plasmolysis and Deplasmolysis).
3. Demonstration of the phenomenon of protoplasmic streaming in *Hydrilla* leaf.
4. Extraction and qualitative analysis of alkaloids, flavonoids, tannins and phenols.
5. To study the phenomenon of seed germination (effect of light).
6. To study light sensitivity and etiolation vs. de-etiolation.
7. Morphology and orientation of chloroplasts in leaves growing in light and dark, plasmodesmata connections and plasma membrane receptors. (through photographs or other digital resources)
8. Estimation of total photosynthetic pigments.
9. Study of (a) Root cap (b) Trichomes: non-glandular and glandular (c) Leaf Morphology and Anatomy. (d) pulvinus anatomy in *Mimosa pudica*. (e) Specialised motor tissue at the base of monocot leaves
10. (a) Study of morphological and anatomical adaptations of hydrophytes, xerophytes. (b). Study of biotic interactions of the following: Stem parasite (*Cuscuta*), Root parasite (*Orobanch*) Epiphytes, Predation (Insectivorous plants).
11. Pollination types (selected) and associated seed dispersal mechanisms

Suggested Readings:

1. Mauseth, J.D. (1988). Plant Anatomy. The Benjamin/Cummings Publisher, USA.
2. Evert, R.F., Eichhorn, S.E. (2012). Raven Biology of Plants, 8th edition, New York, NY: W.H. Freeman and Company.
3. Koller, D. (2011). The Restless Plant. Edited by Elizabeth Van Volkenburgh, Harvard University Press, Cambridge, Massachusetts, and London, England.
4. Crang, R., Lyons-Sobaski, S., Wise, R. (2018) Plant Anatomy- A Concept based approach to the structure of seed plants, Springer Nature, Switzerland.

Additional Resources:

Trewavas A. (2017). The foundations of plant intelligence. Interface Focus 7: 20160098.
<http://dx.doi.org/10.1098/rsfs.2016.0098>

GENERIC ELECTIVES (GE-10)**Credit distribution, Eligibility and Pre-requisites of the Course**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Informatics and Statistics for Biology and Allied Sciences | 4 | 2 | 0 | 2 | 12 th Pass | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To build an understanding in silico/computational approaches in various aspects of understanding biology and biological research.

- To build analytical skills and integrate the principles of statistical analyses for robust interpretation of biological observations.

Learning outcomes

The student will understand

- the basics of bioinformatics and develop awareness of the interdisciplinary nature of this field.
- learn about biological databases, sequence retrieval, alignment, and phylogenetic analysis using various tools.
- understand the basic concept of sampling methods, data classification, presentation and statistical analysis.

SYLLABUS OF GE-10

Unit 1: Introduction to Bioinformatics

03 Hours

Historical background, Aims and scope, bioinformatics in Genomics, Transcriptomics, Proteomics, Metabolomics, Systems biology and drug discovery, Applications and Limitations in bioinformatics.

Unit 2: Biological databases

04 Hours

Introduction to biological databases - Primary, secondary and composite databases. Study of following databases: NCBI (GenBank, PubChem, PubMed and its tools (BLAST)), introduction to EMBL, DDBJ, UniProt, PDB and KEGG.

Unit 3: Basic concepts of Sequence alignment

04 Hours

Similarity, identity and homology. Concepts of alignment (gaps and penalty); Alignment – pairwise and multiple sequence alignments

Unit 4: Molecular Phylogeny

04 Hours

Introduction to Molecular Phylogeny, methods of construction of phylogenetic trees: maximum parsimony (MP), maximum likelihood (ML) and distance (Neighbor-joining) methods.

Unit 5: Biostatistics

02 Hours

Biostatistics – definition, Basics of descriptive and inferential statistics; Limitations and applications of biostatistics.

Unit 6: Data types and presentation

03 Hours

Primary and secondary data; Sampling methods (in brief); tabulation and presentation of data;

Unit 7: Descriptive Statistics

04 Hours

Measures of central tendency - mean, median, and mode; Measures of dispersion - range, standard deviation, and standard error.

Unit 8: Correlation and Regression

03 Hours

Types and methods of correlation, Introduction to simple regression equation; similarities and dissimilarities between correlation and regression.

Unit 9: Statistical inference

03 Hours

Hypothesis – (simple hypothesis), student's t test, chi-square test.

(Note: Numerical based questions of unit 7, 8 and 9 should be covered only in practical)

Practicals: 60 Hours

1. Biological databases (NCBI, EMBL, UniProt, PDB)
2. Literature retrieval from PubMed
3. Sequence retrieval (protein and gene) from NCBI (formats - FASTA, GenBank and GenPept formats)
4. Protein Structure retrieval from PDB (in pdb format) and visualization by viewing tools (Ras Mol/ J mol/Mol*/Swiss 3D Viewer/Pymol)
5. Multiple sequence alignment (MEGA/Clustal omega)
6. Construction of phylogenetic tree (PHYLIP/ MEGA/ Clustal omega).
7. Making of Bar diagrams, Pie chart, Histogram, Frequency polygon, Cumulative frequency curve (any four) in the given data set using Microsoft Excel
8. Calculation of mean, mode, median, standard deviation and standard error (through manual calculation and using Microsoft Excel) (use only ungrouped data)
9. Calculation of correlation coefficient values by Karl Pearson's /Spearman Rank methods (through manual calculation and using Microsoft Excel)
10. Student's t-test (using Microsoft Excel only), chi square test (Manual and using Microsoft Excel)

Suggested readings:

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DEPARTMENT OF ZOOLOGY

Category-I **BSc. (H) Zoology**

DISCIPLINE SPECIFIC CORE COURSE– 4 (DSC-4): Non-Chordata: Coelomates

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|----------------|--|-----------------|----------------------------|---|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Non-Chordata: Coelomates | 04 | 02 | 0 | 02 | Class XII pass with Biology/ Biotechnology | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- The course aims to impart in-depth knowledge about the diverse life forms from the taxonomic positions of Annelida to Echinodermata.
- It will help the students to identify the body plan types of complex non-chordates and their systematic organization based on evolutionary relationships, structural and functional affinities.
- The course will help the students to understand the characteristic morphological, adaptive and anatomical features of diverse animals
- The course will help students to understand the economic and ecological significance of various animals in human life.
- The course will create interest among them to explore and appreciate the animal diversity in nature.

Learning Outcomes

By studying this course, students will be able to

- learn about the importance of systematics, taxonomy, and structural organization of non-chordate coelomates.
- recognize the diversity of non-chordates living in varied ecological habitats.
- critically analyse the organization, complexity and characteristic features of non-chordates.
- comprehend the economic importance of non-chordates, their interaction with the environment and their role in the ecosystem.
- enhance collaborative learning and communication skills through practical sessions, teamwork, group discussions, assignments, and projects.

SYLLABUS OF DSC-4

UNIT – I Annelida

07 Hours

General characteristics and classification; Excretion in Annelida; Evolution of coelom and metamerism.

UNIT – II Arthropoda and Onychophora

12 Hours

General characteristics and classification (Special reference to Insecta up to orders); Vision and Respiration in Arthropoda; Metamorphosis in insects; Social life of bees and termite, Evolutionary significance of Onychophora.

UNIT – III Mollusca

06 Hours

General characteristics and classification; Respiration in Mollusca; Torsion and Detorsion in Gastropoda; Pearl formation in bivalves.

UNIT – IV Echinodermata

05 Hours

General characteristics and classification; Water-vascular System in Asteroidea.

Note: Outline classification up to classes to be followed from “Ruppert, Fox and Barnes (2004). Invertebrate Zoology: A Functional Evolutionary Approach”. VII Edition, Cengage Learning, India.

Practical component -60 Hours

1. Study of *Aphrodite*, *Nereis*, *Heteronereis*, *Sabella*, *Serpula*, *Chaetopterus*, *Pheretima*, *Hirudinaria*, Trochophore larva.
2. Study of T.S. through pharynx, gizzard, and typhlosolar intestine of earthworm.
3. Study of *Limulus*, *Palamnaeus*, *Palaemon*, *Daphnia*, *Balanus*, *Sacculina*, *Cancer*, *Eupagurus*, *Scolopendra*, *Julus*, *Bombyx*, *Periplaneta*, termite, *Apis*, *Musca*.
4. Study of *Peripatus*.
5. Study of *Chiton*, *Dentalium*, *Pila*, *Doris*, *Helix*, *Unio*, *Patella*, *Ostrea*, *Pinctada*, *Sepia*, *Octopus*, *Nautilus*.
6. Study of *Pentaceros/Asterias*, *Ophiura*, *Clypeaster*, *Echinus*, *Cucumaria*, *Antedon*; Any two larval forms.
7. Study of mouth parts, digestive system and nervous system of *Periplaneta*. *
8. Study of the digestive system of *Pheretima*. *
9. Submit a Project Report on the larval forms in different phyla OR field study of the insect diversity.

*Subject to UGC approval and guidelines

Essential/recommended readings

1. Ruppert, Fox and Barnes (2004). Invertebrate Zoology. VII Edition, Cengage Learning, India.
2. Pechenik, J. A. (2015). Biology of the Invertebrates. VII Edition, McGraw-Hill Education.
3. Barnes, R.S.K., Calow, P., Olive, P.J.W., Golding, D.W. and Spicer, J.I. (2002). The Invertebrates: A New Synthesis. III Edition, Blackwell Science

Suggestive readings

1. Ruppert, E.E., Fox, R.S., Barnes, R. D. (2003). Invertebrate Zoology: A Functional Evolutionary Approach. VII Edition, Cengage Learning, India
2. Barrington, E.J.W. (2012). Invertebrate Structure and Functions. II Edition, EWP Publishers

DISCIPLINE SPECIFIC CORE COURSE– 5 (DSC-5): Fundamentals of Biomolecules

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------------|-----------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fundamentals of Biomolecules | 04 | 02 | 0 | 02 | Class XII pass with Biology/ Biotechnology | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- To provide fundamental and precise knowledge of biomolecules that play a crucial role in all processes of life and the development of diseases.
- To make the students understand the fundamental building blocks of living organisms that include carbohydrates, proteins, lipids, nucleic acids
- To apprise the students of the various functions of the molecules like providing structural integrity to the tissue-engineered constructs.
- Through this course, the students would be able to understand the physiological importance of these biomolecules.
- The enzymatic study would enable them to understand the various metabolic pathways and physiological reactions.

Learning Outcomes

By studying this course, students will be able to

- Interpret the structure-functional relationships of carbohydrates, proteins, lipids and nucleic acids.
- Understand the qualitative analysis of functional groups
- understand the properties of various biomolecules.
- appreciate the action of the enzyme and the various factors that affect their action detail.

SYLLABUS OF DSC-5

UNIT – I Carbohydrates

06 Hours

Structure and biological importance: with emphasis on aldose, ketose, chiral centre, polarised Light, Fischer nomenclature, Haworth projection formula, mutarotation of glucose, anomers, pyranose, furanose, glycosidic linkage; reducing and non-reducing sugars: monosaccharides, disaccharides, polysaccharides and glycoconjugates.

UNIT – II Lipids

04 Hours

Structure and Significance: Physiologically important saturated and unsaturated fatty acids, tri-acylglycerols, phospholipids, glycolipids, steroids.

UNIT – III Proteins**08 Hours**

Amino acids: Structure, classification and general properties of α -amino acids; physiological importance of essential and non-essential amino acids; proteins: bonds stabilizing protein structure; Levels of organization in protein motifs, folds and domains; Denaturation.

UNIT – IV Nucleic Acids**04 Hours**

Structure: purines and pyrimidines, nucleosides, nucleotides, nucleic acids; Cot Curves: Base pairing, Denaturation and Renaturation of DNA; Types of DNA and RNA.

UNIT – V Enzymes**08 Hours**

Nomenclature and classification, cofactors; specificity of enzyme action, Isozymes, Mechanism of enzyme action; Enzyme kinetics; factors affecting rate of enzyme-catalysed reactions; derivation of Michaelis-Menten equation, concept of K_m and V_{max} , Lineweaver-Burk plot, multi-substrate reactions, enzyme inhibition; Allosteric enzymes and their kinetics; Regulation of enzyme reaction.

Practical component – 60 Hours

1. Understanding the structures of biomolecules through ball and stick models.
2. To understand the preparation and roles of two important biological buffer systems: phosphate and bicarbonate; Preparation of buffers and determination of pH.
3. Identification of the functional groups by qualitative tests:
 - a. Carbohydrates
 - b. Lipids
 - c. Proteins
4. Separation of amino acids by paper chromatography.
5. Study the action of salivary amylase under optimum conditions.
6. Study the effect of pH, temperature and inhibitors on the action of salivary amylase.

Essential/recommended readings

1. Nelson, D.L., Cox, M.M. (2017). Lehninger: Principles of Biochemistry (7th ed.). New York, WH: Freeman Company.
2. Murray, R.K., Bender, D.A., Botham, K.M., Kennelly, P.J., Rodwell, V.W. and Well, P.A. (2009). Harper's Illustrated Biochemistry. XXVIII Edition, International Edition, The McGraw- Hill Companies Inc.

Suggestive readings

1. Stryer, L., Berg, J., Tymoczko, J., Gatto, G. (2019). Biochemistry (9th ed.). New York, WH: Freeman.
2. Voet, D., Voet, J. G. (2013). Biochemistry (4th ed.). New Jersey, John Wiley & Sons Asia Pvt. Ltd.

DISCIPLINE SPECIFIC CORE COURSE– 6 (DSC-6): Human Physiology-Control and Coordination Systems

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|-----------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Human Physiology-Control and Coordination Systems | 04 | 02 | 0 | 02 | Class XII pass with Biology/ Biotechnology | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- The course will provide a thorough understanding of the normal body function and helps to determine the cause of disease.
- It will enable the development of new and more effective treatments and guidelines for maintaining good health.
- It will equip the students with an ability to pursue career in medical and healthcare sector, pharmaceuticals and other related areas.
- It will help in understanding how these systems interact among themselves to maintain stability or homeostasis.

Learning Outcomes

By studying this course, students will be able to:

- appreciate human physiology and have its enhanced knowledge.
- recognize and identify principal tissue structures and functions
- understand the functions of important physiological systems including the nervous system, muscular system, endocrine and reproductive system
- learn an integrative approach to understand how these separate systems interact to yield integrated physiological responses to maintain homeostasis in the body along with feedback mechanisms.
- synthesize ideas to make the connection between knowledge of physiology and real-world situations, including healthy lifestyle decisions and problems faced due to homeostatic imbalances
- perform, analyze and report on experiments and observations in physiology
- know the fundamentals and understand advanced concepts so as to develop a strong foundation that will help them to acquire skills and knowledge to pursue an advanced degree.

SYLLABUS OF DSC-6

UNIT – I Nervous System and Sense Organs

08 Hours

Structure of neuron, resting membrane potential, origin and conduction of action potential across

the myelinated and unmyelinated nerve fibers; Types of synapses, synaptic transmission, Neuromuscular junction.

UNIT – II Muscle Physiology

07 Hours

Mechanism of muscle contraction; Characteristics of muscle twitch; Motor unit, summation, and tetanus.

UNIT – III Endocrine System

08 Hours

Hormones secreted by the glands, their physiological action and the disorders related to their secretion; Classification of hormones and their regulation; Mode of hormone action- Signal transduction pathways for peptide and steroid hormones.

UNIT – IV Reproductive System

07 Hours

Physiology of male and female reproduction– spermatogenesis, oogenesis, follicular development, steroidogenesis, implantation, pregnancy, and mammary gland development.

Practical component – 60 Hours

1. Classification, structure and functions of tissues: epithelial, connective, muscular and nervous tissue.
2. Structure, histology, types and function of bones and cartilage.
3. Classification and histological structure of muscle; ultrastructure of striated muscle.
4. Preparation of temporary mounts: Squamous epithelium, Striated muscle fibres, Nerve cells.
5. Demonstration of the unconditioned reflex action (Deep tendon reflex such as knee jerk reflex).
6. Recording of simple muscle twitch with electrical stimulation (Interpretation/ Virtual).
7. Study of permanent slides of Mammalian Skin, Spinal cord, Hypothalamus, Pineal, Pituitary, Thyroid, Parathyroid, Pancreas, Adrenal, Testis and Ovary.
8. Permanent slide preparation from various tissues: Tissue fixation, block preparation, tissue sectioning, H&E staining, microscopy (Minimum three tissues; tissue can be procured from the slaughterhouse).

Essential/recommended readings

1. Tortora, G.J. and Derrickson, B.H. (2012). Principles of Anatomy and Physiology. XIII Edition, John Wiley and Sons, Inc.
2. Widmaier E, Raff H and Strang K. (2013) Vander's Human Physiology: The Mechanism of Body Functions. XIII Edition, McGraw-Hill Education.
3. Guyton, A.C. and Hall, J.E. (2011) Textbook of Medical Physiology. XII Edition, Harcourt Asia Pvt. Ltd/ W.B. Saunders Company.
4. Eroschenko, Victor P. (2012) Di Fiore's Atlas of Histology with Functional Correlations; 12th edition, CBS Publishers and Distributors Pvt. Ltd.

Suggestive readings

1. Chatterjee, C.C. (2021) Human Physiology, 14th Edition, Volume 1 & Volume II, CBS Publishers and Distributors Pvt. Ltd.
2. Kesar, S. and Vashisht, N. (2007) Experimental Physiology. Heritage Publishers.

Category-II
BSc Life Science with Zoology as one of the Core Disciplines

DISCIPLINE SPECIFIC CORE COURSE -6 (Zoo-LS-DSC-06):– Cell and Developmental Biology of Animals

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|-----------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Cell and Developmental Biology of Animals Zoo-LS-DSC-06 | 04 | 02 | 0 | 02 | Class XII pass | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- The course will help the students to learn and develop an understanding of a cell as a basic unit of life.
- The course will enable them to understand the functions of cellular organelles and how a cell carries out and regulates cellular functions.
- The course will provide the students a complete comprehension about the essential vertebrate developmental biology
- The course will help the students to understand the conundrum of **the different levels of biological complexity** by tracing them back to events at the level of genes and genomes.

Learning Outcomes

By studying this course, students will be able to

- Explain the structure and functions of cell organelles involved in diverse cellular processes.
- Know the evolution of different concepts in developmental biology.
- Be able to understand the process of gamete formation from stem cell population to mature ova and sperm. The students will know the differences between Spermatogenesis and Oogenesis.
- Be able to comprehend the sequence of steps leading to the fusion of gametes and learn the contribution of sperm and ova to zygote formation
- Be able to understand how polyspermy is avoided in animal kingdom.
- Learn the mechanisms underpinning cellular diversity and specificity in animals.
- Learn the methods and tools related to developmental biology help to understand different processes of embryogenesis.

SYLLABUS OF Zoo-LS-DSC-06

UNIT - I Cell Division and Differentiation

06 Hours

Types of animal cells and tissues, Mitosis, meiosis, Cell cycle regulation, Cell-cell communication, Stem cells, Differential gene expression.

UNIT- II: Scope and History of Developmental Biology

03 Hours

Historical perspective including contributions by eminent scientists and landmark experiments in the field of Developmental Biology, Concepts of Epigenesis, Preformation, Von Baer laws.

UNIT- III: Early Embryonic Development

15 Hours

Gametogenesis: Spermatogenesis and Oogenesis in mammals; Types of Eggs and Egg membranes Fertilization: External (amphibians) and Internal (mammals), Fast and slow blocks to Polyspermy; Types and Patterns of cleavage; Types of morphogenetic movements; Early development of frog and chick up to gastrulation. Fate maps

UNIT- IV: Late Embryonic Development

04 Hours

Fate of Germ Layers; Formation of neural tube, Extra-embryonic membranes in birds

UNIT- IV: Post Embryonic Development

02 Hours

Metamorphic events and its hormonal regulation in amphibians. Prokaryotic and Eukaryotic cells; Various models of plasma membrane structures, Transport across membranes: active and passive transport, facilitated transport; Cell-cell junctions, structures, and functions: Tight junctions, adherens junctions, gap junctions.

Practical Component – 60 Hours

1. Study of the various stages of meiosis through permanent slides.
2. Frog - Study of developmental stages - whole mounts and sections through permanent slides- cleavage stages, blastula, gastrula, neurula, tail bud stage, tadpole external and internal gill stages.
3. Chick – Study of Whole Mounts of developmental stages of Chick through permanent slides (HH stages)- 13 hrs, 18hrs, 24hrs, 28hrs, 33hrs, 36hrs, 48hrs, 72hrs and 96hrs.
4. Study of the different types of placenta along with its function- through permanent slides / photomicrograph.
5. Study of various developmental stages in the life Cycle of Drosophila using stock culture/ permanent slides/ photomicrograph.
6. Visit to IVF centre/ Poultry Farm.
7. Project report on IVF Centre/ Poultry farm/ Drosophila culture/ Zebra fish culture.

Essential/recommended readings

1. Cooper, G.M., Hausman, R.E. (2019) *The Cell: A Molecular Approach*. VIII Edition, ASM Press and Sinauer Associates.
2. Becker, Kleinsmith, and Hardin (2018) *The World of the Cell*, IX Edition, Benjamin Cummings Publishing, San Francisco.
3. Gilbert, SF (2014) *Developmental Biology* (10th edition). Sinauer Associates, Inc., Publishers, Sunderland, Massachusetts, USA. ISBN : 9780878939787
4. Balinsky, B.I. (2008). *An introduction to Embryology*, International Thomson Computer Press.
5. Freeman and Bracegirdle (1975, 2nd Edition) “*An Atlas of Embryology*”, Published by Heinmann.

Suggestive readings

Category-IV

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY THE DEPARTMENT OF ZOOLOGY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

GENERIC ELECTIVES (GE-3): Economic Zoology

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Economic Zoology | 04 | 02 | 0 | 02 | Class XII pass | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- It deals with the application of zoological knowledge for the benefit of mankind by understanding the economy, health and welfare of humans.
- It includes culturing organisms for mass production for human use and to control or eradicate harmful ones.
- It will bring to the fore the multidisciplinary nature of Economic Zoology as it includes sericulture, apiculture, aquaculture, pisciculture and insect pests of agriculture.

Learning Outcomes

By studying this course, students will be able to

- develop an understanding of the beneficial higher and lower organisms in terms of economic prospective.
- aquatic organisms and agriculturally important insect pests based on their morphological characteristics/structures.
- develop a critical understanding of the contribution of organisms to the welfare of society.
- examine the diversity of insect pests of different orders in the agro-ecosystem and sustainable pest management strategies.

SYLLABUS OF GE-3

UNIT – I Aquaculture

05 Hours

Definition, scope, and significance of Aquaculture, Prawn culture, Pearl culture, Edible Oyster culture.

UNIT – II Pisciculture

07 Hours

Basic concept on mono and composite fish culture (Carp culture); Fish diseases caused by *Ichthyophthirius multifiliis*, *Trichodinia* sp. and *Ichthyobodo* sp., symptoms and control; Maintenance of aquarium.

UNIT – III Sericulture

05 Hours

Different species and economic importance of silkworm, Mulberry and Non-mulberry Sericulture (Eri, Muga, Tussar), Sericulture techniques.

UNIT – IV Apiculture

05 Hours

Different species of Honeybee, types of beehives - Newton and Langstroth, Bee Keeping equipment, Methods of extraction of honey (Indigenous and Modern) and its processing, Products of apiculture industry (Honey, Bees Wax, Propolis, Royal jelly, Pollen etc.) and their uses.

UNIT – V Agricultural Crop Pest and Management

08 Hours

Bionomics of crop pests of rice (*Leptocorisa acuta*); sugarcane (*Pyrilla perpusilla*); vegetable (*Raphidopalpa foveicollis*); and stored grain (*Corcyra cephalonica*); Pest Management Strategies (Physical, Chemical & Biological)

Practical component – 60 Hours

1. Study of aquatic organisms - prawns, oysters and fishes (*any three*) through museum specimens in the laboratory with details on their classification, distribution and specialized features.
2. Study of different species of aquarium fishes (Goldfish, Guppy, Swordtail fish) and maintenance of aquarium in lab/indoor.
3. Study of major crop pests of rice (*Leptocorisa acuta*), sugarcane (*Pyrilla perpusilla*), vegetable (*Raphidopalpa foveicollis*) and stored grain (*Corcyra cephalonica*) belonging to different orders.
4. Study of *Bombyx mori*, its life cycle and economic importance.
5. Study of the life history of honeybee, *Apis cerana indica* and *Apis mellifera* from specimen/ photographs - egg, larva, pupa, adult (queen, drone, worker)
6. Study of artificial hive (Langstroth/Newton), its various parts and beekeeping equipment.
7. Project report on life cycle of any one crop pest or on a product obtained from apiculture industry.
8. Field study/lab visit to an apiary/honey processing unit/sericulture institute/aquarium shop/fish farm/pisciculture unit.

Essential/recommended readings

1. Atwal, A.S. (1993) Agricultural Pests of India and Southeast Asia. Kalyani Publishers, New Delhi.
2. Shukla, G.S. and Upadhyay, V.B.: Economic Zoology, 4e, 2002, Rastogi.
3. D. B. Tembhare. (2017) Modern Entomology. Published by Himalaya Publishing House (ISO 9001: 2008 Certified).
4. Dawes, J. A. (1984) The Freshwater Aquarium, Roberts Royce Ltd. London.

Suggestive readings

1. S.S. Khanna and H.R. Singh. A Textbook of Fish Biology & Fisheries Published by Narendera Publishing House. 3rd Edition. (ISBN13: 9789384337124)
2. Dokuhon, Z.S. (1998). Illustrated Textbook on Sericulture. Oxford & IBH Publishing Co., Pvt. Ltd. Calcutta.

GENERIC ELECTIVES (GE-4): Lifestyle Disorders

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Lifestyle Disorders | 04 | 02 | 0 | 02 | Class XII pass | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- The course aims to introduce the students to the concept of health, nutrition, and the factors affecting it.
- It will apprise students of the prevalence of emerging health issues affecting the quality of life.
- The course will facilitate the understanding of different physical and psychological associated disorders and their management for a healthy lifestyle.
- It highlights the important lifestyle-related disorders and describes the risks and remedies in relation to adopting a better life.

Learning Outcomes

By studying this course, students will be able to

- have a better understanding of lifestyle choices and the diseases associated with them.
- have an in-depth understanding of making better lifestyle decisions.
- learn about various techniques for preliminary diagnosis of lifestyle disorders

SYLLABUS OF GE-4

UNIT – I Introduction to Lifestyle

05 Hours

Traditional Indian lifestyle vs modern Indian lifestyle, lifestyle diseases – definition, risk factors-erratic sleep patterns, wrong food choices, smoking, alcohol abuse, stress, lack of optimum physical activity, illicit drug use, Obesity, respiratory diseases, diet and exercise.

UNIT – II Diabetes and Obesity

05 Hours

Types of Diabetes mellitus; Blood glucose regulation; Complications of diabetes-paediatric and adolescent obesity-weight control and BMI (Body Mass Index), Prediabetes, PCOS/PCOD.

UNIT – III Cardiovascular Diseases

06 Hours

Coronary atherosclerosis-Coronary artery disease, Causes-Fat and lipid, Alcohol Abuse-Diagnosis, Electrocardiograph, Echocardiograph, Treatment, Exercise and Cardiac rehabilitation.

UNIT – IV Cancer**05 Hours**

Introduction to Cancer and general diagnostic methods to detect cancer; Lung Cancer, Mouth Cancer: associated lifestyle choices, symptoms and treatment.

UNIT – V Hypertension**04 Hours**

Risk factors, complications (brain, heart, eye and kidney) and management of hypertension.

UNIT – VI WHO Global action plan and Monitoring**05 Hours**

WHO Global action plan and Monitoring framework for prevention and control of non-communicable diseases, NPHCE (National Programme for the Health Care of Elderly), Fit India movement (Yoga and meditation).

Practical component – 60 Hours

1. Estimation of blood glucose (GOD/POD) by kit.
2. Calculation of BMI, waist to hip ratio, skin fold test.
3. Imaging techniques for cancer diagnosis. CT Scan, MRI, PET-CT scan. Confirmatory Biopsy.
4. Blood pressure measurement using a sphygmomanometer.
5. Study of cardiac rehabilitation- thrombolytic agents and balloon angioplasty.
6. Project Work based on Case studies related to risk factors of any ONE lifestyle disorder studied.

OR

7. To write a review of personal experience of using any of the available health or lifestyle-related applications over a period of time with some data to correlate.

Essential/recommended readings

1. James M.R, Lifestyle Medicine, 2nd Edition, CRC Press,2013,
2. Tortora, G.J. and Grabowski, S. (2006). Principles of Anatomy & Physiology. XI edition. John Wiley & Sons
3. Cooper, G.M., Hausman, R.E. (2009). The Cell: A Molecular Approach. V Edition, ASM Press and Sinauer Associates

Suggestive readings

1. Guyton, A.C. & Hall, J.E. (2006). Textbook of Medical Physiology. XI Edition. Harcourt Asia PTE Ltd/W.B. Saunders Company.
2. Widmaier E, Raff H and Strang K. (2013) Vander's Human Physiology: The Mechanism of Body Functions. McGraw-Hill Education 13th Edition.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

ACBR

Category-I

BSc. (HONS.) Biomedical Sciences

DISCIPLINE SPECIFIC CORE COURSE– 4 (DSC-4): Biochemistry

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Biochemistry | 04 | 03 | 0 | 01 | Class pass XII | NIL |

LEARNING OBJECTIVES

The objective of this course is to effectively incorporate the fundamentals of metabolism through key biochemical pathways and make learners appreciate the requirement for the stringency of their regulation; introduce various biochemical techniques used in the characterization of the proteins and a detailed account on how enzymes function: their kinetics, regulation and inhibition.

COURSE OUTCOMES

- Students will gain an understanding of fundamental biochemical principles of metabolism of biomolecules (Carbohydrates, Proteins, Lipids and Nucleic acids) and the associated bio- energetics. They will learn the biochemical reactions in metabolic pathways and understand their interrelations, logics and patterns.
- They will also understand the role of enzymes in the biochemical reactions and the connection between biochemical defects and metabolic disorders. Students would additionally gather a firm understanding and relevance of stringent regulation of metabolic pathways.
- Having understood the structural architecture of proteins in earlier semesters, students shall learn how biological molecules (especially proteins) are characterized through various analytical techniques such as types of column chromatography methods, Polyacrylamide Gel Electrophoresis (PAGE) that are used in contemporary biochemistry research laboratories.
- Students will get a grasp on central concepts underlying enzyme catalysis, kinetics and their mechanism of action. Effects of different kinds of enzyme-inhibitors will also be learned.
- Students would learn how coenzymes assist enzymes in catalyzing biochemical reactions and what is the criterion for their classification.
- Having studied the role of enzymes that regulate metabolic pathways in the third unit, students would learn the general properties of regulatory enzymes, their activity and kinetics.

COURSE CONTENT:

| | |
|--|-------------------|
| Unit I: Metabolic pathways and their allosteric regulation | (22 hrs) |
| Carbohydrates - Glycolysis, Gluconeogenesis, Tricarboxylic acid cycle and their regulation, Cori cycle, Hexose monophosphate shunt. Lipids - Mobilization of triglycerides, Metabolism of glycerol, Biosynthesis and β -oxidation of saturated fatty acids (palmitic acid) and their regulation. Significance of ketone bodies. Proteins - General over view, Transamination, Deamination, Glucose-Alanine cycle, Urea cycle and its regulation. Nucleic acid - General overview, an outline of purine and pyrimidine metabolism. Electron transport chain, Oxidative phosphorylation and Substrate-level phosphorylation. | |
| Unit II: Analytical methods in protein characterization | (08 Hours) |
| Introduction to spectrophotometry & Lambert-Beer's law, Column chromatography: Ion exchange chromatography, Gel filtration and Affinity chromatography, SDS-PAGE | |
| Unit III: Enzymes | (07 Hours) |
| Introduction to enzymes, Concept of Lock & key and 'Induced fit theory, Concept of activation energy and binding energy. Enzyme kinetics: Michaelis-Menten equation and its physiological significance. Concept of enzyme inhibition: types of inhibitors (competitive & non-competitive) and their examples. | |
| Unit IV: Coenzymes | (04 Hours) |
| Classification: various types and their function. | |
| Unit V: Regulatory Enzymes | (04 Hours) |
| General properties of allosteric enzymes. Enzyme regulation by covalent modification. Zymogens. | |

PRACTICAL – 30 Hours

(Wherever wet lab experiments are not possible, the principles and concepts can be demonstrated through any other material or medium including videos/virtual labs etc.)

1. Measurement of absorbance & %transmittance of a solution using spectrophotometer/colorimeter.

2. Preparation of standard plot and estimation of protein concentration by any one method: Biuret/Lowry/Bradford.
3. Estimation of glucose concentration by an enzymatic/non-enzymatic method.
4. Separation of biomolecules (sugar/amino acids) by thin-layer chromatography (TLC).
5. Separation of biomolecules by gel filtration/Calculation of void volume of Sephadex G-25 column, using Blue Dextran.
6. Analysis of SDS-PAGE as a separation technique (gel analysis).
7. To perform an assay of an enzyme under optimal conditions.
8. Determination of K_m , V_{max} and K_{cat} value of a given enzyme from the provided experimental data.

DISCIPLINE SPECIFIC CORE COURSE– 5 (DSC-5): PRINCIPLES OF GENETICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Principles of Genetics | 04 | 03 | 0 | 01 | Class XII pass | NIL |

LEARNING OBJECTIVES:

The course intends to introduce students to Mendelian principles of inheritance, deviations from Mendelian inheritance and extra-nuclear inheritance, Introduction to pedigree analysis for autosomal and X-linked traits, Understanding of differences between prokaryotic and eukaryotic genome organization, transposons, and basic cytogenetics and Understanding of mechanisms of sex determination.

COURSE OUTCOMES:

- The flavour of genomics as a progression from Mendelian genetics will be introduced to the students. They will learn about classical experiments that led to discovery of the genetic material. They will also learn the structure of DNA.
- Students will be able to explain Mendelian laws of inheritance, deviations from monohybrid ratio (incomplete dominance, codominance, multiple alleles and lethal genes) and deviations from dihybrid ratio (gene-gene interactions, linkage). They must be able to distinguish sex-linked, sex-limited and sex-influenced traits. Students must also be able to interpret patterns of inheritance for autosomal and X-linked traits from pedigrees.
- Students would learn the concept of extra-nuclear inheritance.
- Students would learn the differences in genomes of prokaryotes and eukaryotes. They would also learn about transposable genetic elements with examples from prokaryotes and eukaryotes.
- The lectures will cover details of the structure of the chromosomes, the abnormalities that commonly occur at chromosomal level. Discussion of various types of mutations at the DNA level (deletion, addition, substitution), their consequence on gene structure/product and the diseases associated with these abnormalities.
- Students would gain insights into genetic and environmental sex determination mechanisms.

COURSE CONTENT:

| | |
|---|-----------------|
| Unit I: Overview of Changing Paradigms in Genetics | 05 Hours |
| A brief overview of how genetic principles took shape, leading to the concept of a blueprint of life within the cell to the physical entity of DNA. Basic structure of DNA, salient features of the double helix, semi-conservative replication– Meselson and Stahl experiment. Also mention the surprises we have from genomics such as genetic variation between individuals. There are popular videos/presentations that can be used. The purpose is to ignite the curiosity of the students. | |
| Unit II: Concept of Genetic Inheritance | 15 Hours |
| Concept of alleles, haploid and diploid status, phenotype and genotype, Mendel's laws of inheritance, dominant and recessive inheritance, test, back and reciprocal crosses with two examples each. Chromosomal theory of inheritance. Concept of linkage and crossing over, cytological proof of crossing over, genetic mapping: two and three-point cross over. Distinguishing recombination and complementation. Allelic interactions- dominance relationships- complete, incomplete and co-dominance, gene-gene interactions. Sex linked, sex-limited and sex-influenced traits. Gathering family history, pedigree symbols and construction of pedigrees for autosomal and sex linked traits (dominant and recessive). | |
| Unit III: Extra Nuclear Inheritance | 05 Hours |
| Criteria for extra nuclear inheritance, plastid inheritance in <i>Mirabilis jalapa</i> , kappa particles in <i>Paramecium</i> , maternal effect- snail shell coiling, cytoplasmic inheritance (mitochondria and chloroplast). | |
| Unit IV: Genome Organization | 07 Hours |
| Organization of Genomes in prokaryotes and eukaryotes. Establishing the Central Dogma. Nucleosomes organization and assembly. Euchromatin, heterochromatin- constitutive and facultative heterochromatin. Structure and significance of polytene and lampbrush chromosomes. Transposable genetic elements: Prokaryotic transposable elements- IS elements, Composite transposons; Eukaryotic transposable elements- Ac-Ds system in maize; Uses of transposons. | |
| Unit V: Cytogenetics and Mutations | 08 Hours |

| | |
|---|-----------------|
| Chromosome: Structure- centromere and telomere, types of chromosomes based on centromere. Karyotyping- banding pattern and nomenclature (G and Q banding). Structural abnormalities (Duplication, Insertion, Deletion, Translocation-Reciprocal and Non-Reciprocal) and associated syndromes. Numerical abnormalities (Aneuploidy and Euploidy) and associated syndromes. Spontaneous and induced mutations. Types of mutations: Point (Non-sense, miss-sense, silent, frameshift, insertion, deletion). Effects on the Gene products- loss of function and gain of function. | |
| Unit VI: Introduction to Mechanisms of Sex Determination | 05 Hours |
| Chromosomal theory of sex determination, mechanisms of sex determination, environmental factors and sex determination in human and <i>Drosophila</i> . Barr bodies and dosage compensation. | |

PRACTICAL – 30 Hours

(Wherever wet lab experiments are not possible, the principles and concepts can be demonstrated through any other material or medium including videos/virtual labs etc.)

1. Observation of wild type and mutant phenotypes in *Drosophila*.
2. Preparation of culture media for *Drosophila* and study different stages of the life cycle of *Drosophila*.
3. Verification of Mendelian laws through *Drosophila* seeds – dominant, recessive and sex-linked
4. Study of Barr bodies.
5. Karyotyping with the help of photographs (normal and abnormal karyotypes).
6. Pedigree charts of some common characters like blood group, color blindness and PTC tasting.
7. Study of diploidy in onion root tip.
8. Study of polyploidy in onion root tip by colchicine treatment.
9. Study of polytene chromosomes.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE– 6 (DSC-6): Human Physiology and Anatomy II

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Human Physiology and Anatomy II | 04 | 03 | 0 | 01 | Class XII pass | NIL |

LEARNING OBJECTIVES:

- The course curriculum is a systematic presentation of physiological concepts to ensure appropriate depth and breadth of basic functioning of the human body and its interrelations with respect to heart, lung, kidney, gonads, endocrine glands and digestive system.
- It would give students exposure of physiological concepts needed as foundations for further studies in pharmacology, pathology and pathophysiology etc.
- It would provide a base to understand body defenses and the mechanisms of deranged function of human body
- The curricular objectives are focused primarily on normal body function. Accordingly, wherever possible clinical examples have been illustrated to the underlying physiological principles.

COURSE OUTCOMES:

Having successfully completed this course, students shall be able to learn and appreciate:

- The students will learn appreciate the structure and functioning of heart, pattern and significance of blood flow in the blood vessels, heart sounds, ECG and purpose of lymph and lymphatic circulation.
- The students would correlate how structure and function of lungs are so intricately designed and how they function with its blood flow and help giving vital oxygen to body. They would develop understanding for neural control and other regulators of respiration and understand daily phenomenon like coughing, sneezing, yawning etc.
- Kidneys are vital organs and students would learn the functional anatomy of a nephron and how it contributes in removing the toxic waste from our body in form of urine. The curriculum would outline the process of micturition and abnormalities associated with it. It would also highlight the role of kidney in controlling pH of the body and preventing acidosis/alkalosis
- The students would have insight into the anatomy of the female and male reproductive systems, including their accessory structures. The student would understand the role of hypothalamic and pituitary hormones in reproductive system. Trace the route of a sperm mother cell from its production till it can fertilize an oocyte. Explain the events in the ovary prior to ovulation, development and maturation of the sex organs and the emergence of

secondary sex characteristics during puberty.

- The students would be able to integrate the role of the endocrine system to maintain homeostasis in human body. Understand the chemical composition mechanisms of hormone action, their site of production, regulation, and effects of hormones of the pituitary, thyroid, parathyroid and adrenal, glands. Hormonal regulation of the reproductive system. The role of the pancreatic endocrine cells in the regulation of blood glucose In addition the contributions of hormones released by the heart, kidneys, and other organs with secondary endocrine functions. The student would be aware of several common diseases associated with endocrine system dysfunction.
- Students would be able to understand the organs of the alimentary canal from proximal to distal, and understand their function. Identify the accessory digestive organs and their functions. Describe the histology that is four fundamental tissue layers of the digestive tract. Contrast the contributions of the enteric and autonomic nervous systems to alimentary tract functioning. Gain awareness about common dysfunctions of digestive system like constipation, gastritis, ulcers, diarrhea etc.

COURSE CONTENT:

| | |
|---|-----------------|
| Unit-I: Cardiovascular System | 09 Hours |
| Functional Anatomy of heart, The Cardiac Cycle, Electrocardiogram. Circulatory system: Bloodvessels, hemodynamics and regulatory mechanisms, Lymphatic circulation - hemodynamics and regulation, micro-circulation | |
| Unit-II: Respiratory system | 09 Hours |
| Functional Anatomy of the respiratory system. Mechanisms of pulmonary ventilation, alveolarventilation, gaseous exchange, transport of gases, respiratory and nervous control and regulation of respiration | |
| Unit-III: Renal Physiology | 06 Hours |
| Body fluid and electrolytes: their balances and imbalances. Functional Anatomy of kidney,Histology of nephron and its physiology, Urine formation, renal regulation of urine volume and osmolarity, acid-base balance. Urinary bladder: structure, micturition and its regulation | |
| Unit-IV: Reproductive System | 06 Hours |
| Structure and function of male and female reproductive organ. Function and regulation of testicularand ovarian hormones. Gametogenesis (oogenesis and spermatogenesis), fertilization, implantation, parturition and lactation, menopause and basic concepts of infertility. | |
| Unit-V: Endocrine System | 09 Hours |

| | |
|--|-----------------|
| General mechanism of hormone action, Structure, function and regulation of the following glands and their secretions: Pituitary, Hypothalamus, Thyroid, Parathyroid, Adrenal, and Pancreas. Basic concepts about hypo and hyper secretion of hormones. | |
| Unit-VI: Gastrointestinal system | 06 Hours |
| Anatomy and histology of digestive tract, gastrointestinal physiology: General principles of gut motility secretion, digestion, absorption and assimilation. Gastrointestinal hormones: their formation and action. Physiological anatomy and functions of liver and pancreas. | |

PRACTICAL – 30 Hours

(Wherever wet lab experiments are not possible, the principles and concepts can be demonstrated through any other material or medium including videos/virtual labs etc.)

1. Physiological data acquisition based experiments (ECG).
2. Physiological data acquisition-based experiments (EMG).
3. Physiological data acquisition-based experiments (PFT).
4. Blood Pressure recordings in humans.
5. Determination of specific gravity of blood.
6. Determination of osmotic fragility of RBC.
7. To study various types of contraceptives (condoms, IUD's, oral and injectable contraceptives)
8. To study different human organs and their sections through permanent slides. T. S. of thyroid, liver, thymus, spleen, ovary, artery, vein, capillaries, testis, pancreas, esophagus, adrenal, kidney (cortex and medulla), urinary bladder, urethra, fallopian tubes, epididymis, prostate glands, lungs, trachea, bronchioles, pituitary, heart. (Minimum 8 slides covering the systems mentioned in theory.)

Category-IV
Common Pool of Generic Electives offered by Department of
Biomedical Sciences

Generic Elective -2 (GE-2): Landmark Discoveries in Science

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Landmark Discoveries in Science | 04 | 03 | 0 | 01 | Class XII pass | NIL |

LEARNING OBJECTIVES:

The objective of the course is to ensure students appreciate the convenience and comfort that they have is all because of discoveries and inventions of the past. Meticulous execution of historical experiments in very little resources would also motivate them towards doing valuable research with enormous facilities that they have. The historical accounts of science provide grounds for interpretation and may be useful in arousing appreciation of science. The course would provide: Detailed analysis of classically designed and executed experiments in Life Sciences over the years. It will provide a foundation of biology by uncovering various players in the machinery of biological processes. It will also be helpful in technical, scientific analysis with historical background for a robust understanding of various discoveries. Critical analysis of the history of biology would surely help students comprehend futuristic scientific discoveries.

COURSE OUTCOMES

- Students will be able to learn how was light manipulated during the past to peer into previously invisible world—those too small or too far away to be seen by the naked eye.
- Students will learn about experiments that had fundamental contribution to our present understanding of key molecular elements of life. They will understand how to examine microbial cells and colonies, using various techniques to manipulate color, size, and contrast in ways that helped Scientists to identify species and diagnose disease.
- Studying this unit, students would come to know that there were three group of Naturalists working simultaneously to find answers to inheritance, evolution and basic composition of life.

Students will be divulged with hereditary aspects of life. They will get familiar with genes and their roles in living organisms.

- Having understood the relationship of genes and inheritance, students would find interesting to learn the mystical molecule that make up these genes. Sequential study of these experiments would step by step unravel the mystery of genetic material.
- Students at this point of course would be curious to know the structure of molecule that forms the genetic material. They would learn how the information present on DNA manifests itself as specific characteristic features and help in diversity among organisms.
- Students will be explained how the in depth knowledge about DNA became the most important tool for *in vitro* research, modification and applications thereof.
- Students will be briefed about some landmark discoveries which helped the field of medicine to grow tremendously and played a significant role in improving the overall health of the human population.
- Students can be given small projects to write discoveries done in conventional way.
- They will be required to provide a descriptive view of the topics assigned to them. Students should highlight the research topic with reference to current understanding.

COURSE CONTENT:

| | |
|---|-----------------|
| Unit I: View of the invisible Biology | 04 Hours |
| Rudimentary microscopes to magnify objects; Use of eye glasses as simplest microscopes - Flea or fly glasses; Observing nature in the new world under lens; Book of Optics; Scientific use of Microscopes; Importance of Malphigi microscope that used field lens; Compound Microscope; Robert Hooke's observations in Micrographia; Foldscope by Manu Prakash | |
| Unit-II: Origin of Life – A question | 03 Hours |
| Spontaneous generation versus biogenesis; Problem of spores; Microbiology and Medicine - Germ theory of Disease; Recognition of agents of infection – Koch's Postulates. | |
| Unit-III: Understanding Biology by observations | 04 Hours |

| | |
|--|-----------------|
| A) Study of evolution of life: Darwins Theory (B) Study of Inheritance of Life: classical era with contributions of Aristotle, Epicurus, and others; Modern genetics: Gregor JohannMendel, his work on pea plants, theory of Mendelian inheritance (C) Study of compositionof Life : Levels of cellular and molecular organization; Cells, tissues and organs in our body; Pioneers of chromosome studies; Discovery of nucleic acids; Nuclein verified as a distinct chemical entity; Early identification of purines and pyrimidines; building blocks of Nucleic acids and proteins; Chemistry of Nucleic acids; Levene's tetranucleotidehypothesis. | |
| Unit-IV: DNA as the hereditary material – An experimental view | 06 Hours |
| Transformation: Classic work of Frederick Griffith; DNA as the Pneumococcal Transforming Factor; <i>In vitro</i> Transformation system; Announcement that the transformingPrinciple was DNA; Mirsky's Criticism; The Avery, MacLeod and McCarty proclamation;Additional experiments that supported DNA as the transforming principle; Hershey and Chase clinched the role of DNA as the Genetic Material | |
| Unit-V: Solving the puzzle of DNA structure | 07 Hours |
| Early studies of diffraction of X Rays by DNA fibers – contributions of Rosalind Franklin; Use of X – rays in medicines and research; Erwin Chargaff's discovery of base complementarity in DNA; Watson and Crick model of DNA; Contribution of Linus Pauling; DNA is replicated in Semi-conservative Fashion; Deciphering the Genetic Code; One Gene One Enzyme Edict. | |
| Unit-VI: Technical advancements in biology | 07 Hours |
| Polymerase Chain Reaction – a revolution in modern biology; DNA Manipulations using Restriction enzymes; Discovery of reverse transcriptase leading to development of RT-PCR for RNA amplification; Work of Stanley Cohen and Herbert Boyer; Advent of gene cloning - History and current applications | |
| Unit-VII: Research as a backbone of modern medicine | 07 Hours |

| | |
|---|-----------------|
| (A) Discovery of antimicrobial agents; Contribution of Joseph Lister and later by Alexander Flemming leading to Discovery of Magic bullets; (B) Control of Infectious Diseases – Variolation, mithridatism and vaccination from the view of Edward Jenner; Vaccine production strategies – with examples of BCG and SARS-CoV2 vaccines; Historical timeline of vaccination strategies;(C) Marie Curie – Use of radiation in medicine. | |
| Unit VIII: Project Work [On any one topic] | 07 Hours |
| Study historical research papers and provide a descriptive view of research that was carried out by Scientists as Minor Project. (A) Ancient system of medicine (B) Contribution of any one Indian Scientists in Biology (C) Contribution of any Physicists or Chemists in Biology (for topics listed above) | |

PRACTICAL – 30 Hours

(Wherever wet lab experiments are not possible, the principles and concepts can be demonstrated through any other material or medium including videos/virtual labs etc.)

1. Comparison of invisible life under the view of microscopes versus foldscope.
2. Cells as a unit of life and observation under the microscopes.
3. How do the cells divide – a view under the microscope: (mount of an onion root tip, onion bud cells or grasshopper testis).
4. Mendel's laws of inheritance – clues from nature.
5. Extraction of genomic DNA
6. Use of electric field to analyse DNA and other biomolecules.
7. Sneak Peek through the discovery of Polymerase chain reaction (PCR): Demonstration of original method and comparison with today's sophistication.
8. To test Flemming's hypothesis that the mold killed the bacteria.
9. Group Discussion on Research Topics assigned to students.

DEPARTMENT OF GEOLOGY

Category-I **BSc (Hons.) Geology**

DISCIPLINE SPECIFIC CORE COURSE -4 (DSC-4) – : Structural Geology

Credit distribution, eligibility and pre-requisites of the course:

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|----------------|--|-----------------|----------------------------|-----------------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Structural Geology (DSC-4) | 4 | 3 | 0 | 1 | 12th Pass | --- |

Learning Objectives

Structural geology essentially deals with the geometry, kinematics and dynamics of deformation of rocks. In response to the instability of the lithosphere produced by complex plate tectonic movements, continuous and discontinuous deformation takes place within the rocks in solid or semi-solid state, at different scales and at different depths, which manifests in a variety of complex structures in these rocks.

Learning outcomes

On completion of the course, the student should be able to:

- Identify the different geometric features of deformation, different types of deformation-induced structures,
- Understand basic techniques of measurement of different parameters in deformed rocks, and
- Understand a glimpse of the underlying deformation processes and mechanisms.

SYLLABUS OF DSC-4

UNIT – I (09 Hours)

Introduction to Structure and Topography: Understanding a topographic map; Effects of topography on structural features: Rule of V; Planar and linear structures; Concept of dip and strike, trend and plunge.

UNIT – II (09 Hours)

Stress and strain in rocks: Concept of rock deformation: Definition of Stress and Strain, Strain ellipses of different types and their geological significance. Mohr circle for stress and its application.

UNIT – III (08 Hours)

Folds: Fold morphology; Geometric and genetic classification of folds; Introduction to the mechanics of folding: Buckling, Bending, Flexural slip and flow folding.

UNIT – IV (08 Hours)

Foliation and lineation: Description and origin of foliations: axial plane cleavage and its tectonic significance; different types of foliations: crenulation cleavage, disjunctive cleavage,

salty cleavage, schistosity, gneissosity etc. Description and origin of lineation and relationship with major structures; stretching lineation and its relationship with strain.

UNIT – V (08 Hours)

Fractures and faults: Geometric and genetic classification of fractures and faults; Effects of faulting on the outcrops; Geologic/geomorphic criteria for recognition of faults and Mechanism of faulting: Anderson theory of faulting. Joints – different types of joints and their geological significance – columnar joint, pinnate joint, plumose structure.

UNIT – VI (03 Hours)

Shear Zones: Introduction, Geometry, strain profile, shear zones rocks and shear sense indicators.

Practical component - 30 Hours

Basic idea of topographic contours, Topographic sheets of various scales.

Structural contouring and 3-point problems of dip and strike

Introduction to Geological maps: Drawing profile sections and interpretation of geological maps of different complexities.

Exercises of stereographic projections

Essential/recommended readings

DISCIPLINE SPECIFIC CORE COURSE – 5 (DSC-5): Igneous Petrology

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Igneous Petrology (DSC-5) | 4 | 3 | 0 | 1 | 12th Pass | ---- |

Learning Objectives

To develop an understanding of the types of magma as well as types of igneous rocks. Magma generation in relation to different geodynamic settings and its relation with the petrological and geochemical features of the igneous rocks.

Learning outcomes

On completion of the course, the student should be able to:

- a) Identify the igneous rocks using petrographical, mineralogical and geochemical indices
- b) Determine the evolution of igneous rocks in relation to different geodynamic settings

SYLLABUS OF DSC- 5

UNIT – I (09 Hours)

Introduction to Igneous Petrology: Scope of Igneous petrology, classification of Igneous rocks, igneous textures, igneous structures.

UNIT – II (09 Hours)

Introduction to silicate melts and magmas: Physical properties of magma, the ascent of magmas, magmatic differentiation.

UNIT – III (09 Hours)

Introduction to Igneous Phase diagrams. The phase rule, the lever rule, Two Component systems involving melt: Binary system with a Eutectic, Binary system with a peritectic, Binary system thermal barrier, Binary system with solid solution.

UNIT – IV (09 Hours)

The chemistry of igneous rocks. Modal mineralogy, normative mineralogy, variation diagrams based on major elements, trace elements and their significance, application of radioactive isotopes in igneous petrology.

UNIT – V (09 Hours)

Introduction to igneous environments: Basalts and mantle structure, Magma generation and igneous rocks associated with various plate tectonic settings.

Practical component : 30 Hours

Study of important igneous rocks in hand specimens and thin sections- granite, granodiorite, diorite, gabbro, anorthosites, ultramafic rocks, basalts, andesites, trachyte, rhyolite.

Classification of Igneous Rocks.

Plotting and interpretation of variation diagrams.

Igneous rock occurrences in Indian context.

DISCIPLINE SPECIFIC CORE COURSE– 6 (DSC-6): Elements of Geochemistry

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Elements of Geochemistry DSC-6 | 4 | 3 | 0 | 1 | 12 th Pass | --- |

Learning Objectives

The Learning Objectives of this course are as follows:

- To develop an understanding of the chemical nature of the earth and other planetary material and relate mineralogy, geochemistry and bulk chemistry.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Students will be able to appreciate the field of geochemistry and understand the properties of the elements - Nucleosynthesis; Cosmochemistry; Principles of isotope geochemistry; Solid earth geochemistry: Core, Mantle, Crust. Near-surface geochemical environment, Chemical weathering of minerals and rocks. Examples of instrumentation, data collection and analyses

SYLLABUS OF DSC-6

UNIT – I (09 Hours)

The abundance of elements in the cosmos, solar system and earth. Meteorites, distribution of elements in core, mantle, crust.

UNIT – II (12 Hours)

Introduction to properties of elements: periodic table, chemical bonding, states of matter and atomic environment of elements, geochemical classification of elements, the concept of elemental fractionation.

UNIT – III (12 Hours)

Geochemistry of igneous rocks: geochemical variability of magma and its products. Near-surface geochemical environment: Chemical weathering of minerals and rocks.

UNIT – IV (12 Hours)

Introduction to isotope geology: use of stable and radiogenic isotopes in earth science.

Practical component: - 30 Hours

- Geochemical analysis of geological materials (analytical methods, concept of normalization)
- Geochemical variation diagrams, common geochemical plots, and their interpretations.
- Basic idea about handling and interpretation of isotope data.

CATEGORY-IV

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY DEPARTMENT OF GEOLOGY

GENERIC ELECTIVES (GE-2): Physics & Chemistry of Earth

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Physics & Chemistry of Earth (GE-2) | 4 | 3 | 1 | 0 | Class-XII | --- |

Learning Objectives

To develop an understanding of the surface and internal structure of the Earth and its mineralogy and chemistry; To equip the students about the present and past processes operative in shaping the physical and chemical make-up of the planet Earth

Learning outcomes

After completion of this course students will learn about:

- Physical, mineralogical and chemical structure of the earth
- Major surface features and their evolution through time
- Concept of geological time and its determination
- Earth's magnetic field, its short term and long term variation and its application
- Physical and chemical evolution of earth through time

SYLLABUS OF GE-2 – (Lecture- 45 Hours)

UNIT – I

Earth: surface features: Continents, continental margins, oceans

Earth's materials: Rocks and Minerals

UNIT – II

Earth's interior - variation of physical parameters and seismic wave velocity inside the earth, major sub divisions and discontinuities. Depth-wise mineralogical variation in the Earth. Concepts of Isostasy; Airy and Pratt Model. Core and Mantle: Seismological and other geophysical constraints. The geodynamo - Convection in the mantle. Plate Tectonics. Types of plate margins and their Dynamics.

UNIT – III

Elements of Earth's magnetism: Secular variation and westward drift. Solar activity and magnetic disturbance. Paleomagnetism

UNIT – IV

Elements: Origin of elements/nucleosynthesis. Abundance of the elements in the solar system/planet Earth. Geochemical classification of elements. Earth accretion and early differentiation. Isotopes and their applications in understanding Earth processes.

UNIT – V

Isotopes: Radiogenic and Stable. Radiogenic isotopes and their applications
Stable isotope fractionation. Oxygen isotopes. Sublithospheric Mantle (Mineralogy/phase transitions) Concept of mantle heterogeneity

UNIT – VI

Low-temperature geochemistry; surface and near-surface processes

DEPARTMENT OF PHYSICS & ASTROPHYSICS

**Category-I
BSc. (H) Physics**

**DISCIPLINE SPECIFIC CORE COURSE – 4:
MATHEMATICAL PHYSICS II**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|-----------|-------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical | | |
| Mathematical Physics II DSC – 4 | 4 | 2 | 0 | 2 | Class XII Pass | ----- |

LEARNING OBJECTIVES

The emphasis of course is on applications in solving problems of interest to physicists. The course will also expose students to fundamental computational physics skills enabling them to solve a wide range of physics problems. The skills developed during course will prepare them not only for doing fundamental and applied research but also for a wide variety of careers.

LEARNING OUTCOMES

After completing this course, student will be able to,

- Use curvilinear coordinates to solve problems with spherical and cylindrical symmetries
- Represent a periodic function by a sum of harmonics using Fourier series
- Obtain power series solution of differential equation of second order with variable coefficient using Frobenius method
- Understand the properties and applications of Legendre polynomials
- Learn about gamma and beta functions and their applications
- In the laboratory course, the students will learn to
 - Apply appropriate numerical method to solve selected physics problems both using user defined and in-built functions from Scilab/ Python
 - Solve non-linear equations
 - Perform least square fitting of the data taken in physics lab by user defined functions.
 - Interpolate a data by polynomial approximations
 - Generate and plot a function by its series representation
 - Generate and plot Legendre polynomials and verify their properties.
 - Numerically integrate a function and solve first order initial value problems numerically.

SYLLABUS OF DSC – 4

UNIT – I

(13 Hours)

Orthogonal Curvilinear Coordinates: Orthogonal Curvilinear Coordinates. Scale factors, element of area and volume in spherical and cylindrical coordinate Systems. Derivation of Gradient, Divergence, Curl and Laplacian in Spherical and Cylindrical Coordinate Systems
Fourier Series: Periodic functions, Orthogonality of sine and cosine functions, Convergence of Fourier series and Dirichlet Conditions (Statement only), Expansion of periodic functions in a series of sine and cosine functions and determination of Fourier coefficients, Even and odd functions and their Fourier expansions (Fourier Cosine Series and Fourier Sine Series), Parseval's Identity.

UNIT – II

(17 Hours)

Frobenius Method and series solution of Differential Equations: Singular Points of Second Order Linear Differential Equations and their importance, Frobenius method for finding series solution and its applications, Legendre Differential Equations and its solution. Properties of Legendre Polynomials: Rodrigues Formula, Generating Function, Orthogonality of Legendre Polynomials, Simple recurrence relations, Expansion of function in a series of Legendre Polynomials.

Some Special Integrals: Beta and Gamma Functions and relation between them, Expression of Integrals in terms of Gamma and Beta Functions.

PRACTICAL COMPONENT –

60 Hours

The aim of this laboratory is not just to teach computer programming and numerical analysis but to emphasize its role in solving problems in Physics. The course will consist of practical sessions and lectures on the related theoretical aspects of the laboratory. Assessment is to be done not only on the programming but also on the basis of formulating the problem.

- Every student must perform at least 12 programs covering each unit.
- The list of recommended programs is suggestive only. Students should be encouraged to do more practice. Emphasis should be given to formulate a physics problem as mathematical one and solve by computational methods.
- The implementation can be either in Python/ C++/ Scilab.

Unit 1: Root Finding: Bisection, Newton Raphson and secant methods for solving roots of equations, Convergence analysis.

Recommended List of Programs (At least two):

- (a) Determine the depth up to which a spherical homogeneous object of given radius and density will sink into a fluid of given density.
- (b) Solve transcendental equations like $\alpha = \tan(\alpha)$.
- (c) To approximate nth root of a number up to a given number of significant digits.

Unit 2: Least Square fitting (At least one): Algorithm for least square fitting and its relation to maximum likelihood for normally distributed data.

- a) Make a function for least square fitting, use it for fitting given data (x, y) and estimate the parameters a, b as well as uncertainties in the parameters for the following cases.
 - i. Linear ($y = ax + b$)
 - ii. Power law ($y = ax^b$)
 - iii. Exponential ($y = ae^{bx}$)
- b) Weighted least square fitting of given data (x, y) with known error/uncertainty-values using user defined function.

Unit 3: Generating and plotting of a function using series representation (At least one):

- a) To approximate the elementary functions (e.g. $\exp(x)$, $\sin(x)$, $\cos(x)$, $\ln(1+x)$, etc.) by a finite number of terms of Taylor's series and discuss the truncation error. To plot the function as well the nth partial sum of its series for various values of n on the same graph and visualise the convergence of series.
- b) Generating and plotting Legendre Polynomials using series expansion and verifying recurrence relation

Unit 4: Interpolation: Concept of Interpolation, Lagrange form of interpolating polynomial,

Error estimation, optimal points for interpolation.

Recommended List of Programs (At least one)

- (a) Write program to determine the unique polynomial of a degree n that agrees with a given set of $(n+1)$ data points (x_i, y_i) and use this polynomial to find the value of y at a value of x not included in the data.
- (b) Generate a tabulated data containing a given number of values $(x_i, f(x_i))$ of a function $f(x)$ and use it to interpolate at a value of x not used in table.

Unit 5: Numerical Integration: Newton Cotes Integration methods (Trapezoidal and Simpson rules) for definite integrals, derivation of composite formulae for these methods and discussion of error estimation.

Recommended List of Programs (At least three)

- (a) Given acceleration at equidistant time values, calculate position and velocity and plot them.
- (b) Use integral definition of $\ln(x)$ to compute and plot $\ln(x)$ in a given range. Use trapezoidal, Simpson and Gauss quadrature methods and compare the results.
- (c) Verify the rate of convergence of the composite Trapezoidal and Simpson methods by approximating the value of a given definite integral.
- (d) Verify the Orthogonality of Legendre Polynomials.
- (e) To evaluate the Fourier coefficients of a given periodic function (e.g. square wave, triangle wave, half wave and full wave rectifier etc.). To plot the function as well the n th partial sum of its series for various values of n on the same graph and visualise the convergence of series. Study of Gibbs phenomenon.
- (f) Verify the properties of Dirac Delta function using its representation as a sequence of functions.

Unit 6: Numerical Solutions of Ordinary Differential Equations: Euler, modified Euler, and Runge-Kutta (RK) second and fourth order methods for solving first order initial value problems (IVP) and system of first order differential equations,

Recommended List of Programs (At least two)

- (a) Solve given first order differential equation (Initial value problems) numerically using Euler RK2 and RK4 methods and apply to the following physics problems:
 - i. Radioactive decay
 - ii. Current in RC and LR circuits with DC source
 - iii. Newton's law of cooling
- (b) Write a code to compare the errors in various numerical methods learnt by solving a first order IVP with known solution.
- (c) Solve a system of first order IVP numerically using Euler and Runge-Kutta methods. Application to physical problems.

DISCIPLINE SPECIFIC CORE COURSE – 5: ELECTRICITY AND MAGNETISM

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|-----------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical | | |
| Electricity and Magnetism DSC – 5 | 4 | 3 | 0 | 1 | Class XII Pass | ---- |

LEARNING OBJECTIVES

This course reviews the concepts of electromagnetism learnt at school from a more advanced perspective and goes on to build new concepts. The course covers static and dynamic electric and magnetic fields due to continuous charge and current distributions respectively.

LEARNING OUTCOMES

After completing this course, student will be able to,

- Apply Coulomb's law to line, surface, and volume distribution of charges.
- Apply Gauss's law of electrostatics to distribution of charges
- Solve boundary value problems using method of images
- Understand the concept of electric polarization and bound charges in dielectric materials
- Understand and calculate the vector potential and magnetic field of arbitrary current distribution
- Understand the concept of bound currents and magnetic susceptibility in magnetic materials
- Understand the impact of time-varying magnetic and electric fields in order to comprehend the formulation of Maxwell's equations.

SYLLABUS OF DSC – 5

UNIT – I

(15 Hours)

Electric Field and Electric Potential for continuous charge distributions: Electric field due to a line charge, surface charge and volume charge, Divergence of electric field using the Dirac Delta function, Curl of electric field, Electric field vector as negative gradient of scalar potential, Ambiguities of electric potential, Differential and integral forms of Gauss's Law, Application of Gauss's law to various charge distributions having spherical, cylindrical and planar symmetries.

Boundary Value Problems in Electrostatics: Formulation of Laplace's and Poisson equations, First and second uniqueness theorems, Solutions of Laplace and Poisson equations in one

dimension using spherical and cylindrical coordinate systems and solutions in three-dimensional using Cartesian coordinates applying separable variable technique, Electrostatic boundary conditions for conductors and capacitors.

UNIT – II

(11 Hours)

Special techniques for the calculation of Potential and Field: The Method of Images is applied to a system of a point charge and finite continuous charge distribution (line charge and surface charge) in the presence of (i) a plane infinite sheet maintained at constant potential, and (ii) a sphere maintained at constant potential.

Electric Field in Matter: Polarization in matter, Bound charges and their physical interpretation, Field inside a dielectric, Displacement vector **D**, Gauss' law in the presence of dielectrics, Boundary conditions for **D**, Linear dielectrics, electric susceptibility and dielectric constant, Idea of complex dielectric constant due to varying electric field, Boundary value problems with linear dielectrics

UNIT – III

(19 Hours)

Magnetic Field: Divergence and curl of magnetic field **B**, Magnetic field due to arbitrary current distribution using Biot-Savart law, Integral and differential forms of Ampere's law, Vector potential and its ambiguities, Coulomb gauge and possibility of making vector potential divergence less, Vector potential due to line, surface and volume currents using Poisson equations for components of vector potential.

Magnetic Properties of Matter: Magnetization vector, Bound currents, Magnetic intensity, Differential and integral form of Ampere's Law in the presence of magnetised materials, Magnetic susceptibility and permeability of diamagnetic, paramagnetic and ferromagnetic materials.

Electrodynamics: Faraday's law, Lenz's law, Inductance and electromotive force, Ohm's law ($\vec{J} = \sigma \vec{E}$), Energy stored in a magnetic field, Continuity equation, Displacement current and displacement current density, Basic introduction to Maxwell's equations in electromagnetism.

- 4) Problems and Solutions in Electromagnetics (2015), Ajoy Ghatak, K Thyagarajan and Ravi Varshney.

PRACTICAL

– 30 Hours

Every student must perform at least five experiments.

- 1) Magnetic field variation along the axis of a circular coil and in a Helmholtz coil ($(r > a, r = a \text{ and } r < a)$. Here, 'a' is radius of coil and 'r' is distance between the coils).
- 2) **B-H** curves for soft and hard ferromagnetic materials and comparison of their coercivity, retentivity and saturation magnetization for same applied magnetic field.
- 3) Measurement of field strength **B** and its variation in a solenoid (determine $\frac{dB}{dx}$)
- 4) Measurement of current and charge sensitivity of ballistic galvanometer
- 5) Measurement of critical damping resistance of ballistic galvanometer
- 6) Determination of a high resistance by leakage method using ballistic galvanometer
- 7) Measurement of self-inductance of a coil by Anderson's Bridge
- 8) Measurement of self-inductance of a coil by Owen's Bridge
- 9) To determine the mutual inductance of two coils by the Absolute method

DISCIPLINE SPECIFIC CORE COURSE – 6: ELECTRICAL CIRCUIT ANALYSIS

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|-----------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical | | |
| Electrical Circuit Analysis DSC – 6 | 4 | 2 | 0 | 2 | Class XII pass | ---- |

LEARNING OBJECTIVES

This course covers the basic circuit concepts in a systematic manner which is suitable for analysis and design. It aims at study and analysis of electric circuits using network theorems and two-port parameters.

LEARNING OUTCOMES

At the end of the course the student will be able to,

- Understand the basic concepts, basic laws and methods of analysis of DC and AC networks and their difference
- Solve complex electric circuits using network theorems.
- Discuss resonance in series and parallel circuits and also the importance of initial conditions and their evaluation.
- Evaluate the performance of two port networks.

SYLLABUS OF DSC – 6

THEORY COMPONENT

Unit 1: (8 Hours)

Circuit Analysis: Ideal voltage source, real voltage source, current source, Kirchhoff's current law, Kirchhoff's voltage law, node analysis, mesh analysis, Star and Delta conversion

DC Transient Analysis: Charging and discharging with initial charge in RC circuit, RL circuit with initial current, time constant, RL and RC Circuits with source

Unit 2: (12 Hours)

AC Circuit Analysis: Sinusoidal voltage and current, Definitions of instantaneous, peak to peak, root mean square and average values, form factor and peak factor (for half-rectified and full-rectified sinusoidal wave, rectangular wave and triangular wave), voltage-current relationship in resistor, inductor and capacitor, phasor, complex impedance, power in AC circuits, sinusoidal circuit analysis for RL, RC and RLC Circuits, resonance in series and

parallel RLC Circuits (Frequency Response, Bandwidth, Quality Factor), selectivity, application of resonant circuits

Unit 3: (10 Hours)

Network Theorems: Principal of duality, Superposition theorem, Thevenin theorem, Norton theorem, Their applications in DC and AC circuits with more than one source, Maximum Power Transfer theorem for AC circuits, Reciprocity Theorem, Millman's Theorem, Tellegen's theorem

Two Port Networks: Impedance (Z) Parameters, Admittance (Y) Parameters, Transmission Parameters, Impedance matching

References:

Essential Readings:

- 2) Essentials of Circuit Analysis, Robert L. Boylestad, Pearson Education (2004)
- 3) Electrical Circuits, M. Nahvi and J. Edminister, Schaum's Outline Series, Tata McGraw-Hill (2005)
- 4) Fundamentals of Electric Circuits, C. Alexander and M. Sadiku, McGraw Hill (2008)
- 5) Principles of Electric Circuits, Thomas L. Floyd, 9/e (2016)

Additional Readings:

- 1) Network analysis, M. E. Van Valkenburg, Third edition, Prentice Hall
- 2) Network, Lines and Fields, John D. Ryder, Pearson Ed. II, 2015.
- 3) Electrical Circuits, K. A. Smith and R. E. Alley, 2014, Cambridge University Press

PRACTICAL COMPONENT – 60 Hours

Every student must perform at least seven experiments from the following list of experiments

- 1) Verification of Kirchhoff's Law.
- 2) Verification of Superposition Theorem by using d.c. and a.c. voltage source
- 3) Verification of Norton's theorem.
- 4) Verification of Thevenin's Theorem and Maximum Power Transfer Theorem by using d.c. and a.c. voltage source
- 5) Determination of unknown capacitance using de Sauty's Bridge
- 6) Determination of time constant of RC and RL circuit
- 7) Study of frequency response of RC circuit
- 8) Study of frequency response of a parallel LCR Circuit and determination of its resonant frequency, impedance at resonance, quality factor and bandwidth.
- 9) Explore electrical properties of matter using Arduino:
 - a. To study the characteristics of a series RC Circuit.
 - b. To study the response curve of a series LCR circuit and determine its resonant frequency, impedance at resonance, quality factor and bandwidth

Category II

B. Sc. Physical Science with Physics as one of the Core Discipline

DISCIPLINE SPECIFIC CORE COURSE (PHYSICS DSC - 2): ELECTRICITY AND MAGNETISM

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|--------------------------------------|----------|-----------|-------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical | | |
| Electricity and Magnetism Physics DSC 2 | 4 | 2 | 0 | 2 | Class XII pass | ---- |

LEARNING OBJECTIVES

This course reviews the concepts of electricity and magnetism learnt at school from a more advanced perspective and goes on to build new concepts. The course covers static and dynamic electric and magnetic fields, and the principles of electromagnetic induction. It also includes analysis of electrical circuits and introduction of network theorems. The students will be able to apply the concepts learnt to several real world problems.

LEARNING OUTCOMES

At the end of this course, students will be able to,

- Understand Gauss' law, Coulomb's law for the electric field, and apply them to systems of point charges as well as line, surface, and volume distributions of charges. Also to use the knowledge to solve some simple problems
- Express electric current and capacitance in terms of electric field and electric potential.
- Calculate the force experienced by a moving charge in a magnetic field
- Determine the magnetic force generated by a current carrying conductor
- Have brief idea of magnetic materials, understand the concept of electromagnetic induction, solve problems using Faraday's and Lenz's laws

In the laboratory course, students will be able to measure resistance (high and low), voltage, current, self and mutual inductance, capacitor, strength of magnetic field and its variation, study different electric circuits.

SYLLABUS OF PHYSICS DSC – 2

THEORY COMPONENT

Unit 1: (10 Hours)

Electrostatics: Electric field, electric flux, Gauss' theorem in electrostatics, applications of Gauss' theorem (linear, plane and spherical charge distribution), line integral of electric field, electric potential due to a point charge, electric potential and electric field of a dipole and charged disc, capacitance due to parallel plates and spherical condenser. Electrostatic energy of system of charge (charged sphere), dielectric medium, dielectric polarization, displacement vector, Gauss' theorem in dielectrics, parallel plate capacitor filled with dielectric.

Unit 2: (8 Hours)

Magnetostatics: Magnetic force between current elements and definition of magnetic field **B**, Biot-Savart's law and its applications (current carrying straight conductor, current carrying circular coil, current carrying solenoid), divergence and curl of magnetic field, Ampere's circuital law, magnetic properties of materials (magnetic intensity, magnetic induction, permeability, magnetic susceptibility), brief introduction of dia-, para- and ferro magnetic materials

Unit 3: (7 Hours)

Electromagnetic Induction: Faraday's laws of electromagnetic induction, Lenz's law, self-inductance of single coil, mutual inductance of two coils, energy stored in magnetic field. Maxwell's equations and equation of continuity of current, displacement current

Unit 4: (5 Hours)

DC Circuits: Review of Kirchhoff's Voltage and Current Laws, Thevenin theorem, Norton theorem, Superposition theorem, Maximum Power Transfer theorem.

- 2) Problems and Solutions in Electromagnetics, Ajoy Ghatak, K Thyagarajan and Ravi Varshney.
- 3) University Physics, Ronald Lane Reese, 2003, Thomson Brooks/Cole.

- 4) Schaum's Outline of Electric Circuits, J. Edminister and M. Nahvi, 3rd Edn., 1995, McGraw Hill.

PRACTICAL COMPONENT – 60 Hours

The teacher is expected to give basic idea and working of various instruments and circuits related to different experiments. Students should also be given knowledge of recording and analyzing experimental data.

Every student should perform at least 06 experiments from the following list of experiments.

- 1) To use a multimeter for measuring resistances, a.c and d.c voltages, d.c. current, capacitance and for checking electrical fuses.
- 2) Ballistic Galvanometer:
 - a) Measurement of charge and current sensitivity
 - b) Measurement of critical damping resistance
 - c) Determine a high resistance by leakage method
 - d) Determine self-inductance of a coil by Rayleigh's Method.
- 3) To compare capacitances using de Sauty's bridge.
- 4) Measurement of field strength B and its variation in a Solenoid
- 5) To study the Characteristics of a Series RC Circuit.
- 6) To study a series LCR circuit and determine its resonant frequency and quality factor.
- 7) To study a parallel LCR circuit and determine its anti-resonant frequency and quality factor
- 8) To determine a low resistance by Carey Foster bridge.
- 9) To verify the Thevenin, superposition and maximum power transfer theorems
- 10) To verify Norton theorem

| Electricity and Magnetism Physics DSC 3 | 4 | 2 | 0 | 2 | Class XII pass | ---- |

LEARNING OBJECTIVES

This course reviews the concepts of electricity and magnetism learnt at school from a more advanced perspective and goes on to build new concepts. The course covers static and dynamic electric and magnetic fields, and the principles of electromagnetic induction. It also includes analysis of electrical circuits and introduction of network theorems. The students will be able to apply the concepts learnt to several real world problems.

LEARNING OUTCOMES

At the end of this course, students will be able to,

- Understand Gauss' law, Coulomb's law for the electric field, and apply them to systems of point charges as well as line, surface, and volume distributions of charges. Also to use the knowledge to solve some simple problems
- Express electric current and capacitance in terms of electric field and electric potential.
- Calculate the force experienced by a moving charge in a magnetic field
- Determine the magnetic force generated by a current carrying conductor
- Have brief idea of magnetic materials, understand the concept of electromagnetic induction, solve problems using Faraday's and Lenz's laws

In the laboratory course, students will be able to measure resistance (high and low), voltage, current, self and mutual inductance, capacitor, strength of magnetic field and its variation, study different electric circuits.

SYLLABUS OF PHYSICS DSC – 3

THEORY COMPONENT

Unit 1: (10 Hours)

Electrostatics: Electric field, electric flux, Gauss' theorem in electrostatics, applications of Gauss' theorem (linear, plane and spherical charge distribution), line integral of electric field, electric potential due to a point charge, electric potential and electric field of a dipole and charged disc, capacitance due to parallel plates and spherical condenser. Electrostatic energy of system of charge (charged sphere), dielectric medium, dielectric polarization, displacement vector, Gauss' theorem in dielectrics, parallel plate capacitor filled with dielectric.

Unit 2: (8 Hours)

Magnetostatics: Magnetic force between current elements and definition of magnetic field **B**, Biot-Savart's law and its applications (current carrying straight conductor, current carrying circular coil, current carrying solenoid), divergence and curl of magnetic field, Ampere's circuital law, magnetic properties of materials (magnetic intensity, magnetic induction, permeability, magnetic susceptibility), brief introduction of dia-, para- and ferro magnetic materials

Unit 3: (7 Hours)

Electromagnetic Induction: Faraday's laws of electromagnetic induction, Lenz's law, self-inductance of single coil, mutual inductance of two coils, energy stored in magnetic field. Maxwell's equations and equation of continuity of current, displacement current

Unit 4: (5 Hours)

DC Circuits: Review of Kirchhoff's Voltage and Current Laws, Thevenin theorem, Norton theorem, Superposition theorem, Maximum Power Transfer theorem.

Additional Readings:

- 1) Electricity and Magnetism, Berkeley Physics Course, Edward M. Purcell, 1986, McGraw-Hill Education.
- 2) Problems and Solutions in Electromagnetics, Ajoy Ghatak, K Thyagarajan and Ravi Varshney

- 3) University Physics, Ronald Lane Reese, 2003, Thomson Brooks/Cole.
- 4) Schaum's Outline of Electric Circuits, J. Edminister and M. Nahvi, 3rd Edn., 1995, McGraw Hill.

PRACTICAL COMPONENT – 60 Hours

The teacher is expected to give basic idea and working of various instruments and circuits related to different experiments. Students should also be given knowledge of recording and analyzing experimental data.

Every student should perform at least 06 experiments from the following list of experiments.

- 1) To use a multimeter for measuring resistances, a.c and d.c voltages, d.c. current, capacitance and for checking electrical fuses.
- 2) Ballistic Galvanometer:
 - e) Measurement of charge and current sensitivity
 - f) Measurement of critical damping resistance
 - g) Determine a high resistance by leakage method
 - h) Determine self-inductance of a coil by Rayleigh's Method.
- 3) To compare capacitances using de Sauty's bridge.
- 4) Measurement of field strength B and its variation in a Solenoid
- 5) To study the Characteristics of a Series RC Circuit.
- 6) To study a series LCR circuit and determine its resonant frequency and quality factor.
- 7) To study a parallel LCR circuit and determine its anti-resonant frequency and quality factor
- 8) To determine a low resistance by Carey Foster bridge.
- 9) To verify the Thevenin, superposition and maximum power transfer theorems
- 10) To verify Norton theorem

DISCIPLINE SPECIFIC CORE COURSE (PHYSICS DSC - 4): LINEAR AND DIGITAL INTEGRATED CIRCUITS

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|-----------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical | | |
| Linear and Digital Integrated Circuits Physics DSC 4 | 4 | 2 | 0 | 2 | Class XII pass | ---- |

LEARNING OBJECTIVES

This paper aims to provide the basic knowledge of linear and digital electronics. It discusses about the operational amplifier and its applications. Boolean algebra and combinational logic circuits are also discussed.

LEARNING OUTCOMES

At the end of this course, students will be able to achieve the following learning outcomes.

- To understand Op-Amp basics and its various applications.
- To become familiar with logic gates and boolean algebra theorems.
- To understand the minimization techniques for designing a simplified logic circuit.
- To design a half adder, full adder, half-subtractor, and full-subtractor.
- To understand the working of data processing circuits, multiplexers, de-multiplexers, decoders and encoders.
- To become familiar with the working of flip-flop circuits, its working and applications.

SYLLABUS OF PHYSICS DSC – 4

THEORY COMPONENT

Unit 1: (8 Hours)

Operational Amplifiers (Black box approach): Characteristics of an ideal and practical Operational Amplifier (IC 741), Open and closed loop configuration, CMRR, Slew Rate and the concept of Virtual Ground.

Applications of Op-Amps: (1) Inverting and non-inverting amplifiers, (2) Summing and Difference Amplifier, (3) Differentiator, (4) Integrator, (5) Wein bridge oscillator, (6) Comparator, and (7) Active low pass and high pass Butter worth filter (1st order only).

Unit 2: (6 Hours)

Logic Gates and Boolean algebra: Truth Tables of OR, AND, NOT, NOR, NAND, XOR, XNOR, Basic postulates and fundamental theorems of Boolean algebra.

Combinational Logic Analysis and Design: Standard representation of logic functions (SOP), Minimization Techniques (Karnaugh map minimization up to 4 variables for SOP).

Unit 3: (6 Hours)

Arithmetic Circuits: Half and Full Adder, Half and Full Subtractor, 4-bit binary Adder/Subtractor

Data processing circuits: Multiplexers, De-multiplexers, Decoders, Encoders

Unit 4: (5 Hours)

Sequential Circuits: SR, D, and JK Flip-Flops. Race-around conditions in JK Flip-Flop. Master-slave JK Flip-Flop.

Shift registers: Serial-in-Serial-out, Serial-in-Parallel-out, Parallel-in-Serial-out and Parallel in-Parallel-out Shift Registers (only up to 4 bits). Ring Counter.

Unit 5: (5 Hours)

Counters (4 bits): Asynchronous counter, Synchronous Counter.

D-A and A-D Conversion: 4 bit binary weighted and R-2R D-A converters, A-D conversion characteristics, successive approximation ADC.

References:**Essential Readings:**

- 2) Operational Amplifiers and Linear ICs, David A. Bell, 3rd Edition, 2011, Oxford University Press.
- 3) Digital Principles and Applications, A. P. Malvino, D. P. Leach and Saha, 8th Ed., 2018, Tata McGraw
- 4) Digital Circuits and systems, Venugopal, 2011, Tata McGraw Hill
- 5) Digital Fundamentals, Thomas L. Floyd, Pearson Education Asia (1994).
- 6) Digital Principles, R. L. Tokheim, Schaum's outline series, Tata McGraw- Hill (1994).

PRACTICAL COMPONENT – 60 Hours

Every student should perform at least 04 experiments each from section A, B and C

Section A: Op-Amp. Circuits (Hardware design)

- 1) To design an inverting and non-inverting amplifier using Op-amp (741,351) for dc voltage of given gain.
- 2) To design inverting and non-inverting amplifier using Op-amp (741,351) and study their frequency responses
- 3) To add two dc voltages using Op-Amp in inverting and non-inverting mode.
- 4) To design a precision Differential amplifier of given I/O specification using Op-amplifier.

- 5) To investigate the use of an op-amp as an Integrator.
- 6) To investigate the use of an op-amp as a Differentiator.
- 7) To design a Wien bridge oscillator for given frequency using an Op-Amplifier.
- 8) Design a Butter-worth Low Pass active Filter (1st order) and study frequency response.
- 9) Design a Butter-worth High Pass active Filter (1st order) and study frequency response.
- 10) Design a digital to analog converter (DAC) of given specifications.

Section B: Digital circuits (Hardware design)

- 1) (a) To design a combinational logic system for a specified Truth Table.
(b) To convert Boolean expression into logic circuit & design it using logic gate ICs.
(c) To minimize a given logic circuit.
- 2) Half Adder and Full Adder.
- 3) Half Subtractor and Full Subtractor.
- 4) 4 bit binary adder and adder-subtractor using Full adder IC.
- 5) To design a seven segment decoder.
- 6) To build Flip-Flop (RS, D-type and JK) circuits using NAND gates.
- 7) To build JK Master-slave flip-flop using Flip-Flop ICs.
- 8) To build a Counter using D-type/JK Flip-Flop ICs and study timing diagram.
- 9) To make a Shift Register (serial-in and serial-out) using D-type/JK Flip-Flop ICs.

Section C: SPICE/MULTISIM simulations for electronic circuits and devices

- 1) To verify the Thevenin and Norton Theorems.
- 2) Design and analyze the series and parallel LCR circuits.
- 3) Design the inverting and non-inverting amplifier using an Op-Amp of given gain.
- 4) Design and Verification of op-amp as integrator and differentiator.
- 5) Design the 1st order active low pass and high pass filters of given cutoff frequency.
- 6) Design a Wein's Bridge oscillator of given frequency.
- 7) Design clocked SR and JK Flip-Flop's using NAND Gates.
- 8) Design 4-bit asynchronous counter using Flip-Flop ICs.

Category-IV

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY THE DEPARTMENTS

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|--------------------------------------|----------|-----------|-------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical | | |
| Electricity and Magnetism GE – 11 | 4 | 3 | 0 | 1 | Class XII pass | NIL |

LEARNING OBJECTIVES

This course begins with theorems of network analysis which are required to perform the associated experiments in the laboratory. Then course delves into the elementary vector analysis, an essential mathematical tool for understanding static electric field and magnetic field. By the end of the course, the student should appreciate Maxwell's equations.

LEARNING OUTCOMES

At the end of this course the student will be able to,

- Apply Coulomb's law to line, surface, and volume distributions of charges.
- Apply Gauss's law of electrostatics to distribution of charges
- Understand the effects of electric polarization and concepts of bound charges in dielectric materials
- Understand and calculate the vector potential and magnetic field of arbitrary current distribution
- Understand the concept of bound currents and ferromagnetism in magnetic materials

SYLLABUS OF GE – 11

THEORY COMPONENT

Unit 1: (15 Hours)

Network Analysis: Superposition, Thevenin, Norton theorems and their applications in DC and AC circuits with more than one source, Maximum Power Transfer theorem for AC circuits
Mathematical Preliminaries: Concept of scalar and vector fields, Gradient of a scalar field, Divergence and curl of vector fields and their physical interpretation, Conservative forces and Laplace and Poisson equations.

Concept of a line integral of a scalar and vector field, surface integral of vector fields and volume integral, Gauss's theorem, Stoke's theorem.

Unit 2: (15 Hours)

Electric Field and Electric Potential for continuous charge distributions: Electric field due to a line charge, surface charge and volume charge distributions, Electric field vector as negative gradient of scalar potential, Ambiguities of Electric potential, Differential and integral forms of Gauss's Law, Applications of Gauss's Law to various charge distributions with spherical, cylindrical and planar symmetries, Uniqueness theorem

Electric Field in Matter: Bound charges due to polarization and their physical interpretation. Average electric field inside a dielectric, Electric Field in spherical and cylindrical cavities of a dielectric, Displacement vector and its boundary conditions, Gauss' Law in the presence of dielectrics, Linear dielectrics: electric susceptibility and dielectric constant, Boundary value problems with linear dielectrics.

Unit 3: (15 Hours)

Magnetic Field: Divergence and curl of magnetic field B, Magnetic field due to arbitrary current distribution using Biot-Savart law, Ampere's law, integral and differential forms of Ampere's Law, Vector potential and its ambiguities.

Magnetic Properties of Matter: Magnetization vector, Bound Currents, Magnetic Intensity, Differential and integral form of Ampere's Law in the presence of magnetised materials, Magnetic susceptibility and permeability, Ferromagnetism (Hund's rule)

Electrodynamics: Faraday's Law, Lenz's Law, inductance, Electromotive force, Ohm's Law ($\vec{J} = \sigma \vec{E}$), Energy stored in a Magnetic Field. Charge Conservation, Continuity equation, Differential and integral forms of Maxwell's equations in matter.

- 3) Fundamentals of Physics, Resnick, Halliday and Walker 10/e, 2013, Wiley

PRACTICAL COMPONENT- 30 Hours

Learning Outcome:

- To understand working of Arduino Microcontroller System
- To use Arduino to measure time, count events and time between events
- To use Arduino to measure voltage/current/resistance
- To use Arduino to measure various physical parameters like magnetic field

Unit I (Mandatory): Arduino Programming

Introduction to Arduino Microcontroller platform. Getting acquainted with the Arduino IDE and Basic Sketch structure. Digital Input and output. Measuring time and events. Measuring analog voltage. Generating analog voltage using Pulse Width Modulation. Serial communication and serial monitor. Programming using Interrupts.

Unit II: Exploring electrical properties of matter using Arduino (at least one experiment)

- To study the characteristics of a series RC Circuit.
- To study response curve of a Series LCR circuit and determine its (a) Resonant frequency, Impedance at resonance, (c) Quality factor Q, and (d) Band width.
- Diode Characteristics:
 - To study characteristics of diode and estimate Boltzman constant.
 - To study characteristics of LED and estimate Planck's constant

Unit III: Exploring magnetic properties of matter using Arduino

- To verify Faraday's law and Lenz's law by measuring induced voltage across a coil subjected to varying magnetic field. Also, estimate dipole moment of the magnet.

Unit IV: DC and AC Bridges (at least one experiment)

- To compare capacitances using de Sauty Bridge
- To determine a Low Resistance by Carey - Foster Bridge

Unit V: Network Theorems

(at least one experiment)

- To verify the Thevenin and Norton theorems
- To verify the Superposition, and Maximum Power Transfer Theorems

GENERIC ELECTIVE (GE - 12): THERMAL PHYSICS

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department offering the course |
|--------------------------------|---------|-----------------------------------|----------|-----------|----------------------|-----------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical | | | |
| Thermal Physics GE – 12 | 4 | 3 | 0 | 1 | Class XII pass | NIL | Physics and Astrophysics |

LEARNING OBJECTIVES

This course will review the basic concepts of thermodynamics, kinetic theory of gases with a brief introduction to statistical mechanics. The primary goal is to understand the applications of fundamental laws of thermodynamics to various systems and processes. This coursework will also enable the students to understand the connection between the macroscopic observations of physical systems and microscopic behaviour of atoms and molecule through statistical mechanics.

LEARNING OUTCOMES

At the end of this course, students will,

- Get an essence of the basic concepts of thermodynamics, the first and the second law of thermodynamics, the concept of entropy and the associated theorems, the thermodynamic potentials and their physical interpretations. They are also expected to learn Maxwell's thermodynamic relations.
- Know the fundamentals of the kinetic theory of gases, Maxwell-Boltzman distribution law, mean free path of molecular collisions, viscosity, thermal conductivity and diffusion.
- Learn about the black body radiations, Stefan- Boltzmann's law, Rayleigh-Jean's law and Planck's law and their significances.
- Learn the basics of quantum statistical distributions, viz., the Bose-Einstein statistics and the Fermi-Dirac statistics.

In the laboratory course, the students are expected to measure of Planck's constant using black body radiation, determine Stefan's constant, coefficient of thermal conductivity of a bad conductor and a good conductor, determine the temperature coefficient of resistance, study variation of thermo-emf across two junctions of a thermocouple with temperature etc.

SYLLABUS OF GE – 12

THEORY COMPONENT

Unit 1: (12 Hours)

Laws of Thermodynamics: Fundamental basics of Thermodynamic system and variables, Zeroth Law of Thermodynamics and temperature, First law and internal energy, various thermodynamical processes, Applications of First Law: general relation between C_P and C_V , work done during various processes, Compressibility and Expansion Coefficient, reversible and irreversible processes, Second law: Kelvin-Planck and Clausius statements, Carnot engine, Carnot cycle and theorem, basic concept of Entropy, Entropy changes in reversible and irreversible processes, Clausius inequality, Entropy-temperature diagrams.

Unit 2: (08 Hours)

Thermodynamical Potentials: Enthalpy, Gibbs, Helmholtz and Internal Energy functions, Maxwell's relations and applications - Clausius Clapeyron Equation, Expression for $(C_P - C_V)$, C_P/C_V , TdS equations, energy equations for ideal gases.

Unit 3: (8 Hours)

Kinetic Theory of Gases: Derivation of Maxwell's law of distribution of velocities and its experimental verification, Mean free path (zeroth order only), Transport Phenomena: Viscosity, Conduction and Diffusion (for vertical case).

Unit 4: (7 Hours)

Theory of Radiation: Blackbody radiation, Spectral distribution, Derivation of Planck's law, Deduction of Wien's law, Rayleigh-Jeans Law, Stefan Boltzmann Law and Wien's displacement law from Planck's law.

Unit 5: (10 Hours)

Statistical Mechanics: Macrostate and Microstate, phase space, Entropy and Thermodynamic Probability, Maxwell-Boltzmann law, Fermi-Dirac distribution law - Bose-Einstein distribution law - comparison of three statistics.

- 2) An Introduction to Thermal Physics: D. Schroeder 2021, Oxford Univ. Press (earlier published by Pearsons).
- 3) Heat, Thermodynamics and Statistical Physics, Brij Lal, N. Subrahmanyam and P. S. Hemne, S. Chand and Company.

PRACTICAL COMPONENT- 30 Hours

- Sessions on the construction and use of specific measurement instruments and experimental apparatuses used in the thermal physics lab, including necessary precautions.
- Sessions on the review of experimental data analysis, sources of error and their estimation in detail, writing of scientific laboratory reports including proper reporting of errors.
- Application to the specific experiments done in the lab.

Every student must perform at least four experiments from the following list.

- 1) To determine Mechanical Equivalent of Heat, J , by Callender and Barne's constant flow method.
- 2) Measurement of Planck's constant using black body radiation.
- 3) To determine Stefan's Constant.
- 4) To determine the coefficient of thermal conductivity of Cu by Searle's Apparatus.
- 5) To determine the coefficient of thermal conductivity of a bad conductor by Lee and Charlton's disc method by steam or electrical heating.
- 6) To determine the temperature co-efficient of resistance by Platinum resistance thermometer.
- 7) To study the variation of thermos-emf across two junctions of a thermocouple with temperature.

GENERIC ELECTIVE (GE - 13): MODERN PHYSICS

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------------|---------|-----------------------------------|----------|-----------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical | | |
| Modern Physics GE – 13 | 4 | 3 | 0 | 1 | Class XII pass | NIL |

LEARNING OBJECTIVES

The objective of this course is to teach the physics foundation necessary for learning various topics in modern physics which are crucial for understanding atoms, molecules, photons, nuclei and elementary particles. These concepts are also important to understand phenomena in Laser physics, condensed matter physics and astrophysics.

LEARNING OUTCOMES

After getting exposure to this course, the following topics would have learnt,

- Main aspects of the inadequacies of classical mechanics as well as understanding of the historical development of quantum mechanics, laying the foundation of modern physics.
- Formulation of Schrodinger equation and the idea of probability interpretation associated with wave-functions.
- The spontaneous and stimulated emission of radiation, optical pumping and population inversion, Basic lasing action.
- The properties of nuclei like density, size, binding energy, nuclear force and structure of atomic nucleus, liquid drop model and mass formula.
- Radioactive decays like alpha, beta, gamma decay. Neutrino, its properties and its role in theory of beta decay.
- Fission and fusion: Nuclear processes to produce nuclear energy in nuclear reactor and stellar energy in stars.

In the laboratory course, the students will get opportunity to measure Planck's constant, verify photoelectric effect, and determine e/m of electron and work function of a metal. They will also find wavelength of Laser sources by single and double slit experiment, wavelength and angular spread of He-Ne Laser using plane diffraction grating.

SYLLABUS OF GE – 13

THEORY COMPONENT

Unit 1: (10 Hours)

Origin of Modern Physics: Blackbody Radiation: Failure of explanation from classical theory; Planck's idea of a quantum; Quantum theory of Light: Photo-electric effect and Compton scattering, de Broglie wavelength and matter waves; Davisson-Germer experiment; Wave description of particles by wave packets, Group and Phase velocities and relation between them.

Unit 2: (10 Hours)

Problems with Rutherford model: Instability of atoms and observation of discrete atomic spectra; Bohr's quantization rule and atomic stability; calculation of energy levels for hydrogen-like atoms and their spectra.

Uncertainty principle: Gamma ray microscope thought experiment; Wave-particle duality leading to Heisenberg uncertainty principle; Impossibility of an electron being in the nucleus, Energy-time uncertainty principle; origin of natural width of emission lines

Unit 3: (10 Hours)

Basics of quantum Mechanics: Two-slit interference experiment with photons and electrons; Concept of wave functions, linearity and superposition, Time independent Schrodinger wave equation for non-relativistic particles; Momentum and Energy operators; physical interpretation of a wave function, probabilities, normalization and probability current densities in one dimension. Problem: One dimensional infinitely rigid box. An application: Quantum dot.

Unit 4: (05 Hours)

X-rays: Ionizing Power, X-ray Diffraction, Bragg's Law. Critical Potentials, X-rays-Spectra: Continuous and Characteristic X-rays, Moseley's Law.

LASERS: Properties and applications of Lasers. Emission (spontaneous and stimulated emissions) and absorption processes, Metastable states, components of a laser and lasing action.

Unit 5: (10 Hours)

Nuclear Physics: Size and structure of atomic nucleus and its relation with atomic weight; Nature of nuclear force, Stability of the nucleus; N-Z graph, Drip line nuclei, Binding Energy, Liquid Drop model: semi-empirical mass formula.

Radioactivity: Different equilibrium, Alpha decay; Beta decay: energy released, spectrum and Pauli's prediction of neutrino; Gamma ray emission, energy-momentum conservation:

Fission and fusion: Mass deficit and generation of energy; Fission: nature of fragments and emission of neutrons. Fusion and thermonuclear reactions driving stellar evolution (brief qualitative discussions only).

PRACTICAL COMPONENT – 30 Hours

- Sessions on the construction and use of specific measurement instruments and experimental apparatuses used in the modern physics lab, including necessary precautions.
- Sessions on the review of experimental data analysis, sources of error and their estimation in detail, writing of scientific laboratory reports including proper reporting of errors.
- Application to the specific experiments done in the lab.

Every student must perform at least 06 experiments from the following list of experiments.

- 1) Measurement of Planck's constant using black body radiation and photo-detector.
- 2) Photo-electric effect: estimate Planck's constant using graph of maximum energy of photo-electrons versus frequency of light.
- 3) To determine work function of material of filament of directly heated vacuum diode.
- 4) To determine the Planck's constant using LEDs, using at least 4 LEDs.
- 5) To determine the wavelength of H-alpha emission line of Hydrogen atom.
- 6) To determine the value of e/m by (a) Magnetic focusing or (b) Bar magnet.
- 7) To setup the Millikan oil drop apparatus and determine the charge of an electron.
- 8) To show the tunneling effect in tunnel diode using I-V characteristics.
- 9) To determine the wavelength of laser source using diffraction of single slit.

- 10) To determine wavelength and angular spread of He-Ne laser using plane diffraction grating.
- 11) To determine the wavelength of laser source using diffraction of double slits.

GENERIC ELECTIVE (GE - 14): INTRODUCTORY ASTRONOMY

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------------------------|---------|-----------------------------------|----------|-----------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical | | |
| Introductory Astronomy GE – 14 | 4 | 3 | 1 | 0 | Class XII pass | NIL |

LEARNING OBJECTIVES

This course is meant to introduce undergraduate students to the wonders of the Universe. Students will understand how astronomers over millennia have come to understand mysteries of the universe using laws of geometry and physics, and more recently chemistry and biology. They will be introduced to the Indian contribution to astronomy starting from ancient times up to the modern era. They will learn about diverse set of astronomical phenomenon, from the daily and yearly motion of stars and planets in the night sky which they can observe themselves, to the expansion of the universe deduced from the latest observations and cosmological models. Students will also be introduced to internet astronomy and the citizen science research platform in astronomy. The course presupposes school level understanding of mathematics and physics.

LEARNING OUTCOMES

After completing this course, student will gain an understanding of,

- Different types of telescopes, diurnal and yearly motion of astronomical objects, astronomical coordinate systems and their transformations
- Brightness scale for stars, types of stars, their structure and evolution on HR diagram
- Components of solar system and its evolution
- Current research in detection of exoplanets
- Basic structure of different galaxies and rotation of the Milky Way galaxy
- Distribution of chemical compounds in the interstellar medium and astrophysical conditions necessary for the emergence and existence of life
- Internet based astronomy and the collaborative citizen astronomy projects
- India's contribution to astronomy, both in ancient times and in modern era.

SYLLABUS OF GE – 14 (Lecture-45 hours)

THEORY COMPONENT

Unit 1:

Introduction to Astronomy and Astronomical Scales: History of astronomy, wonders of the Universe, overview of the night sky, diurnal and yearly motions of the Sun, size, mass, density and temperature of astronomical objects, basic concepts of positional astronomy: Celestial sphere, Astronomical coordinate systems, Horizon system and Equatorial system

Unit 2:

Basic Parameters of Stars: Stellar energy sources, determination of distance by parallax method, aberration, proper motion, brightness, radiant flux and luminosity, apparent and absolute magnitude scales, distance modulus, determination of stellar temperature and radius, basic results of Saha ionization formula and its applications for stellar astrophysics, stellar spectra, dependence of spectral types on temperature, luminosity classification, stellar evolutionary track on Hertzsprung-Russell diagram

Unit 3:

Astronomical Instruments: Observing through the atmosphere (Scintillation, Seeing, Atmospheric Windows and Extinction). Basic Optical Definitions for Telescopes: Magnification, Light Gathering Power, Limiting magnitude, Resolving Power, Diffraction Limit. Optical telescopes, radio telescopes, Hubble space telescope, James Web space telescope, Fermi Gamma ray space telescope.

Astronomy in the Internet Age: Overview of Aladin Sky Atlas, Astrometrica, Sloan Digital Sky Survey, Stellarium, virtual telescope

Citizen Science Initiatives: Galaxy Zoo, SETI@Home, RAD@Home India

Unit 4:

Sun and the solar system: Solar parameters, Sun's internal structure, solar photosphere, solar atmosphere, chromosphere, corona, solar activity, origin of the solar system, the nebular model, tidal forces and planetary rings

Exoplanets: Detection methods

Unit 5:

Physics of Galaxies: Basic structure and properties of different types of Galaxies, Nature of rotation of the Milky Way (Differential rotation of the Galaxy), Idea of dark matter

Cosmology and Astrobiology: Standard Candles (Cepheids and SNe Type Ia), Cosmic distance ladder, Olber's paradox, Hubble's expansion, History of the Universe, Chemistry of life, Origin of life, Chances of life in the solar system

Unit 6:

Astronomy in India: Astronomy in ancient, medieval and early telescopic era of India, current Indian observatories (Hanle-Indian Astronomical Observatory, Devasthal Observatory, Vainu Bappu Observatory, Mount Abu Infrared Observatory, Gauribidanur Radio Observatory, Giant Metre-wave Radio Telescope, Udaipur Solar Observatory, LIGO-India) (qualitative discussion), Indian astronomy missions (Astrosat, Aditya)

DEPARTMENT OF CHEMISTRY
Category-I

B.Sc. (H) Chemistry

DISCIPLINE SPECIFIC CORE COURSE -4 (DSC-4): CHEMISTRY OF S- AND P-BLOCK ELEMENTS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|--------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemistry of s- and p-Block Elements (DSC-4: Inorganic Chemistry -II) | 04 | 03 | 0 | 01 | Class 12 th Pass | ---- |

Learning objectives

The objectives of this course are as follows:

- To develop the general principles of metallurgy and s-, p-block elements.
- To introduce the terms minerals, ores, concentration, benefaction, calcination, roasting, refining, etc. and explain the principles of oxidation and reduction as applied to the extraction procedures.
- To make students ware of different methods of purification of metals, such as electrolytic, oxidative refining, VanArkel-De Boer process and Mond's process are discussed and applications of thermodynamic concepts like that of Gibbs energy and entropy to the extraction of metals.
- To familiarize students with the patterns and trends exhibited by s- and p-block elements and their compounds with emphasis on synthesis, structure, bonding and uses.
- To impart information about the fundamentals of internal and external redox indicators, and iodometric/iodimetric titrations.

Learning outcomes

By studying this course, students will be able to:

- Learn the fundamental principles of metallurgy and understand the importance of recovery of by-products during extraction.
- Applications of thermodynamic concepts like that of Gibbs energy and

entropy to the principles of extraction of metals.

- Learn about the characteristics of s- and p- block elements as well as the synthesis, structure, bonding and uses of their compounds
- Understand the concept and use of internal and external redox indicators
- Comprehend the theory and application of iodometric and iodimetric titrimetric analysis

SYLLABUS OF DSC-4

UNIT – I: General Principles of Metallurgy

(6 Hours)

Chief modes of occurrence of metals based on standard electrode potentials. Ellingham diagrams for reduction of metal oxides using carbon and carbon monoxide as reducing agent. Electrolytic Reduction, Hydrometallurgy with reference to cyanide process for silver and gold. Methods of purification of metals: Electrolytic process, Van Arkel-De Boer process, Zone refining. Brief discussion of metals and alloys used in ancient and medieval India.

UNIT – II: Chemistry of s- Block Elements

(15 Hours)

General characteristics: melting point, flame colouration, reducing nature, diagonal relationships and anomalous behavior of first member of each group. Reactions of alkali and alkaline earth metals with oxygen, hydrogen, nitrogen and water.

Common features such as ease of formation, thermal stability, energetics of dissolution, and solubility of the following alkali and alkaline earth metal compounds: hydrides, oxides, peroxides, superoxides, carbonates, nitrates, sulphates.

Complex formation tendency of s-block elements; structure of the following complexes: crown ethers and cryptates of Group I; basic beryllium acetate, beryllium nitrate, EDTA complexes of calcium and magnesium.

Solutions of alkali metals in liquid ammonia and their properties

UNIT – III: Chemistry of p-Block Elements

(9 Hours)

Electronic configuration, atomic and ionic size, metallic/non-metallic character, melting point, ionization enthalpy, electron gain enthalpy, electronegativity, Catenation, Allotropy of C, P, S; inert pair effect, diagonal relationship between B and Si and anomalous behaviour of first member of each group.

UNIT – IV: Compounds of p-Block Elements

(15 Hours)

Acidic/basic nature, stability, ionic/covalent nature, oxidation/reduction, hydrolysis, action of heat on the following:

- Hydrides of Group 13 (only diborane), Group 14, Group 15 (EH_3 where E = N, P, As, Sb, Bi), Group 16 and Group 17.
- Oxoacids of phosphorus, sulphur and chlorine
- Interhalogen and pseudohalogen compound
- Clathrate compounds of noble gases, xenon fluorides (MO treatment of XeF_2).

Practical component – 30 Hours

1. Redox Titrations

- (i) Estimation of Fe(II) with $K_2Cr_2O_7$ using diphenylamine as internal indicator.
- (ii) Estimation of Fe(II) with $K_2Cr_2O_7$ using N-phenyl anthranilic acid as internal indicator.
- (iii) Estimation of Fe(II) with $K_2Cr_2O_7$ using external indicator.

2. Iodo/Iodimetric Titrations

- (i) Estimation of Cu(II) using sodium thiosulphate solution (Iodometrically).
- (ii) Estimation of $K_2Cr_2O_7$ using sodium thiosulphate solution (Iodometrically).
- (iii) Estimation of antimony in tartaremetic iodimetrically.
- (iv) Estimation of Iodine content in iodized salt.

Essential/recommended readings

**DISCIPLINE SPECIFIC CORE COURSE – 5 (DSC-5): HALOALKANES, ARENES,
HALOARENES, ALCOHOLS, PHENOLS, ETHERS AND EPOXIDES**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Haloalkanes, Arenes, Haloarenes, Alcohols, Phenols, Ethers and Epoxides (DSC-5: Organic Chemistry-II) | 04 | 02 | 0 | 02 | Class Pass 12 th | --- |

Learning Objectives

The Learning Objectives of this course are as follows:

- To impart understanding of the chemistry of organic functional groups, which include haloalkanes, aromatic hydrocarbons, haloarenes and some oxygen containing functional groups, along with their reactivity patterns.
- To develop understanding of detailed reactions and mechanistic pathways for each functional group to unravel the spectrum of organic chemistry and the extent of organic transformations.
- To aid in the paramount learning of the concepts and their applications.

Learning outcomes

On completion of the course, the student will be able to:

- Understand reactions of arenes, haloarenes and some oxygen containing functional groups.
- Understand the concept of protection and deprotection
- Use the synthetic chemistry learnt in this course to do functional group transformations.
- Propose plausible mechanisms for the reactions under study.

SYLLABUS OF DSC-5

Unit - 1: Haloalkanes

(10 Hours)

Alkyl halides: Methods of preparation and properties, nucleophilic substitution reactions – S_N1 , S_N2 and S_Ni mechanisms with stereochemical aspects and effect of solvent; nucleophilic substitution v/s elimination.

Organometallic compounds of Mg (Grignard reagent) – Use in synthesis of organic compounds.

Unit - II: Aromatic Hydrocarbons

(06 Hours)

Concept of Aromaticity and anti-aromaticity; Electrophilic aromatic substitution: halogenation, nitration, sulphonation, Friedel Crafts alkylation/acylation with their mechanism. Directing effects of groups in electrophilic substitution.

Unit - III: Aryl halides

(04 Hours)

Preparation (including preparation from diazonium salts) and properties, nucleophilic aromatic substitution; S_NAr , Benzyne mechanism. Relative reactivity of alkyl, allyl, benzyl, vinyl and aryl halides towards nucleophilic substitution reactions.

Unit - IV: Alcohols, Phenols, Ethers & Epoxides

(10 Hours)

Alcohols: Relative reactivity of 1° , 2° , 3° alcohols, reactions of alcohols with sodium, HX (Lucas test), esterification, oxidation (with PCC, alkaline $KMnO_4$, acidic dichromate, conc. HNO_3). Oppenauer oxidation; Diols: oxidation of diols by periodic acid and lead tetraacetate, Pinacol-Pinacolone rearrangement.

Phenols: Preparation using Cumene hydroperoxide, Acidity and factors affecting it, Kolbe's–Schmidt reactions, Riemeier-Tiemann reaction, Houben–Hoesch condensation, Schotten–Baumann reaction, Fries and Claisen rearrangements and their mechanism.

Ethers and Epoxides: Acid and Base catalyzed cleavage reactions.

Practical

-

60 Hours

1. Acetylation of any one of the following compounds: amines (aniline, *o*-, *m*-, *p*-toluidines and *o*-, *m*-, *p*-anisidine) and phenols (β -naphthol, salicylic acid) by any one method:
 - i. Using conventional method ii. Using green approach
2. Benzoylation of one of the following amines (aniline, *o*-, *m*-, *p*-toluidines and *o*-, *m*-, *p*-anisidine) or one of the following phenols (β -naphthol, resorcinol, *p*-cresol) by Schotten-Baumann reaction.
3. Bromination of acetanilide/aniline/phenol by any one of the following:
 - (a) Green method b) Conventional method
4. Nitration of nitrobenzene/chlorobenzene.
5. Haloform reaction of ethanol.
6. Oxidation of benzyl alcohol to benzoic acid
7. Estimation of the given sample of phenol/amine by:

- a) Acetylation b) Bromate-Bromide method
8. Functional group tests for alcohols, phenols, carboxylic acids, phenols, carbonyl compounds, esters.

DISCIPLINE SPECIFIC CORE COURSE – 6 (DSC-6): Thermodynamics and its Applications

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemical Thermodynamics and its Applications (DSC – 6: Physical Chemistry – II) | 04 | 03 | - | 01 | Class Pass XII | ---- |

Learning Objectives

The Learning Objectives of this course are as follows:

- To make students understand thermodynamic concepts, terminology, properties of thermodynamic systems, laws of thermodynamics and their correlation with other branches of physical chemistry and make them able to apply thermodynamic concepts to the system of variable compositions, equilibrium and colligative properties.

Learning outcomes

On completion of the course, the student will be able to:

- Understand the three laws of thermodynamics, concept of State and Path functions, extensive and intensive properties.
- Derive the expressions of ΔU , ΔH , ΔS , ΔG , ΔA for an ideal gas under different conditions.
- Explain the concept of partial molar properties.

SYLLABUS OF DSC-6

UNIT – I: Basic Concepts of Chemical Thermodynamics (06 Hours)

Intensive and extensive variables; state and path functions; isolated, closed and open systems.

Mathematical treatment - Exact and inexact differential, Partial derivatives, Euler's reciprocity rule, cyclic rule.

UNIT – II: First law and Thermochemistry (15 Hours)

Concept of heat, Q , work, W , internal energy, U , and statement of first law; enthalpy, H , relation between heat capacities, Joule Thompson Porous Plug experiment, Nature of Joule Thompson coefficient, calculations of Q , W , ΔU and ΔH for reversible, irreversible and free expansion of gases (ideal and van der Waals) under isothermal and adiabatic conditions.

Enthalpy of reactions: standard states; enthalpy of neutralization, enthalpy of hydration, enthalpy of formation and enthalpy of combustion and its applications, bond dissociation energy and bond enthalpy; effect of temperature (Kirchhoff's equations) on enthalpy of reactions.

UNIT – III: Second Law (15 Hours)

Concept of entropy; statement of the second law of thermodynamics, Carnot cycle. Calculation of entropy change for reversible and irreversible processes (for ideal gases). Free Energy Functions: Gibbs and Helmholtz energy; variation of S , G , A with T , V , P ; Free energy change and spontaneity (for ideal gases). Relation between Joule-Thomson coefficient and other thermodynamic parameters; inversion temperature; Gibbs-Helmholtz equation; Maxwell relations; thermodynamic equation of state.

UNIT – IV Third Law (03 Hours)

Statement of third law, unattainability of absolute zero, calculation of absolute entropy of molecules, concept of residual entropy, calculation of absolute entropy of solid, liquid and gases.

UNIT – V Systems of Variable Composition (06 Hours)

Partial molar quantities, dependence of thermodynamic parameters on composition; Gibbs Duhem equation, chemical potential of ideal mixtures, Change in thermodynamic functions on mixing of ideal gases.

**Practical – 30 Hours
Thermochemistry:**

- (a) Determination of heat capacity of a calorimeter for different volumes using change of enthalpy data of a known system (method of back calculation of heat capacity of calorimeter from known enthalpy of solution of sulphuric acid or enthalpy of neutralization).
- (b) Determination of heat capacity of a calorimeter for different volumes using heat gained equal to heat lost by cold water and hot water.
- (c) Determination of enthalpy of neutralization of hydrochloric acid with sodium hydroxide.

- (d) Determination of the enthalpy of ionization of ethanoic acid.
 - (e) Determination of integral enthalpy solution of endothermic salts.
 - (f) Determination of integral enthalpy solution of exothermic salts.
 - (g) Determination of basicity of a diprotic acid by the thermochemical method in terms of the changes of temperatures observed in the graph of temperature versus time for different additions of a base. Also calculate the enthalpy of neutralization of the first step.
 - (h) Determination of enthalpy of hydration of salt.
 - (i) Study of the solubility of benzoic acid in water and determination of ΔH .
- Any other experiment carried out in the class.

DISCIPLINE SPECIFIC CORE COURSE – 4:

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemical Bonding and Elements in Biological System CHEM-DSC-02 | 4 | 2 | 0 | 2 | Class XII Pass | ---- |

Learning Objectives

The Learning Objectives of this course are as follows:

- Students gain basic knowledge of chemical bonding in compounds which is a necessary pre-requisite in understanding the general properties of the compound.
- Unit 2 reviews the importance of inorganic chemical species, especially metals in biological systems, their classification and detailed discussion of toxic metals.
- The discussions also provide them the details of sodium-potassium pump, role of some metal ions such as calcium, magnesium and the role of iron in transport and storage system

Learning outcomes

By the end of the course, the students will be able to:

- Understand the concept of lattice energy using Born-Landé and Born Haber Cycle and their applications
- Rationalize the conductivity of metals, semiconductors and insulators based on the Band theory.
- Understand the importance and application of chemical bonds, inter-molecular and intramolecular weak chemical forces and their effect on melting points, boiling points, solubility and energetics of dissolution.
- Know about the essential, non-essential, trace and toxic metal ions and their role in biological system and effects of their deficiency. They will also learn their dose response relationship curves.
- Understand active and Passive transport and diagrammatically explain the working of

the sodium-potassium pump in organisms and the factors affecting it

- Explain the sources and consequences of excess and deficiency of trace metals and learn about the toxicity of certain metal ions, the reasons for toxicity
- Storage and transport of iron in bio-systems

SYLLABUS OF DSC-4

Unit I: Chemical Bonding

(18 Hours)

Ionic Bonding: General characteristics of ionic bonding, Lattice Enthalpy and Solvation Enthalpy and their relation to stability and solubility of ionic compounds, Born-Landé equation for calculation of Lattice Enthalpy (no derivation), Born-Haber cycle and its applications, polarizing power and polarizability, Fajan's rules, ionic character in covalent compounds, bond moment, dipole moment and percentage ionic character.

Covalent Bonding: Valence Bond Approach, Hybridization and VSEPR Theory with suitable examples, Concept of resonance and resonating structures in various inorganic and organic compounds, Molecular Orbital Approach: Rules for the LCAO method, bonding, nonbonding and antibonding MOs and their characteristics for s-s, s-p and p-p combinations of atomic orbitals, MO treatment of homonuclear diatomic molecules of 1st and 2nd periods (including idea of s-p mixing) and heteronuclear diatomic molecules such as CO, NO and NO⁺.

Brief introduction to Metallic Bonding, Hydrogen Bonding, van der Waals forces

Unit II: Elements in Biological System

(12 Hours)

Classification of elements in biological system, Geochemical effect on the distribution of metals, Metal ions present in biological systems with special reference to Na⁺, K⁺, Ca²⁺, Mg²⁺, Fe²⁺, Cu²⁺ and Zn²⁺, Sodium / K-pump, Role of Ca²⁺ (blood clotting and structural), Role of Mg²⁺ in chlorophyll and energy production, Excess and deficiency of some trace metals, Toxicity of metal ions (Hg, Pb, Cd and As), reasons for toxicity, Dose response relationship curves of metal ions, Iron and its application in bio-systems, Storage and transport of iron.

PRACTICALS:

60 Hours

1. Preparation of standard solutions.
2. Estimation of Sodium carbonate using HCl by acid base titration.
3. Estimation of carbonate and hydroxide present together in a mixture.
4. Estimation of carbonate and bicarbonate present together in a mixture.
5. Estimation of free alkali present in different soaps/detergents
6. Estimation of oxalic acid using KMnO₄ by redox titration.
7. Estimation of Mohr's salt using KMnO₄ by redox titration.
8. Determination of dissolved oxygen in water.
9. Estimation of Fe (II) ions by titrating it with K₂Cr₂O₇ using internal and external indicators.
10. Estimation of Cu (II) ions iodometrically using Na₂S₂O₃
11. Paper Chromatographic separation of mixture of metal ions

- a. Cu^{2+} , Cd^{2+}
- b. Ni^{2+} , Co^{2+} .

12. Any suitable experiment (other than the listed ones) based upon neutralisation/redox reactions.

| | | Lecture | Tutorial | Practical/ Practice | | |
| Periodic Properties and Chemical Bonding DSC-4 Chemistry-II | 4 | 2 | 0 | 2 | Class Pass 12 th | ---- |

Learning Objectives

The Learning Objectives of this course are as follows:

- The course discusses the periodicity in properties with reference to the s, p and d block, which is necessary in understanding their group chemistry.
- It provides basic knowledge about ionic, covalent and metallic bonding underlining the fact that chemical bonding is best regarded as a continuum between the three cases.
- It provides an overview of hydrogen bonding and van der Waal's forces which influence the melting points, boiling points, solubility and energetics of dissolution of compounds

Learning outcomes

By the end of the course, the students will be able to:

- Understand periodicity in ionization enthalpy, electron gain enthalpy, electronegativity and enthalpy of atomization.
- Understand variability in oxidation state, colour, metallic character, magnetic and catalytic properties and ability to form complexes
- Understand the concept of lattice energy using Born-Landé expression.
- Draw Born Haber Cycle and analyse reaction energies.
- Draw the plausible structures and geometries of molecules using VSEPR theory.
- Understand and draw MO diagrams (homo- & hetero-nuclear diatomic molecules). Understand the importance and applications of hydrogen and van der Waal bonding

SYLLABUS OF DSC-4

Unit I: Periodic Properties

(12 Hours)

Electronic configurations of the atoms. Stability of half-filled and completely filled orbitals, concept of exchange energy, inert pair effect.

General group trends of s, p and d block elements with special reference to Ionization Enthalpy, Electron Gain Enthalpy, Electronegativity, Enthalpy of Atomization, oxidation state, colour, metallic character, magnetic and catalytic properties, ability to form complexes

UNIT II: Chemical Bonding

(18 Hours)

Ionic Bonding: General characteristics of ionic bonding, Lattice Enthalpy and Solvation Enthalpy and their relation to stability and solubility of ionic compounds, Born-Landé equation for calculation of Lattice Enthalpy (no derivation), Born-Haber cycle and its applications, polarizing power and polarizability, Fajan's rules, ionic character in covalent compounds, bond moment, dipole moment and percentage ionic character.

Covalent Bonding: Valence Bond Approach, Hybridization and VSEPR Theory with suitable examples, Concept of resonance and resonating structures in various inorganic and organic compounds, Molecular Orbital Approach: Rules for the LCAO method, bonding, nonbonding and antibonding MOs and their characteristics for s-s, s-p and p-p combinations of atomic orbitals, MO treatment of homonuclear diatomic molecules of 1st and 2nd periods (including idea of s-p mixing) and heteronuclear diatomic molecules such as CO, NO and NO⁺.

Brief introduction to Metallic Bonding, Hydrogen Bonding, van der Waal's Forces

PRACTICALS:

60 Hours

1. Preparation of standard solutions.
2. Estimation of Sodium carbonate with HCl
3. Estimation of oxalic acid by titrating it with KMnO₄.
4. Estimation of Mohr's salt by titrating it with KMnO₄.
5. Estimation of water of crystallization in Mohr's salt by titrating with KMnO₄.
6. Estimation of Fe (II) ions by titrating it with K₂Cr₂O₇ using internal and external indicators.
7. Estimation of Cu (II) ions iodometrically using Na₂S₂O₃.
8. Chromatographic separation of mixture of metal ions Cu²⁺, Cd²⁺ or Ni²⁺, Co²⁺.
9. Estimation of Fe (II) ions by titrating it with K₂Cr₂O₇ using
 - a). internal indicator
 - b). external indicator
10. Estimation of Cu (II) ions iodometrically using Na₂S₂O₃.
11. Paper Chromatographic separation of mixture of metal ions
 - a). Cu²⁺, Cd²⁺
 - b). Ni²⁺, Co²⁺
12. Any suitable experiment (other than the listed ones) based upon neutralisation/redox reactions.

DISCIPLINE SPECIFIC CORE COURSE – 4: DSC-4:AC-2

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|-----------|-----------------------------------|-----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Course Title: SEPARATION METHODS-I Course Code: Analytical Chemistry-2 (DSC4:AC-2) | 04 | 02 | 00 | 02 | Class XII Pass | --- |

Learning Objectives

The Learning Objectives of this course are as follows:

- To acquire basic knowledge of the analytical chemistry of important techniques that will provide the basis for their industrial production methods.
- To provide an adequate mastery of analytical methods used for the determination of commercial/domestic raw materials and finished product quality.

Learning outcomes

By the end of this course, students will be able to:

- Become familiar with fundamental concepts of partition coefficients and their role in achieving separations across different types of chromatography.
- Develop the core skills to parse existing chromatographic protocols and identify the key factors influencing a chromatography experiment.
- Understand the underlying assumptions of the most common chromatographic separation techniques and approaches to method validation.
- Understand the concept of solubility and their application in separation using distribution law.

SYLLABUS OF Analytical Chemistry-2 (DSC-4: AC-2)

Theory Component

UNIT – I: Chromatography (08 Hours)

Classification of chromatographic methods: Principles of differential migration, description of chromatographic process, distribution coefficients, modes of chromatography. the chromatography (elution time and volume) capacity factor, column efficiency and resolution, sample preparation.

UNIT – II: Techniques of paper chromatography (06 Hours)

Experimental modifications, various modes of developments, nature of paper, detections of spots, retardation factors, factors that affect reproducibility of R_f values (due to paper, solvent system, sample, development procedures), selection of solvent, quantitative analysis, applications.

UNIT – III: Thin Layer Chromatography (06 Hours)

Stationary phase, adsorbents, liquid phase support, plate preparation, mobile phase, sample application, development, saturation of chamber, detection of spot, R_f values (effect of adsorbent, solvent, solute, development process), quantitative analysis, applications.

UNIT – IV: Solvent Extraction (04 Hours)

Distribution law, determination of distribution ratio, batch extraction, continuous extraction, discontinuous extraction, counter-current extraction.

UNIT –V: Dialysis and membrane filtration (06 Hours)

General laboratory methods, filters-nitrocellulose, fiberglass and polycarbonates.

Practical component – 60 Hours

1. Separation and identification of amino acids present in the given mixture by **radial** and **ascending** paper Chromatography (*Perform both*).
2. Separation of ortho-nitrophenol & para-nitrophenol and *o*- and *p*-amino phenol by thin layer chromatography (TLC) and calculation of their R_f values.
3. Separation of constituents of leaf pigments by thin layer chromatography and paper chromatography (*radial & ascending both*).
4. Separation of a mixture of compounds by solvent extraction.
5. Separation of a mixture of naphthalene, benzoic acid and 2-naphthol.
6. Separation of a mixture of 1,4-dimethoxybenzene, 2-chloro benzoic acid and *p*-cresol.
7. Analysis of soil samples (at least three soil samples to be collected for analysis) collected from college nursery, sports ground Delhi villages/ Yamuna River bank.
 - (a) Determination of pH of soil samples.
 - (b) Determination of total soluble salts.
 - (c) Determination of carbonate and bicarbonate.
 - (d) Determination of calcium, magnesium and iron.

- (e) Determination of conductance of the soil samples.
8. Industrial visit to STP plant.

DISCIPLINE SPECIFIC CORE COURSE – 5: DSC5:C2

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| PERIODIC PROPERTIES AND CHEMICAL BONDING CHEMISTRY-2 (DSC5-C2) | 04 | 02 | 0 | 02 | Class XII Pass | ---- |

Learning Objectives

The Learning Objectives of this course are as follows:

- The course discusses the periodicity in properties with reference to the s, p and d block, which is necessary in understanding their group chemistry.
- It provides basic knowledge about ionic, covalent and metallic bonding underlining the fact that chemical bonding is best regarded as a continuum between the three cases.
- It provides an overview of hydrogen bonding and van der Waal forces which influence the melting points, boiling points, solubility and energetics of dissolution of compounds.

Learning outcomes

By the end of this course, students will be able to:

- Understand periodicity in ionization enthalpy, electron gain enthalpy, electronegativity and enthalpy of atomization.
- Understand variability in oxidation state, colour, metallic character, magnetic and catalytic properties and ability to form complexes
- Understand the concept of lattice energy using Born-Landé expression.
- Draw Born Haber Cycle and analyse reaction energies.
- Draw the plausible structures and geometries of molecules using VSEPR theory.
- Understand and draw MO diagrams (homo- & hetero-nuclear diatomic molecules).
- Understand the importance and applications of hydrogen and van der Waal bonding.

SYLLABUS OF Chemistry-2 (DSC-5:C2)

UNIT – I: Periodic Properties

(12 Hours)

Electronic configurations of the atoms. Stability of half-filled and completely filled orbitals, concept of exchange energy, inert pair effect.

General group trends of s, p and d block elements with special reference to Ionization Enthalpy, Electron Gain Enthalpy, Electronegativity, Enthalpy of Atomization, oxidation state, colour, metallic character, magnetic and catalytic properties, ability to form complexes.

UNIT – II: Bonding in Coordination Compounds

(18 Hours)

Ionic Bonding: General characteristics of ionic bonding, Lattice Enthalpy and Solvation Enthalpy and their relation to stability and solubility of ionic compounds, Born-Landé equation for calculation of Lattice Enthalpy (no derivation), Born-Haber cycle and its applications, polarizing power and polarizability, Fajan's rules, ionic character in covalent compounds, bond moment, dipole moment and percentage ionic character.

Covalent Bonding: Valence Bond Approach, Hybridization and VSEPR Theory with suitable examples, Concept of resonance and resonating structures in various inorganic and organic compounds, Molecular Orbital Approach: Rules for the LCAO method, bonding, nonbonding and antibonding MOs and their characteristics for s-s, s-p and p-p combinations of atomic orbitals, MO treatment of homonuclear diatomic molecules of 1st and 2nd periods (including idea of s-p mixing) and heteronuclear diatomic molecules such as CO, NO and NO⁺.
Metallic Bonding, Hydrogen Bonding, van der Waals Forces.

Practical –

60 Hours

1. Preparation of standard solutions of different normality and molarity of Mohr's salt and oxalic acid.
2. Estimation of free alkali present in different soaps and detergents (*At least two samples to be taken*).
3. Estimation of oxalic acid by titrating it with KMnO₄ (*Provide at least two unknown solutions*).
4. Estimation of Mohr's salt by titrating it with KMnO₄ (*Provide a least two unknown solutions*).
5. Estimation of water of crystallization in Mohr's salt by titrating with KMnO₄.
6. Estimation of Fe (II) ions by titrating it with K₂Cr₂O₇ using internal and external indicators.
7. Estimation of Cu (II) ions iodometrically using Na₂S₂O₃.
8. Chromatographic separation of mixture of metal ions Cu²⁺, Cd²⁺ and Ni²⁺, Co²⁺.

DISCIPLINE SPECIFIC CORE COURSE – 6: Mathematics-1:DSC6

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Topics in Calculus Mathematics-1 (DSC6) | 04 | 03 | 01 | 0 | Class 12 th Pass | ---- |

Course Objectives

The Learning Objectives of this course are as follows:

- The primary objective of this course is to introduce the basic tools of calculus which are helpful in understanding their applications in many real-world problems.
- Students will be able to understand/create various mathematical models in everyday life.

Course Learning Outcomes: This course will enable the students to:

- Understand continuity and differentiability in terms of limits and graphs of certain functions.
- Describe asymptotic behaviour in terms of limits involving infinity.
- Use of derivatives to explore the behaviour of a given function locating and classify its extrema and graphing the function.
- Apply the concepts of asymptotes, and inflexion points in tracing of Cartesian curves.
- Compute the reduction formulae of standard transcendental functions with applications.

Syllabus: Theory Component

Unit 1: Limits, Continuity and Differentiability –

20 Hours

Limit of a function, $\varepsilon - \delta$ definition of a limit, Infinite limits, Continuity and types of discontinuities; Differentiability of a function, Successive differentiation: Calculation of the n th derivatives, Leibnitz theorem; Partial differentiation, Euler's theorem on homogeneous functions.

Unit 2: Mean Value Theorems and its Applications –

20 Hours

Rolle's theorem, Mean value theorems and applications to monotonic functions and inequalities; Taylor's theorem, Taylor's series, Maclaurin's series expansions of e^x , $\sin x$, $\cos x$, $\log(1+x)$ and $(1+x)^m$; Indeterminate forms.

Unit 3: Tracing of Curves and Reduction Formulae – 20 Hours

Asymptotes (parallel to axes and oblique), Concavity and inflexion points, Singular points, Tangents at the origin and nature of singular points, Curve tracing(cartesian and polar equations). Reduction formulae for $\int \sin^n x \, dx$, $\int \cos^n x \, dx$, and $\int \sin^m x \cos^n x \, dx$ and their applications.

Practical Component (if any): NIL

Essential/recommended readings

- Prasad, Gorakh (2016). *Differential Calculus* (19th ed.). Pothishala Pvt. Ltd. Allahabad.
- Prasad, Gorakh (2015). *Integral Calculus*. Pothishala Pvt. Ltd. Allahabad.

Additional Readings:

- Apostol, T. M. (2007). *Calculus: One-Variable Calculus with An Introduction to Linear Algebra* (2nd ed.). Vol. 1. Wiley India Pvt. Ltd.
- Ross, Kenneth. A. (2013). *Elementary Analysis: The Theory of Calculus* (2nd ed.). Undergraduate Texts in Mathematics, Springer. Indian reprint.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Category I

BSc. (Hons.) Industrial Chemistry

DISCIPLINE SPECIFIC CORE COURSE – 4: (DSC-4) Fossil Fuels and Cleansing Agents

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fossil Fuels and Cleansing Agents (DSC-4: Industrial Chemistry -II) | 04 | 02 | 0 | 02 | Class 12 th Pass | ---- |

Learning Objectives

- After studying this course, student shall be able to understand the different aspects of industrial processes of fossil fuels in detail.
- Optimised use of limited resources of non-renewable energy and technology investment in improving the production of renewable cleaner energy sources and biofuels.
- The analytical approach of this course is to enhance the reasoning and to understand the mechanical part of the industry.

Learning outcomes

By the end of the course, the students will be able to:

- Know about fuels, composition, carbonization of coal, liquefaction, and coal tar based chemicals and layout for key processes in oil refining.
- Understand the role of petroleum and petrochemical industry, composition, applications, process-cracking. Increasing demand for non-petroleum fuels, synthetic fuels.
- Understand different fossil fuel products and processes
- Know types of oils, familiarized with rancidity, saponification value, iodine number, Superiority of synthetic detergents, gain knowledge about surfactants.

SYLLABUS OF DSC-4

UNIT – I: Fuel Chemistry and Introduction to Coal

(10 Hours)

Review of energy sources (renewable and non-renewable). Classification of fuels and their calorific value. Introduction of coal, uses of coal (fuel and non-fuel) in various industries (at least three examples), its types and composition, carbonization of coal. Coal gas, producer gas

and water gas—composition and their uses, uses of coal-tar based chemicals, Requisites of a good metallurgical coke, Coal liquefaction and Solvent refining.

UNIT – II: Petroleum and Petrochemical Industry (12 Hours)

Composition of crude petroleum, Refining and different types of petroleum products and their applications. Fractional distillation (principle and process), Cracking (thermal and catalytic cracking), Reforming petroleum and non-petroleum fuels (LPG,CNG,LNG, bio-gas, biofuels derived from biomass), fuel from waste, synthetic fuels (gaseous and liquids), clean fuels

UNIT – III: Oils and Fats (8 Hours)

Classification of oils, hydrogenation of oils, rancidity, saponification value, iodine number, acid value, soap and synthetic detergent, preparation of soap and detergent, different types of soap and their composition, surfactants (LAS, ABS, LABS).

Practical component- 60 Hours

Industrial Chemistry-II

1. Determination of alkali in water samples and soaps.
2. Determination of iodine value of the oils/ fats.
3. Determination of saponification value of the oils/ fats.
4. Determination of acid value of the oils/ fats.
5. To determine the moisture content of different fuels.
6. Estimation of hardness of water by titration with soap solution.
7. Preparation of soap.
8. Preparation of biodiesel from waste cooking oil and its characterization.
9. To compare the viscosity of biodiesel and vegetable oil.
10. To determine the density of the given fuel sample.
11. Characterization of different petroleum products using UV and IR.

Essential/recommended readings

| | | Lecture | Tutorial | Practical/ Practice | | |
| Periodic Properties and Chemical bonding (DSC-5: Chemistry -II) | 04 | 02 | 0 | 02 | Class XII Pass | --- |

Learning Objectives

- The course discusses the periodicity in properties with reference to the s, p and d block, which is necessary in understanding their group chemistry.
- It provides basic knowledge about ionic, covalent and metallic bonding underlining the fact that chemical bonding is best regarded as a continuum between the three cases.
- It provides an overview of hydrogen bonding and van der Waal's forces which influence the melting points, boiling points, solubility and energetics of dissolution of compounds

Learning outcomes

By the end of the course, the students will be able to:

- Understand periodicity in ionization enthalpy, electron gain enthalpy, electronegativity and enthalpy of atomization.
- Understand variability in oxidation state, colour, metallic character, magnetic and catalytic properties and ability to form complexes
- Understand the concept of lattice energy using Born-Landé expression.
- Draw Born Haber Cycle and analyse reaction energies.
- Draw the plausible structures and geometries of molecules using VSEPR theory.
- Understand and draw MO diagrams (homo- & hetero-nuclear diatomic molecules).
- Understand the importance and applications of hydrogen and van der Wall bonding.

SYLLABUS OF DSC- 5

UNIT – I: Periodic Properties

(12 Hours)

Electronic configurations of the atoms. Stability of half-filled and completely filled orbitals, concept of exchange energy, inert pair effect.

General group trends of s, p and d block elements with special reference to Ionization Enthalpy, Electron Gain Enthalpy, Electronegativity, Enthalpy of Atomization, oxidation state, colour, metallic character, magnetic and catalytic properties, ability to form complexes

UNIT – II: Chemical bonding

(18 Hours)

Ionic Bonding: General characteristics of ionic bonding, Lattice Enthalpy and Solvation Enthalpy and their relation to stability and solubility of ionic compounds, Born-Landé equation for calculation of Lattice Enthalpy (no derivation), Born-Haber cycle and its applications, polarizing power and polarizability, Fajan's rules, ionic character in covalent compounds, bond moment, dipole moment and percentage ionic character.

Covalent Bonding: Valence Bond Approach, Hybridization and VSEPR Theory with suitable examples, Concept of resonance and resonating structures in various inorganic and organic compounds, Molecular Orbital Approach: Rules for the LCAO method, bonding, nonbonding and antibonding MOs and their characteristics for s-s, s-p and p-p combinations of atomic orbitals, MO treatment of homonuclear diatomic molecules of 1st and 2nd periods (including idea of s-p mixing) and heteronuclear diatomic molecules such as CO, NO and NO⁺.

Brief introduction to Metallic Bonding, Hydrogen Bonding, van der Waal's Forces

Practical component – 60 Hours

Chemistry-II,

1. Preparation of standard solutions.
2. Estimation of Sodium carbonate with HCl.
3. Estimation of oxalic acid by titrating it with KMnO₄.
4. Estimation of Mohr's salt by titrating it with KMnO₄.
5. Estimation of water of crystallization in Mohr's salt by titrating with KMnO₄.
6. Estimation of Fe (II) ions by titrating it with K₂Cr₂O₇ using internal and external indicators.
7. Estimation of Cu (II) ions iodometrically using Na₂S₂O₃.
8. Chromatographic separation of mixture of metal ions Cu²⁺, Cd²⁺ or Ni²⁺, Co²⁺.
9. Estimation of Fe (II) ions by titrating it with K₂Cr₂O₇ using
 - a. internal indicator
 - b. external indicator
10. Estimation of Cu (II) ions iodometrically using Na₂S₂O₃.
11. Paper Chromatographic separation of mixture of metal ions
 - a. Cu²⁺, Cd²⁺
 - b. Ni²⁺, Co²⁺
12. Any suitable experiment (other than the listed ones) based upon neutralisation/redox reactions.

DISCIPLINE SPECIFIC CORE COURSE – DSC 6: Mechanics

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------------------|----------|-----------------------------------|----------|---------------------|---|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Mechanics DSC - 6 | 4 | 2 | 0 | 2 | Class XII pass with Physics and Mathematics as main subjects | Physics and Mathematics syllabus of class XII |

Learning Objectives

This course reviews the concepts of mechanics learnt at school from a more advanced perspective and goes on to build new concepts. It begins with a review of vector algebra and ordinary differential equations. The students will learn Newton's laws of motion, conservation of momentum, conservation of energy, concept of simple harmonic motion, Newton's laws of gravitation, elasticity and the Special Theory of Relativity. They will be able to apply the concepts learnt to several real world problems.

Learning Outcomes

Upon completion of this course, students will be able to,

- Learn the laws of motion and their application to various dynamical situations.
- Understand the concept of conservation of momentum, angular momentum and energy. Their application to basic problems.
- Understand the motion of simple pendulum
- Understand the laws of gravitation and basic idea of global positioning system
- Understand the elastic properties
- Postulates of special theory of relativity, inertial and non-inertial frame of reference and their transformation, relativistic effects on the mass and energy of a moving body.

SYLLABUS OF DSC – 1

Vectors: Review of vector algebra. Scalar and vector product

(2 Hours)

Ordinary Differential Equations: First order homogeneous differential equations, second order homogeneous differential equation with constant coefficients

(4 Hours)

Brief review of Newton's laws of motion, dynamics of a system of particles, centre of mass, determination of centre of mass for continuous systems having spherical symmetry. Conservation of momentum and energy, work – energy theorem for conservative forces, force as a gradient of potential energy, angular momentum, torque, conservation of angular

momentum

(9 Hours)

Idea of simple harmonic motion, differential equation of simple harmonic motion and its solution, kinetic energy and potential energy, total energy and their time average for a body executing simple harmonic motion

(4 Hours)

Newton's law of gravitation, motion of a particle in a central force field, Kepler's laws, weightlessness, geosynchronous orbit, basic idea of global positioning system

(4 Hours)

Elasticity: Concept of stress and strain, Hooke's law, elastic moduli, twisting torque on a wire, tensile strength, relation between elastic constants, Poisson's ratio, rigidity modulus

(3 Hours)

Postulates of special theory of relativity, Lorentz transformation relations, length contraction, time dilation, relativistic transformation of velocity

(4 Hours)

PRACTICAL COMPONENT (60 Hours)

Every student should perform at least 06 experiments from the following list.

- 1) Measurements of length (or diameter) using vernier calliper, screw gauge and travelling microscope.
- 2) Determination of height of a building using a sextant.
- 3) Study of motion of the spring and calculate (a) spring constant and, (b) acceleration due to gravity (g)
- 4) Determination of moment of inertia of a flywheel.
- 5) Determination of Young's modulus of a wire by Optical Lever Method.
- 6) Determination of modulus of rigidity of a wire using Maxwell's needle.
- 7) Determination of elastic constants of a wire by Searle's method.
- 8) Determination of value of g using bar pendulum.
- 9) Determination of value of g using Kater's pendulum.

GENERIC ELECTIVES -12: Coordination and Organometallic Compounds

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Coordination and Organometallic Compounds (GE-2) | 4 | 2 | 0 | 2 | Class XII Pass | --- |

Learning Objectives

The Learning Objectives of this course are as follows:

- To introduce students to some important d-block metals and their compounds which they are likely to come across.
- To make students learn about organometallic compounds, a frontier area of chemistry providing an interface between organic and inorganic chemistry.
- To familiarize students with coordination compounds which find manifold applications in diverse fields.

Learning outcomes

By the end of the course, the students will be able to:

- Familiarize with different types of organometallic compounds, their structures and bonding involved.
- Understand the nature of Zeise's salt and compare its synergic effect with that of carbonyls.
- Identify important structural features of tetrameric methyl lithium and understand the concept of multicenter bonding in these compounds
- Apply 18-electron rule to rationalize the stability of metal carbonyls and related species
- Use IR data to explain the extent of back bonding in carbonyl complexes
- Understand the terms, ligand, denticity of ligands, chelate, coordination number and use standard rules to name coordination compounds
- Use Valence Bond Theory to predict the structure and magnetic behaviour of metal complexes and understand the terms inner and outer orbital complexes
- Understand the properties of coordination compounds and VBT and CFT for bonding in coordination compounds

- Explain the meaning of the terms Δ_o , Δ_t , pairing energy, CFSE, high spin and low spin and how
- CFSE affects thermodynamic properties like lattice enthalpy and hydration enthalpy

Theory:

Unit 1: Coordination Chemistry

4 Hours

Brief discussion with examples of types of ligands, denticity and concept of chelate. IUPAC system of nomenclature of coordination compounds (mononuclear and binuclear) involving simple monodentate and bidentate ligands.

Unit 2: Bonding in coordination compounds

14 Hours

Valence Bond Theory (VBT): Salient features of theory, concept of inner and outer orbital complexes of Cr, Fe, Co and Ni. Drawbacks of VBT.

Crystal Field Theory: Splitting of d orbitals in octahedral symmetry. Crystal field effects for weak and strong fields. Crystal field stabilization energy (CFSE), concept of pairing energy. Factors affecting the magnitude of Δ_o .

Spectrochemical series. Splitting of d orbitals in tetrahedral symmetry. Comparison of CFSE for octahedral and tetrahedral fields, tetragonal distortion of octahedral geometry. Jahn-Teller distortion, square planar coordination.

Unit 3: Organometallic Compounds

12 Hours

Definition and classification with appropriate examples based on nature of metal-carbon bond (ionic, s, p and multicentre bonds). Structure and bonding of methyl lithium and Zeise's salt. Structure and physical properties of ferrocene. 18-electron rule as applied to carbonyls. Preparation, structure, bonding and properties of mononuclear and polynuclear carbonyls of 3d metals. π -acceptor behaviour of carbon monoxide (MO diagram of CO to be discussed), synergic effect and use of IR data to explain extent of back bonding.

Practicals:

60 Hours

1. Gravimetry

Discuss basic principles of gravimetry (precipitation, co-precipitation and post precipitation, digestion, washing etc)

- Estimation of Ni(II) using dimethylglyoxime (DMG).
- Estimation of copper as CuSCN.
- Estimation of Al(III) by precipitating with oxine and weighing as Al(oxine)₃ (aluminium oxinate).

2. Inorganic Preparations

- (i) Schiff's base involving ethylenediamine and salicylaldehyde (or any other amine and aldehyde/ketone) and to check its purity using TLC.
- (ii) Nickel/ Copper complex of the above prepared Schiff's base and its characterisation using UV/Vis spectrophotometer. The IR spectra also to be interpreted
- (iii) tetraamminecopper (II) sulphate
- (iv) potassium trioxalatoferrate (III) trihydrate.
- (v) tetraamminecarbonatocobalt(III) nitrate

Keywords: Organometallic compounds, metal carbonyls, synergistic effect, Coordination compounds, VBT, Crystal field theory, Splitting of d levels, Dq

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

**GENERIC ELECTIVES -13: – CHEMISTRY OF OXYGEN CONTAINING
FUNCTIONAL GROUPS AND THEIR APPLICATIONS TO BIOLOGY**

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemistry of Oxygen containing Functional Groups and their Applications to Biology (GE-5) | 4 | 2 | 0 | 2 | Class XII Pass | ---- |

Learning Objectives

- To teach the fundamental chemistry of oxygen containing functional groups.
- To establish these concepts typical reactions of alcohols, phenols, aldehydes, ketones, carboxylic acids and their derivatives.
- To make students understand the relevance of oxygen containing functional groups to biology and the importance of these compounds in real world.

Learning outcomes

By the end of the course, the students will be able to:

- Understand and explain the differential behavior of organic compounds based on reaction chemistry.
- Formulate the mechanism of organic reactions by recalling and correlating the fundamental properties of the reactants involved.
- Understand the applications of functional group chemistry to biology.

Syllabus - Theory:

Unit 1: Alcohols (upto 5 Carbon)

5 Hours

Structure and classification of alcohols as 1°, 2° & 3°, Reactions: Acidic character of alcohols and reaction with sodium, with HX (Lucas Test), esterification, oxidation (with PCC, alkaline KMnO₄, acidic K₂Cr₂O₇ and conc. HNO₃), Oppeneauer Oxidation, Biological oxidation Reactions

Unit 2: Phenols**4 Hours**

Acidity of phenols and factors affecting their acidity, Reactions: Electrophilic substitution reactions, viz. nitration, halogenation, sulphonation, Reimer-Tiemann reaction, Gattermann-Koch reaction, Houben-Hoesch condensation; Reaction due to OH group: Schotten-Baumann reaction

Unit 3: Aldehydes and Ketones (Aliphatic and Aromatic)**12 Hours**

Reactions: Nucleophilic addition, nucleophilic addition-elimination reaction including reaction with HCN, ROH, NaHSO₃, NH₂-G derivatives. Iodoform test, Aldol condensation and its biological application, Cannizzaro's reaction, Wittig reaction, Benzoin condensation, Clemmensen reduction, Wolff Kishner reduction, Meerwein-Ponndorf Verley reduction, enzyme-catalyzed additions to α,β -unsaturated carbonyl compounds.

Unit 4: Carboxylic acids and their derivatives (Aliphatic and Aromatic)**9 Hours**

Reactions: Hell-Volhard Zelinsky reaction, acidity of carboxylic acids, effect of substitution on acid strength, Claisen condensation and its biological applications, decarboxylation in biological systems, relative reactivities of acid derivatives towards nucleophiles, activation of carboxylate ions for nucleophilic acyl substitution reactions in biological systems, Reformatsky reaction, Perkin condensation.

Practicals: :**60 Hours**

Preparations: (Mechanism of various reactions involved to be discussed) (Recrystallization, determination of melting point and calculation of quantitative yields to be done in all cases)

1. Oxime of aldehydes and ketones
2. 2,4-Dinitrophenylhydrazone of aldehydes and ketones
3. Aldol condensation using green method.
4. Benzoin condensation using Thiamine Hydrochloride as a catalyst.
5. Alkaline hydrolysis of amide/ester.
6. Benzoylation of one of the following amines (aniline, *o*-, *m*-, *p*-toluidines and *o*-, *m*-, *p*-anisidine) or one of the following phenols (β -naphthol, resorcinol, *p*-cresol) by Schotten-Baumann reaction.
7. Identification of functional group for monofunctional organic compounds (Alcohols, phenols, aldehydes, ketones, carboxylic acids).

Practicals:

1. Furniss, B.S.; Hannaford, A.J.; Smith, P.W.G.; Tatchell, A.R. (2012), **Vogel's Textbook of Practical Organic Chemistry**, Pearson.
2. Mann, F.G.; Saunders, B.C. (2009), **Practical Organic Chemistry**, Pearson Education.

Keywords: Alcohols, Lucas Test, Phenol, Aldehydes, Ketones, Nucleophilic addition, nucleophilic addition – elimination, Cannizzaro's reaction, Wittig reaction, Benzoin condensation, Enzyme-catalysed reaction, Carboxylic acid, Claisen condensation

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES-14: MOLECULES OF LIFE

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-----------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Molecules of Life (GE-6) | 4 | 2 | 0 | 2 | Class XII Pass | ---- |

Learning Objectives

- To deliver information about the chemistry of carbohydrates, proteins & enzymes and its relevance in the biological system using suitable examples.
- To place key emphasis on understanding the structural principles that govern reactivity/physical /biological properties of biomolecules as opposed to learning structural details.

Learning outcomes

By the end of the course, the students will be able to:

- Learn and demonstrate how the structure of biomolecules determines their chemical properties, reactivity and biological uses.
- Gain an insight into the mechanism of enzyme action and inhibition.
- Understand the basic principles of drug-receptor interaction and SAR.

Syllabus - Theory:

Unit 1: Carbohydrates

12 Hours

Classification of carbohydrates, reducing and non-reducing sugars, biological functions, general properties and reactions of glucose and fructose, their open chain structure, epimers, mutarotation and anomers, reactions of monosaccharides, determination of configuration of glucose (Fischer proof), cyclic structure of glucose. Haworth projections. Cyclic structure of fructose. Linkage between monosaccharides: structure of disaccharides (sucrose, maltose, lactose) and polysaccharides (starch and cellulose) excluding their structure elucidation.

Unit 2: Amino Acids, Peptides and Proteins

10 Hours

Classification of amino acids and biological uses of amino Acids, peptides and proteins. Zwitterion structure, isoelectric point and correlation to acidity and basicity of amino acids. Determination of primary structure of peptides, determination of N-terminal amino acid (by

Edman method) and C– terminal amino acid (with carboxypeptidase enzyme). Synthesis of simple peptides (up to dipeptides) by N-protection (t-butyloxycarbonyl) & C-activating groups (only DCC) and Merrifield solid phase synthesis, Overview of primary, secondary, tertiary and quaternary structure of proteins, denaturation of proteins.

Unit 3: Enzymes and correlation with drug action

08 Hours

Classification of enzymes and their uses (mention Ribozymes). Mechanism of enzyme action, factors affecting enzyme action, Coenzymes and cofactors and their role in biological reactions, specificity of enzyme action (including stereospecificity), enzyme inhibitors and their importance, phenomenon of inhibition (Competitive and non-competitive inhibition including allosteric inhibition). Drug action-receptor theory. Structure – activity relationships of drug molecules, binding role of –OH group, -NH₂ group, double bond and aromatic ring.

Practicals:

(60 Hours)

1. Estimation of glucose by Fehling's solution.
2. Determination of total sugar content by ferricyanide method (volumetric/colorimetric method).
3. Study of the titration curve of glycine.
4. Estimation of proteins by Lowry's method.
5. Study of the action of salivary amylase on starch under optimum conditions.
6. Qualitative tests for amino acids, proteins and carbohydrates.
7. Separation and identification of mixture of sugars by paper chromatography.

References:

Theory:

1. Finar, I. L. **Organic Chemistry** (Volume 1 & 2), Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).
2. Morrison, R. N.; Boyd, R. N., Bhattacharjee, S.K. (2010), **Organic Chemistry**, 7th Edition, Dorling Kindersley (India) Pvt. Ltd. (Pearson Education).
3. Berg, J. M.; Tymoczko, J. L.; Stryer, L. (2019), **Biochemistry**, 9th Ed., W. H. Freeman Co Ltd.

Practicals:

1. Furniss, B.S.; Hannaford, A.J.; Smith, P.W.G.; Tatchell, A.R. (2012), **Vogel's Textbook of Practical Organic Chemistry**, Pearson.
2. **Manual of Biochemistry Workshop**, 2012, Department of Chemistry, University of Delhi.

Teaching Learning Process:

- Chalk and black board method. Along with pedagogy of flipped classroom

- Certain topics like mechanism of enzyme action and enzyme inhibition can be taught through audio-visual aids.
- Students should be encouraged to participate actively in the classroom through regular presentations on curriculum-based topics, peer assessment, designing games based on specific topics etc.
- As the best way to learn something is to do it yourself, practicals are planned in such a way so as to reinforce the topics covered in theory.

Assessment Methods:

- Graded assignments
- Class tests and Quizzes
- Class seminars by students on course topics with a view to strengthening the content through width and depth
- Continuous evaluation for the practicals
- End semester university theory and practical examination.

Keywords: Carbohydrates, protein, Amino acids, Enzymes, SAR, Drug Receptor Theory

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES -15 : CHEMICAL KINETICS AND PHOTOCHEMISTRY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemical Kinetics and Photochemistry (GE-8) | 4 | 2 | 0 | 2 | Class XII Pass | ----- |

Learning Objectives

- To make students learn about the fundamentals of chemical kinetics, rates of chemical reactions, complex reactions, theories of reaction rate and the laws of photochemistry aimed at understanding electronic transitions upon irradiation of electromagnetic radiation in UV-Vis region.

Learning outcomes

By the end of the course, the students will be able to:

- Understand the concept of rate of a reaction, order and molecularity of a reaction, various factors affecting the rate and theories of reaction rates.
- Students will be able to apply the learnt concepts in studying the reaction kinetics of various reactions.
- Understand the basic concepts of photochemistry, photochemical and photosensitized reactions and their role in biochemical systems.

Syllabus - Theory:

Unit 1: Chemical Kinetics

20 Hours

The concept of reaction rates, effect of temperature, pressure, catalyst and other factors on reaction rates. Order and molecularity of a reaction, derivation of integrated rate equations for zero, first and second order reactions (both for equal and unequal concentrations of reactants), half-life of a reaction, general methods for determination of order of a reaction. kinetics of complex reactions (integrated rate expressions up to first order only): (i) Opposing reactions (ii) parallel reactions and (iii) consecutive reactions and their differential rate

equations (steady-state approximation in reaction mechanisms). Concept of activation energy and its calculation from Arrhenius equation. Theories of reaction rates: Collision theory and activated complex theory of bi-molecular reactions. Comparison of the two theories (qualitative treatment only)

Unit 2: Photochemistry

10 Hours

Characteristics of electromagnetic radiation, Jablonski Diagram. Lambert-Beer's law and its limitations, physical significance of absorption coefficients. Laws of photochemistry, quantum yield, actinometry, examples of low and high quantum yields, photochemical equilibrium and the differential rate of photochemical reactions, photosensitized reactions, quenching. Role of photochemical reactions in biochemical processes.

Practicals:

(60 Hours)

Chemical Kinetics

Study the kinetics of the following reactions by integrated rate method:

- a) Acid hydrolysis of methyl acetate with hydrochloric acid.
- b) Compare the strength of HCl and H₂SO₄ by studying the kinetics of hydrolysis methyl acetate.
- c) Initial rate method: Iodide-persulphate reaction
- d) Integrated rate method: Saponification of ethyl acetate.
- e) Study the reaction kinetics of Iodination of acetone.

2. Kapoor, K.L. (2015), **A Textbook of Physical Chemistry**, Vol 5, 6th Edition, McGraw Hill Education.
3. Kapoor, K.L. (2013), **A Textbook of Physical Chemistry**, Vol 6, 3rd Edition, McGraw Hill Education.

Practicals:

1. Khosla, B.D.; Garg, V.C.; Gulati, A. (2015), **Senior Practical Physical Chemistry**, R. Chand & Co.

Teaching Learning Process:

- Teaching Learning Process for the course is visualized as largely student-focused
- Transaction through an intelligent mix of conventional and modern methods
- Engaging students in cooperative learning.
- Learning through quiz design.
- Problem solving to enhance comprehension.

Assessment Methods: Assessment will be done on the basis of regular class test, presentations and assignments as a part of internal assessment during the course as per the curriculum. End semester university examination will be held for both theory and practical. In practical,

assessment will be done based on continuous evaluation, performance in the experiment on the date of examination and viva voce.

Keywords: Rate Law, Rate constant. Arrhenius Equation, Lambert-Beer's law, Jablonski Diagram

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES -16: BASICS OF POLYMER CHEMISTRY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basics of Polymer Chemistry (GE-10) | 4 | 2 | 0 | 2 | Class XII Pass | ----- |

Learning Objectives

- To help the student to know about the synthesis, properties and applications of polymers.

Learning outcomes

By the end of the course, the students will be able to:

- Know about classification of polymeric material.
- Learn about different mechanisms of polymerization and polymerization techniques
- Evaluate kinetic chain length of polymers based on their mechanism
- Differentiate between polymers and copolymers
- Learn about different methods of finding out average molecular weight of polymer.
- Differentiate between glass transition temperature (T_g) and crystalline melting point (T_m)
- Learn properties and applications of various useful polymers in our daily life

Syllabus Theory:

Unit 1: Introduction to polymers

10 Hours

Different schemes of classification of polymers, Polymer nomenclature, configuration and conformation of polymers, Molecular forces and chemical bonding in polymers, Texture of Polymers

Functionality and its importance:

Criteria for synthetic polymer formation, basic methods of polymerization processes and their mechanism: addition, condensation, Relationships between functionality, extent of reaction and degree of polymerization.

Unit 2: Properties of Polymers**10 Hours**

Glass transition temperature (T_g) and determination of T_g , Free volume theory, WLF equation, Factors affecting glass transition temperature (T_g).

Crystallization and crystallinity: Determination of crystalline melting point and degree of crystallinity,

Morphology of crystalline polymers, Factors affecting crystalline melting point.

Molecular weight distribution and determination of molecular weight of polymers (M_n , M_w , etc.) by end group analysis, viscometry and osmotic pressure methods. Molecular weight distribution and its significance.

Unit 3: Preparation, properties and applications**10 Hours**

Brief introduction to preparation, structure, properties and application of the following polymers: polyolefins, polystyrene and styrene copolymers, poly(vinyl chloride), poly(vinyl acetate), acrylic polymers, fluoro polymers, polyamides and related polymers. Phenol formaldehyde resins (Bakelite, Novolac), polyurethanes, silicone polymers, polydienes, Polycarbonates, Conducting Polymers: polyacetylene, polyaniline, poly(p-phenylene sulphide), polypyrrole, polythiophene

Practicals:**(60 Hours)****Polymer Synthesis**

1. Free radical solution polymerization of styrene (St) / Methyl Methacrylate (MMA)/MethylAcrylate (MA).
2. Preparation of nylon 6,6
3. Redox polymerization of acrylamide
4. Precipitation polymerization of acrylonitrile
5. Preparation of urea-formaldehyde resin
6. Preparations of novalac resin/resole resin.
7. Microscale Emulsion Polymerization of Poly(methylacrylate).

Polymer characterization

1. Determination of molecular weight of polyvinyl propylidene in water by viscometry.
2. Determination of the viscosity-average molecular weight of poly(vinyl alcohol) (PVOH) and the fraction of head-to-head monomer linkages in the polymer.
3. Determination of molecular weight by end group analysis of polymethacrylic acid.

Polymer analysis

1. Estimation of the amount of HCHO in the given solution by sodium sulphite method.
2. Determine the melting point of crystalline polymer.
3. Measurement of glass transition temperature, T_g s

References:**Theory:**

4. Sperling, L.H. (2005), **Introduction to Physical Polymer Science**, John Wiley & Sons.

Teaching Learning Process:

- Student centred teaching Learning process.
- Blend of conventional blackboard teaching and modern teaching learning tools
- Focus on real life applications of concepts
- Problem solving and quizzes for enhanced understanding of the concepts
- Engaging students in collaborative learning.
- Pre-lab learning of theoretical concept of the experiment.
- Performing the experiment, recording the data, calculating the result.
- Interpreting the result.
- Comparing the results of the class.
- Discussing the sources of error.

Assessment Methods:

- Class Tests at Periodic Intervals.
- Written assignment(s)
- Continuous evaluation of laboratory work and record file.
- Oral assessment, quizzes.
- Mock practical examination.
- Semester end University examination.

Keywords: Bonding, Texture, Polymerization, Crystallization, Properties, Applications.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

**GENERIC ELECTIVES 17: CHEMISTRY: MOLECULAR MODELLING,
ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING**

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemistry: Molecular Modelling, Artificial Intelligence and Machine Learning (GE-14) | 4 | 2 | 0 | 2 | Class XII Pass | ---- |

Learning Objectives

- To make students familiar with modern scientific machine (programming) language i.e., Python, Artificial Intelligence (AI) & Machine Learning (ML) and their potential applications in chemistry.
- To provide elementary ideas of the techniques prevailing in the field of AI and ML and their applications to research problems especially related to research and development of new materials and pharmaceutical compounds with desired properties.

Learning outcomes

By the end of the course, the students will be:

- Conversant with the Python Programming Language.
- Familiar with Elementary techniques of AI and ML
- Able to apply techniques of AI & ML in basic problems of research in some important areas of research in Chemistry.

Syllabus Theory:

Part A: Molecular Modelling

Introduction to computational chemistry:

7 Hours

Overview of Computational Methods in Chemistry (Ab initio, DFT, Semi-empirical, Molecular Mechanics)

Potential Energy Surfaces

4 Hours

The concept of Potential energy surface, Intrinsic Reaction Coordinates, Stationary points,

Equilibrium points – Local and Global minima, Geometry optimization and energy minimization.

Molecular Mechanics

4 Hours

Force Fields (A brief idea of a basic force field), Elementary idea of MM1, MM2, MM3, MM4, MM+, AMBER etc. A brief Idea of Molecular Docking

Part B: Artificial Intelligence & Machine learning in Chemistry

15 Hours

An overview of computationally readable and processible representation of molecules, e.g., SMILES, mol files. Chemical space and access to chemical databases. Statistical treatment of data: regression analysis and types of regression. Elementary Idea of Quantitative structure-activity relationship (QSAR).

An insight into Artificial Intelligence & Machine learning and potential areas of applications in chemistry. Dimensional reduction; Principal Component Analysis (PCA) and the importance and necessity of nonlinearity in Artificial Intelligence.

Genetic algorithm, basics of random mutation hill climbing (RMHC) and simulated annealing.

Practicals:

(60 hours)

Molecular Modeling based Exercise

- 1) Write the Z-Matrix of a given set of molecules.
- 2) Carry out geometry optimisation on H₂O, H₂S, H₂Se molecules and compare the optimized bond angles and dipole moments from the results obtained. Obtain the ESP-mapped density surfaces and interpret the results obtained with reference to bonding in these molecules.

Suggestive: A comparative analysis of results of the above exercise may be carried out using different quantum mechanical methods.

- 3) Calculate the energy of the following chemical species and arrange them in order of increasing stability.

1-hexene, 2-methyl-2-pentene, (E)-3-methyl-2-pentene, (Z)-3-methyl-2-pentene, and 2,3-dimethyl-2-butene in order of increasing stability.

- 4) Carry out the geometry optimisation on the following chemical species and compare the shapes and dipole moments of the molecules.

1-butanol, 2-butanol, 2-methyl-1-propanol, and 2-methyl-2-propanol.

Correlate the computationally obtained values of the dipole moments with the experimental values of the boiling points: (118 °C, 100 °C, 108 °C, 82 °C, of 1-butanol, 2-butanol, 2-methyl-1-propanol, and 2-methyl-2-propanol respectively).

- 5) Based on the implicit electronic structure calculations, determine the heat of hydrogenation of Ethene.
- 6) Based on the calculations of enthalpies of the participating chemical species on

optimized geometry of the molecules, calculate the reaction enthalpy at 298 K for the following, industrially important reactions:

- 7) Carry out geometry optimisation and determine the energy of the participating chemical species in the following reactions. Using these results calculate the resonance energy of thiophene.
- 8) Carry out geometry optimization & energy calculations on the following species and obtain Frontier Molecular Orbitals. Visualize the Molecular Orbitals of these species and interpret the results for bonding in these molecules.

Benzene, Naphthalene, and Anthracene.

- 9) Compare the gas phase basicities of the methylamines by comparing the enthalpies of the following reactions:
- 10) On the basis of results of geometry optimization and energy calculations, determine the enthalpy of isomerization of cis and trans 2-butene.
- 11) QSAR based exercise on problems of interest to chemist.
- 12) Perform a conformational analysis of butane. Plot the graph between the angle of rotation and the energy of the conformers using spreadsheet software.
- 13) Compute the resonance energy of benzene by comparison of its enthalpy of hydrogenation with that of cyclohexene.
- 14) Perform a geometry optimization followed by a frequency assessment (opt+freq keyword) using the B3LYP method and 6-31-G(d) basis set on a given set of small molecules i.e. BH_3 , CH_4 .

Suggestive: A greater number of molecules may be studied as per instructions received from the concerned teacher.

- 15) Based on the fundamentals of conceptual DFT calculate the ionization potential (IP), electron affinity (EA), electronegativity and electron chemical potential of a given set of molecules.
- 16) Perform molecular docking of Sulfonamide-type D-Glu inhibitor into MurD active site using Argus lab.

Artificial Intelligence (AI) and Machine Learning (ML) based exercise on problems of interest to chemist

17. Travelling salesman problem and electrical circuit design (minimization of path-length).
- 18 Genetic algorithm, in solving matrix form of linear equations
- 19 Non-linear least-square fitting problem.
- 20 Particle Swarm Optimization on the sphere function.

Important Instruction Note on working approach:

- A student is required to perform/investigate a minimum of 10 exercises in total.
- The exercises mentioned above will be performed by the student strictly in accordance with the instructions received and only under the supervision of the teacher concerned.
- Any other exercise may be carried out with prior permission, input, discussion and instructions received from the teacher concerned.

Teaching Learning Process: Hands-on laboratory exercises Conventional teaching learning method. Engaging students in collaborative learning

Keywords: Molecular Modeling, Potential Energy Surface (PES), Geometry Optimization, Frequency calculation, Artificial Intelligence, Machine Learning, Neural Networks, Genetic Algorithm.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES 18: ROLE OF METALS IN MEDICINES

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Role of Metals in Medicines (GE-16) | 4 | 2 | 0 | 2 | Class XII Pass | ---- |

Learning Objectives

- To make the learners familiar about role of metal ions in some commercially available medicines.

Learning outcomes

By the end of this course student will be able to learn:

- Role of metal ions in various biomolecules and their functions.
- Role of metals in commercially available medicines and their functions

Syllabus Theory:

Unit 1: Bio role of Metals

04 Hours

Brief introduction of following metals in biological system

Fe, Cu, Zn, Mn, Cr(III), V, Mo, W, Co, Ni, Na, K, Mg and Ca

Chemical structure, Commercial name, Name of the disease it is made for and its brief mechanism of action shall be taught for all the mentioned metals below.

Unit 2: Diagnostic and therapeutic agents

08 Hours

Diagnostic and therapeutic agents with Pt (Cisplatin) and Ga for cancer, Au (auranofin) for arthritis and V for diabetes.

Unit 3: Metals in drugs

06 Hours

Li₂CO₃ (Camcolit) for manic-depressive illness, NaHCO₃ (Alka-seltzer) for heartburn, Al(OH)₃ (Gaviscon) for heartburn, As (melarsoprol) for sleeping sickness, Bi subsalicylate (pepto-Bismol) for heartburn and diarrhea, Bi subcitrate (De-nol) peptic ulcer, Zinc oxide with Fe₂O₃ (Calamine lotion) as antimicrobial agent.

Unit 4: Metals in Multivitamins**06 Hours**

Cyanocobalamin (Co), Ferrous fumerate (Fe), Magnesium oxide (Mg), Zinc Sulfate (Zn), Manganese sesulphate (Mn), Copper Sulfate (Cu), Sodium selenite (Se) and Chromium trichloride (Cr).

Unit 5: Radiopharmaceuticals and MRI contrast agents**06 Hours**

^{99m}Tc for heart, brain and bone imaging, ^{123}I radiopharmaceuticals, BaSO_4 for X-ray contrast agent, Gd (III) for MRI contrast agents.

Practicals:**(60 hours)****Volumetric titrations:**

1. To estimate the acidity of commercially available antacids.
2. To estimate the concentration of Fe in commercially available medicines.
3. To estimate the concentration of Ca in commercially available medicines.
4. To estimate the strength of carbonate in tablets containing Li_2CO_3
5. To estimate the sodium bicarbonate in synthetic/commercially available drug.
6. To estimate the zinc and iron present in Calamine lotion.
7. To estimate the Mg present in multivitamins.

References:

2. Chapter-9, **Metals in Medicine**, Stephen J. Lippard
3. Jones, Chris and Thornback, John, **Medicinal applications of coordination chemistry**, Cambridge, UK: Royal Society of Chemistry, 2007

Teaching Learning Process:

- Hands-on laboratory exercises
- Conventional teaching learning method. Engaging students in collaborative learning

Assessment Methods:

- Continuous evaluation of laboratory work and record file. Oral assessment, quizzes.
- Presentation on lab practices.
- Semester end examination.

Key words: Diagnostic, therapeutic agents, multivitamins, radiopharmaceuticals and MRI contrast agents.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES -19: ENERGY AND THE ENVIRONMENT

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Energy and the Environment (GE-17) | 4 | 3 | 0 | 1 | Class XII Pass | --- |

Learning Objectives

- To develop basic understanding of energy, issues related to energy, importance of energy in terms of economy, health and the environment.
- To understand different sources of energies, renewable and non-renewable sources of energy. To understand the importance of green fuels.
- To make the students understand the adverse effect of pollution, and possible remediations.

Learning Outcomes

By the end of this course student will be able to learn:

- Describe basic energy concepts
- Account for conventional and renewable energy technologies and their application
- Reflect and evaluate the environmental impact of energy production and the relationship between energy production, consumption and climate change
- Reflect on energy costs, analyse the consequences of today's energy consumption
- Efficient use of energy, water and other resources, Use of renewable energy, such as solar energy
- Pollution and waste reduction measures, and the enabling of re-use and recycling
- Good indoor environmental air quality, Use of materials that are non-toxic, ethical and sustainable
- Consideration of the environment in design, construction and operation

Syllabus Theory:

Unit 1:

13 Hours

Introduction, chemistry and energy, conversion of chemical energy to electrical energy, Carbon cycle, Greenhouse gases, Global warming and climate change, Carbon footprint, zero-carbon or low-carbon energy. Electrical energy and steam energy, Energy Alternatives, Hidden Costs of Energy.

Unit 2:

10 Hours

Production methods for electric power: Non-Renewable (conventional) sources of energy: Fossil fuels: Coal, petroleum and Natural gas. Energy transformation. Renewable energy sources: solar, hydropower, wind, geothermal, wave, ocean thermal, tidal, ocean currents, nuclear energy, biomass.

Unit 3:

12 Hours

Production methods for electric power: Renewable (green) energy, conversion and storage systems. Nuclear fusion, Hydrogen fuels, photovoltaic solar cells, hydroelectric. Sustainable energy, biomass, Biofuels, production of biofuels, advantages, blending of biofuels with conventional fuels, Carbon Capture and Reuse, Waste to Energy Technologies.

Unit 4:

10 Hours

Air Pollution, Urban and Indoor Air Pollution, Pollution and waste reduction measures, chemical remediation of air pollution. Effect of pollution on health and economy.

Practicals:

(30 Hours)

Tutorials

1. Conversion of biomass to biofuels (2-3 different biofuels)
2. Working on solar cell model.
3. Working on wind turbine model.
4. Working on geothermal energy model.
5. Working on hydroelectric plant model.
6. Presentations by students

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

**GENERIC ELECTIVES -20 : CHEMISTRY OF FRAGRANCES AND FLAVOURS:
AN INDUSTRY'S PERSPECTIVE**

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemistry of Fragrances and Flavours: An Industry's Perspective (GE-18) | 4 | 3 | 0 | 1 | Class XII Pass | ---- |

Learning Objectives

- To make the students understand the applications of chemistry in the world of flavours and fragrances. The use of fragrance is ubiquitous and is a global human phenomenon. Over the course of time, countless numbers of flavors and fragrances have found their way into everyday life, notably into foods, beverages and confectionery items; into personal care products (soaps, toothpastes, mouthwashes, deodorants, bath lotions and shampoos), perfumes, and other cosmetics as well as pharmaceutical formulations. Indeed, flavors and aromas are added to make such products more attractive or to mask the taste or smell of less pleasant ones.

Learning Outcomes

By the end of this course student will be able to learn:

- Synthesis of various fragrance and flavour ingredients
- Formulation methods, how different factors affects the formulation process in Fragrance and Flavour industry
- Uphold safety regulation and execute quality processes
- Quality control in manufacturing process, legal aspects, classification of odour and odorants.
- Different methods used for separation, purification and isolation of perfumes and flavours like distillation, extraction, crystallization, etc.

Syllabus Theory:

Unit 1: Fragrances

18 Hours

- Introduction to fragrances, types of fragrances (Fragrance families and classification)
- History of perfumes, Perfumery raw materials, classification of odour, odour type and odorants
- India in the context of Fragrance Industry
- ABCs of perfumery, odour aspects of perfumes, fragrance pyramid, fragrance families
- Some basic chemical knowledge to provide a better understanding of the structure of molecules possessing a sensory power, The volatility and solubility of sensory molecules
- Chemistry of aromatic compounds in perfume making, Composition of fragrances
- Current trends in fragrances, sensory analysis of different products
- Study of the raw materials used in perfumery (origin, extraction method, and olfaction)
- Key chemical reactions for conversion of raw materials to fragrances
- Extraction of essential oils used in perfumery
- Difference between alcohol and oil-based perfumes
- Outline of health, safety and sustainability parameters in perfumer

Unit 2: Sustainable Fragrance by Design

4 Hours

- The challenges of sustainability and how it impacts the industry
- Sustainability charter
- Green chemistry principles
- Commitment to Biodiversity

Unit 3: Flavours

18 Hours

- Introduction to flavours, types of flavours, flavour raw materials
- Understanding of terms like, Flavour and Flavouring agents. Attributes of flavour, taste, odour, odour stimulation, basic tastes and the human olfactory system.
- Stability of flavour in food, sensory evaluation of flavours in foods, Various flavour formulation
- Systematic approach to understanding flavour formation during food processing, food matrix, interaction of added flavours
- Flavour enhancers, modifiers, precursors, suppressors, solvents.
- Key chemical reactions for conversion of raw materials to flavours
- Forms of flavour and the manufacturing processes involving all types of flavours. Aroma recovery during processing.
- Biogenesis of flavours in fruits and vegetables, reaction flavours, off flavours.
- Stability of flavor in food, sensory evaluation of flavours in foods
- Selection and application of flavours in foods and beverages
- Legal aspects (natural flavours and natural flavouring substances, nature identical flavouring substances, artificial flavouring substances), and the FSSA act.

Unit 4: Extraction, Isolation and Purification of Perfumes and Flavour Compounds

05 Hours

- Extraction techniques for the separation of volatile oils from natural source- including. Distillation, Evaporation, Crystallization and Adsorption, supercritical fluid extraction methods of isolation of important ingredients

Practicals:

(30 hours)

1. Extraction of D-limonene from orange peel using liquid CO₂.
2. Extraction of caffeine from coffee beans using liquid CO₂.
3. Extraction of essential oils from lemon using steam distillation
4. Extraction of essential oils from lemon using liquid CO₂.
5. Extraction of essential oils from fragrant flowers.
6. Determination of esters by Thin Layer Chromatography
7. Memorisation of different raw materials used in perfumery, perfume language, Memorisation of perfumes
8. Testing up of different flavours
9. Analysis of spectra of perfume formulations.

GENERIC ELECTIVES -21 : GREEN CHEMISTRY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|----------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Green Chemistry (GE-20) | 4 | 2 | 0 | 2 | Class XII Pass | ---- |

Learning Objectives

Huge rise in environmental pollution, depleting resources, climate change, ozone depletion, heaps and heaps of landfills piling up has forced the society to become more and more environmentally conscious. Future chemists and innovators are compelled to work towards sustainable practices. Green chemistry has arisen from these concerns. It is not a new branch of chemistry but helps to improve the creative and innovative thinking in undergraduate students. Green chemistry is a way to boost profits, increase productivity and ensure sustainability with absolute zero waste. Innovations and applications of green chemistry in education have helped companies to gain environmental benefits as well as to achieve economic and societal goals also. Undergraduate students are the ultimate scientific community of tomorrow. Training them to practice chemistry in the safest way possible is key towards safe working conditions in the laboratories as well as the chemical industry and extends to society in a sustainable future for the planet.

Learning Outcomes:

By the end of this course, students will be able to:

- Understand the twelve principles of green chemistry and also build the basic understanding of toxicity, hazard and risk related to chemical substances.
- Calculate atom economy, E-factor and relate them in all organic synthesis
- Appreciate the use of catalyst over stoichiometric reagents
- Learn to use green solvents, renewable feedstock and renewable energy sources for carrying out safer chemistry
- Appreciate the use of green chemistry in problem solving skills and critical thinking to innovate and find solutions to environmental problems.
- Learn to design safer processes, chemicals and products through understanding of inherently safer design (ISD)
- Appreciate the success stories and real-world cases as motivation for them to practice green chemistry

Syllabus :

Unit 1: Introduction

08 Hours

Definition of green chemistry and how it is different from conventional chemistry and environmental chemistry.

- Need of green chemistry
- Importance of green chemistry in- daily life, Industries and solving human health problems (four examples each).
- A brief study of Green Chemistry Challenge Awards (Introduction, award categories and study about five last recent awards).

Unit 2: Twelve Principles of Green Chemistry

12 Hours

The twelve principles of the Green Chemistry with their explanation, Special emphasis on the following:

- Prevention of waste / byproducts, pollution prevention hierarchy.
- Green metrics to assess greenness of a reaction: environmental impact factor, atom economy and calculation of atom economy.
- Green solvents-supercritical fluids, water as a solvent for organic reactions, ionic liquids, solvent less reactions, solvents obtained from renewable sources.
 - Catalysis and green chemistry- comparison of heterogeneous and homogeneous catalysis, biocatalysis, asymmetric catalysis and photocatalysis.
- Green energy and sustainability.
- Real-time analysis for pollution prevention.
- Prevention of chemical accidents, designing greener processes, inherent safer design, principle of ISD "What you don't have cannot harm you", greener alternative to Bhopal Gas Tragedy (safer route to carcarbaryl) and Flixiborough accident (safer route to cyclohexanol) subdivision of ISD, minimization, simplification, substitution, moderation and limitation

Unit 3:

10 Hours

The following Real-world Cases in green chemistry should be discussed: Surfactants for carbon dioxide – replacing smog producing and ozone depleting solvents with CO₂ for precision cleaning and dry cleaning of garments. Designing of environmentally safe marine antifoulant. Rightfit pigment: Synthetic azo pigments to replace toxic organic and inorganic pigments. An efficient, green synthesis of a compostable and widely applicable plastic (polylactic acid) made from corn.

Practical:

(60 Hours)

Characterization by melting point, UV-Visible spectroscopy, IR spectroscopy and any other specific method should be done (wherever applicable).

1. Preparation and characterization of nanoparticles of gold using tea leaves/silver nanoparticles using plant extracts.

2. Preparation of biodiesel from waste cooking oil and characterization (TLC, pH, solubility, combustion test, density, viscosity, gel formation at low temperature and IR can be provided).
3. Benzoin condensation using thiamine hydrochloride as a catalyst instead of cyanide.
4. Extraction of D-limonene from orange peel using liquid CO₂ prepared from dry ice.
5. Mechanochemical solvent free, solid-solid synthesis of azomethine using *p*-toluidine and *o*-vanillin/*p*-vanillin.
- 6 Microwave-assisted Knoevenagel reaction using anisaldehyde, ethylcyanoacetate and ammonium formate.
7. Photoreduction of benzophenone to benzopinacol in the presence of sunlight.
8. Photochemical conversion of dimethyl maleate to dimethyl fumarate (*cis-trans* isomerisation)
9. Benzil- Benzilic acid rearrangement: Preparation of benzilic acid in solid state under solvent-free condition.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

BHASKARACHARYA COLLEGE OF APPLIED SCIENCE

Category I

B.Sc. (Honours) Polymer Science

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|---------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemistry and Engineering of Polymer Reactions (CEPR) | 4 | 3 | 0 | 1 | 12 th with PCM | -- |

Learning Objectives

- To learn about the different polymerizations
- To study kinetics of chain growth and step growth polymerization
- To understand general concepts, principles, kinetics and methodology of polymerization

Learning outcomes

The Learning Outcomes of this course are as follows:

- Know about overview of aspects of polymer engineering
- Understand essential fundamentals and chemistry of the polymerization processes.
- Learn about various terms such as reaction initiation, propagation and termination

SYLLABUS OF DSC-4

UNIT – I

06 Hours

INTRODUCTION

Introduction to polymerization process, control of polymer synthesis; thermodynamic and kinetic control, diffusion control, polymer end chain control & control strategies, Introduction to reactor design, Interpretation of batch reactor data; design equations for ideal reactors, namely batch, CSTR, plug flow, design equation for single reaction systems using batch and semi batch, CSTR, PFR, Multiple reactor system; reactor in series and parallel, preference of type of reactor used

UNIT – II

09 Hours

RADICAL CHAIN POLYMERIZATION

Introduction, thermodynamic and kinetic aspect of radical chain polymerization, rate of polymerization, kinetic chain length, Mayo's equation, cage efficiency, selection criteria of initiators, ceiling temperature, Tromsdorff effect, inhibition and retardation Ziegler-Natta catalyst and stereoregular polymerizations, Radical chain copolymerization (reactivity ratio, copolymer equations)

UNIT – III

06 Hours

REDOX & OTHER INITIATIONS

Initiation in aqueous media, initiation in non-aqueous media, rate of redox polymerization, photochemical initiation, rate of photo-polymerization, initiation by ionizing radiation, electrolytic polymerization, plasma polymerization.

UNIT – IV

09 Hours

IONIC CHAIN & CONTROLLED POLYMERIZATIONS

Classification of ionic species, effect of solvents, initiation, propagation and termination in ionic polymerization, cationic polymerization, anionic polymerization, introduction of Atom Transfer Radical Polymerization (ATRP), Reversible Addition-Fragmentation Chain Transfer Polymerization (RAFT) and Nitroxide mediated polymerization (NMP)

UNIT – V

09 Hours

STEP GROWTH POLYMERIZATION

Reaction engineering of step growth polymerization: basic properties & examples of commercially important polymers, reactivity of functional groups kinetics of step polymerization, self-catalyzed & external catalysis of polymerization, molecular weight distribution in linear & nonlinear polymerization, effect of non-equivalence of functional groups, equilibrium considerations,

UNIT – VI

06 Hours

POLYMERIZATION TECHNIQUES

Bulk, solution, precipitation, suspension & emulsion polymerization.

Practical -

30 Hours

- To prepare polystyrene/poly(methyl methacrylate) by bulk polymerization and determine the rate of polymerization.
- To study the effect of reaction temperature on free radical polymerization of styrene/MMA.
- To study the effect on initiator concentration of free radical polymerization of styrene/MMA.
- Redox initiated polymerization of MMA & investigate the effect of viscosity on polymerization kinetics
- Redox polymerization of acrylamide
- To investigate Trommsdorff effect in bulk polymerization of MMA
- Solution polymerization of methyl methacrylate/styrene.
- Suspension polymerization of styrene/MMA.
- Emulsion polymerization of styrene/ methyl methacrylate.
- Preparation of Poly (vinyl butyral).

Essential/recommended readings

- Odian, G., (2004) Principles of Polymerization, Wiley-interscience.
- Billmeyer F.A., (2011) Textbook of Polymer Science, John-Wiley & Sons.
- Seymour R.B., Carraher C.E., (2003) Polymer Chemistry, Marcel Dekker.
- Flory P.J., (2007) Principles of Polymer Chemistry, Asian Books Private Limited.
- Levenspiel, O. (1998). Chemical reaction engineering. John Wiley & Sons.

Suggestive readings

- Brydson J.A., (2016) Plastics Materials, Butterworth Heinemann, 8th Edition.
- Lenz, R. W. (1967). Organic chemistry of synthetic high polymers.
- Gowarikar V.R., (2019) Polymer Science, New Age International Publishers Ltd, 3rd Edition

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5: POLYMER RHEOLOGY (PR)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| POLYMER RHEOLOGY (PR) | 4 | 3 | 0 | 1 | 12 th Pass | --- |

Learning Objectives

- To enhance fundamental knowledge of flow behaviour of polymer melts
- To understand the concept of mixing of polymers

Learning outcomes

The Learning Outcomes of this course are as follows:

- Apply the knowledge of measurement of viscosity in handling of rheological instruments
- Interpret rheology of polymer melts by mechanical models

SYLLABUS OF DSC- 5

UNIT – I

(12 Hours)

RHEOLOGICAL PRINCIPLES

Viscosity and polymer processing, rheological properties of fluids, shear stress in polymers, Newtonian & non-Newtonian flow, polymer melt viscosities (ideal molten chains, microscopic studies of melts), flow in channels, simple shear flow, melt-flow index, Weissenberg effect, die swell, melt fracture, creep & creep compliance, stress relaxation, isochronous stress-strain curves

UNIT – II

(15 Hours)

MELT FLOW ANALYSIS

Types of fluid & rheological models, rheological measurements by capillary, parallel plate and cone & plate viscometers, simple elongational flow and its significance, dynamic flow behavior, time dependent fluid behavior

UNIT – III

(09 Hours)

RHEOLOGICAL MODELS

The elastic and viscoelastic state of polymers – viscoelasticity, viscoelastic models: Maxwell model, Voigt-Kelvin model, Boltzmann superposition principle, dynamic mechanical testing

UNIT – IV

(09 Hours)

MIXING OF POLYMERS

Types of mixing, concept and importance of master batches, mixing of additives with the polymers, melt compounding

Practical -

30Hours

- Determination of melt flow index of a polymer such as PP, PS, LDPE etc.
- Determination of intrinsic viscosity by Ubbelohde viscometer.
- Determination of rheological properties of polymer melts by rheometers.
- Measurement of resin/paint viscosity by Ford cup 4.
- Measurement of dynamic viscosity by Brookfield Viscometer.
- Compounding of polymers and investigation of their rheological behavior.
- Industry/R&D organization visit.

Essential/recommended readings

- Gupta B.R., (2004) Applied Rheology in Polymer Processing, Asian Books.
- Rosen S.L., (2012) Fundamental Principles of Polymeric Materials, Wiley-Interscience.
- Ghosh P., (2010) Polymer Science and Technology of Plastic and Rubber, Tata McGraw Hill.

- Shaw M.T., (2012) Introduction to Polymer Rheology, John Wiley & Sons.
- Dealy, J. M., & Wissbrun, K. F. (2012). Melt rheology and its role in plastics processing: theory and applications. Springer Science & Business Media.
- Hiemenz, P. C., & Lodge, T. P. (2007). Polymer chemistry. CRC press.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 6: POLYMER TECHNOLOGY(PT)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| POLYMER TECHNOLOGY(PT) | 4 | 3 | 0 | 1 | 12 th Pass | - |

Learning Objectives

- To learn about the production, properties and applications of thermoset and thermoplastic polymers
- To learn about the chemistry and manufacturing of flexible and rigid polyurethane foams
- To understand the modification of unsaturated polymers

Learning outcomes

The Learning Outcomes of this course are as follows:

- Learn preparation of thermoplastic polymers
- Learn preparation of thermosetting polymers
- Apply the knowledge of polymer synthesis to obtain polymers with desired properties

SYLLABUS OF DSC-6

UNIT – I

(27 Hours)

THERMOPLASTIC POLYMERS

Manufacturing process, properties and applications of the following polymers:

- Polyethylene (LDPE,LLDPE,VLDPE, HDPE)
- Polypropylene and related copolymers
- Polystyrene ABS, HIPS and related copolymers
- Poly (vinyl chloride) and related copolymers
- Poly (vinyl acetate) and related polymers
- Acrylic polymers (PMMA,PEA, PAA, PAN, Polyacrylamide)
- Aliphatic polyamides (Nylon 6, Nylon 66, Nylon 6,10)
- Polyester (PET, PBT)

UNIT – II

(18 Hours)

Manufacturing process, curing, properties, and applications of the following polymers:

- Unsaturated polyester resins

- Phenol formaldehyde resins (resols and novolacs)
- Urea and melamine formaldehyde resins
- Epoxides
- Polyurethanes (Flexible & Rigid foams)

Practical -

30 Hours

- Preparation of PMMA bone cement.
- Preparation and testing of epoxy resins
- Preparation of Nylon 6,10 by interfacial polymerization
- Preparation of phenolic resin for adhesive applications.
- Preparation of unsaturated polyester resin and determination of molecular weight by acid value/hydroxyl value.
- Synthesis of copolymer of styrene & maleic anhydride, and styrene & MMA and determination of reactivity ratios.
- To prepare melamine formaldehyde product viz. crockery etc.
- Synthesis of Polyurethane Foams
- Preparation of sodium polyacrylate salt and poly(acrylic acid) from polyacrylamide.

Essential/recommended readings

- Brydson J.A., (2016) *Plastics Materials*, Butterworth Heinemann, 8th Edition.
- Mittal Vikas, (2011) *High Performance Polymers and Engineering Plastics*, Wiley.
- Seymour R.B., Carraher C.E., (2003) *Polymer Chemistry*, Marcel Dekker.
- Billmeyer F.A., (2011) *Textbook of Polymer Science*, John-Wiley & Sons.
- Gowarikar V.R., (2019) *Polymer Science*, New Age International Publishers Ltd, 3rd Edition

Suggestive readings

- Flory P.J., (2007) *Principles of Polymer Chemistry*, Asian Books Private Limited.
- Mark J.E. Erman B., Eirich F.R., (2005) *The Science and Technology of Rubber*, Elsevier Academic Press.

Category-IV

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY THE DEPARTMENTS

GENERIC ELECTIVES (GE-4): BIOMEDICAL APPLICATIONS OF POLYMERS(BAP)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| BIOMEDICAL APPLICATIONS OF POLYMERS (BAP) | 4 | 2 | 0 | 2 | 12 th Pass | --- |

Learning Objectives

- To acquire knowledge of biopolymer and biodegradation
- To gain knowledge of applications and testing of biopolymers

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the basic concepts and requirement of biomaterials and biocompatibility
- Apply the knowledge of various biomaterials for a desired bio-application

SYLLABUS OF GE-4

UNIT – I

(06 Hours)

BASICS OF BIOMATERIALS

Concept of biocompatibility and biodegradability, responsiveness, estimations of degradation and biocompatibility, Important biomaterials: hydrogel, fibres, bio-ceramics, bio-elastomers and membranes

UNIT – II

(04 Hours)

POLYMERS AS BIOMATERIALS

Polyester and polysaccharides, natural gums, biodegradable polymers, polymers and hydrogels

UNIT – III **(10 Hours)**
BIOMATERIALS FOR ORGAN TRANSPLANTS AND TISSUE ENGINEERING

Properties and applications of polymers for organ transplant e.g. dental cement, orthopedic, skin, artificial kidney etc., basic concepts of tissue engineering, Important polymers for tissue engineering: cellulose, chitosan and alginates

UNIT – IV **(10 Hours)**
DRUG DELIVERY AND WOUND CARE

Introduction to drug delivery, polymers in controlled drug delivery, dressing strips, polymer drug vessels, core shell and nanogels, polymers for antimicrobial activity, bio-conjugates

Practical **- 60 Hours**

- Evaluate the biocompatibility of polymeric samples.
- Determination of the degradation behavior of polymers such as thermal, hydrolytic degradation etc.
- Preparation of membranes and measurement of absorption behavior.
- Preparation and characterization of dental cement.
- Preparation of a hydrogel and its characterization.
- Determination of tensile strength of biopolymers.
- Determine the swelling rate of biopolymers
- Preparation of nanogel and find its water absorption
- preparation and characterization of membrane for skin transplant

Essential/recommended readings

- Tiwari A., Tiwari A., (2013) Nanomaterials in drug delivery, Imaging and Tissue Engineering, Wiley.
- Pilla S., (2011) Handbook of Bioplastics and Biocomposites Engineering Applications, Wiley.
- Ratner, Buddy D., Allan S. Hoffman, Frederick J. Schoen, and Jack E. Lemons. "Biomaterials science: an introduction to materials in medicine." San Diego, California (2004): 162-4.
- Park, J. B., & Bronzino, J. D. (2002). Biomaterials: principles and applications. crc press.

Suggestive readings

- Saltzman W.M., (2001) Drug delivery–Engineering principles for drug therapy, Oxford University Press.
- Kalia S., Averous L., (2011) Biopolymers: Biomedical and Environmental Applications, John Wiley & Sons.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-5): POLYMERS FOR PACKAGING (PP)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-----------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| POLYMERS FOR PACKAGING (PP) | 4 | 2 | 0 | 2 | 12 th Pass | --- |

Learning Objectives

- To learn about the basic necessities and importance of packaging
- To acquire knowledge of various types of packaging materials

Learning outcomes

The Learning Outcomes of this course are as follows:

- Apprehend the basic concepts of packaging and its utilization for desired applications
- Assess the quality of packaging material and packaged product

SYLLABUS OF GE-5

UNIT – I

(06 Hours)

PACKAGING SYSTEMS

Types of packaging systems: box, bottle, tetra, pouch, shrink, vacuum, gas, controlled atmosphere packaging (CAP), modified atmosphere packaging (MAP), and aseptic packaging

UNIT – II

(08 Hours)

POLYMERS IN PACKAGING

Properties and applications: LLDPE, LDPE, HDPE, HMHDPE, PP, PVC, nylons, polyester, polycarbonate, PS, EPS, PLA, PVA and Starch

UNIT – III

(08 Hours)

PACKAGING PROCESS TECHNIQUES

Preparation of packaging materials by thermoforming, co-extrusion, extrusion-stretch blow molding, injection molding, BOPP films

UNIT – IV

(08 Hours)

TESTING OF POLYMER PACKAGING MATERIAL

Bursting strength, tensile strength, tear strength, puncture test, impact test (Drop, falling dart), permeability test (water vapour, oxygen), biodegradability, sealing strength

Practical -**60 Hours**

- To identify packaging materials with the help of FT-IR, DSC, TGA etc.
- Determination of physico-mechanical properties (density, burst strength, tensile strength, tear strength, puncture test strength, impact strength etc).
- Determination of water vapor transmission rate of packaging material.
- To test sealing strength integrity of packaging materials.
- To check biodegradability of packaging material.
- Preparation biodegradable packaging film
- Determination of water vapor transmission rate of packaging material.
- To test seal strength integrity of packaging materials.
- To check biodegradability of packaging material.
- To determine compatibility of film.

Essential/recommended readings

- Robertson G.L., (2005) Food Packaging Principles and Practice, CRC press.
- Paine F.A. and Paine H.Y., (1992) A Handbook of Food Packaging, Blackie Academic and Professional.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-6): POLYMERS FOR ELECTRICAL AND ELECTRONIC APPLICATIONS (PEEA)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| POLYMERS FOR ELECTRICAL AND ELECTRONIC APPLICATIONS (PEEA) | 4 | 2 | 0 | 2 | 12 th Pass | ---- |

Learning Objectives

- To learn about basic concepts of polymer electrical and electronic properties
- To gain knowledge of electrical and electronics applications of polymers

Learning outcomes

The Learning Outcomes of this course are as follows:

- Synthesize a conducting polymer for a specific application
- Apply the knowledge of properties of polymers required for electrical and electronics applications

SYLLABUS OF GE-6

UNIT – I

(08 Hours)

INTRODUCTION TO POLYMERS

Petro polymers, conducting polymers, biopolymers, composites, Band diagram, processing of polymers, doping (chemical and ion), advantages and disadvantages of conducting polymers, limitations

UNIT – II

(08 Hours)

PREPARATION OF CONDUCTING POLYMERS

Synthetic methods: chemical, electrochemical, photochemical etc. (polyaniline, polypyrrole, polythiophene, polyacetylene, etc.), methods to enhance the processability of conducting polymers

UNIT – III

(08 Hours)

PROPERTIES

Dielectric strength, dielectric loss, charge storage capacity, electrical conductivity, heat capacity, magnetism, hysteresis loop, shape memory, mechanical properties, EMI shielding

UNIT – III**(06 Hours)****ELECTRONIC APPLICATIONS**

Semiconducting organic materials, polymer based electronic devices, organic field effect transistor, organic transistors, plastic solar cell, light emitting diode, supercapacitor, sensors etc.

Practical -**60 Hours**

- Preparation of conducting polyaniline and measurement of their conductivity.
- Preparation of polypyrrole and measurement of their conductivity.
- Preparation of polythiophene and measurement of their surface resistivity.
- Preparation and testing of conducting polymers for sensor applications.
- Measurement of multilayer insulation of a thin film.
- Measurement of dielectric strength of a polymer film.
- Measurement of mechanical properties of insulating cable
- Preparation polymer sample and analyzed its dielectric strength
- Preparation of a conducting polymer nanocomposites.
- Preparation polymeric semiconductor

Essential/recommended readings

- Skotheim T.A., Elsenbaumer R.L., Reynolds J.R., (1998) Handbook of conducting polymers, Vol. 1 and Vol. 2, Marcel Dekker.
- Nalwa H.S., (1977) Organic Conductive Molecules and Polymers, John Wiley & Sons.

- Bikales M., Menges O.B., (1986) Encyclopedia of Polymer science and Engineering, Second Edition, Vol.5, John Wiley & Sons.

Suggestive readings

- Lyons M.E.O., (1994) Electroactive polymers, Plenum Press.
- Margolis J., (1993) Conducting Polymers and Plastics, Chapman & Hall.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DEPARTMENT OF ANTHROPOLOGY

Category-I

BSc. (Hons.) Environmental Science

DISCIPLINE SPECIFIC CORE COURSE -4 (DSC-4) – : Human Origins and Evolution

Credit distribution, eligibility and pre-requisites of the course:

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Human Origins and Evolution | 4 | 3 | 0 | 1 | 12th Pass | ---- |

Learning Objectives

1. The course will enhance students understanding of human variation in the light of human origins.
2. The course will help students to develop concepts pertaining to the relation of modern humans with living and non-living primates.

Learning Outcomes

Students will learn on evolutionary relationships of different extinct/hominids in the context of emergence of modern human beings. Students will also learn the gradual biological and behavioral processes of becoming human.

Syllabus:

Unit-1 (12 Hours)

Primate origins and radiation: phylogenetic relationships of living primates with special reference to Miocene hominoids

Unit-2 (12 Hours)

Australopithecines: distribution, features and their phylogenetic relationships. Appearance of genus Homo: Homo habilis
Homo erectus from Asia, Europe and Africa: Distribution, features and their phylogenetic status

Unit-3 (12 Hours)

The origin of Homo sapiens: Fossil evidences of Neanderthals.
Origin of modern humans (Homo sapiens sapiens): Archaic and Modern humans, Distribution and features

Unit-4**(9 Hours)**

Hominization process: Bio-cultural Evolution

Practical –**30 Hours****Craniometry:**

- a) Maximum Cranial Length
- b) Maximum Cranial Breadth
- c) Maximum Bizygomatic Breadth
- d) Maximum Frontal Breadth
- e) Minimum (Least) Frontal Breadth
- f) Nasal Height
- g) Nasal Breadth
- h) Bi-Mastoid Breadth
- i) Greatest Occipital Breadth
- j) Upper Facial Height
- k) Cranial Index
- l) Nasal Index

Osteometry: Measurements of Human long bones (6)

Identification of casts of fossils of family hominidae: Drawing and comparison of cranial characteristics.

DISCIPLINE SPECIFIC CORE COURSE -5 (DSC-5) – : Fieldwork Traditions and Ethnography

Credit distribution, eligibility and pre-requisites of the course:

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fieldwork Traditions and Ethnography | 4 | 3 | 0 | 1 | 12th Pass | ---- |

Learning Objectives:

- How ethnographers conceptualize, conduct, and analyse their research;
- The types of research practices for generating data
- The ethics of ethnographic research, in relationship to disciplinary history

Learning Outcomes:

- Ability to conduct ethnographic research
- Generate data and write field notes
- Analyse and interpret ethnographic data

Syllabus:

Unit 1 Fieldwork Tradition

(12 Hours)

The emergence of fieldwork tradition in Anthropology; Ethnography, its Nature, Trajectories, Genres; Ethnography: Process and Product

Unit 2 Idea of Field

(12 Hours)

Concept of field: Idea of Place and Space, and its changing contours, Multi-sited Ethnography and Virtual Spaces.

Unit 3 Doing ethnography

(12 Hours)

Doing ethnographic Fieldwork: Fieldwork Identity; Rapport and Relations; Representation and Emotions; Ethical issues.

Unit 4 Field Methods and Writing

(09 Hours)

Observation, Interview, Case Study, Life History, Genealogy, Sensory Ethnography, Reflexivity and Ethnographic Writing

Practical –

30 Hours

Designing Ethnographic Research: Identifying a problem, Defining the universe, Literature Review, selecting appropriate methods; doing Fieldwork: field diaries and field notes; Analysis and Writings.

1. Students are required to visit different field sites and come up with observational and experiential learnings
2. Presentations based on a Research Project

Keywords: Fieldwork, Ethnography, Ethics, Writing, Reflexivity

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE -6 (DSC-6) – : Human ecology and biological adaptation

Credit distribution, eligibility and pre-requisites of the course:

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Human ecology and biological adaptation | 4 | 3 | 0 | 1 | 12 th Pass | ---- |

Learning Objectives

1. To introduce human ecology through biological perspectives where impetus will be laid on building a sense of awareness, empathy and understanding of existing environmental problems at various subsistence levels.
2. The course focuses on environmental matters that need attention on imperative basis.

Learning Outcomes

1. The students will be trained to identify biological adaptation strategies that can throw light on the resilient measures in different environmental stresses.
2. The students can be better equipped to understand the impact of various environments on everyday human life and can critically reflect on adoption of a healthy and sustainable environment.
3. The students can be encouraged to come up with innovative strategies to reduce the environmental menace created by humankind and aim towards a sustainable future.

Syllabus:

Unit I: Fundamentals of Human ecology (12 Hours)

- Human ecology and its interdisciplinary approaches
- Complexity and diversity of human population with respect to environment
- Concepts of human ecology and adaptation with special emphasis on biological dimensions

Unit II: Tools to understand human ecology (12 Hours)

- Methods of studying human ecology
- Indigenous knowledge for sustainability in various environments

Unit III: Human adaptation: Population and environment (12 Hours)

- Adaptation to various ecological stresses
- Ecological rules and their applicability to human populations

Unit IV: Human health and environment (09 Hours)

- Impact of various environments on human health
- Impact of urbanization and industrialization on humans

Practical –

30 Hours

A. Size and Shape Measurements:

1. Stature
2. Sitting Height
3. Body Weight
4. Total Upper Extremity Length
5. Total Lower Extremity Length
6. Nasal Breadth
7. Nasal Height

B. Size and Shape Indices:

1. Body Mass Index
2. Relative Sitting Height
3. Relative Upper Extremity Length
4. Relative Total Lower Extremity Length
5. Nasal Index

C. 1-2 public talks/workshops/project over the academic semester on research topics on human ecology and biological adaptation. These talks would bring students with brainstorming discussion on current issues.

Teaching Learning Process

1. Classroom teachings
2. Seminars and presentations
3. Practical classes
4. Workshop

Keywords: adaptation, human ecology, ecological stresses, health

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

CATEGORY-IV

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY DEPARTMENT OF ANTHROPOLOGY

Credit distribution, Eligibility and Pre-requisites of the Course

GENERIC ELECTIVES (GE-7): Physical fitness, Activity and Performance

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Physical fitness, Activity and Performance | 4 | 3 | 0 | 1 | 12 th Pass | --- |

Learning Objectives:

The course is structured around the relevance of being physically fit in today's environment. It will further focus on increasing one's performance and activity through anthropological knowledge.

Learning Outcomes:

1. The students will learn about various components of health-related and skill related physical fitness.
2. The students will learn about the importance of physical fitness in performing and sustaining daily activities.
3. They will also learn about the relevance of physical fitness and performance in sports science and how it helps in designing the most appropriate athletic training program.
4. They will learn how anthropological knowledge is of immense importance in fitness and performance.

Syllabus

Unit I: Introduction to physical fitness and performance (12 Hours)

Definition, scope, and relevance of physical fitness and performance, ways to improve physical fitness and performance, various types of physical fitness and performance test

Unit II: Measure of physical fitness and performance (12 Hours)

Cardiovascular endurance, Muscular strength, Muscular endurance, Flexibility, Body composition, skill related components of physical fitness

Unit III: Physical fitness and performance in sports and health science (12 Hours)

Importance of physical fitness and performance in preventing chronic and lifestyle disease, talent identification in sport science by determining an athlete's strengths and weaknesses, doping and performance.

Unit IV: Anthropological knowledge in physical fitness and performance (09 Hours)

Relevance of anthropology in studying physical fitness, activity and performance, understanding physical fitness and performance by taking into consideration the ethnic and racial differences

Practical – 30 Hours

1. Physical fitness and performance test
2. **Physiological Measurements-** Blood pressure, Heart rate, Pulse rate
3. **Somatometric Measurements-** Height, weight, skinfolds, hip circumference, waist circumference, mid-upper arm circumference, neck circumference, calf circumference, thigh circumference

1-2 workshops/projects over the academic semester on topics related to anthropology. It would bring students to brainstorming discussions on current issues and help them develop innovative ideas.

Keywords: Physical fitness, performance, health science

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-8): CUSTOMARY LAW

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Customary Law | 4 | 3 | 0 | 1 | 12 th Pass | --- |

Learning objectives:

The course is designed to help students understand the approaches to the study of different types of law, particularly customary law. It will also help students to learn the contradictions, inconsistencies inherent in the interface between customary law and the state law.

Learning Outcomes: On completion of the course, students will be able to:

- Locate nuances of diverse customs from around the world based on ethnographic works.
- Make critical evaluation of gendered laws which are intricately enmeshed within the social fabric.
- Gain insights into the workings of state agency that blurs the boundary of customary law and the state.

Syllabus:

Unit 1: Understanding Customary Law (12 Hours)

Customary Law: Concepts and Approaches; Types of Customary Law: Restitutive, Repressive; Anthropological literature: Bronislaw Malinowski, Evans-Pritchard, Meyer Fortes, Max Gluckman, Leopold Pospisil

Unit 2: Custom, Crime and Justice (12 Hours)

Law and Justice in simple societies; Classification of Crimes among indigenous communities; Oath taking and Ordeal; modes of dispute settlement

Unit 3: Gender and Customary Law (12 Hours)

Gendered laws, Inheritance, Succession, Custody of Children and Properties, Political Representation

Unit 4: Customary Law and the State Law (09 Hours)

Interface between customary law and state law; Codification of customary law and its implications

Practical – 30 Hours

- Review of ethnographic works and find out: (i) types of crime, (ii) modes of dispute settlement, (iii) rationale behind ordeals/oaths.
- Project report on (i) customary law and the state law interface, or (ii) Cultural context of a dispute and search for its settlement in one or other legal domains.

Keywords:

Customary law, oath taking, custom, dispute, state law

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-9): Ethics and Legality in Human Research

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Ethics and Legality in Human Research | 4 | 3 | 0 | 1 | 12 th Pass | --- |

Learning Objectives

1. To understand bio-social ethical aspects of human research
2. To understand aspects of health research from ethical and legal perspectives

Learning Outcomes

The students will learn the basic understanding of ethics in different types of human research and learn the skills to assess ethical dimensions of research works based on human populations

Syllabus:

Unit 1: Introduction to the ethical dimensions of human research; history of ethics in human research; Ethical vs legal regulations **(12 Hours)**

Unit 2: Research Disclosure; Importance of Truth telling; Participant Information sheet; Participant's Capacity to understand human research, Voluntariness and Consent, **(12 Hours)**

Unit 3: Human rights; Confidentiality of participant's information; Risks and benefits, Vulnerability, research integrity **(12 Hours)**

Unit 4: Ethical guidelines of Indian Council of medical Research; Regulatory framework **(9 Hours)**

Practical: (30 Hours)

Report of ethical assessment based on research work related to human research.

Keywords

Ethics, human, participants, consent, confidentiality

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-10): Quality of life and well-being

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Quality of life and well-being | 4 | 3 | 0 | 1 | 12 th Pass | ---- |

Learning Objectives:

- To understand the concept of QoL and well-being.
- To learn about various domains and indicators related to QoL and well-being.
- To know the measures of QoL and well-being as per different community or geographical setting.
- To identify the similarity and differences in these two concepts.
- To understand the change in QoL and well-being as per disease severity and duration of symptoms in different age group and gender.

Learning outcomes:

- Learner will be able to understand the basic concept of QoL and well-being.
- Information about measures of well-being and QoL will be instilled.
- Learners will get to know about indicators and theoretical models of well-being and QoL
- Knowledge about evaluation of chronic illness treatment through wellbeing and HRQoL will be imparted.

Syllabus:

Unit 1: Fundamentals of quality of life and well being (12 Hours)

Concept of Quality of life (QoL), subjectivity and multidimensionality models, standard of living, life satisfaction, philosophical foundation, definitions and measures of QoL and well being

Unit 2: QoL and Chronic illness (12 Hours)

Quality of life as an evaluation tool for the treatment (HRQoL), functioning domains under QoL: physical, mental, emotional, intellectual, spiritual, and social functioning, impact of Covid-19 on QoL and well-being

Unit 3: Theories and indicators of QoL and well-being (12 Hours)

Hedonic and Eudaimonic well-being, objective, subjective and relational well-being, integrative theories of subjective QoL. Effect of technology, economic, political, socio-cultural, resource, domain dynamics on QoL and well-being.

Unit 4: Types of well-being

(09 Hours)

Work, residential, material, social, family, marital, health, leisure. quality of life and well-being of Women, older adults, children, youth, geographic population segments etc.

Practical:

(30 Hours)

To assess QoL and wellbeing of different population at different age groups.

1-2 workshops/projects over the academic semester on topics related to quality of life and wellbeing in anthropology. It would bring students to brainstorming discussions on current issues and help them develop innovative ideas.

Teaching Learning Process

1. Classroom teachings
2. Seminars and Interactive sessions
3. Practical classes/ Field work

Keywords: Quality of life, wellbeing, Hedonic, Eudaimonic

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-11): Tribes of India

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Tribes of India | 4 | 3 | 0 | 1 | 12 th Pass | --- |

Learning Objectives: The course is designed to help students understand the contested and problematic nature of the term ‘tribe’ and its definitional attributes. It also seeks to elucidate pressing issues faced by the tribes in India by focus on the contemporary issues, challenges and crisis that confront the rural and tribal communities in India.

Learning outcomes: At the end of the course, the student will be able to:

1. Comprehend the problematic nature of the concepts of tribe and indigenous; how it differs from caste.
2. Understand critical issues, problems and challenges related to tribal societies both in historical and contemporary perspectives.
3. Evaluate, plan and implement any project work in rural and tribal areas and be able to suggest remedial measures for critical issues.

Syllabus:

Unit 1: On the concept of tribe (12 Hours)

Concept and approaches to the study of tribes; classification, distribution and cosmogeny of tribes in India; Scheduled Tribe and Indigenous people; Particularly Vulnerable tribal groups

Unit 2: Tribes and institution (12 Hours)

Tribal kinship system, types of family, rules of marriage, tribal polity and governance, subsistence economy and tribal market, tribal religion: nature-man-spirit complex, witchcraft

Unit 3: Tribes, Development, and Globalization: (12 Hours)

Impact of development schemes on tribal societies; Displacement caused by large infrastructure projects; Globalization and the shift from isolation to integration.

Unit 4: Tribes and Policy (09 Hours)

National Tribal Policy; Forest Rights, Food security, land acquisition, mining, tribal migrants

Practical –**30 Hours**

Practical would involve examination of material culture including technologies used by the hunter and gatherers, horticulturalist pastoral and agriculture communities. Functional analysis of traps for fishing, hunting, digging stick, sickle and different types of knives and other equipment used for hunting. Different types of house forms, dress patterns etc. and their ecological adaptation in different climatic zones will also be required to be studied functionally as well structural point of view. Student would also prepare a project report based upon empirical data collected on tribal issues

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-12): Environment and Health

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Environment and Health | 4 | 3 | 0 | 1 | 12 th Pass | ---- |

Learning Objectives

1. To understand basic concepts of environmental health
2. To assess environmental pollutant classes
3. To assess the risk of environmental exposures and health impacts

Learning Outcomes

The students will learn the basic concepts of environmental and health, various exposures and pollutant classes, burden of disease and health impacts of ecological exposures

Syllabus:

Unit 1: Introduction to environment health. Epidemiological studies related to environmental health **(12 Hours)**

Unit 2: Water, Sanitation and Hygiene; impact of air pollution (ambient and indoor), water pollution and noise pollution on human health **(12 Hours)**

Unit 3: Human health under different socio-cultural environment, Built environment, Urban environment, Green spaces and occupational hazards, hygiene and health **(12 Hours)**

Unit 4: Food safety, toxins and waste management, chemicals and heavy metals **(09 Hours)**

Practical: **30 Hours**

Project report based on data collection related to environmental health

4. Bernard J. Healey, Kenneth T. Walker. Introduction to Occupational Health in Public Health Practice (Public Health Environmental Health) [1 ed.]. Jossey-Bass;2009

Teaching Learning Process

The process of learning will involve acquisition of domain knowledge and understanding of skills required for conducting research in environmental health. Process will involve lectures and presentations and report submission.

Keywords

Pollutants, Environment, Exposure, Assessment, Water and Air pollution, social environment.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Category I

BSc. (Honours) Biological Science (Sri Venkateswara College)

DISCIPLINE SPECIFIC CORE COURSE – 4:

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------|---------|-----------------------------------|----------|---------------------|--|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Cell Biology (BS-DSC-201) | 4 | 2 | 0 | 2 | Class XII pass with Biology and chemistry, as one of the papers in Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To introduce the students to the basic concepts and processes in cyto-biology.
- To understand the structure and function of cell organelles, how they communicate with each other and how division and regulation takes place in cells.
- The practical content of this course is designed to understand the cell measurement methods, cell division, staining procedure and tonicity through different laboratory exercises.

Learning outcomes

On successful completion of course, the student will:

- Understand the cell and its biology which will help them to get an insight into the origin of cells, cellular structure, various components of cells and functions.
- Understand the chemical composition, physicochemical and functional organization of organelle.
- Demonstrate the knowledge of common and advanced laboratory practices in cyto-biology.
- Acquire knowledge about how cells divide by means of meiosis and mitosis and will be able to correlate different factors which control cell cycle progression.

SYLLABUS OF DSC-1

UNIT – I Overview of Cell and Cell membrane

(07 Hours)

History of cell biology, cell theory, Structure and functions of membrane, models of membrane structure, transport across membranes (with examples): simple diffusion, facilitated diffusion, active transport (Na^+/K^+ pumps, Co-transport, proton pumps) and passive transport. Phagocytosis, pinocytosis, exocytosis.

UNIT – II Cell Organelles

(13 Hours)

Mitochondria, chloroplast and nucleus: Ultrastructural organization and functions, marker enzymes, transport mechanisms in mitochondria and chloroplasts (Tim/Tom; Tic/Toc); and transport via nuclear pore complex.

Endomembrane system: Ultrastructural organization and functions of Rough and smooth endoplasmic reticulum, Golgi apparatus and lysosomes (GERL complex), tonoplast.

Glyoxysomes and Peroxisomes: Structure and function.

UNIT – III Cytoskeletal System

(03 Hours)

Structure and organization of microfilaments, intermediate filaments, microtubules, their functions in plants and animals (in brief).

UNIT – IV Cell wall and extracellular matrix

(04 Hours)

Cell wall organization (Primary and secondary cell wall), components of cell wall, Extracellular Matrix and Cell junctions, adhesive junctions, gap junctions and tight junctions, plasmodesmata. Function of cell wall.

UNIT – V Cell Division

(03 Hours)

Overview of cell cycle. Regulation: Various checkpoints and the role of cyclins and Cdks (Cyclin dependent kinases). Overview of mitosis and meiosis and their significance

Practical component – 60 Hours

1. Estimation of cell size by micrometry/ camera lucida
2. To study plasmolysis and deplasmolysis in a cell/ Isolation of protoplast from tomato and its survival in hypo, hyper and isotonic solution
3. Study the effect of organic solvent/temperature on membrane permeability.
4. Demonstrate the phenomenon of protoplasmic streaming.
5. Study of ultrastructure of a cell (Plasma membrane, Nucleus, Nuclear Pore Complex, Chloroplast, Mitochondrion, Golgi bodies, Endoplasmic reticulum, Lysosomes) through electron micrographs.

6. Study of cytoskeletal structures through photographs.
7. Study of different stages of mitosis by temporary preparation of onion root tips.
8. Study of different stages of meiosis by temporary preparation /permanent slides.
9. Staining and visualisation of mitochondria by Janus green stain

Essential/recommended readings

2. Nelson, D.L. and Cox, M.M. (2017). *Lehninger: Principles of Biochemistry* (7th ed.). W.H. Freeman & Company (New York).

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|--|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Diversity of Life Forms-II (BS-DSC-202) | 4 | 2 | 0 | 2 | Class XII pass with Biology and chemistry, as one of the papers in Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Designed with an aim to provide scope and historical background of evolution and diversity in plants and animals.
- impart knowledge regarding basic concepts of origin of chordates and make the students understand the characteristics and classification of animals with notochord.
- Outline various mechanisms involved in thriving/survival of the animals within their geographic realms.
- Understand important aspects of Gymnosperm classification, structure and economic importance.
- Provide an adequate exposure to fundamentals of plant systematics and most practiced classification systems.
- Emphasis will be on developing interest and invoking a sense of responsibility among students toward sustenance of plant and animal biodiversity.

Learning outcomes

Upon completion of the course, the students will be able to:

- Understand different characteristic features of different plant and animal life forms, classes of chordates, level of organization and evolutionary relationship between different subphyla and classes, within and outside the phylum.
- Study about diversity in animals and plants making students understand about their distinguishing features.
- Appreciate similarities and differences in life functions among various groups of animals and plants.
- Know about the habit and habitat of animals in marine, freshwater and terrestrial ecosystems.
- Understanding of systematics its importance in biodiversity management, nomenclature and classification systems of the plants.

SYLLABUS OF DSC- 2

UNIT – I Gymnosperms

(04 Hours)

Position of Gymnosperms in five kingdom classification. General characteristics, Outline classification and economic importance. Morphology, structure and reproduction of *Pinus* and *Ginkgo*. Evolutionary tendencies in Gymnosperms-a comparative study

UNIT – II Plant taxonomy

(07 Hours)

Angiosperm systematics: Fundamental concept of Plant Taxonomy (Identification, nomenclature, classification); Taxonomic resources; Herbarium- functions and important herbaria of India and world, Botanical gardens, Flora, monographs and keys (Single-access and multi-access) herbaria of India and world, Botanical gardens, Flora, monographs and keys (Single access and multiple access)

UNIT – III Classification

(04 Hours)

Historical background of plant classification; Artificial (Linnaeus), Natural (Bentham and Hooker), Phylogenetic system of classification; APG system.

UNIT – IV Diversity of Chordates

(11 Hours)

Introduction to Biodiversity, types of Biodiversity, General characteristics and Classification of chordates (upto order): Protochordata, Aganatha, Pisces: Osteichthyes, Chondrichthyes, Amphibia, Reptilia, Aves and Mammals.

UNIT – V Biogeography

(04 Hours)

Zoogeographical realms, Distribution of vertebrates in different realms

Practical component: 60 Hours

FLORA

1. *Cycas*: T.S (temporary mount) leaf, specimen: male cone and megasporophyll; T.S.corolloid root (temporary mount), T.S. microsporophyll, L.S. ovule (permanent slides).
2. *Pinus*: Study of morphology, dwarf and long shoots, male and female cone, T.S. needle(temporary mount), L.S. male and female cone (permanent slides).
3. Study the characteristic features of **any one** member of the family:
 - (a) Malvaceae
 - (b) Fabaceae/Lamiaceae
 - (c) Euphorbiaceae
 - (d) Asteraceae
 - (e) Liliaceae
4. Mounting of a properly dried and pressed specimen of any wild plant with herbariumlabel (to be submitted on the herbarium sheet with appropriate label)

FAUNA

5. Study of following specimens: Balanoglossus, Amphioxus, Petromyzon, Pristis, Hippocampus, Labeo, Ichthyophis/Uraeotyphlus, Salamander, Draco, Naja, any two common birds.
6. Slide/ Virtual demonstration of Placoid, Ctenoid and Cycloid scales
7. Identification and classification of one endangered amphibian, reptile, bird and mammal of any one zoogeographical region in Indian.
8. Report on: Biodiversity Park/reserve/ NBPGR.

Essential/recommended readings

DISCIPLINE SPECIFIC CORE COURSE –6 :

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|--|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemical Energetics, Ionic Equilibria and Nanomaterials, (BS-DSC-203)) | 4 | 2 | 0 | 2 | Class XII pass with Biology and chemistry, as one of the papers in Class XII | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To introduce materials at nanoscale, their preparation, characterization techniques and applications in real life.
- Develops basic understanding of the chemical energetics, laws of thermodynamics, chemical and ionic equilibrium.
- It provides basic understanding of the behaviour of electrolytes and their solutions.
- The course will also cover thermodynamic studies with the calculation of energies and interaction of biomolecules with their neighbouring environment.

Learning outcomes

By the end of the course, the student will be able to:

- Understand the concept of nano-dimensions.
- Know the various methods of preparation of nanomaterials.
- Know the different characterization techniques used for the analysis of nanomaterials and understand the basic principle behind these techniques.
- Understand the diverse properties of nanostructures.
- Appreciate the real-world applications of nanomaterials.
- Understand the laws of thermodynamics, basic principles of thermochemistry and equilibria and successfully extend the concepts learnt in this course to biological systems.
- Understand concept of pH and its effect on the various physical and chemical properties of the compounds.
- Use the concepts learnt to predict feasibility of chemical reactions and to study the behaviour of reactions in equilibrium.
- Explain the concept of ionization of electrolytes with emphasis on weak acid and base and hydrolysis of salt.
- Apply the concepts of pH and electrolytes while studying other chemistry courses and everyday life.

SYLLABUS OF DSC-3

UNIT – I Nanomaterials of Biological importance

(15 Hours)

Overview of nanomaterials, classification, properties, role of size, methods of synthesis (Chemical methods: chemical reduction, coprecipitation, sol-gel, microemulsions or reverse micelles, solvothermal synthesis, Green or biological methods using bacteria, Fungi, etc, Plants based methods using tea leaves, cinnamon bark, etc), characterization techniques (UV-Vis, IR, SEM, TEM, XRD), optical properties of gold and silver metallic nanoparticles, concept of surface plasmon resonance, carbon nanotubes, inorganic nanowires, quantum dots & semiconductor nanoparticles, metal-based nanostructures (Iron Oxide & ZnO nanoparticles), polymer-based nanostructures, protein-based Nanostructures, natural and artificial nanomaterials, bionanomaterials and bio-nanocomposites, bioinorganic nanomaterials, DNA and its nanomaterials, biomimetics, self-assembled nanostructures, control of nanoarchitecture, Applications of nanomaterials in drug delivery, tissue engineering,

medicine, orthopaedics, bioimaging, dental implants and biosensors

UNIT – II Chemical energetics

(05 Hours)

Review of laws of thermodynamics, important principles and definitions of thermochemistry, concept of standard state and standard enthalpies of formations, enthalpy of neutralization, integral and differential enthalpies of solution and dilution, calculation of bond energy, bond dissociation energy and resonance energy from thermochemical data, Statement of third law of thermodynamics and calculation of absolute entropies of substances.

UNIT – III Ionic Equilibria

(10 Hours)

Strong, moderate and weak electrolytes, degree of ionization, factors affecting degree of ionization, Ostwald's dilution law, ionization constant and ionic product of water, ionization of weak acids and bases, pH scale, common ion effect, salt hydrolysis-calculation of hydrolysis constant, degree of hydrolysis and pH for different salts. Buffer solutions and their applications in biological systems, Henderson-Hasselbalch equation. Solubility and solubility product of sparingly soluble salts – applications of solubility product principle.

Practical component: TOTAL HOURS: 60

1. Synthesis of silver nanoparticles (AgNPs) by chemical reduction method and their spectroscopic characterization using UV-visible spectrophotometer.
2. Green synthesis of silver nanoparticles (AgNPs) using soluble starch or cinnamon bark and their characterization using UV-visible spectroscopy.
3. Phytochemicals mediated synthesis of gold nanoparticles (AuNPs) using tea leaves and to study the effect of size on color of gold nanoparticles.
4. Preparation of magnetic nanoparticles (MNPs) of Fe_3O_4 using green tea leaf extract.
5. Synthesis of pure ZnO and Cu-doped ZnO nanoparticles by precipitation method and its characterization using UV-visible spectroscopy.
6. XRD pattern of nanomaterials and estimation of particle size. (Students can be provided with XRD patterns of known materials and asked to interpret the data.)
7. Determination of enthalpy of neutralization of hydrochloric acid with sodium hydroxide.
8. Determination of integral enthalpy (endothermic and exothermic) solution of salts.
9. Preparation of buffer solutions: (i) Sodium acetate-acetic acid or (ii) Ammonium chloride-ammonium acetate.
10. Measurement of the pH of buffer solutions and comparison of the values with theoretical values.

11. pH metric titration of (i) strong acid with strong base, (ii) weak acid with strong base and determination of dissociation constant of a weak acid.

DEPARTMENT OF ENVIRONMENTAL SCIENCE

Category-I BSC (H) ENVIRONMENTAL SCIENCE

DISCIPLINE SPECIFIC CORE COURSE – 4 (DSC-EVS-4): WATER AND WATER RESOURCES

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| WATER AND WATER RESOURCES | 4 | 2 | 0 | 2 | Class XII pass | NIL |

Learning objectives

The Learning Objectives of this course are as follows:

- Gain insights into the hydrological cycle, properties of water, physico-chemical and biological
- Understand parameters and indices of water quality
- Classify types of water resources and thus develop practices for their sustainable use and management
- Investigate problems associated with water shortages in India and familiarize with case studies on international and national conflicts on water.

Learning outcomes

After this course, students will be able to learn the following skills.

- Acquire skills to identify potential water resources in a given region and manage existing water resources
- Analyze data on water resources to understand the current environmental challenge and prevent the future ones
- Make informed decisions on using and choosing appropriate methods for water resource management and develop nature-based methods to improve the health of water bodies
- Develop low-cost methods for purifying drinking and natural water
- Correlate water resource management practices with socio-economic challenges and prospects
- Relate and interpret the data on water resources data with other related sustainability challenges

SYLLABUS OF DSC-4

Theory (02 Credits: 30 lectures)

UNIT – I Introduction (2 Hours)

Sources and types of water; hydrological cycle; precipitation, runoff, infiltration, evaporation, evapo- transpiration; classification of water resources (oceans, rivers, lakes and wetlands).

UNIT – II Properties of water (4 Hours)

Physical: temperature, colour, odour, total dissolved solids and total suspended solids; Chemical: major inorganic and organic constituents, dissolved gases, DO, COD, BOD, acidity and alkalinity, electrical conductivity, sodium adsorption ratio; Biological: phytoplankton, phytobenthos, zooplankton, macro-invertebrates and microbes.

UNIT – III Surface and subsurface water (6 Hours)

Introduction to surface and ground water; surface and ground water pollution; water table; vertical distribution of water; formation and properties of aquifers; techniques for ground water recharge; river structure and patterns; watershed and drainage basins; importance of watershed and watershed management; rain water harvesting in urban settings.

UNIT – IV Wetlands and their management (4 Hours)

Definition of a wetland; types of wetlands (fresh water and marine); ecological significance of wetlands; threats to wetlands; wetland conservation and management; Ramsar Convention, 1971; major wetlands of India.

UNIT – V Marine resource management (3 Hours)

Marine resources; commercial use of marine resources; threats to marine ecosystems and resources; marine ecosystem and resource management (planning approach, construction techniques and monitoring of coastal zones).

UNIT – VI Water resources in India (4 Hours)

Demand for water (agriculture, industrial, domestic); overuse and depletion of surface and ground water resources; water quality standards in India; hot spots of surface water; role of state in water resources management.

UNIT – VII Water resource conflicts (4 Hours)

Water resources and sharing problems, case studies on Kaveri and Krishna River water disputes; Multipurpose River valley projects in India and their environmental and social impacts; case studies of dams; Narmada and Tehri dam – social and ecological losses versus economic benefits; International conflicts on water sharing between India and her neighbours; agreements to resolve these conflicts.

UNIT – VIII Major laws and treaties (3 Hours)

National water policy; water pollution (control and prevention) Act 1972; Indus water treaty; Ganges water treaty; Teesta water treaty; National River linking plan: ecological and economic impacts.

Practicals/Hands-on Exercises – based on theory (02 Credits: 60 hours)

1. Estimate water quality based on physico-chemical parameters, such as pH, electrical conductivity, salinity, total dissolved and suspended solids, iron contents, and dissolved oxygen
2. Classify and characterize aquifers of Indian states and analyse “Safe” and “Over-exploited” zones of two states based on groundwater use.

3. Determine alkalinity, alkalinity hazard and SAR of water samples and recommend their use for various purposes.
4. Identify and map water resources in NCT Delhi and correlate its current status with changing land use in past 60 years
5. Estimate sediment load in Yamuna River at different sections of its course in Delhi regions
6. Assess water quality (pH, TDS, TH, EC, BOD, Heavy Metals) and determine the water portability of samples collected from different sites of NCT Delhi.
7. Conduct an online survey to assess people's knowledge, perception and attitude towards water quality issues and their impact on the environment and health.
8. Analyze water conservation strategies in North-eastern and Western states of India from the data available from State Government Agencies.
9. Document and compare water conservation strategies in different agroclimatic zones of India
10. Analyze watershed management strategies in selected river basins of India.
11. Develop integrated water management strategies for two contrasting river basin of India.

**DISCIPLINE SPECIFIC CORE COURSE – 5 (DSC-EVS-5): LAND AND SOIL:
CONSERVATION AND MANAGEMENT**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| LAND AND SOIL: CONSERVATION AND MANAGEMENT | 4 | 2 | 0 | 2 | Class XII pass | NA |

Learning objectives

The Learning Objectives of this course are as follows:

- Gain insights into fundamentals of land and soil degradation
- Understand deeply the properties of soil and how the quality of land and soil degrades due to anthropogenic activities
- Develop solutions to combat land and soil degradation based on natural processes

Learning outcomes

After this course, students will be able to

- Acquire skills in managing soil and land sustainably
- Analyze data on soils and land use to identify the principal factor(s) governing sustainability
- Develop methods to address environmental issues related to soil health and changing land use
- Correlate positive or negative impacts of soil and land use on ecosystems and society
- Relate and interpret the soil and land use data with the sustainability of a region
- Use soil and land use data to develop evidence-based land use guidelines

SYLLABUS OF DSC-2

Theory (02 Credits: 30 lectures)

UNIT – I Introduction (3 Hours)

Land as a resource, soil health; ecological and economic importance of soil; types and causes of soil degradation; impact of soil loss and soil degradation on agriculture and food security; need for soil conservation and restoration of soil fertility.

UNIT – II Fundamentals of soil science (5 Hours)

Soil formation; classification of soil; soil architecture; physical properties of soil; soil texture; soil water holding capacity; soil temperature; soil colloids; soil acidity and alkalinity; soil salinity and sodicity; soil organic matter; micronutrients of soil; nitrogen, sulphur, potassium and phosphorus economy of soil; soil biodiversity; soil taxonomy maps.

UNIT – III Soil degradation – causes (5 Hours)

Soil resistance and resilience; nature and types of soil erosion; non-erosive and erosive soil degradation; losses of soil moisture and its regulation; nutrient depletion; soil pollution due to mining and mineral extraction, industrial and urban development, toxic organic chemicals, and organic contaminants in soils; fertilizers and fertilizer management; recycling of soil nutrients.

UNIT – IV Land use changes and land degradation (7 Hours)

Land resources: types and evaluation; biological and physical phenomena in land degradation; visual indicators of land degradation; drivers of land degradation - deforestation, desertification; habitat loss, loss of biodiversity; range land degradation; land salinization; human population pressure, poverty, socio-economic and institutional factors; drivers of land use and land cover change in major geographic zones and biodiverse regions with particular reference to the Himalaya and the Western Ghats.

UNIT – V Costs of land degradation (7 Hours)

Economic valuation of land degradation; onsite and offsite costs of land degradation; loss of ecosystem services; effects on farming communities; effects on food security; effects on nutrient cycles; future effects of soil degradation; emerging threats of land degradation to developing countries.

UNIT – VI Controlling land degradation (3 Hours)

Sustainable land use planning; role of databases and data analysis in land use planning control and management; land tenure and land policy; legal, institutional and sociological factors; participatory land degradation assessment; integrating land degradation assessment into conservation.

Practicals/Hands-on Exercises – based on theory (02 Credits: 60 hours)

1. Determine and assess soil texture, color, structure, water, and temperature using the jar test and soil textural triangle. Discuss and describe the soil profiles for different types of ecosystems.
2. Characterize the given soil samples for the proportion of soil particle size fractions.
3. Determine bulk density, moisture content, and water holding capacity of garden soil and compare it with other soil types

4. Estimate variations in pH, alkalinity, acidity, and salinity of the given soil sample. Establish the relationship between soil quality and crop productivity.
5. Evaluate given soils samples for soil organic matter contents and comment on their productivity
6. Calculate permeability of soil samples and comment on its impact on plant growth
7. Separate minerals using the selective dissolution method
8. Estimate $\text{PO}_4\text{-P}$ of soils using ammonium molybdate reactions by spectrophotometric analysis
9. Estimate $\text{SO}_4\text{-S}$ contents of soils by titrating with the barium chloride solution
10. Extract, investigate and interpret soil health data (micronutrient status, macronutrient status, and pH) for Northern, Western, and North-Eastern states of India. For the selected states, discuss the various soil types, agriculture practices, cropping patterns, crop production, conservation, and management strategies.
11. Extract, investigate and interpret the available datasets on soil maps, soil databases, and land degradation maps for India and draw suitable inferences. Conduct a perception-based study on the importance of soils and various impacts of soil and land degradation through an online survey.
12. Assessment of fertilizer management and integrated nutrient management practices for selected crops in India.

DISCIPLINE SPECIFIC CORE COURSE – 6 (DSC-EVS-6): ECOLOGY AND ECOSYSTEMS**CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| ECOLOGY AND ECOSYSTEMS | 4 | 2 | 0 | 2 | Class XII pass | NIL |

Learning objectives

The Learning Objectives of this course are as follows:

- Develop an understanding of ecosystems and their structural and functional aspects
- Reveal interconnectedness and interdependentness among all the biotic and abiotic components of the environment
- Gain insights into the dynamic nature of the ecological processes in maintaining equilibrium in nature.

Learning outcomes

After this course, students will be able to

- Acquire skills in ecological census techniques
- Analyze the status of biodiversity and ecosystem structure
- Develop methods to assess the changes in ecosystems with time and space
- Correlate effects of anthropogenic factors on ecosystem stability
- Relate and interpret the connections between environmental factors and ecosystem changes
- Use ecological data to predict the impact of a given factor on ecosystem and biodiversity

SYLLABUS OF DSC-6

Theory (02 Credits: 30 lectures)

UNIT – I Introduction (3 Hours)

Basic concepts and definitions: ecology, landscape, habitat, ecozones, biosphere, ecosystems, ecosystem stability, resistance and resilience; autecology; synecology; major terrestrial biomes.

UNIT – II Ecology of individuals (5 Hours)

Ecological amplitude; Liebig's Law of the Minimum; Shelford's Law of Tolerance; phenotypic plasticity; ecotypes; ecoclines; acclimation; ecological niche; types of niches: Eltonian niche, Hutchinsonian niche, fundamental niche, realized niche; niche breadth; niche partitioning; niche differentiation; thermoregulation; strategies of adaptation in plants and animals.

UNIT – III Ecology of populations (5 Hours)

Concept of population and meta-population; r- and K-selection; characteristics of population: density, dispersion, natality, mortality, life tables, survivorship curves, age structure; population growth: geometric, exponential, logistic, density-dependent; limits to population growth; deterministic and stochastic models of population dynamics; ruderal, competitive and stress-tolerance strategies.

UNIT – IV Ecology of communities (5 Hours)

Discrete versus continuum community view; community structure and organization: physiognomy, sociability, species associations, periodicity, biomass, stability, keystone species, ecotone and edge effect; species interactions: mutualism, symbiotic relationships, commensalism, amensalism, protooperation, predation, competition, parasitism, mimicry, herbivory; ecological succession: primary and secondary successions, models and types of successions, climax community concepts, examples of succession.

UNIT – V Ecosystem ecology (5 Hours)

Types of ecosystem: forest, grassland, lentic, lotic, estuarine, marine, desert, wetlands; ecosystem structure and function; abiotic and biotic components of ecosystem; ecosystem boundary; ecosystem function; ecosystem metabolism; primary production and models of energy flow; secondary production and trophic efficiency; ecosystem connections: food chain, food web; detritus pathway of energy flow and decomposition processes; ecological efficiencies; ecological pyramids: pyramids of number, biomass, and energy.

UNIT – VI Biogeochemical cycles and nutrient cycling (4 Hours)

Carbon cycle; nitrogen cycle; phosphorus cycle; sulphur cycle; hydrological cycle; nutrient cycle models; ecosystem input of nutrients; biotic accumulation; ecosystem losses; nutrient supply and uptake; role of mycorrhizae; decomposition and nutrient release; nutrient use efficiency; nutrient budget; nutrient conservation strategies.

UNIT – VII Biological invasions (3 Hours)

Concept of exotics and invasives; natural spread versus man-induced invasions; characteristics of invaders; stages of invasion; mechanisms of invasions; invasive pathways; impacts of invasion on ecosystem and communities; invasive ecogenomics – role of polyploidy and genome size in determining invasiveness; economic costs of biological invasions.

Practicals/Hands-on Exercises – based on theory (02 Credits: 60 hours)

1. Using and choosing quadrat types for vegetation analyses
2. Carry out vegetation analysis using line-transect techniques
3. Estimate the populations of aquatic beetles and bugs in ponds by the mark-capture method
4. Conduct bird surveys in your college/nearby garden using the point transect method
5. Determine the variations in abundance of micro-, meso-, and macrofauna in soils of different land use
6. Estimate the diversity of species within a community or habitat and comment

- on alpha diversity
7. Analyze the rate and extent of change in species along a gradient from one habitat to others and comment on beta diversity
 8. Considering the analyses of practicals 6 and 7, estimate the gamma diversity and comment.
 9. Prepare and interpret the species accumulation curve for the total species richness of an area
 - 10-13 Compare and classify communities for (a) similarity and differences, (b) influential environmental variables, (c) interspecific association

Essential/recommended readings

GENERIC ELECTIVES (GE-EVS-05): CIRCULAR ECONOMY AND ENVIRONMENTAL SUSTAINABILITY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| CIRCULAR ECONOMY AND ENVIRONMENTAL SUSTAINABILITY | 4 | 2 | 0 | 2 | Class XII pass | NIL |

Learning objectives

The Learning Objectives of this course are as follows:

- Critically evaluate five mega trends involving climate, development, ecology, economy, and technology and their linkages with energy and resources
- Inculcate principles and methods of circular economy and design resource-efficient, low carbon paradigm.
- Analyze business models/institutes/communities and associated processes and services and develop recommendations for integrating principles of circular economy
- Adopt routes of circular economy in personal, family, community, and institutional settings.

Learning outcomes

After the course, the students will be

- Equipped with tools and techniques of circular economy to develop a sustainable institute or community
- Acting as a consultant to industries and international organizations aiming for a circular economy
- Serving as a catalyst in evolving an ecoliterate society and industry and promoting sustainable policies

SYLLABUS OF GE-1

Theory (02 Credits: 30 lectures)

UNIT – I Circular economy (3 Hours)

Concept and definitions; Closed loop ecosystems; Systems thinking; Benefits to environment, economy and society (03 lecture)

UNIT – II Principles of circular economy (4 Hours)

Sustainable procurement; Ecodesign; Industrial and territorial ecology; Economics of functionality; Responsible consumption; Extending the duration of use; Recycling (04 lecture)

UNIT – III Steps for transition towards a circular economy (7 Hours)

Large-scale transition to non-polluting sources of energy; Durable products requiring less materials and energy; Incentivization of recycling, re-use, and repair; Replacement of hazardous materials with safer alternatives (07 lecture)

UNIT – IV Circular economy implementation (7 Hours)

Micro-level: Firm-level engineering and managerial level; Meso-level: Industrial ecology, Industrial symbiosis, Eco-clusters, Eco-industrial parks; and Macro level: General policies, Plans, Green and sustainable entrepreneurship. (07 lecture)

UNIT –V Challenges in implementing circular economy (7 Hours)

Achievability and desirability; Disrupting consumer's convenience; Local regulations versus the circular economy concept; Lack of infrastructure for waste treatment; Lack of recycling technology; Poor business model plan (07 lecture)

UNIT –VI Case studies from India and other parts of the world (2 Hours)

Practicals/Hands-on Exercises – based on theory (60 hours)

1. Evaluate the status of your institute with respect to efforts on circular economy using qualitative and quantitative surveys
2. Survey your institute and depict the journey of waste in your institute highlighting the factors/actors that are barrier to and facilitator of complete waste recycling
3. Collect spatial and temporal data on types of wastes being generated and identify the recycling hotspots and the gap in adopting circular economy principles
4. Based on activities 1 – 3, develop a consolidated waste recycling plan highlighting targets for Institute and each Department
5. Recycle and reuse the waste clothes produced at home and make a presentation in the class to increase their lifecycle and estimate its impact on ecological footprint of the family/institute
6. Coordinate with different groups working on waste recycling focusing on different types of wastes segregated at home/institute, for example, plastics/ glass/furniture/ metal/cans/paper waste and present as group activity
7. Visit an industrial area to analyse the status of circular economy concepts being practiced and give recommendations to improve the industrial sustainability (submit the report)
8. Conduction workshop in the Institute to educate students of other courses for converting wastes into useful products
9. Run a repair café where students and staff bring their broken stuff and get it repaired with the help of experts available at the Institute
10. Conduct a swap shop and swap party where people bring their old clothes for exchange
11. Estimate the impact of activities 8–10 reduction in ecological footprints
12. Conduct a drive to collect e-waste from the institute and the neighbourhood localities and donate it to the recycling facilities and estimate its impact on environment.
13. Based on the activities 1–12, plan and conduct awareness camps in the neighbourhood to educate and motivate people about importance of reuse and recycling and empower them with recycling methods

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Credit distribution, Eligibility and Pre-requisites of the Course

GENERIC ELECTIVES (GE-EVS-6): WETLANDS FOR INDUSTRIES AND ENVIRONMENT

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| WETLANDS FOR INDUSTRIES AND ENVIRONMENT | 4 | 2 | 0 | 2 | Class XII pass | NIL |

Learning objectives

The Learning Objectives of this course are as follows:

- Delineate, and classify the target wetland
- Identify common wetland plants and indicators of wetlands
- Assess landscape for wetland management and conservation
- Evolve a wetland construction and restoration plan
- Suggest appropriate changes for effective wetland regulation law and policy

Learning outcomes

After successful completion of this course, students will be able to:

- Apply basic principles of wastewater treatment for environmental and industrial applications
- Develop plans for monitoring wetland health and designing a constructed wetland
- Assess the feasibility of constructed wetlands for wastewater treatment
- Operate and maintain wetlands in nature and industries

SYLLABUS OF GE-EVS-6

Theory (02 Credits: 30 lectures)

UNIT – I Ecology and socio-economy of wetlands (11 Hours)

Wetland types and functions; Ramsar Convention, Vegetation type and dynamics; Soil types; Geology and geomorphology; Hydrological regimes: Water quality and balance, Sedimentation; Indicators; Biodiversity and its significance; Ecological and economic benefits: Provisioning, Regulating, Cultural and Supporting services, Socio-economic and cultural diversity in human society living in and around wetlands; Income and employment generation by wetlands; Community resource use and management practices. (11 lectures)

UNIT – II Wetlands and water treatments (8 Hours)

Principles and efficacy of natural wetlands; Economics of treatment; Case studies from India and other countries; Types of constructed wetlands and their principles; Potential of constructed wetlands for treating different types of wastewaters (agriculture, domestic,

industry, municipal, runoff, and sludge); Operation and maintenance; Case studies from India and other countries (8 lectures)

UNIT – III Wetland management (11 Hours)

Delineation and mapping; Features and associated factors; Monitoring ecosystem health; Major threats; Setting up goals and objectives; Institutional arrangements, Wetlands ecosystem services maps; Ecosystem services trade-offs; Landscape-scale Management; Interventions to sustain biodiversity and ecosystem services; Mobilizing community participation and generating finance; Cross-sectoral integration; Integration of wetland conservation in development plans, acts, and rules; Adaptive management. (11 lectures)

Practicals/Hands-on Exercises – based on theory (02 Credits: 60 hours)

1. Identify a potential area for wetland construction, propose its purpose and goal, and develop the construction plan giving details of location, type, current land use, biodiversity, and hydrologic regime
1. Prepare water budgets and hydrographs of the selected area based on the data on water inputs and outputs collected from concerned institutes
2. Field surveys and analyze vegetation characteristics of a pristine wetland present in the nearby location of the study site
3. Analyze adaptive strategies of selected native plants to hydrologic regime suitable for wetland construction and develop planting strategies of species assemblage
4. Analyze soil type and determine its physico-chemical properties (pH, TDS, EC, CEC, Redox potential, etc.)
5. Evolve soil amendment method to improve texture, percolation, and nutrient composition. suitable for the hydrogeomorphic model and selected plant species
6. Surveying wetlands to identify suitable indicators for mapping and delineating wetlands zone of influence and evaluate anthropogenic activities as major threats to wetlands
7. Develop wetlands ecosystem services (ES) potential maps and evaluate ES trade-offs
8. Analyze different models for wetland construction and, based on the nature of the water regime and basic methods of wetland construction, recommend the hydrogeomorphic model suitable for the selected landscape

Essential/recommended readings

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-EVS-7): CORPORATE, SOCIAL, AND ENVIRONMENTAL RESPONSIBILITIES FOR CONSERVATION AND SUSTAINABLE DEVELOPMENT

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| CORPORATE, SOCIAL, AND ENVIRONMENTAL RESPONSIBILITIES FOR CONSERVATION AND SUSTAINABLE DEVELOPMENT | 4 | 2 | 0 | 2 | Class XII pass | NIL |

Learning objectives

The Learning Objectives of this course are as follows:

- Inculcate interdependent and interrelated theories of corporate branding, environmental sustainability, and social equity
- Understand the working and driving forces of CSR and its significance as a stepping stone to Sustainable Business Models
- Gain insights into CSR as a tool to ensure social justice and adopt environmental wisdom from industries
- Empower with emerging frameworks and practices in CSR for environmental sustainability and improve quality of life

Learning outcomes

After the course, students will be able to:

- Explain the concept of CSR from an environmental sustainability perspective and its significance in next-generation marketing strategies
- Apply concepts of CSR to develop strategies for responsible marketing, business success, and environmental protection.
- Develop systems thinking and evolve as a responsible consumer
- Decipher linkages between concepts of circular economy, sharing economy, and carbon/ecological footprints, and identify opportunities and challenges to specific businesses and target consumers.
- Gain insights into five dimensions of sustainability performance: economic, environmental, governance, social and ethical
- Practice sustainability management, implement cleaner technologies, and argue in favour of environmental protection.

SYLLABUS OF GE-EVS-7

Theory (02 Credits: 30 lectures)

UNIT – I Sustainable Development (8 Hours)

Definitions, goals and frameworks; Sustainability: Definition and concept, Bottom of the pyramid and fairtrade; Evolution of concepts, Socio-ethical and environmental aspects, Benefits in strategic planning; Associated world's leaders and corporations, Financial, social and reputational benefits, Circular and share economy (8 lectures)

UNIT – II Corporate social responsibility (CSR) (6 Hours)

CSR: Definition and concept, Philosophy and practices of CSR; Measuring CSR; Impact of CSR on rural livelihoods, natural resources management, biodiversity conservation; Carbon footprint; Cleaner technologies; Emerging CSR policies in India

UNIT – III CSR and Sustainability (9 Hours)

Why and when to apply CSR activities, Competitiveness vs Ethical, Green markets and budget, Bottlenecks of being sustainable, Public-private partnerships for socio-ecological entrepreneurship, Vocal for local embedding sustainability; Business strategies for sustainable individuals, firms, and industries, Power-Inequality-Environment-CSR nexus, Managing, Monitoring, and Reporting CSR, Beyond framing CSR as strategic, political or utopian (9 lectures)

UNIT – IV Case studies (7 Hours)

CSR applications for improving livelihoods, enhancing soil health and crop productivity in stress environment, adaptation to climate change, and diversification of crop patterns improving rural wastewater management (7 lectures)

Practicals/Hands-on Exercises – based on theory (02 Credits: 60 hours)

1. Analyze variations in CSR efforts in saving the environment by countries differing in biodiversity and ecosystem diversity
2. Critically analyze OECD Guidelines for Multinational Enterprises on corporate responsibility
3. Select a company/business organization and, based on its activities and products, identify the environmental issues that need to be addressed for societal need
4. Evaluate diverse environmental issues based on their impact on society and organizational brand value and develop its vision document and a CSR plan for environmental conservation
5. Determine priorities and evolve a code of conduct document for the selected company to maximize its CSR for environmental issues
6. Based on the activities of the target business organization, develop an action plan and policies to suit the international guidelines and standards of CSR for environmental conservation

7. Identify the constraints to implement the guidelines and standards set based on dialogue with different stakeholders and surveying the local circumstances
8. Analyze the variations in guidelines and standards to meet the CSR in countries differing in biodiversity and cultural values
9. Identify the environmental indicators to formulate a monitoring and reporting system for CSR success
10. Evolve the appropriate communication style for different internal and external stakeholders
11. Field surveys and lab-based assays for monitoring the targeted ecosystem, biodiversity, environmental compartment, and socio-ecological systems for the impact of CSR

Essential/recommended readings

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-EVS-8): E-WASTES: LEGISLATION, TRADE AND MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| E-WASTES: LEGISLATION, TRADE AND MANAGEMENT | 4 | 2 | 0 | 2 | Class XII pass | NIL |

Learning objectives

The Learning Objectives of this course are as follows:

- Define and explain e-waste and its category
- Learn effective mechanisms to regulate the generation, collection, storage, transport, import, and export,
- Empower with methods of recycling, treatment, and disposal of e-waste
- Current legislative rules for managing e-waste in the environment

Learning outcomes:

After the course, students will be able to

- Apply various concepts for e-waste management hierarchy with a holistic understanding of the environmental impacts of e-waste
- Decipher the roles of the various national and internal acts and laws applicable for e-waste management
- Evolve plans for handling e-waste to comply with its management proposed under national and global legislation
- Develop a holistic understanding of environmental impacts of e-waste, application of

SYLLABUS OF GE-EVS-8

Theory (02 Credits: 30 lectures)

UNIT – I E-waste Composition, Generation and Management (8 Hours)

Definition, Composition and generation, Global and national perspective, Co-pollutants, Hazardous properties, Effects on human health and environment, Domestic e-waste disposal, E-waste Management: Basic principles, Components, Resource recovery potential, Technologies for recovery of resources, Steps in recycling and recovery of materials-mechanical processing, Occupational and environmental health effects (8 Lectures)

UNIT – II Global trade of E-waste (7 Hours)

Factors in global waste trade economy, Waste trading and electronic recycling, Free trade agreements as a means of waste trading. Import of hazardous e-waste in India; India's stand on

liberalizing import rules, E-waste economy in the organized and unorganized sector, Production and recycling of e-wastes in Indian metro cities.

UNIT – III Control measures (7 Hours)

Need for stringent health safeguards and environmental protection laws in India, Extended Producers Responsibility (EPR), Import of e-waste permissions, Producer-Public-Government cooperation, Administrative Controls & Engineering controls, monitoring of compliance of Rules, Effective regulatory mechanism strengthened by manpower and technical expertise, Reduction of waste at source.

UNIT – IV Relevant legislation (8 Hours)

Hazardous Waste Rules, 2008, E-waste (Management and Handling) Rules, 2011; and E-Waste (Management) Rules, 2016 - Salient Features and its likely implication. Government assistance for TSDFs. The international legislation: The Basel Convention; The Bamako Convention. The Rotterdam Convention. Waste Electrical and Electronic Equipment (WEEE) Directive in the European Union, Restrictions of Hazardous Substances (RoHS) Directive. (8 Lectures)

Practicals/Hands-on Exercises – based on theory (02 Credits: 60 hours)

1. Prepare inventory and estimate the magnitude of electrical and electronic waste from the home, college, or the selected site (hospitals/company/manufacturing facilities) (example, air conditioners, heaters, microwaves, batteries, digital cameras, calculators, circuit boards, monitors, VCRs/DVD players, telephone equipment, etc.)
2. Categorize e-waste into different types as per international and national guidelines
3. Prepare a list of certified electronics recyclers in your city and transport e-waste to it, and have an interactive session to learn from the processes being followed.
4. Find out the composition of e-waste and segregate it from the given materials. Recommend the internationally acceptable shredding processes for each type of e-waste.
5. Prepare a poster showing salient features of the e-waste management act of India
6. Sort electronics and prepare a list of valuables that can be extracted from electronics, such as fluorescent light and toner cartridges (metals, plastics, glass, compounds, and other elements). Identify and remove e-waste that may carry hazardous materials (like cathode ray tubes) before sending the objects for recycling.
7. Visit a nearby e-waste handling facility and learn about the dismantling of e-waste and the handling process
8. Discuss with students in groups the plausible ways and implementation of e-waste reduction at the source and how regulatory mechanisms can be utilized in the management of e-waste in educational institutions.
9. Evaluate the status of e-waste handling at your institution. Suggest potential solutions as per the existing norms of E-Waste (Management) Rules, 2016 and beyond.
10. Decipher the methods of dust extractions, magnetic and water separation, purification, and preparation for sale. Identify the material that can be repurposed.
11. Study the evolutionary history of e-waste management rules and their implementation- Hazardous Waste Rules, 2008; E-waste (Management and Handling) Rules, 2011; and E-Waste (Management) Rules, 2016
12. Compare and analyze international laws on e-waste management- the international legislations: The Basel Convention; The Bamako Convention; The Rotterdam

- Convention; Waste Electrical and Electronic Equipment (WEEE) Directive in the European Union; Restrictions of Hazardous Substances (RoHS) Directive
13. Develop an understanding and itinerary of the process for procuring e-waste import permissions and inventory of the e-waste disposal mechanisms.

Essential/recommended readings

- Hester, R.E. and Harrison, R.M., 2009. Electronic Waste Management: Design. Analysis and Application. Royal Society of Chemistry Publishing. Cambridge, UK.
- Fowler, B.A., 2017. Electronic Waste: Toxicology and Public Health Issues. Academic Press.
- Eduljee, G.H. and Harrison, R.M. eds., 2019. Electronic Waste Management. Royal Society of Chemistry.

Suggested readings

- Janyasuthiwong, S., 2020. Metal Removal and Recovery from Mining Wastewater and E-waste Leachate. CRC Press.
- Gaidajis, G., Angelakoglou, K. and Aktsoglou, D., 2010. E-waste: environmental problems and current management. Journal of Engineering Science and Technology Review, 3(1), pp.193-199.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DEPARTMENT OF HOME SCIENCE

Category I

B.Sc. (Hons.) Home Science

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE

DISCIPLINE SPECIFIC CORE COURSE – 4 (DSC HS 204): FASHION STUDIES

COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| FASHION STUDIES DSC HS 204 | 4 | 3 | 0 | 1 | 12th Pass | NIL |

Learning Objectives

1. To understand the basics of fashion and the fashion industry.
2. To impart knowledge about functions and theories of clothing.
3. To develop sensitivity towards selection of garments and garment design.

Learning Outcomes

The student will be able to:

1. Identify the role and functions of clothing and recognize the factors affecting the selection and evaluation of clothing.
2. Explain the concept of fashion, its terminology, sources and factors affecting it.
3. Being aware of global fashion centres.
4. Apply the knowledge of elements and principles in design interpretation.

SYLLABUS OF DSC-4

Unit I: Clothes and us

(12 Hours)

This unit introduces the student to key concepts of how and why people started to wear clothes, and what factors are at play in the current times for selecting clothing for the individual.

- Clothing functions and theories of origin
- Clothing terminology
- Individuality and conformity, conspicuous consumption and emulation
- Body shapes
- Selection and Evaluation of quality of ready-made garments
- Selection of clothes for self

**Unit II: Understanding fashion
Hours)**

(12

This unit will deal with the basic concepts in understanding fashion, from key terms to the why and how of fashion and more contemporary knowledge of fast and slow fashions.

- Fashion cycle
- Terminology
- Theories of fashion adoption
- Sources of fashion research
- Factors favoring and retarding fashion
- Role of a Designer
- Fast Fashion: Characteristics of Fast Fashion, Fast Fashion and Consumer
- Slow Fashion: Characteristics, Slow Fashion as a process, importance of changing from fast to slow fashion

Unit III: Design in Garments**(09 Hours)**

This unit orients the student from a design perspective in garments; the various elements that comprise a garment and the various principles that govern and guide in developing a good design.

- Structural and Decorative Design
- Elements of Design
- Principles of Design

Unit IV: Fashion**(12 Hours)**

This unit will apprise the student on the forecasting process for fashions, functioning of the industry and various garment categories for production.

- Structure and Functioning of Fashion Industry
- Forecasting: Fashion seasons
- Garment Categories
- Fashion Centers
- Careers in Fashion

ESSENTIAL READINGS

- Brown, Patty, Rice J., 1998, *Ready to Wear Apparel Analysis*. Prentice Hall.
- Marshall S G, Jackson H O, Stanley MS, Kefgen M & Specht T, 2009, *Individuality in Clothing & Personal Appearance*, 6th Edition, Pearson Education, USA.
- Tate S.L., Edwards M.S., 1982, *The Complete Book of Fashion Design*, Harper and Row Publications, New York.
- Fringes G.S., 1994, *Fashion From Concept to Consumer*, 6th edition, Prentice Hall, New Jersey.

SUGGESTED READINGS:

- R. Andrew, 2018, *Key Concepts for Fashion Industry*, Bloomsbury Publishing, India

PRACTICAL **(30 Hours)**

Unit I: Hand stitches (14 Hours)

This unit will impart hands-on skill for making small products using upcycling of used articles of clothing or home textiles and how value addition may be achieved in garments by using popular embroidery stitches.

- Prepare samples of –
 - Basic hand stitches for creating a seam and edge finishing.
 - Decorative Hand Stitches
- Develop an upcycled product

Unit II: Elements & Principles of Design (16 Hours)

This unit will train the students to identify the various elements of a design that a garment uses and the principles that are creating an aesthetic design. Eventually a student will be able to effectively use these elements and principles of design to create well designed garments.

- Create a collection of garments for analysis from print and visual media.
- Analyze the various elements that comprise the garments.
Identify the various principles of design used in the selected garments

Essential Readings

- Fringes G.S., 1994, *Fashion From Concept to Consumer*, 6th edition, Prentice Hall, New Jersey.
- Marshall S G, Jackson H O, Stanley MS, Kefgen M & Specht T, 2009, *Individuality in Clothing & Personal Appearance*, 6th Edition, Pearson Education, USA.

Suggested Readings:

- Reader's Digest (Eds.). 2002, *New Complete Guide to Sewing*, (Canada) Ltd. Montreal.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5 (DSC HS 205): FUNDAMENTALS OF RESOURCE MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| FUNDAMENTALS OF RESOURCE MANAGEMENT DSC HS 205 | 4 | 3 | 0 | 1 | 12th Pass | NIL |

Learning Objectives

1. To enable students to understand the fundamentals of resource management in changing scenario and available resources, their uses and conservation.
2. To understand the processes of management in a scientific manner for the judicious use of resources.

Learning Outcomes

Students will be able to:

1. Comprehend the fundamentals of resource management in the changing scenario.
2. Familiarize with the available resources, their uses and conservation.
3. Utilize resources optimally in a prudent manner.
4. Understand the processes of management in a scientific manner for the use of resources.

THEORY

Unit I: Introduction to management

(12 Hours)

Unit Description: The focus of this unit would be on understanding the concept of management, scope and approaches of management in context to changing scenario.

Subtopics:

- Concept, nature, universality and scope of management
- Theories and Approaches to management.
- Ethics in management
- Motivation in management

UNIT II: Understanding resources**(09 Hours)**

Unit Description: This unit attempts to acquaint the students with the available resources, their uses and conservation approaches.

Subtopics:

- Meaning, classification and characteristics of resources.
- Resource conservation- maximizing use of resources, factors affecting utilization of resources.
- Family life cycle in context to resource use: Time, energy, money.

Unit III: Functions of management: An overview**(12 Hours)**

Unit Description: This unit will orient the students in understanding the functions and processes of management in a scientific manner for the optimization of resources.

- Decision Making: Concept, significance and steps involved in decision-making process.
- Planning: Nature and characteristics, classification of plans & steps in planning.
- Organizing: Concept, significance and steps involved in organizing process.
- Supervision: Types of supervision (directing & guiding), factors of effective supervision.
- Controlling: Types of control, steps in controlling, requirements of effective control.
- Evaluation: Types and steps of evaluation.

Unit IV: Management of time and energy resources**(12 Hours)**

This unit will familiarize students with effective management of time and energy resources and their functional use in day-to-day life.

- Time Management: Concept, tools of time management, types of time plans, steps in making a time plan.
- Energy Management: Concept, principles of body mechanics, types of fatigue.
- Work Simplification: Techniques, Classes of Change.

PRACTICAL -30 Hours**Unit I: Identification and Development of managerial competencies****(14 Hours)**

Activities:

- Micro Lab and Who am I
- SWOC analysis
 - Self
 - Case studies: Individuals
 - Case studies: Organizations
- Building Decision making abilities
- Team building management games
- Decision Making: Case Analysis

Unit II: Management of Time and Energy**(16 Hours)**

Activities:

- Time Management:
 - Evaluation of time plans through case analysis:
 - Case Study-1
 - Case Study-2
 - Analysis of time use pattern of self
 - Preparation and evaluation of time plans
- Work improvement using time and motion study techniques
 - pathway chart or travel chart / process chart - observe, record, and analyze an activity.
 - pathway chart or travel chart / process chart - observe, record, and analyze an activity with improvement.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 6 (DSC HS 206): LIFE SCIENCE FOR HOME SCIENCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|------------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| LIFE SCIENCE FOR HOME SCIENCE DSC HS 206 | 4 | 2 | 0 | 2 | 12th Pass | NIL |

Learning Objectives

- To impart the basic knowledge of animal diversity, plant diversity and its significance for human life.
- To make students aware of the fundamental process of plant growth and its regulation.
- To enable students to learn about methods of sustainable agriculture, plant conservation and propagation.
- To make students aware of immunology, genetics and biotechnology.

Learning Outcomes

- The students would be able to identify and appreciate some common plant and animal diversity in their vicinity.
- The students would understand the fundamentals of genetics and its significance in human life.
- The students would gain hands-on experience and training on gardening and plant propagation techniques along with the artificial methods of vegetative propagation.
- The students would acquire the basic knowledge of biotechnology along with recent trends and its applications in agriculture, animal husbandry and human welfare and associated ethical and social issues.
- The students would acquire knowledge about various zoonotic diseases, pandemics and learn about its control and management.
- The students would understand the importance prenatal screening and natal health.

THEORY

Section A – Botany

Unit I: Introduction to Plant Kingdom

(08 Hours)

Plant kingdom, plant growth and regulation, Economically Important Plants

- Introduction to Plant Diversity
- Economic importance of Microbes (Industrial & Household Products, Sewage treatment, Biogas production, Biocontrol agents, Bio-fertilizers)
- Angiosperm plants: Morphology (Parts of plants with modifications and Life cycle)
- Plant Nutrition and Soil: Essential Elements and Functions, Nutrient cycles, Human Impact on nutrient cycles and effects of pollution
- Plant growth and Development- Regulation and control (Hormones)
- Enzymes: principles and biotechnological applications
- Introduction to Economically important plants: Food Crops, Fibre Crops, Medicinal Plants, Oil Crops, Timber Plants

Unit II: Propagation, Gardening and Conservation of Plants

(06 Hours)

Plant propagation methods, Sustainable Agriculture, Biotechnology in Agriculture

- Seed Propagation
- Vegetative Propagation: Cuttings – stem leaf and root, Layering, Grafting, Tissue Culture
- Gardening: Concept and Types with example of Kitchen Garden, Green Roofs, Maintenance of plants
- Sustainable Agriculture: Concept of Organic farming, IPM, Biopesticides, Climate smart agriculture, Seed bank, Urban Agriculture
- Concept of Sustainable development with Sustainability Indicators
- Role of Plants in Air Pollution Control
- Principles and Applications of biotechnology in agricultural crops

Section B – Zoology

Unit III: Animal Diversity and Human Needs

(08 Hours)

Animal diversity and its importance to humans

- Types, Structure and Function of Animal Cell and its components (Chromosomes and Nucleus)
- Animal diversity and its distribution
- Animals and their ecosystem services: role of animals in soil health, pollination, biological control of pests, food security
- Threatened species of animals and their conservation
- Zoonotic and Parasitic diseases- Life cycle, pathogenesis and control. (*Plasmodium*, *Giardia*, *Entamoeba*, *Taenia*, *Ascaris*, *Covid-19*, *malaria*, *tuberculosis*)
- Animals as economic resources: sericulture, apiculture, aquaponics (concept and applications)

Unit IV: Immunity, Genetics and Biotechnology

(08 Hours)

Basics of human immunity, Pandemics, genetic diseases, application of biotechnology, developmental biology

- Basics of Human Immunity: introduction to humoral and cell mediated immunity; Vaccination
- Introduction to Pandemics and its management
- Genetic diseases and importance of Genetic counselling
- Birth defects and its causes (genetic and environmental factors)
- Application of biotechnology: Stem cells, cloning and animal improvements

PRACTICAL – 60 Hours

SECTION A- BOTANY

1. Preparation of soil mixture, potting and re-potting
2. Raising of healthy seedlings in a nursery bed
3. Assessment of soil quality: determination of soil pH, test for nitrates, nitrites
4. Propagation of plants through stem cutting, air layering and underground layering
5. Propagation of plants by approach grafting and veneer grafting
6. Identification and classification of economically important Food crops, Medicinal plants
7. Identification and classification of economically important plants: Fibre crops, Timber plants and Oil crops
8. Identification, Care and maintenance of important plants in controlling air pollution
9. A visit to Home Garden/ Organic farm/ Tissue culture Lab
10. Demonstration of Urban Home Gardens/ Kitchen Garden / Nutrition Garden
11. Study of techniques of biotechnology through audio visual aids

SECTION B- ZOOLOGY

1. Study of cell Structure through temporary slides: Blood Cells
2. Study of cell Structure through temporary slides: Neurons
3. Study of cell cycle stages through permanent slides: Mitosis
4. Study of cell cycle stages through permanent slides: Meiosis
5. Identification of few common animals and birds in the human environment
6. Estimation of species richness and abundance of animal/ birds in the human environment using point count method
7. Estimation of species richness and abundance of animal/ birds in the human environment using transect method
8. Soil biomonitoring using Burlese-Tullgren method: concept and importance of micro and macrofauna in soil health
9. Detection of chromosomal abnormalities: concepts and interpretation of diagnostic tests: Karyotyping
10. Detection of chromosomal abnormalities: concepts and interpretation of diagnostic tests: Dual marker test
11. Visit to any one of the following: Aquaponic facility/organic farm/ bee farm
12. Case study of a zoonotic/ parasitic disease: COVID-19 pandemics/ bird flu

Essential Readings

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Category-II
B.Sc (Prog.) Home Science

DISCIPLINE SPECIFIC CORE COURSE – 1 (DSC HP 204) –: Lifespan Development I: Prenatal and Early Years

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Lifespan Development I: Prenatal and Early Years | 4 | 3 | 0 | 1 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To acquire an understanding of lifespan development as a discipline
- To appreciate the role of heredity, context, family and community in Lifespan development
- To understand developmental progression across stages and domains of the lifespan

Learning outcomes

The Learning Outcomes of this course are as follows:

- The student will develop an understanding about the discipline of Lifespan development
- The student will appreciate principles of growth and development
- The student will understand the concept of stages and domains in lifespan development
- The student will become aware of optimal practices in child rearing and child stimulation

SYLLABUS OF DSC HP 204

Unit I: Understanding Lifespan Approaches and Perspectives – 09 Hours

The unit provides a foundational view on Life Span development.

Subtopics:

- Definitions, nature, scope and multidisciplinary nature of Lifespan Development
- Developmental stages and domains
- Principles of growth and development
- Optimizing development in early years

Unit II: Pregnancy, Birth and the Neonate – 12 Hours

The unit focuses on pregnancy and safe motherhood, understanding prenatal development and birthing techniques and the newborn.

Subtopics:

- Stages of prenatal development
- Influences on prenatal development and safe motherhood
- Birthing process and the high-risk newborns
- Newborn capacities and care

Unit III: Development during Infancy – 12 Hours

Understanding the period of infancy through the framework of developmental domains

Subtopics:

- Developmental Norms and Milestones
- Physical- motor development
- Sensory Perceptual development
- Cognitive development
- Language development
- Social development

Unit IV: Development during Preschool – 12 Hours

Understanding the domains of language, cognitive and socio-emotional development preschool period. Interlinkages between developmental domains for strong foundations.

Subtopics:

- Developmental Norms and Milestones during preschool
- Physical and motor development
- Language development
- Cognitive development
- Social and emotional development: Family, Play and Learning

PRACTICAL -30 Hours

- Introduction to research methods in Lifespan development
- Documentation of methods: Interview, Observation and Narrative
- Prepare interviews to explore cultural practices and conceptions related to pregnancy, infancy and early childhood
- Conduct early childhood observations using specimen description and checklist in *any two* domains of development
- Using audio and video resources to study prenatal development, infancy and early childhood
- Preparation of activities and learning aids for parents using locally available materials
- Mapping resources in children's ecology by community survey
- Psychological tests- Developmental assessment of Indian children, WPPSI

Essential Readings

- Berk, L. (2013). Child development. 9th ed. Boston: Pearson.
- Rice, F. P. (1998). Human Development: A Life-span Approach. New Jersey: Prentice Hall.
- Santrock, J. W. (2011). Life-span development. New York: McGraw-Hill.
- Singh, A. (Ed.) 2015. Foundations of Human Development. New Delhi: Tata McGraw-Hill.
- Snow, C. W., & McGaha, C. G. (2003). Infant development (3rd ed.). Upper Saddle River, NJ: Prentice Hall.

Suggested Readings

- Childhood in south Asia: A critical look at issues, policies and programmes. Conn.USA:Information Age.
- Hospital walls. In T.S. Saraswathi (Ed.). Culture, socialization and human development. New Delhi: Sage.
- Singhi, P. (1999). Child health & well-being: Psychological care within & beyond
- Sriram, R. (2004). Ensuring infant and maternal health in India. In J. Pattnaik (Ed.).
- Verma, P, Srivastava, D.N. and Singh, A. (1996). *Bal manovigyan and bal vikas*. Agra: Chapter 3: Indian women: Traditional and modern: pages 52-70.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Foundation of Food Science and Nutrition | 4 | 3 | 0 | 1 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand functions of food and the relationship between food, nutrition and health.
- To describe the functions of various nutrients, their sources and clinical manifestations of excess/ deficiency of nutrients.
- To learn about various methods of cooking and to understand the selection, nutritional contribution of and effect of cooking on different food groups.
- To describe ways of reducing nutrient losses during cooking.
- To be able to prepare dishes using principles of food science.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Comprehend the relationship between food, nutrition and health.
- Understand the selection, nutritional contribution and changes during cooking of the commonly consumed foods.
- Understand the importance of various nutrients and their dietary sources.
- Develop understanding about the methods of preparing food with better nutrient retention and improving quality of diets.

SYLLABUS OF DSC HP 205**Unit I: Basic Concepts in Food and Nutrition -12 Hours**

Basic terminology used in the sciences of food and nutrition and understanding the relationship between what we eat and health.

Subtopics

- Basic terms used in study of food and nutrition
- Understanding relationship between food, nutrition and health

- Functions of food-Physiological, psychological and social

Unit II: Nutrients -12 Hours

Functions, dietary sources and clinical manifestations of deficiency/ excess of the nutrients

Subtopics

- Energy, carbohydrates, lipids and proteins
- Fat soluble vitamins
- Water soluble vitamins
- Minerals

Unit III: Food Groups – 12 Hours

Selection, nutritional contribution and changes during cooking of various food groups.

Subtopics

- Cereals and pulses
- Fruits and vegetables
- Milk & milk products
- Eggs
- Meat, poultry and fish
- Fats and oils

Unit IV: Methods of Cooking and Preventing Nutrient Losses- 09 Hours

Different methods of cooking and how nutrients can be retained

Subtopics

- Dry, moist, frying and microwave cooking
- Advantages, disadvantages and the effect of various methods of cooking on nutrients
- Minimize nutrient losses

Practical -30 Hours

- Weights and measures; preparing market order and table setting
 - Food preparation, understanding the principles involved, nutritional quality and portion size
- Cereals: Boiled rice, pulao, chapati, paratha-plain/stuffed, poori, pastas
 - Pulses: Whole, dehusked, pulse curry
 - Vegetables: Dry preparation, vegetable curry
 - Milk preparations: Kheer, porridge, custard
 - Egg preparations: Boiled, poached, fried, scrambled, omelettes, egg pudding
 - Soups: Plain and cream soups
 - Baked products: cakes, biscuits/cookies
 - Snacks and Breakfast Cereals: pakoras, cutlets, samosas, cheela, upma/poha, sandwiches
 - Salads: salads and salad dressings

Essential Readings

1. Chadha R and Mathur P (eds)(2015). Nutrition: A Lifecycle Approach. Hyderabad: Orient Blackswan.
2. Khanna K, Gupta S, Seth R, Mahna R, Rekhi T (2004). The Art and Science of Cooking: A Practical Manual, Revised Edition. New Delhi: Elite Publishing House Pvt Ltd.
3. Raina U, Kashyap S, Narula V, Thomas S, Suvira, Vir S, Chopra S (2010). Basic Food Preparation: A Complete Manual, Fourth Edition. Hyderabad: Orient Black Swan.
4. Rekhi T and Yadav H (2014). Fundamentals of Food and Nutrition. New Delhi: Elite Publishing House Pvt Ltd.
5. Srilakshmi B (2014). Food Science, 6th Edition. Delhi: New Age International Ltd.

Suggested Readings

1. Bamji MS, Krishnaswamy K, Brahman GNV (2016). Textbook of Human Nutrition, 4th edition. New Delhi: Oxford and IBH Publishing Co. Pvt. Ltd.
2. Byrd-Bredbenner C, Moe G, Beshgetoor D, Berning J. (2013). Wardlaw's Perspectives in Nutrition, International Edition, 9th edition, New York: McGraw- Hill.
3. Sethi P, Lakra P. Aahar Vigyan, Poshan evam Suraksha (Hindi); First Ed; 2015; Delhi: Elite Publishing House (P) Ltd.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course(if any) |
|-------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fundamentals of Communication | 4 | 3 | 0 | 1 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To learn about the concept, nature, and scope of communication.
- To understand the process of communication with the help of theories, models, and elements of communication.
- To recognize and appreciate the role of Perception, Empathy, Persuasion, Culture and listening in communication.
- To be able to comprehend the various communication transactions and their role in day-to-day life with special reference to public communication.
- To understand the relationship between culture and communication and its applications in real life settings.

Learning outcomes

The Learning Outcomes of this course are as follows:

The students would be able to:

- Develop a clear understanding of the concepts of human communication.
- Comprehend the elements and models governing the process of effective communication.
- Gain understanding about the related concepts of communication such as Perception, Empathy, Persuasion and Listening
- Understand the various communication transactions as well as the qualities and skills required of an effective public speaker.
- Appreciate the role and application of factors for effective communication.

SYLLABUS OF DSC HP 206

Unit I: Communication: Core Concepts-12 Hours

The Unit explores the fundamentals of Human Communication tracing the history of communication from the olden times to the present times. It highlights the concept, nature, types, scope, and postulates of communication and discusses the functions performed through communication.

Subtopics:

- Historical background, concept, nature, functions, and scope of communication
- Types of Communication – Formal and informal communication; Verbal and Non-verbal communication; Digital and Non-digital communication
- Verbal communication- Principles, types, effective use of verbal messages for communication
- Non-verbal communication- functions, types, skills, channels of non-verbal communication, inter-relationship between culture and non-verbal skills
- Elements of communication - Source, Message, Channel, Receiver, Feedback, Context, Noise & Effects

Unit II: Communication Models and Theories- 09 Hours

The Unit emphasizes the models and theories of the communication process. The further delves on the importance of these models and theories for understanding the effectiveness of communication as a process.

Subtopics:

- Models of Communication: Types of models- Linear, Interaction and Transaction models, (Models by Aristotle, Harold Laswell, Shannon & Weaver, Charles Osgood, Wilbur Schramm, Helical model)
- Theories of Communication: Mass Society, Propaganda, Limited Effects, Individual Difference and Personal Influence

Unit III: Factors for Effective Communication – 12 Hours

The Unit delves with intricate concepts such as Empathy, Persuasion, Perception and Listening that are associated with communication. The unit also discusses the relationship between culture and communication.

- Factors for effective communication: Definitions, goals and principles of Empathy, Perception, and Persuasion
- Empathy: Concept and Theories
- Perception: Concept and Theories
- Listening in Human Communication-Listening process, significance of good listening, styles of listening, barriers to listening, culture and listening, listening theories
- Culture and communication- Relationship between culture and communication, signs, symbols and codes in communication

Unit IV: Communication Transactions and Learning – 12 Hours

The Unit III elucidates upon the various levels of communication transactions. This Unit in particular lays thrust on the Public communication and ‘need and importance’ of communication for learning. The unit also highlights the concept of communication for development.

Subtopics:

- Levels of communication transactions
- Public communication- Concept, types, techniques and skills in public speaking, qualities of an effective public speaker, overcoming speaker apprehension
- Communication, and Learning: Learning as Communication Process, Domains of Learning. Theories of learning
- Audio-Visual Aids in communication- definitions, functions, classification including Edgar Dale’s Cone of Experience
- Communication for Development- Concept and approaches

PRACTICAL – 30 Hours

- Exercises to understand visual communication: Elements of Art and Principles of Design
- Exercises to explore dimensions of non-verbal communication
- Hands on practice with different types of public speaking
- Exercises in effective listening skills
- Exercises on building empathy for effective communication
- Analysis and designing of IEC materials

ESSENTIAL READINGS

BSC. (HONS.) FOOD TECHNOLOGY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| PRINCIPLES OF FOOD PROCESSING | 4 | 3 | 0 | 1 | XII with PCM/PCB | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand freezer, dryer types and functioning
- To understand the material handling, separation processes and thermal processing

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand cold preservation, Freezer types and functioning
- Understand Dehydration, Dryer types and functioning
- Understand the material handling in food industry, conveyer types, separation processes by distillation, extraction, filtration
- Understand thermal processing and fundamentals of thermal process calculations

SYLLABUS OF DSC-04

Unit1: Cold Preservation and Freezers (12 Hours)

- Refrigeration and Freezing: requirements of refrigerated storage - controlled low temperature, air circulation and humidity, modified gas atmosphere. Changes in food during refrigerated and frozen storage, Refrigeration load, factors determining freezing rate: food composition and non-compositional.
- Freezing methods -direct and indirect, still air sharp freezer, blast freezer, fluidized freezer, plate freezer, spiral freezer and cryogenic freezing.

Unit2: Dehydration**(12 Hours)**

Changes in food during drying, drying methods and equipments air convection dryer, tray dryer, tunnel dryer, continuous belt dryer, fluidized bed dryer, spray dryer, drum dryer, vacuum dryer, freeze drying, foam mat drying.

Unit3: Thermal processing**(9 Hours)**

Principles of thermal processing, Thermal resistance of microorganisms, Thermal Death Time, Lethality concept, characterization of heat penetration data, Thermal process Calculations, Aseptic processing of food

Unit4: Material handling and Separation processes (12 Hours)

Elementary concept of material handling in food industry, equipment and functioning of belt conveyor, screw conveyor, bucket elevator and pneumatic conveyor.

Distillation principles and methods: steam, batch, continuous distillation with rectification and stripping.

Extraction : Hildebrandt, Bollman, SCF extraction Filtration : Plate and frame, pressure leaf, continuous rotary vacuum, batch and continuous filtration

Practical Exercises: 30 Hours

The learners are required to:

- Preservation of food by freezing
- Drying of food using Tray dryer/other dryers
- Preservation of food by canning (Fruit/Vegetable/meat)
- Cut-out analysis of canned food
- Osmotic dehydration
- Minimal Processing
- Perform distillation of any food sample/by product
- Processing of ready to eat frozen products
- Study of Thawing Characteristics of frozen food

Essential/recommended readings

- Potter, N.N. and Hotchkiss, J.H. (2007). Food Science 5th Ed. New York: Chapman & Hall
- Ramaswamy, H. and Marcott, M. (2006). Food Processing Principles and Applications. CRC Press.
- Rao, P.G. (2010). Fundamentals of Food Engineering. New Delhi: PHI Learning Pvt Ltd.
- Desrosier, N.W. and Desrosier, J.N. (1998). The Technology of Food Preservation. New Delhi: CBS Publication.
- Toledo, Romeo T. (2007). Fundamentals of Food Process Engineering. Aspen Publishers.

• **Note: Learners are advised to use the latest edition of readings.**

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DSC 05 : TECHNOLOGY OF FOOD PRESERVATION

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| TECHNOLOGY OF FOOD PRESERVATION | 4 | 3 | 0 | 1 | XII with PCM/PCB | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To learn science behind various preservation/processing technologies.
- Technological application of concepts on conventional Indian foods.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understanding of the concept of different processing and preservation technologies
- Appreciate significance of various preservation methods used in food industries.

SYLLABUS OF DSC-05

Unit1: Introduction to Technology of Food Preservation (6 Hours)

Introduction to historical evolution to food preservation techniques- Conventional to recent technologies Classification of foods based on pH, concept of shelf life, perishable foods, semi perishable foods, shelf stable foods.

Unit2: Food Preservation by Low temperature (14 Hours)

Introduction to refrigeration, chilling, freezing as a means of preservation, cold storage Principle of freezing, freezing curve, changes occurring during freezing, types of freezing i.e. slow freezing, quick freezing, Introduction to thawing, changes during thawing and its effect on food

Unit3: Food Preservation by Thermal Processing and Irradiation (10 Hours)

Introduction to Thermal Processing- Blanching, pasteurization, sterilization, commercial sterilization. Introduction, units of radiation, concept of cold sterilization, kinds of ionizing radiations, application in food industry.

Unit4: Food Preservation by Moisture control (15 Hours)

Introduction to Drying and Dehydration -Drying as a means of preservation, differences between sun drying and dehydration (i.e. mechanical drying), normal drying curve, heat and mass transfer, factors affecting rate of drying and its application in food industry. Introduction to Evaporation as a means of preservation – Definition, factors affecting evaporation, and its application in food industry.

Practical Exercises: 30 Hours

The learners are required to:

- To study methods of sampling.
- To study the concept of shelf life of different foods.
- To perform blanching of plant foods.
- To study the concept of sterilization
- To perform pasteurization of fluids- juices/ milk/ squashes etc using different methods.
- To determine the pH of different foods.
- To evaluate the quality characteristics of foods preserved by solar drying/ dehydration/ freezing.

Essential/recommended readings

- Potter, N. N., & Hotchkiss, J. H. (2012). Food Science. Springer Science & Business Media.
- Fellows, P. J. (2009). Food Processing Technology: Principles and Practice. Elsevier.
- Bawa. A.S., Chauhan, O.P, Raju. P.S. (2013) ed. Food Science. New India Publishing agency.
- Stewart, G.F., & Amerine, M.A. (2012). Introduction to Food Science and Technology. Elsevier, 2nd Edition.
- Rao, E.S. (2019) Fundamentals of Food Technology and Preservation, Variety Books, New Delhi.
- Frazier, W.C. & West Hoff, D.C. 2004. Food Microbiology. TMH Publication, New Delhi,.
- Rao, D.G. 2010. Fundamentals of Food Engineering, PHI Learning Pvt Ltd, New Delhi,

- **Note: Learners are advised to use the latest edition of readings.**

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DSC 06 : FRUITS, VEGETABLES & PLANTATION CROPS PROCESSING TECHNOLOGY
DSC 04 PRINCIPLES OF FOOD PROCESSING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| FRUITS, VEGETABLES & PLANTATION CROPS PROCESSING TECHNOLOGY | 4 | 3 | 0 | 1 | XII with PCM/PCB | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To impart knowledge of different methods of fruits and vegetables processing.
- To learn about processing of various spices, tea, coffee and cocoa.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the concept of quality of fruits and vegetables for developing good quality end products.
- Understand the processing and preservation of fruits and vegetables using various techniques.
- Understand processing of plantation crops.

SYLLABUS OF DSC-06

Unit1: Introduction to Fruits and Vegetables (6 Hours)

Importance of Fruits & Vegetables

History & need of preservation

Reasons of spoilage, method of preservation (Short & Long Term)

Post harvest physiological & biochemical changes in fruits & vegetables

Unit2: Canning & Dehydration

(11 Hours)

Process of canning, factors affecting the process- time and temperature

Containers of packing, lacquering, syrups and brines for canning.

Spoilage in canned foods.

Sun drying & mechanical dehydration

Process variation for fruits and vegetables packing and storage. Case hardening

Unit3: Fruits Beverages & Tomato Products

(13 Hours)

Introduction & Processing of fruit juices (selection, juice extraction, deaeration, straining, filtration and clarification)

Preservation of fruit juices (pasteurization, preservation with chemical, sugar & salt, freezing, drying, tetra-packing, carbonation)

Processing of squashes, cordials, nectars, concentrates and powder

Tomato Products : processing of tomato juice, tomato puree, paste, ketchup, sauce and soup

Unit4: Products preserved with class I & class II preservatives (7 Hours)

Processing & Technology of Jam, Jelly, Marmalade & Pickles (Essential constituents, Role of pectin), Theory of jelly formation, defects in jelly,

Marmalade - Types, defects.

Pickles-- Processing , Types, Causes of spoilage in pickling

Unit5: Technology of Plantation Crops (8 Hours)

Spices

Processing and properties of major and minor spices

Essential oils & oleoresins, adulteration Tea, Coffee and Cocoa

Processing, Variety and Products

Practical Exercises: 30 Hours

The learners are required to:

- Estimation of total soluble solids (TSS), pH, acidity of various products.
- Estimation of brix: acidity ratio of various products.
- Estimation of ascorbic acid and effect of heat treatment on it.
- To study the steps of can making process.
- Preparation & evaluation of pectin based product. (Jam)
- Preparation & evaluation of tomato puree.
- Dehydration of fruits and vegetables
- Rehydration of fruits and vegetables
- Extraction & estimation of polyphenols from fruit & Vegetable wastes.

Essential/recommended readings

- Girdharilal., Siddappaa, G.S and Tandon, G.L.(2009). Preservation of fruits & vegetables. ICAR, New Delhi.
- Thompson, A.K., (2003). Fruits and vegetables; Harvesting, handling and storage. Blackwell Publishing.
- Verma L.R. & Joshi VK. 2000. Post Harvest Technology of Fruits & Vegetables. Indus Publication.
- Crusess, W.B. (2004). Commercial Unit and Vegetable Products. W.V. Special Indian Edition. Agrobios India.
- Manay, S. and Shadaksharaswami, M. (2004). Foods: Facts and Principles. New Age Publishers.
- Ranganna S.(2007). Handbook of analysis and quality control for fruits and vegetable products. Tata Mc Graw-Hill publishing company limited, Second edition.
- Srivastava, R.P. and Kumar, S. (2006). Fruits and Vegetables Preservation- Principles and Practices. 3rd Ed. International Book Distributing Co.
- Somogyi, L.P., Ramaswamy, H.S. and Hui, Y.H. (1996). Biology, Principles and Applications. Volume 1. Technomic Publishing Company, Inc.

• **Note: Learners are advised to use the latest edition of readings.**

- **Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.**

GE 02: CHEMISTRY OF FOOD

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------|---------|-----------------------------------|----------|------------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| CHEMISTRY OF FOOD | 4 | 3 | 0 | 1 | XII with PCM/PCB | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand the chemistry of foods - composition of food, role of each component
- To understand the different macromolecules and micro molecules in food
- To understand how food components contribute to overall quality of foods

Learning outcomes

The Learning Outcomes of this course are as follows:

- To understand the chemistry of foods - composition of food
- To understand the role of each component, their properties and reactions in food
- To comprehend how dietary components influence total food quality

SYLLABUS OF GE 02

Unit1: Introduction to chemistry of Food (5 Hours)

Introduction to Food Chemistry

Brief composition of food (Carbohydrates, fats, proteins, vitamins, minerals and pigments)

Unit2: Chemistry of Macromolecules (20 Hours)

Water: Definition of water in food, Structure of water and ice, Types of water, Role of water activity in shelf life and packaging Carbohydrates: Introduction, Classification, and Chemical reactions of carbohydrates Protein: Introduction, classification and structure, types of food protein (meat, egg, milk and wheat)

Lipids: Introduction, classification and structure of triglycerides, types of fatty acid, deterioration of fats and oils. (Autooxidation and lipolysis)

Unit3: Chemistry of Micro molecules (10 Hours)

Vitamins: Introduction, types (water soluble and fat soluble vitamins)

Minerals: Introduction, major and minor minerals, Toxic minerals in food

Unit4: Flavors and Pigments (10 Hours)

Definition and basic tastes

Description of some common food flavors

Introduction and classification of pigments

Practical Exercises: 30 Hours

The learners are required to:

- Preparation of primary and secondary solutions
- Estimation of moisture content
- Determination of gelatinization temperature range (GTR) of different starches
- Determination of effect of additives on GTR of starches
- Estimation of total nitrogen content by Kjeldahl method
- Estimation of fat
- Estimation of total ash and acid insoluble ash
- Estimation of reducing sugar

Essential/recommended readings

- DeMan, John M. (1995). Principles of Food Chemistry. 3rd Ed., Springer.
- Fennema, Owen R. (2008). Fennema's Food Chemistry-CRC Press (2008) - 4th Edition.
- Potter, N.N. and Hotchkiss, J.H. (2007). Food Science 5th Ed. New York: Chapman & Hall.
- Richard Owusu-Apenten. (2002) Introduction to Food Chemistry. CRC press
- Hans-Dieter Belitz, Werner Grosch, Peter Schieberle. (2009) Food Chemistry. Springer link

- **Note: Learners are advised to use the latest edition of readings.**

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

B.A (Prog.) with Nutrition and Health Education (NHE) as Major
Category-II

**DISCIPLINE SPECIFIC CORE COURSE – DSC-3-NHE: DIET PLANNING THROUGH
THE LIFE SPAN**

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Prerequisite of the course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Diet Planning Through the Life Span | 4 | 3 | 0 | 1 | Class XII Pass | DSC-1-NHE and DSC-2-NHE |

Learning Objectives:

1. To introduce students to the basic concepts of meal planning.
2. To equip them with knowledge of physiological changes, nutritional requirements, nutritional concerns and healthy food choices during the life cycle.

Learning Outcomes:

After completion of the course, the students will be able to:

1. Describe physiological changes and nutritional requirements across the lifespan.
2. Understand the factors affecting meal planning.
3. Understand the importance of food exchange list and use them for meal planning.
4. Plan and prepare balanced meals and nutritious snacks for various age groups.

SYLLABUS OF DSC-3

Theory:

Unit 1: Nutrient Requirements and Recommendations (5 Hours)

- *Unit Description:* This unit will introduce the concept of dietary reference intake.
- *Subtopics:*
 - Nutrient requirement - concept and background
 - Dietary reference intake
 - EAR and RDA
 - Reference man and reference woman

Unit 2: Fundamentals of Menu Planning (6 Hours)

- *Unit Description:* This unit will introduce essential requirements for planning of

meals.

- *Subtopics:*
 - Introduction and use of food exchange list
 - Concept and importance of meal planning
 - Factors affecting meal planning

Unit 3: Nutrition during Childhood Hours)

(16

- *Unit Description:* This unit will introduce nutritional requirement, physiological changes, nutritional concerns and healthy eating practices during childhood.
- *Subtopics:*
 - Infancy
 - Preschoolers
 - School- going children
 - Adolescents

Unit 4: Nutrition during Adulthood and Old Age Hours)

(18

- *Unit Description:* This unit will introduce nutritional requirement, physiological changes, nutritional concerns and healthy food choices during adulthood and old age.
- *Subtopics:*
 - Adulthood
 - Pregnancy
 - Lactation
 - Old age

Practical: 30 Hours

Unit 1: Introduction to Meal Planning Hours)

(10

- *Subtopics:*
 - Use of comprehensive food exchange list in meal planning
 - Meal distribution and menu planning
 - Nutrient calculations

Unit 2: Planning and Preparation of Diets/Dishes/Snacks Hours)

(20

- *Subtopics:*
 - Infant- complementary feeding
 - Preschooler child

- School aged child
- Adolescent
- Adult
- Pregnant and lactating woman
- Elderly

Essential/recommended readings:

1. Chadha, R., & Mathur, P. (2015). *Nutrition: A life cycle approach*. Delhi: Orient Blackswan.
2. Sethi, P., & Lakra, P. (2015). *Aahar Vigyan, Poshan Evam Suraksha*. Delhi: Elite Publishing House Pvt. Ltd.
3. Mudambi, S. R., & Rajagopal M. V. (2012). *Fundamentals of food, nutrition and diet therapy* (6th ed.). Delhi: New Age International (P) Ltd.
4. Siddhu, A., Bhatia, N., Singh, K., Gupta, S. (Eds.). (2017). *Lady Irwin College Technical series 6: Compilation of food exchange list*. Delhi: Global books organisation.
5. Puri, S. et al (2020). *Food exchange list- A tool for meal planning*. New Delhi: Elite publishing house.
6. Longvah, T. et al (2017). *Indian food composition tables*. Hyderabad, Telangana: National Institute of Nutrition.

Suggested readings:

1. Wardlow, G. M., & Hampl, J. S. (2019). *Perspectives in nutrition*. (11th ed.). New York, NY: McGraw Hill.
2. Khanna, K. et al. (2013). *Textbook of nutrition and dietetics*. Delhi: Elite Publishing house (P) Ltd.
3. Shubhangini, A., & Joshi, S. (2021). *Nutrition and Dietetics* (5th ed.). McGraw Hill Education (India) Private Limited. ISBN: 978-93-90727-82-7.
4. Edelstein, S., & Sharlin, J. (Eds.). (2009). *Life cycle nutrition – an evidence based approach* Burlington, MA: Jones and Barlett Publishers.

DISCIPLINE SPECIFIC CORE COURSE – DSC-4-NHE: DIETARY GOALS AND GUIDELINES FOR INDIANS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Prerequisite of the course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Dietary Goals and Guidelines for Indians | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives:

1. To introduce the concept of nutritionally adequate diets and healthy lifestyles from conception till old age.
2. To equip the students with the knowledge of dietary goals and guidelines for Indians relating to nutritional requirements, deficiency diseases and chronic diet-related disorders.

Learning Outcomes:

After completion of the course, the students will be able to:

1. Describe food groups, food pyramid and the concept of a balanced diet.
2. Understand the physiological changes throughout the lifespan.
3. Acquaint themselves with the dietary goals and dietary guidelines for Indians across the life cycle.

SYLLABUS OF DSC-4

Theory:

Unit 1: Basic Concepts of Food (Hours)

(9

- *Unit Description:* This unit will introduce various food groups, concept of balanced diet, food pyramid and other aspects regarding diet.
- *Subtopics:*
 - Food groups: basic classification and nutritional contribution
 - Food pyramid
 - Balanced diet and My food plate
 - Food facts, fads and fallacies

Unit 2: Dietary Guidelines I (15 Hours)

- *Unit Description:* This unit will introduce basic dietary goals for healthy living and dietary guidelines.
- *Subtopics:*
 - Dietary goals
 - Guidelines to ensure nutritional adequacy and prevent deficiency diseases
 - Guidelines related to various stages of life

Unit 3: Dietary Guidelines II (13 Hours)

- *Unit Description:* This unit will introduce dietary guidelines to deal with health concerns and healthy food practices.
- *Subtopics:*
 - Guidelines to maintain an ideal body weight and prevent chronic diet-related disorders
 - Guidelines regarding food-related practices

Unit 4: Practical Application of Dietary Guidelines (8 Hours)

- *Unit Description:* This unit will introduce practical aspects with suitable examples to attain all dietary guidelines for Indians.
- *Subtopics:*

Sample eating patterns/ menus for the following meals/ snacks:

 - Breakfast
 - Lunch/packed lunch
 - Dinner
 - Snacks

Essential/recommended readings:

1. Damyanthi, K. et al. (2011). *Dietary guidelines for Indians- A manual*. (2nd ed.) Hyderabad. National Institute of Nutrition.
2. Chadha, R., & Mathur, P. (2015). *Nutrition: A life cycle approach*. Delhi: Orient Blackswan.
3. Agarwal, A., & Udipi. S. (2014). *Textbook of human nutrition*, Jaypee Brothers Medical Publishers (P) Ltd, New Delhi.
4. Sethi, P., & Lakra, P. (2015). *Aahar Vigyan, Poshan Evam Suraksha*. Delhi: Elite Publishing House Pvt. Ltd.

Suggested readings:

CATEGORY-II
B.A (Prog.) with Human Development and Family
Empowerment (HDFE) as Major

DISCIPLINE SPECIFIC CORE COURSE – DSC-3-HDFE: ADULTHOOD AND AGEING THROUGH A LIFE SPAN PERSPECTIVE

Credit distribution, Eligibility and Pre-requisite of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (If any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Adulthood and Ageing through a Lifespan perspective | 4 | 2 | 0 | 2 | Class XII Pass | DSC-1-HDFE and DSC-2-HDFE (both as Major) |

Learning Objectives:

1. To understand the developmental patterns in early, middle and late adulthood.
2. To understand the needs and challenges of the older adults.
3. To use research tools to investigate the ageing process and develop critical thinking skills, necessary to do research in the field of ageing.

Learning Outcomes:

After completion of the course, the students will be able to:

1. Understand the characteristics of Adulthood and old age.
2. Understand the challenges of adulthood and ageing and the coping strategies.
3. Students will develop awareness about the developmental patterns in adulthood.
4. Sensitizing students towards the concerns of adulthood and ageing.

THEORY
(Credits:2, Periods: 30)

Unit 1: Adulthood and Ageing
hours)

(10

- *Unit Description:* This unit will introduce the concept of adulthood and ageing
- *Subtopics:*
 - Understand definition
 - Concept and scope of ageing as a field of study

- Theoretical perspectives on ageing
- Developmental Tasks of Adulthood

Unit 2: Early & Middle Adulthood hours)

(10

- *Unit Description:* This unit will introduce the concept of early and middle adulthood.
- *Subtopics:*
 - Characteristics
 - Developmental milestones - Physical, cognitive, social and emotional development

Unit 3: Late Adulthood hours)

(10

- *Unit Description:* This unit will introduce the concept of Late adulthood.
- *Subtopics:*
 - Definition
 - Characteristics
 - Developmental milestones
 - Physical changes in males and females
 - Psychological implications of physical changes. Social – Emotional Development. Cognitive Development

PRACTICAL (Credits: 2, Periods: 60)

- **Unit 1: Conduct Case profile of a senior citizen** **(30 hours)**
- **Unit 2: Visit to a senior citizen home and /or Movie review** **(30 hours)**

Essential / recommended readings:

1. Berk, L. E. (2017). *Development through the lifespan* (7rd edition). US: Pearson Education.
2. Rice, F.P. (1998). *Human Development: A Life-span Approach* (3rd edition). US: Prentice Hall.
3. Santrock, J. W. (2011). *Life-span development* (13th ed.). McGraw-Hill Education.
4. Verma, P., Srivastava D. N. and Singh, A. (1996). *Bal manovigyan and bal vikas*. Agra: Agrawal Publication

Suggested Readings:

1. Patrick, J.H., Hayslip Jr. B., Sawyer, L.H. (2000). *Adult Development and aging: Growth, longevity and challenges* (1st edition). Sage Publications
2. Singh, A. (2015). *Foundation of Human development: A lifespan approach*. Hyderabad: Orient Blackswan Pvt.
3. Singh, V. (2007). *Bal vikas avam bal manovigyan*. Jaipur: Panchsheel Prakashan

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – DSC-4-HDFE: INTRODUCTION TO HUMAN DEVELOPMENT

Credit distribution, Eligibility and Pre-requisite of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|----------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Human Development | 4 | 2 | 0 | 2 | Class XII Pass | DSC-1-HDFE and DSC-2-HDFE (both as Major) |

Learning Objectives:

1. To create an understanding of various stages of lifespan development.
2. To understand developmental changes occurring during infancy, childhood, adolescence.
3. To understand the conflicts during various stages of lifespan development and ways to deal with it.

Learning Outcomes:

After completion of the course, the students will be able to:

1. Understand developmental changes occurring during the lifespan with respect to infancy, childhood, adolescence
2. Understand various stages of lifespan development with respect to conflicts and ways to deal with it.
3. Learn the basic skills of research and documentation and apply the knowledge of methods of data collection in real life situations.

THEORY

(Credits: 2; Periods: 30)

Unit 1: Development in early years: The new-born and stage of infancy (10 Hours)

- *Unit Description:* This unit will discuss about the development in early years
- *Subtopics:*
 - New-born: Characteristics.
 - Reflexes
 - Infant developmental milestones

Unit 2: Childhood- Early & Middle Hours) (10

- *Unit Description:* This unit will introduce all domains of development with regard to early and middle childhood period.
- *Subtopics:*
 - Physical Development.
 - Socio-emotional Development.
 - Cognitive and Language Development

Unit 3: Adolescence Hours) (10

- *Unit Description:* This unit will introduce regarding adolescent age group
- *Subtopics:*
 - Definition.
 - Characteristics.
 - Developmental milestones.
 - Physical changes in males and females.
 - Psychological implications of physical changes.
 - Social – Emotional Development.
 - Cognitive Development.

**PRACTICAL
(Credit: 2, Periods: 60)**

Unit 1: Understand Methods and techniques of child study. (15 hours)

Unit 2: Conduct any 2 interviews. (30 hours)

Unit 3: Conduct any 1 observation. (15 hours)

Essential / recommended readings:

1. Bee, H. L (2011). *The developing child*. London: Pearson.
2. Berk, L. E. (2017). *Development through the lifespan* (7rd edition). US: Pearson Education.
3. Santrock, J. W. (1996). *Child development*. New York: Tata McGraw Hill
4. Verma, P., Srivastava D. N. and Singh, A. (1996). *Bal manovigyan and bal vikas*. Agra: Agrawal Publication.

Suuggested readings:

1. Papilla, D.E., Olds, S. W. and Feldman, R. D (2004). *Human development*. New York: Mcgraw Hill.
2. Singh, A. (2015). *Foundation of Human development: A lifespan approach*. London: Orient Longman.

3. Singh, V. (2007). *Bal vikas avam bal manovigyan*. Jaipur: Panchsheel Prakashan.
4. Sapra, R. (2007). *Manav vikas: Ek parichaya*. New Delhi: Vishwa Bharti Publications.
Chapter 1, pg 1-6

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Category-II

**B.A (Prog.) with Apparel Design and Construction (ADC) as
Major**

**DISCIPLINE SPECIFIC CORE COURSE – DSC-3-ADC:
GARMENT DETAILING**

Credit Distribution, Eligibility and Pre-requisites of the Course

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Prerequisite of the course |
|------------------------|---------|-----------------------------------|----------|------------------------|-------------------------|-------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Garment Detailing | 4 | 2 | 0 | 2 | Class XII Pass | DSC-1-ADC and DSC-2-ADC |

Learning Objectives:

1. To impart basic knowledge required for layout planning on fabrics requiring special attention
2. To familiarise the students about the concepts related to the handling of special fabrics
3. To create an understanding of designing clothes for people with special needs.
4. To develop pattern making and construction skills for various garments and their components
5. To impart skills for developing design variations through dart manipulations

Learning Outcomes:

After completion of the course, the students will be able to:

1. Plan pattern layout on fabrics with special requirements
2. Calculate the fabric requirement per garment
3. Make use of different marker making methods
4. Use design variations of garment components in garment construction
5. Carry out dart manipulation according to design variations
6. Handle special fabrics during pattern layout and sewing
7. Design clothes for people with special needs

SYLLABUS OF DSC-3

Theory:

Unit 1: Layout planning

(8 Hours)

- *Unit Description:* This unit deals with planning on special fabrics, assessing fabric requirement per garment and marker making.
- *Sub Topics:*
 - Pattern Layouts on special fabrics- unidirectional, bold and large prints, stripes and checks, border design, irregular design fabric, napped fabric
 - Calculation of material requirement for garment construction
 - Marker Making – Factors influencing marker making, Methods of marker making.

Unit 2: Design variations in Garment Components

(12 Hours)

- *Unit Description:* This unit focuses on the study of garment components and their design variations. It also covers dart manipulation and creating design variations.
- *Sub Topics:*
 - Study of Garment components – terms, types and Styles, evaluation criteria – Necklines, Collars, Sleeves, Cuff, Yokes, Pockets, Plackets
 - Design variations in bodice, skirts, silhouettes, trousers
 - Dart manipulation: Definition, Principles, Methods, dart equivalents

Unit 3: Handling of Special Fabrics

(10 Hours)

- *Unit Description:* This unit provides the basic knowledge relating to special fabrics and their handling. It also deals with the concepts and requirements of self-help garments and maternity wear.
- *Sub Topics:*
 - Definition and features of Special fabrics
 - Handling of fabrics with reference to designing, layout, marking, cutting, stitching, needle sizes, stitch sizes, threads used, seams and other special considerations – Sheer and slippery fabrics, napped and pile fabrics, lace, silk & crepe, velvet, wool, knits, plaids and stripes. Preparation of a sample file.
 - Garment designing for special needs: basic principles and design requirements – Self-help, maternity wear

Practical:

Unit 1: Basic Blocks and Dart Manipulation

(20 Hours)

- *Sub Topics:*
 - Dart manipulation techniques - Single and double dart series, style lines, Yokes, adding fullness
 - Hip length/ Torso Draft
 - Trousers Block
 - Men's Bodice Block

Unit 2: Construction of Garments and their Components

(40 Hours)

- *Sub Topics:*

- Preparation of Samples of any three styles of Sleeves
- Preparation of Samples of any three styles of Collars
- Preparation of Samples of any three styles of pockets
- Preparation of Samples of Plackets - continuous bound, even hem, zipper, tailored placket
- Designing and stitching of one upper and one lower garment

Essential/ Recommended Readings:

1. Armstrong, H.J., (2009), Pattern Making for Fashion Design, Harper Collins Publishers Inc., New York.
2. Liechty, E.G., Potterberg, D.N., Rasband, J.A., (2010), Fitting and Pattern Alteration: A Multimethod Approach, Fairchild Publications, New York
3. Macdonald Nora M., (2009), Principles of Flat-Pattern Design, Fairchild Books, New York.
4. Shaeffer Claire, (2003), Sew any Fabric, Krause Publications

Suggested Readings:

1. Brown, P. and Rice, J., (1998), Ready-to-wear Apparel Analysis, Prentice Hall
2. Kallal, M. J., (1985), Clothing Construction, Macmillan Publishing Company, New York
3. Mansfield, E. A. & Lucas, E. L., (1974), Clothing Construction, Houghton Mifflin
4. Stamper, A.A., S. H. Sharp and L.B. Donnell, (1986), Evaluating Apparel Quality, Fairchild Publications, US

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

**DISCIPLINE SPECIFIC CORE COURSE – DSC-4-ADC:
BASIC PATTERN MAKING AND CLOTHING CONSTRUCTION**

**Credit Distribution, Eligibility and Pre-requisites of the
Course**

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Prerequisite of the course |
|---|---------|-----------------------------------|----------|------------------------|-------------------------|-------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Pattern Making and Clothing Construction | 4 | 2 | 0 | 2 | Class XII Pass | Nil |

Learning Objectives:

1. To introduce students to basic concepts of Body measurements and pattern making
2. To equip the students with the knowledge of pattern layout, fabric cutting, garment sewing and assessing fit in a garment.

Learning Outcomes:

After completion of the course, the students will be able to:

1. Take measurements from body and garments accurately.
2. Create patterns of simple women's clothes and apply the pattern information correctly.
3. Operate a sewing machine for simple sewing tasks using the correct thread, needle and stitch length for various fabrics.
4. Use various types of seams and seam techniques during garment construction
5. Apply concept of fit, evaluate garment fit and do pattern alterations as necessary.

SYLLABUS OF DSC-4

Theory:

Unit 1: Body Measurements and Pattern Making

(10 Hours)

- *Unit Description:* This unit introduces the students to the process of taking measurements from body or garment and developing basic blocks for creating garment patterns. It also provides an understanding of the different types of patterns as well as using the symbols and markings mentioned on a pattern correctly.
- *Sub Topics:*
 - Importance of Body measurements, Body Landmarks, Correct procedure of taking body measurements, size charts, Taking measurements from Garments
 - Garment Ease - type and amount in different garments

- Basic Blocks and their importance
- Methods of pattern development: Drafting, Flat pattern making, Draping
- Types of paper pattern - Commercial pattern, Graded pattern, Production pattern
- Pattern information and marking symbols and their importance

Unit 2: Sewing Machines

(8 Hours)

- *Unit Description:* This unit provides the essential knowledge required for operating and maintaining a sewing machine for garment construction.
- *Sub Topics:*
 - Classification of Sewing machines
 - Components of a Basic Sewing machine and their functions
 - Introduction to Industrial sewing machines- single needle lock stitch, overlock, blind stitching, button hole and button stitching, bartacking
 - Sewing defects and remedies
 - Care and maintenance of a sewing machine, precautions while working on a sewing machine
 - Selection of threads, needles and stitch length for various fabrics

Unit 3: Sewing Techniques and Garment Fit

(12 Hours)

- *Unit Description:* This unit imparts knowledge of seam categories and seam techniques. It also deals with the concept of garment fit and correcting fitting problems through pattern alteration.
- *Sub Topics:*
 - Garment Support Fabrics (Lining, Underlining, Interlining, Interfacing) – their use and selection
 - Basic seam categories- super imposed seam, lapped seam, bound seam, flat seam, decorative seam, ridge seam
 - Additional seam techniques: clipping, notching, grading, trimming, easing, under stitching, stay stitching, trimming a corner
 - Finishing of straight & curved edges- self finish, crossway strips, bias facing, bias binding, shaped facing, self-finishing, casings and finishing with trims
 - Elements of Fit: line, ease, grain, set and balance
 - Fit evaluation, Common fitting problems and pattern correction

Practical: 60 Hours

Unit 1: Development of Basic Blocks and design variations

(20 Hours)

- *Subtopics:*
 - Adult women's bodice block, sleeve block, skirt block
 - Developing design variations in adult skirt- A-line, flared, wrap-around, pleated, skirt with yoke

Unit 2: Seams and Garment Construction

(40 Hours)

- *Subtopics:*

- Samples of Seams – Plain Seam, French seam, Run-n-fell seam, Lapped seam, Top stitching, Bound/Piped seam, Slot seam, Curved and Corner seam
- Necklines and their finishing: bias facing, bias binding, shaped facing
- Adaptation of basic blocks to construct Saree blouse, Kurti/Kameez, Skirt
- Construction of lower garments: Salwar/ Churidar, Palazzo

Essential Readings:

1. Armstrong, H.J., (2009), Pattern Making for Fashion Design, Harper Collins Publishers Inc., New York.
2. Brown, P. and Rice, J., (1998), Ready-to-wear Apparel Analysis, Prentice Hall
3. Colton V. (1995). Reader's Digest- Complete Guide to Sewing. New York: The Reader's Digest Association, Inc.
4. Knowles A. (2006). Patternmaking for Fashion Designers. New York: Fairchild Publications Inc.
5. Liechty, E.G., Potterberg, D.N., Rasband, J.A., (2010), Fitting and Pattern Alteration: A Multimethod Approach, Fairchild Publications, New York

Suggested Readings:

1. Kallal, M. J., (1985), Clothing Construction, Macmillan Publishing Company, New York
2. Kindersley D. (1996). The Complete Book of Sewing. London: Dorling Kindersley Limited.
3. MacDonald M. (2009). Principles of Flat Pattern Design (4th Edition). New York: Fairchild Publications Inc
4. Stamper, A.A., S. H. Sharp and L.B. Donnell, (1986), Evaluating Apparel Quality, Fairchild Publications, America

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Category-II
B.A. (Prog.) with Food Technology (FT) as Major

**DISCIPLINE SPECIFIC CORE COURSE – DSC-3-FT:
NUTRITION AND WELL BEING FOR LIFESPAN**

**CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF
THE COURSE**

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre- requisite of the course (if any) |
|--|---------|-----------------------------------|----------|------------------------|-------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Nutrition and Well Being for Lifespan | 4 | 3 | 0 | 1 | Class XII Pass | DSC-1-FT |

LEARNING OBJECTIVES:

1. To make students understand the concept of wellbeing, good health, dietary guidelines and lifestyle management.
2. To familiarize students with the salient physiological changes and nutrition related health concerns during various stages of lifespan.
3. To familiarize students with the dietary guidelines and lifestyle practices which would support overall wellbeing and good health
4. Make students plan and prepare nutritious meals for self, family and the community.

LEARNING OUTCOMES:

After completion of the course, the students will be able to:

1. Appreciate the role of dietary guidelines and lifestyle management in promoting health and well being
2. Adopt a healthy and active lifestyle suitable to each physiological stage in lifespan
3. Enhance ability to make healthy food choices for self, family and the community
4. Develop educational aids to impart nutrition knowledge.

SYLLABUS OF DSC-3-FT

THEORY:

UNIT I: Maternal and Infant Nutrition

(12 Hours)

- *Unit Description:* This unit will focus on basic concepts of wellbeing,

dietary guidelines as well as maternal and infant nutrition.

- *Subtopics:*
 - Basic concepts: well-being, nutritional status, dietary guidelines and lifestyle management
 - Pregnancy - physiological changes during pregnancy, dietary guidelines, the role of nutrition in the developmental origins of disease
 - Lactation - factors affecting nutritional requirements, dietary guidelines, breast feeding practices
 - Infancy - growth and development, growth monitoring, dietary guidelines (advantages of mother's milk, complimentary feeding)

UNIT II: Child and Adolescent Nutrition

(12 Hours)

- *Unit Description:* This unit will focus on dietary guidelines and lifestyle management of children and adolescents.
- *Subtopics:*
 - Childhood Years: growth and development, dietary guidelines during early, middle and late childhood years, common nutrition concerns.
 - Adolescence: growth and development, eating behaviour, dietary guidelines, common health problems during adolescence, eating disorders, lifestyle management.

UNIT III: Nutrition during Adulthood

(12 Hours)

- *Unit Description:* This unit will focus and reference man as well as woman and nutritional needs of adults.
- *Subtopics:*
 - Reference Man and Reference Woman, dietary guidelines, role of nutrition in adulthood in the prevention and development of chronic diseases
 - Lifestyle management: healthy eating behaviour, physical activity, stress management, sleep pattern.

Unit IV: Nutrition for the Elderly

(9 Hours)

- *Unit Description:* This unit will focus on nutritional needs, lifestyle management, longevity and care for elderly.
- *Subtopics:*
 - Introduction to Geriatrics, physiological changes, nutrition and longevity, nutritional concerns, dietary guidelines, Nutrition and chronic Degenerative Diseases, Nutrient-Drug Interactions (basic concept).

PRACTICAL: 30 Hours

No. of Students per Practical Class Group: 10-15

- | | |
|---|-----------|
| 1. Develop a poster/chart on dietary guidelines or lifestyle management for adults (sedentary, moderate, heavy workers) or pregnant woman. | (4 Hours) |
| 2. Develop a digital educational aid on importance of colostrum/mother's milk/food behaviour/lifestyle management | (2 Hours) |
| 3. Develop a questionnaire on common nutrition/health concerns | (2 Hours) |
| 4. Learn to fill growth chart for under five years children (case study) | (2 Hours) |
| 5. Plan and prepare nutritious snack for Pregnant women (iron and folic acid rich) | (2 Hours) |
| 6. Plan and prepare nutritious snack Lactating mother (protein and calcium rich) | (2 Hours) |
| 7. Plan and prepare nutritious snack Pre-schooler (Vitamin A rich) | (2 Hours) |
| 8. Plan and prepare nutritious tiffin for School going child (energy and protein rich) | (2 Hours) |
| 9. Plan and prepare nutritious snack for adolescents (energy and protein rich) | (2 Hours) |
| 10. Plan and prepare nutritious snack for Elderly (easy to prepare, protein and micro-nutrient rich) | (2 Hours) |
| 11. Plan and prepare premix or complimentary food for infants | (2 Hours) |
| 12. Plan and organize a health awareness activity in college for college students (exhibition of model snacks/tiffins/one dish 2meals) OR Plan and play a skit on the concept of longevity for elderly in a nearby slum or community center or college event (Group activity) | (6 Hours) |

ESSENTIAL/ RECOMMENDED READINGS (Theory and Practical):

DISCIPLINE SPECIFIC CORE COURSE – DSC-4-FT: FOOD SCIENCE PART-II

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Food Science Part-II | 4 | 3 | 0 | 1 | Class XII Pass | DSC-2-FT |

LEARNING OBJECTIVES:

1. To familiarize the students with the composition and processing of milk, egg, sugars, fats and miscellaneous food.
2. To impart concept of properties of fats and oil, sugar, egg foam stages and emulsions.

LEARNING OUTCOMES:

After completion of the course, the students will be able to:

1. Describe the composition and nutritive value of milk, egg, sugar and fats and their role in food processing.
2. Develop understanding about basic processing of milk and eggs.
3. Illustrate the behaviour of sugar at various temperatures.
4. Describe spoilage of fat scientifically, determine the smoke point of different fats and illustrate the ways to prevent rancidity of fats.

THEORY:

UNIT I: MILK

(9 Hours)

- *Unit Description:* This unit is about milk, its nutritive value, processing, types and effect of processing on milk quality.
- *Subtopics:*
 - Nutritive value
 - Introduction to liquid milk technology (clarification, pasteurization, homogenization, fortification, sterilization)
 - Types of milk
 - Effect of processing on milk

UNIT II: EGGS

(12 Hours)

- *Unit Description:* This unit is about eggs its composition and nutritive value, structure, quality, foam formation and effect of heat on egg proteins.
- *Subtopics:*
 - Composition and nutritive value
 - Structure of an egg
 - Egg quality and deterioration
 - Effect of heat on egg proteins: Green ring formation in boiled egg
 - Storage and preservation of eggs
 - Egg foams – stages of preparation and factors affecting them

UNIT III: FATS AND OILS Hours)

(12

- *Unit Description:* This unit is about types of fats and oils, their functions, spoilage, precautions to be taken while using, emulsions and RUCO.
- *Subtopics:*
 - Definitions, types of fats and oils and their functions
 - Rancidity in fat and its prevention
 - Care of fat used for frying (smoke, flash and fire points)
 - Emulsions
 - Repurpose used cooking oil (RUCO).

UNIT IV: MISCELLANEOUS FOOD PRODUCTS Hours)

(12

- *Unit Description:* This unit is about miscellaneous food items like sugar and its properties and behaviour during cooking, tea and coffee processing and flavouring compounds in spices
- *Subtopics:*
 - Sugar: Properties, sugar behaviour during cooking.
 - Tea and Coffee: Types of tea and coffee, basic processing of tea and coffee.
 - Spices and Herbs: Types and flavouring components

PRACTICAL:30 Hours

No. of Students per Practical Class Group: 10-15

1. Determination of pH of different foods. (2 Hours)
2. Selection and purchase criteria of raw materials (cereal, pulses, vegetables, fruits and eggs) (2 Hours)
3. Effect of heat on milk processing. (2 Hours)
4. Effect of acid and alkali on milk processing. (2 Hours)

| | |
|--|-----------|
| 5. Egg white foam formation | (2 Hours) |
| 6. Factors affecting egg white foam stability | (4 Hours) |
| 7. Green ring formation in boiled eggs and its prevention | (2 Hours) |
| 8. Determination of the quality of an egg | (2 Hours) |
| 9. Behaviour of sugar at various temperatures | (4 Hours) |
| 10. Preparation of crystalline candies | (2 Hours) |
| 11. Preparation of non-crystalline candies | (2 Hours) |
| 12. Determination of smoke point of different fats and oil | (2 Hours) |
| 13. Preparation of emulsions – mayonnaise | (2 Hours) |

Category-IV

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY DEPARTMENT OF HOME SCIENCE

GENERIC ELECTIVES (GE HS 002): SELF DEVELOPMENT AND WELLBEING

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--------------------------------|---------|-----------------------------------|----------|------------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Self Development and Wellbeing | 4 | 3 | 0 | 1 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand the concepts of self-development and wellbeing
- To study theoretical perspectives and stages of self-development
- To understand framework and dimensions of wellbeing
- To understand the context and significance of managing emotions and wellbeing
- To study and understand activities for enhancing self-development and wellbeing

Learning outcomes

The Learning Outcomes of this course are as follows:

- The student will be able to understand the concept of self-development and parameters of wellbeing
- The student will be able to understand the theoretical perspectives on self-development and wellbeing
- The students will be able to demonstrate skills in developing and using contextually appropriate methods to promote well-being
- The student will be able to enhance their self-development and wellbeing through reflection and introspection

SYLLABUS OF GE HS 002

Unit I: Understanding the self (12 Hours)

To introduce various approaches and theories of self.

Subtopics:

- Definitions and concepts of self
- Perspectives on self
- Phases of self-development
- Theories of self-development

Unit II: Components of self-development (09 Hours)

To understand various aspects of self-development.

Subtopics:

- Components of Self- An integrated approach
- Self-concept and self esteem
- Social self and development
- Factors influencing self

Unit III: Concept, approaches and importance of wellbeing (12 Hours)

To understand basic definitions and concepts of wellbeing and interlink these with self-development.

Subtopics:

- Definitions and concept of Wellbeing
- Frameworks and dimensions of wellbeing
- Health and Wellbeing
- Happiness and Wellbeing

Unit IV: Promoting self-development and wellbeing (12 Hours)

To understand significance of activities related to wellbeing.

Subtopics:

- Managing relationships and emotions
- Happiness and emotional wellbeing
- Mindfulness and decision making
- Academics and Work-life balance
-

Practical component (if any)

PRACTICAL: 30 Hours

- An activity on self-reflection from early childhood to adolescence.
- Focused group discussion on self and wellbeing.
- Narrative analysis/: biographies and autobiographies/ Diagrammatic representation of the self)

- Selected exercises to promote wellbeing: Music, dance, literature, poetry, art, yoga, meditation, play, and theatre
- Psychometric tests- on self and wellbeing
- Session on basics of counselling
- Profile an organisation work in sector of counselling

GENERIC ELECTIVES (GE HS 006): NUTRITION FOR THE FAMILY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Nutrition for the Family | 4 | 3 | 0 | 1 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To enable students in understanding the principles of planning nutritionally adequate diets.
- To acquire knowledge about the nutritional needs and concerns of an individual throughout the life cycle.
- To make them exercise food choices consonant with good health based on sound knowledge of principles of nutrition.

Learning outcomes

The Learning Outcomes of this course are as follows:

The students will be able:

- The student will be able to comprehend the principles of planning nutritionally adequate diets.
- The student will be able to acquire knowledge about the nutritional needs and concerns of an individual throughout the life cycle.
- The student will be able to exercise food choices consonant with good health based on sound knowledge of principles of nutrition.

SYLLABUS OF GE HS 006

Unit I: Basics of nutrients requirements (06 Hours)

Concepts of estimated average requirements, recommended allowances and methods of assessing nutrient requirements in general for Indians

Subtopics:

- Concept of EAR, RDA and TUL
- Methods of assessment of nutrient requirements

Unit II: Principles of Meal Planning (06 Hours)

Concepts of food groups and food exchange lists for meal planning, factors affecting meal planning will be dealt with. Students will also be introduced to dietary guidelines for Indians.

Subtopics:

- Food groups
- Food exchange list
- Factors affecting meal planning and food related behaviour
- Dietary guidelines for Indians

Unit III: Nutrition during adulthood (18 Hours)

Physiological influence on nutrient requirements during adulthood (EAR/RDA), energy balance in adulthood, nutritional concerns and changes in requirements during pregnancy, lactation, and old age will be dealt with.

Subtopics:

- Adult men and women
- Pregnant women
- Lactating mothers
- Elderly

Unit IV: Nutrition during childhood (15 Hours)

Physiological changes during infancy, childhood and adolescence – growth and development; and their influence on nutrient requirements (EAR/RDA), concepts of nutrient requirements during these ages and nutrition concerns keeping in mind the changing food habits and importance of physical activity will be dealt with.

Subtopics:

- Infants
- Preschool children
- School children
- Adolescents

Practical component (if any)

PRACTICAL: 30 Hours

Introduction to meal planning:

- Rich sources of nutrients
- Use of food exchange lists

Planning nutritious diets for:

- Adult (Male and Female)
- Pregnant and Lactating woman
- Pre-schooler
- Adolescent
- Elderly

Planning and cooking of nutrient rich snacks/dishes for:

- Infants (Freshly prepared complementary foods)
- Packed tiffin
- Pregnancy/Lactation

GENERIC ELECTIVES (GE HS 009): GENDER AND MEDIA STUDIES

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department offering the course |
|--------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Gender and Media Studies | 4 | 3 | 0 | 1 | 12 th Pass | NIL | Home Science |

Learning Objectives

The Learning Objectives of this course are as follows:

- To introduce the concepts relating to gender and to sensitize the students to the construction of gender.
- To highlight the various aspects in gender and development, and its dimensions, theories and approaches.
- To understand the gender-based issues of equality and equity through a study of development indices and feminist theories and perspectives.
- To learn about the inter-relationships between portrayal of women in media and the status of women as well as the role media can play in empowerment of women.

Learning outcomes

The Learning Outcomes of this course are as follows:

After studying, students will be able to:

- The student will be able to understand the concept of gender and socio-cultural practices impacting the construction of gender.
- The student will be able to understand the theories and approaches of feminism.
- The student will be able to comprehend the various aspects in gender and development, and its dimensions, theories
 - and approaches.
- The student will be able to critique the role of the media in promoting gender equity and empowerment.

SYLLABUS OF GE HS 009

Unit I: Social Construction of Gender (12 Hours)

The Unit aims to critically understand the concept of gender and socio-cultural practices impacting the social construction of gender.

Subtopics:

- Concept of gender and sex
- Socialization and construction of gender
- Patriarchal social order and status of women
- Shifts in Status of women – historical and contemporary perspectives on status of women

Unit II: Gender and Development (12 Hours)

The Unit highlights the various aspects in gender and development and focuses on its dimensions, theories and approaches.

Subtopics:

- Concept of Gender, Development and Indicators
- Approaches to women's participation in development
- Invisibility of women's work and economic participation
- Gender differentials in various sectors of development
- Life Cycle Approach to gender studies (violence against women)

Unit III: Feminism, Gender and Media (12 Hours)

This Unit focuses on historical evolution of feminism and perspectives on gender and media.

Subtopics:

- Feminist theories; A short introduction
- Gender and Media; Theoretical perspectives - portrayal and representation
- Theory of Visual Pleasure - Male Gaze (Laura Mulvey);
- Queer Theory (Judith Butler)
- Masculine Hegemony (R.W. Connell)
- Framework for gender responsive media and gender mainstreaming

Unit IV: Gender and Empowerment (09 Hours)

This Unit provides an insight on the concept of empowerment and gender equality.

Subtopics:

- Advocacy of women's rights through media
- Women's Empowerment; Historical and Contemporary Perspectives
- Women's Legal Rights and Redressal System
- Media laws related to women

Practical component (if any)**PRACTICAL: 30 Hours**

- Exercises on sex and gender
- Data interpretation on gender-related indicators
- Review and content analysis of various Media: print, films/documentaries on gender issues and their critical analysis.
- Case studies on representation of gender in mainstream media from a gender perspective (print, broadcast and new media)
- Critical analysis of Laura Mulvey's notion of Male Gaze

Essential Readings

GENERIC ELECTIVES (GE HS 014): FABRIC STUDY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department offering the course |
|---------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Fabric Study | 4 | 3 | 0 | 1 | 12 th Pass | NIL | Home Science |

Learning Objectives

The Learning Objectives of this course are as follows:

- To briefly study the fabric components.
- To enhance awareness of various commercially available fabrics.
- To understand the properties and end uses of the various types of fabrics.

Learning outcomes

The Learning Outcomes of this course are as follows:

After studying, students will be able to:

- The student will be able to understand the components of a textile fabric.
- The student will be able to identify the various commercially available fabrics.
- The student will be able to appropriately select fabrics based on their properties, cost and recommended end-use.

SYLLABUS OF GE HS 014

UNIT I: Fabric components

(09 Hours)

In this unit, students will be able to understand the basics of fibres, yarns and fabric.

Subtopics:

- Fibres and yarns
- Methods of fabric construction

Fabric finishing- dyeing, printing, aesthetic and functional finishes

Unit II: Commercially important woven fabrics: Identification, properties and end use (21 Hours)

In this unit, students will gain an understanding of various types of woven fabrics

Subtopics:

- **Cotton and other Cellulosic Fabrics**
 - Lightweight fabrics- Mulmul, Voile, Organdy, etc.
 - Medium weight fabrics- Cambric, Poplin, Cotton, Rubia, Denim, Chambray, Seersucker, Eyelash dobby, Schiffli, Jute, Linen, etc.
 - Heavy weight fabrics- Canvas, Casement, Gabardine, Damask, Corduroy, Velvet, Terry, etc.
- **Silk and Wool fabrics**
 - Lightweight fabrics- Silk Crepe, De Chine, Georgette, Chiffon, Organza, etc.
 - Medium/Heavy weight fabrics- Flat silk, Satin, Taffeta, Dupion, Shantung, Raw silk, Tussar silk, Habutai silk, Tweed
- **Man-made fibre and blended fabrics**

Art silk, Lizzy-Bizzy, Terivoile, Semi-crepe, Moss crepe, Artificial chiffon, Artificial georgette, Terrycot, Poly-satin, Lycra, Modal, Viscose

Unit III: Commercially Important Knitted and Non-woven fabrics: Identification, properties and end use (09 Hours)

In this unit, students will learn about various types of knitted and non-woven and other types of fabrics

Subtopics:

- Knitted Fabrics- Knitted Terry, Jersey, Rib Knit, Interlock knit, Pique, Velour, Scuba, Fleece, etc.
- Non-wovens- Different types and weights
- Others- Leatherette, Suede, Nets and Laces

Unit IV: Traditional Indian Fabrics: Identification, properties and end use (06 Hours)

In this unit, students will be learn to identify various types of traditional Indian fabrics

Subtopics:

Selected woven, embroidered, painted, printed and dyed traditional Indian textiles.

Practical component (if any)

PRACTICAL: 30 Hours

Unit I: Identification of various types of fibres, yarns, fabrics and weaves

- Learn to identify the different components of a fabric, its construction and other essential properties

Subtopics:

- Identification of common textile fibres
- Identification of textile yarns
- Identification of fabric types: Woven, Knitted, Non-Wovens and others
- Identification of fabric weave
- Identification of various types of woven fabrics in terms of Weight
- Thread Count

Unit II: Collection of swatches for portfolio preparation of woven, knitted, non-woven and traditional Indian fabrics

Learn to recognise various types of commercially available fabrics

Subtopics:

- Preparation of portfolio of commonly available fabrics
- Commercially important Woven Fabrics

Commercially important Knitted, Non-Woven and other fabrics o Traditional Indian Fabrics

Essential Readings

- Corbman P. B., (1989), Textiles- Fibre to Fabric, 6th edition, McGraw Hill, New York.
- Hollen N., Saddler J., Langford A.L., Kadolph S.J., (1988), Textiles, 6th Edition, Macmillan Publishing Company New York, USA
- Joseph, M.L., (1988) Essentials of Textiles (6th Edition), Holt, Rinehart and Winston Inc., Florida.
- Rastogi, D. (Ed.) and Chopra, S. (Ed.), (2017), Textile Science, Orient Black Swan.
- Sekhri S., (2011) Textbook of Fabric Science: Fundamentals to Finishing, PHI Learning, Delhi.
- Chattopadhyay, K.D., 1995, Handicrafts of India, Wiley Eastern Limited, N Delhi.

Suggested Readings: (Practical)

- Corbman P. B., (1989), Textiles- Fibre to Fabric, 6th edition, McGraw Hill, New York.
- Chelna Desai, 1988, Ikats Textiles of India, Chronicle Books, India.
- Pizzuto's J.J. "Fabric Science", Fairchild Publication, New York.
- Hollen N., Saddler J., Langford A.L., Kadolph S.J., (1988), Textiles, 6th Edition, Macmillan Publishing Company New York, USA
- Das, Shukla, 1992, Fabric Art- Heritage of India, Abhinav Publications, N Delhi.
- Chelna Desai, 1988, Ikats Textiles of India, Chronicle Books, India
- Tholia A., (2013) Understanding Fabrics- A practical Approach, 2nd edition, Sarv

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Credit distribution, Eligibility and Pre-requisites of the Course

| GENERIC ELECTIVES (GE HS 018): INNOVATIVE DESIGN PRACTICES | | | | | | | |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|--------------------------------|
| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department offering the course |
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Innovative Design Practices | 4 | 3 | 0 | 1 | 12 th Pass | NIL | Home Science |

Learning Objectives

The Learning Objectives of this course are as follows:

- To sensitize students towards innovation in design to improve the quality of life of users as well as comply with environment protection.
- To stimulate the students to engage in creativity and integrate sustainability in their design endeavours.

Learning outcomes

The Learning Outcomes of this course are as follows:

After studying, students will be able to:

- The student will be able to get sensitized towards innovation and creativity through innovative and sustainable design practices and techniques.
- The student will be able to carry out development of product and prototyping from a sustainability perspective.
- The student will be able to brainstorm new product ideas in a systematic manner.

Unit I: Introduction to Innovation in Design

(09 Hours)

The focus of this unit would be on understanding the theoretical concepts related to innovation, design and creativity.

Subtopics:

- Concept of Design, Innovation, and Creativity
- Theories and principles of design and innovation
- Challenges to innovation

Unit II: Methods and techniques for Innovation in Design

(12 Hours)

This unit focuses on studying the various methods and techniques used for design innovation

Subtopics:

- Understanding disruptions in innovation approaches, case analysis
- Process of creativity and design
- Methods of ideating, creating and implementing innovative design ideas

Unit III: Approaches for Sustainability in Design

(12 Hours)

This unit attempts to acquaint the students with contemporary techniques and approaches for integrating concepts of sustainability in design.

Subtopics:

- Role of sustainability in design practice
- Emerging trends and sustainable methods and techniques of design
- Sustainable Materials: reclaimed and eco-friendly composite materials
- Contemporizing traditional designs
- Circular Economy as a pathway to sustainability in design

Unit IV: Design Development and Presentation

(12 Hours)

This unit will develop competence amongst students towards creating and executing their innovative design ideas.

Subtopics:

- Critical evaluation of existing designs:
 - Products
 - Interiors and Space
- Case study of Innovative design practices related to:
 - Interiors and Space

Product

SYLLABUS OF GE HS 018

Practical component (if any)

PRACTICAL: 30 Hours

Unit I: Brainstorming Methods

Activities:

- Sessions on Tinkering Lab
- Engaging students in a practical setup for brainstorming
- Narration / Documentation of brainstorming sessions
- Workshop/ Field Visits- Contemporary discussion with the artists and designers

Unit II: Project on Innovative Design Idea

Activities:

- Case study on Reuse/ Recycle/ Reclaim products
- Minor project on sustainable materials
- Portfolio on Innovative Design Idea
- Description
- Relevance of the idea in present contextDigital Presentation / Prototype of Innovative Design Idea

42. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 38-1-1 dated 08.12.2022 regarding Syllabi of 2nd Semester of Departments under Faculty of Arts

Add the following:

Syllabi of Semester-II of the following departments under Faculty of Arts based on Under Graduate Curriculum Framework -2022 to be implemented from the Academic Year 2022-23.

FACULTY OF ARTS

Department of Arabic

Category-I
BA (Hons.) Arabic

DISCIPLINE SPECIFIC CORE COURSE – 4
ELEMENTARY ARABIC: READING & WRITING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Elementary Arabic: Reading & Writing | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To enable the learners to read the text accurately.
2. To develop the writing skills.

Learning outcomes

The Learning Outcomes of this course are as follows:

After completing this course the learner will be able to:

1. Read and comprehend the Arabic text.
2. Make and answer the questions in Arabic language.

SYLLABUS OF DSC-4

Unit 1 (15 Hours)

- **Reading and Comprehension**

Lessons 1-4

Prescribed Book: "Madina Arabic Reader-2 by Dr. V. Abdur Rahim"

Unit 2 (15 Hours)

- **Reading and Comprehension**

Lessons 5-8

Prescribed Book: "Madina Arabic Reader-2 by Dr. V. Abdur Rahim"

Unit 3 (15 Hours)

- **Reading and Comprehension**

Lessons 9-13

Prescribed Book: "Madina Arabic Reader-2 by Dr. V. Abdur Rahim"

Practical component (if any) - NIL

Essential/recommended readings

1. Dr. V. Abdur Rahim: Madinah Arabic Reader: Book 2, New Delhi

Suggestive readings

1. Dr. Wali Akhtar Nadwi, My Arabic Reader (Elementary Level), New Delhi

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5 ELEMENTARY ARABIC GRAMMAR

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|------------------------|-------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Elementary Arabic Grammar | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To make learners well versed in Syntax and Morphology.
2. To enable them to translate the text.
3. To develop speaking, reading and writing skills among them.

Learning outcomes

The Learning Outcomes of this course are as follows:

After completing this course the learner will be able to:

1. Easily derive perfect, imperfect, imperative, prohibitive verbs and active/passive participles from any infinitive of the following irregular patterns.
2. Use them in their writings and speaking as per the need.
3. Learn intermediate grammar of the Arabic syntax.
4. Make simple nominative and verbal sentences.

SYLLABUS OF DSC-5

Unit 1 (15 Hours)

- Description of همزة الوصل وهمزة القطع.
- المفرد (Singular) in the nominative, accusative and genitive cases.
- المثنى (Dual) in the nominative, accusative and genitive cases and deletion of (ن).
- Complete conjugation of all the four kinds of the Perfect Verb (positive, negative & active and passive mood):
فعل – قد فعل – كان فعل – كان يفعل
- Conjugation of المضارع with prefix لن (active & passive).

Unit 2 (15 Hours)

- جمع المذكر السالم (Sound Masculine Plural) in nominative, accusative and genitive cases and deletion of (ن) .
- جمع المؤنث السالم (Sound Feminine Plural) in nominative, accusative and genitive cases.
- الجمع المكسر (Broken Plural) in nominative, accusative and genitive cases.
- Conjugation of المضارع with prefix لم (active & passive).

Unit 3 (15 Hours)

- الاسم المنقوص definition and case.
- لا لنفي الجنس use and case.
- أصبح – صار – ليس – كان Use and case of the
- إن وأخواتها Use and case of

- Complete conjugation of أبواب الفعل الثلاثي المزيد فيه

| | | | | | | | |
|-------|--------|-------|-------|-------|--------|--------|---------|
| تفعيل | مفاعلة | إفعال | تفعّل | تفاعل | انفعال | افتعال | استفعال |
|-------|--------|-------|-------|-------|--------|--------|---------|

Practical component (if any) - NIL

Essential/recommended readings

1. Dr. W. A. Nadwi: A Practical Approach to the Arabic Language Vol.1 & 2, New Delhi.
2. J. A. Haywood & H. M. : A New Arabic Grammar, New Delhi.
3. S.A. Rahman: Teach Yourself Arabic, New Delhi.

4. عبدالستار خان : عربي كا معلم ، دهلي

5. علي جارم ومصطفى أمين: النحو الواضح، القاهرة

6. أنطوان الدحداح: معجم تصريف الأفعال العربية، دهلي

Suggestive readings

1. R.I. Faynan: Essential Arabic, New Delhi
2. Amir Jamal: Arabic Learn the Easy Way, New Delhi
3. عبد الماجد ندوي: معلم الإنشاء (الجزء الأول)، لکناؤ

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 6 ELEMENTARY ARABIC TRANSLATION

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Elementary Arabic Translation | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To make learners familiar with Indo-Arab Relations in general.
2. To make them know Indo-Arab Relations in Modern Period.

Learning outcomes

The Learning Outcomes of this course are as follows:

After completing this course the learner will be able to:

1. Know about Indo-Arab Relations.
2. Have the knowledge of India and the Arab world and the relations they have.

SYLLABUS OF DSC-6

Unit 1 (15 Hours)

- Translation based on simple and compound usage of the following as

خير & مبتدأ

- المركب الإشاري
- المركب الإضافي
- المركب الوصفي

Unit 2 (15 Hours)

- Translation based on different formations of singular, dual and plural.

Unit 3 (15 Hours)

- Translation of sentences based on إن وأخواتها
- Translation of sentences based on أصبح & صار – ليس – كان

Practical component (if any) - NIL

Essential/recommended readings

1. Dr. W. A. Nadwi: A Practical Approach to the Arabic Language Vol.1 & 2, New Delhi.
2. J. A. Haywood & H. M. : A New Arabic Grammar, New Delhi.
3. S.A. Rahman: Teach Yourself Arabic, New Delhi.

4. عبدالستار خان : عربي كا معلم ، دهلى

5. الدكتور منظور خان: نحو الإنشاء والترجمة، جامو وكشمير

Suggestive readings

1. R.I. Faynan: Essential Arabic, New Delhi
2. Amir Jamal: Arabic Learn the Easy Way, New Delhi.
3. Md. Quamruddin: Translation Made Easy, U.P.

4. عبد الماجد ندوي : معلم الإنشاء (الجزء الأول), لکناؤ

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Category II

B.A. Programmes with Arabic as Major discipline

DISCIPLINE SPECIFIC CORE COURSE – 3 INTRODUCTORY ARABIC-2

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introductory Arabic-2 | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To make them familiar with further basics of Arabic.
2. To enable them to read and write with further fundamental rules of Arabic.

Learning outcomes

The Learning Outcomes of this course are as follows:

After completing this course the learner will be able to:

1. Develop skills of reading and writing.
2. Read, understand and comprehend simple structures of Arabic sentences.

SYLLABUS OF DSC-3 (CATOGORY-II)

Unit 1 (15 Hours)

Arabic Text-1

Lessons: 17,18,19,20,21,22,23,24,25,26,27

Prescribed Book:

القراءة الواضحة (الجزء الأول)

مولانا وحيد الزمان قاسمي كير انوي

Unit 2 (15 Hours)

Arabic Text-2

Lessons: 28,29,30,31,35,36,37,38,41,42,43

Prescribed Book:

القراءة الواضحة (الجزء الأول)

مولانا وحيد الزمان قاسمي كير انوي

Unit 3 (15 Hours)

Comprehension & Applied Grammar

Lessons: 17,18,19,20,21,22,23,24,25,26,27, 28,29,30,31,35,36,37,38,41,42,43

Prescribed Book:

القراءة الواضحة (الجزء الأول)

مولانا وحيد الزمان قاسمي كير انوي

Practical component (if any) - NIL

Essential/recommended readings

1. Dr. W. A.Nadwi: A Practical Approach to the Arabic Language Vol.1, New Delhi.
2. Dr. Amir Jamal: Arabic Learn the Easy Way, New Delhi.

3. علي جارم ومصطفى أمين: النحو الواضح، القاهرة

4. مولانا عبد الرحمن امرتسرى: كتاب النحو، پانی پت

Suggestive readings

1. J. A. Haywood & H. M.: A New Arabic Grammar, New Delhi.
2. Prof. R.I. Faynan: Essential Arabic, New Delhi.

3. مولانا عبد الماجد الندوي: معلم الإنشاء، لکنؤ

4. عبد الستار خان: عربی کا معلم، دہلی

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 4
ARABIC: TEXT, GRAMMAR & TRANSLATION -II

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Arabic: Text, Grammar & Translation-II | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To make the learners familiar with the Arabic language skills.
2. To make them familiar with grammar rules required at the second stage of learning Arabic.
3. To enhance their vocabulary through the given text and understand the different structures of sentences.

Learning outcomes

The Learning Outcomes of this course are as follows:

After completing this course the learner will be able to:

1. Read the Arabic text.
2. Understand and solve grammar based exercises.
3. Translate sentences based on learnt grammar.

SYLLABUS OF DSC-4 (CATEGORY-II)

Unit 1 (15 Hours)

Arabic Text

Lessons: 13,14,15,16,17,18,19,20,23,24,26,27
(Semester-Two)

Prescribed Book:

My Arabic Reader
Elementary Level
Dr. Wali Akhtar Nadwi

Unit 2 (15 Hours)

Grammar:

- Singular, Dual & Plural
- Sound Masculine Plural
- Sound Feminine Plural
- Broken Plural
- Doer & Object
- Conjugation of the Past Tense
- Conjugation of the Future Tense
- Groups of Triliteral Verbs
- Imperative
- Prohibitive
- Cardinal Number (1 to 10)

Unit 3 (15 Hours)

Translation:

Translation English-Arabic-English based upon the Grammar Topics learnt.

Practical component (if any) – NIL

Essential/recommended readings

1. Prof. W. A. Nadwi: A Practical Approach to the Arabic Language Vol.-1, New Delhi.
2. Reading material prepared by the Department of Arabic, ZHDC, D.U.

Suggestive readings

1. Prof. S.A. Rahman: Teach Yourself Arabic, New Delhi.
2. Prof. R.I. Faynan: Essential Arabic, New Delhi.
3. Dr. Amir Jamal: Arabic Learn the Easy Way, New Delhi.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Category III

B.A. Programmes with Arabic as non-Major

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES

GENERIC ELECTIVES (GE-4): LET US SPEAK ARABIC-1

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) | Department offering the course |
|------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Let Us Spoken Arabic-I | 4 | 3 | 1 | 0 | Class XII Pass | NIL | Arabic |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To teach learners how to speak, read and write the language.
2. To make them comfortable in using the language.
3. To help them improve fluency in Arabic speaking.

Learning outcomes

The Learning Outcomes of this course are as follows:

By studying this course the student will be able to:

1. Learn the basic vocabulary and phrases useful in speaking and conversation.
2. Learn the formal and informal greetings.
3. Learn conversational dialogues of different occasions.

SYLLABUS OF G.E.-4

Unit 1 (15 Hours)

Lessons on Alphabet

- Lessons on Arabic alphabet along with some frequently used words which include such letters.
- Common Expressions
- Formal and Informal Greetings
- Greeting of Special Days and Times
- Expressing Thanks, Excuse and Apology etc.
- Acquaintance
- Introducing oneself and acquainting with others
- Asking for guidance or directions

Unit 2 (15 Hours)

• Questions

- Introducing common question-words and mode of questioning Conversation on special occasions

• Travel:

- Booking and reservation
- Modes, vehicles and methods of transport
- Sections and formalities in an airport, documents etc.

• Hospital:

- Sign boards
- Staff and services, common diseases
- Methods of treatment and medication

Unit 3 (15 Hours)

Vocabulary related to Shopping:

- Types and sections
- Rates and bargaining
- Currencies
- Selling and buying
- Billing and Payments
- Numeral up to 10
- Date & Timing
- Week days
- Use of calendar: Year, months, and dates, Hijri date system

Practical component (if any) - NIL

Essential/recommended readings

1. Reading material prepared by the Department of Arabic, ZHDC, D.U.
2. Makhdoom Sabri: English Urdu And Arabic Guide, Delhi
3. Rapidex (Arabic Version), New Delhi
4. Prof. S.A. Rahman: Let Us Speak Arabic, New Delhi.
5. Mohd. Haroon Rashid & Khalid Parwez: Arabic Conversation Book, New Delhi.
6. Badruz Zaman Qasmi Kairanwi: Learn to Speak Arabic & English, Delhi
7. البروفيسور الدكتور سيد محمد اجتباء الندوي: التعبير والمحادثة العربية، دلهي

Suggestive readings

1. Prof. R.I. Faynan: Essential Arabic, New Delhi.
2. Dr. Amir Jamal: Arabic Learn the Easy Way, New Delhi.
3. V. Abdur Rahim: Madinah Arabic, Vol. 1, New Delhi.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Elementary Arabic Grammar & Translation | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To teach elementary Arabic grammar.
2. To let the Learners practice sentences based on the grammatical points.
3. To make them familiar with Arabic structures based upon elementary grammar.
4. To teach learners basic rules of Arabic translation
5. To enable them to translate simple sentences.

Learning outcomes

The Learning Outcomes of this course are as follows:

By studying this course the student will be able to:

1. Read simple sentences correctly.
2. Form simple sentences based on the elementary-level grammar.
3. Free from committing errors in making Arabic sentences.
4. Learn basic rules of Arabic translation through practice.
5. Learn to translate simple sentences based on the prescribed grammatical rules.

SYLLABUS OF G.E.-5

Unit 1 (15 Hours)

Grammar & Translation topics:

- Attached pronouns
- Subject & Predicate
- Annexation
- Kinds of Definite Nouns

Unit 2 (15 Hours)

Grammar & Translation topics:

- Perfect verb
- Imperfect verb
- Imperative verb
- Prohibitive verb

Unit 3 (15 Hours)**Grammar & Translation topics:**

- Verbal sentences
- The Object & the Doer
- Preposition
- Adverb of time & place

Practical component (if any) – NIL**Essential/recommended readings**

1. Prof. W. A. Nadwi: A Practical Approach to the Arabic Language Vol.1, New Delhi.
2. Dr. Amir Jamal: Arabic Learn the Easy Way, New Delhi.
3. Abdus Sattar Khan: Arabi Ka Muallim. New Delhi.
4. Prof. Moinuddin Azami: Method of Translation, Calicut.
5. Ali Jarim Wa Mustafa Amin: Al-Nahw Al-Wadih fi Qawaid Al-lugha Al-Arabiyya, Al-Qahira.
6. Prof. S.A. Rahman: Teach Yourself Arabic, New Delhi.
7. Prof. R.I. Faynan: Essential Arabic, New Delhi.

Suggestive readings

1. Muhammad Sajid Qasmi: Taysirul Insha', Deoband
2. Dr. Md. Quamruddin: Translation Made Easy, U.P.
3. Syed Ali: Arabic For Beginners, Delhi
4. Maulana Abdur Rahman Amritsari: Kitabun Nahw, Delhi

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Functional Arabic For Daily Use | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To teach the learners basic functional Arabic.
2. To make them familiar with vocabulary of daily use.

Learning outcomes

The Learning Outcomes of this course are as follows:

By studying this course the student will be able to:

1. Learn basic vocabulary of functional Arabic.
2. Write, speak and communicate using vocabulary of daily use.

SYLLABUS OF G.E.-5

Unit 1 (15 Hours)

Simple sentences based on the following topics:

- Self-introduction
- In the college
- In bus/train/airplane)

Unit 2 (15 Hours)

Simple sentences based on the following topics:

- In hospital
- In a mall/market
- In the office

Unit 3 (15 Hours)

Simple sentences based on the following topics:

- At home
- At grocery shop
- In the bank

Practical component (if any) – NIL

Essential/recommended readings

1. Reading material prepared by the Department of Arabic, ZHDC, D.U.
2. Makhdoom Sabri: English Urdu And Arabic Guide, Delhi
3. Rapidex (Arabic Version), New Delhi
4. Prof. S.A. Rahman: Let Us Speak Arabic, New Delhi.

DEPARTMENT OF ENGLISH
BA (Hons.) English
Category-I

DISCIPLINE SPECIFIC CORE COURSE -4 (DSC-4) – : 14th to 17th Century English Poetry

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC 4: 14 th to 17 th Century English Poetry | 4 | 3 | 1 | 0 | Passed Class XII with English from List A in CUET | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To introduce the discipline of literary studies in English in a chronological manner, with specific reference to the social and cultural determinants of the period under review.
- To illustrate the ability of poetry to articulate the need for social and cultural reform.

Learning outcomes

The Learning Outcomes of this course are as follows:

- By studying this course, students will be able to develop a basic sense of the tools and methods employed by the poetry of the period to analyse and change social and political hierarchies.
- Students will inculcate a foundational understanding of the distinctive ways in which poetry works.

SYLLABUS OF DSC-4

UNIT – I (15 Hours)

1. Geoffrey Chaucer: 'General Prologue' and 'Pardoner's Tale' from *Canterbury Tales*

UNIT – II (15 Hours)

2. Philip Sidney: 'Sonnet I'
3. Walter Raleigh: 'The Passionate Man's Pilgrimage'
4. John Donne, 'Sunne Rising,' 'The Canonization,' 'The Good Morrow'

UNIT – III (15 Hours)

5. John Milton: 'Book I', *Paradise Lost*

Practical component (if any) - NIL

Essential/recommended readings- as listed in the units

Suggestive readings:

1. Philip Sidney, *An Apology for Poetry*. ed. Forrest G. Robinson, Indianapolis: Bobbs Merrill, 1970. pp 13–18
2. *The Holy Bible*, Genesis, Chap. 1–4, *The Gospel* according to St. Luke, Chap. 1–7 & 22–4.
3. Wimsatt, W. K. *The Verbal Icon*, 1954.
4. Hill, Christopher. *Milton and the English Revolution*. London: Faber and Faber, 1977.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5 (DSC-5): 16th & 17th Century English Drama

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC 5- 16 th & 17 th Century English Drama | 4 | 3 | 1 | 0 | Passed Class XII with English from List A in CUET | NIL |

Learning Objectives:

The Learning Objectives of this course are as follows:

- To take forward the development of literary studies in English with specific reference to the theatre in England during the period under survey.
- To open up a sense of theatre as a space of continual experimentation and change.

Learning outcomes:

The Learning Outcomes of this course are as follows:

- By studying this course, students will be able to develop a basic sense of the way in which drama works as genre on its own terms.
- Students' imagination will be stimulated by showing how theatre can analyse and critique political and cultural hierarchies successfully.

SYLLABUS OF DSC- 5

UNIT – I (15 Hours)

1. Christopher Marlowe: *Doctor Faustus*

UNIT – II (15 Hours)

2. William Shakespeare: *Macbeth*

UNIT – III (15 Hours)

3. Aphra Behn: *The Rover*

Practical component (if any) - NIL

Essential/recommended readings- as listed in the units

Suggestive readings (if any):

1. Greenblatt, Stephen. *Shakespearean Negotiations: The Circulation of Social Energy in Renaissance England*. Oxford: Clarendon P, 1988.
2. Adelman, Janet. *Suffocating Mothers: Fantasies of Maternal Origin in Shakespeare's Plays, Hamlet to The Tempest*. New York and London: Routledge, 1992.

3. Dollimore, Jonathan and Alan Sinfield eds. *Political Shakespeare*. Ithaca and London: Cornell UP, 1985.
4. Black, Jeremy Black. *England in the Age of Shakespeare*. Bloomington: Indiana UP, 2019.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE– 6 (DSC-6): 18th Century Literature

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| 18 th Century Literature | 4 | 3 | 1 | 0 | Passed Class XII with English from List A in CUET | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To offer a continuing sense of the evolution of literary studies in English, so that the quiet revolutions of the eighteenth century in England resonate with significance in contemporary times.
- To study the period under survey through a combination of genres to focus on movements of empire, capital and emancipation.

Learning outcomes

The Learning Outcomes of this course are as follows:

- By studying this course, students will be able to understand the way in which the 'Age of Reason' shapes contemporary life.
- Students will be alerted to understanding the ways in which major lines of thought and action may have understated beginnings.

SYLLABUS OF DSC-6

UNIT – I (15 Hours)

1. Alexander Pope: *Rape of the Lock*

UNIT – II (15 Hours)

2. Jonathan Swift: *Gulliver's Travels*

UNIT – III (15 Hours)

3. Oliver Goldsmith: *The Vicar of Wakefield*

Practical component (if any) - NIL

Essential/recommended readings- as listed in the units

Suggestive readings:

1. Butler, Marilyn. *Romantics, Rebels and Reactionaries: English Literature and Its Background, 1760-1830*. Oxford: Oxford University Press, 1981.
2. Habermas, Jurgen. *The Structural Transformation of the Public Sphere: An Inquiry into the Category of Bourgeois Society*. 1962. Cambridge, Mass: MIT, 1989.
3. Nussbaum, Martha. *The Cosmopolitan Tradition: A Noble but Flawed Ideal*. Cambridge, Mass: Harvard University Press, 2019.
4. Hobsbawm, Eric. *The Age of Revolution: Europe 1789-1848*. London: Wiedenfeld and Nicholson, 1962.
5. 'Pope's Intellectual Character: Pope and Dryden Compared', from 'The Life of Pope', *The Norton Anthology of English Literature, vol. 1*, ed. Stephen Greenblatt, 8th edn. New York: Norton, 2006. pp 2693–2694, 2774–2777
6. Defoe, Daniel. 'The Complete English Tradesman' (Letter XXII), 'The Great Law of Subordination Considered' (Letter IV), & 'The Complete English Gentleman', *Literature and Social Order in Eighteenth-Century England*. ed. Stephen Copley, London: Croom Helm, 1984.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Pool of General Electives (GE) Courses
Offered by Department of English
Category-Iv

GENERIC ELECTIVES (GE-7) Research Methodology

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|----------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Research Methodology | 4 | 3 | 0 | 1 | Passed Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To offer practical training in academic writing.
- To introduce the basics of research and its methods.

Learning outcomes

The Learning Outcomes of this course are as follows:

- By studying this course, students will be able to acquire in-depth and practical knowledge regarding academic reading and writing.
- This course will enable students to write a research paper as part of project work.

SYLLABUS OF GE-7

UNIT – I (15 Hours)

1. Introduction to Practical Criticism
2. Conceptualizing and Drafting of a Research Proposal

UNIT – II (15 Hours)

1. Style Manuals: Notes, References and Bibliography/Annotated Bibliography

UNIT – III (15 Hours)

1. Workshop on Topic Development
2. Workshop on Research Proposal

Practical component (if any) – 30 Hours

- Writing a Research Paper (2000 to 2,500 words)

Essential/recommended readings

1. Flick, Uwe. *Introducing Research Methodology: A Beginner's Guide to Doing a Research Project*. New Delhi: Sage, 2017.
2. Leki, Ilona. *Academic Writing: Exploring Processes and Strategies*. 2nd edn. New York: CUP, 1998.
3. Dev, Anjana N (ed.). *Academic Writing and Composition*. New Delhi: Pinnacle, 2015.
4. Richards, I. A. *Practical Criticism: A Study of Literary Judgement*. New York: Harcourt Brace, 1929.
5. Bailey, Stephen. *The Essentials of Academic Writing for International Students*. London: Routledge, 2015.
6. Orwell, George. *Politics and the English Language*. United Kingdom: Sahara Publisher Books, 1946.

Suggestive readings-

1. Hamp-Lyons, Liz and Ben Heasley. *Study Writing: A Course in Writing Skills for Academic Purposes*. Cambridge: CUP, 2006.
2. Kumar, Ranjit, *Research Methodology: A Step by Step Guide for Beginners*. New Delhi: Sage, 2014.
3. Phanse, Sameer. *Research Methodology: Logic, Methods and Cases*. New Delhi: OUP, 2016.
4. Griffin, Gabrielle, ed. *Research Methods for English Studies*. 2nd edn. New Delhi: Rawat Publications. 2016 (Indian Reprint)

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE) LANGUAGE COURSES

GENERIC ELECTIVES LANGUAGE COURSES (GE Language 1) English Language through Literature-II

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| English Language Through Literature-II | 4 | 3 | 1 | 0 | Passed Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To develop in students the ability and confidence to process, understand and examine different kinds of texts-verbal and written-that they encounter in everyday life.
- To enable students to identify and understand social contexts and ethical frameworks in the texts they encounter.
- To encourage suitable research—to recognize sources; to distinguish fact from opinion/editorialization; produce objective versus subjective pieces
- To learn skilled comprehension; listening/reading; skimming; summarizing; précis writing; paraphrasing; note making
- To identify key topics/arguments/ideas
- To accomplish writing goals: creating an essay; writing a thesis statement; producing topic sentences; developing organised paragraphs; evolving the skill of producing suitable transitions between paragraphs
- To enable students to write in expository argumentative and descriptive modes

- To help students identify and use the characteristic features of various writing forms: letters; programmes reports/press-releases; newspaper; feature articles; fiction and nonfiction
- To enable students to choose between expository, argumentative, descriptive and narrative writing styles to assemble their own writing

Learning outcomes

The Learning Outcomes of this course are as follows:

- By studying this course, students will be able to inculcate confident expression.
- Students will be able to articulate their own views confidently as their language skills sufficiently empower them to converse, research and collate information from various textual sources—verbal or written.

GENERIC ELECTIVES (GE-): 14 WAR REPORTING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|----------------------------|----------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| GE-14 War Reporting | 4 | 3 | 0 | 1 | Passed Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To train students to apply a historical perspective to the media coverage of conflict and war reporting.

Learning outcomes

The Learning Outcomes of this course are as follows:

- By studying this course, students will be able to develop an in-depth awareness of the difficulties involved in conflict reporting while keeping in mind ethical standards to their analysis of conflict reporting as war and conflict journalists.

SYLLABUS OF GE-14

UNIT – I (15 Hours)

Unit 1: Introduction

- Conflict Reporting and War Reportage: Concepts
- Information warfare and dominance
- Issues & Obstacles in war reporting
- Dimensions of War Coverage: Organizations and Reporters
- Working lives of War Correspondents
- Components and themes in war reporting, construction of ‘enemy’
- Concept of ‘hybrid war’

UNIT – II (15 Hours)

Unit II: Issues

- Risks and Risk Management, Threats to personal safety
- Objectivity, Rationality and accuracy of media coverage
- Competing narratives & Viewpoints
- Cultural differences in reporting the war on terror
- Challenges of reporting from a foreign land

UNIT – III (15 Hours)

Unit III: Challenges and Ethical Concerns

- Media Opinions and Advocacy
- Contemporary changes in warfare & Media environment
- Women in war reporting: discrimination, derogatory attitudes, sexual harassment
- News Media Visuals, Images of death spectacle
- Technological developments and its uses in war
- Digital Platforms, blogs, Twitter, chats

Practical component (if any) – 30 Hours

The students are expected to do projects, critically examining the coverage of wars in each phase of development of the media. The students must submit write ups on the reporting of wars in relation to the limitations of technology in each phase of the media beginning from the

coverage from the era of print journalism to the present times. Debates and discussions will be held on the issues of conflict and the role of international bodies in the call for peace. The students must submit projects on the ethical dimensions of war reporting with reference to global audiences and the pressures of professionalism vs. patriotism. They must write a critical report comparing the reportage of war on traditional/mainstream media with posts/reports on social media platforms of the Russian-Ukraine war and its implications on international politics and economy.

| Persian Prose: Some Selections | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives:

The Learning Objectives of this course are as follows:

1. To equip the students with Simple Persian Prose
2. To acquaint the students with Iranian culture through Modern Persian Prose

Learning outcomes:

The Learning Outcomes of this course are as follows:

- By learning this course, the students will be acquainted simple Persian prose
- By learning this course, the students will be acquainted with Iranian culture through samples of Modern Persian prose

SYLLABUS OF DSC-1

UNIT – I (9 Hours)

Persian Prose: Some Selections

The following lessons only:

- Faslha-i-Saal
- Zimistan-o-Tabistan
- Bahar
- Mazandaran
- Ruznameh
- Jashn-e-Nauruz

UNIT – II (9 Hours)

- Jashn-e-Mehregaan
- Jashn-e-Sadeh
- Firdausi
- Sa'di Shirazi
- Umar Khayyam (two parts)
- Chaupan-e-Durughgo

UNIT – III (9 Hours)

- Dahqaan-e-Fidakaar
- Shaban-o-Gusfand
- Kudak-e-Hushyaar
- Gawahi-e-Darakht
- Se Duzd-e-Harees
- Eidi

UNIT – IV (9 Hours)

- Comprehension and Translation from Persian to English, Hindi or Urdu

UNIT – V (9 Hours)

- Explanation of a chapter in English, Hindi, or Urdu

Essential/recommended readings:

1. Kitab-e-Farsi: Baraye Classha-e-Muqaddemati, Department of Persian, University of Delhi, Delhi-110 007.
2. Kitab-e-Farsi: Baraye Class-hae Diplom, Department of Persian, University of Delhi, Delhi-110 007.
3. Kitab-e-Farsi: B.A. (Prog.), Part-I/II/III, Department of Persian, University of Delhi, Delhi-110 007
4. Nisab-e-Jadeed Farsi, Jayyad Press, Ballimaran, Delhi-110 006. -
5. Baghcheban, Saminah: Farsi Barai Ghair Farsi Zaban, Idarah-e-Adabiyat-e-Delhi, Ballimaran, Delhi.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY THE DEPARTMENTS

Credit distribution, Eligibility and Pre-requisites of the Course:

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Intermediary level Persian | 4 | 3 | 1 | 0 | 12 th Pass | Student should have studied GE-1 of 1 st semester |

Learning Objectives

The Learning Objectives of this course are as follows:

- To make the students equipped with intermediary level Persian
- To make the students more efficient to form Persian sentences
- To make the students more fluent in Persian language

Learning outcomes

The Learning Outcomes of this course are as follows:

- By learning this course, the students will be equipped with intermediary level Persian
- By learning this course, the students will be more efficient to form Persian sentences
- By learning this course, the students will be more fluent in Persian language

SYLLABUS OF GE-4

UNIT – I (9 Hours)

- Use of verbs in Present, Past and Future tenses
- Opposite words
- Degrees
- Personal and Possessive Pronouns
- Objectives, Compound Verb and Relative Clause
- Present Participle
- Active and Passive Voice
- Conjugation
- Technical Words
- Translation: English to Persian and vice versa
- Text Reading and comprehension from chapter no.16 to 30 of book of Kitab-e-Farsi by Samina Baghcheban

UNIT – II (9 Hours)

- Intermediary Persian Grammar:
- Use of Verbs in Present, Past and Future Tenses
- Degrees
- Personal and Possessive Pronouns
- Use of objectives
- Compound Verbs
- Relative Clause

UNIT – III (6 Hours)

Conjugation:

- In Present, Past and Future Tenses

UNIT – IV (6 Hours)

- Opposite Words
- Use of Technical Words in sentences

UNIT – V (6 Hours)

- Translation from Persian to English.
- Translation from English to Persian. Reading of Unseen Paragraphs of Persian

UNIT – VI (9 Hours)

- Chapter 16 to 30 from Kitab-e-Farsi by: Samina Baghcheban, Exercise of the chapters of the above book

Essential/recommended readings

1. Samina Baghcheban: Kitab-e-Farsi, Idarah-e-Adabyat, Jayyad Press, Ballimaran, Delhi-110 006

Suggestive readings

1. Kumar, Rajinder: Elementary Persian Grammar, Harjeet Publication, Delhi-110 034, 2009.

GENERIC ELECTIVES (GE-5): Persian Translation of Indian writings during Mughal**Credit distribution, Eligibility and Pre-requisites of the Course:**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Persian Translation of Indian writings during Mughal Period | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To equip the students with the literary and historical importance of Persian Translation of Indian writings during Mughal Period
- To familiarize the students with the social and cultural history of Mughal Period
- To provide the students introductory knowledge of Persian Translation of Indian writings during Mughal Period

Learning outcomes

The Learning Outcomes of this course are as follows:

- By learning this course, the students will be able to know about the literary and historical importance of Persian Translation of Indian writings during Mughal Period
- By learning this course, the students will be able to know the social and cultural history of Mughal Period
- By learning this course the, the students will be able to get the introductory knowledge of Persian Translation of Indian writings during Mughal Period

SYLLABUS OF GE-5**UNIT – I (12 Hours)**

- Literary and historical importance of Persian translations of Indian works

UNIT – II (9 Hours)

- Social and cultural history of Mughal Period

UNIT – III (12 Hours)

Introduction to the following translation works:

- Singhasan Battisi
- Mahabharata
- Lilawati
- Tarikh-i-Kashmir
- Moajam-ul-Buldan
- Baharul Asmar
- Har Bans
- Zeech-e-Mirzai
- Injeel
- Ramayana
- Kalila wa Dimneh
- Tuzuk-i-Baburi
- Jama-e-Rashidi
- Tajik
- Nuzhat ul Arwah wa Nuzhat ul Afrah
- Athardeen

UNIT – IV (12 Hours)

Introduction to the following translators:

- Mulla Abdul Qadir Badayuni
- Abul Fazal Allami
- Mulla Husain Waiz
- Mir Fatehullah Shirazi
- Shaikh Mubarak
- Abul Faiz Faizi
- Abdul Rahim Khan i Khanan

Essential/recommended readings

1. Shafaq, Razazadeh: Tarikh-e-Adabiyat-e-Iran, Translated in Urdu by Sayyed Mubarizuddin Rafat, Kutubkhana, Khurshidia, Urdu Bezar, Lahore, 2014.
2. Shibli Nomani: Shair-ul Ajam, Shibli Academy, Azamgarh (U.P.).

DEPARTMENT OF PHILOSOPHY

Category I

Philosophy Courses for Undergraduate Programme of study with Philosophy as a Single Core Discipline (B.A. Honours in Philosophy in three years)

DISCIPLINE SPECIFIC CORE COURSE -4 (DSC-4) – Fundamentals of Philosophy

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fundamentals of Philosophy DSC 4 | 4 | 3 | 1 | 0 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- The course is designed for the grasp of the fundamental problems of the subject from the writings of original philosophers.
- The course will analyse problems like the problem of existence, like what is there, and why is anything there, what is justice; the origin of ideas, how we think about the world, what is the self, etc.
- A broad and deep approach to the subject is envisaged, learning from sources spread across centuries and continents.

Learning outcomes

The Learning Outcomes of this course are as follows:

- The student will learn how original philosophers express themselves about the great problems of philosophy
- The student will acquire the skill of argumentation and the ability to find flaws in the arguments of the philosophers
- The student will improve the grasp in the subject matter
- The student's curiosity will be aroused to explore the subject further in a meaningful way

SYLLABUS OF DSC-4

UNIT 1: Being

(12 Hours)

1. What is Being?
2. Why does anything exist?

Essential/ Recommended Readings

Derek Parfit (1998) Why Anything? Why this? <https://www.lrb.co.uk/the-paper/v20/n02/derek-parfit/why-anything-why-this>

Selection from Aristotle's Metaphysics "The Process of Change" in Moore, Brooke Noel and Bruder, Kenneth (2011). *Philosophy: The Power of Ideas*. (Indian Edition) McGraw-Hill, pg. 71-72

UNIT 2: Ideas, Thought and World

(12 Hours)

1. The Origin of Ideas
2. What is thought?
3. Social Construction

Essential/Recommended Readings

Moore, Brooke Noel and Bruder, Kenneth (2011). *Philosophy: The Power of Ideas*. (Indian Edition) McGraw-Hill, pg. 143 – 145 (Section on Hume and Kant)

Donald Davidson's "The Problem of Objectivity" in Moore, Brooke Noel and Bruder, Kenneth (2011). *Philosophy: The Power of Ideas*. (Indian Edition) McGraw-Hill, pg. 243-245

Paul Boghossian's "What is Social Construction" in Moore, Brooke Noel and Bruder, Kenneth (2011). *Philosophy: The Power of Ideas*. (Indian Edition) McGraw-Hill, pg. 245-248

UNIT 3: Consciousness, Knowledge and Self

(12 Hours)

1. Perspectives on Consciousness and Knowledge
2. Perspectives on the Perception of Self

Essential/Recommended Readings

Mohanty, J. N. (1979). Consciousness and knowledge in Indian philosophy. *Philosophy East and West* 29 (1):3-10.

Matilal, Bimal Krishna (2002) The perception of Self in the Indian tradition. In J. Ganeri (ed.) *Mind, Language and World: The Collected Essays of Bimal Krishna Matilal*, OUP, pp. 299-314

UNIT 4: Justice

(9 Hours)

1. What is Justice?
2. Might is Right or Right is Might?

Essential/ Recommended Readings

Plato's *Republic*, Book 1, 327a – 345a. In Christopher Rowe's translation, Penguin Books, 2012

Suggestive Readings

Blackburn, Simon (1999). *Think: A Compelling Introduction to Philosophy*. Oxford University Press.

Moore, Brooke Noel and Bruder, Kenneth (2011). *Philosophy: The Power of Ideas*. McGraw-Hill
Indian edition

DISCIPLINE SPECIFIC CORE COURSE – 5 (DSC-5): Greek Philosophy

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Greek Philosophy DSC 5 | 4 | 3 | 1 | 0 | Class XII | NIL |

Learning Objectives

- This course traces the origins of philosophy in the Western tradition in the thinkers of Ancient Greece.
- It begins with the Pre-Socratic natural philosophers like Thales and Anaximander. Then it moves on to Heraclitus and Parmenides of Elea.
- Then, it discusses the counter position of Sophists and Socrates. Finally, there is discussion on Plato's theory of virtue and Forms.

Learning Outcomes:

- The student will comprehend the foundations and origins of philosophy through the lens of early Greek philosophy
- The student will broaden the grasp of the subject and understand how philosophy arose from a close tie with cosmological and logical thinking
- The student will appreciate the role of reason in philosophy and the role of law and order in the structure of the world

Unit-1: Naturalism (Cosmos and Arche)

(12 Hours)

1. Thales and Anaximander

Essential/Recommended Reading:

J. Barnes. *Early Greek Philosophy*. Harmondsworth: Penguin Books, 1981. p.xi-xxv.

Curd, Patricia. *A Presocratic Reader: Selected Fragments and Testimonia* Second Edition Edited, with Introduction. Translations by Richard D McKirahan and Patricia Curd (Hackett Publishing Company, Inc, 2011) ,p.13-19

Warren, James & Frisbee Sheffield (eds.). *The Routledge Companion to Ancient Philosophy*. Routledge: London and New York, 2014. Part-1., 94-124

Kirk, G.S and Raven, J.E, The Presocratic Philosophers: A Critical History with Selection of Texts (Cambridge; At The University Press, 1957) pp74-99

Unit 2: Change, Being and Becoming

(12 Hours)

1. Heraclitus: Doctrine of Flux.
2. Parmenides of Elea: Doctrine of Being and not-being.

Essential/Recommended Reading:

Curd, Patricia. A Presocratic Reader: Selected Fragments and Testimonia Second Edition Edited, with Introduction. Translations by Richard B. McKirahan and Patricia Curd (Hackett Publishing Company, Inc, 2011), p.39-65,

G.S Kirk and J.E. Raven, The Presocratic Philosophers, Chapters vi and x

GENERIC ELECTIVES (GE-2): Critical Thinking

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Critical Thinking GE 2 | 4 | 3 | 1 | 0 | Class XII | NIL |

Learning Objectives

- Critical Thinking aims at enabling a person to take decision in difficult situations. It is the ability to analyse the way one thinks and presents the evidence for one's own ideas rather than simply accepting it.
- It is creative, clear and to some extent reflective thinking. Being a cognitive trait, it trains students to construct good and sound arguments by eliminating false ones Course.

Learning Outcomes

This course

1. Helps in generating productive/creative ideas for further use in difficult situation.

2. Creates enthusiasm for taking a risk of dealing with difficult issues and finding a way out for solution
3. Provides valuable intellectual traits like courage, empathy, perseverance and faith in reason and encourage a flair for fairness and justice. As a result, a learner learns step by step how to arrive at an ideal solution keeping in mind all situational factors.
4. Provides clarity in thinking as well as proper understanding of an issue to make it precise for further analysis.
5. Helps to learn how to read, write and think critically, how to separate bad information from good information and helps in constructing cogent arguments.
6. Finally the learner becomes self-directed, self-monitored and self- corrective through this process of reflective thinking.

Unit 1: CRITICAL THINKING: BASIC COMPONENT (9 Hours)

1. Critical Thinking: An Introduction
2. Cognitive Biases
3. Arguments: Their Structure and Kinds
4. Persuasion through Logic: Logos, Ethos and Pathos

Essential/Recommended Reading:

1. Moore, Brooke N., et al. Critical thinking. Dubuque: McGraw-Hill Companies, Inc, 2015, Ch 1-2.

Unit 2: CRITICAL THINKING: A SECOND ORDER ACTIVITY (12 Hours)

1. Clear Thinking
2. Vagueness, Ambiguity, Generality and Definition of Terms
3. Credibility of Claims and Their Sources

Essential/Recommended Reading:

1. Moore, Brooke N., et al. Critical thinking. Dubuque: McGraw-Hill Companies, Inc, 2015, Ch 3-4.

4. Arbab-e-Nasr Urdu – Syed Mohammad

Category III

Multidisciplinary Courses for Undergraduate Programme of study with discipline as one of the Core Disciplines
(For e.g. courses for B.A. Programmes with Urdu (discipline's name) as Non-Major or Minor discipline)

DISCIPLINE SPECIFIC CORE COURSE (DSC-1): URDU-A, STUDY OF MODERN PROSE AND POETRY-II

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Urdu-A, Study of Modern Prose and Poetry-II | 4 | 3 | 1 | 0 | Urdu in Class XII or X | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To give knowledge of contemporary society of India through Urdu Poetry and Fiction.
- To give knowledge of literature such as Afsana, Mazmoon, Nazmein and Ghazalein.
- To give a glimpse of modern literature with special reference to Urdu Prose and Poetry.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understanding of concepts.
- Exercising concepts through writings.
- Demonstrating conceptual and textual understanding in test and exam.

SYLLABUS OF DSC-1

NASR:

UNIT – I (9 Hours)

3. Guzra Hua Zamana – Sir Syed (Matn ki Tadrees)
4. Murda Badast Zinda – Mirza Farhatullah Beg (Matn ki Tadrees)

UNIT – II (9 Hours)

7. Namak Ka Darogha – Prem Chand (Matn ki Tadrees)
8. Sawere Jo kal Ankh Meri Khuli – Patras Bukhari (Matn ki Tadrees)

NAZM:**UNIT – III (9 Hours)**

9. (i) Ik Khalish Hoti hai Mahsoos Rage Jaan Ke Qareeb – Hasrat (Matn ki Tadrees)
(ii) Wasl Ki Banti Hain In Baton Ki Tadbiren Kahin – Hasrat (Matn ki Tadrees)
10.(i) Kabhi Shakho Sabzao Barg Par – Jigar (Matn ki Tadrees)
(ii) Dil Gaya Raunaqe Hayaat Gai – Jigar (Matn ki Tadrees)

UNIT – IV (9 Hours)

9. (i) Kabhi Ae Haqiqate Muntazar – Iqbal (Matn ki Tadrees)
(ii) Sitaron Se Aage Jahan Aur Bhi Hain – Iqbal (Matn ki Tadrees)
10.Badli Ka Chand – Josh (Matn ki Tadrees)

UNIT – V (9 Hours)

- 11.Do Ishq – Faiz (Matn ki Tadrees)
12.Aawara – Majaz (Matn ki Tadrees)

Note: Hissa Nasr Aur Nazm Mein Shamil Tamam Takhliqkaaroon Ke Fanni Mahasin Se Bhi Rushanas Karaya Jae.

Essential/recommended readings

1. Jadeed Urdu Nasr Wa Nazm-I

Suggestive readings

1. Urdu Shairi Ka Fanni Irteqa – Dr. Farman Fatehpuri
2. Meer Amman Se Abdul Haq Tak – Sayyed Abdullah

Category-IV (Common Pool of Generic Electives)

Note: The Generic Electives courses offered in Semester-I are also open for Semester-II.

DEPARTMENT OF HINDI

Category-I

BA (HONS.) HINDI

हिंदी कविता : सगुण भक्तिकाव्य एवं रीतिकालीन काव्य

| COURSE | Nature of the Course | Total Credit | Components | | | Eligibility Criteria / Prerequisite |
|---|----------------------|--------------|------------|----------|-----------|-------------------------------------|
| | | | Lecture | Tutorial | Practical | |
| हिंदी कविता : सगुण भक्तिकाव्य एवं रीतिकालीन काव्य | कोर कोर्स (DSC) 4 | 4 | 3 | 1 | 0 | DSC |

Course Objective

- सगुण भक्तिकाव्य एवं रीतिकालीन काव्य का अध्ययन समयावधि की साहित्यिक स्थिति से अवगत कराएगा
- सामाजिक – राजनीतिक – सांस्कृतिक पृष्ठभूमि में कविता के अध्ययन – विश्लेषण की जानकारी देना

Course learning outcomes

- हिंदी के मध्यकालीन साहित्य का विशिष्ट परिचय प्राप्त होगा।
- ब्रजभाषा के समृद्ध साहित्य का रसास्वादन और आलोचनात्मक ज्ञान प्राप्त होगा।

Unit 1

10 घंटे

गोस्वामी तुलसीदास : रामचरित मानस,
(सुन्दर काण्ड)
गीताप्रेस, गोरखपुर

Unit 2

10 घंटे

सूरदास : भ्रमरगीतसार : (संपादक) आचार्य रामचंद्र शुक्ल
(नागरी प्रचारिणी सभा, वाराणसी, नई दिल्ली)

पद संख्या – (4,7,21,22,23,24,25,37,52,76,85)

Unit 3

10 घंटे

केशवदास – रामचंद्रिका : वन-गमन वर्णन

बिहारी – बिहारी रत्नाकार : श्री जगन्नाथदास 'रत्नाकार'
(शिवाला, वाराणसी)

छंद संख्या – 1, 62, 103, 127, 128, 143, 180, 347

Unit 4

15 घंटे

घनानंद – घनानंद (ग्रंथावली) ; संपा, विश्वनाथ प्रसाद मिश्र;
(वाणी वितान; बनारस-1)
सुजानहित (1, 4, 7, 18, 19, 38, 41)

भूषण – शिवभूषण तथा प्रकीर्ण रचना, विश्वनाथ प्रसाद मिश्र
छंद संख्या – 50, 104, 411, 420, 443, 512

हिंदी साहित्य का इतिहास (आधुनिक काल)

| COURSE | Nature of the Course | Total Credit | Componets | | | Eligibility Criteria / Prerequisite |
|--------------------------------------|----------------------|--------------|-----------|----------|-----------|-------------------------------------|
| | | | Lecture | Tutorial | Practical | |
| हिंदी साहित्य का इतिहास (आधुनिक काल) | कोर कोर्स (DSC) 5 | 4 | 3 | 1 | 0 | DSC |

Course Objective

- साहित्येतिहास की अध्ययन प्रक्रिया में आधुनिक साहित्य के विकास का परिचय
- साहित्य के स्वरूप और प्रयोजन का ज्ञान
- साहित्य और समाज के आपसी रिश्ते और कालजयी कृतियों का परिचय

Course learning outcomes

- विकास के क्रम में साहित्य के जरिए समाज और संस्कृति की पहचान के लिए साहित्येतिहास के अध्ययन का महत्व निर्विवाद है।
- साहित्येतिहास के अध्ययन का एक प्रयोजन साहित्य के विकास की गति और दिशा के साथ-साथ समाज के विकास को भी चिह्नित करना है।
- साहित्येतिहास के बिना साहित्य-विवेक का उचित विकास और निर्माण संभव नहीं। अतः साहित्य-विवेक के निर्माण के लिए साहित्येतिहास का अध्ययन जरूरी है।

Unit 1

10 घंटे

- मध्यकालीन बोध तथा आधुनिक बोध (नवजागरण की पृष्ठभूमि)
- नवजागरण की परिस्थितियाँ और भारतेन्दु युग
- महावीर प्रसाद द्विवेदी : हिंदी पत्रकारिता और खड़ी बोली आंदोलन
- स्वाधीनता आंदोलन और नवजागरणकालीन चेतना का उत्कर्ष, विभिन्न वैचारिक मत और हिंदी साहित्य से उनका संबंध

Unit 2

10 घंटे

- कथा साहित्य का विकास
- नाटक का विकास
- निबंध और अन्य गद्य विधाएँ (संस्मरण, यात्रा आख्यान, डायरी, रिपोर्टाज, रेखाचित्र, साक्षात्कार साहित्यिक पत्रकारिता और लघु पत्रिका)
- आलोचना का विकास

Unit 3

10 घंटे

- छायावाद : परिवेश और प्रवृत्तियाँ
- उत्तर छायावाद : परिवेश और प्रवृत्तियाँ
- प्रगतिवाद : परिवेश और प्रवृत्तियाँ
- प्रयोगवाद : परिवेश और प्रवृत्तियाँ
- नयी कविता : परिवेश और प्रवृत्तियाँ

15 घंटे

Unit 4

- साठोत्तरी कविता, नवगीत, समकालीन कविता
- समकालीन कथा और कथेतर साहित्य
- आलोचना और साहित्यिक पत्रकारिता
- अस्मितामूलक विमर्श : दलित, आदिवासी और स्त्री

हिंदी भाषा और लिपि का इतिहास

| COURSE | Nature of the Course | Total Credit | Components | | | Eligibility Criteria / Prerequisite |
|------------------------------|----------------------|--------------|------------|----------|-----------|-------------------------------------|
| | | | Lecture | Tutorial | Practical | |
| हिंदी भाषा और लिपि का इतिहास | GE/ Language | 4 | 3 | 1 | 0 | DSC |

Course Objective

इस पाठ्यक्रम का उद्देश्य हिंदी भाषा और लिपि के आरंभिक रूप से लेकर आधुनिक काल की विकास यात्रा को बताना है। भारत के संविधान में देवनागरी लिपि में लिखित हिंदी को संघ की राजभाषा घोषित किया गया है। हिंदी को पढ़ने वाले विद्यार्थियों के लिए पाठ्यक्रम के आरंभ में ही हिंदी भाषा संबंधी सामान्य जानकारी देना अत्यंत आवश्यक है। साथ ही पूरी दुनिया वैश्वीकरण युग में प्रवेश कर गई है। बाज़ार और व्यवसाय ने देशों की सीमाएँ लाँघ ली है। अतः ऐसे में भाषा का मजबूत होना आवश्यक है। यह पाठ्यक्रम बाज़ारवाद और भूमंडलीकरण की वैश्विक गति के बीच से ही हिंदी भाषा और उसकी लिपि के माध्यम से ही राष्ट्रीय प्रगति को भी सुनिश्चित करेगा क्योंकि सशक्त भाषा के बिना किसी राष्ट्र की उन्नति संभव नहीं है। यह पाठ्यक्रम वर्तमान संदर्भों के अनुकूल है। साथ ही इस पाठ्यक्रम का आधुनिक रूप रोजगारपरक भी है। कंप्यूटर को हिंदी से जोड़ना विद्यार्थियों को व्यावहारिक पहलू से अवगत करा सकेगा।

Course learning outcomes

1. इस पाठ्यक्रम के शिक्षण के निम्नलिखित परिणाम सामने आएँगे:
2. उपर्युक्त पाठ्यक्रम के माध्यम से हिंदी भाषा के सैद्धांतिक पहलू के साथ व्यावहारिक रूप का ज्ञान प्राप्त किया जा सकेगा
3. हिंदी भाषा की उच्च शैक्षिक स्तर की भूमिका के महत्वपूर्ण पक्ष को जाना जा सकेगा।
4. कंप्यूटर को हिंदी भाषा से जोड़ने पर हिंदी भाषा के व्यावहारिक ज्ञान को प्राप्त किया जा सकता है
5. वैश्विक युग में भाषा को सिद्धांतों के साथ-साथ व्यावहारिक रूप से भी जोड़ना होगा। अतः पाठ्यक्रम वर्तमान संदर्भों के भी अनुकूल है।
6. भाषा के बदलते परिदृश्य को आरंभ से अब तक की प्रक्रिया में समझना बहुत आवश्यक है। यह पाठ्यक्रम भाषा के आरंभ से लेकर वर्तमान को विविध आयामों में प्रस्तुत करता है जो विद्यार्थियों के लिए उपयोगी होगा।
7. शिक्षा को रोजगार से जोड़ना अत्यंत अनिवार्य है। यह पाठ्यक्रम भाषा की इस मांग को भी प्रस्तुत करता है।

Unit 1 हिंदी भाषा के विकास की पूर्वपीठिका

10 घंटे

- भारोपीय भाषा-परिवार एवं आर्यभाषाएँ (पालि, प्राकृत, अपभ्रंश आदि)
- हिंदी का आरंभिक रूप
- 'हिंदी' शब्द का अर्थ एवं प्रयोग
- हिंदी का विकास (आदिकाल, मध्यकाल, आधुनिककाल)

Unit 2 हिंदी भाषा का क्षेत्र एवं विस्तार

10 घंटे

- हिंदी भाषा : क्षेत्र एवं बोलियाँ

- हिंदी के विविध रूप (बोलचाल की भाषा, राष्ट्रभाषा, राजभाषा, संपर्क-भाषा)
- हिंदी का अखिल भारतीय स्वरूप

Unit 3 लिपि का इतिहास 10 घंटे

- भाषा और लिपि का अंतर्संबंध
- लिपि के आरंभिक रूप (चित्रलिपि, भावलिपि, ध्वनि-लिपि)
- भारत में लिपि का विकास

Unit 4 देवनागरी लिपि 15 घंटे

- देवनागरी लिपि का परिचय एवं विकास
- देवनागरी लिपि का मानकीकरण
- देवनागरी लिपि की विशेषताएँ
- देवनागरी लिपि और कम्प्यूटर

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| मीडिया भाषा और अनुवाद DSC | 4 | 3 | | 1 | | |

Learning Objectives

The Learning Objectives of this course are as follows:

- भाषा और मीडिया के मूलतत्त्व से अवगत कराना।
- अनुवाद तकनीक से अवगत कराना।
- भाषा और मीडिया के सम्बंधों को समझाना।
- मीडिया अनुवाद का अभ्यास व व्यावहारिक पक्ष से परिचित कराना।

Learning Outcomes

- भाषा एवं मीडिया के अंतरसंबंधों से परिचित होंगे।
- मीडिया में अनुवाद की रोजगारोन्मुख संभावनाओं से अवगत हो सकेंगे।
- भाषा और मीडिया के संदर्भ में अनुवाद की भूमिका और दायित्वों से परिचित होंगे।
- विद्यार्थियों में अनुवाद कौशल विकसित होगा।

SYLLABUS OF SEC

1. मीडिया भाषा और अनुवाद

10 घंटे (

- भाषा: परिभाषा और महत्व

- अनुवाद: परिभाषा, महत्व, प्रक्रिया
- मीडिया अनुवाद का स्वरूप और महत्व

2. प्रिंट मीडिया और अनुवाद

10 घंटे

- पत्र पत्रिकाओं में समाचार, लेख और संपादकीय की भाषा का स्वरूप
- प्रिंट मीडिया अनुवाद - पत्र : पत्रिकाओं के समाचार शीर्षक, समाचार, लेख, फीचर, संपादकीय और विज्ञापन का अनुवाद
- प्रिंट मीडिया अनुवाद की शब्दावली

3. इलेक्ट्रॉनिक मीडिया और अनुवाद

10 घंटे

- रेडियो और टेलीविजन समाचार भाषा समाचार शीर्षक, और समाचारों का अनुवाद
- रेडियो और टेलीविजन के विज्ञापनों का अनुवाद
- इलेक्ट्रॉनिक मीडिया अनुवाद की शब्दावली

4. डिजिटल मीडिया व फिल्मों की भाषा और अनुवाद

15 घंटे

- सोशल नेटवर्किंग साइट्स, वेबसाइट, न्यूज़ पोर्टल, विकिपीडिया में अनुवाद का स्वरूप
- डिजिटल अनुवाद के उपकरण : आर्टिफिशियल इंटेलिजेंस, अनुवाद ऐप्स, ऑनलाइन शब्दकोश
- फिल्म और डॉक्यूमेंट्री अनुवाद : शीर्षक अनुवाद, डबिंग

प्रायोगिक कार्य :

30 घंटे

1. अखबार में प्रकाशित समाचारों, लेख और फीचर के अनुवाद का अभ्यास कराना।
2. समाचार शीर्षक के अनुवाद का अभ्यास कराना।
3. टेलीविजन समाचारों और वृत्तचित्र का अभ्यास कराना।
4. अनुवाद ऐप्स का परिचय, ऐप्स आधारित अनुवाद का संपादन।
5. डिजिटल अनुवाद के विविध रूपों का अभ्यास कराना।
6. विज्ञापन अनुवाद का अभ्यास कराना।

संदर्भ पुस्तकें :

1. हिंदी भाषा भोलानाथ -तिवारी, किताब महल प्रकाशन
2. अनुवाद विज्ञान सिद्धान्त और अनुप्रयोग हिंदी ,डॉ नगेंद्र - माध्यम कार्यान्वयन निदेशालय , दिल्ली विश्वविद्यालय
3. अनुवाद की व्यापक संकल्पना। डॉ दिलीप सिंह ,वाणी प्रकाशन
4. पत्रकारिता में अनुवाद - जितेंद्र गुप्त, प्रियदर्शन, अरुण प्रकाश राधाकृष्ण प्रकाशक ,
5. अनुवाद : अवधारणा और आयाम डॉ सुरेश -सिंघल संजय प्रकाशन ,

Examination scheme and mode:

Total Marks:100

Internal Assessment: 25 Marks

End Semester University Exam:75 marks

The Internal Assessment for the course may include Class participation, Assignments, Class tests, Projects, Field Work, Presentations, amongst others as decided by the faculty.

समाचार की अवधारणा और रिपोर्टिंग

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| समाचार की अवधारणा और रिपोर्टिंग DSC | 4 | 3 | | 1 | | |

Learning Objectives

The Learning Objectives of this course are as follows:

Course Objective

- समाचार रिपोर्टिंग के विषय में सैद्धांतिक और व्यावहारिक ज्ञान प्रदान करना ।
- समाचार बोध विकसित करना ।
- छात्रों को प्रिंट, इलेक्ट्रॉनिक और वेब मीडिया हेतु न्यूज़ लिखने के योग्य बनाना।
- रिपोर्टिंग के विभिन्न क्षेत्रों की जानकारी देना और विचार निर्माण कौशल को बढ़ावा देना।
- समसामयिक मुद्दों पर तथ्य आधारित विचार - विमर्श और विश्लेषण कौशल का विकास करना।

Course Learning Outcomes

- न्यूज़ रिपोर्टिंग के सिद्धांत और तकनीक के विषय में अच्छी समझ विकसित होगी।
- समाचार बोध का विकास होगा।
- इवेंट कवर करने और समाचार लिखने की योग्यता विकसित होगी।
- न्यू स्टोरी लेखन के लिए सामग्री योजना और विचार निर्माण का व्यवहारिक ज्ञान प्राप्त होगा।
- समसामयिक मुद्दों पर विचार-विमर्श और विश्लेषण करने में दक्ष होंगे।

SYLLABUS

1. समाचार 10 घंटे

- समाचार अवधारणा एवं महत्व :
- समाचार के तत्त्व एवं प्रकार
- समाचार स्रोत एवं समाचार संकलन

2. समाचार लेखन 10 घंटे

- समाचार : संरचना, सिद्धांत एवं तकनीक
- समाचार शैली : विलोम स्तूपी, फीचर शैली,
- इंद्रो और शीर्षक लेखन

3. समाचार रिपोर्ट 10 घंटे

- रिपोर्टर के गुण, दायित्व एवं चुनौतियां
- बीट रिपोर्टिंग : शिक्षा, स्वास्थ्य, अपराध, नागरिक मुद्दे, संसदीय, अदालत, खेल एवं व्यापार
- हार्ड न्यूज़ एवं सॉफ्ट न्यूज़ अवधारणा एवं अंतर स्टिंग ऑपरेशन , पीत पत्रकारिता ,

4. माध्यम लेखन 15 घंटे

- प्रिंट मीडिया के लिए समाचार के चयन का आधार एवं लेखन
- इलेक्ट्रॉनिक मीडिया के लिए समाचार के चयन का आधार एवं लेखन
- डिजिटल मीडिया के लिए समाचार के चयन का आधार एवं लेखन

प्रायोगिक कार्य : 30 घंटे

1. विविध विषयों पर प्रकाशित खबरों के पुनर्लेखन का अभ्यास कराना।
2. समाचार पत्र में प्रकाशित खबरों के आधार पर शीर्षक लेखन का अभ्यास कराना।
3. स्थानीय स्थलों पर जाकर नागरिक मुद्दों पर समाचार पत्र, पत्रिका, रेडियो, टेलीविजन या वेब के लिए रिपोर्ट तैयार करना।

| | | Lecture | Tutorial | Practical/ Practice | | |
| GE-5 | 04 | 3 | 1 | 0 | Class 12TH Pass | NIL |

Learning Objectives:

This course will introduce the current research and development in Sanskrit computing. Primary emphasis will be on tools and techniques developed under government and private funding and to explore new technologies for Sanskrit.

Learning Outcomes:

The course-level learning outcomes that a student of this course is required to demonstrate are indicated below:

- Learn the basic concept of Sanskrit Phonology, Sanskrit Morphology, Syntax, Semantics, Lexicon and Corpora.
- Learn the origin and Development of Language Computing.
- Basic Introduction of Computing Sanskrit Language.
- Various methodologies used on Language Technology.
- Various tools developed for Sanskrit Language.
- Survey of Language Computing

SYLLABUS OF GE-5

(45 hours Lectures and 15 hours Tutorials)

Unit: I

12 Hours

Major Components of Sanskrit Linguistics:

- Phonology
- Morphology
- Syntax
- Semantics
- Lexicon and Corpora

Unit: II**12 Hours****Areas and Applications of the Sanskrit Language Computation**

- Text Digitization/Content Creation and Search for Sanskrit
- Speech Technology
- Grammar Tools
- Machine Translation
- Preservation and Delivery of Cultural Heritage of Sanskrit

Unit: III**09 Hours****Language Computing Methodology**

- Rule Base
- Statistical
- Hybrid

Unit: IV**12 Hours****Survey of Language Computing**

- Survey of the Language Computing for Sanskrit
- Survey of the Language Computing for Indo Aryan Languages

Machine Translation: Tools and Techniques

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|-----------|-----------------------------------|----------|---------------------|------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Machine Translation: Tools and Techniques | 04 | 3 | 1 | 0 | Class 12TH Pass | NIL |

Learning Objectives:

This course will introduce the theory and practice of computer based translations and expose the students to the internal processes and inter module interactions in a typical Machine Translation (MT) system

Learning Outcomes:

The course-level learning outcomes that a student of this course will be able to demonstrate are indicated below:

- Learn the origin and Development of Machine Translation.
- Basic Introduction of Machine Translation.
- Human vs Machine Translation.
- Concepts to ideal various methodologies used on Machine Translation System.
- Using guidelines of the Machine Translation system: Google and Bing.
- Evaluation and Challenges in Machine Translation

DEPARTMENT OF LINGUISTICS

Category-II

BA (Prog.) with Linguistics as Major

DSC (3): Elementary Phonetics and Phonology

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Elementary Phonetics and Phonology | 4 | 3 | 1 | 0 | Class XII | NIL |

Learning Objectives: Building on the DSC-1, this course provides hands-on training in analysing the phonetics and phonology of languages(s). It deals with the production of speech sounds and their descriptive and physical properties. Students learn how to transcribe and describe sounds using International Phonetic Alphabets (IPA symbols) and diacritics. Students work with a variety of languages.

Learning outcomes: Basic skills in Phonetic and phonological analysis; Gain practical Knowledge of how to identify the sound inventory of a language; analyse phonetic and acoustic properties of speech sounds; identify phonological processes and carry out phonological analysis of a given language.

(45 hours Lectures)

Unit 1: Identification and description of different classes of speech sounds

10 Hours

- Perception
- Description
- Transcription

Unit 2: Physical properties of speech sounds

10 Hours

- Learning to record speech sounds
- Spectrograms and speech sounds

- Waveforms and speech sounds (periodic-aperiodic, simple-complex)

Unit 3: **Phonological Analysis**

15 Hours

- Natural classes
- Contrast and Minimal pairs
- Environment and distribution
- Phonological processes in specific languages

Unit 4: **Non-segmental Phonological properties**

10 Hours

- Tonal languages
- Syllable and Stress
- Phonological analysis

Readings

1. Ladefoged, Peter. 2001 (4th edn.). *A course in phonetics*. New York: Harcourt Brace.
2. Ladefoged, Peter and Johnson, Keith. 2011 (6th edition). *A course in phonetics*. Wadsworth.
3. Ohio language files. Or any other best Intro book
4. Fromkin, Victoria, Rodman, Robert and Hyams, Nina. *Introduction to language*. 2012 ed. Thomson-Wadsworth.

KEYWORDS: Speech Sounds, Transcription, Spectrogram, Tone, Syllable, Stress.

Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DSC (4): Phonetics and Phonology of Indian Languages

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Phonetics and Phonology of Indian Languages | 4 | 3 | 1 | 0 | Class XII | NIL |

Objectives. This course provides the physical properties of speech sounds and the speech sound patterns of Indian languages.

Learning outcomes. The learning outcomes include the Phonetic and Phonological analysis of Indian languages.

(45 hours Lectures)

Unit 1: Phonetics and Phonology of Indian languages- An Introduction

10 Hours

- Speech sounds and Mother tongue.
- Articulation of the speech sounds and their relation to the native languages.
- IPA charts: Consonants and Vowels

Unit 2: Phonetics and Phonology of Indo-Aryan Languages

10 Hours

- Articulation of Vowels and Consonants of Indo-Aryan Languages.
- Classification of Vowels and Consonants; Clusters; Diphthongs of Indo-Aryan Languages. Suprasegmental features of Indo-Aryan Languages: Stress, length, Pitch, Intonation.
- Organization of speech sounds of Indo-Aryan Languages
- Possible sequences of speech sounds in Indo-Aryan Languages.
- Indo-Aryan Languages and Phonological processes.

Unit 3: Phonetics and Phonology of Dravidian languages and Tibeto-Burman languages

15 Hours

- Articulation of Vowels and Consonants of Dravidian languages and Tibeto-Burman languages.
- Classification of Vowels and Consonants; Clusters; Diphthongs of Dravidian languages and Tibeto-Burman languages. Suprasegmental features of Dravidian languages and Tibeto-Burman languages: Stress, length, Pitch, Intonation.
- Organization of speech sounds of Dravidian language family and Tibeto-Burman languages.
- Possible sequences of speech sounds in Dravidian languages and Tibeto-Burman languages.
- Dravidian languages and Tibeto-Burman languages: Phonological processes.

Unit 4: Phonetics and Phonology of Austro-Asiatic languages and Languages of Andaman and Nicobar

10 Hours

- Articulation of Vowels and Consonants of Austro-Asiatic languages and Languages of Andaman and Nicobar.
- Classification of Vowels and Consonants; Clusters; Diphthongs Austro-Asiatic languages and Languages of Andaman and Nicobar. Suprasegmental features of Austro-Asiatic languages and Languages of Andaman and Nicobar: Stress, length, Pitch, Intonation.
- Organization of speech sounds of Austro-Asiatic languages and Languages of Andaman and Nicobar.
- Possible sequences of speech sounds in Austro-Asiatic languages and Languages of Andaman and Nicobar.
- Austro-Asiatic languages and Languages of Andaman and Nicobar: Phonological processes.

CATEGORY-IV

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY DEPARTMENT OF LINGUISTICS

GENERIC ELECTIVES (GE-2): LINGUISTICS AND MEDIA

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Linguistics and Media | 4 | 3 | 1 | 0 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To develop students' understanding of the role language plays in the construction, interpretation and communication of media texts
- To develop students' understanding of the influence that media has on languages and their use
- To teach the fundamentals of media discourse analysis using linguistic tools
- To make students appreciate how media language is produced and shaped by social structures

Learning outcomes

By participating in this course, the student will develop:

- an appreciation of linguistic structures underlying media discourse;
- skills to analyse spoken and written language using linguistic tools in the contexts of print, digital and new media
- experience of handling of difficult and sensitive materials and an understanding of ethical issues involved in crime-related data;
- skills of auditory analysis and digital processing of forensic recordings.

SYLLABUS OF GE-2 (SEMESTER-II)

(45 hours Lectures)

UNIT – I (10 Hours)

Media and discourse processes

- Critical Discourse Analysis
- Textual analysis
- Analysing social practices

UNIT – II (15 Hours)

Micro-linguistic features of media texts

- Phonetic & Phonological features
- Morphological features
- Syntactic features

UNIT – III (10 Hours)

Meaning and media

- Semantics of media texts
- Pragmatics of media texts
- Semiotics of media texts

UNIT – IV (10 Hours)

Media and language change

- language maintenance and shift
- advertising language
- new media and language change

Practical component (if any) – NIL

Essential/recommended readings

Credits: 4

L/T/P= 3/1/0

Learning Objectives:

- The course will offer extensive insight into the history of Modern Punjabi literature, while laying special emphasis on various literary movements, genres and writers.
- It will help the students to evaluate the way socio-cultural and historical phenomena influence the literary production of a particular period.
- The course will help them to develop a nuanced appreciation of the literary production of modern times.
- The students will be offered an in-depth understanding on the growth of Punjabi language under the influence of various other languages.
- The course will guide the students to understand the history of different genres of Modern Punjabi literature.

Learning Outcomes:

- The students will be able to understand the concept of Colonial Modernity.
- They can analyze the influence of modernity on Punjab and Punjabi literature.
- The course will educate them to understand various social and political movements of Punjab which provide shape to Modern Punjabi Literature.

- The students will understand the history of Modern Punjabi poetry, fiction, drama and prose.
- They will be able to evaluate various trends emerged in Modern Punjabi Literature.

Unit 1 ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਸਾਹਿਤ: ਸਿਧਾਂਤ ਅਤੇ ਇਤਿਹਾਸ (Adhunik Punjabi Sahit: Sidhant ate Itihas) (12 hours)

- ਆਧੁਨਿਕਤਾ: ਸੰਕਲਪ ਅਤੇ ਸਰੂਪ
Adhunikta: Sankalp ate Saroop
- ਮੱਧਕਾਲ ਅਤੇ ਆਧੁਨਿਕ ਕਾਲ ਦਾ ਨਿਖੇੜਾ
Madhkal ate Adhunik kaal da Nikherha
- ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਸਾਹਿਤ ਦਾ ਇਤਿਹਾਸਕ ਪਿਛੋਕੜ
Adhunik Punjabi Sahit da Itihasak Pichhokarh
- ਪੰਜਾਬ ਦੀਆਂ ਸਮਾਜਕ-ਧਾਰਮਕ ਲਹਿਰਾਂ
Punjab dian Samajak-Dharmak Lehran

Unit 2 ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਕਵਿਤਾ (Adhunik Punjabi Kavita) (9 hours)

- ਰਹੱਸਵਾਦੀ ਅਤੇ ਰੁਮਾਂਸਵਾਦੀ ਕਾਵਿ ਧਾਰਾ
Rahasvadi ate Romancevadi Kaav Dhara
- ਪ੍ਰਗਤੀਵਾਦੀ ਕਾਵਿ ਧਾਰਾ
Pragativadi Kaav Dhara
- ਸੁਹਜਵਾਦੀ ਕਾਵਿ ਧਾਰਾ
Sohajvadi Kaav Dhara
- ਜੁਝਾਰਵਾਦੀ ਕਾਵਿ ਧਾਰਾ
Jujharvadi Kaav Dhara

Unit 3 ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਗਲਪ (Adhunik Punjabi Galap) (12 hours)

- 1960 ਤੋਂ ਪਹਿਲਾਂ ਦਾ ਪੰਜਾਬੀ ਨਾਵਲ
1960 ton Pehlan da Punjabi Novel
- 1960 ਤੋਂ ਬਾਅਦ ਦਾ ਪੰਜਾਬੀ ਨਾਵਲ
1960 ton Baad da Punjabi Novel
- 1960 ਤੋਂ ਪਹਿਲਾਂ ਦੀ ਪੰਜਾਬੀ ਕਹਾਣੀ
1960 ton Pehlan di Punjabi Kahani
- 1960 ਤੋਂ ਬਾਅਦ ਦੀ ਪੰਜਾਬੀ ਕਹਾਣੀ
1960 ton Baad di Punjabi Kahani

Unit 4 ਆਧੁਨਿਕ ਪੰਜਾਬੀ ਨਾਟਕ ਅਤੇ ਵਾਰਤਕ (Adhunik Punjabi Natak ate Vartak) (12 hours)

- 1960 ਤੋਂ ਪਹਿਲਾਂ ਦਾ ਪੰਜਾਬੀ ਨਾਟਕ
1960 ton Pehlan da Punjabi Natak
- 1960 ਤੋਂ ਬਾਅਦ ਦਾ ਪੰਜਾਬੀ ਨਾਟਕ
1960 ton Baad da Punjabi Natak

- 1960 ਤੋਂ ਪਹਿਲਾਂ ਦੀ ਪੰਜਾਬੀ ਵਾਰਤਕ
1960 ton Pehlan di Punjabi Vartak
- 1960 ਤੋਂ ਬਾਅਦ ਦੀ ਪੰਜਾਬੀ ਵਾਰਤਕ
1960 ton Baad di Punjabi Vartak

| ADHUNIK PUNJABI KAVITA | 4 | 3 | 1 | 0 | Class 12 th pass in any subject | Studied Punjabi up to 10th Standard or Working knowledge of Punjabi language |

Credits: 4**L/T/P= 3/1/0****LEARNING OBJECTIVES:**

- The course will demonstrate knowledge of Modern Punjabi Poetry.
- The course will help the students to recognize and identify different formal rhythmic properties of poems and of language as a whole.
- It will demonstrate an understanding of poetic vocabulary essential to the practice of literary criticism.
- The course will develop an understanding of individual poets in their historical, social, economic, cultural and political contexts.
- The course is aimed to evaluate the creative and analytical sensibility of the students.

LEARNING OUTCOMES:

- The students will be able to analyse various elements of poetry such as diction, tone, form, genre, imagery, figures of speech, symbolism, theme, etc.
- They will be able to identify various forms and genres of poetry such as Nazam, Ghazal, Rubai and Free Verse etc.
- The course will facilitate them to understand the socio-cultural, economic and political concerns of Punjabi society reflected in Punjabi poetry.
- They will understand the basic terminology and practical elements of poetry.
- They will develop a feeling of sensitivity depicted in poetry.

Unit 1 ਮੁਢਲੇ ਦੌਰ ਦੀ ਪੰਜਾਬੀ ਕਵਿਤਾ (Mudhle Dour di Punjabi Kavita) (12 hours)

- ਭਾਈ ਵੀਰ ਸਿੰਘ: ਸਮਾਂ, ਕੰਬਦੀ ਕਲਾਈ, ਗੁਲਾਬ ਦਾ ਫੁੱਲ ਤੋੜਨ ਵਾਲੇ ਨੂੰ
Bhai Vir Singh: Sama, Kambadi Kalai, Gulab da Full Torhan Vale Nu
- ਪੂਰਨ ਸਿੰਘ: ਹਲ ਵਾਹੁਣ ਵਾਲੇ, ਜਵਾਨ ਪੰਜਾਬ ਦੇ, ਪਸ਼ੂ ਚਰਦੇ
Puran Singh: Hal Vahun Vale, Javan Punjab de, Pashu Charde
- ਧਨੀ ਰਾਮ ਚਾਤ੍ਰਿਕ: ਪੰਜਾਬ, ਮੇਲੇ ਵਿਚ ਜੱਟ, ਬੋਲੀ ਹੈ ਪੰਜਾਬੀ ਸਾਡੀ
Dhani Ram Chatrik: Punjab, Mele Vich Jatt, Boli hai Punjabi Sadi
- ਨੰਦ ਲਾਲ ਨੂਰਪੁਰੀ: ਭੋਲਾ ਪੰਛੀ, ਚੁੰਮ-ਚੁੰਮ ਰੱਖੋ, ਸ਼ੌਕਣ ਮੇਲੇ ਦੀ
Nand Laal Noorpuri: Bhola Panchhi, Chum-Chum Rakho, Shoukan Mele di

Unit 2 ਦੂਜੇ ਦੌਰ ਦੀ ਪੰਜਾਬੀ ਕਵਿਤਾ (Duje Dour di Punjabi Kavita) (12 hours)

- ਮੋਹਨ ਸਿੰਘ: ਤਾਜ ਮਹਿਲ, ਰੱਬ, ਮੁੱਕਣ ਤੇ ਆਇਆ ਸਾਥੀਓ (ਗ਼ਜ਼ਲ)
Mohan Singh: Taj Mehal, Rabb, Mukan te Aaya Sathiyo (Ghazal)
- ਅਮ੍ਰਿਤਾ ਪ੍ਰੀਤਮ: ਅੱਜ ਆਖਾਂ ਵਾਰਸ ਸ਼ਾਹ ਨੂੰ, ਅੰਨਦਾਤਾ, ਸੁਨੇਹਰੇ
Amrita Pritam: Ajj Aakhan Waris Shah nu, Anndaata, Sunehrhe
- ਬਾਵਾ ਬਲਵੰਤ: ਦੁਨੀਆ, ਓਸ ਦਾ ਹਾਰ, ਨਵੀਨ ਆਸ
Bawa Balwant: Dunia, Os da Haar, Navin Aas
- ਹਰਿਭਜਨ ਸਿੰਘ: ਮਾਏ ਨੀ, ਵੇ ਮੈਂ ਭਰੀ ਸੁੰਗਧੀਆਂ ਪੌਣ, ਧਰਤੀ ਦੇ ਹੇਠਾਂ
Harbhajan Singh: Maye Ni, Ve Mein Bhari Sugandhian Poun, Dharti de Hethan

Unit 3 ਤੀਜੇ ਦੌਰ ਦੀ ਪੰਜਾਬੀ ਕਵਿਤਾ (Teeje Dour di Punjabi Kavita) (12 hours)

- ਸ. ਸ. ਮੀਸ਼ਾ: ਚੀਕ ਬੁਲਬੁਲੀ, ਅੱਧੀ ਰਾਤ ਪਹਿਰ ਦੇ ਤੜਕੇ, ਸ਼ਾਮ ਦੀ ਨਾ ਸਵੇਰ ਦੀ ਗੱਲ ਹੈ
S.S. Meesha: Cheek Bulbuli, Adhi Raat Pehar de tadhke, Sham di na Sver di Gall hai
- ਜਗਤਾਰ: ਹਰ ਮੋੜ 'ਤੇ ਸਲੀਬਾਂ, ਕੋਈ ਮਜ਼ਬੂਰੀ ਨਹੀਂ, ਰੁੱਖਾਂ ਹੇਠ ਛੁਪ ਕੇ
Jagtar: Har Morh te Saliban, Koi Mazboori Nahi, Rukhan Heth Chhup Ke
- ਸ਼ਿਵ ਕੁਮਾਰ: ਰੁੱਖ, ਆਰਤੀ, ਕੀ ਪੁੱਛਦੇ ਓਂ ਹਾਲ ਫਕੀਰਾਂ ਦਾ
Shiv Kumar: Rukh, Aarti, Ki Puchhde ho Haal Fakiran da
- ਪਾਸ਼: ਦਹਿਕਦੇ ਅੰਗਿਆਰਾਂ 'ਤੇ, ਚਿੜੀਆਂ ਦਾ ਚੰਬਾ, ਸਭ ਤੋਂ ਖ਼ਤਰਨਾਕ
Pash: Dehkde Angiyaran te, Chirhiyan da Chamba, Sabh ton Khatarnak

Unit 4 ਚੌਥੇ ਦੌਰ ਦੀ ਪੰਜਾਬੀ ਕਵਿਤਾ (Chouth Dour di Punjabi Kavita) (9 hours)

- ਸੁਰਜੀਤ ਪਾਤਰ: ਕੁਝ ਕਿਹਾ ਤਾਂ, ਚੱਲ ਪਾਤਰ ਹੁਣ ਢੂੰਡਣ ਚੱਲੀਏ, ਆਇਆ ਨੰਦ ਕਿਸ਼ੋਰ
Surjit Patar: Kujh Kiha tan, Chal Patar hun Dhundhan Chaliye, Aaya Nand Kishor
- ਸੁਖਵਿੰਦਰ ਅਮ੍ਰਿਤ: ਬੜੀ ਹੀ ਨਰਮ ਪੱਤੀ ਹਾਂ, ਥਲਾਂ ਦਾ ਸੇਕ ਨਾ ਹੋਵੇ, ਨੀ ਫੁੱਲਾਂ ਵਰਗੀਓ ਕੁੜੀਓ
Sukhwinder Amrit: Barhi hi Naram Patti han, Thalan da Sek na Hove, Ni Fullan Vargiyo Kurhiyo
- ਬਲਬੀਰ ਮਾਧੋਪੁਰੀ: ਕਵਿਤਾ ਮੁਖਾਤਬ ਹੋ, ਕੱਖੋਂ ਹੋਲਾ ਆਦਮੀ, ਮਾਂ ਦੱਸਦੀ ਹੈ
Balbir Madhopuri: Kavita Mukhatab ho, Khakhon Hola Aadmi, Maa Dasdi hai

- ਜਸਵੰਤ ਜਫ਼ਰ: ਅਸੀਂ ਨਾਨਕ ਦੇ ਕੀ ਲੱਗਦੇ ਹਾਂ, ਭਾਈ ਘੱਨਈਆ, ਭਗਤ ਸਿੰਘ
Jaswant Zafar: Asin Nanak de Ki Lagde han, Bhai Ghanyia, Bhagat Singh

Learning Objectives

Objective: Enable students to read and understand a short literary/journalistic/ad/song text adapted for students of level A1 and to answer questions on the same.

SYLLABUS OF DSC-6

UNIT I Literary Texts

(9 hours)

The student will learn to read, comprehend and answer simple questions on short stories. The student will also construct simple stories in German.

(A selection will be made from the list below. Any extra material will be provided by the Department)

Stories like *Lotta ist krank*, *Kommt der Zug?*, *Annas Geburtstag* from

<https://www.lernlaterne.de/deutsch/geschichten-a1>

Stories by Nikola Asif like *Endlich Urlaub*, *der Osterhase war da etc.*

[<https://www.dazaf.de/index.php/kurzgeschichten/kurzgeschichten-a1-a2>]

Abschied von Basel from <https://www.engerman.de/>

UNIT II Journalistic Texts

(9 hours)

The student will get familiar with various newspapers in German and be able to read a selection of easy articles and from the list given below. From the difficult newspapers, the student will learn to read selectively, for example some descriptions and news titles.

<https://www.zdf.de/kinder/logo>

<https://www.nachrichtenleicht.de/>

<https://www.dw.com/de/deutsch-lernen/s-2055>

UNIT III Simple Poems

(9 hours)

The student will learn to read, comprehend and answer simple questions on poems.

The student will also learn to compose simple poems.

(A selection will be made from the list below)

Konkrete Poesie by Ernst Jandl, Reinhard Döhl, Timm Ulrichs etc.

Inventur by Günter Eich

Die Ameisen von Joachim Ringelnatz

Bumerang von Joachim Ringelnatz

Some poems from <https://germankitabsolution.com/german-short-poems-for-beginners-deutsch-gedichte-a1-level/>

UNIT IV Simple Audio / Visual Texts/Songs

(9 hours)

(A selection will be made from the list below)

| Bangla Sahityer Itihas : Madhyajug - 2 | 4 | 3 | 1 | 0 | Class 12 th pass in any subject | Studied Bengali Up to 10 th & Above |

Learning Objectives:

The whole range of literary creations in Bangla cannot be searched and studied in detail by any student of Bengali Literature in UG course. A history of Literature, thus, is a holistic approach towards the development of the literature. This paper will discuss the medieval period literature.

Learning outcomes:

It is impossible for a student of literature to know the vast number of written-literature intricately in a particular language. History of Literature will let the students know and study about the outline of Bengali literature and its development time to time with special reference to its background.

SYLLABUS OF DSC-4

Unit I (18 Hours)

সংরূপ পরিচিতি, উদ্ভব ও ক্রমবিকাশ, কবি পরিচিতি :

চৈতন্য জীবনী কাব্য (বৃন্দাবন দাস, কৃষ্ণদাস কবিরাজ), মঙ্গলকাব্য (বিজয়গুপ্ত, মুকুন্দরাম, ঘনরাম চক্রবর্তী, রূপরাম চক্রবর্তী, ভারতচন্দ্র)

Unit II (27 Hours)

সংরূপ পরিচিতি, উদ্ভব ও ক্রমবিকাশ, কবি পরিচিতি :

শান্ত পদাবলী (রামপ্রসাদ সেন, কমলাকান্ত ভট্টাচার্য), ময়মনসিংহ গীতিকা (মহুয়া ও মলুয়া), আরাকান রাজসভা (আলাওল, দৌলত কাজী), কবিওয়ালা ও কবিগান

DISCIPLINE SPECIFIC CORE COURSE– 6 (DSC-6): Bangla Chotogalpo

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|--|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Bangla Chotogalpo | 4 | 3 | 1 | 0 | Class 12 th pass in any subject | Studied Bengali Up to 10 th & Above |

Learning Objectives:

The world of Bengali Fiction is growing day by day with authors experimenting the genre with various subjects and narrative styles. Bangla Chotogalpo dates back to the later part of nineteenth century. This paper will focus the development of this genre through reading of some Bengali Short stories.

Learning outcomes:

Students who have just passed the 12th standard examination will be introduced to the abundance of their literature and they will be expected to know after going through this paper that studying literature is not only to read some stories but they have to inculcate the habit of working and research of the given literature. Students will be able to study the development of their society and culture through literature.

| | | Lecture | Tutorial | Practical/ Practice | | |
| Introductory Telugu | 4 | 03 | 01 | 0 | Students who have not studied Telugu up to 8th Standard | NIL |

Learning Objectives

The aim of the course is to teach basic language skills in Telugu and it intends to facilitate students in acquiring foundational skills of reading, writing and speaking in Telugu along with synonyms to expand vocabulary. This course is divided into three units and it will cover the basic language structures, the activities and functions normally explored by a beginners' syllabus, i.e. the learning Telugu syllables, making simple sentence construction and use the same sentences with fellow students, it goes further, covering situations such as working, studying and including materials focused on the Telugu media i.e., cinema, television, the press and advertising. In terms of grammar structures, the exercises are at the basic level only.

Learning outcomes

The course will enable the students to obtain the basic skills of reading, writing and speaking in Telugu along with building up a primary vocabulary. After completing the course, they can read and construct simple Telugu sentences, figure out words having conjunct character, and can learn functional, everyday conversation in different language usage situations. Students interact with classmates by using simple sentences about their daily routine matters on official and informal occasions.

SYLLABUS OF GE

Unit I

12 Hours

Introduction to Telugu Vowel & Consonant sounds & along with the sound-image
Introduction to Telugu Consonant Conjunct

Unit II

12 Hours

Introduction to Telugu Pronoun & its Subjunctives
Introduction to Telugu Noun, Numbers & its Subjunctives
Telugu qualifiers/adjectives
Telugu prepositions
Conjunctions and its usage

Unit III

12 Hours

Introduction to Verb & Time/Tense
Conjugation of different verbs

Unit IV

9 Hours

Making simple sentences in Telugu (basic syntactical rules)
Making Negative sentences in Telugu
Making Interrogative sentences in Telugu

| | | Lecture | Tutorial | Practical/ Practice | | |
| INTERMEDIATE TELUGU – (For those who have completed Introductory Telugu) | 4 | 03 | 01 | 0 | Students who have not studied Telugu up to 10 th Standard | NIL |

Learning Objectives

This course has been designed for students who have the primary knowledge of the Telugu language and can make as well as to figure out simple sentences. The course enables students to construct compound and complex sentences in Telugu. Furthermore, the course empowers the students to acquire skills to comprehend small passages, writing short paragraphs, and having better conversational skills and teach them the basic rules of translation as well. The course offers a wide range of exercises from the book and challenging activities can be given to students i.e. vocabulary-based activity or a grammar drill, a language manipulation exercise or an up-to-date reading comprehension. A unit focuses on particular topic and also to those students who want to practice the language through additional independent study and open-ended exercises will be included to encourage learners to communicate more spontaneously and to allow some autonomy and encourage creativity.

Additional materials and support will be given to the students.

Learning outcomes

The course will enable students to understand the distinctions of the language by empowering them with better reading, writing and conversational skills. Students will try to capture radio and TV advertisements, news, advertisements and other programs broadcast. They will read short paragraphs in a language related to books, newspapers, magazines, notice boards, posters, personal and other types of letters, etc., as well as the use of dictionaries and reference texts. They will also try to write a short portion on select topics and write personal and other types of letters, directly on familiar and simple topics, and write independent articles. Students will be able to translate any prose words from Telugu to English and vice versa with the help of a dictionary or through online sources.

B.A. (VS) MODERN OFFICE MANAGEMENT

DISCIPLINE SPECIFIC CORE COURSE -2.1 (DSC-2.1) –:

Basic Phonography- I

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Phonography- I DSC-2.1 | 4 | 3 | 0 | 1 | Pass in class XII | Nil |

Learning Objectives

The course aims to orient the students to learn the need of writing accurately based on phonetic sounds. In order to make them a good writer, it is necessary for them to master the fascinating

art of good writing. As it is very important for a learner to write accurately, the knowledge of art of writing through spoken sounds with the help of principles of Sir Isaac Pitman would help the students to take notes and carry out office work accurately.

Learning Outcomes

After completion of the course, learners will be able to:

1. demonstrate the basic concepts of stenography with grammalogues and logograms.
2. analyse the basic concepts of alternative forms of 'R & H' and Phraseography.
3. interpret the use of stroke and circles.
4. use Loops.
5. summarize the hooks use in stenography.

SYLLABUS OF DSE-2.1

Unit 1: Basics of Phonography & Vowels

11 hours

Phonography – Meaning and importance, brief history of Pitman's Shorthand, types of other writing methods. Consonants – Definition, types of consonants, classification of consonants, form of strokes, number, size and direction of strokes, joining of strokes.

Vowels – Its definition, long and short vowels, vowels signs and their places, position of outlines according to vowels, Intervening vowel, Grammalogues: Definition & meaning of Grammalogues and Logograms, importance of Grammalogues.

Unit 2: Diphthongs, Triphones, Alternative forms of 'R' & 'H' and Phraseography.

11 hours

Definition of Diphthong, Diphthong Signs, Rules of Diphthongs. Triphones, Abbreviated 'W'. Alternative forms of Strokes R & H. Upward and downward forms of 'R' and H. Abbreviated 'W' and its use. Punctuation signs and their application. Phraseography, Definition, meaning of Phraseogram, its essential qualities of facility, linearity, and legibility.

Unit 3: Circles and Loops

11 hours

Circles 'S' & 'Z', use of small circles with straight and curved strokes, exceptions to the use of circle 'S' & 'Z', Large Circles 'SW', 'SS or 'SZ', use of large circles with straight and curved strokes, use of different circles initially, medially and finally, Use of large circles in Phraseography. Use of stroke 'S' and 'Z' with various rules. Loops 'ST' and 'STR', use of small and big loops with straight and curved strokes, use of small loops initially, medially and finally, exceptions to the use of loops.

Unit 4: Initial and Final Hooks

12 hours

Small Hooks: 'R' and 'L', use of initial hooks with straight and curved strokes. Alternative Forms for 'FR', 'VR' etc. Use of circles and loops preceding initial hooks. Small Final hooks: 'N', 'F\V', use of final hooks with straight and curved strokes, medial use of small final hooks, use of small final hooks in Phraseography, Exceptions to the use of small final hooks, circles and loops to final hooks. Large final hook 'Shun'. Use of Shun Hook with straight and curved strokes, medial use of Shun Hook, use of Shun Hook after Circle 'S' and 'NS', Use of Shun Hook in Phraseography.

Note: There shall be 3 lecture period per class and 2 Practical Lab periods per batch to be taught in Computer Laboratory.

Practical Exercises:

30 hours

The learners are required to

1. understand and demonstrate the Basics of Stenography.
2. practice Alternatives, Diphthongs and Phraseography.
3. practice Small and Large Circles.
4. learn different Loops.
5. understand about Initial Final Hooks.

Note:

1. There shall be a theory examination of 100 marks including 25 marks for internal assessment
2. There shall be 3 lecture periods per class and 2 practical periods per batch to practice shorthand

B.A. (VS) MODERN OFFICE MANAGEMENT

Computer Applications in Business -1

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------------|--|-----------------|----------------------------|-----------------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Computer Applications in Business -1 DSC-2.2 | 4 | 2 | 0 | 2 | Pass in class XII | Nil |

Learning Objectives

To provide computer skills and knowledge to the students and make them aware of the usefulness of information technology tools for office operations.

Learning Outcomes

After completion of the course, learners will be able to:

1. explain the various concepts and terminologies associated with computers.
2. describe the basic terminologies used in computer networks and internet.
3. create and modify word document for report making and communication.
4. create and develop good presentations.
5. apply spreadsheet applications for basic calculations and for making charts.

SYLLABUS OF DSE-2.2

Unit1: Basic knowledge of Computers, Networking and Internet

8 hours

Computers: meaning, history, generations, characteristics, advantages, limitations and functions of computers; Classification of computers based on size, digital vs analogue computers; input-output devices; software, hardware, firmware and live ware; types of software: system software and application software; Computing Interfaces: Graphical User Interface (GUI), Command Line Interface (CLI), Touch Interface, Natural Language Interface (NLI); role of CPU in data processing; applications of computers in business.

Computer Networks: Meaning of computer network; objectives/ need for networking; Applications of networking; Basic Network Terminology; Types of Networks; Network Topologies; Wireless Networking; Securing Networks: firewall.

Unit 2: Word Processing**8 hours**

Introduction to word-Processing, Word-processing concepts, Use of Templates and styles, working with word document: Editing text, Find and replace text, Formatting, spell check, Autocorrect, Auto-text; Bullets and numbering, Tabs, Paragraph Formatting, Indent, Page Formatting, Header and footer, page break; Tables: Inserting, filling and formatting a table; Inserting Pictures and Video; Mail Merge; Printing documents; Citations, references and Footnotes.

Unit 3: Preparing Presentations**8 hours**

Basics of presentations: Slides, Fonts, Drawing, Editing; Inserting: Tables, Images, texts, Symbols, hyperlinking, Media; Design; Transition; Animation; and Slideshow, exporting presentations as pdf handouts and videos.

Unit 4: Basics of Spreadsheet**6 hours**

Spreadsheet concepts: Managing worksheets; Formatting, Entering data, Editing, and Printing and Protecting worksheets; controlling worksheet views; graphical presentation of data using bar chart and pie chart; use of simple formulas in spreadsheets; cell referencing- absolute, relative and mixed cell referencing; Functions: logical functions, financial functions, statistical and mathematical functions.

Sorting, multilayer sorting; data validation; find and replace; paste special; Filter and advanced filter; Conditional Formatting; Tabulation.

Practical Exercises:**60 hours**

The learners are required to do practical exercise from unit 2, 3 & 4.

Notes:

1. The General-Purpose Software referred in this course will be notified by the College/University Departments every three years. If the specific features, referred in the detailed course above, is not available in that software, to that extent it will be deemed to have been modified.
2. There shall be a practical examination of 60 Marks (including workbook of 10 marks) from Unit 2, 3, & 4 of 2 hours' duration, theory examination of 30 marks from unit 1 of 1-hour duration and Internal Assessment of 10 marks
3. There shall be 2 lecture period per class and 4 Practical Lab periods per batch to be taught in Computer Laboratory.

Suggestive Readings:

1. Goel, A, “*Computer Fundamentals*” Pearson, Delhi
2. ITL Education Solutions Limited, “*Introduction to Information Technology*”, Pearson Publishers, New Delhi
3. Jain, H. C. & Tiwari, H. N. “*Computer Applications in Business*” Taxmann, Delhi.
4. Madan, S. “*Computer Applications in Business*” Scholar Tech Press, Delhi.
5. Mathur, S. & Jain, P. “*Computer Applications in Business*” Galgotia Publishing Company, Delhi.
6. Sharma, S.K. & Bansal, M. “*Computer Applications in Business*” Taxmann, Delhi.
7. Walkenbach, J. “*MS Excel 2016, Bible*”. John Wiley & Sons, USA.

Note: Suggested Readings will be updated and uploaded on college website from time to time.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

B.A. (VS) MODERN OFFICE MANAGEMENT**Financial Accounting****CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre- requisite of the course (if any) |
|--|---------|-----------------------------------|----------|------------------------|-------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Financial Accounting DSC-2.3 | 4 | 2 | 0 | 2 | Pass in class XII | Nil |

Learning Objectives

The course aims to help learners to acquire conceptual knowledge of financial accounting, to impart skills for recording various kinds of business transactions and to prepare financial statements.

Learning Outcomes

The learning outcomes of this course are as follows:

1. apply the generally accepted accounting principles while recording transactions and preparing financial statements.
2. demonstrate the accounting process under a computerized accounting system.
3. measure business income applying relevant accounting standards.
4. evaluate the impact of depreciation and inventories on Business Income.

5. prepare the Financial Statements of sole proprietor firms and Not-For-Profit Organisations.
6. prepare the accounts for Inland Branches, Departments and Leases.

SYLLABUS OF DSE-2.3

Unit 1: Theoretical Framework and Accounting Process:

06 hours

(A) Theoretical Framework

- (i) Accounting as an information system, the users of financial accounting information and their needs. An overview of Artificial Intelligence and Data Analytics in Accounting.
- (ii) Qualitative characteristics of accounting information. Functions, advantages and limitations of accounting. Branches of accounting. Basis of accounting: cash basis and accrual basis. Capital and revenue expenditures and receipts. Events occurring after the balance sheet date, Extraordinary Items, Prior Period Items, Accounting Estimate. Accounting Policies, Fair Value, Meaning, Recognition and Disclosure Requirements of Provision, Contingent Liability and Contingent Asset.
- (iii) Financial Accounting Principles: Meaning and need; Generally Accepted Accounting Principles (GAAP): Entity, Money Measurement, Going Concern, Cost, Revenue Recognition, Realization, Fundamental Accounting Assumptions, Accruals, Periodicity, Full Disclosure, Consistency, Materiality, and Prudence (Conservatism). Fundamental Accounting Assumptions as per AS 1.
- (iv) Accounting Standards: Concept, benefits, and Process of formulation of Accounting Standards including Ind AS (IFRS converged standards) and IFRSs; convergence vs adoption; Application of accounting standards (AS and Ind AS) on various entities in India. International Financial Accounting Standards (IFRS) –meaning, need, and scope.

(B) Accounting Process

From the recording of a business transaction to the preparation of trial balance including adjusting, transfer and closing entries. Application of Generally Accepted Accounting Principles in recording financial transactions and preparing financial statements and accounting treatment of GST.

Unit 2: Business Income, Accounting for Property, Plant and Equipment, and Valuation of Inventory:

06 hours

- (a) Business income: Concept of Revenue and Business Income, Measurement of business income; relevance of accounting period, continuity doctrine and matching concept in the measurement of business income; Objectives of measurement of Business income.
- (b) Revenue recognition with reference to AS 9.
- (c) Accounting for Property, Plant, and Equipment with reference to AS 10. Impact of Depreciation on measurement of business income. Accounting for Intangible Assets with reference to AS 26.
- (d) Valuation of Inventory with reference to AS 2. Impact of inventory valuation on measurement of business income by using FIFO, LIFO, and Weighted Average Method.

Unit 3: Financial Statements of Sole Proprietorship and Not-for-Profit Organisations:

06 hours

Preparation of Financial Statements of Sole Proprietorship and Not-for-Profit Organisations

Unit 4: Accounting for Inland Branches, Departments and Leases:

06 hours

- (a) Accounting for Inland Branches: Concept of Dependent branches; Branch Accounting as per- Debtors System, Stock and Debtors' System
- (b) Accounting for Departments (excluding Mark-up Account)
- (c) Accounting for Leases with reference to AS 19

Unit 5: Computerized Accounting Systems:

06 hours

Computerized Accounting Systems: Computerized Accounts by using any popular accounting software Creating a Company; Configure and Features settings; Creating Accounting Ledgers and Groups; Creating Stock Items and Groups; Vouchers Entry including GST; Generating Reports - Cash Book, Ledger Accounts, Trial Balance, Profit and Loss Account, Balance Sheet, Cash Flow Statement. Selecting and shutting a Company; Backup, and Restore data of a Company.

Notes:

- (1) The relevant Accounting Standards (both AS and Ind AS) for all of the above topics should be covered.
- (2) Any revision of the relevant Indian Accounting Standard/Accounting Standard would become applicable.

Practical Exercises:

60 hours

The learners are required to:

1. download 'Framework for the Preparation and Presentation of Financial Statements from the websites of the Institute of Chartered Accountants of India (ICAI) to analyse the qualitative characteristics of accounting information provided therein.

2. collect and examine the balance sheets of business Organisations to study how these are prepared.
3. examine the accounting policies and revenue recognition policies by collecting necessary data from small business firms.
4. prepare Trading and Profit & Loss Account and Balance Sheet collecting necessary data from small business firms.
5. prepare financial statements manually and using appropriate software.
6. prepare accounts of Inland Branches.
7. collect data from your college and prepare a Receipt and Payment Account, Income and Expenditure Account and Balance Sheet.

CATEGORY-I

B.A. (VS) HUMAN RESOURCE MANAGEMENT

HUMAN RESOURCE PLANNING AND PROCUREMENT

DSC: 2.1

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|--------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| HUMAN RESOURCE PLANNING AND PROCUREMENT (DSC- 2.1) | 4 | 3 | 1 | 0 | Pass in class XII | NIL |

Learning Objectives

The aim of this course is to acquaint students with knowledge of the concept of human resource planning and the ability to forecast HR needs in an organisation. It focuses on issues and strategies required to select and develop manpower resources along with tools for effective manpower planning and evaluation.

Learning Outcomes

After completion of the course, learners will be able to:

1. to design an HR plan
2. examine various job analysis methods in different organisational settings
3. evaluate effectiveness of different HR demand forecasting techniques
4. describe the efficacy of different recruitment & selection methods
5. design the appropriate retention strategies for different types of organisations

SYLLABUS OF DSE-2.1

Unit 1 Overview of Human Resource Planning (HRP) (12 hours)

Human Resource Planning – meaning, features, scope, approaches, levels of HRP, types, tools, activities for HRP, requirements for effective HR planning, HRP as a tool to enhance organizational productivity, barriers in effective implementation of HRP and ways to overcome, job analysis and design, factors influencing job design methods, job analysis techniques, assessing job analysis methods

HRP Management Process: establish HRP department goals and objectives, creating HRP department structure, resolving conflicts, communicating, planning for needed resources

Unit 2 HRP: Forecasting and Evaluation (11 hours)

Manpower Forecasting: concept, factors affecting HRP, integration of strategic planning and HRP, Process of HRP – steps in HRP, HR demand forecasting – factors, techniques – managerial judgement, ratio trend analysis, regression analysis, work study technique, delphi

technique. HR Supply Forecasting – factors, techniques –skills inventories, succession plans, replacement charts, staffing tables.

HRP Evaluation – meaning, need, process, issues to be considered during HRP evaluation. Selected Strategic Options and HRP Implications: restructuring and its impact on HRP, outsourcing and its impact on HRP.

Unit 3 Employee Recruitment and Selection (11 hours)

Employee recruitment: nature, recruitment challenges, recruitment sources, methods of recruitment, legal compliances in recruitment and selection, pre-employment testing, background and reference checks, selection process. Selection methods- types of tests and interviews. Ethical issues in the selection process. Role of HR analytics in effective R&S, influences on recruitment and selection

Trends in Recruitment: corporate talent network, building an end-to-end talent brand, use of applicant tracking system (ATS), predictive analysis, gamification in recruitment, application of AI and VR in recruitment.

Unit 4 Employee Retention (11 hours)

Retention of Manpower- models of retention. Succession Planning. Retention Strategies - executive education, flexi timing, telecommuting quality of work, work life balance, participative management, employee empowerment, employee involvement, autonomous work teams

Practical Exercises:

The learners are required to:

1. Design a simulated human resource plan
2. Examine the appropriateness of each job analysis method for different job profiles
3. Identify the relative effectiveness of different HR demand forecasting techniques for different business environments
4. Examine the reasons for preference of certain recruitment & selection methods in prevalent times
5. Create a hypothetical plan demonstrating different retention strategies for a corporation

Suggested Readings:

- Belcourt M.; McBey K.J. (2016). Strategic human resource planning. Nelson Education.
- Bhattacharya, K. Deepak (2006). Human Resource Planning. Excel Books.

B.A. (VS) HUMAN RESOURCE MANAGEMENT

INDUSTRIAL RELATIONS

DSC-2.2

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|--------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| INDUSTRIAL RELATIONS (DSC- 2.2) | 4 | 3 | 1 | 0 | Pass in class XII | NIL |

Learning Objectives

To acquaint students with concepts of Industrial Relations and various legislations related to Labour Welfare and Industrial Relations.

Learning Outcomes: After completion of the course, learners will be able to:

1. examine the implications of employer-employee relations on effective organisational functioning
2. evaluate the significance of various legal provisions for safety & welfare in organisations
3. analyse the scope of trade unions
4. discuss the benefits provided by various legal provisions protecting the conditions of employment

SYLLABUS OF DSE-2.2

Unit 1: Overview of Industrial Relations

(12 hours)

Concept of industrial relations, aspects of industrial relations, conflict and cooperation, parties in industrial relations, workers employers and government, trade unions, objectives collective bargaining. Workers' participation in management, levels of participation, mode of participation works committee, joint management councils, worker director, grievance procedure, quality circles

Unit 2: Safety and Welfare**(11 hours)**

The Factories Act 1948, definition, approval, licensing and registration, health and welfare measures, employment of women and young persons, leave with wages and weekly holidays. The Payment of Bonus Act, The Maternity Benefit Act, The Workmen's Compensation Act.

Unit 3: Trade Unionism**(11 hours)**

Trade Union Act 1926, immunity granted to registered trade unions, recognition of trade unions. The Industrial Employment (Standing Orders) Act 1946: scope, coverage, certification process, modification, interpretation, and enforcement. The Industrial Disputes Act 1947: forum for settlement of disputes, instruments of economic coercion, strikes, lockouts and closure.

Unit 4: Conditions of Employment**(11 hours)**

Salient features and benefits relating to The Payment of Wages Act 1936, The Payment of Gratuity Act 1972, The Minimum Wages Act, benefits under The Provident Fund and Miscellaneous Provisions Act 1952 and Employees' Pension Scheme and Employees State Insurance Act 1948.

Practical Exercises:

The learners are required to:

1. examine power dynamics in the context of employer-employee relations in India
2. discuss the significance of safety & welfare in organisations with examples and cases
3. examine the powers of trade unions in India by discussing the notable cases
4. describe the latest judgments pertaining to various compensation legal provisions in India

Suggested Readings:

- Katz, Harry., Kochan, Thomas A., & Colvin, A. J.S. (2007) An Introduction to Collective Bargaining and Industrial Relations, McGraw Hill Companies.

MACROECONOMICS
DSC-2.3**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------------|----------|-----------------------------------|----------|---------------------|--------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| MACROECONOMICS (DSC- 2.3) | 4 | 3 | 1 | 0 | Pass in class XII | NIL |

Learning Objectives:

This course introduces students to the basic concepts in Macroeconomics beginning with the definition and measurement of the macroeconomic variables. It describes how the macro system operates and how and why the economy grows and fluctuates over time based on the decisions made, in the aggregate, by consumers, businesses, governments as well as global factors. As the world is shifting towards a global economy, the study of Macroeconomics helps the students to understand the overall macroeconomic environment under which one has to take economic decisions. This course also introduces the students to the macroeconomic environment which affects HRM.

Learning Outcomes:

Students will understand various macroeconomic phenomena that they come across at local, national and global levels regularly. This will enable them to understand the market scenarios based on present trend and government policies. This will give added advantage to students as managers since they can take informed decisions.

SYLLABUS OF DSE-2.3

Unit-I (09 hours)

Introduction: Basic concepts and issues of Macroeconomics. Circular flow of income.
National Income Accounting: Concepts of GDP and National Income; measurement of national income and related aggregates; nominal and real income; limitations of the GDP concept.
Lipsey & Chrystal Chapters 15,16
Case & Fair Chapters 20, 21

Unit-II (09 hours)

Determination of GDP: consumption and saving functions, investment function, equilibrium GDP; concepts of MPS, APS, MPC, APC; Concept of multiplier, fiscal and monetary policies.
Lipsey & Chrystal Chapter 16
Case & Fair Chapters 23,24

Unit-III (09 hours)

Good & services market and Money market: Derivations of the IS and LM functions; effects of fiscal and monetary policies on equilibrium income. Derivation of Aggregate Demand.

Lipsey & Chrystal Chapters 21 appendix on page 499-504

Case & Fair Chapters 26,27

Unit-IV

(09 hours)

The labour market: wage determination, employment. Aggregate supply curves; interaction of aggregate demand and supply to determine equilibrium output, price level and employment.

Case & Fair Chapters 28 (pages 559-567), 29 (pages 581-586)

Unit-V

(09 hours)

Firms Behaviour in the Macroeconomy: Investment and Employment decisions, Productivity and the Business cycle.

Balance of payments and exchange rate: Meaning, factors, current account, capital account, determination of exchange rate.

Case & Fair Chapters 31 (pages 624-631), 34 (pages 670-671), 35 (pages 687-691)

Suggested Readings:

1. Case, Karl E. & Ray C. Fair, Principles of Economics, Pearson Education, Inc., 10th edition, 2012.
2. Lipsey, R. and Alec Chrystal, Economics, Oxford University Press, Twelfth Edition, 2011

Note:

1. **Suggested Readings will be updated and uploaded on college website from time to time.**
2. **Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.**

BA (VS) INSURANCE MANAGEMENT
DSC- 2.1 Fundamentals of Insurance

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fundamentals of Insurance DSC – 2.1 | 4 | 3 | 1 | 0 | Pass in class XII | Nil |

Objectives: The course aims to familiarize the students with the origin of insurance and explain the terms frequently used in the insurance industry. It covers the fundamental principles on which insurance contracts are based and provides an overview of the different life & non-life insurance products. The student shall be exposed to the recent developments and challenges in the field of insurance.

Learning Outcomes: After completion of the course, learners will be able to:

1. describe the origin and growth of insurance
2. explain the basic concepts applicable to insurance contracts
3. differentiate the various principles of insurance and their application
4. compare the types of insurance and explain the need for different products.
5. appraise the contemporary insurance scenario and its challenges.

Unit 1: Origin & basic concepts of Insurance

11 hours

Origin and growth of Insurance in India and at global level, law of large numbers, insurance premium (building blocks, factors), insurable loss exposure, adverse selection and moral hazard

Unit 2. Principles of Insurance-I

11 hours

Principle of Indemnity, Principle of Insurable Interest. Principle of Utmost good faith (Uberrimae Fidei)

Unit 3. Principles of Insurance-II

11 hours

Principle of proximate cause, Principle of Contribution, Principle of Mitigation of Loss, Principle of Subrogation

Unit 4. Types of Insurance & contemporary developments

12 hours

Types, need, scope, and coverage of insurance (Life, Health, Property, Fire, Marine, Motor, Agricultural and Liability). Liberalisation, Globalisation and reforms in the Indian insurance sector, Contemporary issues: future opportunities and challenges in India and the world; Bancassurance, Re-insurance

Exercises:

The learners are required to:

1. Organise group discussions in class comparing the origin and growth of insurance in India & the world

(Unit1)

2. Organise presentations in class comparing the insurance premia for same/similar products offered by different insurance companies in India (Unit1)
3. Make group presentations covering case studies that explain the principles of insurance with respect to the compensation received by the insured (Unit2 & 3)
4. Conduct a survey (physical or online mode) of individuals regarding the different insurance products purchased by them and their need for it. (Unit4)
5. Examine the opportunities and challenges facing the Indian and global Insurance sector as reported in newspapers/business magazines (print or online). (Unit4)

Suggested Readings:

1. Dorfman, M. S. (2012). *Introduction to Risk Management and Insurance* (10th ed.). Prentice-Hall.
2. Gupta, P. K. (2017). *Fundamentals of Insurance*. Himalaya Publishing House.

6. Pal, K. (2019). *Insurance management principles and practice*. Deep & Deep Publications.
7. Rejda, G. E. (2017). *Principles of Risk Management and Insurance* (13th ed.). Pearson Education.
8. Skipper, D. Harold & Kwon, W. Jean (2008) Risk Management & Insurance Blackwell Publishing, Wiley India
9. Vaughan, E.T. & Vaughan, T., (2015) Fundamentals of Risk Management and Insurance.

Note: Suggested readings shall be updated and uploaded on the college website from time to time.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

BA (VS) INSURANCE MANAGEMENT
DISCIPLINE SPECIFIC CORE COURSE -2.2 (DSC- 2.2)

Fundamentals of Organisational Behaviour

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fundamentals of Organisational Behaviour DSC – 2.2 | 4 | 3 | 1 | 0 | Pass in class XII | Nil |

Objectives: The course aims to familiarise students with an understanding of individual and group behaviour at the workplace, focusing on the Indian experience and cases.

Learning Outcomes: After completion of the course, learners will be able to:

1. measure the types of personalities using standard instruments
2. examine interpersonal relationships by using standard models
3. discuss implementation of change and managing of resistance to change.
4. differentiate the styles of leadership
5. critique the roles of power, politics and conflict at the work place.

Unit 1: Core Concepts of Organisational Behaviour

11 hours

Conceptual foundation and importance of organizational behaviour; Perception and Attribution: Concept, factors affecting perception, Attribution theory, perceptual organization and errors in perception; Personality: concept, factors affecting personality and theories, standard instruments of measurement. Learning: concept and theories of learning, concept and schedules of reinforcement.

Unit 2: Motivation at work, interpersonal relations and change management 11 hours

Motivation: Concepts and their application, Content theories (Maslow, McClelland and Herzberg's Theories); Process theories (Expectancy theory, Equity theory). Analysis of Interpersonal Relationship: Transactional Analysis, Johari Window. Organisational; Change: Concept, Resistance to change, managing resistance to change, Kurt Lewin's Theory of Change.

Unit 3: Leadership and Group processes 11 hours

Leadership: Trait Approach, Behavioural theories (Ohio and Michigan State Studies, and Blake & Mouton's Managerial grid), and Contingency theories (Fiedler's Contingency Model, Hersey & Blanchard's Situational Leadership Model) Contemporary Leadership issues: Charismatic, Transactional and Transformational Leadership; Groups: Definition, stages of group development, processes-group cohesiveness, group think, group shift.

Unit 4: Managing power, politics and conflict 12 hours

Organisational Power and Politics: concept, sources of power, tactics to gain power in organizations. nature of organisational politics. Conflict: concept, sources, types, stages of conflict, management of conflict.

Exercises:

The learners are required to:

1. engage in group discussion after measuring individual personality types through standard instruments (unit1)
2. examine interpersonal relationships by using the model of the Johari window and transactional analysis in small groups (unit2)
3. study in small groups to evaluate the motivational theories at work in the Indian and international corporate context (unit2)
4. conduct a survey in small groups on the resistance to change among different stakeholders to the introduction of the UGCF in Delhi University in 2022 (Unit2)
5. make group presentations on leadership styles seen in Indian companies across sectors (unit3)
6. to engage in group projects based on corporate information available in public domain to explain the role of power, politics and conflict in family controlled Indian businesses. (Unit4)

Suggested Readings:

1. Kaul, Kumar Vijay (2012). Business Organization & Management - Text and Cases, Pearson.
2. Luthans, Fred (2017), Organisational Behaviour, Tata Mc Graw Hill.
3. Robbins, P. Stephen and Judge, T.A. (2019) Organisational Behaviour, 18th ed. Pearson.
4. Singh, Kavita (2015) Organisational Behaviour, Vikas Publishing house, Noida, India.
5. Robbins, Stephen P. and Judge, T. A. (2016) Organisational Behavior. Pearson.
6. Robbins, P. Stephen and Robbins, Coulter Mary (2020) Management. 15th ed. Pearson.

Note: Suggested readings shall be updated and uploaded on the college website from time to time.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

BA (VS) INSURANCE MANAGEMENT

DISCIPLINE SPECIFIC CORE COURSE -2.3 (DSC- 2.3) –:

Macroeconomics for Insurance

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Macroeconomics for Insurance DSC – 2.3 | 4 | 3 | 1 | 0 | Pass in class XII | Nil |

Objectives: The course aims to expose students to various macroeconomic policy actions that affect the insurance business. It explains how the broader macroeconomic policy making affects the choices of individuals and of the insurance firm. The course enables an understanding of the macroeconomic environment in which all enterprises including the insurance sector

Learning Outcomes: After completion of the course, learners will be able to:

1. explain the concepts of national income and flow of income at the local and national levels.
2. calculate and differentiate different national income aggregates.
3. identify and explain the relationship between money, monetary policy and its impact on the insurance sector.
4. locate the insurance market in the larger financial system.
5. translate the global insurance market scenarios based on present trends.

Unit 1: National Income Aggregates 11 hours

Economic units and circular flow of income, measurement of National Income, Nominal and Real Income, Measured and Purchasing Power Parity Income

Unit 2: Money 11 hours

Difficulties of barter exchange, concept and functions of money, theory of money supply, Monetary policy, goals, targets and indicators, instruments of monetary control.

Unit 3: Banking and Insurance 11 hours

Credit and financial system, financial markets, central bank, banking structure and insurance.

Unit 4: International monetary framework and open economy 12 hours

Functions of International Monetary Fund and World Bank; exchange rate regime and crises, global insurance

Exercises:**The learners are required to:**

1. engage in a group project to study the flow of income and savings at the household, firm and national level and specifically into the insurance sector (Unit1).
2. solve numerical exercises related to measurement of various national income aggregates. (Unit 1)
3. make a group presentation on the interlinkages between money, fractional reserves, interest rates and government policies related to insurance in industry and agriculture. (Unit2)
4. conduct a classroom discussion on the relationship between the insurance sector and the financial system (Unit3)
5. make a group presentation on the globalisation of insurance and technological advances (Unit4)

Suggested Readings:

1. Baye, M.R. and Jansen, D.W. (2006) Money, Banking and Financial Markets, ATTBS.
2. Bhole, L.M. and J. Mahakud, (2017) Financial Institutions and Markets, Tata McGraw Hill, 5th ed.
3. Sodersten, Bo (1994) International Economics, 3rd ed. Palgrave MacMillan.
4. Gupta, S. B. (2010) Monetary Economics: Institutions, Theory and Policy, S Chand and Sons.
5. Gupta, G.S. (2017) Macroeconomics: Theory and Applications, 4th ed., McGraw Hill Education (India) Private Limited.
6. Soumyen Shikdar, (2020) Principles of Macroeconomics, Oxford University Press.
7. Sethi, Jyotsna and Nishwan Bhatia (2012) Elements of Banking and Insurance, Phi learning Private Ltd.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

BA (VS) MATERIALS MANAGEMENT

DISCIPLINE SPECIFIC CORE COURSE -2.1 (DSC-2.1)

Introduction to Supply Chain Management

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|------------------------|-------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Supply Chain Management DSC 2.1 | 4 | 3 | 1 | 0 | Pass in class XII | Nil |

Objectives: The course aims to acquaint the students with

1. fundamentals of supply chain management (SCM) in an organization as well as the role of Relationship Marketing in SCM and understand the forecasting methods for demand of material and plan supply in Supply Chain process.
2. different strategies used in Supply Chain and the concepts of Inventory and Vendor Management.
3. measurement of performance using various indicators, Supply Chain Metrics (KPIs), Balanced Score Card Approach and Benchmarking;
4. the understanding of the emerging Trends and Challenges in SCM.

Learning Outcomes: After completion of the course, learners will be able to:

1. Explain the concepts of supply chain management (SCM) in an organization and explain the relationship marketing in SCM.
2. apply forecasting methods for demand of material and plan supply in supply chain process. They can also explain the different factors of SCM.
3. develop strategies in Supply Chain as well as explain the concepts of Inventory and Vendor Management.
4. measure the performance using various indicators, Supply Chain Metrics (KPIs), Balanced Score Card Approach and Benchmarking;
5. analyses the emerging Trends and Challenges in SCM.

Course Contents:

Unit 1: Introduction to Supply Chain Management (SCM) and Planning 12 hours

Concept of Supply Chain Management- Evolution, Importance, Scope, Functions, Logistics Vs SCM. Value chain for SCM, Role of relationship marketing in SCM; Managing relationships with suppliers and customers; Types of intermediaries. Planning demand and Supply in a Supply Chain; Demand forecasting in SCM; Aggregate planning in supply chain; Planning supply and demand in Supply Chain: Managing predictable variability

Unit 2: Supply Chain Strategy and Implementations

11 hours

Web-centric Supply Chain- Supply Chain in E-business, E-collaboration, E-Procurement; Structure of Supply Chain Management; Management of the Inventory in the Supply Chain Analysis including Vendor Management.

Unit 3: Supply Chain Performance Measurement

11 hours

Methods of performance measurement- balanced score card approach, benchmarking, supply chain metrics (KPIs). Performance measurement and continuous improvement.

Unit 4: Trends and Challenges in Supply Chain Management

11 hours

Third party and fourth party logistic outsourcing- Challenges and future directions. Global Supply Chain Management; Green supply chain management; Use of Information Technology in SCM; Re-engineering the supply chain- Future directions.

Exercises

The learners are required to:

1. study the practical benefits accrued by relationship marketing in SCM by conducting a survey of some organisations;
2. prepare forecasting schedule for assessing the use of demand and supply planning methods in an uncertain environment;
3. analyse the SCM strategies and inventory management used by different companies;
4. measure the comparative supply chain performance of few companies by doing case study.
5. prepare a report on latest trends and the impact of emerging issues in SCM.

Suggested Readings:

1. Branch, Alan. E. (2008) Global Supply Chain Management and International Logistics. Routledge, New York.
2. Chopra, S. & Meinde, P. (2000) Supply Chain Management- Strategy, Planning & Operation. Pearson Education.
3. Gattorna, J. L and Walters, D.W. (1996) Managing the Supply Chain: A Strategic Perspective. Macmillan, Hampshire.
4. Hult, M. G., Closs, D., Frayer, D. Global, (2013), Supply Chain Management: Leveraging Processes, Measurements, and Tools for Strategic Corporate Advantage. McGraw Hill Ltd.
5. Sarika Kulkarni and Ashok Sharma, (2004) Supply Chain Management. Tata McGraw-Hill Publishing Company Limited, New Delhi.
6. Simchi-Levi, D., Kaminsky, P., Simchi-Levi, E. & Ravi, Shankar (2008). Designing and Managing the Supply Chain. Tata McGraw Hill Education Private Limited.

Note: The suggested readings will be updated and uploaded on college website from time to time. The latest edition of the readings may be used.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

BA (VS) MATERIALS MANAGEMENT

DISCIPLINE SPECIFIC CORE COURSE -2.2 (DSC-2.2)

Business Organisation and Management

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|------------------------|-------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Business Organisation and Management DSC-2.2 | 4 | 3 | 1 | 0 | Pass in class XII | Nil |

Objective: The course aims to

1. develop understanding of dynamics of business organisations and recent management practices and levels of management and their competencies.
2. develop an understanding various perspectives related to business environment and entrepreneurship.
3. develop an understanding how the organisations adapt to an uncertain environment and decipher decision making techniques.
4. develop an understanding of the relationship amongst functions of management *i.e.*, planning, organizing, directing and controlling.
5. to analyse the change in working pattern of modern organisations.

Learning Outcomes: After completion of the course, learners will be able to:

1. explain the dynamics and forms of business organisations and choose the appropriate form of business organisation as per recent management practices, distinguish different levels of management and their competencies
2. analyse various perspectives related to business environment and perform SWOT analysis.
3. analyse how the organisations adapt to an uncertain environment and decipher decision making techniques.
4. analyse relationship amongst functions of management *i.e.*, planning, organizing, directing and controlling.
5. analyse the change in working pattern of modern organisations and frame the strategy

Course Contents:

Unit 1: Introduction

11 hours

Role of organisations and management in our lives; Nature and Functions of Management (An overview); Managerial Competencies, Ownership forms; Business formats- Brick & Mortar; Click; Brick & Click; E-commerce; Franchising; Outsourcing

Unit 2: Business Environment and Entrepreneurship

12 hours

Meaning and layers of Business Environment (micro/immediate, meso/intermediate, macro and international); SWOT analysis; Business ethics and social responsibility; Entrepreneurship and its relevance, Business and social entrepreneurship as a process of opportunity/problem; Micro, small and medium Enterprises; Government Policy regarding MSMEs

Unit 3: Planning, Organizing and Staffing

10 hours

Strategic Planning – Business and Corporate Level Strategies; Decision-making- process and techniques; Organizing, Formal and Informal Organisations, Centralisation and Decentralisation, Organisational structures – Divisional, Product, Matrix, Project and Virtual Organisation, staffing,

Unit 4: Motivation, Directing and Controlling

12 hours

Motivation- needs (including Maslow's theory), incentives, Equity and two factor theory (Herzberg); McGregor Theory X and Theory Y; Leadership – Leadership Styles, Transactional Vs. Transformational Leadership; Followership – meaning, importance and Kelley's Followership Model; Communication – New trends and directions (Role of IT and social media); Controlling – Techniques of Controlling Relationship between planning and controlling, contemporary trends in business and organisational management: Business process re-engineering, Work life Balance, Freelancing, Flexi-time and work from home, Co-sharing/co-working.

Exercises:

The learners are required to:

1. complete the exercises wherein they are given different situations and scenarios to start their own business (in terms of capital, liability, scale of operations, etc.) and are asked to select the most appropriate form of business organisation and justify the same highlighting the advantages and disadvantages of their choice.
2. participate in role play activity for describing the various levels of Management and competencies.
3. identify various elements affecting the business environment and conduct SWOT analysis for the company identified.
4. participate in simulation activity wherein each learner is asked to prepare strategic plans with respect to increasing the effectiveness.
5. present a role play on bounded rationality or on any aspect of decision making.
6. create a simulation exercise in class to demonstrate various types of authority, delegation, and decentralization of authority.
7. using Maslow's Need-Hierarchy Theory, analyse various needs and prepare a report.
8. demonstrate various types of Leadership Styles in the form of Role Play by identifying real life leaders from the corporate world.

Suggested Readings

Note: The suggested readings will be updated and uploaded on college website from time to time. The latest edition of the readings may be used.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

BA (VS) MATERIALS MANAGEMENT

DISCIPLINE SPECIFIC CORE COURSE -2.3 (DSC-2.3) –:

Macroeconomics

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|---------|-----------------------------------|----------|------------------------|-------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Macroeconomics DSC-2.3 | 4 | 3 | 1 | 0 | Pass in class XII | Nil |

Course Objectives:

This course introduces students to the basic concepts in Macroeconomics beginning with the definition and measurement of the macroeconomic variables. It describes how the macro system operates and how and why the economy grows and fluctuates over time based on the decisions made, in the aggregate, by consumers, businesses, governments as well as global factors. As the world is shifting towards a global economy, the study of Macroeconomics helps the students to understand the overall macroeconomic environment under which one has to take economic decisions. This course also introduces the students to the macroeconomic environment which affects materials management.

Course Learning Outcomes: After completion of the course, learners will be able to:

1. Acquire knowledge on various macroeconomic concepts
2. Explain the measurement of various macroeconomic aggregates like national income, consumption, saving, investment, inflation and exchange rate and how these aggregates affect retail business decision making.
3. Understand the role of inflation and inflationary expectations in economic decisions.
4. Analyze goods market and money market interactions influencing the businesses and overall macroeconomic environment.
5. Evaluate the firm's decisions on employment and investment and its' influence in macroeconomy

Unit-I**09 hours**

Introduction: Basic concepts and issues of Macroeconomics. Circular flow of income. National Income Accounting: Concepts of GDP and National Income; measurement of national income and related aggregates; nominal and real income; limitations of the GDP concept.

Lipsey & Chrystal Chapters 15,16

Case & Fair Chapters 20, 21

Unit-II**09 hours**

Determination of GDP: consumption and saving functions, investment function, equilibrium GDP; concepts of MPS, APS, MPC, APC; Concept of multiplier, fiscal and monetary policies.

Lipsey & Chrystal Chapter 16

Case & Fair Chapters 23,24

Unit-III**09 hours**

Good & services market and Money market: Derivations of the IS and LM functions; effects of fiscal and monetary policies on equilibrium income. Derivation of Aggregate Demand.

Lipsey & Chrystal Chapters 21 appendix on page 499-504

Case & Fair Chapters 26,27

Unit-IV**09 hours**

The labour market: wage determination, employment.

Aggregate supply curves; interaction of aggregate demand and supply to determine equilibrium output, price level and employment.

Case & Fair Chapters 28 (pages 559-567), 29 (pages 581-586)

Unit-V**09 hours**

Firms Behaviour in the Macroeconomy: Investment and Employment decisions, Productivity and the Business cycle.

Balance of payments and exchange rate: Meaning, factors, current account, capital account, determination of exchange rate.

Case & Fair Chapters 31 (pages 624-631), 34 (pages 670-671), 35 (pages 687-691)

Exercises:

The learners are required to:

1. Discuss the highlights of the 'economic survey' and annual budget by GOI in the classroom.
2. Conduct classroom discussions on how the recent macroeconomic events both at national and international levels are affecting retail businesses.
3. Make group presentations inviting different ideas on how government rules and regulations and policies with respect to taxation and subsidies can have both positive and negative impact on retail business.
4. conduct classroom discussions on role of inflation and inflationary expectations in the decision making of retail businesses.
5. conduct a group project and enquire into the wage and employment determining mechanism in any retail business.

Suggested Readings:

1. Case, Karl E. & Ray C. Fair, 2012 Principles of Economics, Pearson Education, Inc.,
2. Lipsey, R. and Alec Chrystal, 2011 Economics, Oxford University Press, Twelfth Edition,
3. Bo Sodersten and Geoffrey Reed, International Economics (1994), Red Globe Press London.

Note: The suggested readings will be updated and uploaded on college website from time to time. The latest edition of the readings may be used.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

BA (VS) SMALL AND MEDIUM ENTERPRISES

DISCIPLINE SPECIFIC CORE COURSE -2.1 (DSC-2.1) –: MSMEs Policy Framework

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| MSMEs Policy Framework (DSC - 2.1) | 4 | 3 | 1 | 0 | Pass in class XII | NIL |

This course is designed to make students understand the policies which were initiated with respect to MSMEs and their growth. Students will be able to understand the importance of professionalism in MSMEs operations. It will give an overview of taxation benefits available to MSMEs and how the MSMEs can survive in the competitive era and will also enable students to become successful entrepreneur.

Learning Objectives: The objectives of the paper are to:

1. Make the students understand pre and post liberalization industrial policies for MSMEs.
2. Learn the rationale for reservation of items for MSMEs.
3. Make the students understand the role, functions and objectives of Ministry of MSME.
4. Enable the students to understand the different tax concessions and benefits provided by governments from time to time which help MSMEs to establish themselves more strongly.
5. Know the measures taken by the government for export promotion with respect to MSMEs.

Learning Outcomes: After completion of the course, learners will be able to:

1. Analyse the pre and post liberalization industrial policies for MSMEs.
2. Assess the rationale for reservation of items for MSMEs.
3. Evaluate the role, functions and objectives of Ministry of MSME.
4. Suggest and avail the different tax concessions and benefits provided by governments from time to time which help MSMEs to establish themselves more strongly.
5. Evaluate and implement the measures taken by the government for export promotion with respect to MSMEs.

SYLLABUS OF DSC-2.1

UNIT 1: Introduction

09 Hours

Pre and post liberalization industrial policies for MSMEs, Differences in regulatory measures with respect to MSMEs, Future policy initiatives for MSMEs, Present policy framework and focus areas, Public Private Participation (PPP), Role of MSMEs policy framework in growth and development of Indian economy, Ganguly Committee Report: Purpose, Objectives, findings and recommendations.

UNIT 2: Support Mechanism

09 Hours

Reservation of items for small scale industries, Rationale for reservation of items for SSIs, Reasons for de-reservation, Relationship between de-reservation and employment, Removal of quantity restrictions, Causes and consequences of sickness in MSMEs, Policy measures taken by various governments to prevent sickness in MSMEs, Relationship between MSMEs sickness and lack of professionalism in MSMEs, Financial support to MSMEs in ZED (Zero Defect & Zero Effect Certification Scheme), Credit Guarantee Trust Fund for Micro & Small Enterprises (CGTMSE), Role of “The Make in India and Atmanirbhar Bharat” initiative in the growth of MSMEs.

UNIT 3: Regulatory Framework and Mechanism

09 Hours

Ministry of MSME: Its role, functions and objectives, Concept of equity participation, Equity issues by small enterprises through OTCEI, Role, features and functions of OTCEI in relation to MSMEs, Technology up gradation in small scale Industries, Support of MSMEs on ISO Certification & skills up gradation, Technology Bureau for Small Enterprises (TBSE): Purpose, Functions and role in the growth of MSMEs, Entrepreneurial and Managerial Development of MSMEs through Incubators.

UNIT 4: Taxation Benefits and MSMEs

09 Hours

Need for tax benefits, Concept of tax holiday and its relevance for MSMEs, Udyog Aadhaar, Tax provisions regarding rehabilitation allowances and amortization of certain preliminary expenses, Tax benefits to MSMEs under Section 115BA, 115BAA, 115BAB, 44AD, 44AE and other relevant sections of Income Tax Act, 1961, GST impact on MSMEs, Tax concession and other benefits to MSMEs in rural and backward areas.

UNIT 5: Measures for Export Promotion

09 Hours

Export assistance and promotion measures including various export promotion scheme and assistance, Export Promotion Council: Role, functions and objectives, Duty Drawback Scheme, Rebate of Duties & Taxes on Export Products (RoDTEP Scheme), Advance Authorisation Scheme (AAS), Export Promotion Zones (EPZs), Special Economic Zones (SEZ), Free Trade Zone (FTZ), Duty Exemption & Remission Schemes, Measures for export promotion taken with respect to MSMEs.

Exercises:

The learners are required to:

1. Analyse the contribution of pre and post liberalisation industrial policies for MSMEs in the development of Indian economy by an assignment. (Unit I)
2. Assess how reservation of items for MSMEs have contributed in growth of MSMEs over the years by a report. (Unit II)
3. Critically evaluate the role and functions of Ministry of MSME in their growth over the years by a case study (Unit III)
4. Assess how different tax concessions and benefits helped MSMEs to avoid sickness and face competition by way of project report (Unit IV)
5. Evaluate how the measures taken by Government for Export Promotion have contributed in the growth of MSMEs in the last decade by a case study (Unit V)

Suggested Readings

**BA (VS) SMALL AND MEDIUM ENTERPRISES
DISCIPLINE SPECIFIC CORE COURSE -2.2 (DSC- 2.2) –:
Institutional Support to MSMEs**

**CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE
COURSE**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre- requisite of the course (if any) |
|---|----------|-----------------------------------|----------|------------------------|------------------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Institutional Support to MSMEs (DSC-2.2) | 4 | 3 | 1 | 0 | Pass in class XII | NIL |

This course will provide the students with the basic knowledge, understanding and functions of the various institutions supporting MSMEs in India. It will equip the students with the knowledge of various resources available in India for starting a successful business.

Learning Objectives: The objectives of this course are to:

1. Make familiar the students with the various institutional support mechanisms available for MSMEs.
2. Make aware of the various educational and training programs provided to entrepreneurs.
3. Learn about the role of financial institutions in providing financial assistance to MSMEs.
4. Know and understand the financial schemes provided by financial institutions to MSMEs.
5. Conversant with the various infrastructure, procurement and marketing support schemes.

Learning Outcomes: After completion of the course, learners will be able to:

1. Explain the various institutional support mechanisms available for MSMEs.
2. Identify the educational and training programs for acquiring the necessary skills and knowledge in starting a business.
3. Develop knowledge and awareness of the role of financial institutions in providing financial assistance to MSMEs.
4. Identify financial schemes provided by financial institutions and will also explain the necessary steps in availing the financial scheme.
5. Develop awareness of infrastructure, procurement and marketing support schemes.

SYLLABUS OF DSC-2.2

Unit 1: Institutional Support Mechanism I

09 Hours

Need and importance of institutional support mechanisms in MSMEs. SSI Board, SIDCO, NSTEDB, National Productivity Council (NPC), Small Industries Service Institutes (SISIs), Technical Consultancy Organisations (TCOs), NABARD, SIDBI.

Unit 2: Institutional Support Mechanism II

09 Hours

DIs, DICs, SFCs, State Industrial Development/Investment Corporations (SIDC/SIICs), State Infrastructure Development Corporations, State Cooperative Banks, Regional Rural Banks, State Export Corporations, Agro Industries Corporations, Handloom and Handicrafts Corporations.

Unit 3: Educational Institutional Support

09 Hours

Need and importance of educational support for MSMEs. Role and programs offered by educational institutions for entrepreneurship: NIESBUD, EDII, IIE, KVIC, NSIC, NIMSME, MGIRI, SISI.

Unit 4: Institutional Financial Support

09 Hours

Need and importance of financial support for MSMEs, Role of RBI in respect of MSMEs, Role of NABARD in relations to MSMEs, Role of NBFCs in relations to MSMEs, Credit and Financial Assistance: PMEGP, PMMY, CGTMSE, CLCSS, CGSSD, Funding schemes for MSME, SMILE, MSME loan in 59 minutes, MSME loans by Banks.

Unit 5: Infrastructure, Procurement and Marketing Support

09 Hours

Infrastructure Support Schemes: SFURTI, ASPIRE, MSE-CDP, Technology Centres, Promotion of MSMEs in NER and Sikkim.

Procurement and Marketing Support: Procurement and Marketing Support Scheme (PMS), Public Procurement Policy, Government e-Marketplace.

Exercises:

The learners are required to:

1. Discuss various Institutional support mechanism available to MSMEs in class and differentiate the purpose of the various schemes. (Unit I & II)
2. Identify the educational and training programs which will benefit and increase the productivity and efficiency of various types of MSMEs. (Unit III)
3. Identify the financial schemes which will be beneficial for MSMEs. (Unit IV)
4. Discuss the various infrastructure, procurement and marketing support made available to MSMEs. (Unit V)
5. Design a business proposal and identify the educational, financial, infrastructural, procurement and marketing support schemes which will benefit a particular business. (Unit III, IV & V)

Suggested Readings:

B.A. (VS) MARKETING MANAGEMENT AND RETAIL BUSINESS

DSC-2.2 - Retail Management

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------------|----------------|--|-----------------|----------------------------|-----------------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Retail Management DSC-2.2 | 4 | 3 | 1 | 0 | Pass in class XII | NIL |

Learning Objectives

The paper aims to provide a comprehensive understanding of the theoretical and applied aspects of Retail Management and enable student about buying process, retail market strategy and target market.

Learning Outcomes

Learning outcomes of the course will be as follows

1. To explain the concept of retailing and its formats.
2. To discuss the structural changes in retail environment and the dynamics of retail store location.
3. To analyse the conceptualized framework and analyse the retail planning and logistics.
4. To acquire the knowledge about the emerging issues in retailing.

SYLLABUS OF DSC 2.2

Unit 1 Introduction:

(09 hours)

Concept objective and functions of Retail Environment; Types of Retailing Formats: Super Market, Hyper Market, Departmental Stores, Convenience Stores, and Catalogue Retailers. Non-Stores Retailing: Vending Machine, Door to Door selling, Mail Order, and E-Retailing; Credit Card Transaction, Smart Card and E-Payment. Managing retailing in the different atmosphere - growth, boom, depression & recession; Govt. macroeconomics policy in the retail industry

Unit 2 Structural change:

(12 hours)

Types of changes in the retail environment - Socio demographic change, Technology and economic change, socio-economic changes, Impact of changes on the retail industry. Retail Location: Choosing a Store Location: Trading-Area analysis, characteristics of trading areas, Site

selection, Types of locations, and site evaluation; SWOT analyses of the retail sector, shopping at World Stores, The Internationalization Process and Culture.

Unit 3 Store Planning and Logistics:

(15 hours)

Store Planning: Design & Layout, Retail Image Mix, effective retail space management, floor space management; Store Manager –Responsibilities, Inventory Management, Customer Service, Management of Retail Outlet/Store, Store Maintenance, and Store Security; Logistics and Distribution: Shipping the Goods to Market: The Distribution Process, The stages of distribution; Trends in supply chain management, Physical Distribution and Inventory Management, Warehouse Management.

(09 hours)

Contemporary issues in retailing, Making People Matter: Retail Employment, Planning the Workforce, Management and Organizational Culture, Personnel Management and Administration, Health and Safety; a review of Retailing: Cultural Transformation and Retailing, New Approaches in Retailing, Emerging Themes and Niches, Building for the future: Learning from the past.

Exercises:

The learners are required to:

1. explain an analytical report on the use of vending machines in a retail format of your choice (Unit 1).
2. design the retail business plan analysis of any retail store (Unit 2).
3. study the layout, display and logistics of any store-based retail format (Unit3).
4. perform role play as customer and retailer with respect to different product categories to effectively demonstrate the ability to close the sale (Unit 4).
5. conduct personal interviews of the sales staff in a retail store to identify what motivates them more- monetary or non-monetary incentives (Unit 4).

Case Study: Relevant case study should be discussed with the students.

Suggested Readings:

1. Newman A and Cullen P, (2001), *Retailing: Environment and Operations*, Cengage learning, Andover, UK
2. Bajaj C., Tulsi and R, Shrivastava N.V. (2010) *Retail Management*, Oxford University Press.
3. Barry B., & Evance J.R, (2006), “*Retail Management*” Prentice Hall India.
4. Gibson G. And Vedamani, (2004), *Retail Management*, Jaico Publishing House, Bengaluru.
5. Pradhan, S., (2007), “*Retailing Management- Text and Cases*” Tata McGraw-Hill New Delhi

Note: Suggested readings will be updated and uploaded on college website from time to time

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

B.A. (VS) MARKETING MANAGEMENT AND RETAIL BUSINESS

MACROECONOMICS - 2.3 (DSC-2.3) –:

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------------|--|-----------------|--------------------------------|---------------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Macroeconomics DSC-2.3 | 4 | 3 | 1 | 0 | Pass in class XII | Nil |

Learning Objectives:

This course introduces students to the basic concepts in Macroeconomics beginning with the definition and measurement of the macroeconomic variables. It describes how the macro system operates and how and why the economy grows and fluctuates over time based on the decisions made, in the aggregate, by consumers, businesses, governments as well as global factors. As the world is shifting towards a global economy, the study of Macroeconomics helps the students to understand the overall macroeconomic environment under which one has to take economic decisions. This course also introduces the students to the macroeconomic environment which influences retail business.

Learning Outcomes

Learning outcomes of the course will be as follows

Students will understand various macroeconomic phenomena that they come across at local, national and global levels regularly. This will enable them to understand labour market scenarios based on present trend and government policies. This will give added advantage to students as retailer since they can take informed decisions.

SYLLABUS OF DSC 2.3

Unit-I

(09 hours)

Introduction: Basic concepts and issues of Macroeconomics. Circular flow of income, National Income Accounting: Concepts of GDP and National Income; measurement of national income and related aggregates; nominal and real income; limitations of the GDP concept.

Lipsey & Chrystal Chapters 15,16

Case & Fair Chapters 20, 21

Unit-II

(09 hours)

Determination of GDP: consumption and saving functions, investment function, equilibrium GDP; concepts of MPS, APS, MPC, APC; Concept of multiplier, fiscal and monetary policies.

Lipsey & Chrystal Chapter 16

Case & Fair Chapters 23, 24

Unit-III

(09 hours)

Good & services market and Money market: Derivations of the IS and LM functions; effects of fiscal and monetary policies on equilibrium income. Derivation of Aggregate Demand

Lipsey & Chrystal Chapters 21 appendix on page 499-504

Case & Fair Chapters 26, 27

Unit-IV

(09 hours)

The labour market: wage determination, employment.

Aggregate supply curves; interaction of aggregate demand and supply to determine equilibrium output, price level and employment

Case & Fair Chapters 28 (pages 559-567), 29 (pages 581-586)

Unit-V

(09 hours)

Inflation, Role of Inflationary Expectations, Aggregate Demand and Aggregate supply: Inflation, causes of inflation, demand-pull inflation, cost-pull inflation.

Economic gains from trade, absolute advantage, comparative advantage. Balance of payments and exchange rate: Meaning, factors, current account, capital account, determination of exchange rate.

Case & Fair Chapters 28 (pages 567-570), 34 (pages 663-671), 35 (pages 687-691)

Suggested Readings:

1. Case, Karl E. & Ray C. Fair, Principles of Economics, Pearson Education, Inc., 10th edition, 2012
 2. Lipsey, R. and Alec Chrystal, Economics, Oxford University Press, Twelfth Edition, 2011
- Note: Suggested readings will be updated and uploaded on college website from time to time***

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

B.A. (VS) TOURISM MANAGEMENT
DSC-2.1 - TOUR GUIDING AND ESCORTING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|--------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| TOUR GUIDING AND ESCORTING (DSC- 2.1) | 4 | 3 | 1 | 0 | Pass in class XII | NIL |

Learning Objective:

This course provides students with extensive knowledge of techniques and best practices for guiding and accompanying domestic and international travelers. This course covers a basic knowledge of tour management and travel business principles. This course also teaches students about actual activities related to travel packaging, such as itinerary planning and travel expenses for creating package tours.

Learning Outcome:

After completing this course, the learners would be able to:

1. Explain the roles, duties and skills of a tour guides and escorts.
2. Describe the various procedures and techniques involved in guiding in different situations and sites.
3. Demonstrate with the responsibilities and dynamics in tour escorting, explain the pros and cons of tour escorting, in-depth and practical knowledge about the tour escorting and guiding through exposure to various case studies.
4. Discuss and implement various skills such as reading, research, communication and leadership for conducting successful tour, planning and organizing of tours.

SYLLABUS OF DSE-2.1

Unit – I

11 Hours

Basics of Tour Guiding: Meaning, Definition and Role of a Guide in Tourism, Types of Guides, Characteristics of Tour guide, Skills required to become a tour guide, Procedure of registration / approval of Guides.

Unit – II

11 Hours

Guiding Techniques: Understanding the dynamics of tour guiding, Duties and Responsibilities of guide pre, post and during tour, guiding at natural, cultural, and historical sites. Handling emergency situation.

Unit – III

11 Hours

Introduction to Tour Escorting: - Personal hygiene and grooming, responsibilities of Escort - pre, post and during tour responsibilities, difference between guide & escort, advantages, and disadvantages of choosing tour escorting as a profession.

Unit – IV

12 Hours

Group Handling Techniques: Leading a group, check list, Group control and Setting Limits, Problem solving skills - lost Baggage, medical assistance, lost of tourist, Tips to keep group happy; Ethical and professional considerations.

Practical Exercises

The learners are required to:

1. Explain relevant concepts of tour guiding and escorting by way of Class presentation.
2. Demonstrate and discuss different skills, concept and function using Focused group discussion.
3. Assess the understanding of theory and practical by objective and subjective assessment (Class test, assignments, MCQs, Fill in the blanks and quiz).

4. Demonstrate the tour guiding/escorting skills at a monument or a National Park or a museum.

Suggested Readings:

2. **Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.**

B.A. (VS) TOURISM MANAGEMENT

DSC-2.2 – : ENTREPRENEURSHIP & NEW VENTURE PLANNING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------------|--|-----------------|-----------------------------|-----------------------------|---|
| | | Lecture | Tutorial | Practical / Practice | | |
| ENTREPRENEURSHIP & NEW VENTURE PLANNING (DSC- 2.2) | 4 | 3 | 1 | 0 | Pass in class XII | NIL |

Learning Objective

This course aims at instituting entrepreneurial skills in the students by giving an overview of entrepreneurship and the competencies that are needed to become an entrepreneur. To enable students to explore and launch entrepreneurial ventures in their own areas of interest.

Learning Outcomes

After completion of the course, learners will be able to:

1. discern distinct entrepreneurial traits.
2. process and nature of entrepreneurship.
3. identify the different ways in which entrepreneur manifests in start-ups .
4. describe the entrepreneurial process for initiating new venture creation.
5. design strategies for the successful implementation of innovative ideas of new ventures.

SYLLABUS OF DSE-2.2

Unit 1: Introduction

09 Hours

Concept and Definitions Entrepreneurship, Entrepreneurial Mind-set, Traits/Qualities of Entrepreneurs, Entrepreneurship process; Theories of entrepreneurship; Factors affecting the emergence of entrepreneurship; Role of an entrepreneur in economic growth as an innovator; Generation of employment opportunities; complementing and supplementing economic growth; Bringing about social stability and balanced regional development of industries.

Unit 2: Types of Entrepreneurs

09 Hours

Classification and Types of Entrepreneurs; Women Entrepreneurs; Social Entrepreneurship; Corporate Entrepreneurs, Family Business: Concept, structure, and kinds of family firms; Culture and evolution of family firm; Managing Business.

Unit 3: Business plan

09 Hours

Creating Entrepreneurial Venture: Generating Business ideas, Team building, Sources of Innovation, Creativity, and Entrepreneurship; Challenges in managing innovation; Entrepreneurial strategy and Scaling up, Business planning process; Drawing business plans; Failure of the business plan.

Unit 4: Mobilizing Resources

09 Hours

Resource Mobilization for entrepreneurship: Resources mobilization, types of resources, Process of resource mobilization, Arrangement of funds; writing a Funding Proposal, Traditional sources of financing, Venture capital, Angel investors, Business Incubators.

Unit 5: Managerial Aspects of Business and Government Initiatives

09 Hours

Managing finance; Understanding capital structure; organisation structure and management of human resources of a new enterprise; Marketing-mix; Management of cash; Relationship management; Cost management, Government initiatives for promoting entrepreneurship.

Practical Exercises:

The learners are required to:

1. discuss various cases of entrepreneurship and distinguish between different entrepreneurial traits.
2. prepare a business plan for a start-up venture in a rural setting after analyzing the various facets of the rural economy.
3. analyse and present the key initiatives of the Government of India for promoting entrepreneurship in the country.
4. analyse and interpret case study on business philosophy of Tata Group, Aditya Birla Group, Reliance Industries Limited, and similar organisations.
5. participate in Business Plan Competition-designing a business plan proposal and identifying alternative sources of raising finance for the start-ups.

Suggested Readings:

2. **Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.**

B.A. (VS) TOURISM MANAGEMENT

DSC-2.3 – : DESTINATION IN TOURISM: CITIES, ROUTES, AND HERITAGE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------------|--|-----------------|----------------------------|-----------------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DESTINATION IN TOURISM: CITIES, ROUTES, AND HERITAGE (DSC- 2.3) | 4 | 3 | 1 | 0 | Pass in class XII | NIL |

Learning Objective:

This paper intends to introduce students of vocational courses to the process of city making, the emergence of trade routes and establishment of the popular destinations in India, from ancient to contemporary times. Upon completion of this course, students will be equipped to implement the conceptual tools and case studies to further their professional and educational goals. This paper will impart a holistic understanding of urbanism in India and will provide students with vocational courses like Tourism to identify new destinations, places to visit and attractions in their professional work. To students in general, the course will be informative and helpful in expanding their general knowledge or understanding of Indian cities. Finally, students will be able to locate their own experience of living in urban centres in the more extensive timeline of urbanization.

Learning Outcomes:

Upon completion of this course the student shall be able to:

1. Discuss urban centres and their types as well as urban centres as a destination.
2. Explain urban centres in ancient India, trade routes and their importance.
3. Analyze processes of urbanization in Medieval India.

4. Discuss rise of modern cities - Colonial Urbanism: Factory & Fortress towns, Presidencies, Hill-stations, Port Towns and Planned Cities, Urbanization in successor and princely states.

SYLLABUS OF DSE-2.3

Unit 1- Introduction to Urban Centres, Routes and Destinations

11 Hours

Definition and Concepts: Cities as centres; Routes, Circulation and Communication; Role of Surplus, Types of Urban Centres: Religious centres, Commercial centres (guild system), Political capitals and Pilgrimage towns, Urban centres as the Destination, Attractions and places of leisure, Significance of Traveller's account: Megasthenes, Fa-Hien, Hiuen Tsang, Ibn Batuta, Marco Polo, Manucci, Tavernier etc.

Unit 2- Urban Centres in Ancient India

11 Hours

Nature of Harappan Towns and Cities. - Second Phase of Urbanization: Emergence of Urban centres and trade routes in the Gangetic plain, Deccan and Tamilakam, Rise of administrative, trade and religious centres: A case study of Taxila, Kausambi, Patliputra, Mathura or Ujjain, Kondapur, Arikamedu, Kanchipuram etc.

Unit 3- Urban Centres in Medieval India

12 Hours

Delhi sultanate and its urban centres: Metropolitan towns (Delhi and Qannauj), Planned cities (Deogir/Daulatabad), Garrison Towns (Ucch and Multan), Qasbahs, Sarais and Khanqahs, Regional cities and Temple Towns: Ahmadabad, Jaunpur and Kanchipuram, Vijayanagar Kingdom: Case study of Hampi. - Mughals: Capital cities (Agra, Fatehpur Sikri and Shahjahanabad), Sacred City Centres (Ajmer and Benaras) and Port towns (Surat and Musalipatnam).

Unit 4- Urban Centres in Modern India

11 Hours

Colonial encounter: Rise of modern cities, the impact of the European Industrial Revolution on India, Mercantilism and Migration, Colonial Urbanism: Factory & Fortress towns, Presidencies, Hill-stations, Port Towns and Planned Cities, Urbanization in successor and princely states: Jaipur, Lucknow and Hyderabad, Cities of Colonial India: Mumbai, Chennai, Kolkata and New Delhi,

The emergence Of New Urban centres in Post- Colonial India: Case studies of Chandigarh and Bengaluru.

Practical Exercises:

1. Interactive sessions through group discussions or group presentations shall be used to enable learning of Urban Centres, Routes and Destinations, Urban Centres in Ancient India, Urban Centres in Medieval India and Urban Centres in Modern India as well as to facilitate revision of issues outlined in the lectures.
2. Supporting audio-visual aids like documentaries and power point presentations, and an appropriate field-visit will be used where necessary.
3. Assess the understanding of theory and practical by objective and subjective assessment (Class test, assignments, MCQs, Fill in the blanks and quiz).

44. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 38-1-7 dated 08.12.2022 regarding Syllabi of 2nd Semester of Department of Music

Add the following:

Syllabi of Semester-II of the Department of Music under Faculty of Music & Fine Arts based on Under Graduate Curriculum Framework -2022 to be implemented from the Academic Year 2022-23.

**Faculty of Music & Fine Arts
(Department of Music)**

**B.A. (Hons.) I Music - Hindustani Music
Vocal/Instrumental (Sitar/Sarod/Guitar/Violin/Santoor)**

DSC – 4: THEORY OF INDIAN MUSIC

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|-----------------------------|---------|--------------------------------------|---|---|-------------------------|--------------------------------|
| | | L | T | P | | |
| GENERAL THEORY (201) | 4 | 3 | 1 | 0 | Class XII Pass | Nil |

Learning Objectives:

- To initiate the student to the rich history of Indian music, through the study of ancient musical concepts.
- To teach him the concept of every raga being performed according to a specific time
- To make the student aware of the life and contribution of two legends – Pt. Bhatkhande and Pt. Paluskar, credited with the revival of Hindustani Classical

Music

- To introduce him to the basic concepts of Western music
- To enable the student to fully grasp the elements of Instrumental music, used in the art of playing a raga

Learning Outcomes:

- The student will come to know how ragas were performed in ancient times.
- He will learn the principles governing the Time Theory of Ragas, in that every raga is to be performed according to a designated time. This will enhance his understanding of the raga and their associated moods.
- The student will appreciate the pioneering work done by the aforementioned legends of Hindustani music, and how the state of modern music is a direct result of their tireless efforts in reviving the dying art.
- The student will be able to read compositions written in Western notation system and will also be able to make a comparative analysis with the notation system of Hindustani music

Syllabus:

Unit – I (6 hours)

- Margi-Desi
- Gandharava - Gaan
- Nibaddha-Anibaddha Gaan
- Ragalap-Rupkalap

Unit – II (6 hours)

- Sthaya
- Kaku
- Alpatva-Bahutva
- Avirbhav-Tirobhav

Unit – III (6 hours)

Time Theory of Ragas:

- Sandhiprakash ragas
- Daytime prahar ragas
- Nighttime prahar ragas
- Parmel praveshak ragas
- Adhvadarshak ragas

Unit – IV (3 hours)

Life and contribution of the following:

- Pt. Vishnu Narayan Bhatkhande
- Pt. Vishnu Digambar Paluskar

Unit – V (10 hours)

- Rudiments of Staff Notation
- Harmony
- Melody
- Polyphony

Unit – VI (10 hours)

- Maseetkhani Gat and Vilambit Gat
- Razakhani and Drut Gat
- Krintan
- Zamzama
- Ghaseet
- Gitkiri
- Meend
- Sut
- Kan
- Khatka
- Murki

Unit – VII (2 hours)

- Study of the following talas in detail – Chautala, Jhaptala & Kaharva
- Study of the application of talas in musical forms
- Ability to write the notation of the talas in dugun, tigun and chaugun

Unit – VIII (2 hours)

- Study of the ragas of this semester – Jaunpuri, Kafi, Vrindavani Sarang, Durga
- Comparative study of the ragas with each other
- Ability to write the notation of compositions in prescribed ragas

Suggestive readings:

- Clements, E. (1912) Introduction to The Study of Indian Music, Allahabad, U.P., Kitab Mahal
- Vir, Ram Avtar (1980) Theory of Indian music, Delhi, Pankaj Publication
- Bhatkhande V.N. (1975) Bhatkhande Sangeet Shastra, Hathras, UP, Sangeet Karyalay
- Pathak, Jagdish Narayan (1969) Sangeet Shastra Praveen, Allahabad, U.P., Published by Shri Ratnakar Pathak
- Nigam, V.S. (1973) Sangeet Kamudi, Part I, Allahabad, U.P. Indian Art Press

- Nigam, V.S. (1974) Sangeet Kamudi, Part II, Allahabad, U.P. Indian Art Press
- Sharma, Swatantra (1996) Bhartiya sangeet, Delhi, Pratibha Prakashan
- Chakravarty, Indrani (1988) Sangeet Manjusha, Delhi, Mittal Publication
- Sharma, Swatantra (2012) Paschatya Swarlipi Paddhati evam Bhartiya Sangeet, U.P., Anubhav Publication House
- Bhatkhande V.N. (1980) Bhatkhande Sangeet Shastra, Part II, Hathras, U.P., Sangeet Karyalaya

DSC – 5: Stage Performance

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|----------------------------|---------|-----------------------------------|---|---|----------------------|-----------------------------|
| | | L | T | P | | |
| STAGE PERFORMANCE (202) | 4 | 0 | 0 | 4 | Class XII Pass | Nil |

Learning Objectives:

- To continue to focus on the basics of singing/playing.
- To encourage the student to attempt to improvise while singing/playing.
- To focus on his learning of newer talas.
- To further his training in performance, with other basic ragas as prescribed.

Learning Outcomes:

- The basics of the student will get further strengthened.
- The student will start to gain self-belief and make attempts to improvise while performing a raga.
- The student will begin to gain some command over increasingly complex talas.
- With other basic ragas, the student will understand how to use the flat and sharp notes in ragas with varied tonal phrases.
- He will gain confidence with the Tabla accompanying him in performances of larger time-duration

Syllabus:

Prescribed ragas:

1. Jaunpuri
2. Kafi
3. Vrindavani Sarang
4. Durga

Unit I – Vocal Music (120 hours):

- A detailed performance of Vilambit and Drut Khayal with gayaki to be

- presented in any one raga
- Presentation of one semi classical, devotional or folk song

OR

Unit II – Instrumental Music (120 hours):

- A detailed performance of Maseetkhani and Razakhani Gats with elaboration to be presented in any one raga
- Presentation of a dhun, devotional or light music composition

Note: Students of Vocal and Instrumental music will have to prepare according to the requirements of their respective Units.

Suggestive readings:

- Bhatkhande, V.N. (2000) Kramik Pustak Malika, Part-I, Hathras, U.P., Sangeet Karyalaya
- Bhatkhande, V.N. (2000) Kramik Pustak Malika, Part-II, Hathras, U.P., Sangeet Karyalaya
- Patwardhan, V.R., (2001) Raga Vigyan, Part-I, Pune, MH, Dr. Madhusudhan Patwardhan
- Patwardhan, V.R., (1999) Raga Vigyan, Part-II, Pune, MH Dr. Madhusudhan Patwardhan
- Patwardhan, V.R., (1967) Raag Vigyan, Part-III, Pune, MH, Dr. Madhusudhan Patwardhan
- Mishra, Lalmani, (1979) Tantrinada, Kanpur, U.P. Sahitya Ratnalaya
- Aggarwal, V.K. and Nagpal, Alka (2004) Sitar and its Compositions, Part-I-II, Delhi, Sanjay Prakashan
- Mahajan, Anupam (2003) Compositions in Instrumental Music (Traditional and New Creation), Delhi, Sanjay Prakashan

DSC – 6: Practical Assessment

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|----------------------------|---------|-----------------------------------|---|---|----------------------|-----------------------------|
| | | L | T | P | | |
| PRACTICAL ASSESSMENT (203) | 4 | 0 | 0 | 4 | Class XII Pass | Nil |

*Practical assessment is a viva paper.

Learning Objectives:

- To assess the understanding of the student regarding the grammatical rules of the prescribed ragas
- To make an assessment of the student regarding his ability to perform different

compositions in different talas

- To assess the student on his ability to sing Khayal, Dhrupad and Dhamar in different ragas

Learning Outcomes:

- The student shall be able to demonstrate the various aspects of a raga with regard to its various rules and regulations
- The student shall be able to sing Khayal, Dhrupad and Dhamar in different ragas
- The student shall be able to perform a raga in different talas
- The student shall be able to demonstrate his ability to tune his instrument

Syllabus:

Prescribed

Ragas:

1. Bhairav
2. Alhaiya Bilawal
3. Yaman
4. Bhupali

Unit I – Vocal Music (120 hours):

- Vilambit and Drut Khayal with gayaki in all the prescribed ragas mentioned above
- Dhrupad-Dhamar or Sadra composition in each of the prescribed Ragas with Alap, Layakari & Upaj
- Knowledge and demonstration of the following talas - Chautala, Jhaptala & Kaharva
- Basic knowledge of Tanpura and its tuning

OR

Unit II – Instrumental Music (120 hours):

- Maseetkhani and Razakhani gat with elaboration in all the ragas.
- Knowledge and demonstration of the following talas - Chautala, Jhaptala & Kaharva.
- Basic knowledge of the student's respective instrument and its tuning

Note: Students of Vocal and Instrumental music will have to prepare according to the requirements of their respective Units.

Suggestive readings:

- Bhatkhande, V.N. (2000) Kramik Pustak Malika, Part-I, Hathras, U.P., Sangeet Karyalaya
- Bhatkhande, V.N. (2000) Kramik Pustak Malika, Part-II, Hathras, U.P., Sangeet Karyalaya

- Patwardhan, V.R., (2001) Raga Vigyan, Part-I, Pune, MH, Dr. Madhusudhan Patwardhan
- Patwardhan, V.R., (1999) Raga Vigyan, Part-II, Pune, MH Dr. Madhusudhan Patwardhan
- Patwardhan, V.R., (1967) Raag Vigyan, Part-III, Pune,MH, Dr. Madhusudhan Patwardhan
- Mishra, Lalmani, (1979) Tantrinada, Kanpur, U.P. Sahitya Ratnalaya
- Aggarwal, V.K. and Nagpal, Alka (2004) Sitar and its Compositions, Part-I-II, Delhi, Sanjay Prakashan
- Mahajan, Anupam (2003) Compositions in Instrumental Music (Traditional and New Creation), Delhi, Sanjay Prakashan

Vocal & Instrumental (Veena/Violin)

Category-I

DSC – 4: THEORY OF INDIAN MUSIC

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|-------------------------|---------|--------------------------------------|---|---|-------------------------|--------------------------------|
| | | L | T | P | | |
| GENERAL THEORY (201) | 4 | 3 | 1 | 0 | Class XII Pass | Nil |

Learning Objectives:

- The main focus of the unit is to imbibe the tangible concepts of Indian and western classical music and technical aspects of music like scale system and rhythmic system along with the Indian notation system.

Learning Outcomes:

- Ability to define the terms like embellishments, scales, talas etc and explain other musical concepts.
- Understanding of Western Music Terminologies and biographies of selected prominent Pre and Post-Trinity composers.
- Ability to write notation of musical form -Varnam in two degrees of speed.

Syllabus:

Unit I (6 hours)

- Gamakas – Panchadasa and Dasavidha gamakas
- Alankaras and its varieties
- Kaku and its varieties

Unit II (12 hours)

Ragalakshanas of the prescribed ragas -

- Abhogi
- Hamsadhvani
- Keeravani
- Goula

- Natta
- Shanmughapriya
- Malahari
- Kanada
- Sudha Saveri

Unit III (6 hours)

- Scheme of 72 Melakarta

Unit IV (6 hours)

- Detailed study of Tala Dasa Pranas

Unit V (5 hours)

Explanation of the following –

- Solfa Notation
- Chords
- Symphony
- Acoustics
- Pitch

Unit VI (8 hours)

Life History of the following –

- Annamacharya
- Kshetrajna
- Narayanateertha
- Pattanam Subramanya Iyer
- Poochi Srinivasa Iyengar
- Arunachala Kavirayar
- Gopala Krishna Bharati
- Jayadeva
- Baluswami Dikshitar
- Veena Dhanammal

Unit VII (2 hours)

- Rudiments of writing notation (Sangita lipi)
- Notation of Varnams in two degrees of speed in Adi tala.

Suggestive readings:

- Sambamoorthy, P. Prof. (Vol. 4, 1963), South Indian Music, Madras, Indian Music Publishing House, Page NO. 133 to 145

Learning Objectives:

- The main focus of the course is to develop an aptitude for the classical subject opted and inculcates the ability to maintain classicism in the art along with well-approved principles.

Learning Outcomes:

- Ability to demonstrate Varnam in two degrees of speed and compositions of prominent composers in the prescribed ragas

Syllabus:**Ragas Prescribed:**

- Abhogi
- Hamsadhvani
- Keeravani

- Goula
- Natta
- Shanmughapriya
- Malahari
- Kanada
- Sudha Saveri.

Unit 1 (24 hours)

- Simple Varnams in 2 degrees of speed

Unit 2 (96 hours)

- 3 Kritis of Tyagaraja
- 2 Kritis of Dikshitar including 1 Navagraha Kriti,
- 1 Kriti of Swati Tirunal,
- 1 Kriti of Syama Shastri,
- 1 Kriti of Ramnad Srinivas Iyengar.

Suggestive readings:

- Varna Malika – Panchapakesa Iyer, - Carnatic Music Book centre - Chennai.
- Kriti Mani Malai - T K Govinda Rao

DSC – IV: BIOGRAPHIES & COMPOSERS OF MUSIC

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|---|---------|--------------------------------------|---|---|----------------------|--------------------------------|
| | | L | T | P | | |
| BIOGRAPHIES & COMPOSERS OF MUSIC | 4 | 3 | 1 | 0 | Class XII Pass | Nil |

Learning Objectives:

- To make the student aware of the life and contribution of various legends from both Tabla and Pakhawaj.
- To make the student aware of the life and contribution of various legends from Hindustani, Karnatak and Western music.
- Initiating students in order to write the proper notation system.

Learning Outcomes:

- The students learn about the life and works of great artistes in the field Tabla & Pakhawaj
- Students learn about the life and contribution of the composers of both Hindustani and Karnatak music
- Students learn to write the practical compositions according to the Notation system
- Student studies about the theoretical aspects of Talas

Syllabus:

Unit - 1 (12 hours)

- Pandit Ram Sahai
- Ustad Haaji Vilayat Ali
- Ustad Habibuddin Khan
- Pandit Kanthe Maharaj
- Ustad Ahmed Jaan Thirkawa
- Pandit Anokhelal Mishra
- Ustad Karamat Khan
- Ustad Inam Ali
- Pandit Kishan Maharaj
- Ustad Allarakha Khan
- Pandit Samta Prasad
- Pandit Chhote Lal Mishra

- Ustad Lateef Ahmed Khan

Unit – II (12 hours)

- Pandit Kudau Singh
- Pandit Nana Panse
- Pandit Purusottam Das
- Babu Jodh Singh Maharaj
- Pandit Parwat Singh
- Pandit Sakharam Mridangacharya
- Pandit Ayodhya Prasad
- Pandit Ghanshyam Pakhawaji
- Pandit Mannuji Mridangacharya
- Pandit Amarnath Mishra
- Pandit Ramshankar Das (Pagal Das)
- Raja Chhatrapati Singh
- Pandit Shankar Rao Bapu Apegaonkar

Unit -III (8 hours)

- Bach
- Mozart
- Beethoven

Unit -IV (6 hours)

- Swami Haridas
- Amir Khusrao
- Tansen
- Sadarang-Adarang
- Raja MansinghTomar

Unit -V (3 hours)

- Tyagaraja
- Muthuswamy Dixitar
- Syama Shastri.

Unit -VI (4 hours)

- Baba Allauddin Khan
- Hafij Ali Khan
- Omkarnath Thakur
- Bade Gulam Ali Khan
- Theory book prepared for prescribed unit.

Suggestive reading:

- Mishra, Pt. Chhote Lal, Taal Prabandh (2004) Kanishka Publishers, Delhi
- Kumar, Dr. Ajay, Pakhawaj ki Utpatti, Vikash ewam Vadan Shaileyen (2010), Kanishka Publishers, Delhi

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|------------------------------|---------|--------------------------------------|---|---|-------------------------|--------------------------------|
| | | L | T | P | | |
| STAGE PERFORMANCE | 4 | 0 | 0 | 4 | Class XII Pass | Nil |

Learning Objectives:

- To continue to focus on the basics of Tabla/Pakhawaj playing.
- To encourage the student to tune the instrument and attempt to improvise while playing.
- To focus on his playing and padhant of different talas.
- Apart from Building his multi dimensional knowledge of Layakari in prescribed talas he is introduced to different talas .
- A brief knowledge of two talas keherwa and Dadra with laggies in order to accompany in light music.
- This enhances the students skill to face the challenges at his work place too.

Learning Outcomes:

- The student is able to give a practical demonstration of the prescribed Talas
- Student learns to play various compositions
- Student also able to demonstrate various aspects of Talas and their differentiation

Syllabus:

TABLA

Study of Prescribed Talas: Unit -I (60 hours)

- Teentala
- Ektala
- Jhaptala
- Rupak
- Dhamar
- Chautala
- Sooltala
- Tevra
- Addha
- Deepchandi
- Keharwa
- Dadra

Unit -II (24 hours)

- Solo performance of 10 minutes in Teentala with following:
- Peshkar/Uthan
- Kayada
- Baant
- Rela
- Chakradars & Tihai.

Unit -III (6 hours)

- Solo performance in 5 minutes of Jhaptala with various compositions.

Unit -IV (15 hours)

- One Kayada of Ada Laya with four Paltas and Tihai in Teentala.
- Two Sadharan Tukra in Teentala.
- Two Chakradar Tukra in Teentala.
- Two Tihai one Damdar and one Bedamdar in Teentala.

Unit -V (15 hours)

- Palying knowledge of the following Thekas :-Ektala, Rupak, Jhaptala in Tigun laya.
- Two Laggis each in Keharwa and Dadra.
- Basic knowledge of Tabla tuning.
- Notation book to be prepared for compositions writing.

PAKHAWAJ

Prescribed Talas: Unit-IA (60 hours)

- Chautala
- Adachautala
- Deepchandi
- Tilwara
- Ektala
- Dhamar
- Sultala
- Tevra

Unit -IIA (24 hours)

- Solo performance of 10 minutes in Chautala with following:
- One Rela with Prastar & Tihai.
- Three Chakradar Paran.
- Theke ki Badhat.

Unit -IIIA (12 hours)

- Solo performance of 5 minutes in Sultala with following:
- One Rela with Prastar & Tihai.
- Two Chakradar Paran.

Unit -IVA (12 hours)

- Playing knowledge with padhant in Thah, Dugun, Tigun and Chaugun of following Thekas:-
- Tilwara
- Adachautala
- Deepchandi
- Ektala in Thah, Dugun, Tigun and Chaugun.

Unit -VA (6 hours)

- Ability to play one Rela with Prastar & Tihai.
- Three Chakradars , three Parans in Sultaal & Tivra with various layakaris.
- Two Tihai each in Dhamar & Sooltala.

Unit - VIA (6 hours)

- Knowledge and Practice of playing in Chautala with one Stuti Paran & two Farmaishi Chakradars.
- Basic knowledge of Pakhawaj tuning.
- Notation book to be prepared for compositions writing.

Note: Students of Percussion Music have to prepare according to the requirements of their respective Units.

Suggestive reading:

- Mishra, Pt. Chhote Lal (2004) Taal Prasoon, Kanishka Publishers, New Delhi
- Mishra, Pt. Chhote Lal (2006) Tabla Granth, Kanishka Publishers, New Delhi
- Das, Ram Shankar Pagal (1964) Tabla Kaumudi, Ramchandra S Publishers
- Das, Ram Shankar Pagal (1976) Mridanga Tabla Prabhakar Bhag I,II, Sangeet Karyalaya, Hathras, U.P
- Mishra, Pt. Chhote Lal (2006) Taal Prabandh, Kanishka Publishers, New Delhi

DSC – 6: PRACTICAL ASSESSMENT

| Course Title & Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|---------------------------------|---------|--------------------------------------|---|---|----------------------|--------------------------------|
| | | L | T | P | | |
| PRACTICAL ASSESSMENT | 4 | 0 | 0 | 4 | Class XII Pass | Nil |

*Practical assessment is a viva paper.

Learning Objectives:

- Enabling the students to face the technical and critical questions both in practical and theoretical aspects of Tabla and Pakhawaj.
- Most importantly the accompanying aspect of the instrument while accompanying with Vocal and Instrumental compositions is rendered to the students.

Learning Outcomes:

- The student is able to demonstrate various aspects of Talas.
- Student is also able to differentiate between similar Talas, thereby making a comparative analysis.

Syllabus

TABLA

Study of Prescribed Talas : Unit-I (60 hours)

- Teentala
- Ektala
- Jhaptala

- Rupak
- Dhamar
- Chautala
- Sooltala
- Tevra
- Addha
- Deepchandi
- Keharwa
- Dadra

Unit -II (18 hours)

- Ability to perform in solo recital in Teentala & Jhaptala.

Unit -III (18 hours)

- Ability to Padhant compositions in Tali-Khali.
- Playing knowledge of the prescribed Tala in Thah, Dugun, & Chaugun laya.

Unit -IV (18 hours)

- Ability to accompany with Vocal- Chhota Khayal, Bhajan and Geet.

Unit -V(6 hours)

- Basic knowledge of Tabla tuning.
- Notation book to be prepared for compositions writing.

PAKHAWAJ

Study of Prescribed Talas: Unit-IA (60 hours)

- Chautala
- Dhamar
- Sultal
- Tevra
- Ektala
- Jhaptala
- Rupak
- Keherwa
- Dadra

Unit -IIA (18 hours)

- Ability to perform solo recital in Chautala & Sultala with various compositions.

Unit -IIIA (18 hours)

- Ability to Padhant compositions in Tali Khali.
- Demonstrate the Theka of prescribed Talas and playing knowledge in Thah, Dugun, & Chaugun layas.

Unit -IVA (18 hours)

- Ability to accompany with Dhurpad & Bhajan.
- Basic knowledge of Pakhawaj tuning.

Unit -VA (6 hours)

- Notation book to be prepared for compositions writing.

Note: Students of Percussion Music have to prepare according to the requirements of their respective Units.

| BASICS OF INDIAN MUSICOLOGY | DSC-1(A/B) –CORE (NON MAJOR) | 4 | 2 | 0 | 2 | Class XII Pass |

Paper Name: Basics of Indian musicology

Theory : Component-1

Credit:2

Learning Objectives

- The prime intent of the course is to establish better.
- Understanding of the various terms of musicology.
- Understanding of Ragas, Talas and one prescribed instrument with sketch.
- Biographies of some great musicians and their contributions.

Learning Outcome (LO)

- The students will be able to comprehend and ably illustrate the terminology of the rudimentary principles of musicology.
- The students will be able to acquire knowledge of the lives of illustrious musicians, eventually gaining inspiration from their musical journeys.
- With the study of the specified Ragas and Talas, the students will be able to gain optimum knowledge and skill over them.
- The students will gain fundamental knowledge of the Harmonium and Tabla and clearly sketch and label the instruments.

Contents:- Lectures – 30 Hours

- Discussion and study of the following terms:
- Unit I- Swarmalika, LakshanGeet, Thaata definition, TenThats with their swaras, (4 Hours)
- Unit II- Poorwang-Uttarang, Poorva and Uttar Raga, (2 Hours)
- Unit III- VakraSwara, Varjit-Swara, Alaap, Jod, Jhala. (2 Hours)
- Unit IV- Taan Definition and its various types (2 Hours)
- Unit V- Mela, Raga, Ashraya Raga (2 Hours)
- Unit VI- Varna and its types, Alankars definition and its types (2 Hours)
- Unit VII- Gamak-Definition and various types. (2 Hours)
- Unit VIII -Biographies & contributions of the following: (6 Hours)
- -Jayadeva, Mansingh Tomar, Abdul Kareem Khan, Pt. Bhatkhande, Allauddin

Khan, Tyagaraja, Pt. Ravi Shankar.

- Unit IX- Study of the following Ragas (2 Hours)
- Ragas -Yaman, Ramkali ,Kafi.
- Unit X- Comparative study of Ragas- (2 Hours)
- Bhairav&Ramkali,
- Kafi&Khamaj
- Unit XI- Study of the following Talas: (2 Hours)
- Talas- Ektala, Jhaptala, Teentala, Kaharwa Tala with Dugun.
- Unit XII- Basic knowledge of the following instruments with diagram and labeling: (2 Hours)
- Tabla, Harmonium.

Course: DSC- 2(A/B)

Practical: Component -2 (60 Hours)

Performance & Viva-Voce

Learning Objectives:

- Learn to identify Ragas and Talas and perform Drut Khayal/ Gat.
- Ability to recite the Thekas of different Talas along with Dugun.
- Perform one light Bhajan/Lokgeet/Dhun.

Learning Outcome (LO)

- The students will learn to perform and skillfully illuminate various aspects in the requisite ragas.
- The students will be able to demonstrate traditional compositions in Vilambit and Madhyalaya Khayals/Maseetkhani and Razakhani Gats, Alaaps and Taans, thus developing their performance capabilities.
- The students will learn to perform the Swarmalika – giving them a strong foothold of Swaras
- with Laya, as well as the Lakshangeet - which brings out the salient features of the raga.

- The student will learn to identify ragas and talas by the ear ,which helped them to decipher various compositions and ragas by listening.
- The students will be able to effectively recite and demonstrate their learning of the suggested talas, with their divisions–Tali, Khali and Dugun, giving them a distinct command on rhythm.
- Students will learn to play theTalas-Keherwa on the Tabla,which they will exhibit with a practical display.
- The students will acquire basic instruction of playing the Tanpura and Harmonium which will further enabled them to practice their Alankars and compositions independently.

Content

Total – 60 Hours

Prescribed Ragas–Yaman, Ramkali, Kafi

Vocal/Music -

- Swaramalika or Lakshangeet or Madhya Laya Khayal in all the three of the prescribed Ragas.
- Vilambit-Khayal withalaapsandTaansinanyoneoftheaboveRagas.One Raga based Bhajan/Lok geet.

Instrumental Music -

- Razakhani Gat in all the three of the prescribed Ragas.Maseetkhani Gat in any one of the prescribed Ragas.
- AnyGatinothertanTeentala.

Vocal&Instrumental

- Identifying Ragas andTalas of the prescribed syllabus while being sung or played.
- Ability to recite the The kas of the following Talas with Tali & Khali & their
- Dugun–Ektala,Jhaptala,Teentala,Kaharwa.
- Basic knowledge of PlayingTanpuraandHarmonium.
- PracticalfilewithdetailsofRagas,Notations of compositions&TalaswithDugun,Tigun and Chaugun.

GE-2

PAPER Name : Basic Concepts of Hindustani Music

Theory: Component -1

Credit: 2

Learning Objective

- The course has been adeptly designed to entrust the students with profound awareness of our Indian musical heritage.
- The course objective is to deliver-
- A vivid understanding of the essentials of the Raga, Thaata and Tala methodology, descriptions and terminology
- Study of the principal ancient granthas-a). The Natya Shastra b).The Sangeet Ratnakar.
- Learning accuracy in writing the notations of ancient bandishes (compositions) as well as notations of recommended Talas with their various layakari
- Making a project, on any musical instrument of Hindustani music would further make its comprehension more lucid.

Learning Outcome (LO)

- The basic elements of musicology and a glimpse of the music in ancient period through varied texts is a part of this paper which is a further step towards the study of music.
- By learning the description of Ragas and Talas, the students are introduced to a new level of learning.
- Essays on the prescribed topics increase the writing abilities and also give a better understanding of the subject.
- The students submit a project work on musical instruments, which teaches them the origin, variety and usage of instruments.

Content

Unit 1

- Raga, Thaata (Mela), Vadi, Samvadi, Laya, Tala Matra, Tali-Khali and Vibhag. (4 Hours)

Unit 2

- Brief introduction of Music in ancient period with brief discussion of the following texts: (4 Hours)
- Natyashastra
- Sangeet Ratnakar.

Unit 3

- Detailed description of raga, Yaman and Kafi. (4 Hours)

Unit 4

- Ability to write notation of Drut Khyal/Razakhani Gat in prescribed Ragas. (4 Hours)

Unit 5

- Essay on the following topics : (4 Hours)
- Music and Meditation
- Impact of Classical Music on Film Music

Unit 6

- Description of following Talas: Teentala, Ektala and Dadra. (4 Hours)

Unit 7

- Ability to write tala notation of teentala, ektala and Dadra with Thaah, Dugun & Chaugun. (2 Hours)

Unit 8

- Project work on any one of the musical Instruments of Hindustani music (4 Hours)

Reference

GE-2

Practical: Component -2 : Performance & Viva –Voce (I-XVI Weeks)

Credit: 2 – Total 60 Hours

Learning Objective

- The target is to achieve flexibility of the vocal chords as well as deftness of the fingers on the instruments with the practice of alankars in the three saptaks along with insight into musical embellishments. This would assist in the apt application during demonstration of drut compositions in the suggested Ragas Yaman and Kafi.
- Structure of B.A/B.Com./B.Sc. Hons. (Subject)(Details of courses to be taught)

Learning Outcome (LO)

- The practical learning of alankars and embellishments are part of musical learning for the students essential in the Indian Music system.
- Ability to sing or play compositions in different Ragas enable them for performance, at the ground level.
- Ability to recite the Theka increases the understanding of rhythm.
- The guided listening sessions and discussions have created a healthy atmosphere for the student's to learn and be a part of it.

Content:

Unit 1

- Prescribed Ragas: Yaman, Kafi

Unit 2

- Ability to sing or play five Alankars in prescribed Ragas.

Unit 3

- Knowledge of Musical embellishments/ different stroke patterns: Meend, Kana, Murki, Khatka, Zamzama, Krintan.

Unit 4

- Ability to sing or play Drut Khayal/ Razakhani gat in Raga Yaman and Kafi with five Tanas.

Unit 5

- Ability to keep the theka of following talas by hand beats - Teentaala, Ektala and Dadra with Dugun

Unit 6

- Guided Listening and discussions of compositions/dhun based on Ragas.

Note: The candidate opting the course will start from Level One.

DISCIPLINE SPECIFIC CORE COURSE – 3 (DSC-3): Understanding Human Development

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------------|---------|-----------------------------------|----------|---------------------|--------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Understanding Human Development DSC 3 | 4 | 3 | 1 | 0 | • Class Pass XII th | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- This paper attempts to introduce students to theoretical frameworks and perspectives about human development in different socio-cultural contexts.

- It explores notions and experiences of childhood, adolescence and adulthood, situated in the milieu of family, neighborhood, community, educational institutions, workplace and society at large.
- It fosters the understanding and appreciation of inter-linkages between human development, diversity and uniqueness.
- It critically examines crucial developmental theories of human development and their applications from the lens of cross-cultural frames.
- It develops the potential for perspective building located in the Indian socio-cultural context through practicum, academic readings and classroom teaching/discussion.

Learning outcomes

After completion of the course students will be able to:

- Understand the various aspects of human development.
- Derive relationship among social/educational/cultural realities associated with human development.
- Explain the process of human development as it unfolds in the diverse sociocultural context
- Develop a critical perspective about social inclusion and its effect on human development
- Illustrate the process of human development and its implication for education.

SYLLABUS OF DSC- 3

Unit I: Conceptualizing Human Development

(16 Hours)

- Contextualising human development in Indian society
- Characteristics and features of different stages of human development
- Basic principles of human development.
- Debates in human development: nature v/s nurture, continuity v/s discontinuity, universal v/s contextual
- Role of family, neighbourhood, school, community, and society at large in human development

Unit 2: Perspectives on Human Development

(16 Hours)

Understanding the process of human development in Indian society with reference to:

- Erikson's theory of psychosocial development
- Kohlberg's theory of moral development

- Bronfenbrenner's ecological theory of development

Unit 3: Situating Human Development in the Context of Diversity (13 Hours)

- Diversity in the experiences of childhood and adolescence with reference to caste, class, gender, religion, language and region
- Issues and concerns stemming from social interaction: conflicts, prejudices, stereotypes, abuse and violence
- Concept of inclusion: historical background; educational practices for social inclusion

Practicum/ Suggested Projects / Assignments (Any Two)

- Observe and document the developmental patterns in adolescents with reference to identity and factors influencing identity development.
- Engage in self-reflection and document the role of family, education and peer group in their own development.
- Interview five children of any one marginalized community to explore the challenges, issues and concerns with regard to adjustment in school.
- Watch either 'Stanley KaDabba' or 'I am Kalam' (Bollywood Films) and describe how childhood unfolds in them.

Note: On the basis of the above, the teacher may design his/her own relevant projects/ assignments.

DISCIPLINE SPECIFIC CORE COURSE-4 (DSC-4): Human Learning, Cognition and Schooling

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|----------------------|--------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical / Practice | | |
| Human Learning , Cognition and Schooling DSC 4 | 4 | 3 | 1 | 0 | • Class XII th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- The paper attempts to build an understanding about the processes of thinking and learning from different theoretical perspectives.
- It enables the student to visualize the linkages between everyday knowledge and theories of learning and cognition.
- It also builds sensitivity, understanding and perspective about how these processes unfold in the context of inclusion and diversity.

Learning outcomes

After completion of the course students will be able to:

- Understand the various aspects of human development.

- Derive relationship among social/educational/cultural realities associated with human development.
- Explain the process of human development as it unfolds in the diverse socio-cultural context
- Develop a critical perspective about social inclusion and its effect on human development
- Illustrate the process of human development and its implication for education.

SYLLABUS OF DSC-4

Unit 1: Understanding Thinking, Learning and Cognition (16 Hours)

- Key cognitive processes: thinking, perception, attention, memory, language and problem solving
- Factors affecting thinking and learning: personal, socio-cultural, media and technology
- Understanding children's' thinking and learning with reference to diverse socio-cultural contexts

Unit 2: Theoretical Perspectives in Thinking, Learning and Cognition (16 Hours)

- Learning and cognition as processes of adaptation and interaction with the environment, situated in Piaget's theory of cognitive development
- Observational learning as explained in the social cognitive theory of Bandura
- Learning as conceptualized in the information processing approach
- Learning as a social process of knowledge construction as discussed by Vygotsky
- Learning as a process associated with the uniqueness of the individual and evolution of self as proposed by Carl Rogers

Unit 3: Exploring Diversity and Inclusion in Learning Processes (13 Hours)

- Concept of diversity and inclusion and associated practices with reference to learning and cognition
- Uniqueness of children and adolescents in terms of intelligence, creativity and motivation
- Children with special needs: issues, challenges and possibilities

Practicum/ Suggested Projects / Assignments (Any Two)

- Take up a learning task and maintain a journal/diary about the processes of thinking, problem- solving and decision –making involved in it.

- Draw up a concept map of any one topic of learning. Describe how the task was useful.
- Interact with children/young adults and identify the cognitive strategies that they use in solving sudoku, crosswords, puzzles and traditional games.
- Undertake some group problem solving task and discuss the various strategies which can be employed to solve them.
- Interact with children with special needs to explore and document the challenges they face during the learning process. Describe the strategies used by the teacher to facilitate their learning.

Note: On the basis of the above, the teacher may design his/her own relevant projects/ assignments

B.A. Programme Courses for Undergraduate Programme of study with Education discipline as one of the Core Disciplines as non-Major or Minor discipline)

DISCIPLINE SPECIFIC CORE COURSE – 3 (DSC-3):Understanding Human Development

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------------|---------|-----------------------------------|----------|---------------------|--------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Understanding Human Development DSC 3 | 4 | 3 | 1 | 0 | • Class Pass XII th | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- This paper attempts to introduce students to theoretical frameworks and perspectives about human development in different socio-cultural contexts.
- It explores notions and experiences of childhood, adolescence and adulthood, situated in the milieu of family, neighborhood, community, educational institutions, workplace and society at large.
- It fosters the understanding and appreciation of inter-linkages between human development, diversity and uniqueness.
- It critically examines crucial developmental theories of human development and their applications from the lens of cross-cultural frames.
- It develops the potential for perspective building located in the Indian socio-cultural context through practicum, academic readings and classroom teaching/discussion.

Learning outcomes

After completion of the course students will be able to:

- Understand the various aspects of human development.
- Derive relationship among social/educational/cultural realities associated with human development.
- Explain the process of human development as it unfolds in the diverse sociocultural context
- Develop a critical perspective about social inclusion and its effect on human development

- Illustrate the process of human development and its implication for education.

SYLLABUS OF DSC- 3

Unit I: Conceptualizing Human Development (16 Hours)

- Contextualising human development in Indian society
- Characteristics and features of different stages of human development
- Basic principles of human development.
- Debates in human development: nature v/s nurture, continuity v/s discontinuity, universal v/s contextual
- Role of family, neighbourhood, school, community, and society at large in human development

Unit 2: Perspectives on Human Development (16 Hours)

Understanding the process of human development in Indian society with reference to:

- Erikson's theory of psychosocial development
- Kohlberg's theory of moral development
- Bronfenbrenner's ecological theory of development

Unit 3: Situating Human Development in the Context of Diversity (13 Hours)

- Diversity in the experiences of childhood and adolescence with reference to caste, class, gender, religion, language and region
- Issues and concerns stemming from social interaction: conflicts, prejudices, stereotypes, abuse and violence
- Concept of inclusion: historical background; educational practices for social inclusion

Practicum/ Suggested Projects / Assignments (Any Two)

- Observe and document the developmental patterns in adolescents with reference to identity and factors influencing identity development.
- Engage in self-reflection and document the role of family, education and peer group in their own development.
- Interview five children of any one marginalized community to explore the challenges, issues and concerns with regard to adjustment in school.
- Watch either 'Stanley KaDabba' or 'I am Kalam' (Bollywood Films) and describe how childhood unfolds in them.

Note: On the basis of the above, the teacher may design his/her own relevant projects/ assignments.

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Engineering through Linear Algebra DSC-4 | 4 | 3 | 0 | 1 | Class XII pass | Mathematics till XII |

Learning Objectives

Almost, every area of modern science contains models where equations may be approximated by linear equations and linear algebra plays a vital role for finding their solution and interpreting them. This paper aims to enable the student to learn linear models for various physical problems such as traffic flow, electric-circuit flow etc. and to facilitate their solution using concepts of linear dependence, independence, rank, basis, eigenvalues, eigenvectors etc. This paper intends to provide geometrical interpretation of vectors, basis and vector operations

in 2 & 3 dimensions and lays the groundwork for a more abstract, pure-mathematical treatment of vector spaces. Also, the importance and application of eigenvalues, eigenvectors in computer graphics, face recognition and many other fields is taught. Students will also learn how to use MATLAB for some simple matrix operations, for finding eigenvalues & eigenvectors, rank etc.

Learning outcomes

After completing this course, student should be able to;

- Understand graphical representation of vector and their operations in 2 and 3 dimensions
- Solve linear matrix system $AX=B$
- Understand the concept of Eigen values and Eigen vectors and their applications in computer graphics, face recognition algorithms & many other fields
- Conceptualize vector spaces, subspaces and their basis functions
- Understand inner product spaces, orthogonal sets, projection and orthogonal diagonalisation
- Learn basic arithmetic operations of matrices in MATLAB
- Implement basic loops (for, while, if else etc) of programming in MATLAB
- Write their own programs for solving system of linear equations

SYLLABUS OF DSC-4

Unit I: (09 Hours)

Matrix Algebra

Algebra of matrices – Review of Determinants - Hermitian, Skew-Hermitian and Unitary matrices - Vectors and vector operations in 2 and 3 dimensions - Solution and application of linear matrix system $AX = B$

Unit II: (12 Hours)

Eigenvalues and Eigenvectors

Eigenvalues and eigenvectors, minimal polynomial, Cayley-Hamilton theorem and diagonalization

Unit III: (12 Hours)

Abstract vector spaces, subspaces

Finite dimensional vector spaces - Linear independence and dependence of vectors, bases, dimension of vector spaces - Finite dimensional inner product spaces

Unit IV: (12 Hours)

Orthogonality

Orthogonal sets and projections, Gram Schmidt process, orthogonal diagonalisation

Practical component – 30 Hours

Engineering Kitchen Activity (matrix based numerical mathematics software) [Laboratory]

- Basic arithmetic operations, hierarchy of arithmetic operations

- Declaration and assignment of variables
- Introduction to elementary mathematical functions
- Dealing with matrices and arrays
- Basic programming with loops (for, while, switch), if else statements
- Programs for solving system of linear equations, Orthogonalization
- Creating 2D, 3D plots
- Innovation project

Essential/recommended readings

1. *Linear Algebra and its Applications*, D. C. Lay, Addison Wesley, 2005.
2. *A Modern Introduction*, David Poole, *Linear Algebra*, Brooks Cole, 2011.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5 (DSC-5): Data Structure and Design

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Data Structure and Design, DSC-5 | 4 | 3 | 1 | 0 | Class XII pass | DSC-3 |

Learning Objectives

This course objective is to give an understanding of the real world data representation, organisation and structuring to the student while writing the programs and software. The course makes them familiar with the several types of data structures and their strengths and weaknesses, particularly in a real-world situation.

Learning outcomes

- Introduction to Data structure and their significance.
- Practical and theoretical understanding of Dynamic optimization
- Basics of Memory Hierarchy and implementation
- Understanding and implementation of Hashing, Networks and Graphs
- Understanding basics and practical aspects of Searching algorithms in the real world through implementation.
- Introduction and implementation of Heaps and Priority Queues and their comparison with other data structure

SYLLABUS OF DSC-5

Unit I: (12 Hours)

Program and data analysis

Introduction to Data structure, Basic concepts of Correctness, Efficiency and Application, Dynamic optimization Concept, Search Algorithms

Unit II: (12 Hours)

Data items arrangements and processing

Sorting Algorithms, Introduction to Linear Data Structures: Linked List, Stack and Queues

Unit III: (12 Hours)

Hierarchical arrangements and processing

Introduction to Hierarchical Data structure: Tree, Introduction to Heap, Priority Queues and Hashing

Unit IV: (09 Hours)

Network arrangements and analysis

Networks arrangements, Complex systems and real-world studies, Computational analysis

Practical component: 30 Hours

Engineering Kitchen Activity [Laboratory]:

- Implementation of Linked list in C/C++
- Implementation of Trees in C/C++
- Implementation of variant of Trees in C/C++
- Implementation of Heaps in C/C++
- Implementation of Hashing in C/C++
- Implementation of Priority Queues in C/C++
- Implementation of Graph and Network based approaches in C/C++
- Innovation Project

Essential/recommended readings

1. *Algorithms and Data Structures*, N. Wirth, Prentice-Hall of India, 2009
2. *Data Structures and Algorithms in C++*, A. Drozdek, Course Technology, 2013

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE– 6 (DSC-6): Object Oriented Programming

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Object Oriented Programming, DSC-6 | 4 | 3 | 0 | 1 | Class XII pass | DSC-3 |

Learning Objectives

The objective is to implement real-world entities like inheritance, hiding, polymorphism etc. in programming. To learn how to bind together the data and the functions that operate on them so that no other part of the code can access this data except that function.

Learning outcomes

Upon Completion of this course the students will be able to:

- Recognise features of object-oriented design such as encapsulation, polymorphism, inheritance, and composition of systems based on object identity.
- Use NetBeans, Eclipse, BlueJ as an Integrated Development Environment. Test a program and, if necessary, find mistakes in the program and correct them.
- Take a problem and develop the structures to represent objects and the algorithms to perform operations.
- Name and apply some object-oriented design patterns and give examples of their use.
- Apply standards and principles to write truly readable code.
- Design a class that serves as a program module or package.
- Design applications with an event-driven graphical user interface using java applets.
- Design different android applications such as web apps for the real-world problems.

SYLLABUS OF DSC-6

Unit I: (12 Hours)

Introduction to Java

Introduction to byte code, security and portability, Data Types, variables, operators, arrays, type conversion and casting, type promotion, Control statements, standard input-output, Designing Classes, constructors, methods. access specifiers - public, private, protected

Unit II: (12 Hours)

Classes and Objects

Introduction, Class revisited, constant objects and constructor, static data members with constructors and destructors, constructor overloading, nested classes, objects as arguments, returning objects, constant parameters and member functions, static data and member functions

Unit III: (12 Hours)

Inheritance, packages and interfaces and Exception Handling

Math, String, polymorphism - function overloading, function overriding, abstract classes, Dynamic objects - Introduction, array of objects, Exception types, nested try-catch, throw, throws and finally statements

Unit IV: (09 Hours)

Multi Thread Programming

Thread creation, synchronization and priorities

Practical component – 30 Hours

Engineering Kitchen Activities [Laboratory]

- Programs implying the use of Arrays, Linked Lists, Strings, Loops
- Programs on Object & Classes from Realistic Environment and Systems
- Programs demonstrating Constructors, Destructors, Methods & other concepts
- Programs Showcasing Inheritance, Polymorphism, Encapsulation & other OOPS features
- Programs on Exception Handling, Packages and Threading
- Reverse Engineering a Java Source/ project/Mobile Application and understanding the concepts
- Mapping the programs with Real life Systems and showcasing the implementation
- Innovation project

Essential/recommended readings

1. *Java: The Complete Reference*, 10th Edition. Herbert Schildt. McGraw-Hill, 2017.
2. *C++: The Complete Reference*, 4th Edition. Herbert Schildt. McGraw-Hill, 2012.
3. *Object Oriented Programming with C++*, 6th Edition. E Balagurusamy. Tata McGraw-Hill, 2001.
4. *C++ For Artists: The Art, Philosophy, and Science Of Object-Oriented Programming*. Rick Miller, Pulp Free Press, 2008
5. *Java For Artists: The Art, Philosophy, and Science Of Object-Oriented Programming*. Rick Miller , Pulp Free Press, 2008

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES

NOTE: The core papers offered in the B.Tech. Course at CIC are Mathematics and Information Technology. Therefore, the students will choose GE offered by Physics and Chemistry faculty members of CIC.

GENERIC ELECTIVES (GE-3): Engineering Physics II

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department offering the course |
|------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Engineering Physics II, GE-3 | 4 | 2 | 0 | 2 | Class XII pass | Engineering Physics I, GE-1 | Physics Faculty of CIC |

Learning Objectives

This module intends to provide an understanding of the basics of electrostatics and electrodynamics. It emphasizes on learning of concepts of electric circuits, electromagnets and induction mechanism. Further it gives a day-to-day knowledge of transformers, motors and generators. Also, it provides learning of solar energy usage and its technology. The lab activities provide a hand on experiments on electricity and solar energy. It provides understanding of working of utility devices. It intends to promote projects on robotics and solar energy.

Learning outcomes

- Understanding of physics principles in devices.
- Ability to conceptualize and build electrical devices for real life use.
- Reverse engineering of electrical devices and redesigning of such objects.
- Practical hands-on skills and understanding of simple engineering concepts derived from Electricity & Magnetism.

SYLLABUS OF GE-3

Unit I: (12 Hours)

Electricity

Basics of Electrostatics and Electrodynamics - Electric Circuit elements and function - Current, voltage, capacitance, resistance - Power and efficiency in electrical appliances

Unit II: (12 Hours)

Electromagnetism basics

Joule heating - Electrical safety devices - Basics of Electromagnetism - Electromagnets and induction - Transformers. DC motors and generators

Unit III: (09 Hours)**Electromagnetism applications**

AC motors - Using electromagnetic spectrum - Information transfer and broadcasting

Unit IV: (12 Hours)**Alternate Energy**

Use of Radiation energy and appliances - Photovoltaic cells and conversion of solar energy to electricity - Advantages, limitations and challenges of different solar cell technologies - Different forms of renewable energy and technology.

Practical component – 30 Hours**Engineering Kitchen Activities [Laboratory]**

- Electric circuit, power requirement, cost of electricity, energy efficiency of sample appliances
- Potential divider, measurement of resistances of different scales
- Build a buzzer
- Conversion of solar power to electricity using photovoltaic cells: design, working principle, performance, application
- Build an autonomous robot
- Build a remote-controlled robot
- Understanding physics of devices – one implementation of “Tod-Phod-Jod” concept.
- Innovation project – designing instruments, devices, model & prototyping

Essential/recommended readings

1. *Introduction to Electrodynamics*. David. J. Griffiths, PHI Learning, 2012
2. *Textbook of Electrical Technology – Volume I & II*. B. L. Thareja, and A. K. Thareja, S. Chand Publishing, 2006

GENERIC ELECTIVES (GE-4): Engineering Chemistry II**Credit distribution, Eligibility and Pre-requisites of the Course**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department offering the course |
|--------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-------------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Engineering Chemistry II, GE-4 | 4 | 2 | 0 | 2 | Class XII pass | Engineering Chemistry I, GE-2 | Chemistry Faculty of CIC |

Learning Objectives

This course has an aim of making students aware of the structure and properties of engineering materials, polymers and composites, which are most commonly used around us for various applications daily. Also, an elaborative discussion will be done, on one of the most important constituents of life i.e. water, it's properties, types, analysis etc., so that aspects related to water

impurities and its different types of treatment methods become clear to them and they can further contribute towards the cause of providing this basic amenity to our society, as and when they get a chance, either by indulging themselves in research with academia or industry. At the end, students will be exposed to various characterization instrumentation techniques, through which they should be able to get a better understanding about various kinds of materials (biomolecules, drugs, nanomaterials etc.)

Learning outcomes

- Students will develop a good understanding about the engineering materials, polymers and composites which are used in our daily life.
- Knowledge about one of the basic amenities of life i.e. water will be enhanced, so that students can further contribute towards solving various related problems in due course of life.
- Further, through learning characterization techniques, students will be able to understand better about various kinds of materials like nanomaterials, drugs and biomolecules.

SYLLABUS OF GE-4

Unit-I. (12 Hours)

Engineering Materials, Polymers and composites

Glass, Ceramics, Magnetic materials, Classification, functionality, general properties and types of polymers; (addition polymerization, step polymerization, copolymerization) Different types of polymers; natural and synthetic polymers; Linear, branched and cross-linked polymers; Thermoplastic and thermosetting polymers, their applications; Plastics: Properties of Polyethylene Plastics; Vinyl Plastics, Nylons, Phenol-formaldehyde resins (Bakelite) and Glyptal; Speciality Polymers: Engineering thermoplastics, Conducting polymers, Electroluminescent polymers, liquid crystalline polymers and biodegradable polymers.

Unit-II. (12 Hours)

Analysis of Water

Analytical aspects of water: Sources, conservation of water, impurities in water and their effects. WHO guideline and BIS guideline for drinking water. Water quality standards, physical, chemical and biological characteristics; hardness of water, disadvantages of hardness, determination of hardness (EDTA method). Alkalinity and its determination; Boiler problems with hard water and their prevention: Municipal water supply – its treatment and disinfection using break -point chlorination. Desalination, Reverse Osmosis, Electrodialysis and defluoridation of water.

Unit-III. (12 Hours)

Material characterization Techniques

Spectroscopy, General features of spectroscopy, Discussion on various kinds of spectra obtained using various spectroscopic techniques like UV-Visible spectroscopy, Fourier-Transform Infra-red spectroscopy, Fluorescence spectroscopy, Circular Dichroism spectroscopy etc.

Unit-IV. (09 Hours)

Nanomaterials and their Characterization

Characterization of Nanomaterials using UV-Visible Absorption spectroscopy, Fourier transform Infra-red spectroscopy, Transmission electron microscopy (TEM), Scanning Electron Microscopy and FESEM etc.

Practical component – 30 Hours

1. Experimental demonstration of the synthesis of various types of polymers (like nylon, rayon fibre/ artificial silk etc.)
2. Molecular dynamics simulation of small molecules like water using softwares like LAAMPS
3. Demonstration of different experiments for determination of hardness of water
4. Interpretation and analysis of experimental data/ figures of various structures (biomolecules, and nano-structures) from some already published research papers/ reviews for understanding various spectroscopic and physicochemical techniques

Essential/recommended readings

1. Engineering Materials: Polymers, Ceramics and Composites, 2nd ed. Kindle Edition by A.K. Bhargava
2. Engineering Chemistry by O.G. Palanna, McGraw Hill, 2017.
3. Water Treatment (Hardness of Water) by Subodh Bhandarkar
4. Materials Science and Engineering: An Introduction, by Callister, 8th Edition, John Wiley and sons inc., Jan 2010.
5. Plastics Materials, Newness, Butterworths and Brydson, J.A., London, 1975
6. Spectroscopy and Characterization of Nanomaterials and Novel Materials: Experiments, Modelling, Simulations, and Applications, by Prabhakar Misra
7. Optical Properties and Spectroscopy of Nanomaterials, 2009 by Jin Zhong Zhang

B.A. (Honours) Humanities & Social Sciences

COURSE OFFERED BY CLUSTER INNOVATION CENTRE

Category II

DISCIPLINE SPECIFIC CORE COURSE - 4 (DSC-04): To be offered in Colleges of UoD

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|---|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| To be offered in Colleges of UoD (DSC-04) | 4 | As per the course structure of the respective disciplines | | | | |

DISCIPLINE SPECIFIC CORE COURSE - 5 (DSC-05): To be offered in Colleges of UoD

40. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 38-1-12 dated 08.12.2022 regarding Syllabi of 2nd Semester of Vocational courses

Add the following:

Syllabi of Semester-II of the following vocational courses based on Undergraduate Curriculum Framework -2022 under Ramanujan College, Jesus & Mary College & Kalindi College to be implemented from the Academic Year 2022-23.

**B.Voc.– Software Development
(Ramanujan College)
Category-I**

B.VOC - Software Development course for Undergraduate Programme of study with Software Development as a Single Core Discipline

DISCIPLINE SPECIFIC CORE COURSE – 4: Database Management Systems

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Database Management Systems | 4 | 2 | 0 | 2 | Class XII pass with Mathematics | NIL |

Learning Objectives:

- 1. To introduce the fundamentals of database management system and its architecture.*
- 2. Students will learn about the importance of database structure and it's designing using conceptual approach using Entity Relationship Model and formal approach using Normalization.*
- 3. The course would give students hands-on practice of structured query language in a relational database management system.*

Learning Outcomes:

- 1. Use database management system software to create and manipulate the database.*
- 2. Create conceptual data models using entity relationship diagrams for modeling real-life situations and designing the database schema.*
- 3. Use the concept of functional dependencies to remove redundancy and update anomalies.*
- 4. Apply normalization theory to get a normalized database scheme.*
- 5. Write queries using relational algebra, a procedural language.*
- 6. Implement relational databases and formulate queries to get solutions of a broad range of data retrieval and data update problems using SQL.*

Unit I

(6 Hours)

Introduction to Database: Purpose of database system, Characteristics of database approach, data models, database management system, database system architecture, three-schema architecture, components of DBMS, data independence, and file system approach vs. database system approach.

Unit II

(6 Hours)

Entity Relationship Modeling: Conceptual data modeling - motivation, entities, entity types, attributes, relationships, relationship types, constraints on relationship, Entity Relationship diagram notation.

Unit III

(6 Hours)

Relational Data Model: Update anomalies, Relational Data Model - Concept of relations, schema-instance distinction, keys, relational integrity constraints, referential integrity and foreign keys, relational algebra operators and queries.

Unit IV

(6 Hours)

Structured Query Language (SQL): Querying in SQL, DDL to create database and tables, table constraints, update database-update behaviors, DML, aggregation functions group by and having clauses, retrieve data from the database, generate and query views. Access and manipulate databases using ODBC. Basic Database administration SQL commands.

Unit V

(6 Hours)

Database Design: Mapping an Entity Relationship model to relational database, functional dependencies and Normal forms, 1NF, 2NF, 3NF and BCNF decompositions and desirable properties of them.

Essential/Recommended readings:

- 1. Elmasri, R., Navathe, B. S. Fundamentals of Database Systems, 7th Edition, Pearson Education, 2015.*
- 2. Krogh, J. W. MySQL Connector/Python Revealed: SQL and NoSQL Data Storage Using MySQL for*

Python Programmers, Apress, 2018.

3. *Murach J. Murach's MySQL, 3th Edition, Pearson, 2019.*

Practical Component: (60 Hours)

I. Create and use the following student-society database schema for a college to answer the given (sample) queries using the standalone SQL editor.

| STUDENT | <u>Roll No</u> | StudentName | Course | DOB |
|---------|----------------|-------------|-------------|------|
| | Char(6) | Varchar(20) | Varchar(10) | Date |

| SOCIETY | <u>SocID</u> | SocName | MentorName | TotalSeats |
|---------|--------------|-------------|-------------|--------------|
| | Char(6) | Varchar(20) | Varchar(15) | Unsigned int |

| ENROLLMENT | <u>Roll No</u> | <u>SID</u> | DateOfEnrollment |
|------------|----------------|------------|------------------|
| | Char(6) | Char(6) | Date |

Here Rollno (ENROLLMENT) and SID (ENROLLMENT) are foreign keys.

1. Retrieve names of students enrolled in any society.
2. Retrieve all society names.
3. Retrieve students' names starting with letter 'A'.
4. Retrieve students' details studying in courses 'computer science' or 'chemistry'.
5. Retrieve students' names whose roll no either starts with 'X' or 'Z' and ends with '9'
6. Find society details with more than N TotalSeats where N is to be input by the user
7. Update society table for mentor name of a specific society
8. Find society names in which more than five students have enrolled
9. Find the name of youngest student enrolled in society 'NSS'
10. Find the name of most popular society (on the basis of enrolled students)
11. Find the name of two least popular societies (on the basis of enrolled students)
12. Find the student names who are not enrolled in any society
13. Find the student names enrolled in at least two societies
14. Find society names in which maximum students are enrolled
15. Find names of all students who have enrolled in any society and society names in which at least one student has enrolled
16. Find names of students who are enrolled in any of the three societies 'Debating', 'Dance' and 'Sashakt'.
17. Find society names such that its mentor has a name with 'Gupta' in it.
18. Find the society names in which the number of enrolled students is only 10% of its capacity.
19. Display the vacant seats for each society.
20. Increment Total Seats of each society by 10%
21. Add enrollment fees paid ('yes'/'No') field in the enrollment table.
22. Update date of enrollment of society id 's1' to '2018-01-15', 's2' to current date and 's3' to '2018-01-02'.
23. Create a view to keep track of society names with the total number of students enrolled in it.
24. Find student names enrolled in all the societies.

25. Count number of societies with more than 5 student enrolled in it
26. Add column Mobile number in student table with default value '9999999999'
27. Find the total number of students whose age is > 20 years.
28. Find names of students who are born in 2001 and are enrolled in at least one society.
29. Count all societies whose name starts with 'S' and ends with 't' and at least 5 students are enrolled in the society.
30. Display the following information:
Society name, Mentor name, Total Capacity, Total Enrolled, Unfilled Seats

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5: Programming in JAVA

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Programming in JAVA | 4 | 2 | 0 | 2 | Class XII pass with Mathematics | DSC -1 |

Learning Objectives:

1. To develop structured as well as object-oriented programming skills using JAVA Programming.
2. The course provides a complete understanding of the object-oriented programming features, namely Encapsulation, Abstraction, Inheritance and Polymorphism.

Learning Outcomes:

1. Implement Exception Handling and File Handling.
2. Implement multiple inheritance using Interfaces.
3. Logically organize classes and interfaces using packages.
4. Use AWT and Swing to design GUI applications.

Unit I

(4 Hours)

Review of Object Oriented Programming and Java Fundamentals: Structure of Java programs, Classes and Objects, Data types, Type Casting, Looping Constructs.

Unit II

(6 Hours)

Interfaces Interface basics; Defining, implementing and extending interfaces; Implementing multiple inheritance using interfaces Packages Basics of packages, Creating and accessing packages, System packages, Creating user defined packages

Unit III

(4 Hours)

Exception handling using the main keywords of exception handling: try, catch, throw, throws and finally; Nested try, multiple catch statements, creating user defined exceptions

Unit IV

(4 Hours)

File Handling Byte Stream, Character Stream, File I/O Basics, File Operations.

Unit V

(6 Hours)

AWT and Event Handling: The AWT class hierarchy, Events, Event sources, Event classes, Event Listeners, Relationship between Event sources and Listeners, Delegation event model, Creating GUI applications using AWT.

Unit VI

(6 Hours)

Swing Introduction to Swing, Swing vs. AWT, and Hierarchy for Swing components, Creating GUI, Applications using Swing.

Essential/Recommended readings:

1. *Schildt, H. (2018). Java: The Complete Reference. 10th edition. McGraw-Hill Education.*
2. *Horstmann, C. S. (2017). Core Java - Vol. I – Fundamentals (Vol. 10). Pearson Education.*

List of Practical(60 Hours)

1. Design a class Complex having a real part (x) and an imaginary part (y). Provide methods to perform the following on complex numbers:
 - a. Add and Multiply two complex numbers.
 - b. toString() method to display complex numbers in the form: $x + i y$
2. Create a class TwoDim which contains private members as x and y coordinates in package P1. Define the default constructor, a parameterized constructor and override toString() method to display the coordinates. Now reuse this class and in package P2 create another class ThreeDim, adding a new dimension as z as its private member.
Define the constructors for the subclass and override toString() method in the subclass also. Write appropriate methods to show dynamic method dispatch. The main() function should be in a package P.
3. Define an abstract class Shape in package P1. Inherit two more classes: Rectangle in package P2 and Circle in package P3. Write a program to ask the user for the type of shape and then using the concept of dynamic method dispatch, display the area of the appropriate subclass. Also write appropriate methods to read the data. The main() function should not be in any package.
4. Create an exception subclass UnderAge, which prints “Under Age” along with the age value when an object of UnderAge class is printed in the catch statement. Write a class exceptionDemo in which the method test() throws UnderAge exception if the variable age passed to it as argument is less than 18. Write main() method also to show working of the program.
5. Write a program to implement stack. Use exception handling to manage underflow and overflow conditions.
6. Write a program that copies content of one file to another. Pass the names of the files through command-line arguments.
7. Write a program to read a file and display only those lines that have the first two characters as '/' (Use try with resources).
8. Write a program to create an Applet. Create a frame as a child of applet. Implement mouseClicked(), mouseEntered() and mouseExited() events for applet. Frame is visible when mouse enters applet window and hidden when mouse exits from the applet window.
9. Write a program to display a string in frame window with pink color as background.
10. Write a program to create an Applet that has two buttons named “Red” and “Blue”. When a button is pressed the background color of the applet is set to the color named by the button’s label.
11. Create an applet which responds to KEY_TYPED event and updates the status window with message (“Typed character is: X”). Use adapter class for other two events.
12. Create an applet with two buttons labeled ‘A’ and ‘B’. When button ‘A’ is pressed, it displays your personal information (Name, Course, Roll No, and College) and when button ‘B’ is pressed, it displays your CGPA in previous semester.
13. Write a program that creates a Banner and then creates a thread to scrolls the message in the banner from left to right across the applet’s window.
14. Rewrite the applet programs using Swing.

DISCIPLINE SPECIFIC CORE COURSE – 6: Mathematics for Computing - II

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Mathematics for Computing - II | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | DSC - 3 |

Learning Objectives:

1. To study the fundamental concepts and topics of probability and statistics.
2. The study of this course is important for students to learn machine learning and similar courses in later semesters.

Learning Outcomes:

1. Use probability theory to evaluate the probability of real-world events.
2. Describe discrete and continuous probability distribution functions and generate random numbers from the given distributions.
3. Find the distance between two probability distributions
4. Define and quantify the information contained in the data.
5. Perform data analysis in a probabilistic framework.
6. Visualize and model the given problem using mathematical concepts covered in the course.

Unit I

(9 Hours)

Basic Probability: Introduction to the notion of probability, Random experiment, Sample space and Events, Probability defined on events, Algebra of events. Conditional probabilities, independent events, Bayes' theorem.

Unit II

(12 Hours)

Random Variables: Introduction to Random Variables, Probability mass/density functions, Cumulative distribution functions. Discrete Random Variables (Bernoulli, Binomial, Poisson, Multinomial and Geometric). Continuous Random Variables (Uniform, Exponential and Normal). Expectation of a Random Variable, Expectation of Function of a Random Variable and Variance. Markov inequality, Chebyshev's inequality, Central Limit Theorem, Weak and Strong Laws of Large Numbers.

Unit III

(12 Hours)

Joint Distributions: Jointly distributed Random Variables, Joint distribution functions, Independent Random Variables, Covariance of Random Variables, Correlation Coefficients, Conditional Expectation.

Unit IV

(12 Hours)

Markov Chain and Information Theory: Introduction to Stochastic Processes, Chapman–Kolmogorov equations, Classification of states, Limiting and Stationary Probabilities. Random Number Generation, Pseudo Random Numbers, Inverse Transformation Method, Rejection Method, Uncertainty, Information and Entropy, Mutual Information, KL Divergence.

Essential/Recommended readings:

1. *Sheldon Ross, Introduction to Probability Models, 12th Edition, Elsevier, 2019.*
2. *K.S. Trivedi, Probability and Statistics with Reliability, Queuing and Computer Science Applications, 2nd Edition, Wiley, 2015.*
3. *Marc Peter Deisenroth, A. Aldo Faisal and Cheng Soon Ong, Mathematics for Machine Learning, 1st Edition, Cambridge University Press, 2020.*
4. *Ian F. Blake, “An Introduction to Applied Probability”, John Wiley.*

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

POOL OF GENERIC ELECTIVE

GENERIC ELECTIVE – 2: Database Management Systems

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Database Management Systems | 4 | 2 | 0 | 2 | 12 th Pass | NIL |

Learning Objectives:

1. To introduce the fundamentals of database management system and its architecture.
2. Students will learn about the importance of database structure and it's designing using conceptual approach using Entity Relationship Model and formal approach using Normalization.
3. The course would give students hands-on practice of structured query language in a relational database management system.

Learning Outcomes

1. Identify the basic concepts and various data model used in database design.
2. Use relational database management software to create and manipulate the database.
3. ER modelling concepts and architecture use and design queries using SQL.
4. Create conceptual data models using entity relationship diagrams for modelling real-life situations and map it to corresponding relational database schema.
5. Use the concept of functional dependencies to remove redundancy and update anomalies.
6. Implement relational databases and formulate queries for data retrieval and data update problems using SQL.
7. Use of PHP to connect with database and understand how to design web applications.

Unit-1:

(6 Hours)

Introduction and applications of DBMS, Basic Concepts: DBMS Architecture, Data Independence, Data modelling for a database, abstraction and data integration, three level architecture of a DBMS, Database users and DBA.

Unit-2:

(6 Hours)

Database Design: Entities and attributes, Entity types, Entity set, Attribute and keys, Defining the E-R diagram, Concept of Generalization, Aggregation and Specialization.

Unit-3:

(6 Hours)

Relational Model: Relational Data Manipulations: Relation, conversion of ER diagrams to relations, integrity constraints, Functional dependencies and Normalization.

Unit-4:**(6 Hours)**

Structured Query Language: DDL, DML, DDL queries like create database, drop database, create table, drop table, alter table.

DML Queries like inserting into a table, update a table, delete data from table, and filter data. Create relationships between tables, SQL sub queries, SQL clauses, SQL aggregate functions, SQL Joins.

Unit-5:**(6 Hours)**

PHP with MYSQL: PHP MYSQL Database, PHP Connecting to Database, PHP Creating Records, PHP Selecting Records, PHP Deleting Records, PHP Updating Records, PHP Limit Data, PHP Insert Multiple.

Essential/recommended readings:

1. R. Elmasri, S.B. Navathe *Database Systems Models, Languages, Design and application Programming*, 7th Edition, Pearson Education.
2. R. Ramakrishnan and J. Gehrke, *Database Management Systems*, 3rd Edition, McGraw Hill, 2014.
3. A. Silberschatz, H. Korth and S. Sudarshan, *Database System Concepts*, 6th Edition, McGraw Hill, 2014.
4. Robin Nixon, *Learning PHP, MYSQL, JavaScript, CSS & HTML5 3ed: A Step-by-Step Guide to Creating Dynamic Websites*, O'Reilly.

Practical component: 60 Hours

1. Create a database having two tables with the specified fields, to computerize a library system of a Delhi University College.

- LibraryBooks (Accession number, Title, Author, Department, PurchaseDate, Price)
 - IssuedBooks (Accession number, Borrower)
- a) Identify primary and foreign keys. Create the tables and insert at least 5 records in each table.
 - b) Delete the record of a book titled "Database System Concepts".
 - c) Change the Department of the book titled "Discrete Maths" to "BVoc".
 - d) List all books that belong to the "BVoc" department.
 - e) List all books that belong to the "BVoc" department and are written by author "Navathe".
 - f) List all computers (Department = "BVoc") that have been issued.
 - g) List all books which have a price less than 500 or purchased between "01/01/2022" and "31/12/2022".

2. Create a database having three tables to store the details of students of Computer Department in your college, as per the given schema.

- Personal information about Student (College roll number, Name of student, Date of birth, Address, Marks(rounded off to whole number) in percentage at 10 + 2, Phone number)
 - Paper Details (Paper code, Name of the Paper)
 - Student's Academic and Attendance details (College roll number, Paper code, Attendance, Marks in home examination).
- a) Identify primary and foreign keys. Create the tables and insert at least 5 records in each table.
 - b) Design a query that will return the records (from the second table) along with the name of student from the first table, related to students who have more than 75% attendance and more than 60% marks in paper 2.
 - c) List all students who live in "Delhi" and have marks greater than 60 in paper 1.
 - d) Find the total attendance and total marks obtained by each student.
 - e) List the name of student who has got the highest marks in paper 2

3. Create the following tables and answer the queries given below:

- Customer (CustID, email, Name, Phone, ReferrerID)
 - Bicycle (BicycleID, DatePurchased, Color, CustID, ModelNo) BicycleModel (ModelNo, Manufacturer, Style)
 - Service (StartDate, BicycleID, EndDate)
- a) Identify primary and foreign keys. Create the tables and insert at least 5 records in each table.
 - b) List all the customers who have the bicycles manufactured by manufacturer “Honda”.
 - c) List the bicycles purchased by the customers who have been referred by customer “C1”.
 - d) List the manufacturer of red colour bicycles.
 - e) List the models of the bicycles given for service.

4. Create the following tables, enter at least 5 records in each table and answer the queries given below.

- EMPLOYEE (Person_Name, Street, City) WORKS (Person_Name, Company_Name, Salary)
 - COMPANY (Company_Name, City)
 - MANAGES (Person_Name, Manager_Name)
- a) Identify primary and foreign keys.
 - b) Alter table employee, add a column “email” of type varchar (20).
 - c) Find the name of all managers who work for both Samba Bank and NCB Bank.
 - d) Find the names, street address and cities of residence and salary of all employees who work for “Samba Bank” and earn more than \$10,000.
 - e) Find the names of all employees who live in the same city as the company for which they work.
 - f) Find the highest salary, lowest salary and average salary paid by each company.
 - g) Find the sum of salary and number of employees in each company.
 - h) Find the name of the company that pays the highest salary.

5. Create the following tables, enter at least 5 records in each table and answer the queries given below.

- Suppliers (SNo, Sname, Status, SCity)
 - Parts (PNo, Pname, Colour, Weight, City)
 - Project (JNo, Jname, Jcity)
 - Shipment (Sno, Pno, Jno, Quantity)
- a) Identify primary and foreign keys.
 - b) Get supplier numbers for suppliers in Paris with status>20.
 - c) Get supplier details for suppliers who supply part P2. Display the supplier list in increasing order of supplier numbers.
 - d) Get suppliers names for suppliers who do not supply part P2.
 - e) For each shipment get full shipment details, including total shipment weights.
 - f) Get all the shipments where the quantity is in the range 300 to 750 inclusive.
 - g) Get part nos. for parts that either weigh more than 16 pounds or are supplied by suppliers S2, or both.
 - h) Get the names of cities that store more than five red parts.
 - i) Get full details of parts supplied by a supplier in London.
 - j) Get part numbers for parts supplied by a supplier in London to a project in London. k) Get the total number of projects supplied by a supplier (say, S1).
 - k) Get the total quantity of a part (say, P1) supplied by a supplier (say, S1)

B.Voc.-(Banking & Financial Services and Insurance) (Ramanujan College)

Category-I

**BVOC –Banking, Financial Services and Insurance course for Undergraduate
Programme of study with Banking, Financial Services and Insurance as a Single Core
Discipline**

DISCIPLINE SPECIFIC CORE COURSE – 4: Business Environment

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------------------|----------------|--|-----------------|--------------------------------|---------------------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Business Environment | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objective

The objective of this course is to make learner aware and sensitive towards the overall Business environment within country and at global level. During the course the student shall learn the interaction of business with different dimensions of business environment.

Learning Outcomes

After completion of the course, learners will be able to:

1. Understand and critically evaluate the factors affecting business environment.
2. Identifying business opportunities both in the country and abroad.
3. Understand Economic Survey and its implications for Indian Business Environment.
4. Critically evaluate the government policies related to business environment.

SYLLABUS OF DSC-4

UNIT-I: Business and its Environment

(9 Hours)

Concept and Significance of Business Environment, Corporate Social Responsibility of Business, Business Ethics, Cultural and Social Environment, Concepts of Culture, Interface between Business and Cross-cultural Communication, Environment Scanning – Concept, Types, Objectives and Process of Environment Scanning, Economic System – Capitalism, Socialism, Mixed Economy, Salient Features of Indian Economy.

UNIT-II: Economic Environment

(12 Hours)

Component of Economic Environment, NITI-Ayog Concept, Significance, Objectives and Machinery. Government Policies relating to Industrial Development, New Economic Policy, Major Thrusts, Economic Role of Government, Rationale of State Intervention in Economy, New Industrial Policy 1991.

UNIT-III: Public Sector Enterprises and India's Macroeconomy (12 Hours)

Characteristics and Significance of Mixed Economy, Genesis and Growth of Public Sector Enterprises in India, Problems and Prospects of Public Sector Enterprise in India- Present Scenario, Privatization of PSUs. General Political Environment in India affecting Economy and Economic Reforms.

UNIT-IV: Technological Environment and Indian Economy (12 Hours)

Features of Technology, Technology Transfer, Levels of Technology Transfer, Mechanism of Technology Transfer, Impact of Technology on Business and Society, Technology Selection, Major R&D Institutions and their Research and Development Activities, Broad feature of Managerial Trend such as Professionalization of Management, Restructuring of Organization, Technology Policy in India. The Advertising Council of India, Code for Self-regulation in Advertising, Consumer Protection Act, 2019 - Objects, Reasons and Salient Features of the Act. The Consumer Disputes Redressal Agencies, MNCs, Implications of Globalization and WTO on Indian Economy

Suggested Readings:

- Keith Davis: Business and Society: Environment and Responsibility Management, Tata McGraw Hill, New Delhi.
- Cherunilam F.: Business Environment, Himalaya Publishing House, Noida.
- Kazi Karim: Economic Environment of Business, Sultan Chand & Sons, New Delhi
- Chakravarty, S: Development Planning, Oxford University Press, Delhi.
- Ramaswamy, VS and S. Namakumari: Strategic Planning for Corporate Success, MacMillan India, New Delhi.
- Sengupta N.K: Government and Business in India, Vikas Publishing House, Noida.
- Aswathappa K.: Essential of Business Environment, Himalaya Publishing House, New Delhi.

Additional Resources:

- Justin Paul: Business Environment: Text and Cases, Tata McGraw Hill, New Delhi.
- Cherrunilam, Francis: Business Environment, Himalaya Publishing House, New Delhi.
- Ghosh P.K. and G. K. Kapur.: Business Policy and Environment, Sultan Chand & Sons, New Delhi.
- Adhikari M.: Economic Environment of Business, Sultan Chand & Sons, New Delhi.
- Gupta, C.B.: Business Environment, Sultan Chand & Sons, New Delhi.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5: Computer Applications in Business

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Computer Applications in Business | 4 | 3 | 0 | 1 | 12 th Pass | NIL |

Learning Objective

This paper aims to impart computer knowledge that will enable them to handle and analyse data for decision making and present it in the form of presentations and/or reports.

Learning Outcomes

After completion of the course, learners will be able to:

1. Create, edit and design document for communication & reporting.
2. Make good presentations.
3. Analyse various computations using various functions in the area of accounting and finance and represent the business data using suitable charts.
4. Create, work and manage the database.

SYLLABUS OF DSC-5

UNIT-1: Word Processing

(12 Hours)

Introduction to word Processing, Word processing concepts, Use of Templates and styles, Working with word document: Editing text, Find and replace text, Formatting, spell check, Autocorrect, Auto-text; Bullets and numbering, Tabs, Paragraph Formatting, Indent, Page Formatting, Header and footer, page break, table of contents, Tables: Inserting, filling and formatting a table; Inserting Pictures and Video; Mail Merge (including linking with spreadsheet files as data source); Printing documents; Citations, references and Footnotes.

UNIT-II: Preparing Presentations

(9 Hours)

Basics of presentations: Slides, Fonts, Drawing, Editing; Inserting: Tables, Images, texts, Symbols, hyperlinking, Media; Design; Transition; Animation; and Slideshow, exporting presentations as pdf handouts and videos.

UNIT-III: Spreadsheet basics

(12 Hours)

Spreadsheet concepts, managing worksheets; Formatting, conditional formatting, Entering data, Editing, and Printing and Protecting worksheets; Handling operators in formula, Project involving multiple spreadsheets, Organizing Charts and graphs; Flashfill; Working with Multiple worksheets; controlling worksheet views, naming cells and cell ranges. Spreadsheet functions: Mathematical, Statistical, Financial, Logical, Date and Time, Lookup and reference, Text functions and Error functions. Working with Data:

Sort and filter; Consolidate; Tables; Pivot tables; What-if-analysis: Goal seek, Data tables and Scenario manager.

UNIT-IV: Database Management System

(12 Hours)

DBMS Software: Environment; Tables; Forms; Queries; Reports; Modules; Applying DBMS in the areas of Accounting and Business; Managing the data records of Employees, Suppliers, and Customers.

Practical component (30 Hours)

Students will perform practical problems based upon the concepts such as word processing software, power point presentations, spreadsheet and database and practice the same on relevant software.

Suggested Readings:

- Lambert, J. (2019). Microsoft Word 2019 Step by Step. United States: Pearson Education.
- Jain, H. C. & Tiwari, H. N. "Computer Applications in Business" Taxmann, Delhi.
- Mathur, S. & Jain, P. "Computer Applications in Business" Galgotia Publishing Company
- Madan, S. "Computer Applications in Business" Scholar Tech Press, Delhi.

Additional Resources:

- Walkenbach, J. "MS Excel 2016, Bible". John Wiley & Sons, USA.
- Elmasari, Ranez and Shamkant B. Navathe Fundamentals of Database Systems, 7th Edition, (2016), Pearson Education
- Winston, W. L. "MS Excel 2013, Data Analysis & Business Modeling" Microsoft Press, USA.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 6: Basics of Banking Operations

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basics of Banking Operations | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objective

This paper aims to acquaint the students about the Indian banking system and provide them knowledge of banking legislations, instruments and reforms.

Learning Outcomes

After completion of the course, learners will be able to:

1. Understand the basic concept of Bank and banking system, functions and retail banking products.

2. Learn about the basics products offered by banks.
3. Develop understanding of the overall operations of banks.
4. Acquainted with bank's objectives, roles, functions and structure.
5. Learn about the basic terminology used in banking system.

SYLLABUS OF DSC-6

Unit I: Introduction to banking (12 Hours)

Meaning and Definition of Bank and Banking, functions, need and importance; legal framework; structure, organisation and working of banks, need for proper regulation and supervision; banker and customer relationship, general and special types of customers. Types of banks in India; Role of Foreign Banks in India; Advantages and Disadvantages of Foreign banks, Road Map for Foreign Banks in India; India's approach to Banking Sector reforms; Achievements of financial sector reforms and areas of concern, Credit Allocation Policies of Commercial banks, Credit Market Reforms. Instruments of Monetary Control-CRR, SLR, Repo, Reverse Repo, Bank rate, OMO; Regulatory Restrictions. Banker & customer relationship.

Unit II: Indian Banking System, Operations and instruments (12 Hours)

Apex bank & role of Central Bank, RBI's credit policy & Monetary policy, structure and functions of commercial banks in India, Banking Ombudsman scheme. Cheque: definition, features and types of cheque; Endorsement: meaning and essentials of a valid endorsement, types of endorsement; Era of Internet Banking and its benefits, Mobile Banking, Home banking, Virtual Banking, Electronic Clearing System (ECS), E-payments, Electronic Fund Transfer (EFT), E-money, Unified Payment Interface (UPI), Safeguard for internet banking, Critical comparison of traditional banking methods and e-banking; Balance Sheet of a Bank, special items of a Balance Sheet, off Balance Sheet Items; Anti-money Laundering Guidelines. Basics of Negotiable Instruments.

Unit III: Liability Products (12 Hours)

Remittance and payment Services (Draft, RTGS, IMPS, NEFT, etc); Types of Accounts, Opening of accounts, Universal Banking; Cross Selling, Bancassurance and ancillary services, Locker's facilities, custodial, Standing instructions, ATMs, POS; emerging opportunities, Stand by letter of credit. KYC, Internet banking and mobile banking, International transactions and FDI remittances.

Unit IV: Asset Products (9 Hours)

Home Loans, Personal Loans; consumer loans; Education loans and others; introduction to business loans (terms loans and cash credit); Priority sector lending-agricultural, SME and Microfinance.

Suggested Readings:

- Legal Regulatory Aspects of Banking, M/s Macmillan India Limited by K.D. Zacharias, C.P. Ravindranath, P.R. Kulkarni, B. Gopalakrishnan.
- Indian Financial System: Evolution and Present Structure, New Century Publications, by Bhasin, Niti.
- Banking and Financial Institution, New Century Publications, by Suri, Niti.
- Banking and Insurance, Himalya Publishing House, by Agarwal, O.P.
- H.R., Practical and Law of Banking, Himalya Publishing House by . Suneja.
- Legal Aspects of Banking Operations, Sultan Chand and Sons by Saxena, G.S.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

B.Voc. – Healthcare Management (Jesus & Mary College)

Category-I

DISCIPLINE SPECIFIC CORE COURSE – 4 Medical Terminology- 2

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Medical Terminology- 2 | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives

Includes structure, recognition, analysis, definition, spelling, pronunciation, and combination of medical terms from prefixes, suffixes, roots, and combining forms.

Learning outcomes

- Lectures, discussions, presentations, case discussions, exercises, practical and exposure to current practices. The pedagogy for the course is more student centric; Visit to healthcare facilities.
- Lectures would be delivered by experts drawn from the fields of both management and healthcare

SYLLABUS OF DSC-4

General Terminology (procedures, diseases, treatment) related to following body system

Unit-1 (10 hours)

Circulatory System- procedures, diseases, treatment

Unit-2 (10 hours)

Digestive System- procedures, diseases, treatment

Unit-3 (10 hours)

Respiratory system- procedures, diseases, treatment

Unit-4 (5 hours)

Urinary System- procedures, diseases, treatment

Unit-5 (10 hours)

Obstetrics & Gynecology- procedures, diseases, treatment

Practical component (if any) -

N/A

Essential/recommended readings

N/A

Suggestive readings

Reference texts and online material

Books:-Medical Terminology Systems by Barbara A.Gyls, Mary Ellen Wedding

STEDMAN'S Medical Dictionary

Note: Examination scheme and mode shall be as prescribed by the Healthcare Sector Skill Council(HSSC) from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5: Medical Software Applications-1

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Medical Software Applications-1 | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

- Basic Understanding of functioning of computers & its application in Healthcare with a perspective on Hospital operations
- Create basic awareness on Healthcare record systems and infrastructure.

Learning outcomes

- Lectures, discussions, presentations, case discussions, exercises, practical and exposure to current practices. The pedagogy for the course is more student centric; Visit to healthcare facilities.
- Lectures would be delivered by experts drawn from the fields of both management and healthcare

SYLLABUS OF DSC-5

Unit-1 (10 Hours)

Introduction To HIS

- a. Concept Of HIS
- b. Role Of HIS
- c. Characteristics Of HIS
- d. Pre Requisites Of HIS

Unit-2 (05 Hours)

Need & Importance Of HIS

Unit-3(5 Hours)

Electronic Health Record (EHR) Vs Manual Records

Unit-4(10 Hours)

Computerized Patient Record System (CPRS)

Unit 5(15 Hours)

Modules used in HIS

1. Front office Module in HIS – Introduction, Process of Registration, admitting, billing, discharging of Patients, bed management system, OP & IP modules
2. Financial Management Module – Introduction to Tally
3. Management Information System
4. OT Management System
5. Lab Management and reporting System

Practical component (if any) –

N/A

Essential/recommended readings

N/A

Suggestive readings

Business Journals, case studies, Hospital system

Books:-Hospital Informations System by S.A.Kelkar

Note: Examination scheme and mode shall be as prescribed by the Healthcare Sector Skill Council(HSSC) from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 6: Planning of Hospital Functions

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Planning of Hospital Functions | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

After completion of the module student should be able to describe all aspects of planning and commissioning of different types of hospital including specialty hospitals and project management

Learning outcomes

Class room sessions, interactive learning, visit to hospital

SYLLABUS OF DSC-6

Unit-1(5 Hours)

Changing health care concept in planning / designing.

Unit-2 (5 Hours)

Site surveys for planning a hospital (Techno-Commercial)

Unit-3 (10 Hours)

Hospital building, architectural patterns, landscaping, Internal arrangements, sanitation, lighting, ventilation and traffic control

Unit-4 –(15 Hours)

Planning of Hospital-Planning of 30,100,250 bedded hospital(general/specialty)

- Planning of 500, 750 and above bedded hospital(teaching/super-specialty/non-teaching specialty hospitals)

Unit-5 (10 Hours)

Project cost and total budget : Feasibility and viability study of Hospital
Project conceptualization, functional requirements. Implementation

Practical component (if any) –
N/A

Essential/recommended readings
N/A

Suggestive readings

Textbooks, and on-line reference and training materials

Books:-Hospital:Facilities Planning & Management by G.D.Kunders

Principles of Hospital Administration and Planning by B.M.Sakharkar

Note: Examination scheme and mode shall be as prescribed by the Healthcare Sector Skill Council(HSSC) from time to time.

GENERIC ELECTIVES (GE-2)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Human Resource Management | 4 | 3 | 1 | 0 | Class pass XII | NIL |

Learning Objectives

The objective of the course is to acquaint students with the techniques and principles to manage human resource of an organization.

Learning outcomes

1. Lectures, discussions, presentations, case discussions, exercises, practical and exposure to current practices. The pedagogy for the course is more students centric.
2. Apply and evaluate a learning process starting with training needs, analysis, assessment and evaluation process.
3. Explore the role of training needs of employees.
4. Evaluate the training methods used in industry.

SYLLABUS OF GE-2 (Lecture-45 Hours)

Unit 1

Introduction

Human Resource Management: Concept and Functions, Role, Status and competencies of HR Manager, HR Policies, Evolution of HRM, HRM vs HRD. Emerging Challenges of Human Resource Management like Workforce diversity, Downsizing, Work life balance

Unit 2

Acquisition of Human Resource

Human Resource Planning- Quantitative and Qualitative dimensions; job analysis — job description and job specification; Recruitment - Concept and sources; Selection — Concept and process; test and interview; placement and induction

Unit 3

Performance Appraisal

Nature, objectives and importance; Modern techniques of performance appraisal; potential appraisal and employee counseling; job changes - transfers and promotions; Compensation: concept and policies; job evaluation; methods of wage payments and incentive plans; fringe benefits; performance linked compensation.

Unit 4

Maintenance

Employee health and safety; employee welfare; social security; Employer-Employee relations- an overview; grievance-handling and redressal; Industrial Disputes: causes and settlement machinery

Practical component (if any) -

N/A

| | | Lecture | Tutorial | Practical/ Practice | | |
| Communication Management | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

The course aims to train students to enhance written as well as oral communication in management. This course will help students in understanding the principles and techniques of communication

Learning outcomes

1. Analyze the need of communication in management.
2. Interpret the need for effective listening.
3. Understand the basics of written and spoken communication.
4. Demonstrate the role of group discussion and interviews.
5. Summarize business reports and proposals.

SYLLABUS OF GE-2 – (Lecture-45 Hours)

Unit 1

Meaning and Objectives of Communication. Process of Communication. Forms of communication: formal and informal; upward, downward, diagonal and lateral. Role of a Manager. Barriers to effective Communication and Overcoming them. Effectiveness in Managerial Communication. Make use of grapevine. Role of verbal and non-verbal communication; interpreting non-verbal communication.

Unit 2

Meaning and objectives of Listening. Features of a good listener. Analyzing poor listening. Effective listening skills and barriers to effective listening.

Unit 3

Nature, forms and classification of Groups. Role of managers in Group Discussions. Effective Group Decision Making. Group Conflict.

Unit 4

Planning and conducting meetings. Meeting Process. Ways to Effectively lead a meeting. Evaluating meeting and drafting minutes of a meeting. E-mail, Business Reports and Proposals: E-mail Etiquettes, smartness and presentation. Business Reports and proposals: Writing and purpose.

DISCIPLINE SPECIFIC CORE COURSE – 4 Store Display and Visual Merchandising

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria/ | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Store Display and Visual Merchandising | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives

Create basic knowledge of store display and visual merchandising and its various aspects.

Learning outcomes

- An in-depth understanding of store design and display
- Understanding of store image, security and managing communication
- Proficiency in managing visual merchandising
- An introduction to different aspects of visual merchandising
- Knowledge about the growth and future of visual merchandising

SYLLABUS OF DSC-4 (Lecture-45 Hours)

Unit 1

Store Design and Display: Introduction, Objectives, Concept of Store Design and Display, Objectives of store design, Purpose and importance of display, Components of display, Some Useful Display Fixtures, Shelves, Gondolas, Round racks, Four ways, Saccades and fixation, Replenishes, Plano gramming.

Unit 2

Managing Communication for a Retail Store Offering: Introduction, Objectives, Marketing Communication, Thematic Communication, Methods of Communication, Graphics, Signage, The Loop for Guiding the Shoppers through a Store, Organize the display of products at the store.

Unit 3

Introduction to Visual Merchandising (VM): Introduction, Objectives, Concept of Visual Merchandising, Objectives of Visual Merchandising, Growth of Visual Merchandising, Visual Merchandising in India, Scope of visual merchandising in India, Visual Merchandising as a Support for Positioning Strategy, Prospects of Visual Merchandising, Challenges in Visual Merchandising, Plan visual merchandising.

Unit 4

The Merchandise Mix: Introduction, Objectives, Concept of Merchandise Mix, Merchandise line, The Assortment of Products, Assortment strategy, Merchandise Mix of Show Off, Role of a merchandiser, Other Atmospherics in Merchandising, Colour scheme, Lighting.

DISCIPLINE SPECIFIC CORE COURSE – 5 Sales Management

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Sales Management | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

The course aims at providing in-depth understanding of sales management in retail stores.

Learning outcomes

- Introduction to sales management and personnel selling
- Understanding of the compensation and supervision of salesmen besides setting sales territories and targets
- Proficiency in evaluation of sales performance and sales cost analysis
- Understanding of sales personnel training

SYLLABUS OF DSC-5 (Lectures- 45 Hours)

Unit 1

Sales Management; Objectives and Functions; Setting and Formulating Personal Selling Objectives, Personal selling - nature, scope & objectives, Formulating Personal selling strategy.

Unit 2

Designing and Administering Compensation Plans; Supervision of Salesmen; Standards and Performance; Motivating Sales Personnel; Sales Meetings and Sales contests.

Unit 3

Planning the Sales Effort - Sales planning and Budgeting, Estimating Market Potential and Sales forecasting, Setting the sales territory & quotas, Sales and cost Analysis.

Unit 4

Developing and conducting Sales Training Programmes. Sales organization, Sales function & policies, Retail markets - Competition and Best Practices.

Category-I

DISCIPLINE SPECIFIC CORE COURSE – 4 Programming with Python

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Programming with Python | 4 | 3 | 0 | 1 | Class XII Pass | NIL |

Learning Objectives

The course is designed to introduce programming concepts using Python to students. The course aims to develop structured as well as object-oriented programming skills using Python. The course also aims to achieve competence amongst its students to develop correct and efficient Python programs to solve problems in their respective domains.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Write simple programs using built-in data structures in Python.
2. Implement arrays and user defined functions in Python.
3. Solve problems in the respective domain using suitable programming constructs in Python.
4. Solve problems in the respective domain using the concepts of object oriented programming in Python.

SYLLABUS OF DSC-04

Unit 1 Introduction to Programming: (6 Hours)

Problem solving strategies; Structure of a Python program; Syntax and semantics; Executing simple programs in Python.

Unit 2 Creating Python Programs: (12 Hours)

Identifiers and keywords; Literals, numbers, and strings; Operators; Expressions; Input/output statements; Defining functions; Control structures (conditional statements, loop control statements, break, continue and pass, exit function), default arguments.

Unit 3 Built-in data structures: (15 Hours)

Mutable and immutable objects; Strings, built-in functions for string, string traversal, string operators and operations; Lists creation, traversal, slicing and splitting operations, passing list to a function; Tuples, sets, dictionaries and their operations.

Unit 4 Object Oriented Programming: (6 Hours)

Introduction to classes, objects and methods; Standard libraries.

Unit 5 File and exception handling: (6 Hours)

File handling through libraries; Errors and exception handling.

Practical Component – 30 Hours

The practical assignment must include installation of software like Anaconda, Jupyter and Spyder notebook and list of python programs for implementation.

Essential readings

1. Taneja, S., Kumar, N., Python Programming- A modular Approach, Pearson Education India, 2018.
2. Balaguruswamy E., Introduction to Computing and Problem-Solving using Python, 2nd edition, McGraw Hill Education, 2018.

Suggested readings

1. Brown, Martin C., Python: The Complete Reference, 2 nd edition, McGraw Hill Education, 2018.
2. Guttag, J.V. Introduction to computation and programming using Python, 2 nd edition, MIT Press, 2016

DISCIPLINE SPECIFIC CORE COURSE – 5 Introduction to Web Programming

| Course title& Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre- requisiteof the course (if any) |
|--|----------|--------------------------------------|----------|------------------------|-------------------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Web Programming | 4 | 3 | 0 | 1 | Class XII Pass | NIL |

Learning Objectives

The course aims at introducing the basic concepts and techniques of client-side web programming. The student shall be able to develop simple websites using HTML, CSS and JavaScript.

Learning Outcomes

On successful completion of this course, the student will be able to:

1. Build websites using the elements of HTML.
2. Build dynamic websites using the client-side programming techniques with CSS, JavaScript and jQuery.
3. Learn to validate client-side data.

SYLLABUS OF DSC-05

Unit 1 Introduction: (6 Hours)

Introduction to internet and web design. Basic concepts of web architecture.

Unit 2 HTML: (12 Hours)

Introduction to hypertext mark-up language (html), creating web pages, lists, hyperlinks, tables, web forms, inserting images, frames.

Unit 3 Cascading style sheet (CSS): (12 Hours)

Concept of CSS, creating style sheet, importing style sheets, CSS properties, CSS styling (background, text format, controlling fonts), CSS rules, Style Types, CSS Selectors, CSS cascade, working with block

elements and objects, working with lists and tables, CSS id and class, box model (introduction, border properties, padding properties, margin properties)

Unit 4 JavaScript: (9 Hours)

Document object model, data types and variables, functions, methods and events, controlling program flow, JavaScript object model, built-in objects and operators, validations.

Unit 5 jQuery and JSON: (6 Hours)

Introduction to jQuery, syntax, selectors, events. JSON file format for storing and transporting data.

Practical component-30 Hours

The practical assignments must include exercises on creating static and dynamic websites using HTML, CSS and JavaScript on platforms like Notepad/Notepad++/Visual Studio.

Essential Readings

1. Nixon, R. (2018). Learning PHP, MySQL & JavaScript with jQuery, CSS and HTML5, O'Reilly.
2. Powell, T.A. (2010).HTML & CSS: The Complete Reference. 5th edition. Tata McGrawHill.
3. Duckett, J.(2014). JavaScript and JQuery: Interactive Front-End Web Development. Wiley

Suggested Readings

1. Minnick, J. (2015). Web Design with HTML5 and CSS3. 8th edition. Cengage Learning. DRAFT
2. Boehm, A., & Ruvalcaba, Z. (2018). Munarch's HTML5 and CCS(4th Edition). Mike Murach & Associates.
3. J. A. Ramalho (2007), Learn Advanced HTML 4.0 with DHTML, BPB Publications
4. Ivan Bayross (2009), Web Enabled Commercial Application Development Using Html, Dhtml, Javascript, Perl CGI , BPB Publications.

DISCIPLINE SPECIFIC CORE COURSE – 6**Fundamentals of Statistics**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre- requisite of the course (if any) |
|-------------------------------|---------|--------------------------------------|----------|------------------------|-------------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fundamentals of Statistics | 4 | 3 | 0 | 1 | Class XII Pass | NIL |

Learning Objectives

The objective of this course is to introduce the basic knowledge of data analysis using basic statistical tools.

Learning Outcomes

On successful completion of the course, students will be able to:

1. Analyze simple primary data numerically and graphically.
2. Gain the knowledge about probability theory and apply discrete and continuous probability distribution in real life situations.

SYLLABUS OF DSC-06**Unit 1: Data Visualization and Measures of Central Tendency: (12 Hours)**

Diagrammatic presentation of data- bar graph, pie chart, histogram, frequency polygon, Ogive, scatter plot for bivariate data. Measures of central tendency (including graphical determination). Partition values (quartiles, deciles, and percentiles).

Unit 2: Measure of Variation: (9 Hours)

Absolute and relative. Range, quartile deviation, mean deviation, standard deviation, and variance. Moments, kurtosis and skewness.

Unit 3: Probability theory: (9 Hours)

Introduction of probability theory, types of events, concept of conditional probability, Bayes Theorem.

Unit 4: Probability Distribution: (15 Hours)

Introduction to random variable, concept of discrete and continuous Probability Distribution Function (PDF). Discrete PDF- binomial, poisson. Continuous PDF- uniform, exponential, normal.

Practical Component: 30 Hours

The practical assignments must include exercises on implementing the statistical concepts covered in theory using Spreadsheet – open source software.

Essential Readings:

1. S.P Gupta, Statistical Methods, 46th Edition, Sultan Chand & Sons, 2021.
2. J E Freund, Mathematical Statistics with Applications, 8th edition, Pearson Education, 2014.

Suggested Readings:

1. S C Gupta and V K Kapoor, Fundamental of Mathematical statistics, latest edition, Sultan Chand & Sons.
2. J. K. Sharma, Business Statistics, latest edition, Pearson Education.
3. Richard Levin and David S. Rubin, Statistics for Management, latest edition, Prentice Hall of India.

GENERIC ELECTIVES (GE-2)

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Database Management System | 4 | 3 | 0 | 1 | Class XII Pass | NIL |

Learning Objectives

The course will give an overview of categories of data models used by database management systems and writing queries in relational algebra. The importance of file indexing and controlled execution of transactions will be taught. The course would give students hands-on practice to write complex queries, nested queries using aggregate functions in SQL and to use basic database administration commands.

Learning Outcomes

On successful completion of this course, a student will be able to:

1. Write queries using relational algebra, a procedural language.
2. Use the concept of functional dependencies to remove data anomalies and arrive at normalized database design.
3. Understand the data storage system, file organization and need of file indexing.
4. Learn the importance of transaction processing and concurrency control.
5. Write complex and nested SQL queries, and learn basic database administration commands.
6. Acquire information about emerging technologies.

SYLLABUS OF GE-2

Unit 1 Data models and Relational Algebra: (9 Hours)

Categories of data models, types of database users, Relational Algebra Operations from SET Theory, SELECT, PROJECT, JOIN, DIVISION Operations.

Unit 2 Normalization: (6 Hours)

Functional dependencies, minimal cover, normalizing database with multiple keys till 3NF, Boyce-Codd Normal Form DRAFT

Unit 3 Database Storage and index Structures: (6 Hours)

Storage of data, file structure, file organization and its types: Sequential, Heap and Indexed, Hash file, need for file Indexing, single- and multi-level indexing.

Unit 4 Transaction Processing: (6 Hours)

Concurrent execution of transactions and their handling, ACID properties, need of data recovery and log files.

Unit 5 Advanced SQL: (9 Hours)

Nested and complex queries using Inner JOIN, Left JOIN, Right JOIN, Full JOIN, views, Database Administration Commands: COMMIT, ROLLBACK, drop database, control permissions etc.

Unit 6 Emerging Technology: (9 Hours)

Distributed Database concepts, Introduction to emerging technologies like Data Warehousing and OLAP, Data Mining

Practical component – 30 Hours

The practical assignments must include exercises on implementing the simple SQL concepts covered in theory using MySQL - open source software.

Essential readings

1. Elmasri R. and Navathe B. S. Fundamentals of Database Systems, 7 th Edition, Pearson Education, 2016.
2. Murach J. Murach's MySQL, 3rd Edition, Pearson, 2019.

Suggested Readings:

1. Silberschatz, A., Korth, H.F., & Sudarshan, S. Database System Concepts, 8 th Edition, McGraw Hill, 2019.
2. Ramakrishnan, R. & Gehrke, J. Database Management Systems, 3rd Edition, Tata McGraw Hill Education, 2014.
