Course Assessment: Internal Assessment– 25%, Exam – 75%

B.A. (VS) Small and Medium Enterprises
Semester I
Organization and Management of MSMEs
BA (VS) - DSC– 1.2, Credit (4)

This course is designed to provide a basic understanding of the various concepts related to the establishment and management of a small business. It helps students to choose an appropriate business form and to develop an organizational structure as per the nature of the business.

Learning Objectives: The objectives of the paper are to:

1. Make the students familiar with the investment criteria for Micro, Small and Medium enterprises and categories them accordingly.
2. Learn the procedure for setting up MSMEs and Government initiatives to promote MSMEs.
3. Understand the ways that how organisations can be set up according to the requirement of individual and business.
4. Know the processes of manufacturing, effective and efficient usage of available resources and preparing master production schedule.
5. Learn the ways that how the internal and external growth strategies can be followed in a business.

Learning Outcomes: After completion of the course, learners will be able to:

1. Identify the investment criteria for Micro, Small and Medium enterprises and will choose the size of enterprise accordingly.
2. Describe the process of setting up micro/small business and evaluate the benefits of government initiatives to promote MSMEs.
3. Choose an appropriate form of business that suits to the specific needs of an entrepreneur.
4. Select manufacturing process and will be able to allocate the resources by material resource planning and preparing master production schedule.
5. Formulate and implement strategies for internal and external growth of business.

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|---|-------------------------------------|------|-------|
| Unit 1: Setting up MSMEs | 30% | √ | √ |
| Unit 2: Forms of Business Organizations | 20% | √ | √ |
| Unit 3: Resource Allocation and Production Planning | 30% | √ | √ |

| | | | |
|---|-----|---|---|
| Unit 4: Productivity Improvement Strategies | 20% | √ | √ |
|---|-----|---|---|

*C&K- Comprehension & Knowledge

**A&A – Analysis & Application

Unit 1: Setting up MSMEs - 15 Hours

Determination of the nature of the business unit: Micro, Small and Medium enterprise, Comparative evaluation of feasibility of buying an existing enterprise, setting up a new venture or starting the business through franchising, Location strategy, Preliminary Registration with State Directorate of Industries, registration process of industries, implications of non-registration, UDYOG AADHAAR, Steps involved in setting up MSMEs: Project selection through market assessment, Arranging Finance, Technology and Machinery, Unit development and location strategy, Approvals and clearances; Challenges and opportunities of MSMEs; Government initiatives to promote MSMEs.

Unit 2: Forms of Business Organizations - 15 Hours

Concept and nature of Business Organization; Forms of Organization: Sole proprietorship, Partnership firm, Limited liability partnership, Joint stock companies, Hindu Undivided Family; Organizational structure: Purpose, Types and development of organizational structure for a new business.

Unit 3: Resource allocation and Production Planning - 15 Hours

Concept, Types and importance of resources for a business, Resources allocation methods; Preplanning: Forecasting and Market analysis; Objective and functions of production, Layout and control, Types of manufacturing process, Selection of manufacturing process; Purchase Management and Inventory Management; Material Resource Planning, Master Production Schedule, Progress control through records and charts.

Unit 4: Productivity Improvement Strategies - 15 Hours

Importance, Factors influencing productivity: Internal and external factors, Integration and diversification, internal expansion, Quality management, Research and technology developments; Ergonomics: Training and motivation, working conditions & workplace design, Safety programs.

Exercises:

The learners are required to:

1. Distinguish MSMEs on the basis of investment and turnover criteria. (Unit I)
2. Find out the procedures for setting up MSMEs and prepare a list of government initiatives to promote MSMEs. (Unit I)
3. Identify a suitable form of business organizations according to the requirement of

- individual and business. (Unit II)
4. Prepare a list of processes of manufacturing, the ways of effective and efficient usage of available resources and also prepare master production schedule. (Unit III)
 5. Discuss the methods of internal and external growth strategies followed in a business. (Unit IV)

Suggested Readings:

- Hill, Michal A., Inland Durama R. et.al, Strategic Entrepreneurship: Creating a New Mindset, Blackwell Publishers, Oxford.
- Kanishka Bedi, Production and Operations Management, Oxford University Press.
- Lall, Sahai, Entrepreneurship, Excel Books, New Delhi.
- Sahay A., V. Sharma, Entrepreneurship and New Venture Creation, Excel Books, New Delhi.
- Shukla, M.B., Entrepreneurship and Small Business Management, Kitab Mahal, Allahabad.
- Wickham, Phillip A., Strategic Entrepreneurship, Pitman, UK.
- Zenas Block and Ian C Macmillan, Corporate Venturing, Harvard Business School Press, Boston

Course Assessment: Internal Assessment – 25%, Exam – 75%

B.A. (VS) Small and Medium Enterprises Semester I Microeconomics for MSMEs BA (VS) - DSC– 1.3, Credit (4)

Learning Objectives: The objectives of the paper are to:

1. Make students familiar with the micro economic theory along with their applications with examples.
2. Learn basic principles of microeconomics and understand the functioning of different kinds of market structure.

Learning Outcomes: the students will be able to:

1. Assess the economic trade-offs and opportunities facing a small or medium sized firm and to get benefit of it.
2. Apply the fundamentals of market mechanism to real life situations confronting a small or medium enterprise.

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|---|-------------------------------------|------|-------|
| Unit 1: Understanding Demand & Supply, Price and resource allocation, Elasticity, Market equilibrium. | 20% | √ | √ |
| Unit 2: Understanding Consumer Behaviour | 25% | √ | √ |
| Unit 3: Understanding Production, Costs and Profit maximization by Firm | 20% | √ | √ |
| Unit 4: Understanding Market structures. | 35% | √ | √ |

*C&K- Comprehension & Knowledge

**A&A – Analysis & Application

Content (Unit-wise):

Unit 1: Understanding Demand & Supply, Price and resource allocation, Elasticity, Market equilibrium. - 15 Hours

Markets and competition; determinants of individual demand/supply; demand/supply schedule and demand/supply curve; market versus individual demand/supply; shifts in the demand/supply curve, determination of equilibrium output and price, how prices allocate resources; elasticity and its application; controls on prices; impact and incidence of indirect taxation.

Unit 2: Understanding Consumer Behaviour - 15 Hours

The consumption decision using Indifference curve analysis-budget constraint, consumption and income/price changes, demand for all other goods and price changes; preferences; consumer's optimum choice; income and substitution effects; labour supply and savings decision; choice between leisure and consumption.

Unit 3: Understanding Production, Costs and Profit maximization by Firm - 15 Hours

Production functions. Laws of production under short and long run, Producer's equilibrium with the help of isoquants and iso-cost line. Expansion path in the long run and short run. Short run and long run costs curves. Economies and diseconomies of scale. Short-run costs and output decisions; costs and output in the long-run, external economies of scale, agglomeration economies.

Unit 4: Understanding Market structures - 15 Hours

Price and output determination under perfect competition, monopoly, monopolistic markets and oligopolistic market structure in short run and long run, allocative efficiency in perfect competition. Difference between monopoly and different forms of imperfect competition.

Exercises:

The learners are required to:

1. Analyse the micro economic theory along with their applications with examples. (Unit I & II)
2. Know the basic principles of microeconomics and evaluate the functioning of different kinds of market structure. (Unit III & IV)

Suggested Readings:

1. Case, Karl E. & Ray C. Fair: Principles of Economics, Pearson Education, Inc., latest edition.
2. Farnham, Paul G., Economics for Managers, Pearson, latest edition.
3. Lipsey, R. and Alec Chrystal: Economics, Oxford University Press, Latest edition.
4. Satya P. Das, Microeconomics for Business, Sage Publications, Latest edition.

Course Assessment: Internal Assessment – 25 %, Exam – 75%

BA (VS) Human Resource Management

MANAGEMENT CONCEPTS AND PRACTICES

DSC 1.1

Marks: 100

(4: credits: 3 + 1 tutorial)

Course Objective

The aim of this course is to acquaint students with the basic concepts and processes of management. Students will examine the fundamental roles and processes of planning, leading, organizing and controlling that comprise the managers' role. Students will develop skills related to the manager's function as required in today's competitive environment.

Learning Outcomes: After completion of the course, learners will be able to:

1. demonstrate understanding of various HR terminologies, importance of human resources and their effective management in an organization
2. acquire HR skills and their ability to assess the constraints and opportunities associated with managing employees in various organizational contexts.
3. analyse and discuss the role of the various functional areas within Human Resources.
4. effectively manage and plan key human resource functions within organizations

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--|--|-----------------|------------------|
| Unit 1: Introduction to Management | 25 | √ | |
| Unit 2: Planning and Organizing | 30 | √ | √ |
| Unit 3: Staffing, Directing and Motivation | 25 | √ | √ |
| Unit 4: Leadership and Control | 20 | √ | √ |

*C&K- Comprehension & Knowledge

**A&A – Analysis & Application

Unit 1: Introduction to Management

Concept of Management, Management: Art and Science, Management Vs Administration, Levels of Management, Functions of management, Management as a Profession, Management skills, contributions: Taylor and Scientific Management, Fayol's Administrative Management, Bureaucracy, Human Relations, and Modern Approach, Social responsibility of managers Indian Ethos for

Management; Value Oriented Holistic Management; Learning lessons from Bhagavat Gita and Ramayan.

Unit 2: Planning and Organizing

Concept of planning, Significance of planning, Classification of planning: Strategic plan, Tactical plan and Operational plan, Process of planning, Barriers to effective planning. MBO, Management by Exception.

Decision Making: Strategies of decision making, Steps in rational decision-making process, Factors influencing decision making process, Psychological bias, and decision support system.

Organizing: Defining organizing, Principles of organizing, Process of organizing, Types of organizational structure, Span of control, Centralization vs. Decentralization of authority. Informal organization.

Unit 3: Staffing, Directing and Motivation

Staffing: Concept, Objective of staffing, System approach to staffing, Manpower planning. Directing: Concept, Techniques of directing and supervision, Types of supervision, Essential characteristics of supervisor.

Motivation: Concept, Forms of employee motivation, Need for motivation. Theories of motivation.

Unit 4: Leadership and Control

Leadership vs Management, Process of Leadership, Importance of leadership, Characteristics of an effective leader, Leadership styles and influence process, Analyzing Interpersonal Relations, Group Dynamics

Controlling: Concept, Importance of controlling, Types of control, Steps in control process, Characteristics of Effective Controls

Practical Exercises

The learners are required to:

1. explain relevant concepts by way of Class presentation.
2. understand and discuss different Management concepts and functions using Focused group discussion.
3. assess the understanding of theory and practical by objective and subjective assessment (Class test, assignments, MCQs, Fill in the blanks and quiz).
4. analyze the case studies to understand the dynamics of Management functions.

Course Assessment: Internal Assignments/projects/class tests/presentations – 25; Exam - 75

Suggested Readings:

1. Durai, P. Principles of Management, Text and Cases. New Delhi: Pearson Education.
2. Griffin, R. (2021). Fundamentals of management. Cengage Learning.

3. Sharlekar, S.A. (2010). Management (Value-Oriented Holistic Approach). Himalaya Publishing House. (Chapter 3 and 4)
4. Robbins, S.P. & Decenzo, D. A. Fundamentals of Management: Essential Concepts and Applications. New Delhi: Pearson Education.
5. Robbins, S.P. & Coulter, M. Prentice Hall. Management. San Diego State University & Southwest Missouri State University.
6. Singh & T. N. Chabra., Management Concepts & Practices. Dhanpat Rai & Co.

Note: Students are advised to use the latest editions of textbooks

HUMAN RESOURCES MANAGEMENT: AN OVERVIEW

DSC: 1.2

Marks: 100

(4: credits: 3 + 1 tutorial)

Course Objective

The aim of the course is to impart the knowledge of concept, functional areas (like Recruitment, Selection, Training and Development, etc.), systems, policies, applications of Human Resource Management. The course intends to help the students to acquire and develop skills for rational decision making in the discipline of human resource management

Learning Outcomes: After completion of the course, learners will be able to:

1. demonstrate understanding of various HR terminologies, importance of human resources and their effective management in an organization
2. Assess the constraints and opportunities associated with managing employees in various organizational contexts.
3. analyze and discuss the role of the various functional areas within Human Resources.
4. effectively manage and plan key human resource functions within organizations

Course Contents:

| Unit | Unit weightage wise of marks (in %) | C&K* | A&A** |
|--|-------------------------------------|------|-------|
| Unit 1: Introduction to Human Resource Management | 25 | √ | |
| Unit 2: HR Procurement and Development | 30 | √ | √ |
| Unit 3: Performance Management: Assessment and Appraisal | 25 | √ | √ |
| Unit 4: Employer-Employee Relations | 20 | √ | √ |

*C&K- Comprehension & Knowledge

**A&A – Analysis & Application

Unit 1 Introduction to Human Resource Management

Meaning, Nature, Philosophy, Need, Objectives and Evolution of HRM, HRM Functions, Human Resource Development (HRD): Concept, HRD Strategy; Human Resource Planning: Concept, Importance; HRIS, Environmental Factors of HRM, Challenges to HRM

Unit 2 HR Procurement and Development

Job Analysis and Job Design: meaning and overview, Human Resource Planning: Introduction to HRP, Need of HRP, Forecasting, Recruiting, Selecting & Outsourcing, Sources of people, Socialization.

Training: Objectives and Needs, Training Process: Methods of Training, Tools and Aids, Evaluation of training Programs, Mentoring and Performance Coaching, Career Planning-Succession Planning

Unit 3 Performance Management: Assessment and Appraisal

Performance Management System: Definition, Performance appraisal: Concept, Objectives and Ethics: Different methods of Performance Appraisal, Rating Errors, Competency Mapping.

Compensation Management-Concepts, Objectives, Compensation Strategy, Structure, Composition - Job Evaluation- Incentives and Benefits

Unit 4 Employer-Employee Relations

Regulatory Mechanisms in Industrial Relations; Dealing with Unions and Associations; Industrial Democracy; Grievance Handling and Discipline.

Retirement/Separation -Superannuation, Voluntary Retirement Schemes, Resignation, Discharge-Dismissal -Suspension, Layoff

Practical Exercises

The learners are required to:

1. explain different HR concepts and related terms by way of Class presentation.
2. understand and demonstrate knowledge using Focused group discussion.
3. assess the understanding of theory and practical by objective and subjective assessment (Class test, assignments, MCQs, Fill in the blanks and quiz).
4. analyze the case studies to understand the dynamics of HR functions being used in organizations.

Course Assessment: Internal Assignments/projects/class tests/presentations - 25, Exam - 75

Suggested Readings:

1. Bohlander, G. W., & Snell, S. Principles of human resource management. South-Western/Cengage Learning”; Thomson Publications.
2. Dessler, Gray, Human Resource Management, 11ed., Pearson Education, New Delhi.

Microeconomics for Human Resource Management

DSE 1.3

(4 credits: 3+1 tutorial)

Course Objectives:

This course is designed to expose students to micro economic theory along with their applications with examples. The students will learn some basic principles of microeconomics to understand how to manage human resource efficiently to achieve the objective of a firm.

Course Learning Outcomes:

1. Students will learn to think in terms of economic trade-offs and opportunities as well as learn to apply the fundamentals of market mechanism to real life situations.
2. Students will learn to think how to select different elements of a sound policy for human resource management for more productive use of available human resources.

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|---|-------------------------------------|------|-------|
| Unit 1: Understanding Demand & Supply, Price and resource allocation, Elasticity, Market equilibrium. | 20% | √ | √ |
| Unit 2: Understanding Consumer Behaviour | 20% | √ | √ |
| Unit 3: Understanding Production, Costs and Profit maximization by Firm | 20% | √ | √ |
| Unit 4: Understanding Market structures. | 20% | √ | √ |
| Unit 5: Application of Microeconomics to HRM. | 20% | √ | √ |

Content (Unit-wise):

Unit 1 : Understanding Demand & Supply, Price and resource allocation, Elasticity, Market equilibrium.

Markets and competition; determinants of individual demand/supply; demand/supply schedule and demand/supply curve; market versus individual demand/supply; shifts in the demand/supply curve, determination of equilibrium output and price, how prices allocate resources; elasticity and its application; controls on prices; impact and incidence of indirect taxation.

Unit 2 : Understanding Consumer Behaviour

The consumption decision using Indifference curve analysis-budget constraint, consumption and income/price changes, demand for all other goods and price changes; preferences; consumer's optimum choice; income and substitution effects; labour supply and savings decision; choice between leisure and consumption.

Unit 3 : Understanding Production, Costs and Profit maximization by Firm

Production functions; Laws of production under short and long run, Producer's equilibrium with the help of isoquants and iso-cost line. Expansion path in the long run and short run. Short run and long run costs curves. Economies and diseconomies of scale. Short-run costs and output decisions; costs and output in the long-run, external economies of scale, agglomeration economies.

Unit 4 : Understanding Market structures.

Price and output determination under perfect competition, monopoly, monopolistic markets and oligopolistic market structure in short run and long run, allocative efficiency in perfect competition. Difference between monopoly and different forms of imperfect competition.

Unit 5 :Application of Microeconomics to HRM.

Production function, wages and productivity, wage determination, Efficiency wage, Incentive wage and skill formation, X-efficiency, education and productivity. Case Study of large firms relating HR policy with productivity.

Suggested Readings:

- Case, Karl E. & Ray C. Fair: Principles of Economics, Pearson Education, Inc., latest edition.
- Comanor, W.S. and Leibenstein, H. Allocative Efficiency, X-Efficiency and the Measurement of Welfare Losses, *Economica*, New Series, vol.36, No 143, August, 1969, pp. 304-309
- Farnham, Paul G., Economics for Managers, Pearson, latest edition.

BA (VS) Materials Management

Materials Management: An Overview

DSC: 1.1

Credit 4 (3L+1T)

Objectives: There are following objectives:

1. To introduce conceptual framework of material management and can manage the material management process.
2. To understand both internal and external of material management, material management activities, functions and organizational structure;
3. To familiarize production processes, machines and tools used in industries.
4. To analyze the dynamics of inventory management's principles, concepts, and techniques as they relate to the entire supply chain.
5. To explain familiarize themselves with inventory management practices.
6. To Perform the material handling equipment in the stores.

Learning Outcomes: After completion of the course, Students will be able to

1. define conceptual framework of material management and can manage the material management process.
2. explain both internal and external of material management, material management activities, functions and organizational structure;
3. use and explain production processes, machines and tools used in industries.
4. analyze the dynamics of inventory management's principles, concepts, and techniques as they relate to the entire supply chain.
5. explain familiarize themselves with inventory management practices.
6. Perform the material handling equipment in the stores.

Contents

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--|--|-----------------|------------------|
| Unit 1: Materials Management and Linkages | 25 | √ | √ |
| Unit 2: Materials Planning and Budgeting | 25 | √ | √ |
| Unit 3: Purchasing and Inventory | 25 | √ | √ |
| Unit 4: Materials handling and storage systems | 25 | √ | √ |

*C&K- Comprehension & Knowledge

**A&A – Analysis & Application

Unit1: Materials Management and its linkages

Meaning and Scope, Functions of Materials Management, Objectives and Significance of Materials Management. Interfaces of Materials Management: Internal and external interfaces, Organization of Material Management, Integrated materials management system and its advantages. Linkages with other

functional areas of Management i.e. Production, Accounting and Finance, Marketing, Information Technology, Total Quality Management.

Unit2: Materials Planning and Budgeting

Introduction, Management of Production and Manufacturing, Types of Industries, Manufacturing Planning and Control, Materials Management in Manufacturing and Process Industries , Materials Planning and Budgeting in Continuous Process Industries; Broad categories of production processes used in industries. Productivity plan, commonly used machines and tools in industries.

Unit 3: Purchasing and Inventory

Purchasing in Materials management, system concept, purchasing and procurement activities under Materials management, Value Analysis and value Engineering, Purchasing and quality Assurance, Purchase Cycle, Negotiation & Bargaining , Vendor relations, Purchasing Methods.

Need of Inventory, Types of Inventory, Characteristics of Inventory, Components of Inventory, Inventory Functionality , Some basic tools and techniques of Inventory Management, Planning the Inventory Resource, Material Requirement Planning (MRP), Advantages over conventional planning (Order Point Method) , Input and output of MRP system.

Unit: 4 Materials handling and storage systems

Material handling in stores, Principles of Materials Handling system, Materials Handling Equipment, Safety issues, Physical distribution logistics, physical control of stocks: obsolete, surplus and scrap Management, Layout of stores and warehouse.

Suggested Readings

1. Arnold, Champman and Ramakrishnan, Introduction to Materials Management, Pearson Education, Inc.
2. Dutta A.K., Materials Management: Procedures, Text and cases, Prentice Hall of India Pvt. Ltd., New Delhi.
3. Gopalakrishnan, P. and Sundareson, M., Materials Management: An Integrated Approach, Prentice Hall of India Pvt. Ltd., New Delhi.
4. Pooler Victor H. Purchasing and Supply Management, Creating the Vision, New York, Chapman Hall
5. Shah N.M. An Integrated concept of Materials Management, Indian Institute of Materials Management, Baroda Branch, Baroda.
6. Sharma S.C., Material Management and Materials Handling, Khanna Publishers, New Delhi.
7. Varma, M.M., Essentials of Storekeeping and Purchasing, Sultan Chand and Sons, New Delhi.

Note: The latest edition of the readings may be used.

Assessment methods

- Internal Assessment 25 marks
- Written Theory Exam 75 marks

Keywords: Materials Management, Materials Planning, Productivity plan, Purchase Cycle, MRP

Purchase Management

DSC: 1.2

Credit 4 (3L+1T)

Objective: The objectives of the course are

1. to provide the understanding of different concepts of purchase management;
2. The Course equips the students about purchasing and its systems and procedures.
3. To give understanding of price forecasting,
4. special purchase systems, public buying and online purchasing/buying.

Learning Outcomes: After completion of the course, learners will be able to:

1. explain the conceptual framework of purchase management.
2. perform the procedure for purchase of materials from private and Government sources
3. define special purchase systems and conduct price forecasting for purchasing the material.
4. explain the procedure of online purchasing, government purchasing and its current practices

Course Contents:

| Unit | Unit wise Weightage of Marks (in %) | C&K | A&A |
|--|--|-----|-----|
| Unit-1: Introduction to Purchase Management | 30 | √ | |
| Unit-2: Source and Procedure for purchase | 20 | √ | √ |
| Unit-3: Special Purchase Systems and Price Forecasting | 30 | √ | √ |
| Unit-4: Online and International Purchase | 20 | √ | √ |

Unit 1 Introduction to Purchase Management

Introduction, importance and functions of purchase Department, Organization for purchase function, centralized and decentralized purchasing, objectives of purchasing i.e. 6 R's of purchasing. Buyer- seller Relationship: Importance of good buyer-seller relationship, Relation with supplier-policies and issues in relationship, Ethical issues in purchasing.

Unit 2 Source and Procedure for purchase

Sources of supply: vendor selection and rating, Material specifications, Pre-purchase considerations, standard purchase procedure, post-purchase issues. Standard form used in purchasing like purchase requisition, tender / quotation documents, schedule of quotations, purchase order, follow-up order, cancellation of order, Bill of Materials etc.

Unit 3 Special Purchase Systems and Price Forecasting

Special Purchase Systems and Price Forecasting: (a) Special Purchase Systems: Forward Purchase, Tender purchase, Blanket order, zero stock, Rate contract, Purchases of capital equipment and leasing. (b) Price Forecasting: Price and

pricing impact, price practices, price negotiations hard bargaining and fixing. Purchasing under fluctuating prices, purchasing under uncertainty, Negotiations regarding quality

Unit 4 Online and International Purchase

Online Purchasing: Concept, advantages, procedure of online purchasing and current online purchase practices. International Purchasing: Need for International Purchase, Direct and Indirect Buying, term of payments and Legal-Framework of International Purchasing. The eProcurement System of India

Microeconomics for Materials Management

DSE 1.3

(4 credits: 3+1 tutorial)

Course Objectives:

This course is designed to expose students to micro economic theory along with their applications with examples. The students will learn some basic principles of microeconomics to understand inventory management to cope up with competition or take advantage of market opportunity with a view to maximize gain. This will help retailing business units in their decision making.

Course Learning Outcomes:

1. Students will learn to think in terms of economic trade-offs and opportunities facing a small or medium sized firm, in its attempt to manage inventories optimally
2. Students will also learn how a firm may use inventory management to cope up with competition in the market.

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|---|-------------------------------------|------|-------|
| Unit 1: Understanding Demand & Supply, Price and resource allocation, Elasticity, Market equilibrium. | 20% | √ | √ |
| Unit 2: Understanding Consumer Behaviour | 20% | √ | √ |
| Unit 3: Understanding Production, Costs and Profit maximization by Firm | 20% | √ | √ |
| Unit 4: Understanding Market structures. | 20% | √ | √ |
| Unit 5: Application of Microeconomics to MM. | 20% | √ | √ |

Content (Unit-wise):

Unit 1 : Understanding Demand & Supply, Price and resource allocation, Elasticity, Market equilibrium.

Markets and competition; determinants of individual demand/supply; demand/supply schedule and demand/supply curve; market versus individual demand/supply; shifts in the demand/supply curve, demand and supply together; how prices allocate resources; elasticity and its application; controls on prices; impact and incidence of indirect taxation .

Unit 2 : Understanding Consumer Behaviour

The consumption decision - budget constraint, consumption and income/price changes, demand for all other goods and price changes; preferences; consumer's optimum choice; income and substitution effects; labour supply and savings decision; choice between leisure and consumption.

Unit 3 : Understanding Production, Costs and Profit maximization by Firm

Production functions. Laws of production. Producer's equilibrium with the help of isoquants and iso-cost line. Expansion path in the long run and short run. Short run and long run costs curves. Economies and diseconomies of scale. Short-run costs and output decisions; costs and output in the long-run.

Unit 4 : Understanding Market structures.

Price and output determination under perfect competition, monopoly, monopolistic markets and oligopoly in short run and long run, allocative efficiency in perfect competition. Difference between monopoly and different forms of imperfect competition.

Unit 5:Application of Microeconomics to MM.

Market Structure and inventory management: Feedback Loop, Cut throat Competition, Market Uncertainty, inventory and wind fall gains, Inventory for essential goods - FCI, Temporal and spatial dimension of market for inventories, Inventories for seasonally produced goods - cold storage for potatoes, fruits, etc.

Suggested Readings:

Course Assessment: Assignments/test - 25, Exam - 75

BA (VS) INSURANCE MANAGEMENT

Risk Management & Insurance

DSC- 1

(4 : credits: 3 + 1 tutorial)

Objective: The course aims to provide basic understanding of the concept & classification of risk. The student will understand the process of risk management in detail and how insurance acts as a risk management tool. It covers the special features of insurance, insurance contracts, and the critical role of law of large numbers. This will also act as a stepping-stone for pursuing a higher professional qualification in the fields of risk management and insurance.

Learning Outcomes: After completion of the course, learners will be able to:

1. understand the concept of risk and uncertainty and classify risks, level of risk, and explain the behavioural aspect of risk and economics of insurance.
2. explain insurable and non-insurable risks.
3. analyse the role of risk management and insurance in economic development and as a social security tool.
4. evaluate the managerial functions of risk management and its process and also the working of insurance
5. evaluate the insurance contract as a risk management tool

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--|--|-----------------|------------------|
| Unit 1: Risk & Uncertainty | 25 | √ | √ |
| Unit 2: Risk Management & its managerial aspects | 25 | √ | √ |
| Unit 3: Role of Insurance in managing risk | 25 | √ | √ |
| Unit 4: Insurance contract: An overview | 25 | | |

*Concept & Knowledge ** Analysis & Application

Unit 1: Risk and Uncertainty - 15 Hours

Concepts, causes, degree, classification, and cost. Insurable risk. Risk and economic development. Psychology and attitude towards risk. Managing risk and uncertainty. Cash flow at risk, Value at risk.

Unit 2. Risk management & its managerial aspects - 15 Hours

Risk management-concept, evolution, purpose, scope, importance, and its future. Role of risk management in economic growth. Risk management function. Risk Manager. Managerial Aspects- goals, identification, evaluation, risk response, and plan administration, risk management in a global economy: future perspective

Unit 3. Role of Insurance in managing risk - 15 Hours

Nature, importance, purpose, functions, classification, limitations and production process of insurance. Insurance and Risk, Insurance & Economic development, Insurance as a social

security tool, Determinants of insurance market structure; Re-insurance: meaning, purpose, forms.

Unit 4. Insurance contract: An overview - 15 Hours

Nature & subject matter of insurance and insurance contracts; Salient Features - as per Contract Act, including special features, evidence and supporting documentation; Payment of premium; e-insurance policy; Insurance Repositories

Exercises:

The learners are required to:

1. Organise group discussions in class on risk management techniques (Unit1).
2. Conduct a small survey (physical or online mode) about the popularity and awareness of insurance products as a means of managing risk (Unit3).
3. Evaluate through group discussions the different types of insurance contracts through case studies (Unit4).

Course Assessment: Internal Assignments/projects/class tests/presentations – 25; Exam - 75

Suggested Readings:

1. Arunajatesan S. & T. R. Viswanathan, Risk Management and Insurance, (2009) Macmillan Publishers Ltd.
2. Dorfman S. Mark (2012, 1987) Introduction to Risk Management and Insurance, Eighth Ed, Prentice-Hall.
3. Hampton John J. (1993) Essentials of Risk Management and Insurance, (1993), American Management Association (Amacom).

Statistics for Insurance DSC- 2

(4 credits: 3 + 1 practical)

Objective: The course aims to explain the basic concepts of statistics that are essential building blocks for application and analysis of data pertaining to the insurance industry. The course will explain the relationship between multiple variables and analysis of time series data. The student will be able to evaluate decision making under uncertainty in real life situations & to insurance industry in particular.

Learning Outcomes: After completion of the course, learners will be able to:

1. understand basic statistical concepts and apply them to finding objective solutions to problems in insurance business
2. analyse the relationship between multiple variables and their applications in business analytics, especially in the insurance industry
3. analyse trends with indexing and seasonality in a time series data.
4. Evaluate different statistical techniques and develop analytical thinking skills to solve business/real-life situations.
5. apply the theory of probability in decision making involving the insurance industry and evaluate the usefulness of existing insurance products

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|---|-------------------------------------|------|-------|
| Unit 1: Review of Descriptive Statistics | 20 | √ | √ |
| Unit 2: Correlation & Regression | 30 | √ | √ |
| Unit 3: Time Series and Index numbers | 25 | √ | √ |
| Unit4: Probability and Probability Distribution | 25 | √ | √ |

*Concept & Knowledge ** Analysis & Application

Unit-1 Review of Descriptive Statistics 12 Hours

Data: Types and Sources, quantitative and qualitative, big data and its utility in Business analytics; Measures of central tendency: Mean, Median, Mode; Measures of dispersion: Range, Quartile Deviation, Mean Deviation, Standard Deviation, Variance, Coefficient of Variance, Moments, shape of the distribution- skewness and Kurtosis, estimation of insurable loss and risk measurement relevant in insurance.

Unit 2 Correlation Analysis and Regression – 12 Hours

Correlation and causation, types of correlation - scatter diagram, Karl Pearson correlation, Spearman's Rank correlation; Simple and Multiple regression models, (problems on simple regression only); Standard error of estimate, Tests of significance; correlation and regression analyses with reference to the insurance industry

Unit-3 Analyses of Time Series and Index numbers – 12 Hours

Analyses of Time series: meaning and significance, utility, components of time series,

measurements of trends, methods of least squares, linear and parabolic trend, measurement of seasonal variations; Index numbers: meaning and significance, methods and problems in construction of index numbers with weights and without weights, consumer price index, introduction to stock market index; time series analysis of claims, premia, and other parameters important for the insurance industry; construction of mortality table of life insurance.

Unit-4 Probability - 9 Hours

Concept: expectations, equally likely events, independent events, complementary events; Rules of probability, Random variables, Concept of probability distribution, Theoretical probability distributions: Binomial, Poisson, Normal curve & empirical rule; introduction to sampling and Central limit theorem; application of probability in insurance.

Teaching- Learning

Practical Exercises:- 30 Hours

1. Students are expected to examine the popularity of life and non-life insurance products through descriptive statistics (Unit1).
2. Students shall be encouraged to engage in primary research to study correlations between demographics and choice of insurance products (Unit2).
3. Students shall be encouraged to analyse time series data on insurance for public and private sectors (Unit3)
4. Students shall be encouraged to apply the concept of probability to simulation of risk (Unit4).

Course Assessment: Internal Assignments/projects/class tests/presentations - 25, Exam - 75
Suggested Reading:

Microeconomics for Insurance

DSC- 3

(4 credits: 3 + 1 tutorial)

Objective: The course aims to expose students of insurance to micro economic theory and its applications for insurance industry. It covers basic principles such as decision making by consumers and producers, interactions of supply and demand with reference to insurance industry, characteristics of perfect and imperfect markets, market failure, role of information and decision making under uncertainty that are essential to understand the field of insurance. It will help students understand fundamental economic trade-offs and allocation problems. The course uses illustrations, graphical methods and numerical problems to explain the application of microeconomic concepts to real-life situations of the insurance market. This will develop wider appreciation and provide an enriched perspective to a student studying the Insurance vocation.

Learning Outcomes: After completion of the course, learners will be able to:

1. explain the concepts of economic trade-offs and opportunities in insurance
2. apply the fundamentals of market mechanisms to real situations in the economy in general and to insurance markets in particular.
3. analyse how markets work and why they fail
4. evaluate the role of information in creation of asset markets (insurance).

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--|--|-----------------|------------------|
| Unit 1: Demand & supply, Price & resource allocation, Elasticity, Market equilibrium | 20 | √ | √ |
| Unit 2: Consumer behaviour | 25 | √ | √ |
| Unit 3: Production, Costs, Profit maximisation by firms | 25 | √ | √ |
| Unit 4: Market structures, market failure and role of information | 30 | √ | √ |

*Concept & Knowledge ** Analysis & Application

Unit 1: Demand & Supply with special reference to insurance markets, Price and resource allocation, Elasticity, Market equilibrium – 15 Hours

Markets and competition; determinants of individual demand/supply; demand/supply schedule and demand/supply curve (with special reference to Insurance, including health insurance, corporatisation) ; market versus individual demand/supply; shifts in the demand/supply curve, demand and supply together; how prices allocate resources; elasticity and its application; controls on prices; taxes and the costs of taxation; consumer surplus; producer surplus and the efficiency of the markets, markets and welfare, market failure and government failure.

Unit 2. Consumer Behaviour and choosing insurance – 15 Hours

The consumption decision - budget constraint, consumption and income/price changes, demand for all other goods and price changes; preferences; consumer's optimum choice; income and substitution effects; labour supply and savings decision; choice between leisure and

consumption, Decision making under uncertainty, risk, moral hazard, adverse selection, bounded rationality

Unit 3. Production, Costs and Profit maximization by an insurance Firm - 15 Hours

Production functions. Laws of production. Producer's equilibrium with the help of isoquants and iso-cost line. Expansion path in the long run and short run. Short run and long run costs curves. Economies and diseconomies of scale. Short-run costs and output decisions; costs and output in the long-run.

Unit 4. Market structures, Market failure and Role of information and working of insurance markets – 15 Hours

Perfect competition, monopoly, monopolistic markets, Price discrimination under monopoly, equilibrium in short run and long run, allocative efficiency in perfect competition. Difference between monopoly and perfect competition. Sources of Market Failure and corrective measures, Insurance Markets with asymmetric information.

Exercises:

The learners are required to:

1. engage in a group project dealing with consumer demand for insurance products (Unit1).
2. conduct classroom discussions on the efficacy of insurance products for the poor by the government (Unit4)
3. study in small groups and analyse the costs involved, profitability and benefits of compulsory group insurance schemes offered by the government or private sector employers (Unit4)

Course Assessment: Internal Assignments/projects/class tests/presentations - 25, Exam - 75

Suggested Readings:

1. Bannerjee P. "Finance and Health" in Biswas, P.K. and Das P. (eds.) Indian economy; Reforms and Development – Essays in honour of Manoj Kumar Sanyal 2019, Springer, Singapore.

BACHELOR OF ARTS (VS) MODERN OFFICE MANAGEMENT
MODERN OFFICE MANAGEMENT
DSC 1.1-(MOM)

Marks: 100

Credits: 4

(Theory = 75, Internal Assessment = 25)

Objective: The aim of the paper is to acquaint the students with modern office and its management. The knowledge and the skills acquired by students through this would help them to manage the modern office effectively and efficiently as office managers, executives or personal secretaries

Learning Outcomes: After completion of the course, learners will be able to:

1. examine the nature and functions of conventional office, modern office, paperless office, automated and virtual office.
2. develop an understanding about the functions of modern office, office manager and office management process.
3. describe the procedure of procurement and maintenance of office stationery and supplies.
4. explain the importance of location of office, its safety and security measures.
5. create the modern system of maintenance of official records.

Course Contents:

| Unit | Unit weightage wise of marks (in %) | C&K* | A&A** |
|--|-------------------------------------|------|-------|
| Unit 1: Office and its Functions | 30 | √ | √ |
| Unit 2: Management of Office | 20 | √ | √ |
| Unit 3: Location and environment | 20 | √ | √ |
| Unit 4: Office Stationery, Supplies & Office records | 30 | √ | √ |

*C&K- Comprehension & Knowledge

**A&A – Analysis & Application

Unit 1:- 15 Hours

Office and its functions: Meaning, importance and requisites of a modern office. Relation of office with other departments. Front office and back office operations. Types of offices: Corporate, Head, Circle, Zone, Branch, Divisional.

Changing office Scenarios; Concept of Paperless office, Automated office, Virtual office, Green Office, Open and Private Office, Work from home, Co-working space

Unit 2: - 15 Hours

Management of office: Meaning, Objectives and Principles of modern office Management Office hierarchy, Development of office Practices, Office routines, Office manual. Qualifications, Skills, Experience required for an office Manager, Duties of an office Manager.

Unit 3: 15 Hours

Location and Environment: Office building and its location, factors affecting choice of location, Importance of location.

Infrastructure safety and security, office hazards. Office layout; new trends in office layout, Working Environment in office, Home environment at work, flexible working hours

Unit 4: 15 Hours

Office Stationery, Supplies & Office records:

Office Stationery &Supplies: Importance, Storage, Issue and Control.

Purchase Procedures, Online Procurement; E-tender, Governments E- Market Place (GEM)

Office forms, types of forms, design of forms and control of form

Office records: Types of records, Importance and Principles of Record keeping, Handling and Supervision of records, records preservation, Time frame of preservation of records.

Filing; Meaning, importance, essentials of a good filing system. Modern system of maintenance of official records, centralized and decentralized filing, Computerized filing system.

Indexing: Meaning, importance, types of indexing system.

Exercises:

The learners are required to:

1. Visit the administrative office of the College, Government Office or Private Office.
2. Observe the Office Building, ventilation and layout of the building.
3. study the process of procurement of office supplies, stationery used in a modern office
4. Observe and experience the type and use of communication system, furniture and office machines.
5. Interact with the Office Managers and make a list of their duties and responsibilities and create the modern system of maintenance of official records.

FUNDAMENTALS OF SECRETARIAL PRACTICE

DSC 1.2-(MOM)

Course Objective:

The main objective is to familiarize the students with the activities of a modern office, role of a private Secretary in offices. The course helps the students to acquire essential skills in handling various office processes and operations.

Learning Outcomes: After completion of the course, learners will be able to:

1. Explain the role of private secretary in a business organisation.
2. Apply acquired skills in handling public relations.
3. Learn the process of developing organisational structure and will also understand to execute managerial functions performed in a business organisation.
4. The course will help the learner to manage travel arrangements and duties of the secretary before, during and after the meetings and handling inward and outward mail service.
5. Learn to maintain petty cash account, doing basic banking services and other jobs in the business world as an effective and efficient private secretary.

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--|--|-----------------|------------------|
| Unit 1: Secretary | 25 | √ | √ |
| Unit 2: Travel arrangements | 25 | √ | √ |
| Unit 3: Meetings and conferences | 25 | √ | √ |
| Unit 4: Handling of Mail, Petty cash and Bank Services | 25 | √ | √ |

*C&K- Comprehension & Knowledge

**A&A – Analysis & Application

Unit 1: Secretary - 15 Hours

Meaning of Secretary, types of Secretaries, importance of Secretary, qualifications and qualities of Secretary, duties of a Secretary, changing profile of the Secretary.

Public relations- client facing roles, attending phone calls, management of appointments. Handling and screening visitors, visitors register.

Unit 2: Travel arrangements- 15 Hours

Making itinerary, reservations -travel and hotel. Classification of hotels. Modes of travel, Travel outside the country. Selection of travel agencies. Booking sites.

Unit 3: Meetings and conferences – 15 Hours

Meaning and purpose of meetings, types of meetings, preparation for meetings. Notice, Agenda, Quorum, Minutes of meetings, Duties of Secretary before, during and after a meeting. Additional terms used in meetings. Role of Chairman.

Use of multi-media, video conferencing, virtual meetings. Preparation of reports.

Unit 4: Handling of Mail, Petty cash and Bank Services – 15 Hours

Handling of Mail: Meaning of Mail, E-mail and Physical Mail, Voice mail. Inward Mail and Outward Mail, Mail routines. Inter-Departmental Mail, Mechanizing of Mail Services, Services provided by Courier Companies. Use of Modern technology and Office Communication.

Petty Cash and Bank Services

Meaning of petty cash, handling petty cash, maintaining record of petty expenses.

Types of bank accounts, Opening and operation of bank account. Other bank services. Use of credit card, debit card and net banking.

BUSINESS ORGANISATION AND MANAGEMENT
DSC 1.3-(MOM) [BC: DSC- 1.1]

Objective: The course aims to develop an understanding about business organisations, functions and challenges of management and contemporary issues in management.

Learning Outcomes: After completion of the course, learners will be able to:

1. explain the dynamics of business organisations and recent management practices.
2. describe varied perspectives related to business environment and entrepreneurship.
3. analyse how the organisations adapt to an uncertain environment and decipher decision making techniques.
4. analyse the relationship amongst functions of management *i.e.* planning, organizing, directing and controlling.
5. analyse the change in working pattern of modern organisations.

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--|-------------------------------------|------|-------|
| Unit 1: Introduction | 20 | √ | √ |
| Unit 2: Business Environment and Entrepreneurship | 20 | √ | √ |
| Unit 3: Planning and Organizing | 20 | √ | √ |
| Unit 4: Directing and Controlling | 20 | √ | √ |
| Unit 5: Salient Developments and Contemporary Issues in Management | 20 | √ | √ |

*C&K- Comprehension & Knowledge

**A&A – Analysis & Application

Unit 1: Introduction – 12 Hours

Role of organisations and management in our lives; Nature and Functions of Management (An overview); Managerial Competencies, Ownership forms; Business formats- Brick & Mortar; Click; Brick & Click; E-commerce; Franchising; Outsourcing

Unit 2: Business Environment and Entrepreneurship - 12 Hours

Meaning and layers of Business Environment (micro/immediate, meso/intermediate, macro and international); Business ethics and social responsibility; Entrepreneurship and its relevance, Business and social entrepreneurship as a process of opportunity/problem; Micro, small and medium Enterprises; Government Policy regarding MSMEs

Unit 3: Planning and Organizing - 12 Hours

Strategic Planning – Business and Corporate Level Strategies; Decision-making- process and techniques; Organizing, Formal and Informal Organisations, Centralisation and Decentralisation, Organisational structures – Divisional, Product, Matrix, Project and Virtual Organisation

Unit 4: Directing and Controlling – 12 Hours

Motivation- needs (including Maslow's theory), incentives, Equity and two factor theory (Herzberg); McGregor Theory X and Theory Y; Leadership – Leadership Styles, Transactional Vs. Transformational Leadership; Followership – meaning, importance and Kelley's Followership Model; Communication – New trends and directions (Role of IT and social media); Controlling –Techniques of Controlling Relationship between planning and controlling

Unit 5: Salient Developments and Contemporary Issues in Management - 12 Hours

Business Process Reengineering (BPR), Learning Organisation, Six Sigma, Supply Chain Management, Subaltern Management Ideas from India; Diversity & inclusion; Work life Balance; Freelancing; Flexi-time and work from home; Co-sharing/co-working.

Exercises:

The learners are required to:

1. complete the exercise wherein they are given different situations and scenarios to start their own business (in terms of capital, liability, scale of operations, etc.) and are asked to select the most suitable form of business and justify the same highlighting the advantages and disadvantages of their choice.
2. participate in role play activity for describing the various levels of Management and competencies.
3. each learner is required to identify various elements affecting the business environment and conduct SWOT analysis for the company identified.
4. participate in simulation activity wherein each learner is asked to prepare strategic plans with respect to increasing the effectiveness in their respective organisation.
5. present a role play on bounded rationality or on any aspect of decision making.
6. create a simulation exercise in class to demonstrate various types of authority, delegation, and decentralization of authority.
7. using Maslow's Need-Hierarchy Theory, analyse various needs and prepare a report.
8. demonstrate various types of Leadership Styles in the form of Role Play by identifying real life leaders from the corporate world.

B.A. (VS) Marketing Management and Retail Business

DSC 1.1

Marketing Management-I

Core Discipline - (CD) Credit: 4

Duration: 3 hours

Marks: 100

Objective:

1. To provide the basic knowledge of different concepts of marketing
2. To make the students acquainted with various environments affecting marketing decisions
3. To enable the students to learn the methods of product life cycle and pricing.
4. To aware students about latest issues and developments in marketing

Learning Outcomes: After completion of the course, learners will be able to:

1. Classify marketing environment and how to use market segmentation
2. Interpret product life cycle and pricing strategies in their day to day life.
3. appraise the role of promotion in marketing.
4. Identify issues and developments in marketing

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--|--|-----------------|------------------|
| Unit 1: Introduction | 25% | √ | √ |
| Unit 2: Marketing Environment and Segmentation | 30% | √ | √ |
| Unit 3: Product Life Cycle and Pricing | 25% | √ | √ |
| Unit 4: Promotion, Issues and Developments in Marketing | 20% | √ | √ |

*C&K- Comprehension & Knowledge

**A&A – Analysis & Application

UNIT-I Introduction: 15 Hours

Evolution of Marketing concepts, meaning, nature, scope and importance of marketing, Core Concept of Marketing - Need, Want, Demand, Value and Satisfaction, Features of Marketing, Selling Vs Marketing, traditional and modern concept of marketing. Functions of marketing, Marketing Mix – The elements of marketing mix, Approaches to the study of marketing and economic development, holistic Marketing concept

UNIT-II Marketing Environment and Segmentation: 15 Hours

Definition, Types and Components of Marketing (Micro and Macro) Need & trends in the Macro environment – Demographic, Economic Natural, Technological, Political, Legal, and Cultural

environment) Market Segmentation: Concept, Importance, and Bases. Requisites of sound marketing segmentation Market Positioning: Concept & Importance, Market Repositioning. Product Differentiation Vs Market Segmentation,

Unit III Product Life Cycle and Pricing: 15 Hours

Product Life Cycle concept and process, New Product Development process, Concept of Market Targeting and Positioning; Undifferentiated marketing – Concentrated marketing; Price- concept, meaning and objectives, price determination, factors influencing pricing policy, method of pricing policies and strategies

Unit IV Promotion, Issues and Developments in Marketing: 15 Hours

Promotion – Advertising – Personal Selling – Sales Promotion – Publicity; Contemporary Issues in Marketing; Social, ethical and legal aspects of marketing; Marketing of services; International marketing; Cyber marketing; Green Marketing, Relationship marketing and other developments of marketing

Exercises:

1. you are the marketing manager of a firm producing motorcycle. On what basis will you segment the market? Outline a marketing program for these segments while highlighting how these programs vary from one segment to the other. **(Unit 2)**
2. compare the pricing strategy used by recently launched products. **(Unit 3)**
3. conduct a field survey to analyse the marketing segmentation strategy of a product of your choice. **(Unit 3)**
4. prepare a marketing mix strategy for promoting electric cars in India and present the same justifying the reasons thereof. **(Unit 1, 4)**
5. through a role play imagine you are appointed as a salesperson to market a newly launched product of your choice (high involvement and low involvement product). What steps will you undertake in developing a new product? **(Unit 1)**

B.A. (VS) Marketing Management and Retail Business

DSC 1.2

Fundamental of Management and Retailing

Core Discipline - (CD) Credit: 4

Duration: 3 hours

Marks: 100

Objective:

1. To Acquaint the Students with the Fundamentals of Managing Business.
2. To provide basic understanding of retail business, and familiarize with the changing retail environment.
3. To adopt various retailing strategies and make aware of the various types of retail structure.

Learning Outcomes: After completion of the course, learners will be able to:

1. describe evolution of management and its significance and analyze how organisations adapt and changes in organisation structures over time.
2. assess the role of organisation and direction in business understand the function of controlling and contemporary issues in management
3. create an inclusive perspective on the background of retail management
4. acquire a conceptualized framework to classify and analyse the retail business structure.

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|---|--|-----------------|------------------|
| Unit 1: Introduction to Management | 25% | √ | √ |
| Unit 2: Planning Organizing, Directing and Controlling | 25% | √ | √ |
| Unit 3: Retailing | 25% | √ | √ |
| Unit 4: Retailing Structure | 25% | √ | √ |

*C&K- Comprehension & Knowledge

**A&A – Analysis & Application

Unit 1: Introduction to Management – 15 Hours

Principles of management - concept, nature and significance; Evolution of Management thought: Classical (Fayol's principles of management; Taylor's scientific management), Neoclassical (Hawthorne Experiments), Modern approach (Systems Approach; Contingency Approach). Coordination - concept, characteristics and importance; Functional areas of management – an overview.

Unit 2: Planning Organizing, Directing and Controlling – 15 Hours

Planning- concept and meaning, strategic and operations planning; Decision-making, Organisational structures- traditional and modern; Factors affecting organisational design, Concept and theories of Motivation- Maslow's need hierarchy, Herzberg's two-factor theory, Theory X&Y; leadership; Communication- meaning and importance. Principles of Controlling, performing controlling function; Management challenges of the 21st Century; Century

Unit 3: Retailing – 15 Hours

Retailing: Concept, Scope function and importance of Retail Management, Evolution of Indian Retail Industry, Theories of Retail Development (Wheel of Retailing, Retail Accordation, Melting Pot Theory, Polarization Theory). Retail Environment in India, Changing Scenario of Retail Business in India Fluctuations in Retail Industry, Dealing with recession in retail industry

Unit 4: Retailing Structure – 15 Hours

Environment & competition, Competitive Environment in different Retail Sectors, Govt. Policies in Retail Sectors, Changes in consumer spending, Impact of economic fluctuation on retailing industry. Know Your Customers: Focusing on the consumer, mapping out society: Psychographics, Postmodern Consumers, Learning Attitudes, Motivation and Perception, Modeling Consumer Behavior, Contemporary Issues in Retail Management
Exercises:

The learners are required to:

1. assess the applicability of managerial theories in today's corporate world. **(Unit 1)**
2. demonstrate the use of managerial functions in organizing an event **(Unit 1)**
3. prepare a comparative analysis of organization structures of various companies. **(Unit 2)**
4. discuss the impact of emerging issues in management. **(Unit 4)**
5. using Maslow's Need-Hierarchy Theory, analyse various needs and prepare a report. **(Unit 2)**
6. prepare an experiential report on the use of vending machines in a retail format of your choice. **(Unit 3)**
7. haats are popular not only in rural India, but in urban areas too. Conduct a study on the effectiveness of their location and visual merchandising display strategy that they have adopted. **(Unit 4)**
8. study the layout, merchandising and display of any store-based retail format. **(Unit 3)**

Suggested Readings:

5. Newman, A.J., & Cullen, P. (2002). Retailing Environment; Operations. New Delhi: Cengage Learning India Private Limited.
6. Vedamani, G. G. (2008). Retail management. Jaico, Ed. 3rd.

B.A. (VS) Marketing Management and Retail Business**DSC 1.3****Microeconomics for Retailing Business****Core Discipline - (CD)****Duration: 3 hours****Credit: 4****Marks: 100****Course Objectives:**

This course is designed to expose students to micro economic theory along with their applications with examples. The students will learn some basic principles of microeconomics to understand functioning of different kinds of market structure. This will help retailing business units in their decision making.

Course Learning Outcomes:

1. Students will learn to think in terms of economic trade-offs and opportunities facing a retail business unit.
2. Students will also learn to apply the fundamentals of market mechanism to real life situations confronting a retail business unit

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--|--|-----------------|------------------|
| Unit 1: Understanding Demand & Supply, Price and resource allocation, Elasticity, Market equilibrium. | 20% | √ | √ |
| Unit 2: Understanding Consumer Behaviour | 20% | √ | √ |
| Unit 3: Understanding Production, Costs and Profit maximization by Firm | 20% | √ | √ |
| Unit 4: Understanding Market Structures | 20% | √ | √ |
| Unit 5: Application of Microeconomics to MMRB | 20% | √ | √ |

Content (Unit-wise):

Unit 1: Understanding Demand & Supply, Price and resource allocation, Elasticity, Market equilibrium - 12 Hours

Markets and competition; determinants of individual demand/supply; demand/supply schedule and demand/supply curve; market versus individual demand/supply; shifts in the demand/supply curve, demand and supply together; how prices allocate resources; elasticity and its application; controls on prices; impact and incidence of indirect taxation.

Unit 2 : Understanding Consumer Behaviour – 12 Hours

The consumption decision - budget constraint, consumption and income/price changes, demand for all other goods and price changes; preferences; consumer's optimum choice; income and substitution effects; labour supply and savings decision; choice between leisure and consumption.

Unit 3 : Understanding Production, Costs and Profit maximization by Firm - 12 Hours

Production functions. Laws of production, Producer's equilibrium with the help of isoquants and iso-cost line, Expansion path in the long run and short run Short run and long run costs curves. Economies and diseconomies of scale Short-run costs and output decisions; costs and output in the long-run

Unit 4: Understanding Market structures – 12 Hours

Price and output determination under perfect competition, monopoly, monopolistic markets and oligopoly in short run and long run, allocative efficiency in perfect competition. Difference between monopoly and different forms of imperfect competition

Unit 5: Application of Microeconomics to MMRB – 12 Hours

Traditional retailing versus corporate multibrand retailing, market structures; Competition, monopoly, monopsony, Waterbed effects, price flexing, case study of Shoppers Stop versus local retailing.

Suggested Readings:

1. Biswas,P.K. "Corporate Retailing in the Advanced Countries: Some Salient Features", in Das, Mausumi, Sabyasachi Kar and Nandan Nawn (eds.) Economic challenges for the contemporary world: essays in honour of Prabhat Patnaik, Sage Publications, New Delhi, 2016.

B.A. (VS) Tourism Management

Paper: TM 1.1 Basics of Tourism

Core - (DSC)

(4: credits: 3 + 1 tutorial)

Course Objective

The aim of this course is to develop the understanding of various concepts, and terminology used in travel and tourism this will help students in acquiring both theoretical and practical knowledge. To acquaint students with the selected issues those currently influence the tourism industry both locally and globally. The course is designed in a manner that trains the students by imparting skills that are mandatory in travel and tourism industry.

Course Learning Outcomes

After completing this course, the learners would be able to:

1. Demonstrate the concepts, typology and forms of tourism from the management, marketing and financial perspective.
2. Understand the structure and linkages of the travel and tourism industry.
3. To describe the tourism products, issues of tourist and host relation and community participation in the tourism development. Students will be able to understand the importance of guest and host relationship for the development of tourism.
4. Know the demand and supply characteristics of tourism and also explain the different motivational theories related to tourism. They will be able to forecast and measure the demand and supply for the tourism industry.

Course Contents

| Unit | Unit wise weightage of marks (in %) | C & K* | A & A** |
|---|-------------------------------------|--------|---------|
| Unit I: Definitions, concepts and typology of Tourism | 25 | √ | √ |
| Unit-II: Components of Tourism and Industry linkages | 25 | √ | √ |
| Unit III: Tourism Products and Determinants- | 25 | √ | √ |
| Unit IV: Demand and Supply in the Tourism Industry | 25 | √ | √ |

*C & K- Comprehension & Knowledge

**A & A – Analysis & Application

Unit-I

Definitions, concepts and typology of Tourism – Meaning, Definition and concept of tourism, Leisure and Recreation, Business tourism, VFR, Mass tourism, Adventure tourism, Sports tourism, Rural tourism, Tourism education, Forms and typology of tourism, Tourists and typologies of tourists, Difference between visitors, tourists and excursionist.

Unit-II

Components of Tourism and Industry linkages- Basic Components of Tourism - Attractions, Activities, Accessibility, Accommodation, Facilities & Amenities, Tourism as an industry & its linkage- Direct, Indirect and support services.

Unit-III

Tourism Products and Determinants- Determinants of tourism, Difference between Travel and Tourism, Holiday, Sightseeing, Tourism Products- definition and characteristics, Tourist host relationship, Community participation in tourism development.

Unit-IV

Demand and Supply in the Tourism Industry- Demand- Supply Characteristics, Concepts, Definition and indicators of demand, Measuring demand for tourism, International and Domestic tourism, Technological progress and Globalization, Concept and Resources for Ecotourism, Motivation for tourism.

Practical Exercises

The learners are required to:

1. Explain relevant concepts by way of Class presentation.
2. Understand and discuss different Tourism Management concept and function using Focused group discussion.
3. Assess the understanding of theory and practical by objective and subjective assessment (Class test, assignments, MCQs, Fill in the blanks and quiz).
4. Analyze the case studies to understand the dynamics of Tourism Management functions.

Course Assessment: Internal Assignments/projects/class tests/presentations – 25; Exam - 75

Suggested Readings:

1. Burkart, A.J & Heinemann Medlik, Tourism: Past. Present and Future, Professional Publishing, London, 1986 reprint.
2. Mill, Robert, The Tourism System: An Introductory Text, Hall International, London, 1992.
3. Kamra, Krishan, Basics of Tourism: Theory, Operation, Kanishka Publishers, New Delhi, 2002.
4. Bhatia, A.K. International Tourism Marketing, Sterling, New Delhi, 2008.
5. Dr. S. K. Kabia-Tourism and Environment.
6. Wahab, S.E. Tourism Management, Tourism International Press, London, 1986.
7. Dr. Jasbir Singh, Eco-Tourism, I.K. International Publishing, New Delhi, 2010.
8. Sunetra Rodey, Tourism Operations and Management, Oxford Publication, 2021

Note: Latest edition of the readings may be used.

B.A. (VS) Tourism Management
Semester I
Paper: DSC 1.2
Business Organization and Management
Core - (DSC)

(4: credits: 3 + 1 tutorial)

Course Objective:

The course aims to develop an understanding about business organisations, functions and challenges of management and contemporary issues in management.

Learning Outcomes: After completion of the course, learners will be able to:

1. Explain the dynamics of business organizations and recent management practices.
2. Describe varied perspectives related to business environment and entrepreneurship.
3. Analyze how the organizations adapt to an uncertain environment and decipher decision making techniques.
4. Analyze the relationship amongst functions of management *i.e.*, planning, organizing, directing and controlling.
5. Analyze the change in working pattern of modern organizations.

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--|--|-----------------|------------------|
| Unit I: Introduction | 20 | √ | √ |
| Unit II: Business Environment and Entrepreneurship | 30 | √ | √ |
| Unit III: Planning and Organizing | 20 | √ | √ |
| Unit IV: Directing and Controlling and Contemporary Issues in Management | 30 | √ | √ |

*C & K- Comprehension & Knowledge

**A & A – Analysis & Application

Unit 1: Introduction

Role of organizations and management in our lives; Nature and Functions of Management (An overview); Managerial Competencies, Ownership forms; Business formats- Brick & Mortar; Click; Brick & Click; E-commerce; Franchising; Outsourcing

Unit 2: Business Environment and Entrepreneurship

Meaning and layers of Business Environment (micro/immediate, meso/intermediate, macro and international); Business ethics and social responsibility; Entrepreneurship and its relevance, Business and social entrepreneurship as a process of opportunity/problem; Micro, small and medium Enterprises; Government Policy regarding MSMEs

Unit 3: Planning and Organizing

Strategic Planning – Business and Corporate Level Strategies; Decision-making- process and techniques; Organizing, Formal and Informal Organizations, Centralization and Decentralization, Organizational structures – Divisional, Product, Matrix, Project and Virtual Organization.

Unit 4: Directing, Controlling and Contemporary Issues in Management

Motivation- needs (including Maslow's theory), incentives, Equity and two factor theory (Herzberg); McGregor Theory X and Theory Y; Leadership – Leadership Styles, Transactional Vs. Transformational Leadership; Followership – meaning, importance and Kelley's Followership Model; Communication – New trends and directions (Role of IT and social media); Controlling – Techniques of Controlling Relationship between planning and controlling. Six Sigma, Supply Chain Management, Subaltern Management Ideas from India; Diversity & inclusion; Work life Balance; Freelancing; Flexi-time.

Practical Exercises:

The learners are required to:

1. Complete the exercise wherein they are given different situations and scenarios to start their own business (in terms of capital, liability, scale of operations, etc.) and are asked to select the most suitable form of business and justify the same highlighting the advantages and disadvantages of their choice.
2. Participate in role play activity for describing the various levels of Management and competencies.

3. Each learner is required to identify various elements affecting the business environment and conduct SWOT analysis for the company identified.
4. Participate in simulation activity wherein each learner is asked to prepare strategic plans with respect to increasing the effectiveness in their respective organization.
5. Present a role play on bounded rationality or on any aspect of decision making.
6. Create a simulation exercise in class to demonstrate various types of authority, delegation, and decentralization of authority.
7. Using Maslow's Need-Hierarchy Theory, analyze various needs and prepare a report.
8. Demonstrate various types of Leadership Styles in the form of Role Play by identifying real life leaders from the corporate world.

Suggested Readings

1. Basu, C. (2017). *Business Organization and Management*. McGraw Hill Education.
2. Chhabra, T. N. *Business Organization and Management*. Sun India Publications. New Delhi.
3. Drucker, P. F. (1954). *The Practice of Management*. New York: Harper & Row.
4. Kaul, V. K. (2012). *Business Organization Management*. Pearson Education.
5. Koontz, H., & Weihrich, H. (2012). *Essentials of Management: An International and Leadership Perspective*. Paperback.
6. Singh, B. P., & Singh, A. K. *Essentials of Management*. New Delhi. Excel Books Pvt. Ltd.

Note: Latest edition of the readings may be used.

B.A. (VS) Tourism Management

Paper: DSC 1.3 Evolution of Tourism

Core - (DSC MINOR)

(4: credits: 3 + 1 tutorial)

Course Objectives-

The aim of this course to acquaint students with the understanding perceptions of people and the world. The course will develop the concepts of motivation and determinants of travel, tourism, holiday and leisure in tourism historicity. It focuses in understand the evolution of diverse cultural milieu and traditions in the ancient and medieval world and their impact on tourism practices and products.

Course Learning Outcomes

After completing this course, the learners would be able to:

1. Explain the chronological evolution of tourism. This knowledge will give them insights into the functioning of the Tourism sector in the contemporary world and society.
2. Explain the development of various traditions, practices and pilgrimages and would enable the students to understand the cultural root of the development of modern sport tourism as well.
3. Demonstrate organizing capability and virtues required to lead the group and organization in an effective and efficient manner.
4. Explain the critical analysis of the historical events and narratives. Students would be able to find the job opportunity in the field of cultural studies & practices.

Course Contents

| Unit | Unit wise weightage of marks (in %) | C & K* | A & A** |
|--|--|-------------------|--------------------|
| Unit I: Evolution of Tourism as a new discipline | 25 | √ | √ |
| Unit II: Development of Tourism in Modern Age | 25 | √ | √ |

| | | | |
|--|----|---|---|
| Unit III: Idea of Tourism as a cultural practice Ancient Civilizations | 25 | √ | √ |
| Unit IV: Concept of Discovery and Touristic Patterns- | 25 | √ | √ |

*C & K- Comprehension & Knowledge

**A & A – Analysis & Application

Unit- I

Evolution of Tourism as a new discipline- Evolution of Tourism as an academic subject, Tourism and other social sciences. Methodology for Evolution of Tourism. Primary and

Secondary sources for studying Evolution of Tourism, Chronological Division of Evolution of Tourism, Travellers and Travelogues of Ancient and Medieval world -Megasthenes, Hsuan Tsang, Ibn Battuta and Marco Polo.

Unit-II

Development of Tourism in Modern Age

Major Socio-Cultural Processes and Development of Tourism in Modern Age, Sea Voyages, Vasco De Gama and Columbus, Renaissance, Grand Tours, Reformation, French Revolution, Industrial Revolution, Imperialism, Nationalism and National Movements in Asia (including Japan) Socialism and growth of Tourism in the modern period.

Unit-III

Idea of Tourism as a cultural practice Ancient Civilizations -Social- Economic conditions and Tourism: Egypt, Mesopotamia, India, China, Rome, Greece (case studies of Giza, Ziggurat of Ur, Sanchi, Terracotta army of Shaanxi, Rome and Athens).

Medieval Civilizations

Rise and fall of early empires, Byzantine, Christian and Islamic Civilizations. Tourism activity in the ancient and medieval world, Seven Wonders of the ancient and medieval World, Pilgrimage (Hindu, Buddhist, Jain, Christian and Islamic), Tourism and Spectator Sports (Olympics, chariot races and gladiator fights), Resorts and Spas, Royal Tourism and Educational tours.

Unit-IV

Concept of Discovery and Touristic Patterns-

Urbanization- Rome and Varanasi, interlinking of politics, religion, trade, entertainment and tourism. Trade Routes- Silk Route, Spice Route and Incense Route. Cultural Interactions, Diffusion and experimentation, Birth of new art forms, music, Theatre and Sculpture.

Practical Exercises

The learners are required to:

1. Explain evolution of tourism through historical perspective by way of Class presentation.
2. Assess the understanding of theory and practical by objective and subjective assessment (Class test, assignments, MCQs, Fill in the blanks and quiz).

Course Assessment: Internal Assignments/projects/class tests/presentations – 25; Exam – 75

Add the following:

Syllabi of Semester-I of the following departments under Faculty of Mathematical Sciences based on Under Graduate Curriculum Framework -2022 to be implemented from the Academic Year 2022-23.

FACULTY OF MATHEMATICAL SCIENCES

DEPARTMENT OF MATHEMATICS

B.SC. (H) MATHEMATICS

Category-I

DISCIPLINE SPECIFIC CORE COURSE – 1: ALGEBRA

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Algebra | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | Nil |

Learning Objectives

The primary objective of this course is to introduce:

- The basic tools of theory of equations, number theory, and group theory.
- Symmetry group of a plane figure, basic concepts of cyclic groups.
- Classification of subgroups of cyclic groups.

Learning Outcomes:

This course will enable the students to:

- Determine number of positive/negative real roots of a real polynomial.

- Solve cubic and quartic polynomial equations with special condition on roots and in general.
- Employ De-Moivre's theorem in a number of applications to solve numerical problems.
- Use modular arithmetic and basic properties of congruences.
- Recognize the algebraic structure, namely groups, and classify subgroups of cyclic groups.

SYLLABUS OF DSC-1

Theory

Unit – 1 (24 hours)

Theory of Equations and Complex Numbers

General properties of polynomials and equations, Fundamental theorem of algebra, Relations between the roots and the coefficients, Upper bounds for the real roots; Theorems on imaginary, integral and rational roots; Newton's method for integral roots, Descartes' rule of signs; De-Moivre's theorem for integer and rational indices and their applications, The n th roots of unity, Cardan's solution of the cubic, Descartes' solution of the quartic equation.

Unit – 2 (16 hours)

Basic Number Theory

Division algorithm in \mathbb{Z} , Divisibility and the Euclidean algorithm, Fundamental theorem of arithmetic, Modular arithmetic and basic properties of congruences.

Unit – 3 (20 hours)

Basics of Group Theory

Groups, Basic properties, Symmetries of a square, Dihedral group, Order of a group, Order of an element, Subgroups, Center of a group, Centralizer of an element, Cyclic groups and properties, Generators of a cyclic group, Classification of subgroups of cyclic groups.

Practical component (if any) - NIL

Essential Readings

1. Andreescu, Titu & Andrica, D. (2014). Complex numbers from A to...Z. (2nd ed.). Birkhäuser.
2. Dickson, Leonard Eugene (2009). First Course in the Theory of Equations. John Wiley & Sons, Inc. The Project Gutenberg eBook: <http://www.gutenberg.org/ebooks/29785>
3. Gallian, Joseph. A. (2017). Contemporary Abstract Algebra (9th ed.). Cengage Learning India Private Limited, Delhi. Indian Reprint 2021.
4. Goodaire, Edgar G., & Parmenter, Michael M. (2006). Discrete Mathematics with Graph Theory (3rd ed.). Pearson Education Pvt. Ltd. Indian Reprint 2018.

Suggestive Readings

- Burnside, W.S., & Panton, A.W. (1979), The Theory of Equations, Vol. 1. Eleventh

Edition, (Fourth Indian Reprint. S. Chand & Co. New Delhi), Dover Publications, Inc.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

**DISCIPLINE SPECIFIC CORE COURSE – 2:
ELEMENTARY REAL ANALYSIS**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Elementary Real Analysis | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | NIL |

Learning Objectives

The course will develop a deep and rigorous understanding of:

- Real line \mathbb{R} with algebraic.
- Order and completeness properties to prove the results about convergence and divergence of sequences and series of real numbers.

Learning Outcomes

This course will enable the students to:

- Understand the fundamental properties of the real numbers, including completeness and Archimedean, and density property of rational numbers in \mathbb{R} .
- Learn to define sequences in terms of functions from \mathbb{N} to a subset of \mathbb{R} and find the limit.
- Recognize bounded, convergent, divergent, Cauchy and monotonic sequences and to calculate the limit superior and limit inferior of a bounded sequence.
- Apply limit comparison, ratio, root, and alternating series tests for convergence and absolute convergence of infinite series of real numbers.

SYLLABUS OF DSC - 2

Theory

Unit – 1

(16 hours)

Real Number System

Algebraic and order properties of \mathbb{R} , Absolute value of a real number, Bounded above and bounded below sets, Supremum and infimum of a non-empty subset of \mathbb{R} , The completeness property of \mathbb{R} , Archimedean property, Density of rational numbers in \mathbb{R} .

Unit – 2

(24 hours)

Sequences

Sequences and their limits, Convergent sequence, Limit theorems, Monotone sequences, Monotone convergence theorem, Subsequences, Bolzano-Weierstrass theorem for sequences, Limit superior and limit inferior for bounded sequence, Cauchy sequence, Cauchy's convergence criterion.

Unit – 3

(20 hours)

Infinite Series

Convergence and divergence of infinite series of real numbers, Necessary condition for convergence, Cauchy criterion for convergence, Tests for convergence of positive term series, Integral test, Basic comparison test, Limit comparison test, D'Alembert's ratio test, Cauchy's nth root test, Raabe's test, Alternating series, Leibniz test, Absolute and conditional convergence.

Practical component (if any) – NIL

Essential Readings

1. Bartle, Robert G., & Sherbert, Donald R. (2011). Introduction to Real Analysis (4th ed.). John Wiley & Sons. Wiley India Edition 2015.
2. Bilodeau, Gerald G., Thie, Paul R., & Keough, G. E. (2010). An Introduction to Analysis (2nd ed.). Jones and Bartlett India Pvt. Ltd. Student Edition. Reprinted 2015.
3. Denlinger, Charles G. (2011). Elements of Real Analysis. Jones and Bartlett India Pvt. Ltd. Student Edition. Reprinted 2015.

Suggestive Readings

- Ross, Kenneth A. (2013). Elementary Analysis: The Theory of Calculus (2nd ed.). Undergraduate Texts in Mathematics, Springer. Indian reprint.
- Thomson, B. S., Bruckner, A. M., & Bruckner, J. B. (2001). Elementary Real Analysis. Prentice Hall.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 3: PROBABILITY AND STATISTICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Probability and Statistics | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To make the students familiar with the basic statistical concepts and tools which are needed to study situations involving uncertainty or randomness.
- To render the students to several examples and exercises that blend their everyday experiences with their scientific interests to form the basis of data science.

Learning Outcomes

This course will enable the students to:

- Understand some basic concepts and terminology - population, sample, descriptive and inferential statistics including stem-and-leaf plots, dotplots, histograms and boxplots.
- Learn about probability density functions and various univariate distributions such as binomial, hypergeometric, negative binomial, Poisson, normal, exponential and lognormal.
- Understand the remarkable fact that the empirical frequencies of so many natural populations, exhibit bell-shaped (i.e., normal) curves, using the Central Limit Theorem.
- Measure the scale of association between two variables, and to establish a formulation helping to predict one variable in terms of the other, i.e., correlation and linear regression.

SYLLABUS OF DSC – 3

Theory

Unit – 1

(15 hours)

Descriptive Statistics, Probability, and Discrete Probability Distributions

Descriptive statistics: Populations, Samples, Stem-and-leaf displays, Dotplots, Histograms, Qualitative data, Measures of location, Measures of variability, Boxplots; Sample spaces and events, Probability axioms and properties, Conditional probability, Bayes' theorem and independent events; Discrete random variables and probability

distributions, Expected values; Probability distributions: Binomial, geometric, hypergeometric, negative binomial, Poisson, and Poisson distribution as a limit.

Unit – 2 (15 hours)

Continuous Probability Distributions

Continuous random variables, Probability density functions, Uniform distribution, Cumulative distribution functions and expected values, The normal, exponential and lognormal distributions.

Unit – 3 (15 hours)

Central Limit Theorem and Regression Analysis

Sampling distribution and standard error of the sample mean, Central Limit Theorem and applications; Scatterplot of bivariate data, Regression line using principle of least squares, Estimation using the regression lines; Sample correlation coefficient and properties.

Practical (30 hours)

Software labs using Microsoft Excel or any other spreadsheet.

- 1) Presentation and analysis of data (univariate and bivariate) by frequency tables, descriptive statistics, stem-and-leaf plots, dotplots, histograms, boxplots, comparative boxplots, and probability plots ([1] Section 4.6).
- 2) Fitting of binomial, Poisson and normal distributions.
- 3) Illustrating the Central Limit Theorem through Excel.
- 4) Fitting of regression line using the principle of least squares.
- 5) Computation of sample correlation coefficient.

Essential Reading

|----------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Elements of Discrete Mathematics | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | Nil |

Learning Objectives

Students are introducing to:

- Order (or partial order) and related properties.
- Notion of a lattice which is also a step towards abstract algebra.
- Concept of Boolean algebra and its applications to minimizing a Boolean polynomial and switching circuits, which has further applications in computer science.

Learning outcomes

This course will enable the students to:

- Understand the basic concepts of sets, relations, functions, and induction.
- Understand mathematical logic and logical operations to various fields.
- Understand the notion of order and maps between partially ordered sets.
- Minimize a Boolean polynomial and apply Boolean algebra techniques to decode switching circuits.

SYLLABUS OF DSC - 1

Theory

Unit – 1

(24 hours)

Sets, Relations and Functions

Sets, Propositions and logical operations, Conditional statements, Mathematical induction, Relations and equivalence relation, Equivalence classes, Partial order relation, Partially ordered set, Hasse diagrams, Chain, Maximal and minimal elements, least and greatest elements, Least upper bound, Greatest lower bound, Zorn's lemma, Functions and bijective functions, Functions between POSETS, Order isomorphism.

Unit – 2

(16 hours)

Lattices

Lattice as a POSET, Lattice as an algebra and their equivalence, Bounded lattices, Sublattices, Interval in a lattice, Products and homomorphism of lattices, Isomorphism of lattices; Distributive, Complemented, Partition and pentagonal lattices.

Unit – 3**(20 hours)****Boolean Algebra and Switching Circuits**

Boolean algebra, De Morgan's laws, Boolean expressions, Truth tables, Logic diagrams, Boolean functions, Disjunctive normal forms (as join of meets), Minimal forms of Boolean polynomials, Quine Mc-Cluskey method, Karnaugh maps, Switching circuits, Applications of switching circuits.

Practical component (if any) – NIL**Essential Readings**

- Rudolf Lidl, & Gunter Pilz (2004). Applied Abstract Algebra (2nd ed.). Undergraduate text in Mathematics, Springer (SIE), Indian Reprint.
- Bernard Kolman, Robert C. Busby, & Sharon Cutler Ross (2009). Discrete Mathematical Structures (6th ed.). Pearson education Inc., Indian reprint.

Suggestive Reading

- Rosen, Kenneth H. (2017). Discrete Mathematics and its applications with combinatorics and Graph Theory (7th ed.). McGraw Hill Education.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2: TOPICS IN CALCULUS
CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Topics in Calculus | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | Nil |

Learning Objectives

The primary objective of this course is to:

- Introduce the basic tools of calculus which are helpful in understanding their applications in many real-world problems.
- Understand/create various mathematical models in everyday life.

Learning Outcomes

This course will enable the students to:

- Understand continuity and differentiability in terms of limits and graphs of certain functions.
- Describe asymptotic behaviour in terms of limits involving infinity.
- Use of derivatives to explore the behaviour of a given function locating and classify its

extrema and graphing the function.

- Apply the concepts of asymptotes, and inflexion points in tracing of cartesian curves.
- Compute the reduction formulae of standard transcendental functions with applications.

SYLLABUS OF DSC - 2

Theory

Unit – 1 (20 hours)

Limits, Continuity and Differentiability

Limit of a function, ε - δ definition of a limit, Infinite limits, Continuity and types of discontinuities; Differentiability of a function, Successive differentiation: Calculation of the n th derivatives, Leibnitz theorem; Partial differentiation, Euler's theorem on homogeneous functions.

Unit – 2 (20 hours)

Mean Value Theorems and its Applications

Rolle's theorem, Mean value theorems and applications to monotonic functions and inequalities; Taylor's theorem, Taylor's series, Maclaurin's series expansions of e^x , $\sin x$, $\cos x$, $\log(1+x)$ and $(1+x)^m$; Indeterminate forms.

Unit – 3 (20 hours)

Tracing of Curves and Reduction Formulae

Asymptotes (parallel to axes and oblique), Concavity and inflexion points, Singular points, Tangents at the origin and nature of singular points, Curve tracing (cartesian and polar equations). Reduction formulae for $\int \sin^n x dx$, $\int \cos^n x dx$, and $\int \sin^m x \cos^n x dx$ and their applications.

Practical component (if any) – NIL

**COMMON POOL OF GENERIC ELECTIVES (GE) COURSES
OFFERED BY DEPARTMENT OF MATHEMATICS
CATEGORY-IV**

GENERIC ELECTIVES: FUNDAMENTALS OF CALCULUS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fundamentals of Calculus | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | NIL |

Learning Objectives

The Learning Objectives of this course is as follows:

- Understand the quantitative change in the behaviour of the variables and apply them on the problems related to the environment.

Learning Outcomes

Upon completion of this course, students will be able to:

- Understand continuity and differentiability in terms of limits.
- Describe asymptotic behavior in terms of limits involving infinity.
- Understand the importance of mean value theorems and its applications.
- Learn about Maclaurin's series expansion of elementary functions.
- Use derivatives to explore the behavior of a given function, locating and classifying its extrema, and graphing the polynomial and rational functions.

SYLLABUS OF GE

Theory

Unit – 1

(20 hours)

Continuity and Differentiability of Functions

Limits and continuity, Types of discontinuities; Differentiability of functions; Successive differentiation: Calculation of the n th derivatives, Leibnitz theorem; Partial differentiation, Euler's theorem on homogeneous functions.

Unit – 2**(20 hours)****Mean Value Theorems and its Applications**

Rolle's theorem, Mean value theorems and applications to monotonic functions and inequalities; Expansion of functions: Taylor's theorem, Taylor's series, Maclaurin's series expansion of e^x , $\sin x$, $\cos x$, $\log(1+x)$ and $(1+x)^m$; Indeterminate forms.

Unit – 3**(20 hours)****Tracing of Curves**

Concavity and inflexion points, Asymptotes (parallel to axes and oblique), Relative extrema, Tracing graphs of polynomial functions, rational functions, and polar equations.

Practical component (if any) – NIL**Essential Readings**

- Anton, Howard, Bivens, Irl, & Davis, Stephen (2013). Calculus (10th ed.). Wiley India Pvt. Ltd. New Delhi. International Student Version. Indian Reprint 2016.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES: THEORY OF EQUATIONS AND SYMMETRIES**CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Theory of Equations and Symmetries | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | NIL |

Learning Objectives

The goal of this course is to acquaint students with certain ideas about:

- Integral roots, rational roots, an upper bound on number of positive or negative roots of a polynomial.
- Finding roots of cubic and quartic equations in special cases using elementary symmetric functions.
- Using Cardon's and Descartes' methods, respectively.

Learning outcomes

After completion of this course, the students will be able to:

- Understand the nature of the roots of polynomial equations and their symmetries.
- Solve cubic and quartic polynomial equations with special condition on roots and in general.
- Find symmetric functions in terms of the elementary symmetric polynomials.

SYLLABUS OF GE

Theory

Unit - 1

(24 hours)

Polynomial Equations and Properties

General properties of polynomials and equations; Fundamental theorem of algebra and its consequences; Theorems on imaginary, integral and rational roots; Descartes' rule of signs for positive and negative roots; Relations between the roots and coefficients of equations, Applications to solution of equations when an additional relation among the roots is given; De Moivre's theorem for rational indices, the n th roots of unity and symmetries of the solutions.

Unit - 2

(16 hours)

Cubic and Biquadratic (Quartic) Equations

Transformation of equations (multiplication, reciprocal, increase/diminish in the roots by a given quantity), Removal of terms; Cardon's method of solving cubic and Descartes' method of solving biquadratic equations.

Unit - 3

(20 hours)

Symmetric Functions

Elementary symmetric functions and symmetric functions of the roots of an equation; Newton's theorem on sums of the like powers of the roots; Computation of symmetric functions such as $\sum \alpha^2 \beta$, $\sum \alpha^2 \beta^2$, $\sum \alpha^2 \beta \gamma$, $\sum \frac{1}{\alpha^2 \beta \gamma}$, $\sum \alpha^{-3}$, $\sum (\beta + \gamma - \alpha)^2$, $\sum \frac{\alpha^2 + \beta \gamma}{\beta + \gamma}$, ... of polynomial equations; Transformation of equations by symmetric functions and in general.

Practical component (if any) – NIL

Essential Readings

DEPARTMENT OF STATISTICS

B.Sc. (H) Statistics

Category-I

DISCIPLINE SPECIFIC CORE COURSE – 1: DESCRIPTIVE STATISTICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Descriptive Statistics | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To tabulate statistical information given in descriptive form and to use graphical techniques to interpret
- To understand various measures of central tendency, dispersion, skewness and kurtosis. Moments and its properties.
- Familiarize with quantitative and qualitative data and available statistical tools to analyse them.
- Finding linear correlation between two variates using different measures and studying their properties. Least square method of fitting of curves, regression lines and their elementary properties.

Learning Outcomes:

The Learning Outcomes of this course are as follows:

- Understand concepts of sample vs. population and get acquainted with different types of data /scales. Distinguish between primary and secondary data. Tabulate and plot frequency distribution. Deals with numerical and graphical ways to describe and display data using histograms, stem and leaf plot and box plots.
- Calculate measures of central locations like mean, geometric mean, harmonic mean, median and mode and explain their properties
- Calculate measures of the spread: variance, standard deviation, range and inter-quartile range and explain their properties.
- Understand the meaning of probability and probabilistic experiment. Familiarize with the four approaches to probability theory and particularly, the axiomatic approach and use and manipulate the four axioms of probability comfortably to derive the results of other set operations

- Understand and exploit Addition and Multiplicative laws of probability
- understand the meaning of conditional probability, conditioning, and reduced sample space, compute joint and conditional probabilities. independence, total probability, Bayes' rule and applications.
- Understand the concept of a random variable, differentiate between independent and uncorrelated random variables, distinguish between discrete, continuous, random variables and be able to represent them using probability mass, probability density, and cumulative distribution functions, Univariate transformation and its application.
- Understand expectation and its properties, Compute variance and covariance in terms of expectation. Solve problems based on expectation and its properties.

SYLLABUS OF DSC-1

Theory

Unit – 1 (09 hours)

Data Visualization

Statistical Methods: Definition and scope of Statistics, concepts of statistical population and sample. Types of Data: Concepts of population and sample, quantitative and qualitative data, cross-sectional and time-series data, discrete and continuous data. Different types of scales: Nominal, ordinal, interval and ratio. Collection and Scrutiny of Data: Primary data. Secondary data – its major sources. Complete enumeration. Construction of tables with one or more factors of classification, frequency distributions and cumulative frequency distributions and their graphical representations (Histograms, frequency polygon), stem and leaf displays.

Unit – 2 (15 hours)

Data Summarization

Measures of Central Tendency: Mathematical and positional, partition values, Measures of Dispersion: range, quartile deviation, mean deviation, standard deviation, coefficient of variation, graphical representation of various measures of location and dispersion (Ogives, Histograms, Box Plot) Moments: Raw moments, Central moments, Absolute moments, Factorial moments, Sheppard's corrections, skewness and kurtosis, Types of frequency distributions.

Unit – 3 (06 hours)

Theory of Attributes

Theory of attributes: consistency and independence of data with special reference to attributes, Association of attributes: concept, Yules coefficient of Colligation and Coefficient of Colligation.

Unit – 4 (15 hours)

Correlation and Regression

Bivariate data: Definition, scatter diagram, Karl Pearson's coefficient of correlation. Spearman's rank correlation coefficient (Introductory with interpretation). Principle of least squares and

fitting of polynomials and exponential curves, lines of regression, properties of regression coefficients, angle between two regression lines, and residual variance.

Practical – 30 Hours

List of Practicals:

1. Graphical representation of data- frequency polygon, histogram and ogive.
2. Practical based on arithmetic mean and to find missing frequencies given arithmetic mean.
3. Practical based on median and partition values using formulae and to find them graphically also.
4. Practical based on mode by using formula, graphically, method of grouping.
5. Practical based on combined mean and combined variance.
6. Practical based on quartile deviation using formula and graphically.
7. Practical based on mean deviation and standard deviation.
8. Practical based on coefficient of variation.
9. Practical based on moments about origin and moments about any arbitrary point.
10. Practical on skewness based on mean, median, mode and standard deviation.
11. Practical based on central moments, skewness and kurtosis.
12. Practical based on fitting of polynomials.
13. Practical based on fitting of exponential curves, power curves.
14. Practical based on association and independence of attributes.
15. Practical based on fundamental set of class frequencies in attributes (find missing frequencies given fundamental set of class frequencies).
16. Practical based on Karl Pearson correlation coefficient.
17. Practical based on correlation coefficient for a bivariate frequency distribution.
18. Practical based on lines of regression, angle between lines and estimated values of variables.
19. Practical based on rank correlation with ties.
20. Practical based on rank correlation without ties.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2: INTRODUCTION TO PROBABILITY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Probability | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Familiarize students with the mathematical basis of probability theory.
- Prepare students with important tools for statistical analyses at the undergraduate level.
- Promote understanding through real-world statistical applications.

Learning Outcomes

The Learning Outcomes of this course are as follows:

- Understand the meaning of probability and probabilistic experiment. Familiarize with the four approaches to probability theory and particularly, the axiomatic approach, use and manipulate the four axioms of probability comfortably to derive the results of other set operations.
- Understand and use addition and multiplicative laws of probability, understand the meaning of conditional probability, conditioning, and reduced sample space, compute joint and conditional probabilities. independence, total probability, Bayes' rule and applications.
- Understand the concept of a random variable, differentiate between independent and uncorrelated random variables, distinguish between discrete and continuous, random variables and be able to represent them using probability mass, probability density, and cumulative distribution functions. Acquaint with Univariate transformation and its application.
- Understand expectation and its properties, Compute variance and covariance in terms of expectation. Solve problems based on expectation and its properties.

SYLLABUS OF DSC - 2

Theory

Unit – 1 (12 hours)

Elements of Probability

Probability: Introduction, random experiments, sample space, events and algebra of events. Definitions of Probability – Classical, Statistical. Limitations of Classical definition. Probability of union and intersection of events, Probability of occurrence of exactly m and at least m events out of n events, Examples based on classical approach and repeated trials, Kolmogorov's Axiomatic definition and problems based on it, Matching problems.

Unit – 2 (09 hours)

Laws of Probability

Conditional Probability, laws of addition and multiplication, theorem of total probability, Examples based on conditional probability and laws of addition and multiplication, independent events – Pairwise mutual independence, Bayes' theorem and its applications, Geometric probability.

Unit – 3 (15 hours)

Random variables

Distribution function and properties, Discrete random variables - p.m.f., discrete distribution function, Continuous random variables - p.d.f, illustrations and properties of random variables. Measures of central tendency, dispersion, skewness and kurtosis for continuous probability distributions, Examples based on random variables, Continuous distribution functions and their properties, Univariate transformation of random variables, Examples based on univariate transformations.

Unit – 4 (09 hours)

Mathematical Expectation

Expectation of random variable and its properties (addition and multiplication theorem of expectation), Variance and Covariance in terms of expectation and their properties, Examples based on Expectation and its properties.

Practical – 30 Hours

List of Practicals:

1. Problem based long run relative frequency to establish statistical definition of probability
2. Problem based on geometric probability.
3. Problem based on permutations and combinations when all objects are distinguishable.
4. Problem based on permutations and combinations when not all objects are different.
5. Computation of probability related to occurrence of exactly m and at least m events out of n events.

6. Computation of probabilities related to matching problems
7. Computation of conditional probabilities using addition and multiplication laws.
8. Problem related to application of Bayes Theorem.
9. Computation of distribution function of discrete and continuous random variables and calculations of probabilities of events thereof.
10. Graphical representation of probability function and distribution function of discrete/continuous arbitrary random variables.
11. Finding expectation, variance and covariances of discrete as well as continuous random variables
12. Finding expectation, variance and covariances of linear function of discrete as well as continuous random variables.
13. Constructing sample space for two-dimensional random variable.

Essential Readings

DISCIPLINE SPECIFIC CORE COURSE – 3: CALCULUS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course | Credits | Credit distribution of the course | Eligibility | Pre-requisite |
|--------|---------|-----------------------------------|-------------|---------------|
|--------|---------|-----------------------------------|-------------|---------------|

| title & Code | | Lecture | Tutorial | Practical/ Practice | criteria | of the course (if any) |
|--------------|---|---------|----------|---------------------|---------------------------------|------------------------|
| Calculus | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To familiarize students with the basic mathematical tools.
- It helps students to understand the other statistical concepts.

Learning Outcomes

The Learning Outcomes of this course are as follows:

- Understand to solve applied problems using differentiation and integration.
- Understand to solve applied problems under integral sign and changes of order of integration.

SYLLABUS OF DSC – 3

Theory

Unit – 1

(15 hours)

Differential Calculus

Review of limits, continuity and differentiability, partial differentiation and total differentiation. Indeterminate forms: L-Hospital's rule, Leibnitz rule for successive differentiation. Euler's theorem on homogeneous functions.

Unit – 2

(15 hours)

Integral Calculus

Review of integration and definite integral. Differentiation under integral sign, double integral, changes of order of integration. Beta and Gamma functions: Properties and relationship between them.

Unit – 3

(15 hours)

Differential Equations

Exact differential equations. Differential equations of first order and first degree. Higher Order Differential Equations: Linear differential equations of order n, Homogeneous and non-homogeneous linear differential equations of order n with constant coefficients, Different forms of particular integrals. The Cauchy-Euler's equation of order n. Formation and solution of a partial differential equations. Equations easily integrable. Linear partial differential equations of first order. Homogeneous linear partial differential equations with constant coefficients. Different cases for complimentary functions and particular integrals.

Practical – 30 Hours

List of Practicals:

- 1) Verification of Euler's Theorem.
- 2) Applications of differentiation
 - a. Calculate income and price elasticity of demand.
 - b. Determination of price and quantity for which total revenue is maximum.

- c. Find the level of output for which the average cost is minimum.
 - d. Solve profit maximization problems.
 - e. Evaluate first and second order partial derivatives of functions of the form $Z = f(x, y)$.
 - f. Examine a function of two variables for relative maxima and relative minima.
 - g. Find the nature of the commodities by using the concept of partial marginal demand functions.
 - h. Find four partial elasticities for a demand function of two variables.
- 3) Applications of Integration
- a) Derive total cost function from given marginal cost function.
 - b) Derive total revenue function and demand function from a given marginal revenue function.
 - c) Calculate the maximum profit if marginal revenue and marginal cost are given.
 - d) Find the demand function when the price elasticity of demand is given.
- 4) Applications of Differential Equations
- a) Application on growth and decay.
 - b) Application of the form $\frac{d^2y}{dx^2} = f(x)$ and $\frac{d^2y}{dx^2} = f(y)$ to physical problems.
 - c) Application on coordinate geometry.
- 5) Verify that the area under the curve is unity under the given p.d.f. and also calculate
- a) Arithmetic Mean
 - b) Median
 - c) Mode
 - d) Standard Deviation

DISCIPLINE SPECIFIC CORE COURSE – 1: DESCRIPTIVE STATISTICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Descriptive Statistics | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To motivate students towards intrinsic interest in statistical thinking.
- To analyze and interpret data.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the basic concepts of Statistics.
- Able to employ different types of data.
- Employ the graphical methods of displaying data.
- Use measures of locations.

SYLLABUS OF DSC - 1

Theory

Unit – 1

(15 hours)

Data Representation

Introduction: Definition, importance, scope and limitations of Statistics. Population and Sample Concept of statistical population with illustrations, concept of sample with illustrations. Raw data, Attributes and variables, discrete and continuous variables, classification and construction of frequency distribution. Graphical Representation: Histogram, Frequency polygon, Frequency curve, Ogive curves and their uses. Examples and Problems.

Unit – 2

(15 hours)

Measures of central tendency

Concept of central tendency, Criteria for good measures of central tendency. Arithmetic mean: Definition, computation for ungrouped and grouped data, combined mean, weighted mean, merits and demerits. Median: Definition, computation for ungrouped and grouped data, graphical method, merits and demerits. Mode: Definition, computation for ungrouped and grouped data, graphical method, merits and demerits. Quartiles: Definition, computation for ungrouped and grouped data graphical method. Numerical problems.

Unit – 3

(15 hours)

Measures of Dispersion

Concept of dispersion and measures of dispersion, absolute and relative measures of dispersion. Range and Quartile Deviation: definition for ungrouped and grouped data, and their coefficients, merits and demerits. Mean Deviation: Definition for ungrouped and grouped data, minimal property (statement only). Standard deviation and Variance: definition for ungrouped and grouped data, coefficient of variation, combined variance and standard deviation for two groups, merits and demerits. Numerical problems.

Practical

List of Practicals:

1. Problems based on graphical representation of data: Histograms, Frequency polygon, Ogive curve for equal class intervals.
2. Problems based on graphical representation of data: Histograms, Frequency polygon, Ogive curve for unequal class intervals.
3. Problems based on measures of central tendency using raw data, grouped data.
4. Problems based on change of origin and scale.
5. Problems based on measures of dispersion using raw data, grouped data.
6. Problems based on measures of dispersion for change of origin and scale.
7. Problems based on combined mean.
8. Problems based on combined variance.
9. Problems based on coefficient of variation.
10. Problems based on standard deviation of two groups

Essential Readings

- Miller, I. and Miller, M. (2006). John E. Freund's Mathematical Statistics with Applications, 7th Ed., Pearson Education, Asia.
- Mood, A.M., Graybill, F.A. and Boes, D.C. (2007). Introduction to the Theory of Statistics, 3rd Ed., (Reprint), Tata McGraw-Hill Pub. Co. Ltd.

Suggestive Reading

- Gupta, S.P. (2022) Statistical Methods 46th ed, S. Chand and Sons
- Gupta, S. C. and Kapoor V. K. (). Fundamentals of Mathematical Statistics, S. Chand and Sons

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2: STATISTICAL METHODS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ | | |

| | | | | Practice | | (if any) |
|---------------------|---|---|---|----------|---------------------------------|----------|
| Statistical Methods | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- Acquainting the students with various statistical methods.
- Students should be able to understand and compute various statistical measures of correlation, fitting of curve and regression.

Learning Outcomes

Upon successful completion of this course students will demonstrate knowledge of:

- Correlation and regression.
- Theory of attributes.

SYLLABUS OF DSC - 2

Theory

Unit – 1 (15 hours)

Correlation

Introduction and meaning of Correlation, Scatter diagram, Karl Pearson's coefficient of correlation, limits for correlation coefficient, correlation coefficient for bivariate distribution, rank correlation: tied and repeated rank, correlation ratio, measure of correlation ratio, Intra class correlation, multiple and partial correlation.

Unit – 2 (15 hours)

Regression

Introduction to Linear regression, regression coefficient, properties of regression coefficients, angle between two lines of regression, regression curve, curvilinear regression. Principle of least-squares and fitting of polynomials and exponential curves.

Unit – 3 (15 hours)

Theory of Attributes

Theory of attributes: Notion and terminology, class frequencies, ultimate class frequencies, Contingency table, consistency, association of attributes, independence, measure of association for 2x2 table, Yule's coefficient of association.

Practical – 30 Hours

List of Practicals:

1. Problems based on Karl Pearson correlation coefficient.
2. Problems based on Karl Pearson correlation coefficient with change of scale and origin.

3. Problem based on multiple correlation
4. Problem based on partial correlation
5. Problems based on lines of regression.
6. Problems based on angle between two lines of regression.
7. Problems based on Spearman rank correlation.
8. Problems based on fitting of polynomials and exponential curves.
9. Problems based on association and independence of attributes.
10. Problems based on fundamental set of class frequencies in attributes (find missing frequencies given fundamental set of class frequencies)

Essential Readings

- Goon, A. M., Gupta, M. K. and Dasgupta, B. (2003). An Outline of Statistical Theory (4th ed., Vol. I). World Press, Kolkata.
- Gupta, S. C. and Kapoor, V. K. (2007). Fundamentals of Mathematical Statistics (11th ed.). Sultan Chand and Sons.

- Hogg, R. V., Craig, A. T. and McKean, J. W. (2005). Introduction to Mathematical Statistics (6th ed.). Pearson Education

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

B.A. (Program) with Statistics as Non-Major
Category III

**DISCIPLINE SPECIFIC CORE COURSE: DESCRIPTIVE STATISTICS
AND PROBABILITY THEORY**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Descriptive Statistics and probability theory | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- Introduction to Statistics.
- Graphical representation of data.
- Understanding the concept of Probability.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Apply the fundamental concepts of statistics.
- Understand handling various types of data and their graphical representation.
- Employ measures of location and dispersion.
- Bivariate data. Significance of various coefficients of correlation.
- Employ fitting of linear curve.
- Use probability theory and its applications.

SYLLABUS OF DSC

Theory

Unit – 1

(15 hours)

Basic Statistics

Fundamentals of statistics. Diagrammatic representation of data. Measures of central tendency: location and positional. Partition values, Measures of Dispersion: range, quartile deviation, mean deviation, standard deviation, coefficient of variation. Moments: raw and central, Measures of skewness and kurtosis.

Unit – 2

(15 hours)

Correlation and Regression

Bivariate data: definition, scatter diagram. Correlation and regression: Karl Pearsons coefficient of correlation, Spearman's rank correlation coefficient, lines of regression, properties of regression coefficients, angle between two regression lines. Principle of least-square and fitting of linear curve.

Unit – 3

(15 hours)

Probability

Probability: Introduction, Random experiment, sample point and sample space, event, algebra of events, Definition of Probability - classical, relative frequency and axiomatic approaches to probability, merits and demerits of these approaches (only general ideas to be given). Theorems on probability, conditional probability, independent events: pairwise and mutually independent. Bayes theorem and its applications.

Practical – 30 Hours

List of Practicals:

1. Problems based on graphical representation of data. Histograms (equal class intervals and unequal class intervals), frequency polygon, ogive curve.
2. Problems based on mean using raw data, grouped data for change of origin and scale.
3. Problems based on arithmetic mean and to find missing frequencies given arithmetic mean.
4. Problems based on median and partition values using formulae and to find them graphically also.
5. Problems based on mode by using formula, graphically, method of grouping.
6. Problems based on mean deviation and standard deviation.
7. Problems based on combined mean and variance.
8. Problems based on coefficient of variation.
9. Comparison of data using consistency approach.
10. Problems on skewness based on mean, median, mode and standard deviation.
11. Problems based on central moments.
12. Relationships between moments about origin and central moments.
13. Problems based on skewness and kurtosis.
14. Problems based on Karl Pearson correlation coefficient.
15. Problems based on Spearman's rank correlation with ties.
16. Problems based on Spearman's rank correlation without ties.
17. Problems based on lines of regression and estimated values of variables.
18. Problems on regression coefficients.

**COMMON POOL OF GENERIC ELECTIVES (GE) COURSES
OFFERED BY DEPARTMENT OF STATISTICS
CATEGORY-IV**

GENERIC ELECTIVES: INTRODUCTION TO STATISTICS

**CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE
COURSE**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre- requisite of the course (if any) |
|-------------------------------|---------|-----------------------------------|----------|------------------------|---------------------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Statistics | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | NIL |

Learning Objectives

The Learning Objectives of this course is as follows:

- Acquainting the students with descriptive data analysis.
- To introduce students to different measurement scales, qualitative and quantitative and discrete and continuous data.
- To help students to organise data into frequency distribution graphs, including bar graphs, histograms, polygons and ogives.
- Students should be able to understand the purpose for measuring central tendency, dispersion, skewness and kurtosis and should be able to compute them as well.
- Students should be able to understand theory of attributes, independence and association of attributes.

Learning Outcomes

The Learning Outcomes of this course are as follows:

- Introduction to Statistics, definitions and data classification
- Employ graphical displays of data, frequency distributions, analysing graphs.
- Apply numerical descriptions of data, measures of center tendency, measures of dispersion, skewness and kurtosis.
- Understand theory of attributes.

SYLLABUS OF GE

Theory

Unit – 1

(15 hours)

Introduction to Statistics and Data

Introduction: Definition and scope of Statistics, concepts of statistical population and sample. Data: quantitative and qualitative, attributes, variables, scales of measurement -nominal, ordinal, interval and ratio. Presentation: tabular and graphic, including histogram and ogives.

Unit – 2

(15 hours)

Descriptive Statistics

Measures of Central Tendency: Arithmetic mean, median, mode, geometric mean, harmonic mean, partition values. Measures of Dispersion: Range, quartile deviation, mean deviation, standard deviation, variance, coefficient of dispersion: coefficient of variation. Moments, Measure of skewness and kurtosis.

Unit – 3

(15 hours)

Theory of Attributes

Theory of Attributes: Consistency of data, independence of attributes, association of attributes, Yule's coefficient of association, coefficient of colligation.

Practical – 30 Hours

List of Practicals:

1. Tabular representation of data
2. Graphical representation of data using histogram
3. Graphical representation of data using ogives
4. Problems based on arithmetic mean
5. Problems based on geometric mean
6. Problems based on harmonic mean
7. Problems based on median
8. Problems based on mode
9. Problems based on partition values
10. Verifying the relationship between arithmetic mean, geometric mean and harmonic mean
11. Problems based on range and quartile deviation.
12. Problems based on mean deviation
13. Problems based on standard deviation and variance
14. Problems based on combined mean and combined variance
15. Problems based on coefficient of variation.
16. Problems based on moments,
17. Problems based on skewness
18. Problems based on kurtosis
19. Checking consistency of data.
20. Checking the independence of attributes
21. Measuring the association between the attributes

Essential Readings

- Goon, A.M., Gupta, M.K. and Dasgupta, B. (2002). Fundamentals of Statistics, 8th Ed. Vol. I & II, The World Press, Kolkata.
- Mood, A.M. Graybill, F.A. and Boes, D.C. (2007). Introduction to the Theory of Statistics,

3rd Ed., (Reprint), Tata McGraw-Hill Pub. Co. Ltd.

- Gupta, S.C., and Kapoor, V.K. (2014). Fundamental of Mathematical Statistics, 11th Ed., Sultan Chand.

Suggestive Reading

- Miller, I. and Miller, M. (2006). John E. Freund's Mathematical Statistics with Applications, 7th Ed., Pearson Education, Asia.
- Ross, Sheldon M. (2010): Introductory Statistics, 3rd Edition, Academic Press

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES: TIME SERIES ANALYSIS AND INDEX NUMBERS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Time Series Analysis and Index Numbers | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Introduce the concept of time series, its components, and their estimation.
- Introduce the application of time series.
- Introduce the concept, formulation, and application of index numbers.

Learning outcomes

After completion of this course, the students will be able to:

- Understand the concepts of time series and index numbers.
- Formulate, solve, and analyze the use of time series and index numbers for real-world problems.

SYLLABUS OF GE

Theory

Unit - 1

(15 hours)

Components of Time Series

Introduction to Time Series, Components of time series, Decomposition of time series- Additive and multiplicative model with their merits and demerits, Illustrations of time series, Measurement of trend by method of free-hand curve, method of semi-averages and method of least squares (linear, quadratic and exponential).

Unit - 2

(15 hours)

Trend and Seasonality

Fitting of modified exponential, Gompertz and logistic curve, Moving average method, Measurement of seasonal variations by method of simple averages, ratio to trend method, and ratio to moving average method.

Unit - 3

(15 hours)

Index Numbers

Introduction to Index numbers, Problems in the construction of index numbers, Construction of price and quantity index numbers: simple aggregate, weighted aggregate (Laspeyres, Paasche's, Drobish-Bowley, Marshall-Edgeworth's, Walsch and Fisher's Formula), simple and weighted average of price relatives, and chain base method, Criteria for a good index number, Errors in the measurement of price and quantity index numbers, Consumer price index number, its construction and uses, Uses and limitations of index numbers.

Practical – 30 Hours

List of Practicals:

- a. Fitting of linear trend
- b. Fitting of quadratic trend
- c. Fitting of an exponential curve
- d. Fitting of modified exponential curve by the method of
 - Three selected points
 - Partial sums
- e. Fitting of Gompertz curve by the method of
 - Three selected points
 - Partial sums
- f. Fitting of logistic curve by the method of three selected points
- g. Fitting of trend by moving average method (for n even and odd)
- h. Measurement of seasonal indices by
 - Method of simple averages
 - Ratio-to-trend method
 - Ratio-to-moving-average method
- i. Construction of price and quantity index numbers by simple aggregate method.
4. Construction of price and quantity index numbers by Laspeyres, Paasche's, Drobish-Bowley, Marshall-Edgeworth, Walsch and Fisher's Formula.
5. Construction of price and quantity index numbers by simple and weighted average of price relatives.
6. Construction of index number by Chain base method.
7. Construction of consumer price index number by
 - a. Family budget method
 - b. Aggregate expenditure method

14. Time Reversal Test and Factor Reversal Test

Essential Readings

- Croxton, Fredrick E, Cowden, Dudley J. and Klein, S. (1973): Applied General Statistics, 3rd edition, Prentice Hall of India Pvt. Ltd.
- Gun, A.M., Gupta, M.K. and Dasgupta, B. (2008). Fundamentals of Statistics, Vol. II, 9th Ed., World Press, Kolkata.
- Gupta, S.C. and Kapoor, V.K. (2014). Applied Statistics, 11th Ed., Sultan Chand.

Suggestive Reading

- Allen R.G.D. (1975): Index Numbers in Theory and Practice, Macmillan
- Mukhopadhyay, P. (1999). Applied Statistics, New Central Book Agency, Calcutta.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES: BASIC STATISTICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Statistics | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To summarize the data and to obtain its salient features from the vast mass of original data.
- To understand the concepts of probability and its applications.
- To understand the concept of random variables, probability distributions and expectation..

Learning outcomes

After completion of this course, the students will be able to:

- Apply the concepts of statistical population and sample, variables and attributes.
- Present tabular and graphical representation of data based on variables.
- Measures of central tendency, Dispersion, Skewness and Kurtosis.
- Employ moments and their use in studying various characteristics of data.
- Employ correlation and regression analysis of bivariate data.

SYLLABUS OF GE

Theory

Unit - 1 (15 hours)

Elementary Statistics

Concepts of a statistical population and sample from a population, quantitative and qualitative data, nominal, ordinal and time-series data, discrete and continuous data. Presentation of data by tables and by diagrams, frequency distributions for discrete and continuous data, graphical representation of a frequency distribution by histogram and frequency polygon, cumulative frequency distributions (inclusive and exclusive methods).

Unit - 2 (15 hours)

Descriptive Statistics

Measures of location (or central tendency) and dispersion, moments, measures of skewness and kurtosis, cumulants. Bi-variate data: Scatter diagram, principle of least-squares and fitting of polynomials and exponential curves.

Unit - 3 (15 hours)

Correlation and Regression

Bivariate data: Definition, scatter diagram, simple, partial and multiple correlation (3 variables only), rank correlation. Simple linear regression, principle of least squares and fitting of polynomials and exponential curves.

Practical - 30 Hours

List of Practicals:

1. Problems based on graphical representation of data.
2. Problems based on measures of central tendency using raw data, grouped data and for change of origin and scale.
3. Problems based on measures of dispersion using raw data, grouped data and for change of origin and scale.
4. Problems based on combined mean and variance and coefficient of variation.
5. Problems based on Moments using raw data, grouped data and for change of origin and scale.
6. Problems based on relationships between moments about origin and central moments.
7. Problems based on Skewness and kurtosis.
8. Problems based on Karl Pearson correlation coefficient (with/without change of scale and origin).
9. Problems based on Lines of regression, angle between two lines of regression
10. Problems based on Spearman rank correlation.
11. Fitting of polynomials and exponential curves.

Essential Readings

- Goon, A. M., Gupta, M. K. and Dasgupta, B. (2003). An Outline of Statistical Theory (4th ed., Vol. I). World Press, Kolkata.

- Gupta, S. C. and Kapoor, V. K. (2021). Fundamentals of Mathematical Statistics (60th ed.). Sultan Chand and Sons.
- Hogg, R. V., Craig, A. T. and McKean, J. W. (2005). Introduction to Mathematical Statistics (6th ed.). Pearson Education.

Suggestive Reading

- Elhance, D. N. , Elhance, V. and Agrawal, B. M. (2021), Kitab Mahal

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DEPARTMENT OF COMPUTER SCIENCE
B.Sc. (H) Computer Science

CATEGORY-I

**DISCIPLINE SPECIFIC CORE COURSE – 1:
PROGRAMMING USING PYTHON**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Programming using Python | 4 | 3 | 0 | 1 | Class XII pass | Nil |

Learning Objectives

This course is designed as the first course that:

- Introduces programming concepts using Python to Computer Science students.
- Focuses on the development of Python programming to solve problems of different domains.
- Introduces the concept of object- oriented programming.

Learning Outcomes:

On successful completion of the course, students will be able to:

- Understand the basics of programming language
- Develop, document, and debug modular Python programs.
- Apply suitable programming constructs and built-in data structures to solve a problem.
- Use and apply various data objects in Python.
- Use classes and objects in application programs and handle files.

SYLLABUS OF DSC-1

Theory

Unit – 1 (6 hours)

Introduction to Programming

Problem solving strategies; Structure of a Python program; Syntax and semantics; Executing simple programs in Python.

Unit – 2 (12 hours)

Identifiers and keywords; Literals, numbers, and strings; Operators; Expressions; Input/output statements; Defining functions; Control structures (conditional statements, loop control statements, break, continue and pass, exit function), default arguments.

Built-in Data Structures

Mutable and immutable objects; Strings, built-in functions for string, string traversal, string operators and operations; Lists creation, traversal, slicing and splitting operations, passing list to a function; Tuples, sets, dictionaries and their operations.

Object Oriented Programming

Introduction to classes, objects and methods; Standard libraries.

File and Exception Handling

File handling through libraries; Errors and exception handling.

List of Practicals:

1. WAP to find the roots of a quadratic equation
2. WAP to accept a number 'n' and
 - j. Check if 'n' is prime
 - k. Generate all prime numbers till 'n'
 - l. Generate first 'n' prime numbersThis program may be done using functions
3. WAP to create a pyramid of the character '*' and a reverse pyramid

```
*
**
***
****
*****
******
*****
****
***
**
*
```

8. WAP that accepts a character and performs the following:
 - a. print whether the character is a letter or numeric digit or a special character
 - b. if the character is a letter, print whether the letter is uppercase or lowercase
 - c. if the character is a numeric digit, prints its name in text (e.g., if input is 9, output is NINE)

9. WAP to perform the following operations on a string
 - a. Find the frequency of a character in a string.
 - b. Replace a character by another character in a string.
 - c. Remove the first occurrence of a character from a string.
 - d. Remove all occurrences of a character from a string.
10. WAP to swap the first n characters of two strings.
11. Write a function that accepts two strings and returns the indices of all the occurrences of the second string in the first string as a list. If the second string is not present in the first string then it should return -1.
12. WAP to create a list of the cubes of only the even integers appearing in the input list (may have elements of other types also) using the following:
 - a. 'for' loop
 - b. list comprehension
13. WAP to read a file and
 - m. Print the total number of characters, words and lines in the file.
 - n. Calculate the frequency of each character in the file. Use a variable of dictionary type to maintain the count.
 - o. Print the words in reverse order.
 - p. Copy even lines of the file to a file named 'File1' and odd lines to another file named 'File2'.
14. WAP to define a class Point with coordinates x and y as attributes. Create relevant methods and print the objects. Also define a method distance to calculate the distance between any two point objects.
15. Write a function that prints a dictionary where the keys are numbers between 1 and 5 and the values are cubes of the keys.
16. Consider a tuple t1=(1, 2, 5, 7, 9, 2, 4, 6, 8, 10). WAP to perform following operations:
 - a. Print half the values of the tuple in one line and the other half in the next line.
 - b. Print another tuple whose values are even numbers in the given tuple.
 - c. Concatenate a tuple t2=(11,13,15) with t1.
 - d. Return maximum and minimum value from this tuple
17. WAP to accept a name from a user. Raise and handle appropriate exception(s) if the text entered by the user contains digits and/or special characters.

Essential Readings

- Taneja, S., Kumar, N. Python Programming- A modular Approach, 1st edition, Pearson Education India, 2018.

- Balaguruswamy E. Introduction to Computing and Problem Solving using Python, 2nd edition, McGraw Hill Education, 2018.

Suggestive Readings

- Brown, Martin C. Python: The Complete Reference, 2nd edition, McGraw Hill Education, 2018.
- Guttag, J.V. Introduction to computation and programming using Python, 2nd edition, MIT Press, 2016.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2: COMPUTER SYSTEM ARCHITECTURE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Computer System Architecture | 4 | 3 | 0 | 1 | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Introduces the students to the fundamental concepts of digital computer organization, design and architecture.
- Develop a basic understanding of the building blocks of the computer system and highlights how these blocks are organized together to architect a digital computer system.

Learning Outcomes

On successful completion of the course, students will be able to:

- Design Combinational Circuits using basic building blocks. Simplify these circuits using Boolean algebra and Karnaugh maps. Differentiate between combinational circuits and sequential circuits.
- Represent data in binary form, convert numeric data between different number systems and perform arithmetic operations in binary.
- Determine various stages of instruction cycle, pipelining and describe interrupts and their handling.
- Explain how CPU communicates with memory and I/O devices and distinguish between different types of processors.
- Simulate the design of a basic computer using a software tool.

SYLLABUS OF DSC - 2

Theory

Unit – 1 (6 hours)

Digital Logic Circuits

Logic Gates, Truth Tables, Boolean Algebra, Digital Circuits, Combinational Circuits, Introduction to Sequential Circuits, Circuit Simplification using Karnaugh Map, Don't Care Conditions, Flip-Flops, Characteristic Tables, Excitation Table.

Unit – 2 (9 hours)

Digital Components (Fundamental building blocks)

Designing of combinational circuits- Half Adder, Full Adder, Decoders, Encoders, Multiplexers, Registers and Memory (RAM, ROM and their types), Arithmetic Microoperations, Binary Adder, Binary Adder-Subtractor.

Unit – 3 (6 hours)

Data Representation and Basic Computer Arithmetic

Number System, r and $(r-1)$'s Complements, data representation and arithmetic operations.

Unit – 4 (9 hours)

Basic Computer Organization and Design

Bus organization, Microprogrammed vs Hardwired Control, Instruction Codes, Instruction Format, Instruction Cycle, Instruction pipelining, Memory Reference, Register Reference and Input Output Instructions, Program Interrupt and Interrupt Cycle..

Unit – 5 (6 hours)

Processors

General register organization, Stack Organization, Addressing Modes, Overview of Reduced Instruction Set Computer (RISC), Complex Instruction Set Computer (CISC), Multicore processor and Graphics Processing Unit (GPU).

Unit – 6 (9 hours)

Memory and Input-Output Organization

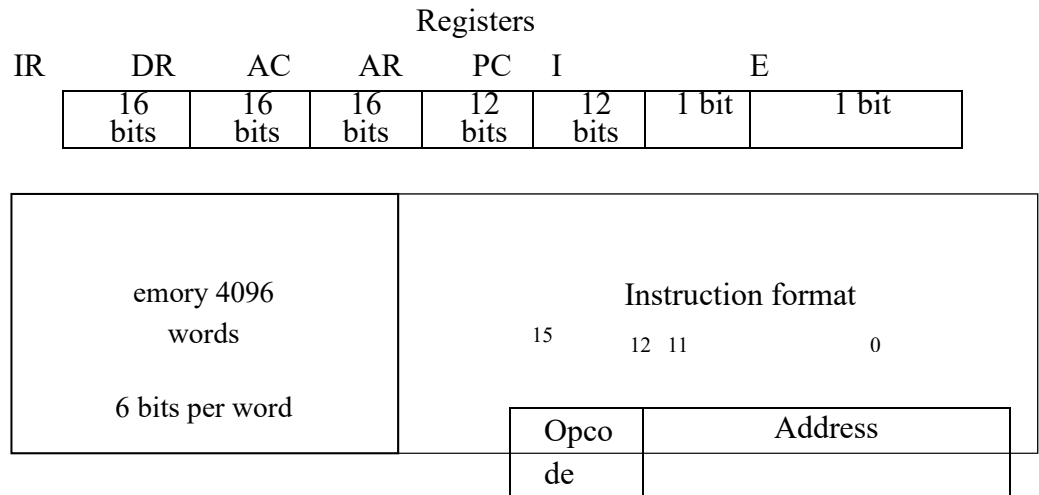

Memory hierarchy (main, cache and auxiliary memory), Input-Output Interface, Modes of Transfer: Programmed I/O, Interrupt initiated I/O, Direct memory access.

Practical (30 hours)

List of Practicals:

(Use Simulator – CPU Sim 3.6.9 or any higher version for the implementation)

1. Create a machine based on the following architecture:

Basic Computer Instructions

| Memory Reference | | | Register Reference | |
|------------------|------|---------------------|--------------------|------|
| Symbol | Hex | | Symbol | Hex |
| AND | 0xxx | Direct Addressing | CLA | 7800 |
| ADD | 1xxx | | CLE | 7400 |
| LDA | 2xxx | | CMA | 7200 |
| STA | 3xxx | | CME | 7100 |
| BUN | 4xxx | | CIR | 7080 |
| BSA | 5xxx | | CIL | 7040 |
| ISZ | 6xxx | | INC | 7020 |
| AND_I | 8xxx | Indirect Addressing | SPA | 7010 |
| ADD_I | 9xxx | | SNA | 7008 |
| LDA_I | Axxx | | SZA | 7004 |
| STA_I | Bxxx | | SZE | 7002 |
| BUN_I | Cxxx | | HLT | 7001 |
| BSA_I | Dxxx | | INP | F800 |
| ISZ_I | Exxx | | OUT | F400 |

Refer to Chapter-5 of reference 1 for description of instructions.

Design the register set, memory and the instruction set. Use this machine for the assignments of this section.

2. Create a Fetch routine of the instruction cycle.

3. Write an assembly program to simulate ADD operation on two user-entered numbers.
4. Write an assembly program to simulate SUBTRACT operation on two user-entered numbers.
5. Write an assembly program to simulate the following logical operations on two user-entered numbers.
 - i. AND
 - ii. OR
 - iii. NOT
 - iv. XOR
 - v. NOR
 - vi. NAND
6. Write an assembly program for simulating following memory-reference instructions.
 - i. ADD
 - ii. LDA
 - iii. STA
 - iv. BUN
 - v. ISZ
7. Write an assembly language program to simulate the machine for following register reference instructions and determine the contents of AC, E, PC, AR and IR registers in decimal after the execution:
 - i. CLA
 - ii. CMA
 - iii. CME
 - iv. HLT
8. Write an assembly language program to simulate the machine for following register reference instructions and determine the contents of AC, E, PC, AR and IR registers in decimal after the execution:
 - i. INC
 - ii. SPA
 - iii. SNA
 - iv. SZE

9. Write an assembly language program to simulate the machine for following register reference instructions and determine the contents of AC, E, PC, AR and IR registers in decimal after the execution:
 - i. CIR
 - ii. CIL
10. Write an assembly program that reads in integers and adds them together; until a negative non-zero number is read in. Then it outputs the sum (not including the last number).
11. Write an assembly program that reads in integers and adds them together; until zero is read in. Then it outputs the sum.

Essential Readings

- David A. Patterson and John L. Hennessy. “Computer Organization and Design: The Hardware/Software interface”, 5th edition, Elsevier, 2012.
- Mano, M. Computer System Architecture, 3rd edition, Pearson Education, 1993.

Suggestive Readings

- Mano, M. Digital Design, Pearson Education Asia, 1995.
- Null, L., & Lobur, J. The Essentials of Computer Organization and Architecture. 5th edition, (Reprint) Jones and Bartlett Learning, 2018.
- Stallings, W. Computer Organization and Architecture Designing for Performance 8th edition, Prentice Hall of India, 2010.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 3: MATHEMATICS FOR COMPUTING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------|---------|-----------------------------------|----------|---------------------|--|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Mathematics for Computing | 4 | 3 | 0 | 1 | | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Introduces the students to the fundamental concepts and topics of linear algebra and vector calculus.
- To build the foundation for some of the core courses in later semesters.

Learning Outcomes

This course will enable the students to:

- Perform operations on matrices and sparse matrices.
- Compute the determinant, rank and eigenvalues of a matrix.
- Perform diagonalization.
- Perform operations on vectors, the dot product and cross product.
- Represent vectors geometrically and calculate the gradient, divergence, curl.
- Apply linear algebra and vector calculus to solve problems in sub-disciplines of computer science.

SYLLABUS OF DSC – 3

Theory

Unit – 1 (6 hours)

Introduction to Matrix Algebra

Echelon form of a Matrix, Rank of a Matrix, Determinant and Inverse of a matrix, Solution of System of Homogeneous & Non-Homogeneous Equations: Gauss elimination and Solution of System of Homogeneous Equations: Gauss Jordan Method.

Unit – 2 (21 hours)

Vector Space and Linear Transformation

Vector Space, Sub-spaces, Linear Combinations, Linear Span, Convex Sets, Linear Independence/Dependence, Basis & Dimension, Linear transformation on finite dimensional vector spaces, Inner Product Space, Schwarz Inequality, Orthonormal Basis, Gram-Schmidt Orthogonalization Process.

Unit – 3 (9 hours)

EigenValue and EigenVector

Characteristic Polynomial, Cayley Hamilton Theorem, Eigen Value and Eigen Vector of a matrix, Eigenspaces, Diagonalization, Positive Definite Matrices, Applications to Markov Matrices.

Unit – 4

(9 hours)

Vector Calculus

Vector Algebra, Laws of Vector Algebra, Dot Product, Cross Product, Vector and Scalar Fields, Ordinary Derivative of Vectors, Space Curves, Partial Derivatives, Del Operator, Gradient of a Scalar Field, Directional Derivative, Gradient of Matrices, Divergence of a Vector Field, Laplacian Operator, Curl of a Vector Field.

Practical

(30 hours)

List of Practicals:

1. Create and transform vectors and matrices (the transpose vector (matrix) conjugate transpose of a vector (matrix))
2. Generate the matrix into echelon form and find its rank.
3. Find cofactors, determinant, adjoint and inverse of a matrix.
4. Solve a system of Homogeneous and non-homogeneous equations using Gauss elimination method.
5. Solve a system of Homogeneous equations using the Gauss Jordan method.
6. Generate basis of column space, null space, row space and left null space of a matrix space.
7. Check the linear dependence of vectors. Generate a linear combination of given vectors of R^n / matrices of the same size and find the transition matrix of given matrix space.
8. Find the orthonormal basis of a given vector space using the Gram-Schmidt orthogonalization process.
9. Check the diagonalizable property of matrices and find the corresponding eigenvalue and verify the Cayley- Hamilton theorem.
10. Application of Linear algebra: Coding and decoding of messages using nonsingular matrices.
eg code “Linear Algebra is fun” and then decode it.
11. Compute Gradient of a scalar field.
12. Compute Divergence of a vector field.
13. Compute Curl of a vector field.

Essential Reading

B.A (Prog) with Computer Science as Major

CATEGORY-II

DISCIPLINE SPECIFIC CORE COURSE – 1: INTRODUCTION TO PROGRAMMING USING C++

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Programming using C++ | 4 | 3 | 0 | 1 | Class XII pass | Nil |

Learning Objectives

This course is designed to:

- Introduce programming concepts using C++ to students.
- Develop structured as well as object-oriented programming skills using C++ programming language.
- Achieve competence amongst its students to develop correct and efficient C++ programs to solve problems spanning multiple disciplines.

Learning outcomes

On successful completion of the course, students will be able to:

- Write simple programs using built-in data types of C++.
- Implement arrays and user defined functions in C++.
- Solve problems spanning multiple disciplines using suitable programming constructs in C++.
- Solve problems spanning multiple disciplines using the concepts of object oriented programming in C++.

SYLLABUS OF DSC - 1

Theory

Unit – 1

(3 hours)

Introduction to C++

Need and characteristics of Object-Oriented Programming, Structure of a C++ Program (main () function, header files, output, input, comments), compile and execute a simple program

Unit – 2 (9 hours)

Data types and Expressions

Keywords, built in data types, variables and constants, naming convention, Input-Output statements, operators and their precedence, expressions, typecasting, library functions

Unit – 3 (12 hours)

Control Constructs in C++

Decision making using selection constructs, iteration using looping constructs.

Unit – 4 (6 hours)

Arrays, Pointers and User Defined Functions

Defining and initializing single and multi-dimensional arrays, user defined functions, passing arguments to functions, returning values from functions, inline functions, default arguments, introduction to pointers

Unit – 5 (15 hours)

Classes and Objects

Need and implementation of abstraction, encapsulation, inheritance and polymorphism, creating classes, objects as function arguments, modifiers and access control, constructors and destructors.

Practical (30 hours)

List of Practicals:

1. Write a program to find the largest of n natural numbers.
2. Write a program to find whether a given number is prime or not.
3. Write a program that takes a positive integer n and the produce n lines of output as shown:
*

* *

* * *

* * * *

(for n = 4)
4. Write a menu driven program for following:
 - a. to check whether a given number is odd or even.
 - b. display a fibonacci series
 - c. compute factorial of a number
5. Write a program to accept a number, reverse it and print the sum of its digits.
6. Write a program using functions to print the series and its sum:
 $1 + 1/2! + 1/3! + \dots + 1/n!$
7. Write a program to perform the following operations on an input string
 - a. Print length of the string

- b. Find frequency of a character in the string
 - c. Print whether characters are in uppercase or lowercase
 - d. to check whether a given string is palindrome or not.
8. Write a program that will prompt the user for a list of 5 prices. Compute the average of the prices and find out all the prices that are higher than the calculated average.
9. Design a class named Vehicle, having registration number and year as its private members. Define a suitable constructor and a method to print the details of a vehicle. Write a C++ program to test the above class.
10. Inherit a class Car from the Vehicle class defined above. Add model to the Car class. Define a suitable constructor and a method to print the details of a car. Write a C++ program to test inheritance of this class.

Essential Readings

- E. Balaguruswamy, Object Oriented Programming with C++, 7th edition, McGraw-Hill Education, 2017.
- 2. Robert Lafore, Object Oriented Programming in C++, 4th edition, SAMS Publishing, 2008.

Suggestive Reading

- D.S. Malik, C++ Programming: From Problem Analysis to Program Design, 6th edition, Cengage Learning, 2013.
- (ii) Herbert Schildt, C++: The Complete Reference, 4th Edition, McGraw Hill, 2003.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2: PROGRAMMING FUNDAMENTALS USING PYTHON

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre- requisite of the course (if any) |
|---|---------|-----------------------------------|----------|------------------------|-------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Programming Fundamentals Using Python | 4 | 3 | 0 | 1 | Class XII pass | Nil |

Learning Objectives

This course is designed to:

- Introduce programming concepts using Python to students.

- Develop structured as well as object-oriented programming skills using Python.
- Achieve competence amongst its students to develop correct and efficient Python programs to solve problems spanning multiple disciplines.

Learning Outcomes

On successful completion of this course, a student will be able to:

- Write simple programs using built-in data types of Python.
- Implement arrays and user defined functions in Python.
- Solve problems spanning multiple disciplines using suitable programming constructs in Python.
- Solve problems spanning multiple disciplines using the concepts of object-oriented programming in Python.

SYLLABUS OF DSC - 2

Theory

Unit – 1 (6 hours)

Introduction to Python Programming

Problem solving strategies; Structure of a Python program; Syntax and semantics; Python interpreter/shell, indentation; Executing simple programs in Python.

Unit – 2 (12 hours)

Creating Python Programs

Identifiers and keywords; literals, numbers, and strings; Operators and expressions; Input and output statements; control structures (conditional statements, loop control statements, break, continue and pass), Errors and exception handling.

Unit – 3 (9 hours)

User Defined Functions

Defining functions, passing arguments and returning values, default arguments

Unit – 4 (18 hours)

Built-in Data Structures

Strings, Lists, Tuples, Sets, Dictionaries; their built-in functions, operators and operations

Practical (30 hours)

List of Practicals:

1. WAP to calculate total marks, percentage and grade of a student. Marks obtained in each of three subjects are to be input by the user. Assign grades according to the following criteria:

Grade A : if Percentage ≥ 80

Grade B : if Percentage ≥ 60 and Percentage < 80

Grade C : if Percentage ≥ 40 and Percentage < 60

Grade D : if Percentage ≤ 40

2. WAP to print factors of a given number.
3. WAP to add N natural numbers and display their sum.
4. WAP to print the following conversion table (use looping constructs):

| Height (in Feet) | Height (in inches) |
|------------------|--------------------|
| 5.0 ft | 60 inches |
| 5.1 ft | 61.2 inches |
| 5.8 ft | 69.6 inches |
| 5.9 ft | 70.8 inches |
| 6.0 ft | 72 inches |

5. WAP that takes a positive integer n and the produce n lines of output as shown:

```
*
* *
* * *
* * * *
```

(for n =4)

6. Write a menu driven program using user defined functions to print the area of rectangle, square, circle and triangle by accepting suitable input from user.
7. Write a function that calculates factorial of a number n.
8. WAP to print the series and its sum: (use functions)
 $1/1! + 1/2! + 1/3! + \dots + 1/n!$
9. WAP to perform the following operations on an input string
 - a. Print length of the string
 - b. Find frequency of a character in the string
 - c. Print whether characters are in uppercase or lowercase
10. WAP to create two lists: one of even numbers and another of odd numbers. The program should demonstrate the various operations and methods on lists.
11. WAP to create a dictionary where keys are numbers between 1 and 5 and the values are the cubes of the keys.
12. WAP to create a tuple $t1 = (1,2,5,7,2,4)$. The program should perform the following:
 - a. Print tuple in two lines, line 1 containing the first half of tuple and second line having the second half.
 - b. Concatenate tuple $t2 = (10,11)$ with $t1$.

Learning Objectives

The Learning Objectives of this course are as follows:

- Introduce programming concepts using C++ to students.
- Develop structured as well as object-oriented programming skills using C++ programming language.
- Achieve competence amongst its students to develop correct and efficient C++ programs to solve problems spanning multiple domains.

Learning outcomes

This course will enable the students to:

- Write simple programs using built-in data types of C++.
- Implement arrays and user defined functions in C++.
- Write programs using dynamic memory allocation, handling external files, interrupts and exceptions.
- Solve problems spanning multiple domains using suitable programming constructs in C++.
- Solve problems spanning multiple domains using the concepts of object oriented programming in C++.

SYLLABUS OF DSC

Theory

Unit – 1

(3 hours)

Introduction to C++

Need and characteristics of Object-Oriented Programming, Structure of a C++ Program (main () function, header files, output, input, comments), compile and execute a simple program

Unit – 2

(12 hours)

Programming Fundamentals

Data types, Variables, Operators, Expressions, Arrays, Keywords, Decision making constructs, Iteration, Type Casting, Input-output statements, Functions, Command Line Arguments/Parameters

Unit – 3 (9 hours)

Object Oriented Programming

Concepts of Abstraction, Encapsulation. Creating Classes and objects, Modifiers and Access Control, Constructors, Destructors, Implementation of Inheritance and Polymorphism, Template functions and classes.

Unit – 4 (9 hours)

Pointers and References

Static and dynamic memory allocation, Pointer and Reference Variables, Implementing Runtime polymorphism using pointers and references.

Unit – 5 (12 hours)

Exception and File Handling

Using try, catch, throw, throws and finally; Nested try, File I/O Basics, File Operations

Practical (30 hours)

List of Practicals:

1. Write a program to compute the sum of the first n terms of the following series:

$$S = 1 - 2^n + 3^n - 4^n + \dots$$

The number of terms n is to be taken from the user through the command line. If the command line argument is not found then prompt the user to enter the value of n.

2. Write a program to display the following pattern:

A
BA
CBA
DCBA

The number of rows n, is to be taken from the user.

3. Write a program to compute the factors of a given number using the default argument.
4. Write a menu driven program to perform the following operations on an array:
 - a. Find the minimum, maximum and average of the array elements
 - b. Search an element in the array using linear search
 - c. Search an element in the array using binary search (both iterative and recursive versions)
 - d. Display the address of every element of the array
5. Write a menu driven program to perform the following operations on a string:

- a. Calculate length of the string (use pointers)
 - b. Check whether the first character of every word in the string is in uppercase or not
 - c. Reverse the string
 - d. Display the address of every character in the string
6. Create a class Triangle. Include overloaded functions for calculating the area of a triangle.
7. Create a template class TwoDim which contains x and y coordinates. Define default constructor, parameterized constructor and void print() function to print the coordinates. Now reuse this class in ThreeDim adding a new dimension as z. Define the constructors and void print() in the subclass. Implement main() to show runtime polymorphism.
8. Copy the contents of one text file to another file and display the number of characters copied.

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

GENERIC ELECTIVES: PROGRAMMING USING C++

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre- requisite of the course (if any) |
|---------------------------------------|---------|-----------------------------------|----------|------------------------|-------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Programming using C++ Code: | 4 | 3 | 0 | 1 | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Introduce programming concepts using C++ to students.
- Develop structured as well as object-oriented programming skills using C++ programming language.
- Achieve competence amongst its students to develop correct and efficient C++ programs to solve problems in their respective domains

Learning Outcomes

Upon completion of this course, students will be able to:

- Write simple programs using built-in data types of C++.
- Implement arrays and user defined functions in C++.
- Solve problems in the respective domain using suitable programming constructs in C++.
- Solve problems in the respective domain using the concepts of object oriented programming in C++.

SYLLABUS OF GE

Theory

Unit – 1

Introduction to C++

(9 hours)

Overview of Procedural and Object-Oriented Programming, Using main() function, Header Files, Compiling and Executing Simple Programs in C++.

Unit – 2 (15 hours)

Programming Fundamentals

Data types, Variables, Operators, Expressions, Arrays, Keywords, Decision making constructs, Iteration, Type Casting, Input-output statements, Functions

Unit – 3 (21 hours)

Object Oriented Programming

Concepts of Abstraction, Encapsulation. Creating Classes and objects, Modifiers and Access Control, Constructors, Destructors, Implementation of Inheritance and Polymorphism, Template functions and classes

Practical (30 hours)

List of Practicals:

1. Write a program to compute the sum of the first n terms of the following series:

$$S = 1 - 2 + 3 - 4 + \dots n$$

The number of terms n is to be taken from the user through the command line. If the command line argument is not found then prompt the user to enter the value of n.

2. Write a program to display the following pattern:

```
1
22
333
4444
55555
```

The number of rows n, is to be taken from the user.

3. Write a program to compute the factors of a given number.
4. Write a menu driven program to perform the following operations on an array:
 - a. Find the minimum, maximum and average of the array elements
 - b. Search an element in the array using linear and binary search
5. Write a menu driven program to perform the following operations on a string:
 - a. Calculate length of the string

- b. Check whether the first character of every word in the string is in uppercase or not
 - c. Reverse the string
6. Create a class Triangle. Include overloaded functions for calculating the area of a triangle.
7. Create a template class TwoDim which contains x and y coordinates. Define default constructor, parameterized constructor and void print() function to print the co-ordinates. Now reuse this class in ThreeDim adding a new dimension as z. Define the constructors and void print() in the subclass. Implement main() to show runtime polymorphism.

Essential Readings

- Stephen Prata, C++ Primer Plus, 6th Edition, Pearson India, 2015.
- E Balaguruswamy, Object Oriented Programming with C++, 8th edition, McGraw-Hill Education, 2020.
- D.S. Malik, C++ Programming: From Problem Analysis to Program Design, 6th edition, Cengage Learning, 2013.

Suggestive Reading

- Herbert Schildt, C++: The Complete Reference, 4th edition, McGraw Hill, 2003.
- A. B. Forouzan, Richard F. Gilberg, Computer Science: A Structured Approach using C++, 2nd edition, Cengage Learning, 2010.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES: PROGRAMMING WITH PYTHON

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Programming with Python Code: | 4 | 3 | 0 | 1 | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Introduce programming concepts using Python to students.
- Develop structured as well as object-oriented programming skills using Python.

- Achieve competence amongst its students to develop correct and efficient Python programs to solve problems in their respective domains.

Learning outcomes

On successful completion of the course, students will be able to:

- Write simple programs using built-in data structures in Python.
- Implement arrays and user defined functions in Python.
- Solve problems in the respective domain using suitable programming constructs in Python.
- Solve problems in the respective domain using the concepts of object oriented programming in Python.

SYLLABUS OF GE

Theory

Unit - 1 (6 hours)

Introduction to Programming

Problem solving strategies; Structure of a Python program; Syntax and semantics; Executing simple programs in Python.

Unit - 2 (15 hours)

Creating Python Programs

Identifiers and keywords; Literals, numbers, and strings; Operators; Expressions; Input/output statements; Defining functions; Control structures (conditional statements, loop control statements, break, continue and pass, exit function), default arguments.

Unit - 3 (15 hours)

Built-in Data Structures

Mutable and immutable objects; Strings, built-in functions for string, string traversal, string operators and operations; Lists creation, traversal, slicing and splitting operations, passing list to a function; Tuples, sets, dictionaries and their operations.

Unit - 4 (9 hours)

File and Exception Handling

File handling through libraries; Errors and exception handling.

Practical (30 hours)

List of Practicals:

1. WAP to find the roots of a quadratic equation.
2. WAP to accept a number 'n' and
 - a. Check if 'n' is prime
 - b. Generate all prime numbers till 'n'

- c. Generate first 'n' prime numbers
 - d. This program may be done using functions.
3. WAP to create a pyramid of the character '*' and a reverse pyramid

```

      *
     ***
    *****
   ********
  **********
 **********

          *****
         *****
        *****
       *****
      *****
     *****
    *****
   *****
  *****
 *****

```

4. WAP that accepts a character and performs the following:
- a. print whether the character is a letter or numeric digit or a special character
 - b. if the character is a letter, print whether the letter is uppercase or lowercase
 - c. if the character is a numeric digit, prints its name in text (e.g., if input is 9, output is NINE)
5. WAP to perform the following operations on a string
- a. Find the frequency of a character in a string.
 - b. Replace a character by another character in a string.
 - c. Remove the first occurrence of a character from a string.
 - d. Remove all occurrences of a character from a string.
6. WAP to swap the first n characters of two strings.
7. Write a function that accepts two strings and returns the indices of all the occurrences of the second string in the first string as a list. If the second string is not present in the first string then it should return -1.
8. WAP to create a list of the cubes of only the even integers appearing in the input list (may have elements of other types also) using the following:
- a. 'for' loop
 - b. list comprehension
9. WAP to read a file and

- a. Print the total number of characters, words and lines in the file.
 - b. Calculate the frequency of each character in the file. Use a variable of dictionary type to maintain the count.
 - c. Print the words in reverse order.
 - d. Copy even lines of the file to a file named 'File1' and odd lines to another file named 'File2'.
10. Write a function that prints a dictionary where the keys are numbers between 1 and 5 and the values are cubes of the keys.
11. Consider a tuple t1=(1, 2, 5, 7, 9, 2, 4, 6, 8, 10). WAP to perform following operations:
- a. Print half the values of the tuple in one line and the other half in the next line.
 - b. Print another tuple whose values are even numbers in the given tuple.
 - c. Concatenate a tuple t2=(11,13,15) with t1.
 - d. Return maximum and minimum value from this tuple
12. WAP to accept a name from a user. Raise and handle appropriate exception(s) if the text entered by the user contains digits and/or special characters.

Essential Readings

- Taneja, S., Kumar, N., Python Programming- A modular Approach, Pearson Education India, 2018.
- Balaguruswamy E., Introduction to Computing and Problem Solving using Python, 2nd edition, McGraw Hill Education, 2018.

Suggestive Reading

- Brown, Martin C., Python: The Complete Reference, 2nd edition, McGraw Hill Education, 2018.
- Guttag, J.V. Introduction to computation and programming using Python, 2nd edition, MIT Press, 2016.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DEPARTMENT OF OPERATIONAL RESEARCH
B.Sc. (H) Operational Research
Category-I

**DISCIPLINE SPECIFIC CORE COURSE - 1: INTRODUCTION TO
 OPERATIONAL RESEARCH AND LINEAR PROGRAMMING**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|------------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Operational Research and Linear Programming | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

The Learning Objective of the course is to introduce:

- Basic concepts of Operational Research and Linear Programming to the students.

Learning Outcomes:

After completion of the course, students will possess knowledge and skills required to:

- Gain an understanding of key concepts of Operational Research and Linear Programming and their role in various organizations.
- Describe the basic concepts of convex analysis and explain the theoretical foundations of various issues related to linear programming modelling.
- Formulate real-world problems as a linear programming model and describe the theoretical workings of the graphical and simplex method, demonstrate the solution process by hand and solver.
- Implement advanced and more economic algorithm to solve linear programming problems.

SYLLABUS OF DSC-1

Theory

Unit – 1 (9 hours)

Basics of Operational Research: Origin & Development of Operational Research, Definition and Meaning of Operational Research, Different Phases of an Operational Research Study, Scope and Limitations of Operational Research, Mathematical Formulation of Real-Life Problems.

Unit – 2 (15 hours)

Introduction to Linear Programming, Linear Programming Problem Formulation, Solution by Graphical Method. Concepts of Basis and Basic Feasible solution. Convex sets, Extreme points, Hyperplanes and Halfspaces, Convex cones, Polyhedral sets and cones.

Unit – 3 (9 hours)

Theory of Simplex Method, Simplex Algorithm, Two phase Method, Charne's-M Method.

Unit – 4 (12 hours)

Degeneracy in Linear Programming, Charnes' Perturbation method, Revised Simplex method.

Practical

Practical/Lab to be performed on a computer using OR/Statistical packages

- To solve Linear Programming Problem (LPP) using Graphical Method with
 - Unbounded solution.
 - Infeasible solution.
 - Alternative or multiple solutions.
- Solution of LPP with simplex method.
- Problem solving using Charnes-M method.
- Problem solving using Two Phase method.
- Illustration of following special cases in LPP using Simplex method
 - Unrestricted variables.
 - Unbounded solution.
 - Infeasible solution.
 - Alternative or multiple solutions.
- Solution to linear programming problem through revised simplex method.

Essential Readings

- Hadley, G. (2002). Linear programming. New Delhi: Narosa Publishing House.
- Hadley, G. (2002). Linear Algebra. New Delhi: Narosa Publishing House.
- Hillier, F.S., & Lieberman, G. J. (2010). Introduction to operations research- concepts and cases (9th ed.). New Delhi: Tata McGraw Hill (Indian print).
- Taha, H. A. (2017). Operations research - An Introduction (10th ed.). Pearson Education.
- Ravindran, A., Phillips, D. T., & Solberg, J. J. (2005). Operations research- principles and practice (2nd ed.). New Delhi: Wiley India (P.) Ltd. (Indian print).

DISCIPLINE SPECIFIC CORE COURSE - 2: LINEAR ALGEBRA AND CALCULUS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Linear Algebra and Calculus | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | NIL |

Learning Objectives

The Learning Objectives of the course is to provide a platform for:

- Introduction to linear algebra and calculus.
- Providing the rudimentary idea of Mathematics to be useful in the course of Operational Research.

Learning Outcomes

After completion of the course, students will possess knowledge and skills required to:

- Gain an understanding of key concepts of Linear Algebra and Calculus and their role in Operations Research.
- Describe the basic concepts of matrices and system of linear equations.
- Demonstrate the understanding of linear combinations, Linear span, Basis and Eigen values and related theorems.
- Explain the fundamentals of Limit, Continuity and Differentiability.
- Demonstrate the utility of Maxima, Minima and Lagrangian function.

SYLLABUS OF DSC - 2

Theory

Unit – 1

(16 hours)

Matrices & System of Linear Equations: Matrix Algebra, Types of Matrices, Elementary row operations on a Matrix, Echelon form of a Matrix, Rank of a Matrix, Inverse of a matrix, Solution of System of Homogeneous & Non-Homogeneous Equations.

Unit – 2

(16 hours)

Vector Spaces: Definition, Sub-spaces, Linear Combinations, Linear independence and dependence of vectors, Linear Span, Basis & Dimension, Eigen Values, Eigen Vectors, Characteristic Polynomial, Diagonalization, Cayley Hamilton Theorem.

Unit – 3

(16 hours)

Calculus: Functions of one variable: Limit, continuity, Differentiability, Intermediate value theorem, Rolle's Theorem, Mean value theorem, Cauchy's mean value theorem, Taylor series, Maclaurin series.

Unit – 4

(12 hours)

Concepts of Maxima and Minima, Lagrangian function and its geometric interpretation.

Practical component (if any) – NIL

Essential Readings

- Lay, D. C. (2015). Linear Algebra and its Applications (5th ed.). Pearson.
- Lang, S. (2004). Linear Algebra (3rd ed.). Springer.
- George, B. T. Jr. and Finney, R. L. (2010). Calculus and Analytic Geometry (9th ed.). Pearson.

- Strang, G. (2016). Introduction to Linear Algebra (5th ed.). Wellesey-Cambridge Press.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE - 3: PRODUCTION AND INVENTORY MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Production and Inventory Management | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | NIL |

Learning Objectives

The Learning Objectives of this course is to:

- Introduce fundamental concepts in production and inventory management.
- Develop the students' modelling and analytical skills.

Learning Outcomes

After completion of the course, students will possess knowledge and skills required to:

- Gain an understanding of key concepts of Production and Inventory management and its role in various organizations.
- Apply selective inventory control techniques and understand its significance.
- Determine optimal order quantity for various deterministic and probabilistic inventory models.
- Understand quantity discount models in inventory management.
- Formulate and develop Production Planning and Scheduling models.
- To apply and extend production and inventory models to analyse real world systems.

SYLLABUS OF DSC – 3

Theory

Unit – 1

(9 hours)

Introduction to Production and Inventory Management, Different types of costs in inventory system, Selective inventory classification (VED, XML, FNSD, ABC) and its use in controlling inventory.

Unit – 2

(15 hours)

Deterministic continuous review models: Economic order quantity (EOQ) model with and without shortages, Finite replenishment rate Inventory models without and with planned shortages. Determination of reorder point, Quantity discount models.

Unit – 3

(9 hours)

Probabilistic inventory models: Single period probabilistic inventory models with discrete and continuous demand.

Unit – 4

(12 hours)

Introduction to Production Planning and Scheduling, Aggregate production plan, Formulation of lot size production problem: Wagner and Whitin algorithm. Basic concepts of Just-in-Time (JIT) and Material Requirement Planning (MRP).

Practical

(30 hours)

Practical/Lab to be performed on a computer using OR/Statistical packages

1. Problems based on selective inventory classification. (ABC and FNS analysis)
2. To find optimal inventory policy for EOQ model.
3. To find optimal inventory policy for EOQ model with finite supply.
4. To find optimal inventory policy for EOQ model with backorders.
5. To solve all units quantity discounts model.
6. To solve Incremental quantity discount model
7. To find optimal inventory policy for Probabilistic inventory model with discrete demand.
8. To find optimal inventory policy for Probabilistic inventory model with continuous.
9. Solution of procurement/production scheduling model.

Essential Readings

3. Problem solving using Charnes-M method.
4. Problem solving using Two Phase method.
5. Illustration of following special cases in LPP using Simplex method
 - (v) Unrestricted variables.
 - (vi) Unbounded solution.
 - (vii) Infeasible solution.
 - (viii) Alternative or multiple solutions.
6. Solution to linear programming problem through revised simplex method.

Essential Readings

- Hadley, G. (2002). Linear programming. New Delhi: Narosa Publishing House.
- Hadley, G. (2002). Linear Algebra. New Delhi: Narosa Publishing House.
- Hillier, F.S., & Lieberman, G. J. (2010). Introduction to operations research- concepts and cases (9th ed.). New Delhi: Tata McGraw Hill (Indian print).
- Taha, H. A. (2017). Operations research - An Introduction (10th ed.). Pearson Education.
- Ravindran, A., Phillips, D. T., & Solberg, J. J. (2005). Operations research- principles and practice (2nd ed.). New Delhi: Wiley India (P.) Ltd. (Indian print).

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED
BY DEPARTMENT OF OPERATIONAL RESEARCH

CATEGORY-IV

**GENERIC ELECTIVES: INTRODUCTION TO OPERATIONAL
RESEARCH AND LINEAR PROGRAMMING**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Operational Research and Linear Programming | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

The Learning Objective of the course is to introduce:

- Basic concepts of Operational Research and Linear Programming to the students.

Learning Outcomes:

After completion of the course, students will possess knowledge and skills required to:

- Gain an understanding of key concepts of Operational Research and Linear Programming and their role in various organizations.
- Describe the basic concepts of convex analysis and explain the theoretical foundations of various issues related to linear programming modelling.
- Formulate real-world problems as a linear programming model and describe the theoretical workings of the graphical and simplex method, demonstrate the solution process by hand and solver.
- Implement advanced and more economic algorithm to solve linear programming problems.

SYLLABUS OF GE

Theory

Unit – 1

(9 hours)

Basics of Operational Research: Origin & Development of Operational Research, Definition and Meaning of Operational Research, Different Phases of an Operational Research Study, Scope and Limitations of Operational Research, Mathematical Formulation of Real-Life Problems.

Unit – 2 **(15 hours)**

Introduction to Linear Programming, Linear Programming Problem Formulation, Solution by Graphical Method. Concepts of Basis and Basic Feasible solution. Convex sets, Extreme points, Hyperplanes and Halfspaces, Convex cones, Polyhedral sets and cones.

Unit – 3 **(9 hours)**

Theory of Simplex Method, Simplex Algorithm, Two phase Method, Charne's-M Method.

Unit – 4 **(12 hours)**

Degeneracy in Linear Programming, Charnes' Perturbation method, Revised Simplex method.

Practical **(30 hours)**

Practical/Lab to be performed on a computer using OR/Statistical packages

1. To solve Linear Programming Problem (LPP) using Graphical Method with
 - (i) Unbounded solution.
 - (ii) Infeasible solution.
 - (iii) Alternative or multiple solutions.
2. Solution of LPP with simplex method.
3. Problem solving using Charnes-M method.
4. Problem solving using Two Phase method.
5. Illustration of following special cases in LPP using Simplex method
 - (i) Unrestricted variables.
 - (ii) Unbounded solution.
 - (iii) Infeasible solution.
 - (iv) Alternative or multiple solutions.
6. Solution to linear programming problem through revised simplex method.

Essential Readings

- Hadley, G. (2002). Linear programming. New Delhi: Narosa Publishing House.
- Hadley, G. (2002). Linear Algebra. New Delhi: Narosa Publishing House.
- Hillier, F.S., & Lieberman, G. J. (2010). Introduction to operations research- concepts and cases (9th ed.). New Delhi: Tata McGraw Hill (Indian print).
- Taha, H. A. (2017). Operations research - An Introduction (10th ed.). Pearson Education.
- Ravindran, A., Phillips, D. T., & Solberg, J. J. (2005). Operations research- principles and practice (2nd ed.). New Delhi: Wiley India (P.) Ltd. (Indian print).

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

11. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 18-1-8 dated 18.08.2022 regarding Syllabi of 1st Semester of Departments under Faculty of Applied Social Sciences & Humanities

Add the following:

Syllabi of Semester-I of the following departments under Faculty of Applied Social Sciences & Humanities based on Under Graduate Curriculum Framework -2022 to be implemented from the Academic Year 2022-23.

FACULTY OF APPLIED SOCIAL SCIENCES AND HUMANITIES
(FASSH)

DEPARTMENT OF FINANCE & BUSINESS ECONOMICS

Bachelor in Management Studies (Honours)

Category I

DISCIPLINE SPECIFIC CORE COURSE -1 (DSC-1) – FUNDAMENTALS OF MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC-1 FUNDAMENTALS OF MANAGEMENT | 4 | 3 | 1 | NIL | CLASS XII PASS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To acquaint the students with the fundamentals of managing business
- To introduce the broad functions of management
- Enable students to identify the contemporary issues and challenges in the field of management and ethical workplace practices.

Learning outcomes

On completion of this course students will be able to:

- Summarize the elementary concepts, principles and theories of management
- Examine the managerial functions having an impact on the organizational effectiveness
- Identify the contemporary issues and challenges in management

SYLLABUS OF DSC-1

UNIT – I: Introduction to Management (12 hours)

Definition – nature, process and significance of management – Role of managers – Managerial Skills and Roles - Evolution of Management Thought: Classical Management Approaches, Behavioural Management Approaches, Quantitative Management Approach, Modern Management Approaches - Management as a Science or Art - Management as a profession- Administration and Management Functions of Management – Functional Areas of Management.

UNIT - 2: Planning and Decision Making (12 hours)

Planning - Nature and Importance of Planning- Types of Plans - Levels of Planning - Steps in planning – Making Effective Plans- Objectives and Management by Objective (MBO) – Management by Exception (MBE) - Policy and Strategy- Forecasting and Decision Making - Nature of decision making - Types of decisions – Decision Making Process – Rational Perspectives and Behavioural Aspects of decision making.

UNIT- 3: Organizing, Directing and Controlling (16 hours)

Organizing, Principles of Organization - Organisational Structure and Design – Line, Staff and functional authority. Departmentation - Span of control – Authority – Types of Departmentalization – Contemporary Organizational Designs, Responsibility and Accountability - Principles of Delegation - Steps - Centralization Vs Decentralization – Factors determining the degree of Decentralization of authority. Directing – Nature of Directing function - Principles – Importance of Effective Direction. Controlling - Concept, Nature and Importance- Techniques of Managerial control.

UNIT- 4: Contemporary Perspectives of Indian Management Thought (20 hours)

Relevance of gurukul concepts in modern corporate world-shadowing, mentoring and coaching; roots of Indian Wisdom-welfare-oriented economy based on moral values. Unique

Indian Business Scenarios-population density, crowd behavior, role of the unorganized sector in trade and commerce, cultural issues in India, infrastructure development, public private partnerships and regulation, how taxation drives business behavior, logistics management, saving habits of Indians. Indian Business Practices-community-based business management (Chettias of Tamil Nadu, Marwaris of Rajasthan, Angadias of Gujrat), Indian Family Business Management, Community level success stories-Gupta Empire, Gujrati, Marwari, Punjabi traders. Studying Indian Business Success Stories such as dabbawallas, Amul, Swachh Bharat, Atmanirbhar Bharat, PLI Scheme Initiatives, Indian Corporates working abroad, success of Indians as individuals abroad- in domains such as IT, Merchant Navy, Higher Education, Medicine. Indian perspectives on sustainability, creativity, inter-personal skills, business ethics, environment.

Practical component (if any) - NIL

Essential/recommended readings

1. Stephen P. Robbins & Mary Coulter, *Management*. 13th Ed. Pearson
2. Stoner, Freeman, Gilbert Jr. (2014). *Management* (6th edition), New Delhi: Prentice Hall India.
3. Koontz, H., & Weihrich, H. *Essentials of Management*, McGraw Hill Publishers.
4. Mahadevan, B., Bhat, V. R., Pavana, N. (2022) *Introduction to Indian Knowledge System Concepts and Applications*. PHI Learning

Note: Latest edition of the readings may be used.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2 (DSC-2): STATISTICS FOR BUSINESS DECISIONS

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|-----------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC-2 STATISTICS FOR BUSINESS DECISIONS | 4 | 3 | 1 | NIL | CLASS XII WITH MATHEMATICS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To familiarize the students with various Statistical Data Analysis tools that can be used for effective decision making.
- To learn the application of the statistical concepts to various financial and managerial situations.
- The course will enhance students' critical thinking and problem solving that rests on Statistical Methods and Data Analysis approaches.

Learning outcomes

On completion of the course students will be able to:

- Summarize data sets using Descriptive statistics
- Analyze the relationship between two variables of various managerial situations and geometrically Interpret Correlation and Regression
- Develop managerial decision problems using Probability Density Functions and Cumulative Density Functions

SYLLABUS OF DSC- 2

UNIT- 1: Data and its Descriptive Analysis (12 hours)

Quantitative and Qualitative Data, Attributes and variables, Scales of measurement: nominal, ordinal, interval and ratio, Measures of Central Value: Mean, Median, Mode, Measures of Dispersion: Absolute and Relative measures of dispersion – Range, Quartile Deviation, Mean Deviation, Standard Deviation, Moments, Skewness, Kurtosis. Visualization of Data: Histograms, Stem and Leaf Plots, Five Number Summary and Box Plots. Introduction to Big Data: Characteristics and Stages.

UNIT- 2: Correlation and Regression Analysis (20 hours)

Correlation Analysis: Meaning and significance. Correlation and Causation, Types of Correlation, Methods of studying Simple correlation - Scatter diagram, Karl Pearson's coefficient of correlation, Spearman's Rank correlation coefficient.

Regression Analysis: Meaning and significance, Regression vs. Correlation, Simple Regression model: Linear Regression, Assumptions for simple linear regression model, Violations of the assumptions of the model, R-square and MSE in Regression, Geometric Interpretation of Regression.

UNIT- 3: Random Variable Analysis (16 hours)

Probability: Meaning and need, Conditional probability, Bayes' theorem, Random Variable- discrete and continuous. Probability Distribution: Meaning, characteristics (Expectation and variance) of Binomial, Poisson, Exponential and Normal distribution, z-score, Chebyshev and empirical rule, Central limit theorem.

UNIT-4: Introduction to Estimation and Hypothesis Testing (12 hours)

Estimation: Point and Interval estimation of population mean, Confidence intervals for the parameters of a normal distribution (one sample only), Hypothesis Testing: Level of Significance; Type I and Type II error, Test of hypothesis concerning Mean: z-test & t-test.

Practical component (if any) - NIL

Essential/recommended readings

1. Gupta, S.P., Statistical Methods, Sultan Chand & Sons
2. Levine, D., Stephan, D., & Szabat, K., Statistics for Managers using MS Excel, Pearson India
3. Keller, G., Statistics for Management and Economics, Cengage Learning, New Delhi
4. Stine, R. and Foster, D., Statistics for Business (Decision making and Analysis). Pearson India
5. Evans, J., Business Analytics, Pearson India

Note: Latest edition of the readings may be used.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE– 3 (DSC-3) FINANCIAL ACCOUNTING AND ANALYSIS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC-3 FINANCIAL ACCOUNTING AND ANALYSIS | 4 | 3 | 1 | NIL | CLASS XII PASS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To familiarize students with the mechanics of preparation of Financial Statements
- To enable understanding of Corporate Financial Statements in the light of IFRS or Indian Accounting Standards, their analysis and interpretation
- Equip students with understanding of beyond Balance Sheet indicators to project corporate performance; prediction of financial crisis of a business enterprise.

Learning outcomes

On completion of this course students will be able to

- Understand the process of recording and classifying business transactions and events
- Creating and understanding Financial Statements of Sole Proprietor, viz., Profit & Loss Account, Balance Sheet; Understand the financial statements of company as per IFRS/Ind-AS
- Analyse the Financial Statements from the perspective of different stakeholders using Ratio analysis, Cash flow analysis, Net working capital analysis , Trend analysis and learning to use beyond balance sheet indicators for analysing corporate performance
- Understanding of financial distress or bankruptcy prediction, introduction to earnings management

SYLLABUS OF DSC-3

UNIT-1:Introduction to Financial Accounting. Basic Concepts and Conventions

(16 hours)

Business Entity, Dual Aspect, Going Concern, Accounting Period, Money Measurement, Accrual, Disclosure, Materiality, Consistency, and Conservatism. The Accounting Equation. Understanding Assets, Liabilities, Revenues, and Expenses. Understanding Capital Expenditure, Revenue Expenditure, Deferred Revenue Expenditure, Capital Receipts, and Revenue Receipts. Nature of Accounts and Rules of Debit and Credit. Recording transactions in General Journal. Preparation of Ledger Accounts. Opening and Closing Entries. Preparation of Trial Balance.

UNIT- 2: Preparation of Financial Statements

(16 hours)

Preparing Trading Account, Profit & Loss Account and Balance Sheet for a Sole Proprietor. Format for preparing financial statements for IND-AS companies as per Division II, Schedule III, Companies Act, 2013. Understanding of Financial Statements of a Joint Stock Company as per new accounting standards: IND-AS (Balance sheet, Profit & Loss, Statement of Comprehensive Income, Cash Flow Statement); Understanding the contents of a Corporate Annual Report (Actual latest annual reports to be used).

UNIT-3: Global Accounting Standards/IFRS

(12 hours)

Meaning & need for globalisation of accounting standards, Adoption versus Convergence, need for convergence of Indian GAAP with IFRS; Benefits of achieving Convergence with IFRS to different stakeholders in India. Salient features of Ind-AS/IFRS (Fair Value Accounting, Substance versus form, Time value of money). Introduction to Indian Accounting Standards (Ind-AS); Understanding IND-AS 1: Presentation of Financial Statements, IND-AS 7: Cash Flow Statement, IND-AS 109: Financial Instruments.

UNIT- 4: Analysing Financial Statements

(16 hours)

Objectives of Financial Statement Analysis; Sources of information; Standards of Comparison; Techniques of Financial Statement Analysis (Through a case study of real company) - Ratio analysis, Cash flow analysis, Net working capital analysis, Trend analysis.

Use of ratios to predict financial crisis of a company by using Altman Z –score. Use of Beyond the Balance Sheet indicators of analysing financial position of a company. Introduction to Earnings Management.

Practical component (if any) - NIL

Essential/recommended readings

1. Narayanaswamy R. Financial Accounting: A Managerial Perspective. PHI Learning Private Limited, Delhi.
2. Robert N. Anthony, David F. Hawkins, Kenneth A. Merchant. Accounting- Text and Cases. McGraw Hill Education (India) Private Limited, New Delhi.
3. Garg CA Kamal, and Sehrawat Neeraj Kumar. Beginner's Guide to Ind-AS & IFRS. Bharat Law House Pvt. Ltd., New Delhi.
4. Maheshwari S.N., Maheshwari Suneel K., and Maheshwari Sharad K. An Introduction to Accountancy. Vikas Publishing House Private Limited, Noida.
5. Bhattacharyya Asish K. Corporate Financial Reporting and Analysis. PHI Learning Private Limited, Delhi.

Suggestive readings

1. Lal Jawahar. Corporate Financial Reporting: Theory, Practice & Cases. Taxmann Publications Private Limited.
2. Patricia M. Dechow, Richard G. Sloan and Amy P. Sweeney: Detecting Earning Management, the Accounting Review. 70, No. 2 (Apr., 1995), pp. 193-225.

Note: Latest edition of the readings may be used

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES

Category IV

GENERIC ELECTIVES (GE-1): MANAGEMENT WISDOM FROM INDIA

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department offering the course |
|--------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| GE-1 MANAGEMENT WISDOM FROM INDIA | 4 | 3 | 1 | NIL | CLASS XII PASS | NIL | MANAGEMENT STUDIES |

Learning Objectives

The Learning Objectives of this course are as follows:

- This course aims to bring management education and research in India in line with its needs to tackle contemporary challenges
- The course helps students develop management models that are rooted in India's spiritual and cultural ethos.
- This course attempts to highlight relevant contemporary issues.

Learning outcomes

At the end of this course, students should be able to:

- Understand the various theories, concepts and ideas that constitute 'received knowledge' of Indian Management.
- Learn how to compare and contrast Indian management thought with Western concepts.
- Apply Indian management thought more effectively in an organisation setting.
- Understand how Indian thoughts help enable growth and development of the self, organisations, society and environment in the present as well as future context.

SYLLABUS OF GE-1

UNIT- 1: Indian Wisdom

(12 hours)

Understand the principles of materialism (abhyudhaya), spiritualism (nisreyasa), nivr̥tti (spiritual contemplation), prav̥tti (worldly duties), coexistence (loka sagraham), cohesion

(samanva), arkashastra (Analysis, Reasoning, Argumentation), Diversity Management (Anekanthavada). Relevance of Gurukul concepts in modern corporate world - shadowing, mentoring and coaching; Roots of Indian wisdom - welfare-oriented economy based on moral values. Using Indian wisdom to solve modern management problems.

UNIT- 2: Management Paradigms from Ancient Texts (16 hours)

Relevant concepts: Spiritual dimensions, Karma, Organisation tension, Positive thinking, Integrity, Leadership, Work Ethic. Management learnings from the Bhagavad Gita. Interpersonal Relations in Ramayana and Mahabharata. Pauranic Jagruti and Tourism Management. Management principles from the Guru Granth Sahib. Management learning and Organisational Policies from the Thirukural. Government administration from Kautilya's Arthashastra. Learnings from a study of Manusmriti.

UNIT- 3: Indian Management Practices (20 hours)

Uniquely Indian business scenarios – population density, crowd behaviour, role of the unorganized sector in trade and commerce, or cultural issues in business, infrastructure development, public private partnerships and regulation, how taxation drives business behaviour, logistics management, saving habits of Indians. Indian business practices- Community-based Business Management (Chettiars in Tamil Nadu, Marwaris of Rajasthan, Angadias of Gujarat), Indian family business management, community level success stories- Gupta empire, Gujarati, Marwari, Punjabi traders. Studying Indian business success stories such as Dabbawallas, Amul, Swachh Bharat, Atmanirbhar Bharat, PLI scheme initiatives, Indian corporates working abroad, success of Indians as individuals abroad in domains such as IT, Merchant Navy, Higher Education, Medicine.

UNIT-4: Future for Indian Management Thoughts (12 hours)

Indian models like OSHA, Theory K and Corporate Rishi Model. Management education should be based on four Ds (decision, direction, determination and dedication) and four Es (explore, experience, enjoy and excel) in students. Indian perspectives on sustainability, creativity, interpersonal skills, business ethics, environment friendly.

Practical component (if any) - NIL

Essential/recommended readings:

1. Srinivasan, V.: New Age Management Philosophy from Ancient India. Lotus.
2. Peetham, Sri Sharada: Ancient Wisdom for Modern Management. Springer.
3. Bansal, Ipshita: Management Concepts In Ancient Indian Psycho-Philosophic Thought. Wisdom-Banasthali Vidyapith.
4. Sharma, Subhash: Indian Management. New Age International.
5. Swami Ranganathananda, (2001), “Universal Message of the Bhagavad Gita”, 3 Volumes, Advaita Ashrama, Kolkata.
6. Swami Dayananda Saraswati, (2007), “The value of values”, Arsha Vidya Research & Publication Trust, Chennai.

Suggestive readings:

1. Mahadevan, B. Writings on Gita & Management, <http://www.iimb.ernet.in/webpage/b-mahadevan/bhagavad-gita-amp-management>.
2. Swami Chinmayananda, (1996), "Holy Geeta", Central Chinmaya Mission Trust, Mumbai.
3. Bhattathiri, M.P. "Bhagavad Gita and Management".
4. Houston, D.J. and Cartwright K.E. (2007), "Spirituality and Public Service". Public Administration Review, Jan. – Feb., 2007, 88 – 102.
5. Poole, E. (2007). "Organizational Spirituality – A literature review", Journal of Business Ethics, 84, pp. 577 – 588.
6. Mahadevan, B., (2013). "Inspirational Leadership: Perspectives from Gītā", Chapter 13 in Sanskrit and Development of World Thought, Kutumba Sastry V. (Ed.), D K Print World, New Delhi, pp 199 - 210.
7. Ehrenfeld, J. R. (2005). "The Roots of Sustainability", MIT Sloan Management Review, 46 (2), pp. 23-25.

Note: Latest edition of the readings may be used.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-2:) FUNDAMENTALS OF ORGANISATION

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| GE-2 FUNDAMENTALS OF ORGANISATION BEHAVIOUR | 4 | 3 | 1 | NIL | CLASS XII PASS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Explain the concepts in Organisational behaviour
- Understand application of its concepts to improve the understanding of human behaviour
- Link human and group behavior with enhancing the functioning of an organizational

unit.

Learning outcomes

At the completion of the course students will be able to:

- Identify and define organisational behaviour concepts
- Explain how individual differences—such as personalities, perceptions, and learning affect employee performance
- Analyse motivation and leadership styles and determine their effectiveness in employee situations
- Develop an understanding of group behaviour and group dynamics

SYLLABUS OF GE-2

UNIT- 1: Fundamental Concepts in OB

(16 hours)

Importance and Key concepts in OB. Perception, Factors affecting Perception, Perceptual Process, and Errors in Perception. Personality: Concept and Factors affecting personality. Learning: Concept and Theories of Learning, Concept of Reinforcement.

UNIT- 2: Motivation and Interpersonal Relations

(16 hours)

Motivation: Concepts and their application, Content theories (Maslow and Herzberg's Theories); Process theories (Expectancy theory). Managing Interpersonal Relationships; Transactional Analysis; Ego states, Types of Transactions, Importance of Transactional Analysis. Johari window.

UNIT- 3: Group Processes and Leadership at Work

(16 hours)

Leadership: Trait Approach, Behavioural theories (Ohio and Michigan State Studies, and Blake & Mouton's Managerial grid), and Concept of Situational/Contingency approach to Leadership. Groups: Definition Stages of Group Development, Group Processes-Group Cohesiveness.

UNIT-4: Organizational Dynamics of Politics, Conflict and Change (12 hours)

Organisational Power: Concept, Sources of Power, Tactics to gain power in Organizations. Conflict: Concept, Sources, Types, Stages of conflict, Management of conflict. Organisational Change: Concept, Resistance to change, managing resistance to change, Implementing Change.

Practical component (if any) - NIL

Essential/recommended readings

1. Stephen P. Robbins, T. A. Organisational Behavior. Pearson
2. Aswathappa, K., & Reddy, G. S. (2009). Organisational behaviour . Mumbai: Himalaya Publishing House.
3. Luthans Fred, Organisational Behaviour, Tata Mc Graw Hill.
4. Singh Kavita, Organisational Behaviour, Pearson.

5. Greenberg Jerald and Baron Robert A.: Behavior in Organisations: Understanding and Managing Human side of work, Prentice Hall of India

Note: Latest edition of the readings may be used.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Bachelor of Business Administration (Financial Investment Analysis)BBA (FIA)

Category I

DSC 1: FINANCIAL ACCOUNTING & ANALYSIS

| Course Title | Total Credits | Components | | | Eligibility Criteria/ Prerequisite | Prerequisite if any |
|-----------------------------------|---------------|------------|---|---|---------------------------------------|---------------------|
| | | L | T | P | | |
| Financing Accounting and Analysis | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Course Objectives: To familiarize students with the mechanics of preparation of Financial Statements; understanding Corporate Financial Statements in the light of IFRS or Indian Accounting Standards, their analysis and interpretation; understanding of beyond Balance Sheet indicators to project corporate performance; prediction of financial crisis of a business enterprise.

Learning Outcomes: with this course the student will:

Understand the process of recording and classifying business transactions and events, Creating and understanding Financial Statements of Sole Proprietor, viz., Profit & Loss Account, Balance Sheet. Understand the financial statements of company as per IFRS/Ind-AS. Analyse the Financial Statements from the perspective of different stakeholders using horizontal and vertical analysis tools; and learning to use beyond balance sheet indicators for analysing corporate performance. Understanding of financial distress or bankruptcy prediction, introduction to earnings management

Course Contents:

Unit 1 (16 hours)

Introduction to Financial Accounting. Basic Concepts and Conventions: Business Entity, Dual Aspect, Going Concern, Accounting Period, Money Measurement, Accrual, Disclosure, Materiality, Consistency, and Conservatism. The Accounting Equation. Understanding Assets, Liabilities, Revenues, and Expenses. Understanding Capital Expenditure, Revenue Expenditure, Deferred Revenue Expenditure, Capital Receipts, and Revenue Receipts. Nature of Accounts and Rules of Debit and Credit. Recording transactions in General Journal. Preparation of Ledger Accounts. Opening and Closing Entries. Preparation of Trial Balance.

Unit 2 (16 hours)

Preparation of Financial Statements: Preparing Trading Account, Profit & Loss Account and Balance Sheet for a Sole Proprietor. Format for preparing financial statements for IND-AS companies as per Division II, Schedule III, Companies Act, 2013. Understanding of Financial Statements of a Joint Stock Company as per new accounting standards: IND-AS (Balance

sheet, Profit & Loss, Statement of Comprehensive Income, Cash Flow Statement); Understanding the contents of a Corporate Annual Report (Actual latest annual reports to be used).

Unit 3 (12 hours)

Global Accounting Standards/IFRS: Meaning & need for globalisation of accounting standards, Adoption versus Convergence, Need for convergence of Indian GAAP with IFRS; Benefits of achieving Convergence with IFRSs to different stakeholders in India. Salient features of Ind-AS/IFRS (Fair Value Accounting, Substance versus form, Time value of money). Introduction to Indian Accounting Standards (Ind-AS); Understanding IND-AS 1:

Presentation of Financial Statements, IND-AS 7: Cash Flow Statement, IND-AS 109: Financial Instruments.

Unit 4 (16 hours)

Analysing Financial Statements: Objectives of Financial Statement Analysis; Sources of information; Standards of Comparison; Techniques of Financial Statement Analysis (Through a case study of real company) - Ratio analysis, Cash flow analysis, Net working capital analysis, Trend analysis. Use of ratios to predict financial crisis of a company by using Altman Z –score. Use of Beyond the Balance Sheet indicators of analysing financial position of a company. Introduction to Earnings Management.

Essential Readings: Latest editions of the following to be used:

1. Narayanaswamy R. Financial Accounting: A Managerial Perspective. PHI Learning Private Limited, Delhi.
2. Robert N. Anthony, David F. Hawkins, Kenneth A. Merchant. Accounting- Text and Cases. McGraw Hill Education (India) Private Limited, New Delhi.
3. Garg CA Kamal, and Sehrawat Neeraj Kumar. Beginner's Guide to Ind-AS & IFRS. Bharat Law House Pvt. Ltd., New Delhi.
4. Maheshwari S.N., Maheshwari Suneel K., and Maheshwari Sharad K. An Introduction to Accountancy. Vikas Publishing House Private Limited, Noida.

Additional Readings: Latest editions of the following to be used:

1. Lal Jawahar. Corporate Financial Reporting: Theory, Practice & Cases. Taxmann Publications Private Limited.
2. Patricia M. Dechow, Richard G. Sloan and Amy P. Sweeney: Detecting Earning Management, the Accounting Review. 70, No. 2 (Apr., 1995), pp. 193-225.

Teaching Learning Process:

Class room lectures, Case study discussion, Numerical problem solving, Class presentation on the assigned topic by students - individually or in groups, Workshops and Tutorials.

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks

The Internal Assessment of the course may include Class participation, Assignments, Class tests, Projects, Field Work, Presentations, amongst others as decided by the faculty.

Key Words

Generally Accepted Accounting Principles, Financial Statements, Financial Ratios, IFRS, Indian Accounting Standards.

DSC 2: MICROECONOMICS

| Course Title | Total Credits | Components | | | Eligibility Criteria/ Prerequisite | Prerequisite if any |
|----------------|---------------|------------|---|---|---------------------------------------|---------------------|
| | | L | T | P | | |
| Microeconomics | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Course Objectives: The purpose of this course is to apply micro economic concepts and techniques in evaluating business decisions taken by firms. The emphasis is on explaining how tools of standard price theory can be employed to formulate a decision problem, evaluate alternative courses of action and finally choose among alternatives.

Learning Outcomes:

- Explain the mechanics of supply and demand in allocating goods and services and resources.
- Understand the choices made by a rational consumer.
- Identify relationships between production and costs.
- Define key characteristics and consequences of different forms of markets.

Course Contents:

Unit 1 (12 hours)

Individual demand, market demand, individual supply, market supply, market equilibrium; Elasticities of demand and supply; Price elasticity of demand, income elasticity of demand, cross price elasticity of demand, elasticity of supply.

Unit 2 (16 hours)

Cardinal utility theory; ordinal utility theory: indifference curves, budget line, consumer choice, price effect, substitution effect, income effect for normal, inferior and Giffen goods.

Unit 3 (16 hours)

Optimizing behaviour in short run: product curves, law of diminishing marginal productivity, stages of production; optimizing behaviour in long run: isoquants, isocost line, optimal combination of resources; traditional theory of cost: short run and long run; modern theory of cost.

Unit 4 (16 hours)

Perfect competition: basic features, short run equilibrium of firm/industry, long run

equilibrium of firm/industry, monopoly: basic features, short run equilibrium, long run equilibrium, comparison with perfect competition, welfare cost of monopoly; price discrimination; monopolistic competition: basic features, demand and cost, short run equilibrium, long run equilibrium, excess capacity; oligopoly kinked demand curve model, dominant price leadership model.

Essential Readings:

1. Dominick Salvatore (2009): Principles of Microeconomics (5th edition), Oxford University Press.
2. Pindyck, Rubinfeld and Mehta (2009): Micro Economics (7th Edition), Pearson.

Additional Readings:

Lipsey and Chrystal (2008): Economics (11th edition), Oxford University. Please Note: Latest edition of the readings to be used.

Teaching Learning Process:

Lectures, problems and numerical, term paper, presentations, case studies

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks

The Internal Assessment of the course may include Class participation, Assignments, Class tests, Projects, Field Work, Presentations, amongst others as decided by the faculty.

Key Words

Equilibrium, Rationality, Utility Maximization, Profit Maximization, Market Form.

DSC 3: STATISTICS FOR BUSINESS DECISIONS

| Course Title | Total Credits | Components | | | Eligibility Criteria/ Prerequisite | Prerequisite if any |
|-----------------------------------|---------------|------------|---|---|---------------------------------------|---------------------|
| | | L | T | P | | |
| Statistics for Business Decisions | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Course Objectives: To familiarize the students with various Statistical Data Analysis tools that can be used for effective decision making. Emphasis will be on the application of the concepts learnt to various financial and managerial situations.

Learning outcomes: After the end of the course, students should be able to

- ☐ Summarize data sets using Descriptive statistics.
- ☐ Analyze the relationship between two variables of various managerial situations.
- ☐ Geometrically Interpret Correlation and Regression.

- Develop managerial decision problems using Probability Density Functions and Cumulative Density Functions.

Critical thinking and problem solving: The course will help students understand the characteristics of Analytical thinking that rests on Statistical Methods and Data Analysis approaches.

Course Contents:

Unit 1: Data and its Descriptive Analysis (12 hours)

Quantitative and Qualitative Data, Attributes and variables, Scales of measurement: nominal, ordinal, interval and ratio, Measures of Central Value: Mean, Median, Mode, Measures of Dispersion: Absolute and Relative measures of dispersion – Range, Quartile Deviation, Mean Deviation, Standard Deviation, Moments, Skewness, Kurtosis. Visualization of Data: Histograms, Stem and Leaf Plots, Five Number Summary and Box Plots. Introduction to Big Data: Characteristics and Stages.

Unit 2: Correlation and Regression Analysis (16 hours)

Correlation Analysis: Meaning and significance. Correlation and Causation, Types of Correlation, Methods of studying Simple correlation – Scatter diagram, Karl Pearson's coefficient of correlation, Spearman's Rank correlation coefficient.

Regression Analysis: Meaning and significance, Regression vs. Correlation, Simple Regression model: Linear Regression, R-square and MSE in Regression, Geometric Interpretation of Regression.

Unit 3: Random Variable Analysis (16 hours)

Probability: Meaning and need, Conditional probability, Bayes' theorem, Random Variable-discrete and continuous. Probability Distribution: Meaning, characteristics (Expectation and variance) of Binomial, Poisson, Exponential and Normal distribution, z-score, Chebyshev and empirical rule, Central limit theorem.

Unit 4: Introduction to Estimation and Hypothesis Testing (16 hours)

Estimation: Point and Interval estimation of population mean, Confidence intervals for the parameters of a normal distribution (one sample only), Hypothesis Testing: Null and

Alternate Hypothesis, One Tail and Two tail tests, Level of Significance, Type I and Type II error, Test of hypothesis concerning Mean: z-test & t-test.

Essential Readings:

1. Gupta, S.P., Statistical Methods, Sultan Chand & Sons.
2. Levine, D., Stephan, D., & Szabat, K., Statistics for Managers using MS Excel, Pearson India.
3. Miller, I., & Miller, M., John E. Freund's Mathematical Statistics with Applications, Pearson India.

Suggested Readings:

1. Keller, G., Statistics for Management and Economics, Cengage Learning, New Delhi.
2. Stine, R. and Foster, D., Statistics for Business (Decision making and Analysis). Pearson India.

3. Levin, R. and Rubin, D., Statistics for Management, Pearson India.
4. Evans, J., Business Analytics, Pearson India.

Recommendation:

The students are encouraged to solve real life case studies using Spreadsheet.

Teaching Learning Process:

Class room lectures, Case study discussion, Numerical problem solving, Class presentation on the assigned topic by students - individually or in groups, Workshops and Tutorials.

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks

The Internal Assessment of the course may include Class participation, Assignments, Class tests, Projects, Field Work, Presentations, amongst others as decided by the faculty.

Key Words

Descriptive Statistics, Inferential Statistics, Central Tendency, Measures of Dispersion, Correlation, Regression, Random Variable, Probability Distribution, Testing of Hypothesis.

GENERIC ELECTIVE (GE) COURSES

Category-IV

GE1: FUNDAMENTALS OF FINANCIAL MANAGEMENT

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any | Department offering the course |
|--------------------------------------|---------------|------------|---|---|----------------------|---------------------|--------------------------------|
| | | L | T | P | | | |
| Fundamentals of Financial Management | 4 | 3 | 1 | 0 | Class XII Pass | NIL | Finance and Business Economics |

Course Objectives: To provide an understanding of the essential elements of the financial environment in which the business firm operates. To acquaint students with the techniques of financial management and their applications for business decision making.

Learning Outcome: At the end of this course, students will be equipped with the basic concepts of financial management. Students would understand how to coordinate various decisions to maximise wealth of an organisation in today's financial environment. Students will be equipped to arrive at strategic corporate finance decisions with the required accuracy which will be aided by using various excel functions.

Course Contents:

Unit 1 (12 hours)

Nature of Financial Management: Finance and related disciplines; Scope of Financial Management; Functions of finance – Finance Decision, Investment Decision, Dividend Decision; Objectives of Financial Management; Organisation of finance function; Concept of Time Value of Money – present value, future value, annuity.

Unit 2 (20 hours)

Strategic Investment Decisions: Capital Budgeting -; Nature and meaning of capital budgeting; Principles and Process; Estimation of relevant cash flows and terminal value; Evaluation techniques– Payback period, Accounting Rate of Return, Net Present Value, Internal Rate of Return, Net Terminal Value, Profitability Index Method.

Cost of Capital: Meaning and concept, Measurement of cost of capital – Cost of debt, Cost of Equity Share; Cost of Preference Share; Cost of Retained Earning; Computation of over-all cost of capital based on Historical and Market weights (WACC).

Unit 3 (16 hours)

Strategic Financing Decisions - Capital Structure, Theories and Value of the firm – Net Income approach, Net Operating Income approach, Traditional approach, Modigliani Miller (MM) model. Leverage analysis and EBIT-EPS Analysis: Concept of leverage, Types of leverage: Operating leverage, Financial leverage, Combined leverage; EBIT-EPS Analysis.

Guidelines for capital structure planning, Link between capital structure and capital budgeting. Dividend Decisions: Factors determining dividend policy, Theories of dividend- Gordon model, Walter model, MM Hypothesis. Dividend policies in practice.

Unit 4

(12 hours)

Working Capital Management: Determination of Working Capital. Determining financing mix of working capital. Receivables Management – Objectives; Credit Policy, Cash Discount, Debtors Outstanding and Ageing Analysis; Costs – Collection Cost, Capital Cost, Default Cost, Delinquency Cost. Management of Cash (Theory only) – Need for Cash, Cash Management Techniques (Lock box, Concentration Banking). Inventory Management (Theory only) – ABC Analysis; Minimum Level; Maximum Level; Reorder Level; Safety Stock; EOQ (Basic Model).

Essential Readings:

1. Berk and DeMarzo, 5th ed., Pearson - Prentice Hall.
2. Horne, James C V. and John M. Wachowicz, Jr. “Fundamentals of Financial Management. 13th ed; FT Prentice Hall, Pearson Education.
3. Pandey, I.M. Financial Management, Pearson.

Additional Readings:

1. Khan, M.Y. & Jain, P.K. Financial Management Text Problem and Cases, Tata McGrawHill Publishing Co. Ltd.
2. Brealey, R. R., Myers. S., Allen, F., & Mohanty, P.. Principles of Corporate Finance. NewDelhi: Tata Mc-Graw Hill.

Teaching – Learning Process:

The teaching-learning process for this paper would include classroom lectures and tutorials; Case study discussions; class presentations; Workshops.

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks

The Internal Assessment for the course may include Class participation, Assignments, Class tests, Projects, Field Work, Presentations, amongst others as decided by the faculty.

Key Words

Finance, Capital Budgeting, Wealth Maximisation, Cost of Capital, Dividends, Leverage, Working Capital Management.

GE 3: FUNDAMENTALS OF STOCK TRADING

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any | Department offering the course |
|-------------------------------|---------------|------------|---|---|----------------------|---------------------|--------------------------------|
| | | L | T | P | | | |
| Fundamentals of Stock Trading | 4 | 3 | 1 | 0 | Class XII Pass | NIL | Finance and Business Economics |

Course Objectives: To familiarize students with the essential concepts and skills needed to be able to appropriately choose securities and operate in Stock markets.

Learning Outcomes: On successful completion of his course, the students will be able to:

- ☐ Understand the fundamentals of investments and the investment environment.
- ☐ Able to compare and evaluate different investment opportunities.
- ☐ Comprehend the structure and composition of Indian Securities market.
- ☐ Learn the mechanism involved in online stock trading.
- ☐ Grasps the concepts associated with investing in Mutual funds.

Course Contents

Unit 1: Basics of Investment & Investment Environment (12 hours)

Fundamentals of Investment, Features of Investment, Investment Environment. Principles of sound Investment. The Investment Decision Process. Modes of Investment – Direct Investing and Indirect Investing, Approaches to Investing – Active Investing and Passive Investing. Risk Return Trade Off. Types of Securities – Equity Shares, Bonds and Debentures, and Government Securities. Alternative Investments (Briefly) – Mutual Funds, Derivatives, Unit Linked Insurance Policy (ULIP), Exchange-traded funds (ETFs), Collective Investment Schemes (CIS), Real Estate Investment Trusts (REITs). Criteria for Evaluation of Investment Alternatives.

Unit 2: Indian Securities Market (16 hours)

Securities Market – Capital Market and Money Market, Difference between Capital and Money Market, Primary and Secondary Market, Difference between Primary and Secondary Market. Over the Counter (OTC) and Exchange Traded market. Modes of offering Equity Shares – Initial Public Offering (IPO), Follow-on Public Offering (FPO), Difference between IPO and FPO, Difference between Offer for sale (OFS) and Public offer (IPO/FPO). Methods of IPO Pricing – Fixed Price Method and Book Building Method, The Book Building Process, Fixed Price method v/s Book building Method. Market Participants – Issuer of Securities, Investors, and Intermediaries. Role of Stock Exchange. Stock Exchanges in India. Securities (Stock) Indices – Broad Market Indices, Sectoral Indices and Thematic Indices.

Unit 3: Online Security Trading (16 hours)

Trading Mechanism on Exchanges, Trading and Settlement at NSE – National Securities Clearing Corporation Limited (NSCCL), Clearing Mechanism, Clearing & Settlement (Equities).

Online Trading – Introduction, Online Trading Mechanism. Online Real Time Price Quotations – Bid Price, Ask Price, Bid-Ask Spread, Tick Size, LTP, ATP. Circuit Breakers – Upper Circuit, Lower Circuit, NSE rules regarding Circuit Breaks. Price Bands, Rules regarding Price Bands on NSE. Electronic Order Book. Types of Orders – Market Order, Limit Order, Stop Loss Order, Stop Loss (Limit) Order, Stop Loss (Market) Order, After Market Order (AMO). Order Conditions – Price related conditions, Time related conditions, Quantity related conditions. Placing an Order, View/Modify/Cancel an Order.

Unit 4: Investing in Mutual Funds (16 hours)

Concept of Mutual Funds, Mutual Funds are an Indirect Mode of Investment, Evolution of Mutual Funds in India, Structure of Mutual Funds (Sponsor, Board of Trustees, AMC and Custodian). Advantages of Investing in Mutual Funds, Limitations of Investing in Mutual Funds. Types of Mutual Fund Schemes – Open ended, Close ended, and Interval funds; Domestic Funds and Off-Shore funds; Growth funds, Income funds and Balanced funds; Equity Fund schemes, Debt fund schemes, Gilt Funds, Money Market Funds, Tax Saving or Equity Linked Savings Scheme (ELSS), Index schemes, Sectoral Funds, Ethical Funds, Load and No-Load Fund, Fund of Funds, Systematic Investment Plans (SIP), Systematic Withdrawal Plans (SWP), Systematic Transfer Plans (STP), and Exchange Traded Funds. Net Asset Value, Cost incurred and Return from Mutual funds, Types of Loads. Performance Evaluation of Mutual Funds. Factors affecting choice of Mutual funds. Mutual funds in India. CRISIL and their Rankings for mutual funds – Ranking Methodology and Usage of Mutual Fund Rankings.

Essential Readings:

1. Tripathi, Vanita and Panwar, Neeti: Investing in Stock Markets. Taxmann Publications.
2. Chandra, Prasanna: Investment Analysis and Portfolio Management. McGraw Hill Education.

Additional Readings:

1. Rustagi, R.P., Investment Management. Sultan Chand Publications.
2. Tripathi, Vanita: Security Analysis and Portfolio Management. Taxmann Publications.

Teaching Learning Process:

Class room lecture, Numerical Problem solving, Case study discussion, Class presentation on the assigned topic by students individually or in group, Workshop, Tutorials, Role play.

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks

The Internal Assessment for the course may include Class participation, Assignments, Class

tests, Projects, Field Work, Presentations, amongst others as decided by the faculty.

Key Words

Investments, Indian Securities Market, Initial Public Offer (IPO), Online Security Trading, and Investing in Mutual Funds.

GE5: ESSENTIALS OF FINANCIAL INVESTMENTS

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any | Department offering the course |
|-------------------------------------|---------------|------------|---|---|----------------------|---------------------|--------------------------------|
| | | L | T | P | | | |
| Essentials of Financial Investments | 4 | 3 | 1 | 0 | Class XII Pass | NIL | Finance and Business Economics |

Course Objectives: To familiarize students with the essential concepts and fundamentals of financial investments. The course will enable them to understand and make informed choice about the various available financial investment alternatives.

Learning Outcomes: On successful completion of his course, the students will be able to:

- Understand the fundamentals of financial investments and the investment decision process.
- Able to compute various measures of risk and return, and understand their role in evaluating investments.
- Understand and carry out security analysis using different approaches.
- Learn basic approaches to valuation of securities and carry out portfolio analysis.

Course Contents

Unit 1: Investments – An Overview (12 hours)

Concept of Investment, Financial Investment Vs. Real Investment, Investment Vs Speculation, Objectives or Features of Investment, Risk Return Trade Off, Investment Environment – Overview of Securities Market and Different Types of Financial Investment. Investment Decision Process, Direct Investing Vs Indirect Investing, Approaches to Investing – Active Vs Passive. Diversification, Hedging and Arbitrage.

Unit 2: Risk – Return Analysis (16 hours)

Concepts of Return and Risk, Types of Return - their Calculation & Utility: Absolute Return, Average Return, Expected Return, Portfolio Return, Holding Period Return, Effective Annualized Return, Risk-Adjusted Return. Causes (or Sources) and Types of Risk – Systematic and Unsystematic Risk, Components of Systematic and Unsystematic Risk, Calculation of Total, Systematic and Unsystematic Risk. Impact of Taxes and Inflation on Investment – Computation of Post Tax and Real Returns.

Unit 3: Security Analysis (16 hours)

Approaches to Security Analysis – Fundamental Analysis, Technical Analysis, and Efficient Market Hypothesis (EMH). Fundamental Analysis – EIC Framework, Economic Analysis, Industry Analysis, and Company Analysis. Technical Analysis – Basic Tenets of Technical Analysis, Tool of Technical Analysis – Charts, and Technical Indicators, Limitations of Technical Analysis. Difference between Fundamental Analysis and Technical Analysis. Efficient Market Theory (EMH) – Concept, Forms of Market Efficiency, Weak Form Hypothesis, Semi Strong Form, and Strong Form of Market Efficiency. Implications of EMH.

Unit 4: Fundamentals of Valuation and Portfolio Analysis (16 hours)

Valuation of Equity Shares – Peculiar features of Equity Shares, Dividend Discount Model, Earning Multiplier or Price-Earnings (P/E) Model, and Capital Asset Pricing Model (CAPM). Valuation of Fixed Income Securities – Bond Fundamentals, Types of Bonds, Bond Valuation. Portfolio Analysis – Portfolio Management Process, Portfolio Analysis – Markowitz Model, Portfolio Risk, Portfolio Return.

Essential Readings:

1. Tripathi, Vanita: Security Analysis and Portfolio Management. Taxmann Publications.
2. Chandra, Prasanna: Investment Analysis and Portfolio Management. McGraw Hill Education.

Additional Readings:

1. Rustagi, R.P., Investment Management. Sultan Chand Publications.
2. Reilly, F. K. & Brown, K.C. Analysis of Investments and Management of Portfolios, Cengage India Pvt. Ltd.

Teaching Learning Process:

Class room lecture, Numerical Problem solving, Case study discussion, Class presentation on the assigned topic by students individually or in group, Workshop, Tutorials, Role play.

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks

The Internal Assessment for the course may include Class participation, Assignments, Class tests, Projects, Field Work, Presentations, amongst others as decided by the faculty.

Key Words

Financial Investment, Risk and Return, Fundamental Analysis, Technical Analysis, Efficient Market Hypothesis, Portfolio Analysis, Valuation of Securities.

GE7: EMERGING BANKING AND FINANCIAL SERVICES

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any | Department offering the course |
|---|---------------|------------|---|---|----------------------|---------------------|--------------------------------|
| | | L | T | P | | | |
| Emerging Banking and Financial Services | 4 | 3 | 1 | 0 | Class XII Pass | NIL | Finance and Business Economics |

Course Objective: The objective of this paper is to familiarize students with banking reforms in the last decade, concept of neo banks, rising issue of non-performing asset and its impact on day-to-day functioning. They will learn about financial services such as Leasing, Hire Purchase, Credit Rating, Securitization and Venture Capital Financing.

Learning Outcomes: On successful completion of his course, the students will be able to:

- ☐ Understand the relevance of financial reforms introduced in Indian banking sector.
- ☐ Understand the rising problem of non-performing assets in Indian banking sector.
- ☐ Learn the importance of neo banks and M&A in Indian banking sector.
- ☐ Understand the various financial services available in India along with the latest innovations and technological integration in the field of finance.

Course Contents:

Unit 1 (16 hours)

An overview of the Indian Banking system; Major Banking Reforms in the last decade: Payment banks, Monetary Policy Committee, MCLR Based Lending, Innovative Remittance Services; Issues in financial reforms and restructuring; Future agenda of reforms: Assessing Non- Performing Assets in Indian Banking, Previous methodologies for recovery, Impact of Gross NPAs on a bank's bottom line – burning need for bad banks, Functioning of Bad Banks, Government backing for bad banks - National Asset Reconstruction Company Ltd. (NARCL).

Unit 2 (16 hours)

Introduction to neobanks, Functions of neobanks, Operating Model of neobanks, Regulatory requirements for setting up and running neobanks, Emerging need for neobanks, neo banks vs traditional banks. Merger & Acquisition: Introduction, Benefits of mergers, Synergies accruing out of mergers, Regulatory mechanisms surrounding M&A in banking, Case-studies of recent banking mergers and related outcomes.

Unit 3 (20 hours)

Leasing and Hire Purchase: Concepts of leasing, types of leasing – financial & operating lease, direct lease and sales & lease back, advantages and limitations of leasing, Lease rental determination; Finance lease evaluation problems Lessee's angle (PV and IRR methods) and

Lessor's perspective, Hire Purchase interest & Instalment, difference between Hire Purchase & Leasing, Choice criteria between Leasing and Hire Purchase, mathematics of HP.

Unit 4

(12 hours)

Venture Capital: Concept, history and evolution of VC, the venture investment process, various steps in venture financing, incubation financing. Credit Ratings: Introduction, types of credit rating, advantages and disadvantages of credit ratings, Credit rating agencies and their methodology, International credit rating practices. Securitization: Concept and Process, Credit Enhancement parties to a Securitization Transaction, Instruments of Securitization, Types of Securities, Securitization in India.

Essential Readings:

1. Pathak, B. Indian Financial System (4th ed). Pearson Publication.
2. Khan, M. Y. (2013). Financial services. New Delhi: McGraw Hill Education.
3. Machiraju, H. R. (2002). Indian financial system. New Delhi, Vikas Publication House.

Additional Readings:

1. Verma, J. C. (1996). Bharat's manual of merchant banking: Concept, practices and procedures with SEBI clarifications, guidelines, rules and regulations. New Delhi: Bharat Law House.
2. K. Sriram: Hand Book of Leasing, Hire Purchase & Factoring, ICFAI, Hyderabad.
3. Ennew. C. Trevor Watkins & Mike Wright: Marketing of Financial Services, Heinemann Professional.

Teaching Learning Process:

Class room lecture, Numerical Problem solving, Case study discussion, Class presentation on the assigned topic by students individually or in group, Workshop, Tutorials, Role play.

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks

The Internal Assessment for the course may include Class participation, Assignments, Class tests, Projects, Field Work, Presentations, amongst others as decided by the faculty.

Key Words

Banking, Merger and Acquisition, Neo banks, NPA, Leasing, Hire Purchase, Credit Ratings, Securitization, Venture Capital.

GE9: ECONOMIC LEGISLATION

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any | Department offering the course |
|----------------------|---------------|------------|---|---|----------------------|---------------------|--------------------------------|
| | | L | T | P | | | |
| Economic Legislation | 4 | 3 | 1 | 0 | Class XII Pass | NIL | Finance and Business Economics |

Course Objective(s): It focuses on laws related to competition in Indian business and trade environment. The course relies predominantly on Insolvency and bankruptcy code, money laundering and foreign exchange management laws.

Learning Outcomes:

- Recognise the economic issues in a legal problem and apply the economic way of thinking to analyse it.
- Assess the efficiency effects of legal rules and policies.
- Practice case analyses and evaluation of corporate conduct.

Course Contents:

Unit 1: Competition Act and Fugitive Economic Offenders Act (20 hours)

The Competition Act, 2002: Introduction, Prohibition of certain agreements, abuse of dominant position and regulation of combinations, Competition Commission of India, Duties, Powers and Functions of Commission, Penalties, Appellate Tribunal.

The Fugitive Economic Offenders Act: Scope and applicability of Act, Confiscation of property, Powers of Directors, Power of Survey, Search and Seizure, notice, procedure for hearing application, Declaration of Fugitive Economic Offender, Power to disallow civil claims, Management of properties confiscated under this Act, Rules of evidence, Appeals.

Unit 2: The Insolvency and Bankruptcy Code (12 hours)

The Insolvency and Bankruptcy Code, 2016: Introduction of Insolvency and bankruptcy code, Corporate Insolvency Resolution Process, Liquidation Process, Fast Track Insolvency Resolution for Corporate Persons, Voluntary Liquidation of Corporate Persons, Adjudicating Authority for Corporate Persons, Offences and Penalties, Insolvency resolution and bankruptcy for individuals and partnership firms, Regulation of Insolvency professionals, agencies and information utilities.

Unit 3: The Prevention of Money Laundering Act (16 hours)

The prevention of money laundering Act, 2002: Introduction and definitions, Punishment for the offence of Money Laundering, Attachment, Adjudication and Confiscation, Obligation of Banking Companies, Financial Institutions and Intermediaries, Summons, Searches And Seizures, Appellate Tribunal and Special Courts, Recovery of fine or penalty.

Unit 4: The Foreign Exchange Management Act (12 hours)

The Foreign Exchange Management Act, 1999: Introduction of FEMA, Difference between

FERA and FEMA, Application and Commencement of FEMA, Regulation and Management of Foreign Exchange, Authorised Person, Contraventions and Penalties, Compounding of Offences, Adjudication and Appeal, Directorate of Enforcement.

Essential Readings:

1. Maheshwari & Maheshwari, Principle of Mercantile Law, National Publishing Trust.
2. Aggarwal Rohini, Mercantile & Commercial Law, Taxmann
3. Kucchal M. C., Mercantile Law, Vikas Publishing House (P) Ltd.
4. Kapoor N. D., Elements of Mercantile Law, Sultan Chand,

Teaching – Learning Process:

Lecture, Discussion, Power Point Presentations. Course contents shall be discussed in the light of relevant case laws.

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks

The Internal Assessment for the course may include Class participation, Assignments, Class tests, Projects, Field Work, Presentations, amongst others as decided by the faculty.

Key Words

CCI, Prevention of Money Laundering, Insolvency and Bankruptcy Code, FEMA, Fugitive Economic Offenders Act.

B.A. (Hons.) Multi Media and Mass Communication

Category-I

DISCIPLINE SPECIFIC CORE COURSE – 1: Communication, Media & Society

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Communication, Media & Society | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Learning Objectives

1. To familiarize the student with the nature of communication, mediated by societal mores, culture, structures of power and the technology of multimedia and mass communication.
2. To emphasise the process of coding of messages at all levels of human and societal existence using both verbal language and paralanguage.
3. To explain the process of decoding messages, with its dependence on reception, target group profile and means of transmission.
4. Analysis of the communication chain to understand how and why messages are generated and ways in which these are consumed.

Learning outcomes

1. Understanding the problematics of language, paralanguage, silence etc. in the communication chain and contexts.
2. Understanding of cultural codes, semiotics and technology in the communicative process.
3. Understanding the relationship between ideology and communication, encoding and decoding and reception and audiences.
4. Critical evaluation of some traditional theories and models.

SYLLABUS OF DSC-1

UNIT – I (20 hours)

Introduction to Communication

- Defining Communication, Encoding and Decoding
- Modes of Communication: Verbal (oral and written), Non-Verbal, Intra-personal, Interpersonal, Group, Public and Mass Communication
- Barriers to Communication: Culture, Codes, Medium, Literacy, Technological Challenges, Barrier Free Technology, Fluid Identities
- Communication as Subversion: Silence, Satire, Subterfuge

UNIT – II (20 hours)

Determinants and Shifting Paradigms

- Ideology: Communication, Media and Political Economy
- Culture and Communication: Critical Cultural Theory
- Semiotics and Communication: Critical Theory and Practice (sign, object, interpretant/ icon, index and symbol, signifier and signified)
- Communicating in Cyberspace: Interactivity, Hypertextuality, Multimodality and Multimediality

UNIT – III (20 hours)

Mass Communication Theory and Models

- Early Theories: Bullet Theory, Two Step, Multi Step Theory, Cognitive Dissonance Theory
- Media Effect Theories: Agenda Setting, Spiral of Silence, Uses and Gratification, Cultivation Theory
- Normative Theories
- Models: George Gerbner's Model, Wilbur Schramm's Model, Laswell's Model, Shannon-Weaver's Mathematical Model

Essential Readings

- Fiske, J. (2011). *Introduction to communication studies*. London: Routledge.
- Gupta, N. (2006). *Cultural studies*. New Delhi: World View Publishers.
- Hall, S. (1984). Encoding/Decoding. *Culture, media, language*. Ed. S. Hall, D. Hobson, A. Lowe, and P. Wills. London: Hutchinson.
- Hall, S., & Morley, D. (2019). *Essential essays*. Durham: Duke University Press.
- Herman, E. S., & Chomsky, N. (2010). *Manufacturing consent: the political economy of the mass media*. London: Vintage Digital.
- Kumar, K. J. (2000). *Mass communication in India*. Mumbai: Jaico Publishing House.
- McQuail, D. (2012). *Mass communication theory*. Los Angeles: Sage.
- Narula, U. (2008). *Mass communication: Theory and practice*. New Delhi: Har-Anand Publications.
- Saraf, B.M. (2008). In Search of the Miracle Women: Returning the Gaze. *Translation and Interpreting Studies (TIS)*, Vol.Nos.1 and 2, Spring/Fall 2008.

Suggested Readings

- Baran, S. J., & Davis, D. K. (2015). *Mass communication theory: Foundations, ferment, and future*. Belmont, Calif.: Cengage Learning.
- Bel, B. (2005). *Media and mediation*. New Delhi: Sage Publications.

DISCIPLINE SPECIFIC CORE COURSE – 2: Application & Project Work (Training to Write for Media)

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Application & Project Work (Training to Write for Media) | 4 | 0 | 0 | 4 | Class XII Pass | NIL |

Learning Objectives

1. To train students to undertake specific forms of writing suited to the demands of different kinds of media and their specific forms.
2. To emphasise on writing grammatically with correct expressions and other requirements like word limits and number of characters.
3. To train students to write for different formats like reviews and editorials, geared towards multiple forms of media used in mass communication.

Learning outcomes

1. Understanding of the rules of good grammar, punctuation, spelling, registers and idioms of language.
2. Learning to write creatively for multi-media formats.
3. Learning to read and edit proofs on specialized programmes.

SYLLABUS OF DSC-2

UNIT – I (5 weeks)

Introduction- Back to Basics

- A-B-C-D of Media Writing: Authenticity, Brevity, Clarity and Discernment
- Media Styles: Print, Radio, TV, Cinema, Digital Media
- Language Input Tools for Scripting

- Editing a Document on MS Word, Speech to Text
- Ethical Writing and Disclaimers, Confidentiality of Interlocutors

UNIT – II (5 weeks)

Writing for Multi Media

- Writing for Print: News, Feature, Editorial, Story
- Scripting for Radio: News, Feature, Discussion, Talk
- Scripting for Television: Storyboard
- Screenplay for Cinema: The Audio-Visual Format
- Writing for New Media: Messaging, Social Media, Blog, Emoticons

UNIT – III (5 weeks)

Specialized Writing

- Book Review
- Film Review
- Press Release
- Reportage

Essential Readings

- Abend-David, D. (2014). *Media and translation: An interdisciplinary approach*, London: Bloomsbury
- Goldstein, N. (2007). *Associated press stylebook and briefing on media law*. Basic Books.
- Briggs, M. (2009). *Journalism Next: A practical guide to digital reporting and publishing*. Washington D.C: CQ Press
- Burgess, G., et al. (2009). *YouTube: Online video and participatory culture*. Cambridge: Polity Press
- Desjardins, R. (2017). *Translation and social media: In theory, in training and in professional practice*. London: Palgrave Macmillan
- Garrand, T. P. (2017). *Writing for multimedia and the web: A practical guide to content development for interactive media*. Oxford: Routledge.
- Gillmor, D. (2006). *We the media: Grassroots journalism by the people, for the people*. Massachusetts: O'Reilly Media, Inc
- Hilliard, R.L. (2011). *Writing for television, radio, and new media (Broadcast and Production)*. Boston: Cengage Learning
- Johnson, M. C. (2000). *New script writers journal*. Oxford: Focal Press.

Suggested Readings

- Jaikumar, P. (2006). *Cinema at the end of empire*. Durham: Duke University Press
- McLuhan, M. (1964). *Understanding the media*. London: Routledge
- Murrow, E. (2004). *Birth of broadcast journalism*. Nashville: Turner Publishing Company
- Reardon, N. (2013). *On camera: How to report, anchor & interview*. London: Routledge
- Shirky, C. (2009). *Here comes everybody: The power of organizing without organizations*. London: Penguin Books
- Sinha, P. K. (2006). *Media writing*. Delhi: Indian Distributors.

- Strunk, W., & White, E.B. (2008). *The elements of style: 50th anniversary edition*. London: Longman

DISCIPLINE SPECIFIC CORE COURSE – 3: Print Media Production

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Print Media Production | 4 | 2 | 0 | 2 | Class XII Pass | NIL |

Learning Objectives

1. To study the historic growth and changing dynamics of print media in India.
2. To understand different forms of print journalism and reporting formats.
3. Designing the layout and formats for print media production.
4. To use various software for producing newsletters and magazine pages.

Learning outcomes

1. Understand the structure and functions of a news organisation.

2. Understand the relationship between the political economy and editorial policy.
3. Gain practical knowledge of the technology and skills necessary to produce a
4. newspaper.
5. Practical knowledge of planning, designing & editing a newspaper.

SYLLABUS OF DSC-3

UNIT – I (15 hours)

Print Journalism

- Determinants of News Values: Meaning of News, Types (hard and soft news/objective, interpretative and investigative)
- Dignity, Ethics and Journalistic Responsibilities
- Ownership, Revenue and Editorial Policy
- News Agencies and News Pools

UNIT – II (15 hours)

The News Room

- Structure of a News Organization
- Allocation of Tasks: Roles, Skills and Sourcing
- Functions and Responsibilities of an Editor
- Planning, Dummy and Design, Typography, Preparing a Copy

UNIT – III (15 hours)

Print Technology and Newspaper Production

- Introduction to Publishing Software: Adobe InDesign, other Open Sources
- Use of Graphics, Photographs, Cartoons and Print Info-graphics
- Page Layout (print and electronic copy), Size, Anatomy, Grid Design, Frontpage, Editorial page and Supplements, Single and Multiple Editions
- Printing Process: Letter Press, Screen, Offset Style Sheet, Handling Text (headlines, pictures, advertisements)

Practical (30 hours)

Producing a Newsletter using Design Software

LIST OF GENERIC ELECTIVE COURSES

GENERIC ELECTIVES (GE-1) – Social Media

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department offering the course |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Social Media | 4 | 3 | 1 | 0 | Class XII Pass | NIL | Finance and Business Economics |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To enable student to understand the new paradigms of social media like technology and literacy, nuances of digital experience and ethics.
2. To familiarize student with various social media technologies and applications like
3. digitization of media and media convergence.
4. To understand the impact of social media on society, individual and democracy.

Learning outcomes

The Learning Outcomes of this course are as follows:

1. Ability to define new paradigms of social media.
2. Familiarizing with the different types of social media.
3. Understanding social media technologies and its application.
4. Learn to critically evaluate the impact of social media.

SYLLABUS OF GE-1

UNIT – I (20 hours)

Social Media: A New Paradigm

- Technology and Literacy Redefined: Internet, Intranet, WWW (Web 1.0, 2.0, 3.0)
- The Digital Experience: Mobile, Cyberspace and Apps
- The User and The Fourth Screen: Representation and Reproduction
- Media Convergence: ICT - Scope and Role

UNIT – II (20 hours)

- Social Networking Platforms
- Blogging and Vlogging
- Video Conferencing, Webcasting, Podcasting
- Social Bookmarking

UNIT – III (20 hours)

Impact of Social Media

- Internet/Online Activism
- Citizen Journalism
- Cyber Crimes and Ethics
- Democratization/Digital Divide

Essential Readings

- Barker, M. S., Barker, D., Bormann, N. F., Neher, K. (2013). *Social media marketing: A strategic approach*. New York: Cengage Learning.
- Castells, M. (2005). *The network society: A cross-cultural perspective*. Cheltenham: Edward Elgar.
- D. Satish, Rajesh Prabhakar Kaila. (2006). *Blogs: Emerging communication media*. The ICFAI University Press.

Suggestive Readings

- Forsyth, T. (2011). *Encyclopaedia of international development*. Milton Park. Abingdon, Oxon: Routledge.
- Lister, M. (2009). *New media: A critical introduction*. London: Routledge.
- Mishra, R.C., (2008). *Cyber-crime: Impacts in the new millennium*. Author Press.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

B.A. (HONS.) BUSINESS ECONOMICS

Category-I

DSC - 1: Microeconomics – I

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any |
|------------------|---------------|------------|---|---|----------------------|---------------------|
| | | L | T | P | | |
| Microeconomics-I | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

DSC - 1: Microeconomics – I

Objectives

This is the first course in a group of two that together cover the basic concepts of Microeconomics. This course covers the areas of consumer demand, production, cost and different types of commodity markets. It introduces the concept of economics, market equilibrium, elasticity, and consumer and producer behaviour at the basic level. It is a core foundation paper giving the students a micro aspect of different economic activities.

Learning Outcomes

- To analyse the market behaviour by understanding the basic concepts of microeconomics.
- To provide students with an understanding of the standard theoretical analysis of consumer and producer behaviour.
- To know the applications of theory of production and cost structure

Course Structure

Unit 1: Basic Concepts

(8 hours)

Scope and method of microeconomics; Scarcity and Choice; Positive and normative economics; Production possibility frontier, concepts of opportunity cost, rate of growth; Demand, Supply and Market equilibrium; Market Failure: Public goods and externalities; types of externalities – production and consumption externalities, asymmetric information and moral hazard: principal agent problem.

Unit 2: Theory of Consumer Behaviour**(20 hours)**

Elasticity: Price elasticity of demand, price elasticity of supply, cross elasticity and income elasticity of demand; Preference; utility; budget constraint; Cardinal theory & Ordinal theory: Budget sets and Preferences under different situations; Utility; Indifference curves: Consumer equilibrium; utility maximization; Engels curve, Derivation of demand curve, Income and substitution effects: Hicks and Slutsky equation; inferior, normal and Giffen goods Applications of indifference curves to other economic problems; Revealed preference theory; revealed preference: weak axiom, compensated law of demand; consumer surplus, equivalent variation and compensating variation, WARP, SARP.

Unit 3: Choice under Uncertainty**(10 hours)**

Choice under uncertainty – Comparative statics, utility function and expected utility, measures of risk, risk aversion and risk preference; intertemporal choice: savings and borrowing; Duality in consumption.

Unit 4: Technology, Production and Cost**(30 hours)**

Technology; isoquants; production functions with one and more variable inputs; returns to scale; Law of variable proportion, total, average and marginal product, marginal rate of technical substitution, iso-cost line and firm's equilibrium, elasticity of substitution; cost minimization; expansion path, short run and long run costs; various cost curves in the short run and long run and its relation; economies of scale; increasing and decreasing cost industries; envelope curve; economies of scale. Prices as parameters: Firm equilibrium and profit; short and long-run supply function; taxes and subsidies.

Teaching - Learning Process

3 Lectures and 1 tutorial each week.

Assignments, Term Paper, Presentations, Project, Classroom discussions

Assessment Method

Total Marks: 100

Practical: 0

Internal Assessment: 25 Marks

End Semester Exam: Duration: 3 Hours & Maximum Marks: 75

Keywords

Demand, Supply, Elasticity, Market failure, Externalities, Consumer Preference, Production, Cost

DSC - 2: Accounting for Managers

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any |
|-------------------------|---------------|------------|---|---|----------------------|---------------------|
| | | L | T | P | | |
| Accounting for Managers | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

DSC - 2: Accounting for Managers

Course Objectives

The course imparts knowledge of accounting principles particularly in the context of the preparation of financial statements and cost information of a business entity. The course concerns analysis and interpretation of these statements and their applications to managerial decision-making.

Learning Outcomes

- To understand the process of financial, cost and management accounting.
- To make a critical analysis of the financial statements of a business entity.
- To identify the steps for rational managerial decision making with respect to financial and cost aspects of a business.

Course Structure

Unit 1: Financial Accounting

(16 hours)

Meaning of Financial Accounting, Functions and Limitations of Financial Accounting, Users of Financial Accounting Information, Basis of Accounting: Cash and Accrual. Principles of Financial Accounting (GAAP), Overview of International Financial Reporting Standards (IFRS) and Ind AS.

Overview of Process of Financial Accounting: Journalizing, Ledger Posting and Preparation of Trial Balance.

Preparation of final Accounts (with adjustments) of a Sole Proprietor: Trading and Profit and Loss Account and Balance Sheet.

Understanding the Financial Statements of a Joint Stock Company: Format of Income Statement and Position Statement as per revised schedule VI of Companies Act, 2013.

Unit 2: Analysis and Interpretation of Financial Statements (12 hours)

Financial Statements: Meaning and types, importance and limitations of Financial Analysis

Techniques of Analysis: Cash Flow Statement (Indirect Method as per Revised AS 3): Preparation, Utility and Limitations.

Ratio Analysis with emphasis on the purpose and interpretation of the ratios: Liquidity, Turnover, Profitability and Solvency Ratios. Advantages and Limitations of Ratio Analysis.

Unit 3: Cost and Management Accounting (20 hours)

Cost and Management Accounting: Meaning, Functions, Utility and Limitations, Financial Accounting vs Cost Accounting, Financial Accounting vs Management Accounting, Tools of Management Accounting, Methods of Costing, Techniques of Costing, Basic Cost Concepts, Classification of Costs, Absorption Vs Marginal Costing.

Unit Costing: Preparation of Cost Sheet and computation of profits.

Cost Volume Profit Analysis, Break-even Analysis, Margin of Safety.

Managerial Decisions involving Alternate Choices: fixing the selling price, exploring new markets, make or buy decision, product/ sales mix decision (with and without key factor), shut down or continue.

Unit 4: Planning and Control (12 hours)

Meaning of Standard Costing, process of determination of Standard Costs.

Meaning of Budget and Budgetary Control, Benefits and Limitations of Budgetary Control, Classification of Budgets, Preparation of Master Budget, Fixed and Flexible Budgets, Difference between Standard and Budgeted Costs.

Variance Analysis: Cost Variances: problems related to Material and Labour Variances.

Teaching - Learning Process

3 Lectures and 1 tutorial each week.

Emphasis on interpretation and applications of accounting methods and techniques for taking managerial decisions. Assignments, Term Paper, Presentations, Project, Classroom discussions

Assessment Method

Total Marks: 100

Practical: 0

Internal Assessment: 25

End Semester Exam: Duration: 3 Hours & Maximum Marks: 75

Key Words

Financial Accounting, Final Accounts, Management Accounting, Cost Accounting, Cost Sheet, Cost Volume Profit Analysis, Variance Analysis.

DSC - 3: Mathematics for Business Economics – I

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any |
|--------------------------------------|---------------|------------|---|---|----------------------|---------------------|
| | | L | T | P | | |
| Mathematics for Business Economics-I | 4 | 3 | 0 | 1 | Class XII Pass | NIL |

DSC - 3: Mathematics for Business Economics - I

Course Objectives

The objective of this course is to provide instruction on basic mathematics that enables the study of economic theory and business applications at the undergraduate level. This shall be required for the teaching of the courses on microeconomic theory, macroeconomic theory, statistics, and econometrics set out in this syllabus. This course introduces mathematical techniques that will be new to most students through examples of their application to economic concepts. The economic and business models are a means for illustrating the method of applying mathematical techniques to economic theory and business applications in general. Mathematics has become the language of

modern analytical economics and it quantifies the relationship between economic variables and among economic actors.

Learning Outcomes

- To build the mathematical base necessary for other courses and to understand the basic functional forms used in economic analysis.
- To develop the mathematical knowledge required in business decision-making and to study the mathematics in which economic theories are expressed.
- To make and refute arguments by developing mathematical understanding.

Course Structure

Unit 1: Introduction (9 hours)

Algebra concepts, number systems, inequalities, mathematical logic, proof techniques; sets and set operations; functions and their properties.

Unit 2: Univariate Analysis (16 hours)

Curves and graphs; elementary functions: linear, quadratic, polynomial, power, exponential, logarithmic; sequences and series: convergence, algebraic properties and applications; Continuous functions: characterisations, properties with respect to various operations and applications; Differentiable functions: characterisations, properties with respect to various operations and applications; Second and higher order derivatives: properties and applications. Geometric properties of functions: convex functions, their characterisations and applications; local and global optima: geometric and calculus-based characterisations, and applications.

Unit 3: Linear Algebra (12 hours)

Linear Algebra: Vector spaces: algebraic and geometric properties, scalar products, norms, orthogonality; linear transformations: properties, matrix representations and elementary operations; systems of linear equations: properties of their solution sets; determinants: characterization, properties and applications. Eigenvalues and eigenvectors, diagonalization, Spectral Theorem.

Unit 4: Integration (8 hours)

Integrals: indefinite and definite. Methods of integration. Economic applications.

Readings

Essential

1. Sydsaeter, K., Hammond, P. (2002). Mathematics for Economic Analysis. Pearson Education.

Additional

1. Chiang, Alpha C., and Wainwright, K.(2005). Fundamental Methods of Mathematical Economics. Boston, Mass: McGraw-Hill/Irwin.

2. Hoy, Michael, Livernois John, McKenna Chris, Ray Rees, and Thanasis Stengos. (©2011) Mathematics for Economics. Cambridge, Mass. : MIT Press
3. Lay, David C., Judi J. McDonald, Steven R. Lay.(2022). Linear Algebra and Its Applications. Pearson.

Practical : 30 Hours

Teaching - Learning Process

3 Lectures and 1 practical each week.

Assignments, Tests, Presentations, Classroom discussions.

Spreadsheet Software for logical and other functions. Problem solving.

Assessment Methods

Total Marks: 100

Practical: 25

Internal Assessment: 25 Marks

End Semester Exam: Duration: 3 Hours & Maximum Marks: 50

Key Words

Set theory, Univariate, Limits, Continuity, Optimisation, Calculus, Differentiation, Concavity, Convexity, Optimisation, Spreadsheet

COMMON POOL OF GENERIC ELECTIVE COURSES

Category-IV

GE - 1: Principles of Economics

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any |
|-------------------------|---------------|------------|---|---|----------------------|---------------------|
| | | L | T | P | | |
| Principles of Economics | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

GEC - 1: Principles of Economics

Course Objectives

This course aims to offer basic understanding of the principles of economics. Specifically, this course intends to expose the student to the basic principles and concepts in Microeconomics and in Macroeconomics. In this course the students are introduced to the problem of scarcity and choice, demand and supply, elasticity, basic consumer theory, production and costs, definition, measurement of the macroeconomic variables -- GDP, consumption, savings, investment, money and credit etc.

Learning Outcome:

- To understand the principles of economics of the modern economy.
- To understand the consumer theory, production, and costs etc.
- To understand the basic principles of macroeconomics, national income accounting and determination of GDP.
- To understand the functioning of the money market.

Course Structure

Unit 1: Introduction

(8 hours)

Problem of scarcity and choice: scarcity, choice and opportunity cost; production possibility frontier; economic systems.

Demand and supply: law of demand, determinants of demand, shifts of demand versus movements along a demand curve, market demand, law of supply, determinants of supply, shifts of supply versus movements along a supply curve, market supply, market equilibrium.

Applications of demand and supply: price rationing, price floors, consumer surplus, producer surplus.

Elasticity: price elasticity of demand, calculating elasticity, determinants of price elasticity, other elasticities.

Unit 2: Consumer Theory (12 hours)

Budget constraint, concept of utility, diminishing marginal utility, Diamond-water paradox, income and substitution effects; consumer choice: indifference curves, derivation of demand curve from indifference curve and budget constraint.

Unit 3: Production and Costs (12 hours)

Production: behaviour of profit maximising firms, production process, production functions, law of variable proportions, choice of technology, isoquant and isocost lines, cost minimizing equilibrium condition.

Costs: costs in the short run, costs in the long run, revenue and profit maximizations, minimizing losses, short run industry supply curve, economies and diseconomies of scale, long run adjustments.

Unit 4: Introduction to Macroeconomics (8 hours)

What is macroeconomics? Macroeconomic issues in an economy.

Unit 5: National Income Accounting (8 hours)

Concepts of GDP Aggregates and National Income; measurement of national income and related aggregates; nominal and real income; GDP and welfare and the limitations of the GDP concept.

Unit 6: Determination of GDP (8 hours)

Actual and potential GDP; aggregate expenditure; consumption function; investment function; equilibrium GDP; concepts of MPS, APS, MPC, APC; autonomous expenditure; Concept of multiplier.

Unit 7: Money and Credit (4 hours)

Money in a Modern Economy: Concept of money in a modern economy; monetary aggregates; demand for money; quantity theory of money; liquidity preference and rate of interest; money supply and credit creation; monetary policy

3. Mankiw, N.G. (2021). Principles of Economics, (9th Edition). Cengage Learning.

Teaching - Learning Process**Assessment Method**

Total Marks: 100

Practical: 0

Internal Assessment: 25

End Semester Exam: Duration: 3 Hours & Maximum Marks: 75

Keywords

Principles of Economics, Scarcity, Consumer Theory, Production, Costs, Gross Domestic Product, money and credit.

GE - 3: Legal Environment of Business

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any |
|-------------------------------|---------------|------------|---|---|----------------------|---------------------|
| | | L | T | P | | |
| Legal Environment of Business | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

GEC - 3

Legal Environment of Business

Pre requisites: None

Course Objective(s): The course intends to familiarize the student with the legal environment which govern business for its efficient conduct and to apply them in real life situations. The purpose is to widen their scope of knowledge by appreciating the different branches of law covering some important legislations from Indian Contract Act, Companies Act, LLP Act, Consumer Protection Act, Sale of Goods Act and IT Act including the relevant cases and amendments.

Learning Outcomes:

The students will be able:

- To understand the basic rules and provisions of Contract and Agreements.
- To know the provisions to Formation and functioning of company and LLP.
- To understand the significance and role of law of sale of goods act
- To have in- depth knowledge of Information Technology Act And legal framework of right to Privacy, Data Security and Data Protection.
- Apply the law correctly to different facts and in different contexts

Unit 1: Indian Contract Act (16 hours)

Meaning and Essentials of a Contract; Valid, Void and Voidable Contract; Offer and Acceptance; Consideration; Capacity of Parties; Free Consent; Discharge of Contract and Remedies for Breach of a Contract.

Unit 2: Companies Act (16 hours)

Meaning and Nature of Company; Promotion and Incorporation of a Company; Memorandum of Association; Articles of Association; Misleading Prospectus and remedies available to the parties; Board of Directors and their qualification, duties, powers. Company Meetings and Resolutions.

Unit 3: Sale of Goods Act and Consumer Protection Act (16 hours)

Essentials of a Contract of Sale; Sale and Agreement to Sell, Conditions and Warranties; Transfer of Title by Non-Owners; Doctrine of Caveat Emptor; Rights of Unpaid Seller. **Consumer Protection Act 2009:** Scope and Applicability of the Act. Rights of consumer. Procedure for complaints. Duties and power of Central Consumer Protection Authority.

Unit 4: Limited Liability Partnership Act and IT Act (12 hours)

Meaning and nature of LLP; LLP and Company; LLP Agreement, Partners and Designated Partners, Incorporation of LLP; Partners and their Relations, Extent and limitation of liability of LLP. **Information Technology Act 2000** Concept and role; Digital signature, Electronic governance, Attribution, Acknowledgement and dispatch of electronic records, Regulation of certifying authorities, Digital signatures certificates, Duties of subscribers, Penalties and adjudication, Appellate Tribunal, Offences.

2. Maheshwari & Maheshwari. Business Law. National Publishing House. New Delhi.
3. Singh, Avtar. The Principles of Mercantile Law. Eastern Book Company. Lucknow.
4. Tulsian, P.C. Business Law. Tata McGraw Hill. New Delhi

Teaching - Learning Process:

3 lectures and One Tutorial class per week. Classroom teaching with interactive discussion of relevant case laws to enable student to have better understanding of legal text and to prepare them to present legal arguments in the cases of real life situations.

Assessment Methods:

Total Marks 100

Practical NA

Internal Assessment 25

End semester exam: Duration:3 Hours Marks: 75

Key Words: Contract, LLP, Goods, Company, Information technology, Consumer, Digital signature.

GE - 5: Quantitative Techniques in Management

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any |
|---------------------------------------|---------------|------------|---|---|----------------------|---------------------|
| | | L | T | P | | |
| Quantitative Techniques in Management | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

GEC - 5: Quantitative Techniques in Management**Course Objectives**

To apprise students with the construction of mathematical models for managerial decision making. The emphasis is on understanding the concepts, formulation and interpretation of linear programming methods and its application in diverse problems. An introduction to game theory and network analysis forms part of the course.

Learning Outcomes

- Identify and develop operational research models from the verbal description of the real system.
- Understand the mathematical tools that are needed to solve optimization problems.
- Develop critical thinking and use PERT and CPM techniques to improve decision making.

Course Structure**Unit 1: Introduction - Operations Research, Linear Programming (20 hours)**

- Introduction to Operations Research, characteristics, Phases, Methodology, Applications and scope
- Formulation of Linear Programming problems, Graphical Solutions (Special cases: Multiple optimal solution, infeasibility, unbounded solution); Simplex Method, Special cases, Big-M method and Two-phase method; Duality (emphasis on formulation & economic interpretation); Sensitivity Analysis. (Excel Solver application)

Unit 2: Transportation and Assignment Problem**(16 hours)**

- (i) Transportation Problem: Formulation, Solution by N.W. Corner Rule, Least Cost method, Vogel's Approximation Method (VAM), Modified Distribution Method; Special cases: Multiple Solutions, Maximization case, unbalanced case, prohibited routes.
- (ii) Assignment Problem: Hungarian Method, Special cases: Multiple Solutions, Maximization case, Unbalanced case, Restrictions on assignment.

Unit 3: Network Analysis**(12 hours)**

Basic Concept, Construction of the Network diagram, Critical Path Analysis, float and slack analysis (Total float, free float, independent float), probability consideration in PERT (Interface with Project Management open-source software)

Unit 4: Decision Theory:**(12 hours)**

- (i) Decision making environment, Construction of Pay off Table, Opportunity Loss Table, Decision under uncertainty. Decision under Conflict: Game Theory, Two-person Zero-Sum games, Maximin Minimax Principle, Games without Saddle point - Mixed strategy, Dominance Rule.

3. Sharma, J.K., Operations Research: Theory and Applications (6th ed.). Trinity.
4. Taha, H.A., Operations Research: An Introduction (9th ed.). Pearson.

Teaching - Learning Process

Three lectures and one tutorial class per week. Lectures devoted to teaching the theory of operations research and solving of numerical problems.

Assessment Method

Total Assessment Marks: 100

Practical exam: 0 marks

Internal Assessment: 25 marks

End semester exam 75 marks

Keywords

Linear programming, simplex method, duality, transportation problem, assignment problem, network analysis, PERT, CPM, decision making, game theory

GE - 7: Economics of Startups

| Course Title | Total Credits | Components | | | Eligibility Criteria | Prerequisite if any |
|-----------------------|---------------|------------|---|---|----------------------|---------------------|
| | | L | T | P | | |
| Economics of Startups | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

GEC – 7 Economics of Startups

Pre-requisites: None

Course Objective:

To give the students an overview of startups and its types that would help students to understand basics of starting up new ventures. The challenges they could face while starting up with new business. To enable students to explore, launch entrepreneurial ventures in their own areas of interest.

Learning Outcomes

After successful compilation of the course students will be able to

- Understand the process and working of a startup.
- Identify the different ways in which entrepreneurs manifest in start-ups.
- Know how to create one's own business venture and the various factors that influence successful set-up and sustainable operations.
- Explore the funding and other institutions supporting small business units.

Course Structure

Unit 1: Startup, Generation & Experimentation (12 hours)

Concept of Startup, Role of digital technologies, Startup ecosystems, the startup movement in India; Generating a value proposition, how valuable are new ideas, Design thinking principles; Experimenting with the prototype, Introduction to lean start-ups, Lean startup principles, Learning and failing fast.

Unit 2: Building the Business Plan (20 hours)

Beginning Considerations: Building a competitive advantage. The strategic management processes. Conducting a feasibility analysis. Forms of Business ownership. Franchising and entrepreneurship. Buying an existing business, marketing and financial considerations: Building a powerful marketing plan. E-commerce and Entrepreneur. Pricing strategies. Creating a successful financial plan. Choosing the right location and layout.

Unit 3: Crafting business models and Lean Start-ups: (16 hours)

Introduction to business models; Creating value propositions-conventional industry logic, value innovation logic; customer focused innovation; building and analysing business models; Business model canvas, Business Pitching.

Unit 4. Institutions Supporting Small Business Enterprises and ethics: (12 hours)

Central level institutions. State level institutions. Other agencies. Industry Associations. Class exercise- discussions on current government schemes supporting entrepreneurship and finding out which scheme will most suit the business plan devised by the student. Importance of Ethical Entrepreneurship, value of ethics to an entrepreneur.

Evolution of Indian Retail System

Credit-4

Course Objectives:

Create awareness of trade and retail in ancient India and its evolution, Emerging retail sector in India.

Teaching and Learning Strategies

- Lectures, discussions, presentations, case discussions, exercises, practical and exposure to current practices. The pedagogy for the course is more students centric.
- Understanding of history of trade and retail in India.
- Basic knowledge of retailing and its evolution in India.
- Introduction of retail industry in India and role of globalization.

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|---------------|--|-----------------|------------------|
| Unit 1 | 20 | √ | √ |
| Unit 2 | 20 | √ | √ |
| Unit 3 | 30 | √ | √ |
| Unit 4 | 30 | √ | √ |

*C&K- Comprehension & Knowledge **A&A – Analysis & Application

Unit -1

Economic history of India - Trade in ancient India, Evolving from Barter to Coins in India, Trade in pre and post colonial India.

Unit-2

Evolution of retail In India- Indian retail market, History of shops, Organized and unorganized retail sector.

Unit 3

Shift from manufacturing to pure retailing, Importance of retailing in Indian economy, Globalization and liberalization of Economy, Major players in retailing.

Unit 4

Indian Retail Industry-, Importance of retailing in India, trends in organized retailing, Current and Future trends of retail in India. Types of Retail Formats, FDI in Indian organized retail sector, Challenges faced by Indian retail sector.

Assessment & Evaluation

Student learning outcomes and competencies will be assessed using a combination of formative and summative methods including:

1. Objective/knowledge testing,
 2. Competency based evaluation using validated assessment tools and practical skill demonstration.
- Projects/assignments with a grading rubric/scale emphasizing module competencies

Suggested Readings-

1. Bajaj C, Tuli R. Shrivastava N.V. (2010) Retail Management, Oxford University Press.
2. K.V.S. Madaan, (2009) Fundamental of Retailing, Tata MC Graw Hill.
3. Michael Levy, Barton Weitz, AjayPandit (2017) Retailing Management, Tata McGrawHill.
4. Piyush Kumar Sinha and Dwarika Prasad Uniyal (2018) Managing Retailing 3rd edition, Oxford University Press (OUP).

DSC-2

Consumer Buying Behavior and Retail Sales

Credit -4

Course Objectives:

Create understanding of consumer behavior, its effects on retail sales.

Teaching and Learning Strategies

- Lectures, discussions, presentations, case discussions, exercises, practical and exposure to current practices. The pedagogy for the course is more students centric.
- understanding of market strategy, analysis and consumer behavior
- Proficiency in understanding shopper behavior
- Basic understanding of the process of buyers' decision making
- Understanding of consumer behavior in terms of perception and attitude.

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--------|-------------------------------------|------|-------|
| Unit 1 | 20 | √ | √ |
| Unit 2 | 20 | √ | √ |
| Unit 3 | 30 | √ | √ |
| Unit 4 | 30 | √ | √ |

*C&K- Comprehension & Knowledge **A&A – Analysis & Application

Unit 1: Introduction

Concept of Consumer and consumer market, Importance of consumer behavior, Consumer Buying Process, Factors affecting buyer behavior, Types of buying decisions, Post-Purchase behavior.

Unit 2

Nature of markets: Liberalization and Globalization of the Indian Consumer Market, online and offline markets, Organized and unorganized market, Grey market Concept of price in retail and wholesale.

Unit 3

Different types of purchase situations, retailing and the purchase process, determinants of retail success or failure, point -of- purchase materials, consumer logistics, location based retailing, importance of customer satisfaction, factors affecting satisfaction level, motivating consumer.

Unit 4

Group and personal influences on individuals, reference group and its influence on individuals, word of mouth and opinion leaders in advertising and marketing strategy, reaching the consumer, gaining consumer's attention, shaping consumer's opinion; opinions change, product's and advertising's role in shaping consumer opinion, company's role in helping consumers to remember.

Assessment & Evaluation

Student learning outcomes and competencies will be assessed using a combination of formative and summative methods including:

1. Objective/knowledge testing,
 2. Competency based evaluation using validated assessment tools and practical skill demonstration.
- Projects/assignments with a grading rubric/scale emphasizing module competencies

Suggested Readings-

- Blackwell, Roger, Miniard, Paul & Engel, James; Consumer Behaviour; Thomson Learning; New Delhi
- Loudon, David J. & Dellabitta, Albert; Consumer Behaviour; Tata McGraw Hill; New Delhi
- Schiffman, Leon G. & Kanuk, Leslie Lazar; Consumer Behaviour; Pearson Education; New Delhi
- Solomon, Michael R.; Consumer Behaviour – Buying, Having and Being; Pearson Education; New Delhi

DSC-3

Customer Service and Customer Relationship Management

Credit- 4

Course Objectives:

Fundamental understanding of customer and customer relationship management (CRM)

Teaching and Learning Strategies

- Lectures, discussions, presentations, case discussions, exercises, practical and exposure to current practices. The pedagogy for the course is more students centric.
- Perspective on business intelligence and application service providers
- Ability to analyze Sales force automation and its implication for CRM
- Proficiency in skills evaluate CRM
- Skills involved in implementation of CRM

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--------|-------------------------------------|------|-------|
| Unit 1 | 30 | √ | √ |
| Unit 2 | 30 | √ | √ |
| Unit 3 | 20 | √ | √ |
| Unit 4 | 20 | √ | √ |

*C&K- Comprehension & Knowledge **A&A – Analysis & Application

Unit 1: Introduction

Definition of customer and CRM, CRM technology components, customer life style, customer interaction, Difference between CRM and e-CRM, features of e-CRM, CRM Theory & Development and Relationship Marketing.

Unit 2:

CRM Evaluation: measurement of CRM effectiveness including CRM's impact on company efficiency, effectiveness, and employee behavior, Positive Image Building, Customer Relationship Management.

Unit 3:

Customer perception of services, Customer needs and expectations, Personalized and Post-Sales Service Support, Resolving customer concerns.

Unit 4:

Ethics and Future of CRM, Monitoring and Solving Customer Service Issues, Continuous Service improvement, Organizing Service Delivery.

Assessment & Evaluation

Student learning outcomes and competencies will be assessed using a combination of formative and summative methods including:

1. Objective/knowledge testing,
 2. Competency based evaluation using validated assessment tools and practical skill demonstration.
- Projects/assignments with a grading rubric/scale emphasizing module competencies

Suggested Readings-

- Kumar V. & Werner J. (2008) Customer relationship management, Willey India.
- Mukherjee Kaushik (2008) Customer relationship management, Prentice Hall of India Private Limited, New Delhi.
- Rai Kumar Alok (2011) Customer relationship management- Concept and Cases, Prentice Hall of India Private Limited, New Delhi. 2011
- S. Shanmugasundaram (2008) Customer relationship management, Prentice Hall of India Private Limited, New Delhi

GE-1

Computer Fundamentals

Credit- 4

Course Objectives:

Create basic understanding of computer fundamentals and its uses.

Teaching and Learning Strategies

1. Lectures, discussions, presentations, case discussions, exercises, practical and exposure to current practices. The pedagogy for the course is more students centric.
2. Basic knowledge of computer concepts and components
3. Understanding of the operating system, windows interface, control panel, system tools, and files
4. Proficiency in applications such as word, power point, and excel
5. Basic knowledge of information technology, Value Chain Reconstruction, IT Management, network and telecommunications

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|--|-------------------------------------|------|-------|
| Unit 1: Introduction | 20 | √ | √ |
| Unit 2 Devices: Input and output devices | 30 | √ | √ |
| Unit 3: Computer Organisation and Architecture | 30 | √ | √ |
| Unit 4: Overview of Emerging Technologies | 20 | √ | √ |

*C&K- Comprehension & Knowledge **A&A – Analysis & Application

Unit 1:

- Introduction: Introduction to computer system,uses, types.
- Data Representation: Number systems and character representation, binary arithmetic
- Human Computer Interface: Types of software, Operating system as user interface, utility programs

Unit 2:

Devices: Input and output devices (with connections and practical demo),keyboard, mouse, joystick, scanner, OCR, OMR, bar code reader, web camera, monitor, printer,plotter

Memory: Primary, secondary, auxiliary memory, RAM, ROM, cache memory, hard disks, optical disks

Unit 3:

Computer Organisationand Architecture: C.P.U., registers, system bus, main memory unit, cache memory, Inside a computer, SMPS, Motherboard, Ports and Interfaces, expansion cards, ribbon cables, memory chips, processors.

Unit 4:

Overview of Emerging Technologies: Bluetooth, cloud computing, big data, data mining, mobile computing and embedded systems, Orientation to POS software(s).

Practical :The practical assignment must include connecting parts of a computer and assembling it to an extent, media formatting and installation of software

Assessment & Evaluation

Student learning outcomes and competencies will be assessed using a combination of formative and summative methods including:

1. Objective/knowledge testing,
2. Competency based evaluation using validated assessment tools and practical skill demonstration.

Projects/assignments with a grading rubric/scale emphasizing module competencies

Suggested Readings-

- Goel, Computer Fundamentals, Pearson Education,2010.
- P. Aksoy, L. DeNardis, Introduction to Information Technology, Cengage Learning,2006.
- P. K.Sinha, P. Sinha, Fundamentals of Computers, BPB Publishers,2007.

GE-1

Principles of Management

Credit- 4

Course Objectives:

The course aims to equip learners with essential management related knowledge and skills and their applicability in real world.

Teaching and Learning Strategies

- Understand the evolution of management and its significance
- Comprehend and analyze applicability of managerial functions
- Recognize the role of decision-making in business
- Analyze the role of directing in management
- Appreciate the function of controlling and contemporary issues in management

Course Contents:

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|----------------------------------|-------------------------------------|------|-------|
| Unit 1: Principles of management | 25 | √ | √ |
| Unit 2 Management functions | 25 | √ | √ |
| Unit 3: Planning | 25 | √ | √ |
| Unit 4: Directing | 25 | √ | √ |

*C&K- Comprehension & Knowledge **A&A – Analysis & Application

Unit 1:

Principles of management - concept, nature and significance; Evolution of Management thought: Classical (Fayol's principles of management; Taylor's scientific management), Neoclassical (Hawthorne Experiments), Modern approach (Systems Approach; Contingency Approach).

Unit 2:

Management functions and their relationship- planning, organizing, staffing, directing and controlling; Functional areas of management – an overview; Coordination - concept, characteristics and importance.

Unit 3:

Planning- meaning, strategic and operations planning; Decision-making- concept, importance and bounded rationality; Organizing- division of labour& specialization; Organisational structures; Factors affecting organisational design.

Unit 4:

Directing- concept and importance; Concept and theories of Motivation- Maslow's need hierarchy, Herzberg's two-factor theory, Theory X&Y; Leadership-meaning and importance; Communication-meaning and importance; Staffing- concept, importance and process.

Assessment & Evaluation

Student learning outcomes and competencies will be assessed using a combination of formative and summative methods including:

1. Objective/knowledge testing,
 2. Competency based evaluation using validated assessment tools and practical skill demonstration.
- Projects/assignments with a grading rubric/scale emphasizing module competencies

Suggested Readings-

- Drucker, P. F. (1954). The Practice of Management. Newyork: Harper & Row.
- Drucker, P. F. (1999). Management Challenges for the 21st Century. Harper Collins Publishers Inc.
- Griffin. Management Principles and Application. Cengage.
- Koontz, H., &Weihrich, H. (2012). Essentials of Management: An International and

Leadership Perspective. McGraw Hill Publications

Evolution of Indian Healthcare

Credits: 4

Course Objectives:

- Create basic awareness of evolution of Indian Healthcare, indigenous system of medicine, historical development of hospitals in India and different systems of Medicine available.

Teaching and Learning Strategies

- Lectures, discussions, presentations, case discussions, exercises, practical and exposure to current practices. The pedagogy for the course is more student centric; Visit to healthcare facilities.
- Lectures would be delivered by experts drawn from the fields of both management and healthcare

Content of the Module

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|---|-------------------------------------|------|-------|
| Unit 1: History of Indian Healthcare | 25 | √ | √ |
| Unit 2: Evolution of Hospitals in India- | 25 | √ | √ |
| Unit 3: Introduction to Healthcare Delivery System in India | 20 | √ | √ |
| Unit 4: Introduction to Hospital Departments | 15 | √ | √ |
| Unit 5: Current Trends in Healthcare Industry | 15 | √ | √ |

*C&K- Comprehension & Knowledge **A&A – Analysis & Application

Unit-1-History of Indian Healthcare-Healthcare in Ancient Period & Medieval Period , history and introduction of Ayurveda, Yoga, Naturopathy, Unani, Siddha & homeopathy, role of AYUSH-integration of 6 indigenous systems of medicines practiced in India

Unit 2- Evolution of Hospitals in India-hospitals in ancient India, historical development of hospitals, Systems of medicine, Modern medicine, changing concept of hospitals, present status of hospitals (public & private) in India, Classification of Hospitals, Hospital as System, Hospital Organization, Overview on Healthcare facilities

Unit 3- Introduction to Healthcare Delivery System in India-Definition of Health, healthcare delivery system in India, Importance of Voluntary health agencies and health programs in delivering healthcare in India, Dimension of health, Spectrum of health, Determination of health and Indicators of Health, Levels of prevention, and modes of intervention for diseases and condition **Unit-4**-

Introduction to Hospital Departments :-Detailed Clinical services Detailed Support Services, Detailed Utility Services.

Unit-5-Current Trends in Healthcare Industry

1. Healthcare Industry – An Overview
2. Changing Healthcare - Determinants
3. Current Trends
 - Medical Tourism or, Medical Value Travel
 - Public private partnership (PPP)

- Information Technology and Health Care, Telemedicine, Video Conferencing, Bioinformatics, Robotic Surgery
- Health Insurance and TPA's

Assessment & Evaluation

Student learning outcomes and competencies will be assessed using a combination of formative and summative methods including:

1. Objective/knowledge testing,
2. Competency based evaluation using validated assessment tools and practical skill demonstration in clinical settings.

Projects/assignments with a grading scale emphasizing module competencies

Resource Materials

Business Journals, Healthcare status reports

Books-

1. Public Healthcare in India-Historical background & Current Realities by Sanjay Kumar & Jugal Kishore
2. History of Indian Medicine by Girindranath Mukhopadhyaya
3. Hospital Management by K.V.Ramani
4. Management of Hospital (4 Vols), S.L Goel & R. Kumar, Deep & Deep Publications Pvt. Ltd.

Human Body-Basics-Anatomy and Physiology

Credits: 4

Course Objectives:

Demonstrate skilled, safe, effective and sensitive practice in the care of patients approaching front office

Teaching and Learning Strategies:-

Class room sessions, interactive learning, Models, Simulation

Content of the Module

| Unit | Unit wise weightage of marks (in %) | C&K* | A&A** |
|---------------------------------------|-------------------------------------|------|-------|
| Unit 1: Introduction to Human Biology | 20 | √ | √ |
| Unit 2: Organ Systems-1 | 40 | √ | √ |
| Unit 3: Organ Systems-2 | 40 | √ | √ |

*C&K- Comprehension & Knowledge **A&A – Analysis & Application

Basic structure, function & common associated diseases of the following:

Unit-1 - Introduction to Human Biology: – Cell, Tissues and Organs (10 hours)

Unit-2 - Organ Systems-1

- Skeletal System - Bones, cartilage, tendons and ligaments
- Muscular System - Skeletal muscles and smooth muscles throughout the body
- Circulatory System - Heart, blood vessels and blood
- Nervous System - Brain, spinal cord and peripheral nerves
- Respiratory System - Nose, trachea and lungs

Unit-3-Organ Systems-2

- Digestive System - Mouth, esophagus, stomach, small and large intestines
- Excretory System: - Kidneys, ureters, bladder and urethra
- Endocrine System: - hypothalamus, pituitary, thyroid, pancreas and adrenal glands, etc
- Reproductive System: Male & Female Reproductive System
- Lymphatic/Immune System - Lymph, lymph nodes and vessels, White blood cells, T- and B-cells.

Assessment & Evaluation

Student learning outcomes and competencies will be assessed using a combination of formative and summative methods including:

- Objective/knowledge testing,
- Competency based evaluation using validated assessment tools and practical skill demonstration in both lab and clinical settings.

Projects/assignments with a grading rubric/scale emphasizing module competencies

Resource Materials

Textbooks, and on-line reference and training materials

Books:-Human Anatomy and Physiology by Dr.A.K.Jain

| Unit 2: General Body Terminology | 40 | √ | √ |
| Unit 3: Pharmacology | 30 | √ | √ |

*C&K- Comprehension & Knowledge **A&A – Analysis & Application

Unit-1-Building Blocks of Medical Terminologies (10 hours)

- Roots
- Prefixes
- Suffixes
- Pronunciation rules

Unit-2-General Body Terminology (10 hours)

- Medical Terms related to different organ systems

Unit-3-Pharmacology (10 hours)

- Prescriptions and OTC medications
- Routes of Administration
- Medication actions and effects
- Abbreviations

Assessment & Evaluation

Student learning outcomes and competencies will be assessed using a combination of formative and summative methods including:

1. Objective/knowledge testing,
2. Competency based evaluation using validated assessment tools and practical skill demonstration.

Projects/assignments with a grading rubric/scale emphasizing module competencies

Resource Materials

Reference texts and online material

Unit 3:

Planning- meaning, strategic and operations planning; Decision-making- concept, importance and bounded rationality; Organizing- division of labour & specialization; Organisational structures; Factors affecting organisational design.

Unit 4:

Directing- concept and importance; Concept and theories of Motivation- Maslow's need hierarchy, Herzberg's two-factor theory, Theory X&Y; Leadership-meaning and importance; Communication-meaning and importance; Staffing- concept, importance and process.

Assessment & Evaluation

Student learning outcomes and competencies will be assessed using a combination of formative and summative methods including:

1. Objective/knowledge testing,

2. Competency based evaluation using validated assessment tools and practical skill demonstration.
Projects/assignments with a grading rubric/scale emphasizing module competencies

Suggested Readings-

1. Drucker, P. F. (1954). The Practice of Management. Newyork: Harper & Row.
2. Drucker, P. F. (1999). Management Challenges for the 21st Century. Harper Collins Publishers Inc.
3. Griffin. Management Principles and Application. Cengage.
4. Koontz, H., & Weihrich, H. (2012). Essentials of Management: An International and Leadership Perspective. McGraw Hill Publications
5. Kumar, Pardeep. Management: Principles and Applications. JSR Publication House LP, Delhi.

Bachelor in Vocation - Software Development

Category-I

DISCIPLINE SPECIFIC CORE COURSE – 1: Programming using Python

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Programming using Python | 4 | 2 | 0 | 2 | Class XII pass with Mathematics | NIL |

Learning Objectives

1. To introduce the programming concepts using Python.
2. The course focuses on the development of Python programming to solve problems of different domains.
3. To introduce the concept of object- oriented programming.

Learning outcomes

1. Understand the basics of programming language
2. Develop, document, and debug modular Python programs.
3. Apply suitable programming constructs and built-in data structures to solve a problem.
4. Use and apply various data objects in Python.
5. Use classes and objects in application programs and handle files.

Unit I

(6 hours)

Introduction to Programming: Problem solving strategies; Structure of a Python program; Syntax and semantics; executing simple programs in Python.

Unit II

(6 hours)

Creating Python Programs: Identifiers and keywords; Literals, numbers, and strings; Operators; Expressions; Input/output statements; Defining functions; Control structures (conditional statements, loop control statements, break, continue and pass, exit function), default arguments.

Unit III

(6 hours)

Built-in data structures: Mutable and immutable objects; Strings, built-in functions for string, string traversal, string operators and operations; Lists creation, traversal, slicing and splitting operations,

Unit IV **(6 hours)**
Object Oriented Programming: Introduction to classes, objects and methods; Standard libraries.

1. Liang, Y. D. (2013). *Introduction to Programming using Python*. Pearson Education.
2. Kamthane, A. N., & Kamthane, A.A. (2017) *Programming and Problem Solving with Python*, McGraw Hill Education

1. WAP to find the roots of a quadratic equation.
2. WAP to accept a number 'n' to compute the following:
 - a. Check if 'n' is prime
 - b. Generate all prime numbers till 'n'
 - c. Generate first 'n' prime numbers
 - d. Calculate sum of first 'n' natural numbers
3. WAP to create a pyramid of the character '*' and a reverse pyramid

4. WAP that accepts a character and performs the following:
 - a. print whether the character is a letter or numeric digit or a special character
 - b. if the character is a letter, print whether the letter is uppercase or lowercase
 - c. if the character is a numeric digit, prints its name in text (e.g., if input is 9, output is NINE)
5. WAP to perform the following operations on a string
 - a. Find the frequency of a character in a string.
 - b. Replace a character by another character in a string.
 - c. Remove the first occurrence of a character from a string.
 - d. Remove all occurrences of a character from a string.
6. WAP to swap the first n characters of two strings.
7. Write a function that accepts two strings and returns the indices of all the occurrences of the second string in the first string as a list. If the second string is not present in the first string then it should return -1.
8. WAP to create a list of the cubes of only the even integers appearing in the input list (may have elements of other types also) using for loop and list comprehension.

9. WAP to read a file and
 - a. Print the total number of characters, words and lines in the file.
 - b. Calculate the frequency of each character in the file. Use a variable of dictionary type to maintain the count.
 - c. Print the words in reverse order.
 - d. Copy even lines of the file to a file named 'File1' and odd lines to another file named 'File2'.
10. WAP to define a class Point with coordinates x and y as attributes. Create relevant methods and print the objects. Also define a method distance to calculate the distance between any two point objects.
11. Write a function that prints a dictionary where the keys are numbers between 1 and 5 and the values are cubes of the keys.
12. Consider a tuple t1=(1, 2, 5, 7, 9, 2, 4, 6, 8, 10). WAP to perform following operations:
 - a. Print half the values of the tuple in one line and the other half in the next line.
 - b. Print another tuple whose values are even numbers in the given tuple.
 - c. Concatenate a tuple t2=(11,13,15) with t1.
 - d. Return maximum and minimum value from this tuple
13. WAP to accept a name from a user. Raise and handle appropriate exception(s) if the text entered by the user contains digits and/or special characters.

DISCIPLINE SPECIFIC CORE COURSE – 2: Computer Fundamentals

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Computer Fundamentals | 4 | 2 | 0 | 2 | Class XII pass with Mathematics | NIL |

Learning Objectives:

1. To introduce the fundamentals of computing devices.
2. To understand the use of computer hardware and software, the Internet, networking and mobile computing.
3. To focus on computer literacy that prepares students for life-long learning of computer concepts and skills.

Learning Outcomes:

1. Bridge the fundamental concepts of computers with the present level of knowledge of the students.

2. Familiarize operating systems, programming languages, peripheral devices, networking, multimedia and internet.
3. Understand binary number system.
4. Understand use of computers in education and research.

UNIT-I

(6 hours)

Computer Fundamentals: Generations of Computers, Definition, Block Diagram along with its components, characteristics & classification of computers, Limitations of Computers, Applications of computers in various Fields.

UNIT- II

(6 hours)

Data Representation: Number systems and character representation, binary arithmetic, definition of software, types of software, operating systems as user interface, utility programs.

UNIT-III

(6 hours)

Devices: Input-Output Devices (with connections and practical demo), memory, primary, secondary, auxiliary memory, RAM, ROM, cache memory, hard disk, optical disk.

UNIT-IV

(6 hours)

Computer Organization and Architecture: CPU, registers, system bus, main memory unit(MMU),cache memory, inside a computer, SMPS, motherboard, ports and interfaces, expansion code, ribbon cables, memory chips, processors, overview of emerging technology

UNIT-V

(6 hours)

Use of Computers in Education and Research: Data analysis, heterogeneous storage, e-Library, Google scholar, Domain specific packages such as SPSS, Mathematica etc.

Essential/Recommended readings:

1. *Balagurusamy E, Computing Fundamentals and C Programming, Tata McGraw Hill.*
2. *Norton, Peter, Introduction to Computer, McGraw-Hill*
3. *Leon, Alexis & Leon, Mathews, Introduction to Computers, Leon Tech World*

Practical Component (60 hours)

The practical assignment must include connecting parts of a computer and assembling it to an extent, media formatting and installation of some software. Practical exercises based on Open Office tools using document preparation and spreadsheets handling packages.

A. Text Editor

1. Prepare a **grocery list** having four columns (Serial number, the name of the product, quantity and price) for the month of April, 06.
- Font specifications for Title (Grocery List): 14-point Arial font in bold and italics.
 - The headings of the columns should be in 12-point and bold.
 - The rest of the document should be in 10-point Times New Roman.
 - Leave a gap of 12-points after the title.

2. Design a **time-table form** for your college.
 - The first line should mention the name of the college in 16-point Arial Font and should be bold.
 - The second line should give the course name/teacher's name and the department in 14-point Arial.
 - Leave a gap of 12-points.
 - The rest of the document should use 10-point Times New Roman font.
 - The footer should contain your specifications as the designer and date of creation.
3. Create the following **one page documents**.
 - a. Compose a note inviting friends to a get-together at your house, including a list of things to bring with them.
 - b. Design a certificate in landscape orientation with a border around the document.
 - c. Design a Garage Sale sign.
 - d. Make a sign outlining your rules for your bedroom at home, using a numbered list.
4. Create the following documents:
 - (a) A newsletter with a headline and 2 columns in portrait orientation, including at least one image surrounded by text.
 - (b) Use a newsletter format to promote upcoming projects or events in your classroom or college.
5. Convert **following text to a table**, using comma as delimiterType the following as shown

Color, Style, Item Blue, A980, Van Red, X023, Car
 Green, YL724, Truck Name, Age, Sex
 Bob, 23, M
 Linda, 46, F
 Tom, 29, M

B. Spreadsheet

1. Enter the Following data in Excel Sheet

REGIONAL SALES PROJECTION

| State | Qtr1 | Qtr2 | Qtr3 | QTR4 | QTR Total | Rate | Amount |
|------------------|------|------|------|------|-----------|------|--------|
| Delhi | 2020 | 2400 | 2100 | 3000 | | 15 | |
| Punjab | 1100 | 1300 | 1500 | 1400 | | 20 | |
| U.P. | 3000 | 3200 | 2600 | 2800 | | 17 | |
| Haryana | 1800 | 2000 | 2200 | 2700 | | 15 | |
| Rajasthan | 2100 | 2000 | 1800 | 2200 | | 20 | |
| TOTAL AVERAGE | | | | | | | |

- (a) Apply Formatting as follow:
 - i. Title in TIMES NEW ROMAN
 - ii. Font Size - 14
 - iii. Remaining text - ARIAL, Font Size -10
 - iv. State names and Qtr. Heading Bold, Italic with Gray Fill Color.

- v. Numbers in two decimal places.
- vi. Qtr. Heading in center Alignment.
- vii. Apply Border to whole data.
- (b) Calculate State and Qtr. Total
- (c) Calculate Average for each quarter
- (d) Calculate Amount = Rate * Total.

2. Given the following worksheet

| | A | B | C | D |
|---|----------|-----------|-------|-------|
| 1 | Roll No. | Name | Marks | Grade |
| 2 | 1001 | Sachin | 99 | |
| 3 | 1002 | Sehwag | 65 | |
| 4 | 1003 | Rahul | 41 | |
| 5 | 1004 | Sourav | 89 | |
| 6 | 1005 | Harbhajan | 56 | |

Calculate the grade of these students on the basis of following guidelines:

| <u>If Marks</u> | <u>Then Grade</u> |
|-----------------|-------------------|
| ≥ 80 | A+ |
| $\geq 60 < 80$ | A |
| $\geq 50 < 60$ | B |
| < 50 | |

3. Given the following worksheet

| | A | B | C | D | E | F | G |
|---|-----------------|-----------------------|------|-------|-------|-------|------------|
| 1 | Salesman | Sales in (Rs.) | | | | | |
| 2 | No. | Qtr1 | Qtr2 | Qtr3 | Qtr4 | Total | Commission |
| 3 | S001 | 5000 | 8500 | 12000 | 9000 | | |
| 4 | S002 | 7000 | 4000 | 7500 | 11000 | | |
| 5 | S003 | 4000 | 9000 | 6500 | 8200 | | |
| 6 | S004 | 5500 | 6900 | 4500 | 10500 | | |
| 7 | S005 | 7400 | 8500 | 9200 | 8300 | | |
| 8 | S006 | 5300 | 7600 | 9800 | 6100 | | |

Calculate the commission earned by the salesmen on the basis of following Candidates:

| <u>If Total Sales</u> | <u>Commission</u> |
|-------------------------|-------------------|
| < 20000 | 0% of sales |
| > 20000 and < 25000 | 4% of sales |
| > 25000 and < 30000 | 5.5% of sales |
| > 30000 and < 35000 | 8% of sales |
| ≥ 35000 | 11% of sales |

The total sales is sum of sales of all the four quarters.

4. A company XYZ Ltd. pays a monthly salary to its employees which consists of basic salary, allowances & deductions. The details of allowances and deductions are as follows:

Allowances

- HRA Dependent on Basic :
30% of Basic if Basic \leq 1000
25% of Basic if Basic $>$ 1000 & Basic \leq 3000
20% of Basic if Basic $>$ 3000
- DA Fixed for all employees :
30% of Basic
- Conveyance Allowance :
Rs. 50/- if Basic is \leq 1000
Rs. 75/- if Basic $>$ 1000 & Basic \leq 2000
Rs. 100 if Basic $>$ 2000
- Entertainment Allowance :
NIL if Basic is \leq 1000
Rs. 100/- if Basic $>$ 1000

Deductions

- Provident Fund :
6% of Basic
- Group Insurance Premium :
Rs. 40/- if Basic is \leq 1500
Rs. 60/- if Basic $>$ 1500 & Basic \leq 3000
Rs. 80/- if Basic $>$ 3000

Calculate the following:

Gross Salary = Basic + HRA + DA + Conveyance + Entertainment

Total deduction = Provident Fund + Group Insurance Premium

Net Salary = Gross Salary – Total Deduction

5. The following table gives year wise sale figure of five salesmen in Rs.

| Salesman | 2000 | 2001 | 2002 | 2003 |
|----------|-------|-------|--------|-------|
| S1 | 10000 | 12000 | 20000 | 50000 |
| S2 | 15000 | 18000 | 50000 | 60000 |
| S3 | 20000 | 22000 | 70000 | 70000 |
| S4 | 30000 | 30000 | 100000 | 80000 |
| S5 | 40000 | 45000 | 125000 | 90000 |

- (a) Calculate total sale year wise.
- (b) Calculate the net sale made by each salesman
- (c) Calculate the maximum sale made by the salesman
- (d) Calculate the commission for each salesman under the condition.
 - (i) If total sales $>$ 4, 00,000 give 5% commission on total sale made by the salesman.
 - (ii) Otherwise give 2% commission.
- (e) Draw a bar graph representing the sale made by each salesman.
- (f) Draw a pie graph representing the sale made by salesman in 2000.

DISCIPLINE SPECIFIC CORE COURSE – 3: Mathematics for Computing - I

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Mathematics for Computing - I | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | NIL |

Learning Objectives:

1. To introduce the fundamental concepts and topics of linear algebra and vector calculus.
2. To build the foundation for some of the core courses in later semesters.

Learning Outcomes:

1. Perform operations on matrices and sparse matrices.
2. Compute the determinant, rank and eigenvalues of a matrix.
3. Perform operations on vectors, the dot product and cross product.
4. Represent vectors geometrically and calculate the gradient, divergence, curl.
5. Apply linear algebra and vector calculus to solve problems in sub-disciplines of computer science.

Unit I

(12 hours)

Introduction to Matrix Algebra: Echelon form of a Matrix, Rank of a Matrix, Determinant and Inverse of a matrix, Solution of System of Homogeneous & Non-Homogeneous Equations: Gauss elimination and Solution of System of Homogeneous Equations: Gauss Jordan Method.

Unit II

(16 hours)

Vector Space and Linear Transformation: Vector Space, Sub-spaces, Linear Combinations, Linear Span, Convex Sets, Linear Independence/Dependence, Basis & Dimension, Linear transformation on finite dimensional vector spaces, Inner Product Space, Schwarz Inequality, Orthonormal Basis, Gram-Schmidt Orthogonalization Process.

Unit III

(16 hours)

EigenValue and EigenVector: Characteristic Polynomial, Cayley Hamilton Theorem, Eigen Value and Eigen Vector of a matrix, Eigenspaces, Diagonalization, Positive Definite Matrices, Applications to Markov Matrices

Unit IV

(16 hours)

Vector Calculus: Vector Algebra, Laws of Vector Algebra, Dot Product, Cross Product, Vector and Scalar Fields, Ordinary Derivative of Vectors, Space Curves, Partial Derivatives, Del Operator, Gradient of a Scalar Field, Directional Derivative, Gradient of Matrices, Divergence of a Vector Field, Laplacian

Operator, Curl of a Vector Field.

Essential/Recommended readings:

1. *Gilbert Strang, Introduction to Linear Algebra, 5th Edition, Wellesley-Cambridge Press, 2021.*
2. *Erwin Kreyszig, Advanced Engineering Mathematics, 10th Edition, Wiley, 2015.*
3. *Gilbert Strang, Linear Algebra and Learning from Data, 1st Edition, Wellesley-Cambridge Press, 2019.*
4. *R. K. Jain, S. R. K. Iyengar, Advanced Engineering Mathematics, 5th Edition, Narosa, 2016.*

COMMON POOL OF GENERIC ELECTIVES COURSES

GENERIC ELECTIVE – 1: Web Designing (HTML, CSS and PHP)

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) | Department offering the course |
|-----------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Web Designing (HTML, CSS and PHP) | 4 | 2 | 0 | 2 | 12 th Pass | NIL | |

Learning Objectives

1. The course aims at introducing the basic concepts and techniques of client side web programming.
2. The student shall be able to develop simple websites using HTML, CSS and JavaScript.

Learning Outcomes:

1. Understanding of the principles of creating an effective web page, including an in-depth consideration of information architecture.
2. Apply intermediate and advanced web development practices.
3. Implement basic JavaScript.
4. Create webpages that function using external data.
5. Basic understanding of PHP.

Unit 1: Introduction to Internet

(6 hours)

Concept of WWW, internet and WWW, protocols and programs, secure connections, application and development tools, web browser, URL, web server, web site designing principles, Domain Name.

Unit-2: Introduction to HTML

(6 hours)

Development process, HTML Tags and Attributes, HTML Basic Tags, forms and website structure, HTML Color Coding, Div and Span Tags, hyperlinks, lists, tables, images, URL, character entities, frames and frame sets, overview and features of HTML5.

Unit-3: Cascading Style Sheets (CSS)

(6 hours)

Introduction to CSS, Features and benefits of CSS, basics, CSS syntax and structure, using and linking CSS, using selectors, background images, colors and properties, manipulating texts, using fonts, borders and boxes, margins, padding lists, positioning using CSS and CSS2, overview and features of CSS3.

Unit-4: Introduction to JavaScript

(6 hours)

JavaScript Introduction, JavaScript Output, JavaScript Variables, JavaScript Operators, JavaScript

Arithmetic, JavaScript Data Types, JavaScript Assignment, JavaScript Functions, JavaScript Objects, JavaScript Scope, JavaScript Events, JavaScript Strings and String Methods, JavaScript Numbers and Number Methods, JavaScript Math, JavaScript Dates: Formats and Methods, JavaScript Booleans , JavaScript Comparisons, JavaScript Conditions, JavaScript Switch, JavaScript Loops, JavaScript Break, JavaScript Type, JavaScript Forms (API and Validation), JavaScript Objects, JavaScript Functions, JavaScript DOM, JavaScript Browser BOM, JavaScript Frameworks

Unit-5: Introduction to PHP

(6 hours)

Introduction and basic syntax of PHP, Installing PHP, PHP Variables, PHP Data Types, PHP Strings, PHP Constants, PHP Operators, PHP Programming Loops, PHP Functions, PHP Arrays, PHP Forms and PHP Form Handling, PHP Form Validation.

Essential/recommended readings:

1. Robin Nixon, *Learning PHP, MYSQL, JavaScript, CSS & HTML5 3ed: A Step-by-Step Guide to Creating Dynamic Websites*, O'Reilly
2. Jon Duckett, *HTML and CSS: Design and Build Websites*, Wiley.
3. Jon Duckett, *JavaScript and JQuery: Interactive Front-End Web Development*, Wiley.
4. Jennifer Niederst Robbins, *Learning Web Design: A Beginner's Guide to HTML, CSS, JavaScript, and Web Graphics*, O'reilly.
5. Dt Editorial Services, *Html 5 Black Book - Covers CSS 3, JavaScript, XML, XHTML, AJAX, PHP and JQuery*, DreamTech Press Publication.

Practical Component: (60 hours)

1. Design a home page which displays information about your college department using headings, HTML entities and paragraphs.
2. Implement different types of list tags, hyperlinks, marquee tag and HTML formatting tags in the college department homepage.
3. Create a web page having two frames, Frame 1 containing links and another with contents of the link. When a link is clicked appropriate contents should be displayed on Frame 2. Also, insert an iframe in the same page.
4. Design your course timetable and display it in tabular format.
5. Design an admission form for any course in your college with text, password fields, drop-down list, check-boxes, and radio buttons, submit and reset button etc. with proper CSS formatting.
6. Create a website for online book stores with Home, Login, Catalogue, Registration page with links to all these pages in a menu on top of every page. Embed heading, paragraph, images, video, .iframe, form controls, table, and list in this website. Use both Internal and external CSS in this.
7. Write a JavaScript program to display the current day and time.
8. Write a JavaScript program to
 - a) Remove a character at the specified position of a given string and return the new string.
 - b) Change the case of a string. (I.e. upper case to lower case and vice-versa).
9. Write a JavaScript program to compute the sum of elements of a given array of integers.
10. Develop and demonstrate a HTML file that includes JavaScript script for taking full name in a text field and display first, middle, last name *in 3 different labels. Middle and last name may be optional, thus messages like "NA" should be displayed in corresponding labels. If input contains 2 words, then they should be considered as first and last names.

11. Design HTML form for keeping student record, apply JavaScript validation for restriction of mandatory fields, numeric field, email-address field, specific value in a field etc.
12. Write a JavaScript code that displays text "Bigger Text" with increasing font size in the interval of 10ms in red color, when the font size reaches 50 pt. it displays "Smaller Text" in green color. Then the font size should decrease to 5pt and then stop.
13. Write a PHP script that removes the whitespaces from a string.
14. Create a login page having user name and password. On clicking submit, a welcome message should be displayed if the user is already registered (i.e.name is present in the database) otherwise error message should be displayed.
15. Create a simple 'birthday countdown' script, the script will count the number of days between current day and birth day.

GENERIC ELECTIVE – 2: Database Management Systems

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) | Department offering the course |
|-----------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Database Management Systems | 4 | 2 | 0 | 2 | 12 th Pass | NIL | |

Learning Objectives:

1. To introduce the fundamentals of database management system and its architecture.
2. Students will learn about the importance of database structure and it's designing using conceptual approach using Entity Relationship Model and formal approach using Normalization.
3. The course would give students hands-on practice of structured query language in a relational database management system.

Learning Outcomes

1. Identify the basic concepts and various data model used in database design.
2. Use relational database management software to create and manipulate the database.
3. ER modelling concepts and architecture use and design queries using SQL.
4. Create conceptual data models using entity relationship diagrams for modelling real-life situations and map it to corresponding relational database schema.
5. Use the concept of functional dependencies to remove redundancy and update anomalies.
6. Implement relational databases and formulate queries for data retrieval and data update problems using SQL.
7. Use of PHP to connect with database and understand how to design web applications.

Unit-1: (6 hours)

Introduction and applications of DBMS, Basic Concepts: DBMS Architecture, Data Independence, Data modelling for a database, abstraction and data integration, three level architecture of a DBMS, Database users and DBA.

Unit-2: (6 hours)

Database Design: Entities and attributes, Entity types, Entity set, Attribute and keys, Defining the E-R diagram, Concept of Generalization, Aggregation and Specialization.

Unit-3: (6 hours)

Relational Model: Relational Data Manipulations: Relation, conversion of ER diagrams to relations, integrity constraints, Functional dependencies and Normalization.

Unit-4: (6 hours)

Structured Query Language: DDL, DML, DDL queries like create database, drop database, create table, drop table, alter table.

DML Queries like inserting into a table, update a table, delete data from table, and filter data. Create relationships between tables, SQL sub queries, SQL clauses, SQL aggregate functions, SQL Joins.

Unit-5: (6 hours)

PHP with MYSQL: PHP MYSQL Database, PHP Connecting to Database, PHP Creating Records, PHP Selecting Records, PHP Deleting Records, PHP Updating Records, PHP Limit Data, PHP Insert Multiple.

Essential/recommended readings:

1. R. Elmasri, S.B. Navathe Database Systems Models, Languages, Design and application Programming, 7th Edition, Pearson Education.
2. R. Ramakrishnan and J. Gehrke, Database Management Systems, 3rd Edition, McGraw Hill, 2014.
3. A. Silberschatz, H. Korth and S. Sudarshan, Database System Concepts, 6th Edition, McGraw Hill, 2014.
4. Robin Nixon, Learning PHP, MYSQL, JavaScript, CSS & HTML5 3ed: A Step-by-Step Guide to Creating Dynamic Websites, O'Reilly.

Practical component: (60 hours)

1. Create a database having two tables with the specified fields, to computerize a library system of a Delhi University College.

- LibraryBooks (Accession number, Title, Author, Department, PurchaseDate, Price)
- IssuedBooks (Accession number, Borrower)

a) Identify primary and foreign keys. Create the tables and insert at least 5 records in each table.

b) Delete the record of a book titled “Database System Concepts”.

c) Change the Department of the book titled “Discrete Maths” to “BVoc”.

d) List all books that belong to the “BVoc” department.

e) List all books that belong to the “BVoc” department and are written by author “Navathe”.

f) List all computers (Department = “BVoc”) that have been issued.

g) List all books which have a price less than 500 or purchased between “01/01/2022” and “31/12/2022”.

2. Create a database having three tables to store the details of students of Computer Department in your college, as per the given schema.

- Personal information about Student (College roll number, Name of student, Date of birth, Address, Marks(rounded off to whole number) in percentage at 10 + 2, Phone number)
- Paper Details (Paper code, Name of the Paper)
- Student's Academic and Attendance details (College roll number, Paper code, Attendance, Marks in home examination).

- a) Identify primary and foreign keys. Create the tables and insert at least 5 records in each table.
- b) Design a query that will return the records (from the second table) along with the name of student from the first table, related to students who have more than 75% attendance and more than 60% marks in paper 2.
- c) List all students who live in "Delhi" and have marks greater than 60 in paper 1.
- d) Find the total attendance and total marks obtained by each student.
- e) List the name of student who has got the highest marks in paper 2

3. Create the following tables and answer the queries given below:

- Customer (CustID, email, Name, Phone, ReferrerID)
- Bicycle (BicycleID, DatePurchased, Color, CustID, ModelNo) BicycleModel (ModelNo, Manufacturer, Style)
- Service (StartDate, BicycleID, EndDate)

- a) Identify primary and foreign keys. Create the tables and insert at least 5 records in each table.
- b) List all the customers who have the bicycles manufactured by manufacturer "Honda".
- c) List the bicycles purchased by the customers who have been referred by customer "C1".
- d) List the manufacturer of red colour bicycles.
- e) List the models of the bicycles given for service.

4. Create the following tables, enter at least 5 records in each table and answer the queries given below.

- EMPLOYEE (Person_Name, Street, City) WORKS (Person_Name, Company_Name, Salary)
- COMPANY (Company_Name, City)
- MANAGES (Person_Name, Manager_Name)

- a) Identify primary and foreign keys.
- b) Alter table employee, add a column "email" of type varchar (20).
- c) Find the name of all managers who work for both Samba Bank and NCB Bank.
- d) Find the names, street address and cities of residence and salary of all employees who work for "Samba Bank" and earn more than \$10,000.
- e) Find the names of all employees who live in the same city as the company for which they work.
- f) Find the highest salary, lowest salary and average salary paid by each company.
- g) Find the sum of salary and number of employees in each company.
- h) Find the name of the company that pays the highest salary.

5. Create the following tables, enter at least 5 records in each table and answer the queries given below.

- Suppliers (SNo, Sname, Status, SCity)
- Parts (PNo, Pname, Colour, Weight, City)
- Project (JNo, Jname, Jcity)
- Shipment (Sno, Pno, Jno, Quantity)

- a) Identify primary and foreign keys.

- b) Get supplier numbers for suppliers in Paris with status>20.
- c) Get supplier details for suppliers who supply part P2. Display the supplier list in increasing order of supplier numbers.
- d) Get suppliers names for suppliers who do not supply part P2.
- e) For each shipment get full shipment details, including total shipment weights.
- f) Get all the shipments where the quantity is in the range 300 to 750 inclusive.
- g) Get part nos. for parts that either weigh more than 16 pounds or are supplied by suppliers S2, or both.
- h) Get the names of cities that store more than five red parts.
- i) Get full details of parts supplied by a supplier in London.
- j) Get part numbers for parts supplied by a supplier in London to a project in London. k) Get the total number of projects supplied by a supplier (say, S1).
- k) Get the total quantity of a part (say, P1) supplied by a supplier (say, S1)

BVOC –Banking, Financial Services and Insurance

Category-I

BVOC –Banking, Financial Services and Insurance course for Undergraduate Programme of study with Banking, Financial Services and Insurance as a Single Core Discipline

DISCIPLINE SPECIFIC CORE COURSE – 1: Basics of Financial Accounting

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basics of Financial Accounting | 4 | 3 | 0 | 1 | Class XII pass | NIL |

Learning Objective

The basic purpose of this course is to develop an insight of postulates, principles and techniques of accounting and application of financial and accounting information for planning, decision-making and control.

Learning Outcomes

After completion of the course, learners will be able to:

1. Describe various accounting concepts and principles while recording transactions and preparing financial statements;
2. Measure business income applying relevant Accounting Standards;
3. Prepare cash book and other accounts necessary while running a business;
4. Prepare financial statements of sole proprietors and partnership firms; and
5. Understand and analyse financial statements from the perspective of different stakeholders using ratio analysis.

SYLLABUS OF DSC-1

Unit I

(9 hours)

Introduction to Financial Accounting: Accounting as an Information System. Importance, Scope, and Limitations. Users of Accounting Information. Need for Generally Accepted Accounting Principles. Basic Concepts and Conventions: Business Entity, Dual Aspect, Going Concern, Accounting Period, Money Measurement, Accrual, Disclosure, Materiality, Consistency, and Conservatism. The Accounting Equation. Understanding Assets, Liabilities, Revenues, and Expenses. Understanding Capital Expenditure, Revenue Expenditure, Deferred Revenue

Expenditure, Capital Receipts, and Revenue Receipts. Nature of Accounts and Rules of Debit and Credit. Recording Transactions in General Journal. Journal entries passed for accounting of transactions including GST. Preparation of Ledger Accounts. Opening and Closing Entries. Preparation of Trial Balance. Recording Transactions in three-column Cash Book.

Unit II (9 hours)

Bank Reconciliation Statement, Need for Bank Reconciliation; Causes of Differences; Preparation of Bank Reconciliation Statement; How to prepare a Bank Reconciliation Statement when Extracts of Cash Book and Pass Book are given; adjusting the Cash Book Balance; Advantages of Bank Reconciliation Statement. Preparation of Financial Statements: Preparing Trading Account, Profit & Loss Account and Balance.

Unit III (9 hours)

Accounting standards: Concept, benefits and Process of formulation of Accounting Standards including Ind AS (IFRS converged standards) and IFRSs; convergence vs. adoption; Application of accounting standards (AS and Ind AS) on various entities in India. International Financial Accounting Standards (IFRS) – meaning, need and scope; Process of issuing IFRS. Understanding of financial Statements of a Joint Stock Company as per Companies Act 2013. Understanding the contents of a Corporate Annual General Report.

Unit IV (9 hours)

Analysing Financial Statement : Objectives of Financial Statement Analysis; Sources of information; Standards of Comparison; Techniques of financial statement Analysis- Horizontal Analysis and Vertical Analysis; Meaning and usefulness of Financial Ratios; Analysis of financial ratios from the perspective of different Stakeholders like investors, Lenders, Short-term creditors: Profitability ratios, Solvency Ratios, Liquidity Ratios and turnover Ratios; Limitations of Ratio Analysis; Concept of Earning Management and its Detection.

Unit V (9 hours)

Computerized Accounting Systems: Computerized Accounts by using any popular accounting software Creating a Company; Configure and Features settings; Creating Accounting Ledgers and Groups; Creating Stock Items and Groups; Vouchers Entry; Generating Reports - Cash Book, Ledger Accounts, Trial Balance, Profit and Loss Account, Balance Sheet, and Cash Flow Statement. Selecting and shutting a Company; Backup, and Restore data of a Company.

Practical component- (30 hours)

Students will perform practical problems based upon the concepts given in theory and practice the same on any accounting software.

Suggested Readings:

- Anthony, R. N., Hawkins, D., & Merchant, K. A. “Accounting: Text and Cases” McGrawHill Education India.
- Dam, B. B., & Gautam, H. C. “Financial Accounting” Gayatri Publications, Guwahati.

- Goldwin, N., Alderman, W., & Sanyal, D. “Financial Accounting” Cengage Learning, Boston.
- Kumar, A. “Financial Accounting” Singhal Publication.
- Lal, J., Srivastava, S. & Abrol. Shivani. “Financial Accounting Text & Problems” Himalaya Publishing House, Mumbai.
- Maheshwari, S. N., Maheshwari, S. K., & Maheshwari, S. K. “Financial Accounting” Vikas Publishing House Pvt. Ltd., New Delhi.
- Monga, J. R. & Bahadur, R. “Financial Accounting: Concepts and Applications” Scholar Tech Press, New Delhi.
- Sehgal, A. & Sehgal D. “Fundamentals of Financial Accounting” Taxmann.
- Sehgal, D. “Financial Accounting” Vikas Publishing House Pvt. Ltd., New Delhi.
- Tulsian, P. C. “Financial Accounting” S CHAND LTD., New Delhi.

Additional Resources:

- Accounting Standards at the Website of the Institute of Chartered Accountants of India
- Indian Accounting Standards at the Website of the Ministry of Corporate Affairs.

Teaching Learning Process:

Class room lecture, Numerical Problem solving, Case study discussion, Class presentation on the assigned topic by students individually or in group, Workshop, Tutorials, Role play.

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks (including practical of 20 marks)

The Internal Assessment for the course may include Class participation, Assignments, Class test Projects, Field Work, Presentations, amongst others as decided by the faculty.

Keywords: Accounting, Financial Statements, Final Accounts, Computerized Accounting, IFRS

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2: Business Organisation and Management

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Business Organisation and Management | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objective

The basic purpose of this course is to acquaint learners with the basics of business concepts and functions, forms of business organization, and Dimensions & Modes of management.

Learning Outcomes

After completion of the course, the learners will be able to:

1. Distinguish and explain each form of business.
2. Understand issues of business organization.
3. Understand and explain the basics of management.
4. Explain dimensions and mode of management implemented in the organization.

SYLLABUS OF DSC-2

UNIT-I: Introduction to Business Organisation and Management (12 hours)

Meaning and role of organisations and management in our lives; Relationship between organisation and management; Overview of functions of management; Multiple perspectives of business organisations- Consumers, Employees, Entrepreneurs, Community/Society at large; Perspective as a student & researcher- underlying disciplines; Ownership forms; Business formats- Brick & Mortar; Click; Brick & Click; Franchising location & scale- local, national, global; Micro, small, medium and large.

UNIT-II: Business Environment and Entrepreneurship (12 hours)

Meaning, layers (micro/immediate, meso/intermediate, macro and international), characteristics of business friendly environment; Ideals of business ethics, social responsibility and conscientious commerce; Business and social entrepreneurship as a process of opportunity/problem recognition and their realization/resolution.

UNIT-III: Planning and Organizing (12 hours)

Planning- meaning of project, strategic and operations planning; Decision-making process and techniques; Organizing- orderly division of labour & specialization; Organisational structures and organograms- staffed/manned structures-traditional and modern.

UNIT-IV: Directing and Controlling

(12 hours)

Motivation- needs (including Maslow's theory), incentives, rewards, equity and two factor theory (Herzberg); Leadership and followership- meaning and importance; Organisation-wide leadership; Communication- meaning and importance; determinants of effectiveness; Principles of controlling; Relationship between planning, organizing, directing & controlling; Financial, quality and operating standards/controls.

UNIT-V: Salient Development and Contemporary Issues in Management

(12 hours)

Subaltern management ideas from India; Diversity & inclusion, democracy and sociocracy at work; Freelancing; Flexi-time and work from home; Co-sharing/coworking.

Suggested Readings:

- Basu, C. (2017). Business Organisation and Management. McGraw Hill Education.
- Drucker, P. F. (1954). The Practice of Management. Newyork: Harper & Row.
- Kaul, V. K. (2012). Business Organisation Management. Pearson Education .
- Koontz, H., & Weihrich, H. (2012). Essentials of Management: An International and Leadership Perspective. Paperback.

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks

The Internal Assessment for the course may include Class participation, Assignments, Class test Projects, Field Work, Presentations, amongst others as decided by the faculty.

Keywords: Business organization, Decision Making, Management, Sociocracy.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 3: Business Economics

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Business Economics | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objective

The objective of this course is to acquaint the students with the concepts and techniques used in the field of economics and to enable them to apply this knowledge in business decision-making.

Learning Outcomes

After completion of the course, learners will be able to:

1. Explain different theories of managerial economics.
2. Evaluate the effectiveness of various models and theories of managerial economics in demand, supply, production and costs related decision making procedures.
3. Understand the choices made by a rational consumer.
4. Explain relationships between production and costs.
5. Define key characteristics and consequences of different forms of markets.

SYLLABUS OF DSC-3

Unit I (12 hours)

Scope and Importance of Business Economics - basic tools- Opportunity Cost principle Incremental and Marginal Concepts. Basic economic relations – functional relations: equations- Total, Average and Marginal relations- use of Marginal analysis in decision making, The basics of market demand, market supply and equilibrium price- shifts in the demand and supply curves and equilibrium.

Unit II (16 hours)

Demand Analysis: Demand Function - nature of demand curve under different markets Meaning, significance, types and measurement of elasticity of demand (Price, income cross and promotional) - relationship between elasticity of demand and revenue concepts. Demand estimation and forecasting: Meaning and significance - methods of demand estimation: survey and statistical methods (numerical illustrations on trend analysis and simple linear regression).

Unit III (16 hours)

Supply and Production Decisions and Cost of Production: Production function: short run analysis with Law of Variable Proportions- Production function with two variable inputs- 22 isoquants, ridge lines and least cost combination of inputs- Long run production function and Laws of

Returns to Scale - expansion path -Economies and diseconomies of Scale. Cost concepts: Accounting cost and economic cost, implicit and explicit cost, fixed and variable cost - total, average and marginal cost - Cost Output Relationship in the Short Run and Long Run LAC and Learning curve - Break even analysis (with business applications).

Unit IV

(16 hours)

Pricing & Market Theory of pricing- cost plus pricing, target pricing, marginal cost pricing, going rate pricing; Objective of business firm, Concept of Market, classification of market- perfect competition, monopoly, monopolistic competition and oligopoly. Price determination and equilibrium of firm in different market situations; Factor pricing. Macro Aspect of Business Economics National Income and it's measurement, Gross National Product, Net National Product, Net National Income. Business Cycle phases and causes; Inflation and Deflation causes and remedial action; Consumption, Income, Savings and investment.

Suggested Readings:

- Ahuja, H. L. (2019). Theory of Micro Economics. New Delhi: Sultan Chand Publishing House.
- Koutsoyannis, A. (1975). Modern Microeconomics. London: Palgrave Macmillan.
- Chaturvedi, D. D., & Gupta, S. L. (2010). Business Economics Theory & Applications. New Delhi: International Book House Pvt. Ltd.
- Adhikari, M. (2000). Business Economics. New Delhi: Excel Books.
- Kennedy, M. J. (2010). Micro Economics. Mumbai: Himalaya Publishing House.
- Seth, M. L. (2017). Micro Economics. Agra: Lakshmi Narain Agarwal Educational Publishers.

Assessment

Total Marks: 100

Internal Assessment: 25 Marks

End Semester University Exam: 75 Marks

The Internal Assessment for the course may include Class participation, Assignments, Class test Projects, Field Work, Presentations, amongst others as decided by the faculty.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

13. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 18-1-5 dated 18.08.2022 regarding Syllabi of 1st Semester of Departments under Faculty of Interdisciplinary & Applied Sciences

Sub: Amendment to Ordinance V

[E.C Resolution No. 18-1-5 dated 18.08.2022]

Following addition be made to Appendix-II-A to the Ordinance V (2-A) of the Ordinances of the University;

Add the following:

Syllabi of Semester-I of the following departments under Faculty of Interdisciplinary & Applied Sciences based on Under Graduate Curriculum Framework -2022 to be implemented from the Academic Year 2022-23.

DEPARTMENT OF BIOCHEMISTRY

BSc (H) Biochemistry

Category-I

DISCIPLINE SPECIFIC CORE COURSE -1 (DSC-1) – : Biomolecules

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |

|--|--|--|--|--|---|--|
| | | | | | Physics OR Combination II: Chemistry + Biology/ Biological Studies/ Biotechnology/ Biochemistry + Mathematics | |
|--|--|--|--|--|---|--|

Learning Objectives

This paper will provide an understanding of biomolecules, the basic building blocks of living organisms, focusing on their structural underpinnings, unique properties of molecules, biological roles and functions for students. Emphasis will be on the association between structure and function of various biomolecules at a chemical level with a biological perspective and hands-on approach and laboratory techniques.

Learning outcomes

On successful completion of the course students will be:

- Able to comprehend the structure, function and acid-base properties of amino acids.
- Introduced to the structure, properties and roles of carbohydrates, lipids and nucleic acids.
- Aware of the importance of vitamins in biological systems.
- Able to independently identify various biomolecules in the laboratory by qualitative test methods.
- Acquainted with chemical and molecular foundations of life and appreciate the role of buffer in biological systems.

SYLLABUS OF DSC - 1

THEORY

Unit – 1

(07 Hours)

Amino acids: Amino acids as bifunctional molecules and their biological significance; Classification of amino acids (Standard, Semi-standard, Non-standard; Proteinogenic, Non-proteinogenic; Essential, Non-essential; Polar, Non-polar). Physical properties (variations in structures, sizes, polarity, charges; resonance hybrid), optical properties (stereoisomerism; chirality; R- and S-; D- and L-; light absorption); and chemical properties (protonation/deprotonation; zwitterions; acid base properties, titration curve, pH and pKa, pI; reactivity of side chains) of amino acids, Amino acids as constituents of proteins, peptide bond. Uncommon amino acids and their functions.

Unit – 2

(08 Hours)

Carbohydrates: Introduction, classification and importance of carbohydrates. Monosaccharides - the structure of aldoses and ketoses; Optical properties of sugars: conformations of sugars, mutarotation, anomers, epimers and enantiomers; Chemical properties (Oxidation and reduction of sugars); reducing and non-reducing sugars; Glycosidic linkages (O- and N-type), formation of disaccharides (sucrose, maltose, lactose, trehalose), tri- and oligosaccharides (raffinose, rhamnose, and stachyose) Polysaccharides: homo- and heteropolysaccharides, structural (cellulose and chitin) and storage polysaccharides (starch and glycogen); Role of glycoconjugates with examples - proteoglycans, glycoproteins and glycolipids; Carbohydrates as recognition molecules.

Unit –3

(07 Hours)

Lipids: Introduction, importance, and classification of lipids (simple, complex and derived lipid); Structure, properties, and classification of fatty acids (based on chain length and degree of unsaturation); Storage lipids- triacylglycerol and waxes. Structural lipids in membranes- glycerolipids, glycerophospholipids, galactolipids, ether-lipids, sphingolipids, and sterols; Importance of eicosanoids. Role of lipids as storage, signals, hormones, pigments, and in membranes.

Unit – 4

(05 Hours)

Nucleic Acids: Structure and properties of bases (purines and pyrimidines). Formation of nucleosides and nucleotides (phosphodiester and glycosidic bond); Nucleic acid structure: Watson-Crick model of DNA double helix, comparison of different forms of DNA (A, B and Z DNA); Structure and functions of major species of RNA (mRNA, tRNA and rRNA). Nucleic acid chemistry - UV absorption, the effect of acid and alkali on DNA; Biologically important nucleotides (source of energy, a component of coenzymes and second messengers)

Unit – 5

(03 Hours)

Vitamins: Active forms and major functions of water-soluble and fat-soluble vitamins; Major dietary sources, deficiency diseases, symptoms, and hypervitaminosis.

PRACTICAL

(60 Hours)

- 1) Laboratory safety and standards (precision, accuracy and sensitivity). Preparation of solutions (w/w, w/v, Molar, Normal)
- 2) Concept of buffer, buffering capacity and Henderson-Hasselbalch equation. Preparation of acetate buffer/phosphate buffer
- 3) Titration graph of acetic acid and Glycine.

- 4) Qualitative analysis of Amino acids (Ninhydrin, Xanthoproteic, Millon's, and lead acetate test)
- 5) Qualitative test for Carbohydrates: monosaccharides, disaccharides, and polysaccharides (Molisch, Fehling/ Benedict, Barfoed, Seliwanoff's, Osazone and Iodine test)
- 6) To determine the Iodine Number of oil/fat.
- 7) Qualitative test for Nucleic acid (Orcinol and DPA).

DISCIPLINE SPECIFIC CORE COURSE – 2 (DSC-2): Proteins

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Proteins | 4 | 2 | 0 | 2 | Class XII Science (Combination I: Chemistry + Biology/ Biological Studies/ Biotechnology/ | NIL |
| DSC 2 | | | | | | |

Biochemistry +
Physics OR

Combination II:
Chemistry +
Biology/ Biological
Studies/
Biotechnology/
Biochemistry +
Mathematics)

Learning Objectives

The course aims to introduce “proteins” and their importance to modern biochemistry, highlighting their structural features and unique characteristics that help them participate in every physiological process in life, thus also playing an important role in disease manifestation and their interventions.

Learning Outcomes

After completion of the course, a student will

- Understand the diverse functions of proteins in a cell
- Understand the hierarchy of protein architecture – primary, secondary, tertiary & quaternary structure, with the ability to distinguish features of globular & fibrous proteins
- Be able to comprehend the fundamental mechanisms of protein folding and stability and their relation to conformational diseases
- Understand specialized proteins like structural proteins
- Gain comprehension of structure-function relationship of proteins and their significance in physiology, diseases and applications in industry and medicine.

SYLLABUS OF DSC - 2

THEORY

Unit – 1

(2 Hours)

Introduction to proteins: Introduction to peptides and proteins. Structural and functional diversity. Classification of proteins – simple and conjugated proteins; monomeric and multimeric proteins.

Unit – 2

(12 Hours)

Hierarchy of protein structure organization: Organization of protein structure into primary, secondary, tertiary and quaternary structures. Forces stabilizing the protein structure - covalent

(disulfide bridges) and non-covalent (electrostatic interactions and salt bridges, hydrophobic, hydrogen bonding, van der Waals). The peptide bond, dihedral angles psi and phi, helices, sheets, turns and loops, Ramachandran map. Motifs and domains. Structural proteins - α -keratin, silk fibroin, collagen. Globular and fibrous proteins, membrane proteins.

Unit – 3

(05 Hours)

Protein sequencing and Databases: Sequencing techniques - N-terminal and C-terminal amino acid analysis, Edman degradation. Generation of overlap peptides using different enzymes and chemical reagents. Disulfide bonds and their location. Solid phase peptide synthesis. Protein databases – sequence and structure based.

Unit – 4

(05 Hours)

Protein folding and conformational diseases: Denaturation and renaturation of Ribonuclease A – discovery of protein folding. Introduction to thermodynamics of protein folding. Assisted folding by molecular chaperones, chaperonins and PDI. Diseases associated with protein misfolding – Alzheimer's and Creutzfeldt-Jakob disease.

Unit – 4

(6 Hours)

Specialized proteins: Transport protein: myoglobin and haemoglobin - Oxygen binding curves, influence of 2,3-BPG, CO₂ and H⁺; Cooperativity between subunits and models to explain the phenomena - concerted and sequential models. Haemoglobin disorders – Sickle cell anemia.

PRACTICAL

(60 Hours)

- 1) Scanning of proteins using UV-visible absorbance method
- 2) Solvent perturbation and denaturation studies of a protein
- 3) Estimation of proteins using Biuret method.
- 4) Estimation of proteins using Lowry/Bradford method.
- 5) Determination of isoelectric point of protein
- 6) Understanding protein sequence databases and homology modeling of proteins
- 7) Molecular Visualization Softwares: Pymol and Rasmol for protein structures from PDB

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE- 3 (DSC-3): Biochemical Techniques

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Biochemical Techniques DSC 3 | 4 | 2 | 0 | 2 | Class XII Science (Combination I: Chemistry + Biology/ Biological Studies/ Biotechnology/ Biochemistry + Physics OR Combination II: Chemistry + Biology/ Biological Studies/ Biotechnology/ Biochemistry + Mathematics) | NIL |

Learning Objectives

The objective of the course is to introduce various techniques to students that are used in a biochemistry lab. It will provide them an understanding of the principles underlying various

techniques. They will develop skills in the form of practical exercises and gain knowledge, which can be applied to pursue research and will be helpful in getting a suitable placement.

Learning Outcomes

On successful completion of this course, the students will

- Acquire knowledge about the principles and applications of spectrophotometric and chromatographic techniques used in a biochemistry lab.
- Learn about the principle and applications of electrophoresis and centrifugation techniques.
- Will be able to identify biochemical techniques for separation and purification of biomolecules.
- Students will obtain hands-on experience to develop their experimental skills expected from any biochemistry student working in a research lab.

SYLLABUS OF DSC – 3

THEORY

Unit – 1

(07 Hours)

Spectroscopic Technique: Introduction to electromagnetic radiation. Principle of UV-visible absorption spectrophotometry. Working, instrumentation and applications of spectrophotometer, Lambert's law, Beer's law. Factors affecting UV-vis absorption, bathochromic shift and hypsochromic shift. Fluorescence spectrophotometry: Phenomena of fluorescence, stoke's shift, quantum yield, intrinsic and extrinsic fluors with example, working and applications of fluorimeter.

Unit – 2

(06 Hours)

Centrifugation: Principle of centrifugation, basics of sedimentation, svedberg unit, correlation of 'rpm' with 'g' value, factors affecting sedimentation (density, viscosity, size and shape). Types of rotors (fixed angle, vertical and swinging bucket rotors) and relevant applications. Differential centrifugation and density gradient centrifugation - zonal and isopycnic.

Unit – 3

(09 Hours)

Chromatography: Introduction to chromatography, Principle and applications of partition chromatography: Paper and thin layer chromatography. Concept of mobile phase, stationary phase, partition coefficient, retention factor, factors affecting separation. Types of partition chromatography: Ascending and descending chromatography. Methods of detecting separated samples.

Principle and applications of ion exchange, molecular sieve and affinity chromatography. Concept of distribution coefficient, types of matrix, mesh size, water regain value, packing of the column, void volume, elution volume, theoretical plates, exclusion limit and resolution. Factors affecting binding, elution and resolution. Methods of detecting eluted samples.

Unit – 4

(08 Hours)

Electrophoresis: Principle of electrophoresis. Factors affecting the mobility of molecules: Buffer, electrical field strength and charge. Types of electrophoresis: Polyacrylamide gel (native), SDS PAGE, isoelectric focusing and agarose gel electrophoresis. Continuous and discontinuous buffer systems in electrophoresis. Staining, detection, identification and molecular weight determination of molecules.

PRACTICAL

(60 Hours)

- 1) Determination of absorption maxima (λ_{max}).
- 2) Verification of Beer's Law and calculation of molar extinction coefficient.
- 3) Preparation of cell free extract from a biological sample.
- 4) Separation and identification of amino acid acids by thin layer chromatography.
- 5) Separation of molecules by Ion-exchange chromatography.
- 6) Separation of molecules by gel filtration chromatography.
- 7) To perform PAGE (native) / SDS-PAGE.

**GENERIC ELECTIVE
(GE-1: MOLECULES OF LIFE)**

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Molecules of Life GE 1 | 4 | 2 | 0 | 2 | Class XII Science | NIL |

Learning Objectives

The objective of the course is to provide students with an understanding of biomolecules, the basic building blocks that are vital for various life forms. The course emphasizes on studying the importance of water as a biological solvent, different types of molecules of life, focusing on their key properties, biological roles and functions. The course also aims to outline chemical and physical aspects of biomolecules by hands on approach through laboratory experiments.

Learning outcomes

- The course will provide an understanding of how the structures of biomolecules determine their chemical properties and functions.
- Students will develop understanding of biochemistry at atomic level and appreciate the biological importance of molecules of life.
- Students will gain insight into basic structures, classification, and biological importance of amino acids, carbohydrates, lipids and nucleic acid.

SYLLABUS OF GE - 1

THEORY

Unit – 1

(2 Hours)

Water and Concept of Buffer: Chemistry of water and biological importance of water, Henderson-Hasselbalch equation, concept of buffer and buffering capacity.

Unit – 2

(6 Hours)

Structure and functions of Amino Acids: Introduction and classification of amino acids, peptide bond, zwitterions, L and D form of amino acids, standard and non-standard amino acids and their biological importance.

Unit – 3 (7 Hours)

Biochemistry of Carbohydrates: Introduction, and classification of carbohydrates. Monosaccharides, disaccharides, polysaccharides (glycogen, starch, cellulose and chitin). D-and L- isomerism, epimers, and anomers. Carbohydrates as fuel and structural molecules, antigens and cell recognition unit.

Unit – 4 (7 Hours)

Lipids in Biological system: Introduction and classification of lipids. Fatty acids (PUFA, MUFA) triacylglycerol, phospholipids, sphingolipids, glycolipids, and cholesterol. Role of lipids as storage fuel, hormones, vitamins, in signaling and in membranes.

Unit – 5 (8 Hours)

Structure and Organization of Nucleic acids: Introduction, purine and pyrimidine bases, nucleosides, nucleotides, and nucleic acid. Structure and functions of DNA (B form), organization of DNA into chromatin; RNA structure and functions. Biologically important nucleotides (cAMP and ATP).

PRACTICAL (60 Hours)

- 1) Laboratory safety and preparation of solutions (molar, normal and %).
- 2) Concept of pH and working of pH meter
- 3) Preparation of acetate buffer and phosphate buffer.
- 4) Properties and analysis of amino acids (Ninhydrin, and Xanthoproteic)
- 5) Test for carbohydrates (Molisch, Fehling/ Benedict, Seliwanoff's)
- 6) Qualitative analysis of nucleic acids (Orcinol and Diphenyl amine)

ESSENTIAL/ RECOMMENDED READINGS

- 1) Nelson, D.L. and Cox, M.M. (2017). Lehninger: Principles of Biochemistry (7th ed.). W.H. Freeman & Company (New York), ISBN:13: 9781464126116 / ISBN:10-1464126119.
- 2) Plummer D.T. (1998). An Introduction to Practical Biochemistry (3rd ed)., Tata McGraw Hill Education Pvt. Ltd. (New Delhi), ISBN:13: 978-0-07-099487-4 / ISBN:10: 0-07-099487-0.
- 3) Pratt, C.W. and Cornely, K. (2017). Essential Biochemistry (4th ed.) John Wiley & Sons, Inc. ISBN:9781119012375

SUGGESTIVE READING:

- 1) Berg, J.M., Tymoczko J.L. and Stryer L. (2011). 7th Edition. Biochemistry. New York, USA: W. H. Freeman and Co. ISBN-13: 978142927635.
- 2) Campbell, M.K. and Farrel, S.O. (2017). 9th Edition. Biochemistry. Boston, USA: Brooks/Cole Cengage Learning. ISBN-13: 978-1305961135.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-2): TECHNIQUES IN BIOCHEMISTRY**Credit distribution, Eligibility and Pre-requisites of the Course**

| Course title & Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|----------------------------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | Lecture | Tutorial | Practical/ Practice | | |
| Techniques in Biochemistry | 4 | 2 | 0 | 2 | Class XII Science |

GE 2

Learning Objectives

The objective of the course is to introduce different biophysical techniques to students that are used in biological research for separation, purification and identification from mixture of biomolecules. The emphasis is also on experimental skills in the form of practical exercises so that students can apply this knowledge to improve their understanding of the subject for better utilization of these techniques in research and will also help in their placement.

Learning outcomes

- Students will acquire knowledge about the principles and applications of separation and purification techniques like centrifugation and chromatography used in a biochemistry laboratory.
- Students will learn about the principles and applications of electrophoresis and spectroscopic techniques involved in estimation and identification of biomolecules.

- It will also give them an opportunity to get hands-on experience to develop their experimental skills which are required for biological research lab.

SYLLABUS OF GE – 2

Unit - 1 (8 Hours)

Separation techniques: Preparation of sample, different methods of cell lysis, salting out, dialysis. Principle and the factors affecting centrifugation Svedberg coefficient, types of rotors, principle and applications of differential and density gradient centrifugation.

Unit – 2 (8 Hours)

Purification techniques: Classification of chromatographic techniques, principle and applications: Paper, thin layer, molecular sieve, ion exchange, and affinity chromatography.

Unit - 3 (7 Hours)

Electrophoretic techniques: Principle of electrophoresis, various types of electrophoresis: Polyacrylamide gel (native), SDS PAGE and agarose gel, staining procedures for protein and nucleic acids.

Unit - 4 (7 Hours)

Spectroscopic techniques: Introduction to electromagnetic spectrum, Principle and working of UV-visible absorption spectrophotometer, single & double beam spectrophotometer, Beer's & Lambert's law, application of UV-visible spectrophotometer in biology.

Practical

(60 Hours)

- 1) Preparation of cell free extract from E.coli culture.
- 2) Separation and identification of amino acid acids by thin layer chromatography.
- 3) Separation of molecules by gel filtration chromatography.
- 4) Determination of absorption maxima (λ_{max}).
- 5) Calculate molar extinction coefficient of the given sample.
- 6) Demonstration of PAGE and Agarose gel electrophoresis.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-3): PUBLIC HEALTH BIOLOGY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-----------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Public Health Biology | 4 | 2 | 0 | 2 | Open to All | NIL |

GE 3

Learning Objectives

The present course attempts to provide an interdisciplinary understanding of public health issues in India with a more detailed understanding of the areas pertaining to biological science and epidemiology. Some overview of the social aspects that impact public health will also be discussed and the statistical analysis of public health data will be taught in the practical. The specific objectives of the course are to provide a basic understanding of the scope of public health issues, particularly related to policies on public health, public health nutrition, infectious biology and sanitation, social and preventive medicine, and the environmental issues that affect public health. The practical exercises aim to provide hands-on training in epidemiology and collection of primary and secondary data relevant to public health issues. It also hopes to

generate a discussion platform that would encourage a healthy inter- and multidisciplinary interaction amongst the students to get a holistic view of public health. A mini research project on any relevant topic related to public health will be taken up after completing the theory and practical components of the course. Being interdisciplinary in its nature and scope, the course will be equally engaging and beneficial for students of all subject streams. After completing the course, the students can also apply for some higher-level courses in different areas of public health as the course helps in building a basic understanding on different aspects related to public health.

Learning outcomes

On successful completion of the course

- Students will get a holistic overview of the interdisciplinary nature of Public Health
- They will understand public health issues in India particularly related to Malnutrition, sanitation issues and related burden of infectious disease, and the role of pollution as a public health concern.
- The students will also get an understanding of the public policies applicable and implemented in India.
- They will also be able to appreciate the social aspects that govern many public health issues and implementation of policies
- The students will get hands-on training in epidemiology, preparation of questionnaire and collection of primary and secondary data relevant to public health issues.
- They will also learn to present the relevant data after subjecting it to statistical analysis.

SYLLABUS OF GE – 3

THEORY

Unit – 1

(04 Hours)

Understanding public health issues: Conceptual understanding of public health, terminology, public health- multidimensional problem with Delhi as an example (air pollution, stress, sanitation, urbanization and socioeconomic inequalities) Policies on public health- factors affecting making and implementation of these policies.

Unit – 2

(10 Hours)

Public Health Nutrition: Characteristics of tertiary and quaternary structures. Structure function relationship in proteins. 3D structures of globular and fibrous proteins – myoglobin, hemoglobin, collagen and keratin. Protein folding - denaturation and renaturation (Ribonuclease A). Role of chaperones. Protein misfolding diseases - Alzheimer's and Cruetzfeldt-Jakob disease.

Unit – 3

(06 Hours)

Infectious biology and sanitation: Defining communicable diseases. Understanding the biology, socioeconomic factors and other environmental conditions that influence the transmission and infection by pathogenic (disease-causing) bacteria, viruses, parasites, and fungi. Precautions, prevention strategies and programs for control; sanitation, Swachh Bharat.

Unit – 4

(10 Hours)

Environmental Health & Community Health: Determinants of Environmental Health: factors that affect environmental health; Occupational environment and health concerns; Understanding effect of air, water and soil Pollution on health.

Understanding the definition of community health, Determinants of community health; Define and manage the health problems of the community, Plan, implement and evaluate various health programs of General Health, Reproductive health, Maternal health, Family Welfare and Disease control / eradication.

Lifestyle disease or non-communicable diseases- consequence of imbalanced nutrition, environmental and psychological stresses; Etiology and management of diseases like Obesity, Diabetes mellitus, Cardiovascular disorders, sleep disorders and psychological eating disorders. Preventive health checkups (PHC)- important parameters/biomarkers; relevance of PHC in health and disease prevention/early diagnosis

PRACTICAL

(60 Hours)

- 1) Assessment of nutritional status using anthropometric indices
- 2) Assessment of Nutritional status by a survey of clinical and non-invasive biochemical parameters.
- 3) To determine the potability of water using, pH, BOD, COD and MPN of the water sample from different sources.
- 4) Collecting secondary data on AQI from different areas and correlate with health indices in that area.
- 5) Understanding epidemiology: Collection, generation, and analysis of public health data. Application of statistical tools to analyze and present public health data.
- 6) Case study of a disease (Nutritional, infectious and lifestyle) along with the public health issues associated with that disease.
- 7) Field visits to nearby health care center to understand health checkups and collect some data on the rate of a particular disease over past few months or years.
- 8) Data collection from public domain with analysis.

ESSENTIAL/ RECOMMENDED READINGS

- 1) Aschengrau A, Seage G.R., (2013) Essentials of Epidemiology in Public Health Jones and Bartlett Publishers, Inc; 3rd edition
- 2) Bamji MS, Rao NP, Reddy V. (2017). Textbook of Human Nutrition. (4th ed). Delhi: Oxford and IBH Publishing Co. (P) Ltd.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DEPARTMENT OF MICROBIOLOGY

BSc. (H) Microbiology Category-I

DISCIPLINE SPECIFIC CORE COURSE -1 (DSC-1) – Introduction to the Microbial World

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|--|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to the Microbial World DSC 1 | 4 | 3 | 0 | 1 | Class XII pass with Biology/ Biotechnology/ Biochemistry | Nil |

Learning Objectives

The learning objectives of this course are as follows:

- Introduce students to the world of microorganisms.
- Students will be made familiar with the major milestones that led to the shaping of microbiology as a distinct discipline of science.
- Students will gain insights into the diversity of microorganisms, understand their structural features, and appreciate the role of microorganisms in our day-to-day lives as well as in the sustenance of life on earth.

Learning outcomes

After completing this course, student will be able to understand,

- The developments that led to the emergence of microbiology as a scientific discipline.
- The current systems of classification being used for microorganisms and learn about cell organization in microorganisms.
- Discourse on acellular forms of life such as viruses, viroids and prions.
- The Diversity, distribution, cell structure, reproduction and economic importance of protists.
- The diversity, distribution, structure, life cycles and economic importance of fungi.

- Extensive and impressive impact of microorganisms in our day-to-day life and become aware of the vast scope of microbiology and its allied fields.

SYLLABUS OF DSC - 1

THEORY

Unit – 1 (09 Hours)

The Evolution of Microbiology as a Discipline of Science: The discovery of microorganisms, contributions of Anton van Leeuwenhoek, spontaneous generation vs. biogenesis, the germ theory of disease, the golden era of microbiology and major developments in the different fields of Microbiology in the late 20th century. Key contributions of the following scientists: Louis Pasteur, Robert Koch, Joseph Lister, Edward Jenner, Elie Metchnikoff, Ronald Ross, Dmitri Ivanovsky, Martinus Beijerinck, Stanley Prusiner, Paul Ehrlich, Alexander Fleming, Selman Waksman, Sergei N Winogradsky and Anand Mohan Chakraborty

Unit – 2 (03 Hours)

Classification Systems: Whittaker's five kingdom classification system and Carl Woese's three domain classification system. Overview of acellular (viruses) and cellular micro-organisms (eubacteria, archaea, protista, fungi). Prokaryotic and Eukaryotic cell structure.

Unit –3 (15 Hours)

Brief introduction to viruses: Structure (genetic material, capsid symmetry, envelope), host range, cultivation, bacteriophages (lytic and lysogenic). General characteristics of viroids and prions. Algae: General characteristics including occurrence and thallus organization. Criteria for classification of algae: cell wall composition, pigments, flagellation, food reserves. Cell structure and reproduction of *Chlamydomonas* and *Chlorella*. Economic importance of algae. Protozoa: General characteristics of protozoa with a reference to cell structure, modes of locomotion, modes of nutrition, and modes of reproduction. Morphology and importance of *Entamoeba histolytica*, *Tetrahymena* and *Giardia*. Ecological importance of protozoa.

Unit – 4 (09 Hours)

Fungi: General characteristics: morphology, cell structure, nutritional requirements, cultivation, preservation and reproduction (asexual and sexual cycles). Structure, life cycle and economic importance of *Saccharomyces*, *Rhizopus*, *Aspergillus*, and *Agaricus*.

Unit – 5 (09 Hours)

The scope of microbiology: an overview. Food and dairy industry: fermented foods, single cell protein. Human health and medicine: human microbiome, probiotics, vaccines, phage therapy.

Microbes in environment: bioremediation, bioleaching, waste management, biogas, bioethanol, carbon sequestration. Microbes in agriculture: biocomposting, biofertilizers, biopesticides. Industrially important microbial products: organic acids, amino acids, antibiotics, enzymes, polysaccharides. Space microbiology: Current developments.

PRACTICAL

Unit –1

(14 Hours)

Principles of Good Laboratory Practice (GLP) and Introduction to aseptic techniques:

Principles of Good Microbiological Laboratory Practices (GMLP). Concept of biosafety levels (BSLs). Work practices, safety equipment and protective measures to be used in laboratories of the different categories of biosafety levels BSL-1 to BSL-4. Microorganism risk groups: BSL-1 to BSL-4 microorganisms. Methods of disposal of microbial cultures. Sterilization by moist heat, mechanical (filtration), irradiation (UV), chemical (alcohol). Instruments for sterilization: Principle, working and applications of autoclave and hot air oven

Unit –2

(16 Hours)

Study of eukaryotic microorganisms: To study the morphological features and reproductive structures of the following using permanent slides/photographs: Fungi: *Rhizopus*, *Aspergillus*, *Penicillium*, *Saccharomyces*. Algae: *Chlamydomonas*, *Chlorella*, *Spirogyra*. Protozoa: *Amoeba*, *Paramecium*, *Entamoeba histolytica*, *Giardia*. To prepare temporary mounts of any two fungi and two algae from those mentioned above

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2 (DSC-2): BASIC**Credit distribution, Eligibility and Prerequisites of the Course**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|--|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| BASIC BACTERIOLOGY DSC 2 | 4 | 3 | 0 | 1 | Class XII pass with Biology/ Biotechnology/ Biochemistry | NIL |

Learning Objectives

The Learning objectives of this course are as follows:

- Students to acquire in-depth knowledge of bacterial cell structure and organization, cultivation methods and growth patterns, and reproduction.
- Student gains insights into the vastness of bacterial diversity and its significance.

Learning Outcomes

After completing this course, student will be able to,

- Understand the morphological features and cellular organization of bacteria and archaea, and distinguish between cell wall and cell membrane compositions of gram positive bacteria, gram negative bacteria, and archaea. Will gain insights into the roles of enzymes and antibiotics affecting cell wall structure as well as the formation of spheroplasts, protoplasts, and L forms.
- Isolate pure bacterial cultures and enumerate bacteria using serial dilution and plating techniques. Will learn about various culture media and methods employed to maintain bacterial cultures and preserve bacteria.
- Comprehend the different phases of bacterial growth, and the consequences of binary fission as a means of reproduction. Will learn about various nutritional and physical factors affecting bacterial growth.
- Prepare various types of media; understand the use of membrane filtration to sterilize heat sensitive media components; have hands-on experience of isolating bacteria and fungi from air.
- Streak bacterial cultures on nutrient medium, prepare bacterial slants and stabs, and enumerate bacteria by different plating methods.

SYLLABUS OF DSC - 2

THEORY

Unit – 1

(15 Hours)

Structure and organization of the bacterial cell wall and appendages: Shapes, sizes and arrangements of bacterial cells. Cell wall and cell membrane organization: Structure of cell wall in Eubacteria and Archaea, difference between cell wall structure and composition of Gram positive versus Gram-negative bacterial, structure of outer membrane, difference between eubacterial and archaeal cell membranes. Bacteria lacking cell walls, action of antibiotics and enzymes on bacterial cell wall, formation of protoplasts, spheroplasts and L forms. Cell envelope layers outside the cell wall: capsule, slime layer, glycocalyx, S-layers. External appendages: flagella, fimbriae and pili.

Unit – 2

(09 Hours)

Cytoplasmic organelles: ribosomes, mesosomes, nucleoid, chromosome and plasmids, intracytoplasmic membranes, inclusions (storage inclusions: PHB, polyphosphate granules, sulfur globules, cyanophycin granules; micro-compartments: Carboxysome; other inclusions: magnetosome, gas vacuole).

Unit – 3

(09 Hours)

Bacteriological techniques: Culture media: Chemical types (synthetic and complex), Functional types (supportive and enriched, selective and differential). Cultivation of aerobes and anaerobes, concept of viable but non culturable bacteria (VBNC). Culturing and Preservation methods: Streaking of bacterial culture, spread- plating, serial dilution plating, counting viable cells. Enrichment culture technique. Preservation of bacteria and maintenance of stock cultures. Microbial culture collection centers (ATCC and MTCC).

Unit – 4

(12 Hours)

Bacterial growth and reproduction: Different phases of bacterial growth in a batch culture, determination of generation time, analysis of growth rate. Factors affecting bacterial growth: Nutritional and physical factors. Endospore: Structure, formation, stages of sporulation and germination of endospore. Methods of asexual reproduction: budding, fission and fragmentation.

PRACTICAL

Unit– 1

(14 Hours)

Introduction to bacterial growth and analysis: Principle, working and applications of instruments used in cultivation and morphological analysis of microorganisms: bacteriological and BOD incubators, light microscope (using simple staining of bacteria). Concept of laminar

flow: biological safety cabinets of levels 1 to 4. Preparation of media and capture of aeroflora: Preparation of Synthetic medium (minimal medium) and Complex media (nutrient agar, potato dextrose agar, MacConkey agar). Capture of aero-microflora on nutrient agar and potato dextrose agar plates.

Unit – 2

(16 Hours)

Isolation, preservation and quantitation of bacteria: Isolation of pure cultures of bacteria by Quadrant streaking method on nutrient agar plates. Preparation of bacterial culture slants and stabs on nutrient agar. Preservation of bacterial cultures by preparation of glycerol stocks.

DISCIPLINE SPECIFIC CORE COURSE– 3 (DSC-3)
BIOCHEMISTRY OF CARBOHYDRATES AND LIPIDS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|--|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| BIOCHEMISTRY OF CARBOHYDRATES AND LIPIDS DSC 3 | 4 | 3 | 0 | 1 | Class XII pass with Biology/ Biotechnology/ Biochemistry | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Enable the students to develop a clear understanding of the structures and properties of biomolecules: proteins, lipids, carbohydrates and nucleic acids, and lays the foundation for a basic understanding of cellular processes.
- The students will be given an understanding of the principles of thermodynamics and bioenergetics, and will be introduced to the basic concepts of enzymes and enzyme kinetics.
- This course will empower the students with essential knowledge to support learning in subsequent courses offered in the program.

Learning Outcomes

On successful completion of this course, the students will be able to

- Comprehend the principles of thermodynamics as applied to biological systems and will be able to comment on the rate constants and feasibility of biochemical reactions by calculating free energy changes.
- Understand the structures and properties of various types of carbohydrates and will be able to relate the structures of simple and complex carbohydrates to their wide range of functions. Will gain knowledge of the role of sugars and their derivatives in formation of macromolecules /supramolecular complexes.
- Understand the building block of lipids: fatty acids and their properties. Will acquire a clear understanding of the structures, properties and functions of storage and membrane lipids. Will learn different types of lipid aggregates and their applications.

- Prepare buffers and solutions of different molarity and normality and will be adept in the use of fine weighing balances and pH meter.
- Analyze foodstuff for their microchemical composition, and will be able to detect the presence of carbohydrates and fats in samples by performing qualitative tests. Will become familiar with the use of spectrophotometer.

SYLLABUS OF DSC – 3

THEORY

Unit – 1

(09 Hours)

Bioenergetics and thermodynamics: Laws of thermodynamics. Gibbs free energy: exergonic and endergonic reactions. Enthalpy: exothermic and endothermic reactions. Entropy, standard free energy change and actual free energy change, equilibrium constant and spontaneous reactions. Coupled reactions and additive nature of standard free energy change. Energy rich compounds: ATP, BPGA, Acetyl CoA.

Unit – 2

(15 Hours)

Carbohydrates: Introduction to mono-, di- and polysaccharides. Monosaccharides: aldoses and ketoses. Stereoisomers: enantiomers, epimers, diastereoisomers, mutarotation and anomers. Fischer and Haworth formulae of sugars. Sugar derivative: O-,N-glycosides. Disaccharides: Structures and properties of maltose, lactose, and sucrose reducing and non- reducing sugars. Polysaccharides: storage polysaccharides (starch and glycogen), structural polysaccharides (cellulose, chitin, peptidoglycan, pectin).

Unit – 3

(09 Hours)

Storage Lipids: Introduction to storage and structural lipids. Storage lipids: triacylglycerols, building blocks, fatty acids structure and properties, essential fatty acids, saponification.

Unit – 4

(12 Hours)

Structural Lipids: Membrane lipids: phosphoglycerides (building blocks, structure of phosphatidylethanolamine and phosphatidylcholine). Sphingolipids: building blocks, structure of sphingosine, ceramide, general structure and functions of sphingomyelin, cerebroside and ganglioside. Lipid functions. Lipid aggregates: micelles, monolayers, bilayers and liposomes

PRACTICAL

Unit– 1

(14 Hours)

Preparation of buffers and solutions: Concepts of molarity versus normality. Preparation of simple stock solutions of different molarities: sodium chloride, potassium permanganate, magnesium chloride solutions. Concept of pH. Role of buffers in biochemical reactions. Buffers

of different pH ranges. Commonly used buffers in biochemical assays. Principle, calibration and use of pH meter. Preparation of two commonly used buffers: phosphate buffer, citrate buffer. Preparation of complex buffered stock solutions. Preparation of working solutions.

Unit– 2

(16 Hours)

Qualitative biochemical analyses: The use of pipettes and micropipettes. Cleaning and calibration of micropipettes. Principles and performance of qualitative tests for the detection of reducing and non-reducing sugars: Benedict's Test, Fehling's Test, Molisch Test; and starch: Iodine Test. Detection of lipids using Solubility Test, Osmic acid Test, Acrolein Test, Sudan III Test.

| Introduction and scope of microbiology GE 1 | 4 | 2 | 0 | 2 | None | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- Give students an overview of three major themes: History and scope of Microbiology, microbial diversity (prokaryotes, eukaryotes, and viruses), and the role of microbes in human lives.
- Students will gain insights into how microorganisms affect the everyday lives of humans in both beneficial and harmful ways.
- Students will become familiar with the techniques used in isolation and cultivation of microorganisms, and will learn how to identify microorganisms in the laboratory.

Learning outcomes

Upon completion of this course, students will

- Become familiar with the history of Microbiology, and understand how Microbiology developed as a distinct discipline of science during the golden era of microbiology. Will become familiar with some of the later developments of the 21st century.
- Acquire an understanding about the placement of microorganisms in the tree of life. Will

- know about key differences between prokaryotic and eukaryotic organisms. Will also be acquainted with structure of viruses, general characteristics and importance of algae, fungi and protozoa.
- Understand the importance of microbe-human interactions, becoming aware of microorganisms as agents of human diseases. Will become aware of the important role that microorganisms play in food, agriculture, industry, biofuel and in the clean-up of the environment.
 - Become aware of good microbiological laboratory and safety practices, and be acquainted with the working of basic microbiological equipment routinely used in the laboratory. Will also be acquainted with the aseptic techniques used for culturing bacteria and fungi.
 - Gain hands-on experience in isolation of bacteria and fungi from air and will be acquainted with staining techniques used for observing bacteria, algae and fungi. Will learn the use of compound microscope.
 - Get acquainted with different shapes and arrangement of bacteria. Will be able to identify algae, fungi, protozoa using permanent slides/photographs. Will be able to understand the structure of viruses using electron micrographs.

SYLLABUS OF GE - 1

THEORY

Unit – 1 (08 Hours)

History of Microbiology: Some key milestones in the field of microbiology: Contributions of Antonie van Leeuwenhoek. Controversy over spontaneous generation. Louis Pasteur and concept of pasteurization. Robert Koch and germ theory of diseases, and concept of pure culture. Edward Jenner and cowpox immunization. Ivanovsky & Beijerinck and the discovery of viruses. Winogradsky and the development of soil microbiology. Golden era of Microbiology.

Unit – 2 (12 Hours)

Microbial Diversity: Position of microorganisms in the living world. Whittaker's five kingdom classification. Carl Woese's three domain classification. Detailed characteristics of prokaryotic and eukaryotic organisms with examples of *E. coli* (bacterium) and *Saccharomyces* (yeast). Acellular organisms: structure and genome of Tobacco mosaic virus, polio virus and bacteriophage T4. General characteristics, habitat and economic importance of algae, fungi and protozoa.

Unit – 3 (10 Hours)

The impact of microorganisms on humans: Causal organism and transmission of common human diseases: typhoid, tuberculosis, cholera, malaria, gastroenteritis, influenza. Microorganisms and their applications in agriculture: nitrogen fixers and mycorrhiza. Role of

microorganisms in the environment: microbial remediation of pollutants. Applications of microorganisms in food and industry: fermented foods and probiotics, biofuel (biogas), antibiotics and enzymes.

PRACTICAL

Unit – 1

(24 Hours)

History of Microbiology: Microbiological laboratory practices, and equipment: Good Microbiology laboratory practices and general safety measures while working with microbes. Physical and chemical hazards and immediate first aid. Principle, working and applications of instruments: autoclave, hot air oven, biosafety hood, incubator and light and compound microscope. Demonstration and performance of aseptic technique for culturing of bacteria and fungi.

Unit – 2

(16 Hours)

Microbial Diversity: Study of aero microflora by exposing nutrient agar plate at different locations and comparing diversity on the basis of colony morphology. Demonstration of bacterial smear preparation from suitable sample/culture followed by Gram staining and observation under oil immersion objective. Preparation of stained temporary mounts of any one fungus (*Rhizopus/ Penicillium*) and any one alga (*Chlamydomonas/ Spirogyra*).

Unit– 3

(20 Hours)

The impact of microorganisms on humans: Study of shape and arrangement of following bacteria / bacterial structures using permanent slides: bacillus, coccus, spirillum and endospore. Study of vegetative and reproductive structures of following algae using permanent slides: *Chlamydomonas*, *Spirogyra* and *Polysiphonia/Fucus*. Study of vegetative and reproductive structures of following fungi and protozoa using permanent slides: Fungi: *Rhizopus*, *Penicillium* and *Agaricus*. Protozoa: *Amoeba*, *Paramecium*, and *Giardia*. Study of structure of the following viruses using electron micrographs: Tobacco mosaic virus, T4 bacteriophage and poliovirus.

GENERIC ELECTIVES (GE-2): MICROBES IN HEALTH AND HYGIENE

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|--|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Microbes in health and hygiene GE 2 | 4 | 2 | 0 | 2 | Class XII pass with Biology/ Biotechnology/ Biochemistry | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Introduce the students to the role of microorganisms in human health.
- Students will be exposed to the importance of microbe-human interactions when learning about the human microbiome. T
- Make the students aware of common diseases caused by microorganisms and will develop an understanding of probiotics and their importance in human health.
- Introduce bacteriophages and their application in treatment/control of bacterial infections.

Learning outcomes

At the end of this course, the students will

- Be acquainted with the importance of the human microbiome including the benefits as well as possible harmful effects. They will have a fair knowledge of various types of microorganisms surviving on/in the human body.
- Have gained knowledge about the spectrum of diseases caused by bacteria, viruses, protozoa and fungi. They will be familiar with the methods of transmission and control of various diseases.
- Have understood the role of probiotics in human health. They will have learnt about the characteristics of probiotic microorganisms and have a fair idea of prebiotics and synbiotics. They will also have an overview of bacteriophages and their role in therapy.
- Acquire expertise in isolation of microorganisms from skin and staining of microorganisms collected from oral cavity, and will be able to check the efficacy of the sanitizer and antimicrobial action of heavy metals.
- Will acquire understanding of various probiotic products available in the market and the organisms included in these products. They will receive hands-on training for evaluation of various probiotic products and microbial strains.
- Gained understanding of bacteriophage typing and will also have hands on training in the isolation of bacteriophages from sewage samples.

SYLLABUS OF GE – 2

Unit - 1

(08 Hours)

Role of microbiome in human health: Importance of human microbiome in health. Factors affecting the survival and colonization of microorganisms on various organs including skin, throat and upper respiratory tract, gastrointestinal tract and genitourinary tract. Understanding the human microbiome using animal model systems: *C. elegans*, mice, zebrafish. Strengths and weaknesses of using these systems for human microbiome studies. Technologies for assaying the human microbiome: direct observation methods, molecular profiling techniques, sequencing methods, strengths and weaknesses of the technologies

Unit – 2

(12 Hours)

Microorganisms in human diseases: A concise overview of aetiology, symptoms, transmission and control of some common diseases: bacterial (tuberculosis, cholera, typhoid, diphtheria), viral (rabies, hepatitis, zika, COVID , polio, AIDS), protozoan (malaria, kala azar) and fungal diseases (dermatophytoses, candidiasis, aspergillosis).

Unit - 3

(10 Hours)

Microbes for maintaining human health: Brief description and distinction between prebiotics, probiotics and synbiotics. Probiotics for maintaining human health: prerequisite characteristics of probiotic strains, common probiotic bacterial strains, modes of action of probiotics, probiotic

supplementation for disease management. Bacteriophage therapy: concept and challenges. A brief account of bacteriophage therapy for various diseases.

Practical

Unit - 1

(24 Hours)

Study of human microflora: Isolation of microorganisms from skin by swab method using specific media: nutrient agar, mannitol salt agar, potato dextrose agar. Gram staining of bacterial isolates and lactophenol staining for fungal isolates. Gram staining of dental scrapings/plaques. Checking the efficacy of sanitizer on skin. study of the oligodynamic effect of metals on bacterial cultures. **Student group project:** multiple methods for sampling microbial biomass specimens for oral, skin, gut and respiratory microbiomes.

Unit - 2

(24 Hours)

Study of probiotics: Student group project: Conduction of a market survey to identify different probiotic products available in the market. Isolation and basic characterization of bacteria from probiotic products. Bacterial cell surface hydrophobicity (CSH) test to estimate bacterial adherence. Performance of acid and bile resistance test on bacterial strains.

Unit - 3

(12 Hours)

Bacteriophage isolation and typing: Principle, process and limitations of bacteriophage typing. Isolation of bacteriophages from sewage sample using double layer technique. Student group project: Phage therapy in India.

ESSENTIAL/RECOMMENDED READINGS

**GENERIC ELECTIVES (GE-3):
FOOD FERMENTATION AND PRESERVATION TECHNIQUES**

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|--|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Food fermentation and preservation techniques GE3 | 4 | 2 | 0 | 2 | Class XII pass with Biology/ Biotechnology/ Biochemistry | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- Develop clear understanding about the microorganisms important in food and various factors affecting their growth.
- The students will gain in depth knowledge about food fermentation, their benefits and the processes involved in production of fermented foods.
- The concept of probiotic, prebiotic and synbiotics will also be discussed. The course also deals with the principle and the techniques involved in processing and preservation of food substances.
- The students will also be trained and be given hands on training in various microbiological techniques involved in food fermentation and food preservation. The course on completion can open many career options.

Learning outcomes

After the completion of this course, the students will have understanding and knowledge of the following

- Microbes important in food, their morphological, cultural, and physiological characteristics, and factors influencing their growth
- Fermented foods and their health benefits. Also, will be acquainted with the microbes and their processes involved in production of fermented foods.
- Causes of food spoilage and be aware of different preservation techniques used to increase the shelf life of food products.
- Acquired hands on experience in isolating and characterizing microbes from food.
- Become familiar with the principle of food fermentation by production of fermented foods in the laboratory.
- Various microbiological and biochemical testing techniques used for assessing the efficacy of various food preservation techniques.

SYLLABUS OF GE - 3

Unit - 1

(06 Hours)

Microorganisms in Food Microbiology: Introduction to microorganisms important in foods: morphological, cultural and physiological characteristics of moulds (*Aspergillus*, *Rhizopus*), yeast (*Saccharomyces*), and bacteria (*Lactobacillus*, *Acetobacter*), Factors affecting microbial growth in foods- intrinsic (pH, water activity, mechanical barriers and redox potential) and extrinsic (temperature, gaseous atmosphere).

Unit – 2

(12 Hours)

Food Fermentation: History, definition and benefits of fermented foods. Types of food fermentations (acid-, yeast-, solid state-, oriental and indigenous fermented foods). Production and maintenance of microbial cultures involved in food fermentation, starter culture and its problems. Production of dairy (dahi, yoghurt, kefir, cheese) and non-dairy fermented foods (dosa, kanji, sauerkraut, tempeh, soy sauce), beverages (beer, wine) and concept of pre-, pro- and syn- biotics.

Unit – 3

(12 Hours)

Principles of food preservation: Definition and causes of food spoilage. Classification of food by ease of spoilage. General principles of food preservation. Preservation by low temperature: freezing & refrigeration. Preservation by high temperature: pasteurisation and canning. Preservation by moisture control: drying and dehydration. Preservation by radiation: Gamma, microwaves and UV rays. Preservation by added food preservatives: salt, sugar, benzoate, nitrite and nitrate, wood smoke, nisin. Preservation by developed preservatives, modified atmosphere packaging.

PRACTICAL

Unit – 1

(12 Hours)

Isolation and characterisation of microbes important in food: Isolation and microscopic examination of fungi from a spoiled bread. Isolation of lactic acid bacteria from curd using MRS medium and microscopic characterisation by Gram's staining. Effect of different temperatures/salt concentration on microbial growth.

Unit – 2

(24 Hours)

Food fermentation: Preparation of kefir using kefir grains/ fermented cabbage (sauerkraut). Viability test for yeast using methylene blue. Survey on the availability and usage of various probiotic foods from market

Unit – 3

(24 Hours)

Food Preservation: Effect of blanching on food preservation. Incubation test for cans/ tetrapack to determine sterility. Alkaline phosphatase test to check efficiency of pasteurization of milk: principle, performance of the test with various pasteurized milk samples, evaluation of milk quality based on results obtained. Assessment of efficiency of sterilisation of milk: principle and performance of Turbidity Test and evaluation of milk quality based on obtained results

ESSENTIAL/ RECOMMENDED READINGS

- 6) FSSAI Manual of methods of analysis of foods. Food safety and standards Authority of India, Ministry of Health and Family Welfare, Government of India, 2015.
- 7) Advances in Fermented Foods and Beverages by W. Holzapfel. 1st edition. Woodhead Publishing, USA. 2014.
- 8) Handbook of food and beverage fermentation technology by Y. Hui, L. Meunier- Goddik, J. Josephsen, W. Nip and P. Stanfield. 1st edition. CRC Press, UK. 2004.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-4): MICROBIAL QUALITY CONTROL AND TESTING

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|---------------------|--|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Microbial quality control and testing GE 4 | 4 | 2 | 0 | 2 | Class XII pass with Biology/ Biotechnology/ Biochemistry | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- Underscore the importance of microbiological quality control in various sectors.
- Students will gain in-depth knowledge about criteria and procedures for safety in quality assurance in water, food and pharmaceutical sector. They will become proficient in various microbiological techniques used for quality testing of samples will be discussed.
- Students will gain hands-on training in basic microbiological techniques used for quality testing.

Learning outcomes

After completing this course, students will

- Gain an understanding of microbiological quality through Good Microbiological laboratory Practices (GMLP), biosafety levels, quality control of microbiological culture media, sterilization and antimicrobial susceptibility test.
- Have learnt methods to assess potability of drinking water, and become aware of Hazard analysis critical control point (HACCP) for food safety, as well as microbial limits in food and pharmaceutical products. Will be familiar with various microbiological standards and certifications by accredited certification bodies.
- Gained insights into various microbiological, biochemical, molecular and immunological testing techniques used for assessing quality of drinking water and food products.
- Will acquire ability to analyze the potability of water by performing various microbiological tests.

- Be capable of performing various biochemical and microbiological tests used to evaluate the quality of milk, packaged foods, pharmaceutical formulation and will gain knowledge about using phenol coefficient test for assessing quality of disinfectants.
- Will acquire understanding of designing HACCP plan for any food product manufacture like milk processing and packaging.

SYLLABUS OF GE - 4

Unit -1

(06 Hours)

Safety practices and quality control in microbiology: Principles of Good microbiological laboratory practices (GMLP), Concept of biosafety levels (BSLs), Safety equipment and protective measures used in different categories of biosafety levels laboratories. Examples of microorganisms that are classified as BSL-1 to BSL-4. Quality control of microbiological culture media, sterilization, antimicrobial susceptibility test.

Unit -2

(10 Hours)

Quality control and assurance in water, food and pharmaceutical sector: Water potability: criteria and procedures for quality assurance of drinking water, recommended quality control strains for water testing, recommendations of Environmental Protection Agency (EPA) for drinking water quality. Food safety and microbiology: overview of health hazards related to food, Hazard analysis of critical control point (HACCP) for food safety. Role of Codex Alimentarius Commission (CAC) in safety of food and agriculture products. BIS standards, FSSAI standards, ISO certification. Sterility testing of food and pharmaceutical products: importance and objectives, microbial limits.

Unit -3

(14 Hours)

Microbial quality control tests: Collection and processing samples for testing. Detection of microorganisms and sample testing by culture and microscopic methods: direct microscopic counts (fluorescence-based), standard plate count method, selective media (Salmonella-Shigella agar, mannitol salt agar, EMB agar, McConkey agar), Bioburden testing, Most Probable Number (MPN), membrane filtration test, phenol coefficient test. Detection of microorganisms and sample testing by molecular methods: nucleic acid probes, PCR-based detection. Biosensors. Detection of microorganisms and sample testing by biochemical and immunological methods: Endotoxin testing by Limulus lysate test, pyrogen testing, rapid detection methods by Clot-on-Boiling Test (COB), Resazurin assay

PRACTICAL

Unit – 1

(12 Hours)

Water potability: Testing potability of water samples by standard procedures: Most Probable Number method (MPN) /presumptive test, confirmed test, completed test for faecal contamination: principles of the methods, performance of the tests with various water samples using differential and selective media, evaluation of the water quality based on the results obtained. Testing water potability by using standard kits

Unit – 2

(24 Hours)

Food quality control and assurance: Assessment of the microbiological quality of raw versus pasteurized milk by Methylene Blue Dye Reduction Test (MBRT), evaluation and grading of milk quality based on the results obtained. Clot on boiling (COB) test of milk samples: principle, performance of the test with milk samples, and evaluation of milk quality based on results obtained. Sterility testing of canned food, tetra pack drinks and any pharmaceutical formulation (eye drops/ injection ampules) by either using the membrane filtration test or by standard plate count method. Detection of microorganisms in food samples through any one differential and selective medium. Demonstration of phenol coefficient test to evaluate efficacy of disinfectants using standard kits.

Unit – 3

(24 Hours)

HACCP: Student research study project: Designing of HACCP plan for milk processing and packaging or any other food product: product description, flowchart of production, assessing hazards and risks associated with different steps of production till consumption, identification of critical control points (CCP) and critical limits, suggestive procedures to monitor CCPs and corrective actions, effective record keeping to document the HACCP plan, and procedures for verification

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-5): MICROBES IN ANIMAL HEALTH

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------------------------|---------|-----------------------------------|----------|---------------------|--|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Microbes in animal health GE 5 | 4 | 2 | 0 | 2 | Class XII pass with Biology/ Biotechnology/ Biochemistry | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- Introduce the students to the importance of microorganisms in animal health.
- Students will learn about the interactions of microbes with various types of livestock and pet animals. Students will be introduced to various bacterial, fungal, viral and protozoan diseases of animals.
- They will be introduced to various types of microorganisms residing in rumen, and learn about various methods for obtaining blood, rumen fluid and milk samples from animals.
- They will be introduced to principles of various diagnostic methods used in lab diagnosis of animal infections. Students will learn about the vaccination schedule followed for cattle and poultry.

Learning outcomes

After the completion of this course, the students will acquire understanding of the following:

- Various types of livestock and pet animals, rumen microflora, and their advantages and disadvantages.
- Spectrum of diseases caused by bacteria and fungi in animals, becoming familiar with the symptoms, transmission mode, treatment, prevention and control of various bacterial and fungal diseases.
- Symptoms, transmission, treatment, prevention and control of various diseases caused by viruses and protozoa.
- Various methods of sampling of blood and rumen fluid. Will have had hands-on training for the detection of mastitis by testing milk samples.
- Principles of serological tests based on agglutination, precipitation, haemagglutination inhibition, ELISA and lateral flow assays for diagnosis of animal diseases/infection.
- Vaccination schedule followed for cattle, buffalo and poultry. They will learn the concept of differentiation between the vaccinated and infected animals.

SYLLABUS OF GE - 5

Unit – 1 (08 Hours)

Introduction to livestock and rumen microflora: A brief introduction of various types of livestock and pet animals: cattle, sheep, goat, dogs, cats and poultry. Different types of microbes in rumen along with their functions: archaeobacteria (methanogens), bacteria, protozoa, fungi (cellulolytic and proteolytic).

Unit – 2 (12 Hours)

Bacterial and fungal diseases of animals: A concise overview of aetiological agent, symptoms, transmission, treatment, prevention and control of the following bacterial and fungal diseases: anthrax, brucellosis, mastitis, Johne's disease, campylobacteriosis, black quarter, haemorrhagic septicemia (HS), aspergillosis and mucormycosis.

Unit - 3 (10 Hours)

Viral and protozoan diseases of animals: An overview of aetiological agent, symptoms, transmission, treatment, prevention and control of following viral diseases: foot and mouth disease (FMD), rinderpest/PPR, blue tongue disease, avian influenza, canine distemper, rabies, babesiosis, theileriosis and trypanosomiasis.

PRACTICAL

Unit – 1 (16 Hours)

Sampling methods for obtaining blood, rumen fluid and milk: Sampling of blood from cattle, sheep, goat, dog, cat, mice and poultry by virtual lab. Sampling of rumen fluid: syringe, rumenotomy by virtual lab/video. Sampling of milk: California mastitis test

Unit – 2**(28 Hours)**

Serological tests for diagnosis of infectious agent: Principle and working method of: Agglutination, precipitation, haemagglutination inhibition assay, ELISA, and Lateral flow assay for antigen detection.

Unit – 3**(16 Hours)**

Vaccination of livestock animals: Concept of differentiation between infected and vaccinated animal (DIVA test) for FMD and brucellosis. **Student group project:** Research study and review of the vaccination schedules for cattle, buffalo and poultry.

ESSENTIAL/ RECOMMENDED READINGS

Department of Electronic Sciences

BSc. (Hons.) Electronic Sciences Category-I

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Programming Fundamentals using Python ELDCS-1 | 4 | 3 | 0 | 1 | Course Admission Eligibility | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

This course introduces the student to the fundamental understanding of the Python programming language. The main objective is to help students learn to use the Python programming language to solve problems of interest to them. It introduces the core programming basics including data types, operators, input/output, control structures, iterative and recursive constructs, compound data types, and program design with functions. The course also discusses the fundamental principles of Object-Oriented Programming (OOP), as well as comprehensive data and information processing technique.

Learning outcomes

The Learning Outcomes of this course are as follows:

- CO1 Read, write and debug python programs to solve computational problems.
- CO2 Select and use a suitable programming construct and data objects like lists, sets, tuples and dictionaries for solving a given problem.
- CO3 Be proficient in the handling of strings and functions
- CO4 Use Python libraries
- CO5 Articulate OOP concepts such as encapsulation, inheritance and polymorphism and use them in applications

SYLLABUS OF DSC-1

UNIT – I Starting with Python (12 Hours)

Introduction to Python: Python Interpreter-IDLE (script and interactive mode), Python shell, using Python as calculator, concept of data types; variables, Identifiers and keywords, Literals, Strings, Operators (Arithmetic operator, Relational operator, Logical operator, Boolean operator, Assignment operators, Membership operators(in and not in), Identity operators, Bit wise operator, Increment or Decrement operator), comments in the program, understanding error messages.

Creation of a Python Program: Input and Output Statements, Control statements -Branching (if-else, if-elif-else), indentation in python, iteration (using for, while), Conditional Statement, exit function, Difference between break, continue and pass, Nested conditionals

UNIT – II Strings and Lists (12 Hours)

Data objects in Python: Mutable and immutable

Strings- Creating and Storing Strings, Accessing Characters in String by Indexing (positive and negative), String Operations: concatenation, replication (*), membership, comparison, Slicing, string built-in functions, String method

Lists- Creating Lists, Accessing list elements, traversing a list , Aliasing a list, comparing list , list Operations:- concatenation, replication(*), membership, slicing, Indexing, nested list, list built-in functions List methods , del statement.

Sets: Creating sets, Sets built-in functions, Set Methods

UNIT – III Tuples and Dictionaries (12 Hours)

Tuples: Creating Tuples, Tuple operations: slicing, concatenation, replication, membership, comparing and deletion, tuple built-in functions

Dictionaries: Dictionary in python (key : value pairs), creating a dictionary, element accessing and traversing a dictionary, appending values, updating values, removing items from dictionary, membership, dictionary built-in functions, dictionary methods , clear statement

Object Oriented Programming: Introduction to Classes, Objects and Methods, Encapsulation, Inheritance, Polymorphism, Abstraction

UNIT – IV Functions and Modules (12 Hours)

Functions: Built in function (math, statistics), User defined functions: Defining Functions, arguments: positional, default, keyword, variable length arguments, scope of variables, parameter passing (string list, dictionary, tuples, sets), return statement, recursion, importing (using import) user defined function (path).

Modules in python: use of keyword from, namespacing, module aliasing, introduction to python packages (matplotlib, pandas, numpy, scikitlearn, nltk, openCV) and libraries and their applications

Practical component (if any) – Programming Fundamentals using Python Lab (30 Hours)

Learning outcomes

- CO1 Develop algorithms and write programs in Python language for arithmetic and logical operations, conditional branching.
- CO2 Write programs in Python language using construct and data objects like strings, lists, sets, tuples, dictionaries, Python libraries and use concept of OOP.
- CO3 Prepare the technical report on the experiments carried.

1. Write a python menu driven program to calculate area of circle, rectangle, square using if-elif-else.
2. Write a python program to print Fibonacci series up to a certain limit (use 'while').
3. Write a python program to print the Pascal triangle.
4. Write a python program to find HCF (GCD) of two numbers.
5. Write a python program to find LCM of two numbers.
6. Write Python programs to illustrate the various functions of the "Math" module, "Statistics" module in Python.
7. Write a Python program to count number of vowels using sets in given string
8. Write a Python program to Remove all duplicates from a given string in Python
9. Write a Python program to count positive and negative numbers in a list
10. Write a Python program to find sum of elements in list
11. Write a python program to read a list of 'n' integers (positive and negative) and create two new lists one having all positive numbers and the other having all negative numbers from the given list. Print all three lists.
12. Write a python program to create a list of tuples from given list having number and its cube in each tuple
13. Create a Python program to create a dictionary which has record of a student information: Admission number, Roll Number, Name and Marks. Display information on the basis of Admission number
14. Write a python program which contains user defined functions as a 'module' to calculate area, perimeter or surface area, volume for various shapes like square, cube, circle, cylinder. The user defined functions should accept the values for calculation as parameters and calculated values should be returned. Import the module and use appropriate functions.
15. Create a menu driven Python program using user defined functions to implement a calculator to perform :
 - (a) Basic arithmetic operations
 - (b) $\log_{10}(x)$, $\sin(x)$, $\cos(x)$

Note: Students shall sincerely work towards completing all the above listed practicals for this course. In any circumstance, the completed number of practicals shall not be less than twelve.

Essential/recommended readings

1. Allen B. Downey, "Think Python: How to Think Like a Computer Scientist", 2nd edition, Updated for Python 3, Shroff/O'Reilly Publishers, 2016 (<http://greenteapress.com/wp/thinkpython/>)
2. Guido van Rossum and Fred L. Drake Jr, —An Introduction to Python – Revised and updated for Python 3.2, Network Theory Ltd., 2011.
3. John V Guttag, —Introduction to Computation and Programming Using Python“, Revised and expanded Edition, MIT Press, 2013
4. Robert Sedgewick, Kevin Wayne, Robert Dondero, —Introduction to Programming in Python: An Inter-disciplinary Approach, Pearson India Education Services Pvt. Ltd., 2016.

- Timothy A. Budd, —Exploring Python^{ll}, Mc-Graw Hill Education (India) Private Ltd., 2015.

Suggestive readings

- Kenneth A. Lambert, —Fundamentals of Python: First Programs^{ll}, CENGAGE Learning, 2012.
- Charles Dierbach, —Introduction to Computer Science using Python: A Computational Problem-Solving Focus, Wiley India Edition, 2013.
- Paul Gries, Jennifer Campbell and Jason Montoyo, —Practical Programming: An Introduction to Computer Science using Python 3^{ll}, Second edition, Pragmatic Programmers, LLC, 2013.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2 (DSC-2): Circuit Theory &

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Circuit Theory & Network Analysis ELDSC-2 | 4 | 3 | 0 | 1 | Course Admission Eligibility | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To study the basic circuit concepts in a systematic manner suitable for analysis and design.
- To study the steady state analysis of AC Circuits.
- To study and analyse electric circuits using network theorems.
- To study and design passive filters using R, L and C

Learning outcomes

The Learning Outcomes of this course are as follows:

- CO1 Study basic circuit concepts in a systematic manner suitable for analysis and design.
 CO2 Determine AC steady state response.
 CO3 Analyse the electric circuits using network theorems.
 CO4 Determine frequency response of filters

SYLLABUS OF DSC- 2

UNIT – I Introduction to Circuits and DC Analysis (12 Hours)

Basic Circuit Concepts: Voltage and Current Sources, V- I characteristics of ideal voltage and ideal current sources, various types of controlled sources, passive circuit components, V-I characteristics, and ratings of different types of R, L, C elements.

DC Circuit Analysis: Kirchhoff's Current Law (KCL), Kirchhoff's Voltage Law (KVL), Node Analysis, Mesh Analysis, Super node & Super mesh Analysis, Star-Delta Conversion.

UNIT – II AC Analysis (12 Hours)

Steady State Analysis: Sinusoidal Voltage and Current, Definition of Instantaneous, Peak, Peak to Peak, Root Mean Square and Average Values. Phasor, Complex Impedance, Sinusoidal Circuit Analysis for RL, RC and RLC Circuits. Node and Mesh Analysis for AC circuits. Star-Delta Conversion for complex impedances.

Power in AC Circuits: Instantaneous Power, Average Power, Reactive Power, Power Factor.

UNIT – III Network Theorems (12 Hours)

Network Theorems: Principal of Duality, Superposition Theorem, Thevenin's Theorem, Norton's Theorem, Reciprocity Theorem, Millman's Theorem, Maximum Power Transfer Theorem. (Independent Sources)

AC circuit analysis using Network Theorems.

UNIT – IV Filters (9 Hours)

Filters and Resonance: Introduction to Passive Filters-High Pass, Low Pass, Band Pass & Band Stop Filters, Frequency response of RC Circuits-High pass and Low pass filters, Frequency response of Series and Parallel RLC Circuits. Resonance in Series and Parallel RLC Circuits, Quality (Q) Factor and Bandwidth, Band Pass and Band Stop RLC Filters.

Practical component (if any) - Circuit Theory and Network Analysis Lab (Hardware and Circuit Simulation Software) (30 Hours)

Learning outcomes

CO1 Verify the network theorems and operation of typical electrical circuits.

CO2 Choose the appropriate equipment for measuring electrical quantities and verify the same for different circuits.

CO3 Prepare the technical report on the experiments carried.

1. Familiarization with Multimeter: Resistance, Capacitor and Inductor in series, parallel and series-parallel.
2. Familiarization with Oscilloscope: Measurement of Amplitude, Frequency and phase of a sinusoidal signal
3. Verification of Kirchhoff's Current Law.
4. Verification of Kirchhoff's Voltage Law
5. Verification of Norton's theorem.
6. Verification of Thevenin's Theorem.
7. Verification of Superposition Theorem.

8. Verification of the Maximum Power Transfer Theorem.
9. Design of Low Pass RC Filter and study of its Frequency Response.
10. Design of High Pass RC Filter and study of its Frequency Response.
11. Study of Frequency Response of a Series LCR Circuit and determination of its (a) Resonant Frequency (b) Impedance at Resonance (c) Quality Factor Q (d) Band Width.

Note: Students shall sincerely work towards completing all the above listed practicals for this course. In any circumstance, the completed number of practicals shall not be less than nine.

Essential/recommended readings

1. S. A. Nasar, Electric Circuits, Schaum's outline series, Tata McGraw Hill (2004)
2. M. Nahvi and J. Edminister, Electrical Circuits, Schaum's Outline Series, Tata McGraw Hill.(2005)
3. Robert L. Boylestad, Essentials of Circuit Analysis, Pearson Education (2004)

Suggestive readings (if any)

1. Alexander and M. Sadiku, Fundamentals of Electric Circuits , McGraw Hill (2008)

DISCIPLINE SPECIFIC CORE COURSE– 3 (DSC-3): Semiconductor Devices

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------------|---------|-----------------------------------|----------|---------------------|------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Semiconductor Devices ELDSC-3 | 4 | 3 | 0 | 1 | Course Admission Eligibility | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand the Physics of semiconductor devices
- To be able to plot and interpret the current voltage characteristics for basic semiconductor devices
- The student should be able to understand the behaviour, characteristics and applications of power devices such as SCR, UJT, DIAC, TRIAC, IGBT

Learning outcomes

The Learning Outcomes of this course are as follows:

- CO1 Describe the behavior of semiconductor materials
- CO2 Reproduce the I-V characteristics of diode/BJT/MOSFET devices
- CO3 Apply standard device models to explain/calculate critical internal parameters of semiconductor devices
- CO4 Explain the behavior and characteristics of power devices such as SCR/UJT etc.

SYLLABUS OF DSC-3

UNIT – I Introduction to Semiconductors and Carrier Transport (12 Hours)

Basic Concepts of Semiconductors: Energy Bands in Solids, Concept of Effective Mass, Direct and Indirect Bandgap Semiconductors, Density of States (Qualitative understanding), Carrier Concentration at Normal Equilibrium in Intrinsic Semiconductors and its Temperature Dependence, Derivation of Fermi Level for Intrinsic and Extrinsic Semiconductors and its Dependence on Temperature and Doping Concentration

Carrier Transport Phenomena: Drift velocity, Mobility, Resistivity, Hall Effect, Conductivity, Diffusion Process, Einstein Relation, Current Density Equation, Carrier Injection, Generation and Recombination Processes (Qualitative concepts), Continuity Equation.

UNIT – II P-N Junction Devices (12 Hours)

P-N Junction Diode: Space Charge at a Junction, Depletion Layer, Electrostatic Potential Difference at Thermal Equilibrium, Depletion Width and Depletion Capacitance of an Abrupt Junction. Concept of Linearly Graded Junction

Diode Equation and I-V Characteristics (Qualitative), Zener and Avalanche breakdown Mechanism.

Metal Semiconductor Junctions, Ohmic and Rectifying Contacts, Zener diode, Tunnel diode, Varactor Diode, Optoelectronic Devices: LED, Photodiode, Solar cell, LDR, their Circuit Symbols, Characteristics and Applications

UNIT – III Bipolar Junction Transistors (12 Hours)

Bipolar Junction Transistors (BJT): PNP and NPN Transistors, Energy Band Diagram of Transistor in Thermal Equilibrium, Emitter Efficiency, Base Transport Factor, Current Gain, Relation between alpha and beta, Base-Width Modulation, Early Effect, Modes of operation, Input and Output Characteristics of CB, CE and CC Configurations and their Applications.

UNIT – IV FET and Power Devices (9 Hours)

Field Effect Transistors: JFET, Channel Formation, Pinch-Off and Saturation Voltage, Input, Transfer and Output Characteristics.

MOSFET, NMOS, PMOS, Types of MOSFET, Circuit symbols, Working and Characteristic Curves of Depletion mode and Enhancement mode MOSFET (both N channel and P Channel), Complimentary MOS (CMOS) as an Inverter.

Power Devices: Introduction to UJT, SCR, TRIAC, DIAC, IGBT and their Basic Constructional Features (Schematic Diagram), Characteristics and Applications.

Practical component (if any) - Semiconductor Devices Lab (30 Hours)
(Hardware and Circuit Simulation Software)

Learning outcomes

- CO1 Examine the characteristics of Semiconductor Devices
 - CO2 Perform experiments for studying the behaviour of semiconductor devices for circuit design applications
 - CO3 Calculate various device parameters values from their I-V Characteristics
 - CO4 Interpret the experimental data for better understanding of the device behaviour
-
- 1. Study of the I-V Characteristics of Diode – Ordinary and Zener, Solar Cell, Photodiode
 - 2. Study of the I-V Characteristics of the CE, CB and CC configurations of BJT and obtain Input and Output impedances and Gains (Any one configuration to be assigned at the time of Examination)
 - 3. Study of the I-V Characteristics of JFET/MOSFET
 - 4. Study of the I-V Characteristics of the UJT
 - 5. Study of the I-V Characteristics of the SCR
 - 6. Study of the I-V Characteristics of DIAC and TRIAC
 - 7. Study of Hall Effect.

Note: Students shall sincerely work towards completing all the above listed practicals for this course. In any circumstance, the completed number of practicals shall not be less than six.

Essential/recommended readings

- 1. S.M Sze Semiconductor Devices: Physics and Technology, 2nd Edition, Wiley India Edition
- 2. Ben G Streetman and S. Banerjee Solid State Electronic Devices, Pearson Education
- 3. Dennis Le Croisette, Transistors, Pearson Education
- 4. Jacob Millman and Christos Halkias: Electronic Devices and Circuits, Tata McGraw-Hill Edition

Suggestive readings

- 1. Nutan Kala Joshi and Swati Nagpal, Basic Electronics with Simulations and Experiments, Khanna Publishers (2021)
- 2. Jasprit Singh, Semiconductor Devices: Basic Principles, John Wiley and Sons
- 3. Kannan Kano, Semiconductor Devices, Pearson Education

BSc. (H) Instrumentation
Category-I

DISCIPLINE SPECIFIC CORE COURSE -1 (DSC-1) –: Analog Electronics (INDSC1A)

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (If any) |
|------------------------------|---------|-----------------------------------|----------|---------------------|------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Analog Electronics (INDSC1A) | 04 | 03 | - | 01 | Course Admission Eligibility | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To impart in-depth knowledge of semiconductor devices & circuits focusing on many aspects of design & analysis
- To design various biasing configurations for transistor circuits
- To provide knowledge of amplifiers and their design
- To introduce the concept of feedback for designing oscillators

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the working of the diode circuits
- Analyze analog circuits and their applications using active devices
- Understand the design of feedback circuits and use them in amplifiers and Oscillators
- Explain the operation of various oscillator circuits

SYLLABUS OF DSC-1

UNIT – I

(12 Hours)

Diode and its application: Introduction to semiconductor materials, intrinsic & extrinsic semiconductors. PN junction diode: Depletion region, Junction capacitance, Construction, and Working, Diode equation, Effect of temperature on reverse saturation current, Ideal diode. Diode applications: clipper circuits, clamping circuits, Half wave rectifier, center-tapped, and bridge full-wave rectifiers, calculation of efficiency and ripple factor. DC power supply: Block diagram of regulated power supply, Zener diode as a voltage regulator.

UNIT – II

(12 Hours)

Bipolar Junction Transistor (BJT): NPN and PNP transistors, current components in BJT, Transistor amplifying action, Input and Output characteristics of BJT for CE, CB, CC

configurations (cut-off, active, and saturation regions), CE configuration as a two- port network, h-parameters, h- parameter equivalent circuit.

UNIT – III

(12 Hours)

BJT Biasing: Fixed bias, collector to base bias, emitter bias, and voltage divider bias circuits.

CE amplifier and frequency response: dc and ac load line analysis, Hybrid equivalent of CE, the frequency response of CE amplifier.

Introduction to Power Amplifiers: Class A, Class B, Class AB, and Class C

UNIT – IV

(9 Hours)

Feedback Amplifiers and Oscillators: Concept of feedback, negative and positive feedback, Negative feedback: advantages and disadvantages of negative feedback, voltage (series and shunt), current (series and shunt) feedback amplifiers, derivation of gain, input and output impedances for feedback amplifiers. Oscillators: Barkhausen criteria for sustained oscillations, Study of phase shift oscillator, Colpitt's oscillator, and Crystal oscillator.

Practical component-

(30 Hours)

1. To study I-V characteristics of PN junction and Zener diodes in forward and reverse bias configurations.
2. To study clipping and clamping circuits.
3. To study the Half wave rectifier and full-wave rectifier.
4. To design the power supply with capacitor filter
5. To study input and output I-V characteristics of common base and common emitter transistor configurations.
6. To study Fixed Bias and Voltage divider bias configurations of BJT.
7. To design a Single Stage CE amplifier for a given gain.
8. To study the frequency response of a single stage CE Amplifier
9. To study the Colpitt's Oscillator.
10. To study the Phase Shift Oscillator.
11. To study Class A, Class B and Class AB power amplifier

Essential/recommended readings

1. R. L. Boylestad, L. Nashelsky, K. L. Kishore, Electronic Devices and Circuit Theory, Pearson Education (2006).
2. N Bhargava, D C Kulshreshtha and S C Gupta, Basic Electronics and linear circuits, Tata Mc Graw Hill (2007).
3. J. Millman and C. Halkias, Integrated Electronics, Tata McGraw Hill (2001).
4. David A. Bell, Electronic Devices & Circuits, Oxford University Press, Fifth edition.
5. Mottershed, Electronic Devices, PHI Publication, 1st Edition.
6. D. L. Schilling and C. Belove, Electronic Circuits: Discrete and Integrated, Tata McGraw Hill(2002).

Suggestive readings:

1. J. R. C. Jaegar and T. N. Blalock, Microelectronic Circuit Design, Tata McGraw Hill(2010).
2. Donald A. Neamen, Electronic Circuit Analysis and Design, Tata McGraw Hill(2002).

3. J.Cathey, 2000 Solved Problems in Electronics, Schaum's outline Series, Tata Mc Graw Hill (1991).

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2 (DSC-2): Basic Circuit theory (INDSC1B)

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------|---------|-----------------------------------|----------|---------------------|------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Circuit theory (INDSC1B) | 04 | 03 | - | 01 | Course Admission Eligibility | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To develop an understanding of the fundamental laws and elements of electric circuits.
- To learn the energy properties of electric elements and techniques to measure current and voltage.
- To develop the ability to apply circuit analysis to AC and DC circuits.
- To understand signals, waveforms and transient & steady state responses of RLC circuits.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the current-voltage characteristics of basic fundamental elements
- Design and analyze the electronic circuits using various network theorems
- Understand frequency response and behavior of ac circuits
- Understand the concept of two port network and overall response for interconnection of two port networks

SYLLABUS OF DSC- 2

UNIT – I

(12 Hours)

Basic Circuit Concepts: Voltage and Current Sources including their types, Resistors: types and color coding, Capacitor: types and color coding, Inductor: types and color coding, star-delta conversion & delta-star conversion. Sinusoidal voltage and current: Definition of instantaneous, peak to peak, average and rms value.

UNIT – II

(12 Hours)

Concepts of Circuit Analysis: Ohms Law, Kirchhoff's Current Law (KCL), Kirchhoff's Voltage Law (KVL), Node Analysis, Mesh Analysis.

Network Theorem (DC Circuits): Principal of Duality, Superposition Theorem, Thevenin's Theorem, Norton's Theorem, Reciprocity Theorem, Millman's Theorem, Maximum Power Transfer Theorem. Voltage Law (KVL), Node Analysis, Mesh Analysis.

Network Theorem (DC Circuits): Principal of Duality, Superposition Theorem, Thevenin's Theorem, Norton's Theorem, Reciprocity Theorem, Millman's Theorem, Maximum Power Transfer Theorem.

UNIT – III

(12 Hours)

DC Transient Analysis: Time Constant, Response of RC, RL and RLC circuit to dc source(s), Response of source free RC, RL and RLC circuit.

AC Circuit Analysis: Voltage-Current relationship in Resistor, Inductor and Capacitor, Phasor, Complex Impedance. Mesh Analysis, Node Analysis and Network Theorems for AC Circuits. Frequency Response of Series and Parallel RLC Circuits, Resonance, Quality (Q) Factor and Bandwidth. Fundamentals of passive Filters: Low Pass, High Pass, Band Pass and Band Stop.

UNIT – IV

(9 Hours)

Power in AC Circuits: Instantaneous Power, Average Power, Reactive Power, Complex Power and Power Triangle, Power Factor.

Two Port Networks: Introduction to two port networks, Impedance (Z) Parameters, Admittance (Y) Parameters, hybrid (h) parameters and Transmission (ABCD) Parameters.

Practical component-

(30 Hours)

1. Verification of Kirchhoff's Law.
2. Verification of Norton's Theorem.
3. Verification of Thevenin's Theorem.
4. Verification of Reciprocity Theorem.
5. Verification of Superposition Theorem.
6. Verification of the Maximum Power Transfer Theorem.
7. Designing of RC Integrator circuit.
8. Designing of RC differentiator circuit.
9. Designing of a RC Low Pass Filter and study of its Frequency Response.
10. Designing of a RC High Pass Filter and study of its Frequency Response.

Essential/recommended readings

1. S. A. Nasar, Electric Circuits, Schaum's outline series, Tata McGraw Hill (2004).
2. Electrical Circuits, M. Nahvi and J. Edminister, Schaum's Outline Series, Tata McGraw-Hill (2005).
3. Robert L. Boylestad, Essentials of Circuit Analysis, Pearson Education (2004).

Suggestive readings: Nil

1. W. H. Hayt, J. E. Kemmerly, S. M. Durbin, Engineering Circuit Analysis, Tata McGraw Hill (2005).
2. Alexander and M. Sadiku, Fundamentals of Electric Circuits, McGraw Hill (2008).

DISCIPLINE SPECIFIC CORE COURSE– 3 (DSC-3): Testing and Measurement (INDSC1C)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|---------|-----------------------------------|----------|---------------------|------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Testing and Measurement (INDSC1C) | 04 | 02 | - | 02 | Course Admission Eligibility | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To describe the units of measure and the various instruments used in various measurement parameters.
- To teach the various methods in power measurement.
- To make them understand about the error in measurement systems.
- To explain the various components of a testing and calibration system.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the basic concept of measurements and calibration
- Perform error measurement concepts correctly and present final values with the correct units/symbols
- Analyze various standardization techniques in Production Plants
- Familiarize with various testing and calibration procedures in measurement

SYLLABUS OF DSC-3

UNIT – I

(12 Hours)

Introduction to Measurement System, Significance of Measurement, Methods of measurement, Elements of a generalized measurement system.

Performance characteristics of measurement system: Static Characteristics -Accuracy, Sensitivity, Linearity, Precision, Resolution, Threshold, Range, Hysteresis, Dead Band, Backlash, Drift, Impedance Matching and Loading.

Dynamic Characteristics- Types, Fidelity, Speed of Response, Dynamic Error.

UNIT – II

(12 Hours)

Measuring Instruments: Introduction to Voltmeters, Ammeters, Ohmmeters, Digital Multimeters, Clamp Meter, Lux meter, Flux Meter, Tester, Function Generator, Bolometer, B-Dot and D-Dot Sensors.

Errors in measurement systems:

Definition of Errors: Systematic Errors, Instrumental Errors, Environmental Errors, Random Errors, Loading Errors, Limiting Errors. Source of Errors in Measuring Instruments.

UNIT – III

(9 Hours)

Introduction to Testing, Fault, Types of Faults, Methods used for localizing faults, Methods used for ground and short circuit faults, Murray loop test, Varley loop test, location of open circuit faults in cable, types of Probes and Connectors.

UNIT – IV

(12 Hours)

Standardization and Calibration Modelling: Standardization in Production Plants and manufacturing houses, Reliability studies and inspection, Product Standardization techniques, Calibration: Calibration of measuring instruments, Theory and Principles (absolute and secondary or comparison method), Setup, Modelling.

Various Testing and Calibration Systems: Sensor calibration and testing, Analytical methods in calibrating, Automated test and calibration systems.

Practical component -

(30 Hours)

1. Testing of Active and Passive Components.
2. Testing of all basic components.
3. Calculation and verification of Resistance.
4. Calculation and verification of Voltage and Current.
5. Testing of Faulty equipment.
6. Fault diagnosis of Lab. Instruments.
7. Measurement of Temperature.
8. Measurement of Pressure.
9. Measurement of Power.
10. Measurement of Energy using Energy meter.
11. Study of Electrical and Mechanical parameters standards used in testing and calibration.
12. Calibration of Instruments.
13. Testing of Electrical Components.
14. Testing of Various Instruments.
15. Murray Loop test
16. Varley loop test
17. B-Dot sensor, D-Dot sensor
18. Study of Lux meter
19. Study of Flux meter
20. Study of Multimeter

Essential/recommended readings

1. Electrical measurement and measuring Instruments by Golding and Widdis.
2. Electrical and Electronic measurements and Instruments By A.K.Sawhney.

Suggestive readings

1. Electrical measurements and Measuring instruments By Rajendra Prasad.

**Common Pool of Generic Electives (GE) Courses
Offered by Department of Electronic Sciences**

Category-IV

GENERIC ELECTIVES (GE-1): Fundamentals of Electronics

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|----------|-----------------------------------|----------|------------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fundamentals of Electronics ELGE-1A | 4 | 3 | 0 | 1 | None | None |

Learning Objectives

The Learning Objectives of this course are as follows:

- The paper equips the learners about basic circuit knowledge to analyze electric circuits using network theorems.
- Understand diode and its applications in clipping and clamping circuits, Rectifiers and design regulated power supply using Zener diodes.
- To be able to plot the current voltage characteristics of Diode, Transistors and its different biasing conditions
- Usage of semiconductor devices in designing the circuits.

Learning outcomes

The Learning Outcomes of this course are as follows:

- CO1 Study basic circuit concepts in a systematic manner suitable for analysis and design and further analyze the electric circuit using network theorems.
- CO2 To understand the different types of semiconductor devices and their characteristics
- CO3 Illustrate about working of transistors, transistor-based amplifiers and its biasing.
- CO4 Explain the concepts of feedback and oscillations and construct feedback amplifiers

SYLLABUS OF GE-1

UNIT – I Basic Resistive Circuit (12 Hours)

Ohm's Law, resistors in series and parallel combinations. DC voltage sources: ideal and non-ideal cases; DC current sources: ideal and non-ideal cases; Introduction to Kirchhoff's current law, Kirchhoff's voltage law, voltage divider circuit, current divider circuit; source

transformations– voltage source to current source and current source to voltage source, basic problems. Resistive circuits: Thevenin's theorem, Norton theorem, Superposition theorem, Maximum power transfer theorem.

UNIT – II PN-junction diode and its applications (12 Hours)

PN junction, Unbiased PN junction, Forward and Reversed biased condition, IV-characteristics of PN junction diode, types of diodes – Zener diode, photo diode, LED.

Diode circuits and power supplies. Half and full wave rectifiers, Bridge rectifier (qualitative comparison), Regulated power supply using Zener diode, Basic Clipper and Clamper circuits using diodes.

UNIT – III Bipolar Junction Transistors (BJT) and Biasing (12 Hours)

NPN Transistor and basic transistor action, Definition of α , β and γ and their interrelations, leakage currents, Modes of operation, Input and output characteristics of CB, CE and CC Configurations. Transistor biasing, thermal runaway, stability and stability factor, Fixed bias without and with R_E , collector to base bias, voltage divider bias and emitter bias ($+V_{CC}$ and $-V_{EE}$ bias), circuit diagrams and their working.

UNIT – IV BJT Applications (12 Hours)

BJT amplifier (CE), dc and ac load line analysis, Operating point, Concept of feedback, negative and positive feedback, advantages and disadvantages of negative feedback, voltage (series and shunt), current (series and shunt) feedback amplifiers, gain, input and output impedances. Positive feedback and Barkhausen criteria for oscillations.

Practical component (if any) - Fundamentals of Electronic Lab (30 Hours) (Hardware and Circuit Simulation Software)

Learning outcomes

CO1 Verify the network theorems and operation of typical electrical circuits.

CO2 Study various stages of a zener diode based regulated power supply.

CO3 Understand various biasing concepts, BJT based amplifiers.

1. Study and operation of digital multi-meter, function generator, regulated power supply, CRO, etc.
2. Verification of KVL and KCL.
3. Verification of Superposition theorem.
4. Verification of Thevenin's, Norton's Theorem
5. Verification of Maximum power transfer theorem.
6. To plot the IV-characteristics of a ordinary and Zener diode and LED
7. Study of Half wave and Full Wave Rectifiers
8. Study of Fixed Bias, Voltage divider bias Feedback configuration for transistors.
9. Study of transistor amplifier circuit.

Note: Students shall sincerely work towards completing all the above listed practicals for this course. In any circumstance, the completed number of practicals shall not be less than seven.

Essential/recommended readings

1. R. L. Boylestad & Louis Nashlesky (2007), Electronic Devices & Circuit Theory, Pearson Education.
2. David A. Bell (2008), Electronic Devices and Circuits, Oxford University Press.
3. B L Theraja and AK Theraja, A Textbook Of Electrical Technology - Vol I.

Suggestive readings

1. Donald A. Neamen, Electronic Circuit Analysis and Design, Tata McGraw Hill (2002)

GENERIC ELECTIVES (GE-2): Data Engineering and Analytics

| | | Lecture | Tutorial | Practical/ Practice | | |
| Data Engineering and Analytics ELGE-1B | 4 | 3 | 0 | 1 | None | Basic Knowledge of Python Programming Language |

Learning Objectives

The Learning Objectives of this course are as follows:

The objective of this course is to introduce students to data analysis and impart them skills to solve data analytics problem. Data Engineering is basically designing and building pipelines that transform and transport data into a highly usable format before it reaches the Data Scientists or other end users. These pipelines must take data from many disparate sources and collect them into a single warehouse that represents the data uniformly as a single source of truth.

Learning outcomes

The Learning Outcomes of this course are as follows:

- CO1 Use data analysis tools in the pandas library.
- CO2 Develop understanding of basic data analysis techniques.
- CO3 Collect, explore, clean, munge and manipulate data.
- CO4 Solve real world data analysis problems.
- CO5 Build data science applications using Python based toolkits.

SYLLABUS OF GE-2

UNIT – I Mathematical Foundation for Data Engineering (12 Hours)

Linear Algebra: Vectors, Matrices; Statistics: Describing a Single Set of Data, Correlation, Simpson's Paradox, Correlation and Causation; Probability: Dependence and Independence, Conditional Probability, Bayes's Theorem, Random Variables, Continuous Distributions, The Normal Distribution, The Central Limit Theorem ; Hypothesis and Inference: Statistical Hypothesis Testing, Confidence Intervals, P-hacking, Bayesian Inference

UNIT – II Introduction to Data Engineering and Data Science (12 Hours)

Relationship between Data Engineering and Data Science, Types of Data, Data file formats. Overview of Data Repositories; Data Warehouses, Data Marts, and Data Lakes. Introduction to ETL, ELT, and Data Pipelines. Data Integration Platforms, Traits of Big data, Analysis vs Reporting, Exploratory Data Analysis and Data Science Process. Motivation for using Python for Data Analysis. Introduction to Cloud Computing in Data Science

Essential Python Libraries: NumPy, pandas, matplotlib, SciPy, scikit-learn, stats models

UNIT – III Understanding Pandas and Data Wrangling (12 Hours)

Getting Started with Pandas: Arrays and vectorized computation, Introduction to pandas Data Structures, Essential Functionality, Summarizing and Computing Descriptive Statistics. Data Loading, Cleaning, Preparation and Transformation.

Data Wrangling: Hierarchical Indexing, Combining and Merging Data Sets Reshaping and Pivoting.

UNIT – IV Data Aggregation and Analysis (9 Hours)

Data Aggregation and Group operations: Group by Mechanics, Data aggregation, General split-apply-combine, Pivot tables and cross tabulation

Time Series Data Analysis: Date and Time Data Types and Tools, Time series Basics, date Ranges, Frequencies and Shifting, Time Zone Handling, Periods and Periods Arithmetic, Resampling and Frequency conversion, Moving Window Functions.

Practical component (if any) - Data Engineering and Analytics Lab (Python) (30 Hours)

Learning outcomes

CO1 Implement various data analysis tools in the pandas library.

CO2 Implement various basic data analysis techniques, clean and filter and manipulate data.

CO3 Solve real world data analysis problems.

1. Create a Data Frame and perform Matrix-like Operations on a Data Frame
2. Implement basic array statistical methods (sum, mean, std, var, min, max, argmin, argmax, cumsum and cumprod) and perform sorting operation with sort method.
3. Create a data frame with a following structure using pandas

| EMP ID | EMP NAME | SALARY | START DATE |
|--------|----------|--------|------------|
| 1 | Satish | 50000 | 01-11-2017 |
| 2 | Reeya | 75000 | 12-05-2016 |

| | | | |
|---|-------|--------|------------|
| 3 | Jay | 100000 | 22-09-2015 |
| 4 | Roy | 45000 | 08-01-2017 |
| 5 | Serah | 55000 | 06-02-2018 |

4. Load Pima Indians Diabetes dataset (Source: <https://archive.ics.uci.edu/ml/datasets/diabetes>). Implement the following
 - i. Data Cleaning and Filtering methods (Use NA handling methods, fillna function arguments).
 - ii. Implement descriptive and summary statistics.
 - iii. Plot histogram, bar plot, distplot for features/attributes of the dataset
5. Load Boston Housing Price dataset and perform
 - i. Data cleaning and filtering method on the dataset.
 - ii. Implement descriptive and summary statistics
 - iii. Plot 'distplot' for target variable and 'heatmap' for the correlation in dataset.
6. For above data set, perform grouping the data using index in pivot table, aggregate on specific features with values.
7. For Superstore sales data, perform Time Series Data Analysis.
8. Creating cloud account Amazon/Azure/Google/IBM to store images /files / programs..

Note: Students shall sincerely work towards completing all the above listed practicals for this course. In any circumstance, the completed number of practicals shall not be less than seven.

Essential/recommended readings

1. The Data Engineering Cookbook - Mastering The Plumbing Of Data Science by Andreas Kretz.
2. Practical Statistics for Data Scientists: 50+ Essential Concepts Using R and Python by Peter Bruce, Andrew Bruce, Peter Gedeck, Shroff/O'Reilly. ISBN: 8194435006-978
3. Data Engineering A Complete Guide - 2020 Edition by Gerardus Blokdyk, 5starcooks. ISBN: 1867316718-978
4. The Data Warehouse Toolkit: The Definitive Guide to Dimensional Modeling by Ralph Kimball, Margy Ross, Wiley. ISBN: 978-1118530801

Suggestive readings -

1. Python Data Science Handbook by Jake VanderPlas, Shroff/O'Reilly. ISBN: 978-9352134915
2. Data Science from Scratch: First Principles with Python by Joel Grus, Shroff/O'Reilly. ISBN: 9352138326-978

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-1): Fundamentals of Instrumentation (INGE1A)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department offering the course |
|---|-----------|-----------------------------------|----------|----------------------|-----------------------|--|--------------------------------|
| | | Lecture | Tutorial | Practical / Practice | | | |
| Fundamentals of Instrumentation (INGE1A) | 04 | 03 | - | 01 | Class XII pass | Physics and Mathematics in 10+2 | Instrumentation |

Learning Objectives

The Learning Objectives of this course are as follows:

- To learn about basic concepts of Instrumentation.
- To understand the basic concept of errors and study different types of errors present in measurement systems.
- To study different characteristics of measurement systems.
- To study different types of transducers – resistive, capacitive and inductive
- To study signal conditioning.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the basics of concepts of Instrumentation and measurement systems
- Identify and comprehend various sensors used in the real-life applications and paraphrase their importance
- Classify and explain with examples of transducers, including those for measurement of temperature, strain, motion, and light
- Be conversant in construction and working of signal conditioning circuits

SYLLABUS OF GE-1

UNIT – I

(12 Hours)

Basic concepts of Instrumentation: Generalized instrumentation systems block diagram representation, Error in measurement- Gross Errors, Systematic Errors and Random Errors. Statistical analysis of error in measurement-Arithmetic mean, Deviation, standard deviation

UNIT – II

(9 Hours)

Measurement systems: static characteristics (accuracy, sensitivity, linearity, precision, resolution, threshold, range, hysteresis, dead band, backlash, drift), dynamic characteristics (types, fidelity, speed of response, dynamic error)

UNIT – III

(12 Hours)

Transducers: Classification, Active and Passive. Principle and working of following types: Resistive (Strain Gauge) Capacitive, Inductive (LVDT), Piezoelectric, Light (LDR),

Temperature (RTD, Thermocouple, Thermistor)

UNIT – IV

(12 Hours)

Signal Conditioning: Introduction to Op-Amp, Basic Instrumentation Amplifier, Application of Instrumentation Amplifiers

Practical component- 30 Hours

1. Measurement of strain using strain gauge/load cells.
2. Measuring change in resistance using LDR
3. Measurement of displacement using LVDT.
4. Measurement using capacitive transducer.
5. Measurement of Temperature using Temperature Sensors.
6. Design and study basic circuit of Op-Amp.

Essential/recommended readings

1. Doebelin&Manek, Measurement Systems, McGraw Hill, New York, 1992, 5th edition.
2. Nakra& Choudhary, Instrumentation Measurements and Analysis, Tata McGraw-Hill, 2nd edition.
3. A.K. Sawhney, Electrical & Electronic Measurements & Instrumentation, 19th revised edition.
4. Rangan, Sarma, and Mani, Instrumentation- Devices and Systems, Tata-McGraw Hill, 2nd edition.
5. H.S Kalsi, Electronic Instrumentation, McGraw Hill, 4th edition.
6. DVS Murthy, Measurement & Instrumentation, PHI, 2nd edition.

Suggestive readings:

1. D. Patranabis, Sensors and Transducers, PHI, 2nd edition.
2. A Course in Electrical and Electronic Measurements and Instrumentation, (2005), A.K. Sawhney, DhanpatRai& Co.
3. Mechanical and Industrial Measurements, 3rd Edition, Tenth Edition (1996), R.K. Jain, Khanna Publishers.

GENERIC ELECTIVES (GE-2): Engineering Physics (INGE1B)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department offering the course |
|------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|-----------------------------|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| Engineering Physics (INGE1B) | 04 | 03 | - | 01 | Class XII pass with Mathematics | Mathematics in 10+2 | Instrumentation |

Learning Objectives

The Learning Objectives of this course are as follows:

- To develop an intuitive understanding of semiconductor physics
- To provide the students a thorough understanding of the fundamentals of optics
- To introduce fundamental aspects of photonics

Learning outcomes

The Learning Outcomes of this course are as follows:

- Gain in-depth knowledge about basic concepts of semiconductor physics
- Understand the physics behind various phenomena in optics
- Understand the photonics

SYLLABUS OF GE-2

UNIT – I

(12 Hours)

Semiconductor physics: Energy bands in semiconductors, Types of semiconductors, Charge carriers, Intrinsic and extrinsic materials. Carrier concentration: Fermi Level, Electron and hole concentration equilibrium, the temperature dependence of carrier concentration, Compensation, and charge neutrality. Conductivity and mobility, Effect of temperature, Doping, and high electric field.

UNIT – II

(12 Hours)

Interference: Interference of light, Fringe formation, interference in thin films, wedge-shaped film, Newton's rings, Michelson interferometer.

Diffraction - Single, Double & N- Slit, Diffraction grating, grating spectra, Rayleigh's criterion, and resolving power of grating.

UNIT – III

(12 Hours)

Polarization: Phenomena of double refraction, Nicol prism, Production and analysis of plane, circular and elliptical polarized light, Fresnel's theory of optical activity, Polarimeters.

Laser: Basic principle, Spontaneous and stimulated emission of radiation, Einstein's Coefficients, Laser applications.

UNIT – IV

(3 Weeks)

Photonics: Light Emitting Diodes, Construction, materials, and operation, Photodetectors: Photomultiplier tube. Phototransistors and Photodiodes (p-i-n, avalanche).

LCD Displays: Types of liquid crystals, Principle of Liquid Crystal Displays, applications, advantages over LED displays.

Fiber optics: Principles and applications

Practical component-

1. To determine the type (n or p) and mobility of semiconductor material using Hall-effect
2. To determine the refractive index of a prism using a spectrometer

3. To determine the dispersive power of prism using spectrometer and mercury source.
4. To determine the wavelength of sodium light by Newton's Ring.
5. To determine the wavelength of sodium light using Michelson's Interferometer.
6. To determine the resolving power of diffraction grating
7. To determine the specific rotation of cane sugar using a polarimeter.
8. To find the wavelength of He-Ne Laser using a transmission diffraction grating.
9. To determine characteristics of LEDs and Photodetector.
10. To measure the numerical aperture of an optical fibre.

Essential/recommended readings

1. B. G. Streetman and S. Banerjee "Solid-state electronics devices", 5th Edition, PHI.
2. Donald A Neaman, "Semiconductor Physics and Devices Basic Principles" 3rd Ed TMH India.
3. Alok Dutta, "Semiconductor Devices and circuits", Oxford University Press.
4. Robert F. Pierret, Semiconductor Device Fundamentals, Pearson Education (2006)
5. Ajoy Ghatak –Optics, Fourth Edition, McGraw-Hill (2008).

Suggestive readings

1. Arthur Beiser -Concepts of Modern Physics, 6th Edition, Mc-Graw Hill.
2. S. O. Kasap, Optoelectronics, and Photonics: Principles and Practices, Pearson Education (2009)
3. Ghatak A.K. and Thyagarajan K., Introduction to fiber optics, Cambridge Univ. Press. (1998)

14. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 18-1-13 dated 18.08.2022 regarding Syllabi of 1st Semester of Ability Enhancement Courses

Add the following:

**ABILITY ENHANCEMENT COURSE (AECs)
UNDER
UGCF-2022
LISTED UNDER APPENDIX-II-A TO THE ORDINANCE V (2-A) OF THE
ORDINANCES OF THE UNIVERSITY
(With effect from Academic Year 2022-23)**

{Environmental Science: Theory to Practical (Course 1) and any chosen Indian Language (Course 1) from AEC Pool shall be studied in flip mode in Semester 1 and Semester II. Similarly, Environmental Science: Theory to Practical (Course 2) and Course 2 of the Same Language as chosen in First Year shall be studied in flip mode in Semester III and Semester IV}

**FOLLOWING ARE THE SYLLABI OF POOL OF ABILITY ENHANCEMENT
COURSES OFFERED UNDER UGCF-2022 IN FIRST YEAR**

DEPARTMENT OF PUNJABI

ABILITY ENHANCEMENT COURSE -1 - PUNJABI BHASHA DA MUDHLA PADHAR

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Credits: 2

L/T/P= 2/0/0

LEARNING OBJECTIVES:

- This Course is designed for the students who couldn't opt Punjabi as a subject at any level in school.
- This Course will help to enhance the ability of the students in speaking, listening, reading and writing Punjabi Language.
- This course will develop the ability of word formation and vocabulary practice amongst students.
- Students will learn meaning of words, phrases and sentences of Punjabi language.
- This course will develop communication skills and understanding of social interaction amongst students of Multi-lingual societies.

LEARNING OUTCOMES:

- After completing this course, the students will be able to read, write, speak and understand the Punjabi language.
- The students will be able to learn basic Punjabi word and sentence formation and practical use of it.
- Students will improve their speaking ability in Punjabi both in terms of fluency and comprehensibility.
- Students will increase their reading speed and comprehension of Punjabi language. They will be able to read News Papers, Magazines and Literature etc.

Unit-I: ਲਿਪੀ ਬੋਧ

(Lipi Bodh) (4 Weeks)

- ਗੁਰਮੁਖੀ ਲਿਪੀ ਨਾਲ ਮੁਢਲੀ ਜਾਣ-ਪਛਾਣ
Gurmukhi Lipi naal Mudhli Jaan-Pachhaan
- ਪੈਂਤੀ ਅੱਖਰੀ ਅਤੇ ਪੈਰ ਬਿੰਦੀ ਵਾਲੇ ਵਰਨਾਂ ਦਾ ਉਚਾਰਨ ਅਤੇ ਸੁੰਦਰ ਲਿਖਾਈ ਦਾ ਅਭਿਆਸ
Painti Akhri ate Pair-bindi vale varnada Ucharan ate Sunder Likhai da Abhiyaas
- ਲਗਾਂ-ਮਾਤਰਾਵਾਂ ਅਤੇ ਲਗਾਖਰਾਂ ਦੀ ਵਰਤੋਂ
Lagan-Matravan ate Lgakhraan di Varton

Unit-II: ਸ਼ਬਦ ਬੋਧ

(Shabad Bodh) (4 Weeks)

- ਬਿਨਾ ਲਗ ਵਾਲੇ, ਇਕ ਲਗ ਵਾਲੇ, ਦੋ ਲਗ ਅਤੇ ਦੋ ਤੋਂ ਵੱਧ ਲਗ ਵਾਲੇ ਸ਼ਬਦਾਂ ਦਾ ਉਚਾਰਨ ਅਤੇ ਲਿਖਣ ਅਭਿਆਸ
Binan Lag Vale, Ik Lag Vale, Do Lag Vale ate Do ton vadh lag Vale Shabadan da Ucharan ate Likhan Abhiyaas
- ਲਿੰਗ ਅਤੇ ਵਚਨ ਦੀ ਵਰਤੋਂ
Ling ate Vachan di Varton
- ਅਗੇਤਰ ਅਤੇ ਪਿਛੇਤਰ ਦੀ ਵਰਤੋਂ
Agetar ate Pichhetar di Varton

Unit III: ਅਰਥ ਬੋਧ

(Arth Bodh) (4 Weeks)

- ਸਮੇਂ, ਦਿਨਾਂ, ਦੇਸੀ ਮਹੀਨਿਆਂ, ਰੁੱਤਾਂ, ਦਿਸ਼ਾਵਾਂ, ਗਿਣਤੀ, ਜਾਨਵਰਾਂ, ਪੰਛੀਆਂ, ਕੀੜੇ-ਮਕੋੜੇ, ਸਰੀਰ ਦੇ ਅੰਗਾਂ, ਸਬਜ਼ੀਆਂ, ਫਲਾਂ ਨਾਲ ਸੰਬੰਧਤ ਸ਼ਬਦਾਵਲੀ ਦਾ ਉਚਾਰਨ ਅਤੇ ਲਿਖਣ ਅਭਿਆਸ
Samey, Dinan, Desi Mahinian, Ruttan, Dishaavan, Ginti, Janavran, Panchhian, Keerhe-Makaurhe, Sareer de Angaan, Sabziaan, Phalaan naal Sambandhat Shabdaavli da Ucharan ate likhan Abhiyaas
- ਘਰ ਦੇ ਕੰਮ-ਧੰਦੇ, ਰਸੋਈ ਦਾ ਸਮਾਨ, ਪਹਿਰਾਵੇ, ਖਾਣ-ਪੀਣ, ਲੋਕ ਕਿੱਤਿਆਂ, ਖੇਤੀ-ਬਾੜੀ, ਤਿੱਥਾਂ-ਤਿਉਹਾਰਾਂ, ਦਰੱਖਤਾਂ ਨਾਲ ਸੰਬੰਧਤ ਸ਼ਬਦਾਵਲੀ ਦਾ ਉਚਾਰਨ ਅਤੇ ਲਿਖਣ ਅਭਿਆਸ
Ghar de Kamm-Dhande, Rasoi da Samaan, Pehraave, Khaan-Peen, Lok Kittean, Kheti-Barhi, Tithaan-Teoharan, Darakhtaan naal Sambandhat Shabdaavli da Ucharan ate likhan Abhiyaas
- ਸਮਾਨਾਰਥਕ ਸ਼ਬਦ, ਵਿਰੋਧਾਰਥਕ ਸ਼ਬਦ, ਬਹੁਅਰਥਕ ਸ਼ਬਦ ਅਤੇ ਬਹੁਤੇ ਸ਼ਬਦਾਂ ਦੀ ਥਾਂ ਇਕ ਸ਼ਬਦ ਦਾ ਉਚਾਰਨ ਅਤੇ ਲਿਖਣ ਅਭਿਆਸ
Samanarthak Shabad, Virodharthak Shabad, Bahuarthak Shabad ate Bahute Shabdan di thaani Shabad da Ucharan ate likhan Abhiyaas

Unit IV: ਵਾਕ ਬੋਧ

(Vaak Bodh) (3 Weeks)

- ਸਧਾਰਨ ਵਾਕ, ਪ੍ਰਸ਼ਨ ਵਾਚਕ ਵਾਕ ਅਤੇ ਨਾਂਹ ਵਾਚਕ ਵਾਕ ਦੀ ਪਛਾਣ ਅਤੇ ਲਿਖਣ ਦਾ ਅਭਿਆਸ
Sadharan Vaak, Prashan Vaachak Vaak ate Nahn Vaachak Vaak di Pachhaan ate Likhan da Abhiyaas
- ਆਮ ਬੋਲ-ਚਾਲ, ਦਫ਼ਤਰੀ ਕੰਮ-ਕਾਜ, ਖਰੀਦੋ-ਫ਼ਰੋਖਤ ਨਾਲ ਸੰਬੰਧਤ ਸੰਵਾਦ ਦਾ ਵਾਕ ਲਿਖਣ ਅਭਿਆਸ
Aam Bol-chal, Daftri Kamm-kaaj, Kharido-Pharokhat naal Sambandhat Sanvaad da Vaak Likhan Abhiyaas
- ਸ਼ੁੱਧ ਵਾਕ ਲਿਖਣ ਦਾ ਅਭਿਆਸ
Shudh Vaak Likhan da Abhiyaas

ESSENTIAL READINGS

- **Adhunik Punjabi Viakaran ate lekh rachna** (2019), Punjab School Sikkhia Board, Sahibzada Ajeet Singh Nagar.

- **Punjabi Path Pustak-4** (Dooji Bhasha) (2020), Punjab School Sikkhia Board, Sahibzada Ajeet Singh Nagar.
- Teja, Charnjit Singh (Eds.) (2017), **Pehli Kitab**, Sann Santali Publication, Amritsar.

SUGGESTED READINGS:

- Brar, Boota Singh, Nachhattar Singh (2015), **Punjabi Bhasha lipi ate Viakaran**, Arsee Publishers, New Delhi.
- Duggal, Narinder Singh (Dr.) (2000), **Punjabi Viakaran te Rachnavali**, New Book Company, Jalandhar.
- Harkirat Singh (2004), **Saadi Bhasha**, Punjabi University, Patiala.
- Harkirat Singh te Giani Lal Singh (1999), **Punjabi Viakaran**, Punjab State University Text Book Board, Chandigarh.
- Harkirat Singh (1988), **Punjabi Baare**, Punjabi University, Patiala.
- Teja Singh (1947), **Punjabi Kiven Likhiye (Second Edition)**, Hind Publishers Limited, Jalandhar.

INTERNET RESOURCES:

*(Note: Teachers are free to recommend additional related standard source books, if required so.)

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

ABILITY ENHANCEMENT COURSE -2 (AEC-2)

PUNJABI BHASHA DA UCHERA PADHAR

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|--|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Punjabi Bhasha da Uchera Padhar (AEC-2) | 2 | 2 | 0 | 0 | Class 12 th pass in any subject | Studied Punjabi up to 10 th Standard or <i>Working knowledge of Punjabi language</i> |

LEARNING OBJECTIVES:

- This Course is designed for the students who have qualified Punjabi as a subject in the 10th standard or working knowledge of Punjabi Language.
- This Course will help to enhance the ability of the students in Punjabi language at intermediate level.
- The aim and objective of the course is to help the students to get knowledge of Punjabi Grammar.
- The course will expose students to a research enterprise which seeks to discover what a person's linguistic capacity consists of, how it arises in children, how it functions in speaking and listening.
- The objective of course is to make students familiar with word category, word structure and sentence making in Punjabi language.

LEARNING OUTCOMES:

- The study of Language develops logical mind of students and also enrich their linguistic aptitude. Language ability is helpful to the students to understand other language structure.
- Students will develop a fundamental understanding of the word structure of Punjabi language.
- Students will understand and use methods of logical analysis while analysing the Punjabi Language.
- After completing this course students will get exposed to the knowledge of Punjabi Grammar.
- This course will increase proficiency of students in the field of Punjabi language skills at an intermediate level.

Unit-I ਸ਼ਬਦ ਸ਼੍ਰੇਣੀਆਂ

(Shabad Shrenian) (4 Weeks)

- ਨਾਂਵ, ਪੜਨਾਂਵ ਅਤੇ ਵਿਸ਼ੇਸ਼ਣ ਨਾਲ ਜਾਣ-ਪਛਾਣ
Naav, Parhnaav ate Visheshan naal Jaan-Pachhaan
- ਕਿਰਿਆ, ਕਿਰਿਆ-ਵਿਸ਼ੇਸ਼ਣ ਨਾਲ ਜਾਣ-ਪਛਾਣ
Kirya, Kirya-Visheshan naal Jaan-Pachhaan
- ਸੰਬੰਧਕ ਅਤੇ ਯੋਜਕ ਨਾਲ ਜਾਣ-ਪਛਾਣ
Sambandhak ate Yojak naal Jaan-Pachhaan

Unit-II ਸ਼ਬਦ ਰਚਨਾ

(Shabad Rachna) (4 Weeks)

- ਸਧਾਰਨ ਸ਼ਬਦ (ਕੋਸ਼ੀ ਅਤੇ ਵਿਆਕਰਨਕ ਸ਼ਬਦ) ਅਤੇ ਮਿਸ਼ਰਿਤ ਸ਼ਬਦ (ਧਾਤੂ+ਵਧੇਤਰ)
Sadharan Shabad (Koshi ate Viakarnik Shabad) ate Mishrit Shabad (Dhatu +Vadhatar)
- ਸਮਾਸੀ ਸ਼ਬਦ

Samasi Shabad

- ਸੈਗਾਤੀ ਸ਼ਬਦ (ਤਤਸਮ: ਸੰਸਕ੍ਰਿਤ, ਅਰਬੀ-ਫ਼ਾਰਸੀ ਅਤੇ ਅੰਗਰੇਜ਼ੀ, ਤਦਭਵ: ਸੰਸਕ੍ਰਿਤ, ਅਰਬੀ-ਫ਼ਾਰਸੀ ਅਤੇ ਅੰਗਰੇਜ਼ੀ)

Sugaati Shabad (Tatsam: Sanskrit, Arbi-Faarsi ate Angrezi, Tadbhav: Sanskrit, Arbi-Faarsi ate Angrezi)

Unit III ਸ਼ਬਦ ਜੋੜਾਂ ਦੇ ਨਿਯਮ

(Shabad Jorhaan de Niyam) (4 Weeks)

- ਅੰਤਿਮ ਸਥਿਤੀ ਵਿੱਚ (ੳ, ਅ ਅਤੇ ਏ) ਦੀ ਵਰਤੋਂ
Antim Sathiti vich (Ura, Aira ate Iri) di varton
- (ਨ), (ਣ) ਅਤੇ (ਯ), (ਵ) ਦੀ ਵਰਤੋਂ
(Nanna), (Nana) ate (yayya), (Vava) di varton
- (ਹ, ਰ ਅਤੇ ਵ) ਦੀ ਪੈਰ ਚਿੰਨ੍ਹ ਵਜੋਂ ਵਰਤੋਂ
(Haha, Rara ate Vava) di Pair Chingh Vajon Varton

Unit IV ਵਾਕ ਵਟਾਂਦਰਾ

(Vaak Vatnadra) (3 Weeks)

- ਪੰਜਾਬੀ ਭਾਸ਼ਾ ਦਾ ਵਾਕ ਪ੍ਰਬੰਧ: ਮੁਢਲੀ ਜਾਣ-ਪਛਾਣ
Punjabi Bhasha da Vaak Parbandh: Mudhli Jaan-Pachhaan
- ਸਧਾਰਨ ਵਾਕ ਤੋਂ ਪ੍ਰਸ਼ਨ ਵਾਚਕ ਅਤੇ ਆਗਿਆਵਾਚਕ ਵਿੱਚ ਵਾਕ ਵਟਾਂਦਰਾ
Sadharan Vaak ton Prashan Vachak ate Aagiavachak vich Vaak Vatandra
- ਸਧਾਰਨ ਵਾਕ ਤੋਂ ਨਾਂਹ ਵਾਚਕ ਅਤੇ ਹਾਂ ਵਾਚਕ ਵਿੱਚ ਵਾਕ ਵਟਾਂਦਰਾ
Sadharan Vaak ton Nahn Vachak ate Haan vachak vich Vaak Vatandra

ESSENTIAL READINGS

- **Adhunik Punjabi Viakaran ate lekh rachna (2019)**, Punjab School Sikkhia Board, Sahibzada Ajeet Singh Nagar.

ABILITY ENHANCEMENT COURSE -3 (AEC-3)

PUNJABI BHASHA DA UCHTAM PADHAR

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|--|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Punjabi Bhasha da Uchtam Padhar (AEC-3) | 2 | 2 | 0 | 0 | Class 12 th pass in any subject | Studied Punjabi up to 12 th Standard or Working knowledge of Punjabi language |

Credits: 2

L/T/P= 2/0/0

LEARNING OBJECTIVES:

- This Course is designed for the students who have qualified 10+2 class with Punjabi as a subject or working knowledge of Punjabi Language.
- This course will help to enhance the ability of students in Punjabi writing skill and students will also have enriched in Punjabi language vocabulary.
- Students will understand about correct word formation and different types of Punjabi sentences.
- This course will develop basic ability of translation from Hindi to Punjabi, English to Punjabi and vice versa.
- This course will help students to understand about technical terminology of daily uses in different areas of Punjabi society.
- This course will help students to gain ability of various writing skills that are useful in daily life.

LEARNING OUTCOMES:

- Students will be able to enhance competence of various aspects of Punjabi language.
- After completing this course proficiency of students in Punjabi language will be increased at an advance level.
- Students will be able to understand the complex grammatical structures and specialized vocabulary of Punjabi language.
- Students will be able to understand the linguistic skill of Punjabi language at the advanced level
- After completing this course students will have expertise in translation and writing skills in Punjabi Language.

Unit-I ਸ਼ੁੱਧ ਲਿਖਤ ਅਭਿਆਸ

(Shudh Likhat Abhiyaas) (4 Weeks)

- ਸ਼ਬਦ ਜੋੜਾਂ ਦੇ ਨਿਯਮ: ਸੰਖੇਪ ਜਾਣ-ਪਛਾਣ
Shabad Jorhaan de Niyam: Sankhep Jaan-Pachhaan
- ਸ਼ੁੱਧ ਸ਼ਬਦ ਅਤੇ ਵਾਕ ਲਿਖਣ ਦਾ ਅਭਿਆਸ
Shudh Shabad ate Vaak likhan da Abhiyaas
- ਵਿਸ਼ਰਾਮ ਚਿੰਨ੍ਹਾਂ ਦੀ ਵਰਤੋਂ
Vishraam chinhan di Varton

Unit-II ਅਨੁਵਾਦ ਅਭਿਆਸ

(Anuvad Abhiyaas) (4 Weeks)

- ਅਨੁਵਾਦ ਕਲਾ ਸੰਖੇਪ ਜਾਣ-ਪਛਾਣ
Anuvad Kala Sankhep Jaan-pachhaan
- ਹਿੰਦੀ/ਅੰਗਰੇਜ਼ੀ ਤੋਂ ਪੰਜਾਬੀ ਵਿਚ ਸ਼ਬਦਾਂ ਅਤੇ ਵਾਕਾਂ ਦਾ ਅਨੁਵਾਦ
Hindi/Angrezi ton Punjabi vich Shabadan ate Vaakan da Anuvad
- ਹਿੰਦੀ/ਅੰਗਰੇਜ਼ੀ ਤੋਂ ਪੰਜਾਬੀ ਵਿਚ ਪੈਰੇ ਦਾ ਅਨੁਵਾਦ
Hindi/Angrezi ton Punjabi vich Paire da Anuvad

Unit III ਤਕਨੀਕੀ ਸ਼ਬਦਾਵਲੀ ਅਤੇ ਵਾਕ ਲਿਖਣ ਦਾ ਅਭਿਆਸ

(Takniki Shabadaavli ate Vaak Likhan da Abhiyaas) (4 Weeks)

- ਦਫ਼ਤਰੀ ਸ਼ਬਦਾਵਲੀ
Daftari Shabadaavli
- ਵੱਖ-ਵੱਖ ਵਿਸ਼ਿਆਂ ਨਾਲ ਸੰਬੰਧਤ ਸ਼ਬਦਾਵਲੀ
Vakh-Vakh Visheyan naal Sambandhat Shabadaavli
- ਬੈਂਕ ਸੇਵਾ, ਰੇਲਵੇ ਸੇਵਾ, ਡਾਕ ਵਿਭਾਗ ਸੇਵਾ ਬਾਰੇ ਤਕਨੀਕੀ ਵਾਕ ਲਿਖਣ ਦਾ ਅਭਿਆਸ
Bank Seva, Railway Seva, Dak Vibhag Seva bare Takniki Vaak Likhan da Abhiyaas

Unit IV ਰਚਨਾਤਮਕ ਅਭਿਆਸ

(Rachnatmak Abhiyaas) (3 Weeks)

- ਇਸ਼ਤਿਹਾਰ ਲੇਖਣ ਅਤੇ ਰਿਪੋਰਟ ਲੇਖਣ
Ishtihar Lekhan ate Report Lekhan
- ਚਿੱਠੀ ਅਤੇ ਬਿਨੈ-ਪੱਤਰ ਲੇਖਣ (ਨਿੱਜੀ, ਸਰਕਾਰੀ ਅਤੇ ਵਪਾਰਕ)
Chitthi ate Binae-Pattar Lekhan (Nijji, Sarkaari ate Vapaarak)

ABILITY ENHANCEMENT COURSE (B)
(for those students who have not studies the language)

ASSAMESE
AEC (B)-I

AEC (B)-I: Basic Assamese

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|--|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Assamese | 02 | 2 | 0 | 0 | (for students who have not studied the language) | NIL |

Learning Objectives : Since this course of study is offered to students who don't have prior knowledge of Assamese language hence, to give a basic over view of Assamese language is the main objective of this course. During this course students will be introduced to Assamese sounds and letters and numbering system as well as they will be taught about word formation and framing simple sentences. In this process they will learn how to read, speak, listen and write in that language. Apart from this, this course of study would help the students to learn in multi-lingual background and environment.

Learning outcomes: This course of study will introduce students to a language other than their native language as well as this will increase their multi-lingual abilities. Further this course will lead the learners to study Assamese language in a detailed manner in future which will ultimately help in their professional and technical career.

Allotted classes: 30 hours

Credits: 02

**GUJARATI
AEC (B)-I**

AEC (B)-I: Basic Gujarati

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|--|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Gujarati | 02 | 2 | 0 | 0 | (for students who have not studied the language) | NIL |

Course Learning Objectives : The aim of the course is to teach basic language skills in Gujarati and it intends to facilitate students in acquiring foundational skills of reading, writing and speaking in Gujarati along with synonyms to expand vocabulary. This course is divided into three units and it will cover the basic language structures, the activities and functions normally explored by a beginners' syllabus, i.e. the learning Gujarati syllables, making simple sentence construction and

use the same sentences with fellow students, it goes further, covering situations such as working, studying and including materials focused on the Gujarati media.

Course Learning Outcome: The course will enable the students to obtain the basic skills of reading, writing and speaking in Gujarati along with building up a primary vocabulary. After completing the course, they can read and construct simple Gujarati sentences, figure out words having conjunct character, and can learn functional, everyday conversation in different language usage situations. Students interact with classmates by using simple sentences about their daily routine matters on official and informal occasions.

Allotted classes: 30 hours

Introduction to Noun, Pronoun, Prepositions

Unit -III

Three Weeks

Everyday Vocabulary

Essential/ recommended readings:

Examination scheme and mode: Subject to directions from the Examination Branch/University of Delhi from time to time.

MARATHI
AEC (B)-I: Basic Marathi

AEC (B)-I: Basic Marathi

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|--|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Marathi | 02 | 2 | 0 | 0 | (for students who have not studied the language) | NIL |

Learning Objectives : The course aims to prepare bilingual and multilingual students proficient in translation and interpretation, have sufficient knowledge of at least two languages, the source and the target language, and apply them adequately for all practical purposes. Besides, it also aims to build cross-cultural communications and enables the students to use different skills effectively to prepare themselves to take jobs in translation and interpretation.

Learning outcomes: Students will be able to build various professional, technical, and linguistic skills to take the job of translation and interpretation. Their knowledge in various fields in both the source and the target languages will help them translate in multiple areas and take interpretation

jobs for the different target groups; the translator works with the written material/texts; the interpreter will mediate between languages orally.

Allotted classes: 30 hours

Credits: 02

Marks: 50

Unit -I

Eight Weeks

Introduction to sounds along with sound-images (alphabets and numbers)

Unit -II

Four Weeks

Introduction to Noun, Pronoun, Prepositions

Unit -III

Three Weeks

Everyday Vocabulary

Essential/ recommended readings:

Examination scheme and mode: Subject to directions from the Examination Branch/University of Delhi from time to time.

**TELUGU
AEC (B)-I**

AEC (B)-I: Basic Telugu

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|--|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Telugu | 02 | 02 | 0 | 0 | For students who have not studied the language | NIL |

Learning Objectives

The course aims to teach basic language skills in Telugu, and it intends to facilitate students in acquiring foundational skills of reading, writing and speaking in Telugu along with synonyms to expand vocabulary. This course is divided into three units, and it will cover the basic language structures, the activities and functions generally explored by a beginners' syllabus, i.e. learning Telugu syllables, making simple sentence construction and using the same sentences with fellow students; it goes further, covering situations such as working, studying and including materials focused on the Telugu media, i.e., cinema, television, the press and advertising. Regarding grammar structures, the exercises are at the primary level only.

Learning outcomes:

The course will enable the students to obtain the basic skills of reading, writing and speaking in Telugu, along with building a primary vocabulary. After completing the course, they can read and construct simple Telugu sentences, figure out words with conjunct characters, and learn functional, everyday conversation in different language usage situations. Students interact with classmates by using simple sentences about their daily routine matters on official and informal occasions.

SYLLABUS OF AEC –(B)-I (Marks-50)

Unit -I

Three Weeks

Introduction to Telugu Vowel & Consonant sounds & along with the sound-image

Script introduction

Introduction of Numerals (up to 100)

Unit -II

Seven Weeks

Introduction to Telugu Noun & Pronoun, its Subjunctives

Telugu qualifiers/adjectives

Telugu prepositions

Conjunctions and their usage

Introduction to Verb & Time/Tense

Conjugation of different verbs

Unit -III

Five Weeks

Making simple sentences in Telugu (basic syntactical rules)

Making Negative sentences in Telugu

Making Interrogative sentences in Telugu

Essential/recommended readings:

Arden, A H. *A progressive grammar of the Telugu language*. 2nd ed. Madras: Society for promoting Christian knowledge, 1905.

Krishnamurti, B. and Gwynn, J. P. L. *A Grammar of Modern Telugu*. USA: Oxford University Press, 1986.

Sanjay, D. *Spoken Telugu for Absolute Beginners*. _____: _____, 2019.

Venkatavadhani, Divakarla. *Telugu in Thirty Days*. Hyderabad. Andhra Pradesh Sahitya academy, 2017.

Examination scheme and mode: Subject to directions from the Examination Branch/University of Delhi from time to time.

ABILITY ENHANCEMENT COURSE
Offered by
DEPARTMENT OF ENVIRONMENTAL SCIENCE

AEC 1: Environmental Science: Theory into Practice – I

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department Offering the Course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| AEC 1: Environmental Science: Theory into Practice – I | 02 | 01 | – | 01 | All UG Courses | All UG Courses | Department of Environmental Studies/Sciences |

Learning Objectives

The Ability Enhancement Course on Environmental Science: Theory into Practice (I & II) at Undergraduate level (AEC- I) aims to train students to cater to the need for ecological citizenship through development of a strong foundation on the critical linkages between ecology-society-economy.

The Learning Objectives of this course are as follows:

- **Disciplinary knowledge**
Enable students to develop a comprehensive understanding of various facets of life forms, ecological processes, and the impacts on them by humans during the Anthropocene era.
- **Critical thinking**
Build capabilities to identify relevant environmental issues, analyse the various underlying causes, evaluate the practices and policies, and develop framework to make informed decisions.
- **Moral and ethical awareness/reasoning**
Develop empathy for all life forms, appreciation for the various ecological linkages within the web of life, awareness and responsibility towards environmental protection and nature preservation.

[State the purpose for creating and teaching the course. Describe what the course aims to do from the teacher's perspective.]

Learning outcomes

The Learning Outcomes of this course are as follows.

After the course the students will be empowered and able to:

- Analyse natural processes and resources that sustain life and govern economy.
- Predict the consequences of human actions on the web of life, global economy, and quality of human life.
- Think critically and develop appropriate strategies (scientific, social, economic, administrative, and legal) for environmental protection, conservation of biodiversity, environmental equity, and sustainable development.
- Demonstrate values and show compassionate attitudes towards complex environmental-economic-social challenges, and participate at national and international levels in solving current environmental problems and preventing the future ones.
- Adopt sustainability as a practice in life, society, and industry.

Teaching Learning process

The teaching–learning methodologies are designed to provide the undergraduate students a comprehensive understanding of the subject in a simplistic manner as well as evoke critical reasoning and analytical thinking among them. Some of the theoretical concepts related to practicals/outreach activities, etc. should be covered during practical sessions. The various approaches to teaching–learning process include classroom lectures, video presentations, and ICT enabled teaching tools. Forenhancing practical understanding, field visits are encouraged to relevant places in Delhi like Biodiversity parks, Protected areas, Wetlands, Sewage treatment plants, etc.

SYLLABUS OF AEC-1: Environmental Science: Theory into Practice – I

UNIT – I

(1 -2 Weeks)

Introduction to Environmental Studies (1 lectures and 1 practical/ outreach activities)

- Multidisciplinary nature of environmental studies; components of environment: atmosphere, hydrosphere, lithosphere, and biosphere
- Scope and importance; Concept of sustainability and sustainable development; Brief history of environmentalism

UNIT – II

(3-7 Weeks)

Ecosystems (5 lectures and 7 practical/ outreach activities)

- Definition and concept of Ecosystem
- Structure of ecosystem (biotic and abiotic components); Functions of Ecosystem: Physical (energy flow), Biological (food chains, food web, ecological succession), and Biogeochemical (nutrient cycling) processes. Concepts of productivity, ecological pyramids and homeostasis

- Types of Ecosystems: Tundra, Forest, Grassland, Desert, Aquatic (ponds, streams, lakes, rivers, oceans, estuaries); importance and threats with relevant examples from India
- Ecosystem services (Provisioning, Regulating, Cultural, and Supporting); Ecosystem preservation and conservation strategies; Basics of Ecosystem restoration

UNIT – III

(8-11 Weeks)

Natural Resources (5 lectures and 6 practical/ outreach activities)

- Land resources: Minerals, soil, agricultural crops, natural forest products, medicinal plants, and forest-based industries and livelihoods; Land cover, land use change, land degradation, soil erosion, and desertification; Causes of deforestation; Impacts of mining and dam building on environment, forests, biodiversity, and tribal communities
- Water resources: Natural and man-made sources; Uses of water; Over exploitation of surface and ground water resources; Floods, droughts, and international & inter- state conflicts over water
- Energy resources: Renewable and non-renewable energy sources; Use of alternate energy sources; Growing energy needs; Energy contents of coal, petroleum, natural gas and bio gas; Agro-residues as a biomass energy source
- Case studies: Contemporary Indian issues related to mining, dams, forests, energy, etc (e.g., National Solar Mission, Cauvery River water conflict, Sardar Sarovar dam, Chipko movement, Appiko movement, Tarun Bharat Sangh, etc)

UNIT – IV

(12-15 Weeks)

Environmental Pollution and Control (4 lectures and 6 practical/ outreach activities)

- Environmental pollution (Air, water, soil, thermal, and noise): causes, effects, and controls; Primary and secondary air pollutants; Air and water quality standards
- Nuclear hazards and human health risks
- Solid waste management: Control measures for various types of urban, industrial waste, Hazardous waste, E-waste, etc; Waste segregation and disposal
- Pollution control measures: Introduction to legal, biological, and physico-chemical methods; Role in sustainability
- Pollution case studies: Ganga Action plan (GAP), Delhi air pollution and public health issues, Plastic waste management rules, Bhopal gas tragedy, etc

(The total number of weeks should add up to 15 only)

Practical component (if any) –

(15 Weeks)

Unit I

Introduction to Environmental Studies (1 practical/ outreach activity)

Practical/Exercises/Experiential activities/Outreach activities

(College may choose as per requirement)

- Analysis of achievement of Sustainable Development Goals of any country.
- Gain insights of sustainability framework for an industrial activity using activity worksheets
- Use of environmental activity worksheets to understand interdependence and interactions between different environmental components.

Unit 2

Ecosystems (7 practical/ outreach activities)

Practical/Exercises/Experiential activities/Outreach activities

(College may choose as per requirement)

- Schematic collection of data for depicting ecological pyramids in the College campus
- Differentiation of natural and managed ecosystems using Google Earth/Google Map
- Field visit to terrestrial and aquatic ecosystems (a) forests, (b) grasslands, (c) wetlands, (d) biodiversity parks, etc.
- Develop a working model of any ecosystem
- Use of worksheets to identify structure and function of different ecosystems.

Unit 3

Natural Resources (6 practical/ outreach activities)

Practical/Exercises/Experiential activities/Outreach activities (College may choose as per requirement)

- Visit to a paper recycling unit/rainwater harvesting plant/solar plant/biogas plant in the College campus
- Develop and understand working model of renewable/non-renewable sources of energy
- Mapping of natural resources of a given study area using Google Earth
- Time-series analysis of natural resource consumption of a given country using publicly available data
- Comparison of energy demand and consumption of a particular state over the years using graphical tools
- Assessing the consumption pattern of a natural resource in the dominant industry at local scale and status of natural resource in areas supplying it

Unit 4

Environmental Pollution (6 practical/ outreach activities)

Practical/Exercises/Experiential activities/Outreach activities

(College may choose as per requirement)

- Determine water quality of a given location using rapid pollution monitoring kits
- Assess air quality index (AQI) of any location using real-time air quality parameters
- Determine magnitude of solid waste generated in a home/college on a monthly basis
- Develop and maintain compost/vermicompost using biodegradable waste in the College
- Identify suitability of given water samples for various purposes using given kits
- Prepare water audit report of the college/house/locality/colony.
- Map solid and liquid discharge of the college/colony and develop a management plan

(show it using schematic diagram, and photographs.

- Repurpose waste for economic and environmental benefits in your college/near by area/colony (submit a small video).
- Analyze river-society-economy nexus based on primary or secondary data (use quantitative data, and show it using photographs on a poster).

Essential/recommended readings

Unit 1

Introduction to Environmental Studies

1. Raven, P.H, Hassenzahl, D.M., Hager, M.C, Gift, N.Y., and Berg, L.R. (2015). *Environment*, 8th Edition. Wiley Publishing, USA. **Chapter 1** (Pages: **1-17**); **Chapter 2** (Pages: **22-23**); **Chapter 3** (Pages: **40, 41**); **Chapter 4** (Pages: **64, 66**).
2. Singh, J.S., Singh, S.P., and Gupta, S.R. (2017). *Ecology, Environmental Science and Conservation*. S. Chand Publishing, New Delhi. **Chapter 1** (Page: **3-28**).

Unit 2

Ecosystems

1. Odum, E.P., Odum, H.T., and Andrews, J. (1971). *Fundamentals of Ecology*. Saunders, Philadelphia, USA. **Chapter 1** (Pages: **1-16**); **Chapter 2** (Pages: **18-76**); **Chapter 10** (Pages: **414-458**).

3. प्रयोजनमूलक हिन्दी: सिद्धांत और प्रयोग: दंगल झाल्टे
4. प्रशासनिक हिन्दी: हरिमोहन, तक्षशिला प्रकाशन
5. राजभाषा हिंदी और उसका विकास: हीरालाल बाछोतिया, किताबघर प्रकाशन

मूल्यांकन पद्धति: (Assessment Method)

- कुल अंक : 50
- लिखित परीक्षा : 38 अंक
- आंतरिक मूल्यांकन: 12 अंक

AEC 3 :सोशल मीडिया और ब्लॉग लेखन (हिन्दी ग)

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course | Department Offering the Course |
|---------------------------|---------|-----------------------------------|----------|---------------------|--|--|--------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | | |
| सोशल मीडिया और ब्लॉग लेखन | 02 | 2 | -- | --- | हिंदी - ग (उन विद्यार्थियों के लिए जिन्होंने 8 वीं कक्षा तक हिंदी पढ़ी है।) | हिंदी - ग (उन विद्यार्थियों के लिए जिन्होंने 8 वीं कक्षा तक हिंदी पढ़ी है।) | हिन्दी |

पाठ्यक्रम का उद्देश्य (Course Objectives)

- हिंदी सोशल मीडिया के विभिन्न माध्यमों की जानकारी
- सोशल मीडिया की कार्यशैली की समझ
- सोशल मीडिया के महत्व और प्रभाव से मूल्यांकन
- ब्लॉग बनाना और लेखन
- सोशल मीडिया का व्यावहारिक ज्ञान

पाठ्यक्रम अधिगम प्रतिफल (Course Learning Outcomes):

- सोशल मीडिया प्लेटफॉर्म की जानकारी मिलेगी।
- सोशल मीडिया की कार्य-शैली की समझ विकसित होगी।
- ब्लॉग लेखन करने के साथ हिंदी के प्रमुख ब्लॉगों का अध्ययन और विश्लेषण कर सकेंगे।
- सोशल मीडिया के महत्व और उसकी भूमिका को रेखांकित कर सकेंगे।

- विद्यार्थी सोशल मीडिया पर कार्य करना सीख सकेंगे

SYLLABUS OF AEC-3

इकाई 1. सोशल मीडिया और ब्लॉग

- सोशल मीडिया : अर्थ और परिभाषा
- सोशल मीडिया का प्रभाव और महत्व
- सोशल मीडिया के प्रकार (विकीपीडिया, ब्लॉग, सोशल नेटवर्किंग साइट्स, ट्विटर, यूट्यूब, इंस्टाग्राम आदि)
- ब्लॉग लेखन: सामान्य परिचय

इकाई 2: सोशल मीडिया का व्यावहारिक पक्ष

- किसी सामाजिक अभियान के प्रचार के लिए सोशल मीडिया हेतु एक विज्ञापन तैयार करना
- अपना निजी ब्लॉग तैयार करने की प्रक्रिया
- सोशल मीडिया से बनने वाली किसी खबर पर रिपोर्ट तैयार करना
- सोशल मीडिया से सम्बन्धित विविध विषयों पर आलेख तैयार करना

सहायक पुस्तकें :

1. सामाजिक मीडिया और हम: रवीन्द्र प्रभात, नोशन प्रेस
2. सोशल मीडिया: स्वर्ण सुमन, हार्पर कॉलिन्स पब्लिशर इण्डिया
3. भूमंडलीकरण और मीडिया: कुमुद शर्मा
4. मीडिया और हिन्दी: बदलती प्रवृत्तियाँ: रविन्द्र जाधव, वाणी प्रकाशन
5. रेडियो लेखन, मधुकर गंगाधर, बिहार हिंदी ग्रंथ अकादमी, पटना, प्रथम संस्करण- 1974
6. रेडियो वार्ता शिल्प, सिद्धनाथ कुमार, राधाकृष्ण प्रकाशन, नई दिल्ली, प्रथम प्रकाशन- 1992

मूल्यांकन पद्धति: (Assessment Method)

- कुल अंक : 50
- लिखित परीक्षा : 38 अंक
- आंतरिक मूल्यांकन: 12 अंक

ABILITY ENHANCEMENT COURSE
Offered by
DEPARTMENT OF SANSKRIT

AEC 1: Sanskrit A: Advance Neeti Literature in Sanskrit

BSc-PE-DSC– 2(4): ANATOMY AND PHYSIOLOGY

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| ANATOMY AND PHYSIOLOGY | 4 | 3 | 0 | 1 | Pass in XII | NIL |

Learning Objectives

To provide students with the basic knowledge of anatomical structures & functions of human body.

Learning outcomes

The Learning Outcomes of this course are as following

- Student will acquire the basic knowledge of the anatomy of the human body.
- They will develop understanding about the functions of each system of the body.

- Such core knowledge and skill will help to create a strong foundation to engage human subject of all ages, sex, ability.

SYLLABUS OF DSC- 2

THEORY SYLLABUS

Unit-I

(10 hrs.)

- Definition of Anatomy & Physiology, Cell-microscopic structure & functions of its organelle.
- Tissue-classification & functions.
- Organs, systems of the body, Bone- classification and structure, joints-classification, Structure of synovial joints. Movements at various joints.

Unit-II

(15 hrs.)

- Muscular System -Classification, Structure, functions & properties of Skeletal Muscle, Smooth Muscle & Cardiac Muscle.
- Types of muscular contractions, Name of various muscles acting on various joints.
- Cardio-vascular system Structure of heart, cardiac cycle, blood pressure, cardiac output, composition& function of blood, Athlete's heart.

Unit-III

(10 hrs.)

- Respiratory system-structure and function, second wind, oxygen debt.
- Digestive system-structure & function, balanced diet, metabolism & maintenance of body temperature.

Unit-IV

(10 hrs.)

- Nervous system-structure of brain, spinal cord, Autonomic nervous system, reflex action.
- Endocrine system- role of various endocrine glands, Structure& function of human eye & ear.
- Excretory system-structure & function, including structure & function of skin.
- Reproductive system- structure & function of male & female Reproductive system.

Practicals:-

(30 hrs.)

1. Counting of pulse rate
2. Measurement of blood pressure
3. Study of various bones of human body
4. Study of different body system with the help of models
5. Study of various movements of the joints.

BSc-PE-DSC-3(4): Optional Game 1 (Choose any one from the list)
BSc-PE-DSC-3(4)-101: ATHLETICS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| ATHLETICS | 4 | 2 | 0 | 2 | Pass in XII | NIL |

Learning Objectives

Giving knowledge and understanding of a specific sport in which an individual wishes to excel in.

Learning outcomes

The Learning Outcomes of this course are as follows:

Learning Outcome:-The student will attain knowledge, understanding, interpreting and analyzing proficiency in a game of one's choice.

After the Completion of First Month:

The student will be able to gain knowledge with respect to Historical Development, Organizational Structure and Playfield Technology of the respective sport/game.

After the Completion of Second Month:

A student will be able to understand and interpret the rules of game as well as game knowledge in the areas of psychological basis of Warming up and technical aspects of coaching.

After the Completion of Third Month:

A student will be able to learn and acquire various skills of sports, gain knowledge about different tests of fitness and skill evaluation as well as the evaluation of player's performance. The technical practice of sprint races, middle and long distance races, hurdles races, jumping event- long jump, throwing events- shot put, hammer throw.

After the Completion of Fourth Month:

A student will be learning about various fitness components and its forms. Further, the student will be able to practice and improve performance on the basis of knowledge gained in understanding various fitness components. Track marking and marking of different arenas for selected events in unit-III.

THEORY SYLLABUS

Unit-I

(07 lectures)

- Historical Development and Modern Trends (National and International Level)

- Organisational Structure (State, National and International Level)
- Playfield Technology – Marking and Construction of the playfields.

Unit-II (07 lectures)

- Rules and their interpretation of the sport.
- Warming up and psychological basis of Warming up.
- Cooling down and its effect.
- Techniques of Coaching – Pep talk, Pre, during and Post match competition Coaching.

Unit-III (08 lectures)

- Basic skills and techniques of the Sports/Game- – sprint races, middle and long distance races, hurdles races, jumping event- long jump, throwing events- shot put, hammer throw.
- Motor Fitness Components Testing
- Skill/Technique Evaluation
- Evaluation of Player's Performance.

Unit-IV (08 lectures)

- Introduction to Physical and Motor Fitness components related to sport: Strength, Speed, Endurance, Coordinative Abilities and Flexibility.
- Track marking and marking of different arenas for selected events in unit-III.

Practical - 60 hrs.

1. Learning and demonstrating various skills/techniques of sports- sprint races, middle and long distance races, hurdles races, jumping event- long jump, throwing events- shot put.
2. Learning to demonstrate various tests to evaluate motor components as listed in unit IV above.
3. Track marking and marking of different arenas for selected events in unit-III.

BSc-PE-DSC-3(4): Optional Game 1 (Choose any one from the list)
BSc-PE-DSC-3(4)-109: JUDO

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| JUDO | 4 | 2 | 0 | 2 | Pass in XII | NIL |

Learning Objectives

Objective: - The Students will acquire knowledge and understanding of a specific sport in which an individual wishes to excel.

Learning outcomes

Learning Outcome:-The student will attain knowledge, understanding, interpreting and analyzing proficiency in a game of one's choice.

After the Completion of First Month:

A student will be able to gain knowledge with respect to Historical Development, Organisational Structure and Playfield Technology of a sport/game.

After the Completion of Second Month:

A student will be able to understand and interpret the rules of game as well as game knowledge in the areas of physiological basis of Warming up and technical aspects of coaching.

After the Completion of Third Month:

A student will be able to learn and acquire various skills of sports/game, gain knowledge about different techniques evaluation as well as the evaluation of player's performance.

After the Completion of Fourth Month:

A student will be learning about various fitness components and its forms. Further, the student will be able to practice and improve performance on the basis of knowledge gained in understanding various fitness components and its testing.

THEORY SYLLABUS

Unit-I

(07 hrs)

- Historical Development and Modern Trends (National and International Level)
- Organisational Structure (State, National and International Level)
- Playfield Technology – Marking and Construction of the playfields.

Unit-II

(07 hrs)

- Rules and their interpretation.

- Warming up and physiological basis of Warming up and it's effect on performance.
- Cooling down and its effect.
- Techniques of Coaching – Pep talk, Pre, During and Post match Coaching.

Unit-III

(08 hrs)

- Basic skills and techniques of the Sports/Game.
- Skill/Technique Evaluation
- Evaluation of Player's Performance.

Unit-IV

(08 hrs)

- Introduction to Physical and Motor Fitness components: Strength, Speed, Endurance, Coordinative Abilities and Flexibility.
- Motor Fitness Components Testing of above components.

Practical -

(60 hrs.)

1. Learning and demonstrating various skills/techniques of sports.
2. Learning to demonstrate various tests to evaluate motor components as listed in unit IV above.

SUGGESTED READINGS

1. Bompa O. Tudor and Halff G. Gregory. (2009) "Periodization Theory and Methodology of Training" Human kinetics. NY.

BSc-PE-DSC-3(4): Optional Game 1 (Choose any one from the list)
BSc-PE-DSC-3 (4)-113: YOGA

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| YOGA | 4 | 2 | 0 | 2 | Pass in XII | NIL |

Learning Objectives

Objective:-The Students will acquire knowledge and understanding of a specific sport in which an individual wishes to excel.

Learning outcomes

Learning Outcome:-The student will attain knowledge, understanding, interpreting and analyzing proficiency in a game of one's choice.

After the Completion of First Month:

The Students will develop the understanding and knowledge of Origin of yoga, definition and scope of yoga, limitations and misconceptions, importance of yoga in physical education and other fields, Yoga asana completion at:- State, National, International, SGFI, AIU etc. Philosophical aspects of Yog. Pre-Vedic, Vedic period; Buddhism, Upanishad period, Jainism & tantra, qualifications, qualities and responsibilities of a coach, Duties/responsibilities of technical official, Scoring system and judgment criteria, Protocols for referees, judges and officials.

The student will learn about the prayer.

After the Completion of Second Month:

The Students will develop the understanding and knowledge of Meaning, techniques, precautions & effects of the following:-Asanas : padmasana, vajrasana, sidhasana, paschimottanasa, halasana, sarvangasana, shalabhasana, ardh- matsyendrasana, bhujangasana, tadasana, vrikshasana, matsyasana, gomukhasana, ushtrasana, shavasana, makarasana, vrishchikasana, dhanurasana, purna matsyendrasana, chakrasana, ek pad sikandasana, bakasana, mayurasana, shirshasanaPranayama : anulom-vilom, bhastrika, suryabhedhen pranayama, sheetali, sheetkari, bhramari, ujjayiShatkarma : neti, dhauti, nauli, basti, kunjla, kapal bhati, shankh prakshalanaBandhas : jalandhar, uddyana, mool bandha.

The student will be able to perform Asanas, pranayama, shatkarma, bandha.

After the Completion of Third Month:

The Students will gain knowledge of Disease wise treatment through yoga therapy- Asthma, high & low B.P, diabetes, obesity, heart disease, insomnia, arthritis, backache & female disease.

The student will learn Yoga-nidra/relaxation techniques

After the Completion of Fourth Month:

The Students will gain knowledge of Diet & constitution, components of nutrition, water, natural diet, balanced diet, fasting-its benefits, types & preparation. Importance of vegetarianism in yogic diet.

The student will learn Visit to yoga centers/institutes

THEORY SYLLABUS**UNIT-I****(07 hrs)**

- Origin of yoga, definition and scope of yoga, limitations and misconceptions of Yoga
- Importance of yoga in physical education and other fields
- Yoga asana competition at:- State, National, International, SGFI, AIU etc.

UNIT-II**(07 hrs)**

- Philosophical aspects of yoga-Pre-Vedic, Vedic period; Buddhism, Upanishad period, Jainism & tantra
- Qualifications, qualities and responsibilities of a coach,
- Duties/responsibilities of technical official, Scoring system and judgment criteria,
- Protocols for referees, judges and officials.

UNIT-III**(08 hrs)**

- Meaning, techniques, precautions & effects of the following:-
- Asanas : padmasana, vajrasana, sidhasana, paschimottanasa, halasana, sarvangasana, shalabhasana, ardh- matsyendrasana, bhujangasana, tadasana, vrikshasana, matsyasana, gomukhasana, ushtrasana, shavasana, makarasana, vrishchikasana, dhanurasana, purna matsyendrasana, chakrasana, ek pad sikandasana, bakasana, mayurasana, shirshasana
- Pranayama : anulom-vilom, bhastrika, suryabhedhen pranayama, sheetali, sheetkari, bhramari, ujjayi
- Shatkarma : neti, dhauti, nauli, basti, kunjla, kapal bhati, shankh prakshalana
- Bandhas : jalandhar, uddiyana, mool bandha

UNIT-IV**(08 hrs)**

- Disease wise treatment through yoga therapy- Asthma, high & low B.P, diabetes, obesity, heart disease, insomnia, arthritis, backache & female disease
- Diet & Nutrition, components of nutrition, water, natural diet, balanced diet, fasting-its benefits, types & preparation, importance of vegetarianism in yogic diet.

PRACTICALS**(60 hrs.)**

1. Prayer
2. Asanas, pranayama, shatkarma, bandha (as mentioned in theory)
3. Yoga-nidra/relaxation techniques
4. Visit to yoga centers/institutes

BA (Prog.) Physical Education in the Field of Multidisciplinary Studies (Major)

B.A.-PE-DSC-1-(4)-1.1- HISTORY AND FOUNDATIONS OF PHYSICAL EDUCATION

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| HISTORY AND FOUNDATIONS OF PHYSICAL EDUCATION | 4 | 3 | 1 | 0 | Pass in XII | NIL |

Learning Objectives

Objective: To provide the knowledge of historical development of physical education and sports and to familiarize the students with the philosophical, biological, psychological and sociological foundations of physical education.

Learning outcomes

1. The learners will be able to conceptualize about physical education and sports.
2. The learners will develop the factual knowledge of the existing various terminologies and information.
3. The learners will be able to comprehend the historical perspectives and recent developments in the field of physical education and sports.
4. The learners will be able to understand the multi-disciplinary foundations of physical education and sports.

SYLLABUS

Unit-1: Introduction to Physical Education and Sports and General Awareness (15 Hours)

1. Meaning and Definition of Physical Education
2. Aim and Objectives of Physical Education
3. Physical Education as an Art and/or Science
4. Significance of Physical Education in the Modern Society
5. Meaning and Definition of Sports, Types of Sports–Individual, Team, Combative, Recreational etc.

Unit-2: Growth and Development of Physical Education and Sports (15 Hours)

1. History of Physical Education and Sports in the World : Greece, Rome, Sweden, Germany and Denmark
2. Growth and Development of Physical Education in India(Pre and post-Independence)

3. Various Schemes for Promotion of Sports in India

Unit-3: Major Competitions at National and International Level (15 Hours)

1. Major Sports Competitions at International Level: Olympics Games (Summer, Winter and Paralympics), Asian Games, Commonwealth Games, SAF Games, World Cups, World Universities
2. Major Sports Competitions at National Level: National Games, Khelo India University Games (KIUG), Khelo India Youth Games (KIYG), Inter-University (All India & Zonal) Competitions, National Championships
3. Prominent Honours and Awards in Games and Sports in India, Different Cups and Trophies at National and International level in different Sports.
4. Structure and functions of regulatory bodies of various games and sports at International level–International Olympic Committee (IOC), International Sports Federations (ISFs), International Cricket Council (ICC), World Anti-Doping Agency (WADA)

Unit-4: Foundations of Physical Education (15 Hours)

1. Philosophical Foundations of Physical Education: Idealism, Pragmatism, Naturalism, Realism
2. Biological Foundations of Physical Education: Growth and Development, Age and Gender Characteristics, Body Types, Anthropometric differences
3. Psychological Foundations of Physical Education: Learning types, Learning Curves, Laws of Learning, Attitude, Interest, Cognition, Emotions and Sentiments
4. Sociological Foundations of Physical Education: Society and Culture, Social Acceptance and Recognition, Leadership, Social Integration and Cohesiveness

DSC-1-(4)-1.2-STRUCTURE AND FUNCTIONS OF SPORTS BODIES/ORGANISATIONS

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|----------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical / Practice | | |
| STRUCTURE AND FUNCTIONS OF SPORTS BODIES /ORGANIZATIONS | 4 | 3 | 1 | 0 | Pass in XII | NIL |

Learning Objectives

Objective: To familiarize the students with the major sports competitions, professional training institutions in India along with the structure and functions of various sports bodies/ organizations.

Learning Outcomes of the Paper:

1. The learners will know about the existing sports competitions in India and the world.
2. The learners will develop the factual knowledge about the professional preparation in the field of physical education and sports in India.
3. The learners will be acquainted with the organization structure of various sports bodies.
4. The learners will be able to develop an understanding of the functioning of various sports bodies/ organizations at national and international level.

Unit-1: Major Sports Competitions at International and National Level (15 Hours)

1. Olympic Games (Summer, Winter and Paralympics)
2. Asian Games, Commonwealth Games, SAF Games,
3. World Cups, World Universities, World Championships
4. National Games, National Championships
5. Khelo India University Games (KIUG), Inter-University (All India & Zonal) Competitions
6. Major International and National League Tournaments

Unit-2: Institutes for Professional Preparation of Physical Education and Sports in India (15 Hours)

1. Young Men Christian Association (YMCA)
2. Lakshmibai National Institute of Physical Education (LNIPE)
3. Indira Gandhi Institute of Physical Education and Sports Sciences (IGIPES)
4. Hanuman Vyayam Prasarak Madal, Amravati (HVPM)
5. Netaji Subhash National Institute of Sports (NSNIS)

Unit-3: Structure and Functions of International Sports Bodies/ Organizations (15 Hours)

1. International Olympic Committee (IOC)
2. International Paralympic Committee (IPC)
3. Olympic Council of Asia (OCA)
4. Commonwealth Games Federation (CGF)
5. South Asian Federation Games (SAFG)
6. International Sports Federations (ISFs)
7. International University Sports Federation (FISU)
8. World Anti-Doping Agency (WADA)

Unit-4: Structure and Functions of National Sports Bodies/ Organizations (15 Hours)

1. Indian Olympic Association (IOA)
2. Ministry of Youth Affairs and Sports (MYAS)
3. Sports Authority of India (SAI)
4. Association of Indian Universities (AIU)
5. National Sports Federations (NSFs)
6. National Anti-Doping Agency (NADA)

Practical : (30 Hours)

1. Visit to organizations and preparations of atleast two reports.

Suggested Readings :

1. History of Physical Education and Sports in the World : Greece, Rome, Sweden, Germany and Denmark
2. Growth and Development of Physical Education in India(Pre and post-Independence)
3. Various Schemes for Promotion of Sports in India

Unit-3: Major Competitions at National and International Level (15 Hours)

1. Major Sports Competitions at International Level: Olympics Games (Summer, Winter and Paralympics), Asian Games, Commonwealth Games, SAF Games, World Cups, World Universities
2. Major Sports Competitions at National Level: National Games, Khelo India University Games (KIUG), Khelo India Youth Games (KIYG), Inter-University (All India & Zonal) Competitions, National Championships
3. Prominent Honours and Awards in Games and Sports in India, Different Cups and Trophies at National and International level in different Sports.
4. Structure and functions of regulatory bodies of various games and sports at International level—International Olympic Committee (IOC), International Sports Federations (ISFs), International Cricket Council (ICC), World Anti-Doping Agency (WADA)

Unit-4: Foundations of Physical Education (15 Hours)

1. Philosophical Foundations of Physical Education: Idealism, Pragmatism, Naturalism, Realism
2. Biological Foundations of Physical Education: Growth and Development, Age and Gender Characteristics, Body Types, Anthropometric differences
3. Psychological Foundations of Physical Education: Learning types, Learning Curves, Laws of Learning, Attitude, Interest, Cognition, Emotions and Sentiments
4. Sociological Foundations of Physical Education: Society and Culture, Social Acceptance and Recognition, Leadership, Social Integration and Cohesiveness

DSC-1-(4)-1.1- HISTORY AND FOUNDATIONS OF PHYSICAL EDUCATION

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| HISTORY AND FOUNDATIONS OF PHYSICAL EDUCATION | 4 | 3 | 1 | 0 | Pass in XII | NIL |

Learning Objectives

Objective: To provide the knowledge of historical development of physical education and sports and to familiarize the students with the philosophical, biological, psychological and sociological foundations of physical education.

Learning outcomes

Learning Outcomes of the Paper:

1. The learners will be able to conceptualize about physical education and sports.
2. The learners will develop the factual knowledge of the existing various terminologies and information.
3. The learners will be able to comprehend the historical perspectives and recent developments in the field of physical education and sports.
4. The learners will be able to understand the multi-disciplinary foundations of physical education and sports.

Unit-1: Introduction to Physical Education and Sports and General Awareness (15 Hours)

1. Meaning and Definition of Physical Education
2. Aim and Objectives of Physical Education
3. Physical Education as an Art and/or Science
4. Significance of Physical Education in the Modern Society
5. Meaning and Definition of Sports, Types of Sports–Individual, Team, Combative, Recreational etc.

Unit-2: Growth and Development of Physical Education and Sports (15 Hours)

1. History of Physical Education and Sports in the World : Greece, Rome, Sweden, Germany and Denmark
2. Growth and Development of Physical Education in India(Pre and post-Independence)
3. Various Schemes for Promotion of Sports in India

Unit-3: Major Competitions at National and International Level (15 Hours)

1. Major Sports Competitions at International Level: Olympics Games (Summer, Winter and Paralympics), Asian Games, Commonwealth Games, SAF Games, World Cups, World Universities
2. Major Sports Competitions at National Level: National Games, Khelo India University Games (KIUG), Khelo India Youth Games (KIYG), Inter-University (All India & Zonal) Competitions, National Championships
3. Prominent Honours and Awards in Games and Sports in India, Different Cups and Trophies at National and International level in different Sports.
4. Structure and functions of regulatory bodies of various games and sports at International level–International Olympic Committee (IOC), International Sports Federations (ISFs), International Cricket Council (ICC), World Anti-Doping Agency (WADA)

Unit-4: Foundations of Physical Education (15 Hours)

1. Philosophical Foundations of Physical Education: Idealism, Pragmatism, Naturalism, Realism
2. Biological Foundations of Physical Education: Growth and Development, Age and Gender Characteristics, Body Types, Anthropometric differences
3. Psychological Foundations of Physical Education: Learning types, Learning Curves, Laws of Learning, Attitude, Interest, Cognition, Emotions and Sentiments
4. Sociological Foundations of Physical Education: Society and Culture, Social Acceptance and Recognition, Leadership, Social Integration and Cohesiveness

SUGGESTED READINGS

1. Graham, G. (2001), Teaching Children Physical Education: Becoming a Master Teacher. Human Kinetics, Champaign, Illinois, USA.
2. Kamlesh, M.L. & Singh, M. K. (2006), Physical Education (Naveen Publications).

DSC-1-(4)-1.2-STRUCTURE AND FUNCTIONS OF SPORTS BODIES/ ORGANISATIONS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|----------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical / Practice | | |
| STRUCTURE AND FUNCTIONS OF SPORTS BODIES/ ORGANISATIONS | 4 | 3 | 1 | 0 | Pass in XII | NIL |

Learning Objectives

Objective: To familiarize the students with the major sports competitions, professional training institutions in India along with the structure and functions of various sports bodies/ organizations.

Learning outcomes

Learning Outcomes of the Paper:

1. The learners will know about the existing sports competitions in India and the world.
2. The learners will develop the factual knowledge about the professional preparation in the field of physical education and sports in India.
3. The learners will be acquainted with the organization structure of various sports bodies.
4. The learners will be able to develop an understanding of the functioning of various sports bodies/ organizations at national and international level.

Unit-1: Major Sports Competitions at International and National Level (15 Hours)

1. Olympic Games (Summer, Winter and Paralympics)
2. Asian Games, Commonwealth Games, SAF Games,
3. World Cups, World Universities, World Championships
4. National Games, National Championships
5. Khelo India University Games (KIUG), Inter-University (All India & Zonal) Competitions
6. Major International and National League Tournaments

Unit-2: Institutes for Professional Preparation of Physical Education and Sports in India (15 Hours)

1. Young Men Christian Association (YMCA)
2. Lakshmibai National Institute of Physical Education (LNIPE)
3. Indira Gandhi Institute of Physical Education and Sports Sciences (IGIPES)
4. Hanuman Vyayam Prasarak Madal, Amravati (HVPM)

5. Netaji Subhash National Institute of Sports (NSNIS)

Unit-3: Structure and Functions of International Sports Bodies/ Organizations (15 Hours)

1. International Olympic Committee (IOC)
2. International Paralympic Committee (IPC)
3. Olympic Council of Asia (OCA)
4. Commonwealth Games Federation (CGF)
5. South Asian Federation Games (SAFG)
6. International Sports Federations (ISFs)
7. International University Sports Federation (FISU)
8. World Anti-Doping Agency (WADA)

Unit-4: Structure and Functions of National Sports Bodies/ Organizations (15 Hours)

1. Indian Olympic Association (IOA)
2. Ministry of Youth Affairs and Sports (MYAS)
3. Sports Authority of India (SAI)
4. Association of Indian Universities (AIU)
5. National Sports Federations (NSFs)
6. National Anti-Doping Agency (NADA)

Practical : (30 Hours)

1. Visit to organizations and preparations of atleast two reports.

Suggested Readings :

1. Graham, G. (2001), Teaching Children Physical Education: Becoming a Master Teacher. Human Kinetics, Champaign, Illinois, USA.
2. Kamlesh, M.L. & Singh, M. K. (2006), Physical Education (Naveen Publications).
3. Lau, S.K. (1999), Great Indian players, New Delhi, Sports Publications
4. Lumpkin, A. (2007), Introduction to Physical Education, Exercise Science and Sports Studies, McGraw Hill, New York, U.S.A.
5. Shaffer, D.R. (2002), Developmental Psychology: Childhood and Adolescence. Thomson, Sydney, Australia.
6. Sharma K. (2014), *Sharirik Shiksha Ka Itihas*, Friends Publications (India), New Delhi.
7. Siedentop, D. (2004), Introduction to Physical Education, Fitness and Sport, McGraw Hill Companies Inc., New York, USA.
8. Singh, A. et.al. (2000), Essentials of Physical Education, Kalyani Publishers, Ludhiana, Punjab.
9. Wuest, D.A. & C.A. Bucher (2006), Foundations of Physical Education, Exercise Science, and Sports. McGraw Hill Companies, Inc., New York, USA.
10. Websites of concerned organizations.

GE Paper: FITNESS & WELLNESS SEMESTER-I

GE : FITNESS & WELLNESS

| Course Title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-Requisite of the Course (if any) |
|---------------------|---------|-----------------------------------|----------|--------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/Practice | | |
| Fitness & Wellness | 04 | 3 | 0 | 1 | XII class pass | NIL |

Learning Objectives:

1. To impart the knowledge and practices about the fitness components and health.
2. The learner will learn and practice about the subject and their health benefits for normal and challenged population.
3. To develop the practical knowledge of learners, with applications and analysis of various laboratory testing, physiological testing, stress management, survey project for fitness and wellness of the local community and nutritional diet analysis.

Learning Outcomes:

1. The learners will be able to analyze and correlate the components of physical fitness, principles of physical fitness and benefits of fitness programmes.
2. The learners will be able to apply the knowledge regarding causes and prevention of obesity; and weight management guidelines to lead a better quality of life.
3. The learner will be able to analyze, correlate and evaluate in regard to fitness profile, development and maintenance of the player including types of motor components, principles of physical fitness, benefits of fitness program, causes and prevention of obesity and weight management.
4. The learner will be able to identify, apply and correlate different aspects of wellness including identifying dimensions of wellness, achieving and maintenance of wellness, identifying stressors and managing stress, relationship of wellness towards positive lifestyle and benefits of wellness.
5. The learner will be able to describe, apply, correlate and measure different aspects of behavior modification in regard to barriers to change, six stages of SMART, technique of change & smart goal setting with healthy lifestyle approach adaptation.
6. The learner will be able to describe, apply, correlate and measure different aspects of daily schedule of achieving quality of life and wellness in regard to daily schedule (based upon one's attitude, gender, age & occupation), basic module (time split for rest, sleep, diet, activity & recreation), principles to achieve quality of life including positive attitude, daily regular exercise, control over food habits & healthy hygienic practices.

THEORY SYLLABUS

- UNIT – I** INTRODUCTION (8 hrs lectures)
- 1.1 Concept and meaning of fitness and wellness
 - 1.2 Components of fitness and their description
 - 1.3 Components of wellness and their description
 - 1.4 Significance of fitness and wellness in present scenario.
 - 1.5 Fitness and wellness for life
- UNIT – II** FITNESS PROFILE, DEVELOPMENT AND MAINTAINENCE OF FOLLOWING (10 hrs lecture)
- 2.1 Types :- physical (cardio respiratory, strength, speed agility, flexibility, power, muscular endurance) health related (cardio-respiratory, flexibility, body composition, muscular strength and endurance) motor skill related (speed, power, agility, coordination, endurance, balance)
 - 2.2 Principals of physical fitness
 - 2.3 Benefits of fitness programme
 - 2.4 Obesity (causes and prevention)
 - 2.5 Weight management (role of diet & exercise in maintenance of ideal weight)
- UNIT – III** WELLNESS (12 hrs lectures)
- 3.1 Identifying dimensions of wellness, achieving and maintenance of wellness
 - Adopting healthy & positive lifestyle.
 - Identifying stressors and managing stress
 - Staying safe & preventing injuries
 - Knowledge of Nutrition & its implication on healthy lifestyle
 - Factors leading to eating disorders
 - Hazards of substance abuse (smoking, alcohol & tobacco)
 - Adoption of spirituality principals & their remedial measures
 - Yogic practices for achieving health and fitness
 - Worthwhile use of leisure time.
 - Sexuality – preventive measures for sexual transmitted diseases.
 - Emphasis on proper rest & sleep.
 - Prevention of cancer, cardio-vascular disorders & other diseases.
 - 3.2 Relationship of wellness towards positive lifestyle
 - 3.3 Benefits of wellness
- UNIT – IV** BEHAVIOR MODIFICATION (7 hrs lectures)
- 4.1 Barriers to change
 - 4.2 Process of change (6 stages) SMART
 - 4.3 Technique of change & smart goal setting.
 - 4.4 Healthy lifestyle approach. (Introduction, prevention, and treatment of inactivity diseases)
- UNIT – V** DAILY SCHEDULE OF ACHIEVING QUALITY OF LIFE & WELLNESS (8 hrs lecture)
- 5.1 Daily schedule based upon one's attitude, gender, age & occupation.
 - 5.2 Basic – module: - Time split for rest, sleep, diet, activity & recreation.
 - 5.3 Principles to achieve quality of life:- positive attitude, daily regular exercise, control over food habits & healthy hygienic practices.

PRACTICAL SYLLABUS

30 hrs

1. FITNESS LABS: Various labs testing related to cardio-vascular endurance, flexibility, muscular strength and body composition.
2. PHYSIOLOGICAL TESTING: - Blood pressure, VO2 max, vital capacity, pulse rate.
3. STRESS MANAGEMENT :- Yogic practices (asanas, pranayam and meditation)
4. SURVEY PROJECT: - Fitness & wellness assessment of local community.
5. NUTRITIONAL DIET ANALYSIS :- Given diet

Suggested Readings:

Department of Physical Education
GE Paper : GYM MANAGEMENT
SEMESTER-I

GE : GYM MANAGEMENT

| Course Title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-Requisite of the Course (if any) |
|---------------------|---------|-----------------------------------|----------|--------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/Practice | | |
| Gym Management | 04 | 3 | 0 | 1 | XII class pass | NIL |

Learning Objective

1. The learner will acquire knowledge, understanding and practices with applications and skills required for gym management.
2. The learner will develop understanding of the gym essentials including publicity, policy, registration, location and establishment of gym, procurement, placement & maintenance of gym equipment. Learner will be able to apply the understanding of the same for marketing, clientage, enrolments, record keeping, social activities, and public relations.
3. The learner will be able to acquire skills and competencies required for becoming a gym instructor.
4. The learner will acquire practical skills (in laboratory and field setup) in regard to calculating BMI, flexibility test (Sit and reach test, hip bend and toe touch), strength test (Bend knee sit ups, leg raise for minimal strength), cardiovascular endurance test (Harvard step test, cooper 12/9 min. run), self-evaluation (personal health and well-being), asana, aerobic schedule, weight management of the subjects. The learner will be able to compare, correlate and analyze the above learnings in real life situation.

Learning Outcome:-

1. The learner will be able to apply safety procedures to be followed in the gym.
2. The learner will develop the skills required for handling different gym equipment as well as management and utilization of the same.
3. The learner will be able to test, take measurements, analyze and interpret different components with the help of different equipment and tests (flexibility, strength, cardiovascular endurance).
4. The learner will be equipped with personal health and well-being for self-evaluation and of others.
5. The learner will be skilled to handle gym management economics (costing, balance sheet, promotional plans).

THEORY SYLLABUS

UNIT-I

GYM ESSENTIALS

(09 hrs lecture)

- Location and Establishment of gym (Publicity, policy, reception, information, Registration, offer of programmes), Procurement, placement & maintenance of gym Equipments
- Marketing, clientage, Enrolments, record keeping, social activities, Public Relations,
- Individualized/group grooming programme, basic concepts of financial management

UNIT-II

GYM INSTRUCTOR

(09 hrs lecture)

- Gym-instructor – qualification, qualities, pay-roll, Performance – evaluation, grooming and presentation
- Safety procedures to be followed in the gym.

| | |
|-----------------|--|
| UNIT-III | GYM-EQUIPMENTS (09 hrs lecture) <ul style="list-style-type: none"> • Introduction to different exercise equipment <ul style="list-style-type: none"> • Floorings and equipments required for aerobic- Understanding of various forms of aerobics- floor aerobics, step – aerobics, weight <ul style="list-style-type: none"> • Aerobics and aqua aerobics |
| UNIT-IV | EQUIPMENTS FOR FITNESS EVALUATION AND ASSESSMENTS (09 hrs lecture) <ul style="list-style-type: none"> • Measurement of Weight and Height, Calculating BMI (Body Mass Index) • Measurement of Fitness Components – <ul style="list-style-type: none"> • Flexibility (Sit and Reach Test, Hip Bend and Toe Touch) • Strength (Sit-Ups, Leg-Raise for Minimal Strength) • Cardiovascular Endurance (One-mile run, Physical Efficiency test, Harvard step test) • Self- evaluation –Personal Health and Well-being |
| UNIT-V | GYM MANAGEMENT ECONOMICS (09 hrs lecture) <p>Costing, Balance sheet, Promotional plans</p> |

PRACTICAL SYLLABUS - 30 hrs

1. Calculating BMI
2. Flexibility Test (Sit and reach test, hip bend and toe touch)
3. Strength Test (Bend knee sit ups, leg raise for minimal strength)
4. Cardiovascular endurance test (Harvard step test, cooper 12/9 min. run)
5. Self evaluation- (Personal health and well being)
6. Any five asanas
7. Aerobic schedule
8. Weight management

Suggested Readings:

1. Alexandria, Virginia, "The Gym Workout" Published by Time Life Books.
2. Ann Goodsell "Your Personal Trainer, 1994.
3. Carol Kennedy Armbruster. Mary M. Yoke " Methods of Group Exercise Instruction", 2009.
4. Philip Mazzurco "Exerstyle", 1985.
5. Refus, Inc, "The Body in Motion" Published by Time Life Books.
6. Sheela Kumari , Fitness, Aerobics & Gym Operations, New Delhi, Khel Sahitya Kendra, 2009.
7. Sunil Bharihoke, The Gym" , 2002.
8. Time life books, Gym workout, London times life books, 2004
9. Time life books, staying flexible, London, time life books, 2005
10. Time life books, super firm tough workouts, London times life books, 2005
11. Wayne L. Westcott, Thomas R. Bachle, " Strength Training", 2007.

Common Pool of Generic Electives (GEs) offered by

Department of Physical Education

SEMESTER-II

GE paper- PROFESSIONAL PREPARATION AND CAREER AVENUES IN PHYSICAL EDUCATION ANDSPORTS

GE : PROFESSIONAL PREPARATION AND CAREER AVENUES IN PHYSICAL EDUCATION ANDSPORTS

| Course Title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-Requisite ofthe Course (if any) |
|--|---------|-----------------------------------|----------|--------------------|----------------------|-------------------------------------|
| | | Lecture | Tutorial | Practical/Practice | | |
| Professional Preparation and Career Avenues in Physical Education and Sports | 04 | 3 | 0 | 1 | XII class pass | NIL |

Learning Objectives:

1. To develop an understanding of the professional preparation in physical education.
2. To develop skills to meet professional requirements.
3. To understand the need for professional development.
4. To acquire skill and competencies for professional development.
5. To gain knowledge of curriculum development.
6. To acquire skill to analyze, develop and evaluate curriculum

Learning Outcomes:

1. The learner will be able to demonstrate professional preparation in physical education and compare the same with other countries for exploring best possibilities.
2. The learner will develop skills to meet professional requirements for best applications and analysis.
3. The learner will be able to do comparative analysis of professional preparation program in U.S., Europe and China as well as to compare the same with India.
4. The learner will acquire skill and competencies for professional development to relate courses available in physical education and sports and role of physical education teacher and institutes in professional preparation programmes.
5. The learner will be able to develop curriculum to correlate career avenues after under graduation and post-graduation and research degrees, planning for a career: self-assessment, motivational dynamics, decision making,counseling and guidance, challenges and opportunities in physical education.
6. The learner will acquire skills to analyze, develop and evaluate curriculum to correlate career avenues after under graduation and post-graduation and research degrees, planning for a career: self-assessment, motivational dynamics, decision making,counseling and guidance, challenges and opportunities in physical education.

THEORY SYLLABUS

FUNDAMENTALS OF PROFESSIONAL PREPARATION

UNIT-I

HISTORICAL PERSPECTIVE

(09 hrs lecture)

- Professional Preparation in India
 - Pre Independence perspective
 - Post Independence perspective

- Comparative analysis of professional preparation program in U.S., Europe and China

UNIT-II PROFESSIONAL PREPARATION PROGRAMMES (09 hrs lecture)

- Foundation: need, objectives and characteristic of professional preparation programmes
- Courses available in physical education and sports.
- Role of physical education teacher and institutes in professional preparation programmes

UNIT-III PHYSICAL EDUCATION AND PROFESSIONALISM (09 hrs lecture)

- Concept and meaning of Profession, Professional and Professionalism.
- Physical education as a profession.

UNIT-IV CAREER AVENUES & JOB OPPORTUNITIES IN PHYSICAL EDUCATION & SPORTS (09 hrs lecture)

- Career avenues after under graduation and post graduation and research degrees.
- Planning for a career : self-assessment, motivational dynamics, decision making, counseling and guidance

UNIT-V EXPLORING AND VENTURING INTO NEW AVENUES (09 hrs lecture)

- Challenges and opportunities in physical education
- Inter-relationship among various careers in physical education and sports

PRACTICAL SYLLABUS :

30 hrs

1. Case study on national sports policy/national education policy

Suggested Readings:

1. Adams William C. Foundation of Physical Education Exercise and Sports Sciences, Philadelphia, 1991
2. Gupta Rakesh, Sharma Akhilesh, and Sharma Santosh, Professional Preparation and Curriculum Design in Physical Education & sports Sciences, New Delhi, Friends Publications, 2004
3. Hoover. Kenneth H., The Professional Teacher's Handbook, Boston, Allyn and Bacon, 1972
4. Krik David, Physical Education and Curriculum Study, Kent, Croom Helm, 1988
5. Sandhu Kiran, Professional Preparation and Career Development in Physical Education, New Delhi, Friends Publications, 2004
6. Sandhu Kiran, Trends and Development in Professional Preparation in Physical Education, New Delhi, Friends Publication, 2006
7. Wessel Janet A, and Kelly Luke, Achievement-Based Curriculum Development in Physical Education, Philadelphia, Lea and Febiger, 1986
8. Zeigler E.F, Professional and Scholarly Foundation of Physical Education and Kinesiology, Sports Educational Technologies, 2007

Semester II
GE-Paper: STRESS MANAGEMENT

GE : STRESS MANAGEMENT

| Course Title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-Requisite of the Course (if any) |
|---------------------|---------|-----------------------------------|----------|--------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/Practice | | |
| Stress Management | 04 | 3 | 1 | 0 | XII class pass | NIL |

Learning Objectives:

1. To acquaint the learner with the knowledge, practices and understanding of anger, stress and its management and other related aspects important to sports persons.
2. The learners will be introduced with the basic concepts of stress and anger, causes and effects of stress and anger, main emotions of stress-fear and anger, daily life stressors, process of stress, anger and psycho physiology of stress.
3. The learner will gain knowledge and concept of self-awareness and stress management, muscular tension reduction, emotional tension reduction, stress free living, stress free examination, stress management through physical activity and stress management through recreation activities.
4. The learner will gain knowledge of anger management- Redford William's 12 steps of anger management, stress management- behavior modification, time management, coping strategy & intervention skills. It also helps to learn relaxation technique- diaphragmatic breathing, meditation, progressive muscle relaxation, Yoga, mental imagery, music therapy, and massage therapy.

Learning Outcomes:

1. The learner will be able to apply the knowledge, learning and understanding to the concept of anger, stress and how to manage it.
2. The learner will be able to correlate the concepts and practices of the stress and anger.
3. The learner will be able to understand and adapt to stress - reframing of habitual stress resistance, types of stress, personal and social stress, occupational stress, peer stress / learners stress, family stress, stress & elderly and Stress & drug abuse. It helps to know about the stress related diseases- sleep disorder, eating disorder, sexual and emotional disorder, other stress related diseases, stress & spirituality.
4. The learner will be able to correlate the concepts and practices for best management of stress.

THEORY SYLLABUS:

Unit-I

(15 hrs Lectures)

Definition of stress and anger, Causes and effects of stress and anger, two main emotions of stress-fear and anger, Daily life stressors, Process of stress and anger- Psycho Physiology of stress.

Unit-II

(15 hrs Lectures)

Adaptation to stress-Reframing of habitual stress resistance, types of stress-personal and social stress Occupational stress, Peer stress / Students stress, Family stress, Stress & elderly and Stress & drug abuse.
Stress related diseases- i) Sleep disorder, ii) Eating disorder, iii) Sexual and emotional disorder, iv) Other stress related diseases, v) Stress & Spirituality.

Unit-III

(15 hrs Lectures)

Self-awareness and stress management, Muscular tension reduction, Emotional tension reduction, Stress free living, Stress free examination, Stress management through physical activity, Stress management through recreation.

Unit-IV

(15 hrs Lectures)

Anger management- Redford William's 12 steps of anger management

Stress management- behavior modification, time management, coping strategy & intervention skills.

Relaxation technique- i) Diaphragmatic breathing, ii) Meditation, iii) Progressive muscle relaxation, iv) Yoga, v) Mental imagery, vi) Music therapy, vii) Massage therapy

| DISCIPLINE SPECIFIC COURSE (DSC) -1 Course: Microbial World and Plant Diversity |
| Total Credits: 04 Lectures: 30 Hours, Tutorial: 0, Practical: 60 Hours |

Objectives: To make students aware about the diversity of plants and microbes present on the planet and their evolutionary relationships.

Learning Outcomes:

- This course will impart basic knowledge on:
- the diversity of plants and microbes.
- their general characteristics.
- various groups of plants and their evolutionary relationships.
- basic principles and concepts of evolution that contribute to diversity.

Theory:**Unit 1. Origin of life: 2 Hours**

Principles and concepts of evolution and classification (up-to six kingdoms).

Unit 2. Bacteria: 3 Hours

General characteristic features, cell structure, wall-less forms (L-forms and Mycoplasma), asexual reproduction and modes of gene transfer (conjugation, transformation and transduction), a brief introduction to Archaeobacteria.

Unit 3. Viruses: 2 Hours

General characteristic features, replication, RNA virus (structure of TMV), DNA virus (structure of T-phage), Lytic and Lysogenic life cycle (Lambda phage).

Unit 4. Algae: 3 Hours

General characteristic features, Reproduction, Classification of Lee (only up to groups). A brief account of Volvox and Polysiphonia.

Unit 5. Fungi: 4 Hours

General characteristic features, Reproduction, Classification (Webster and Weber, 2007), A brief account of Rhizopus, Penicillium, and Agaricus.

Unit 6. Bryophytes: 4 Hours

General characteristic features and reproduction, adaptation to land habit, broad classification, Evolutionary trends in Bryophytes. Brief account of Marchantia and Funaria.

Unit 7. Pteridophytes: 4 Hours

General characteristic features and reproduction, broad classification, Evolutionary trends in Pteridophytes, affinities with Bryophytes. A brief account of Equisetum and Pteris.

Unit 8. Gymnosperms: 4 Hours

General characteristic features and reproduction, broad classification, evolutionary trends in Gymnosperms, affinities with Pteridophytes. A brief account of Pinus.

Unit 9. Angiosperms: 4 Hours

General characteristic features and reproduction, concept of natural, artificial and phylogenetic system of classification, APG-IV (a brief reference), affinities with Gymnosperms.

Practical: 60 Hours

1. To study structure of TMV and Bacteriophage (electron micrographs/models).
2. To study Gram negative and positive bacteria through Gram's Staining Technique.
3. To study Bacteria through Electron Micrograph, Binary fission, Conjugation, Root nodules through digital resources /specimen.
4. To study morphology of Volvox and Polysiphonia through temporary preparations and slides.
5. To study Rhizopus, Penicillium and Agaricus through temporary preparations, specimens and slides.

Additional Readings:

1. Parihar, N.S. (1991). An Introduction to Embryophyta, Pteridophytes (Vol. II). Central Book Depot.
2. Singh, V., Pandey, P.C., & Jain, D.K. (2001). A Text Book of Botany. Rastogi and Co.
3. Webster, J., & Weber, R. (2007). Introduction to Fungi. Cambridge University Press.

Keywords:

Evolution, Bacteria, Viruses, Bryophytes, Pteridophytes, Gymnosperms, Angiosperms.

Teaching Learning Process:

Learning material will be delivered through a series of lectures with conventional chalk and talk method, supported by power point presentations, charts, flow charts and video education resources. Emphasis would be on an interactive classroom environment so as to encourage students to ask questions and clarify their doubts. Students would also be encouraged to refer to the referenced books in the library to inculcate reading habits for better understanding of the subject.

Assessment Methods:

Performance of the students will be evaluated on the basis of regular class test, presentations and assignments as a part of internal assessment during the course, as per the curriculum. There would be a continuous evaluation of laboratory exercises and the record files. End semester university examination will be held for both theory and practical components. In practical, assessment will be done based on continuous evaluation and performance in the practical examination.

DISCIPLINE SPECIFIC COURSE (DSC) - 02
COURSE : INORGANIC CHEMISTRY

Total Credits: 04
Lectures: 30 Hours, Tutorial: 0, Practical: 60 Hours

Objectives:

The course introduces the students to basics of coordination chemistry and organometallics which are of immense importance to biological systems. Nomenclature, isomerism, bonding in coordination compounds has been dealt with in sufficient detail along with special emphasis on important coordination compounds in the biological system. In organometallic chemistry, the students are introduced to classification of organometallic compounds, the concept of hapticity and the 18-electron rule governing the stability of a wide variety of organometallic species with special emphasis on metal carbonyls.

Learning Outcomes:

- By the end of the course, the students will be able to:
- Understand term like; ligand, chelate, coordination number. Systematic naming of coordination compounds.
- Learn various types of isomerism possible in Octahedral and Tetrahedral coordination compounds.
- Use Valence Bond Theory to predict the structure and magnetic behaviour of metal complexes and understand the terms inner and outer orbital complexes.
- Understand meaning of the terms Δ_o , Δ_t , pairing energy, CFSE, high spin and low spin and how CFSE affects thermodynamic properties like lattice enthalpy and hydration enthalpy.
- Analyse IR data to understand the extent of back bonding in metal carbonyls.

Theory:

Unit 1. Introduction to Coordination compounds: 6 Hours

Brief discussion with examples of types of ligands, denticity and concept of chelate. IUPAC system of nomenclature of coordination compounds (mononuclear and binuclear) involving simple monodentate and bidentate ligands. Structural and stereoisomerism in complexes with coordination number 4 and 6.

Unit 2. Bonding in Coordination compounds: 14 Hours

Valence Bond Theory (VBT): Salient features of theory, concept of inner and outer orbital complexes, Drawbacks of VBT.

Crystal Field Theory: Splitting of d orbitals in octahedral symmetry. Crystal field effects for weak and strong fields, Crystal field stabilization energy (CFSE), concept of pairing energy,

Factors affecting the magnitude of Δ , Spectrochemical series, Splitting of d orbitals in tetrahedral symmetry, Comparison of CFSE for octahedral and tetrahedral fields, tetragonal distortion of octahedral geometry, Jahn-Teller distortion.

Unit 3. Organometallic chemistry: 10 Hours

Definition and classification with appropriate examples based on nature of metal-carbon bond (ionic, sigma, pi and multicentre bonds), Structure and bonding of methyl lithium and Zeise's salt, Structure and bonding of ferrocene, mononuclear and polynuclear carbonyls of 3d metals, 18-electron rule as applied to carbonyls, π -acceptor behaviour of carbon monoxide (MO diagram of CO to be discussed), synergic effect and use of IR data to explain extent of back bonding.

Practical: 60 Hours

1. Estimation of Mg^{2+} by direct complexometric titration using EDTA.
2. Estimation of Zn^{2+} by direct complexometric titration using EDTA.
3. Estimation of Ca^{2+} by direct complexometric titration using EDTA.
4. Estimation of total hardness of a given sample of water by complexometric titration.
5. Determination of the composition of the Fe^{3+} -salicylic acid complex/ Fe^{2+} -1, 10 phenanthroline complex in solution by Job's method.
6. Determination of the composition of the Fe^{3+} -salicylic acid complex/ Fe^{2+} -1,10-phenanthroline complex in solution by mole ratio method.
7. Preparation of the following inorganic compounds:
 - a) Tetraamminecopper (II) sulphate
 - b) Potassium trioxalatoferrate (III) trihydrate
 - c) Chrome alum
 - d) Cuprous chloride
 - e) Manganese (III) phosphate ($\text{MnPO}_4 \cdot \text{H}_2\text{O}$)
 - f) Potash alum
 - g) Acetylacetonate complex of Cu^{2+} and Fe^{3+}

Suggested Readings:

Theory:

1. Huheey, J.E., Keiter, E.A., Keiter, R. L., & Medhi, O.K. (2009). Inorganic Chemistry- Principles of Structure and Reactivity. Pearson Education.
2. Shriver, D. D., Atkins, P., & Langford, C.H. (1994). Inorganic Chemistry (2nd Ed.). Oxford University Press.
3. Atkins, P.W., Overton, T.L., Rourke, J.P., Weller, M.T., & Armstrong, F.A. (2010), Inorganic Chemistry (5th Ed.). W. H. Freeman and Company.
4. Cotton, F.A. Wilkinson, & G. Gaus, P.L. Basic Inorganic Chemistry (3rd Ed.). Wiley India.
5. Douglas, B.E., McDaniel, D.H., & Alexander, J.J. (1994). Concepts and Models of Inorganic Chemistry. John Wiley & Sons.

6. Greenwood, N.N.; Earnshaw, A. (1997). Chemistry of the Elements (2nd Ed.). Elsevier.
7. Sahoo, et al. Inorganic Chemistry. PHI Learning Private Limited.

Practical:

1. Jeffery, G.H., Bassett, J., Mendham, J., & Denney, R.C. (1989). Vogel's Textbook of Quantitative Chemical Analysis. John Wiley and Sons.
2. Marr, G., & Rockett, B.W. (1972). Practical Inorganic Chemistry. Van Nostrand Reinhold.

Keywords:

Crystal field theory, Dq, CFSE, Nomenclature, Valence bond theory, Crystal field theory, Magnetic properties, 18 electron rule, metal carbonyls, hapticity.

Teaching Learning Process:

- Conventional chalk and board teaching.
- Class interactions and discussions.
- Power point presentation on important topics.

Assessment Methods:

- Presentations by Individual Student/ Group of Students.
- Class Tests at Periodic Intervals.
- Written assignment(s).
- End semester University Theory Examination.

DISCIPLINE SPECIFIC COURSE (DSC) - 03

Course: Animal Forms and Structure

Total Credits: 04

Lectures: 30 Hours, Tutorial: 0, Practical: 60 Hours

Objectives:

Zoology is the scientific study of animal life. Animals are the most diverse creatures on this planet. This course gives knowledge about the diversity within different groups, and their interrelationships. The course is designed to understand the general characteristics, classification, basic body plan and levels of organizations in different groups of animals.

Learning Outcomes:

On completion of the course, students will be able to:

- Distinguish between major phyla of animals through characteristic features and diversity.
- Understand the fundamental differences among animal body plans among different phyla.
- Illustrate structure, function and processes related to different groups of animals.
- Observe living animals in the environment and relate observations to theory from the course.

Theory:

Unit 1: 2 Hours

An introduction to the animal kingdom: Non-chordates vs Chordates, Coelom, Body symmetry, Levels of organization.

Unit 2: 1 Hour

Protista: General characters of Protozoa; Locomotory organelles: Pseudopodia, Flagella and Cilia.

Unit 3: 2 Hours

Porifera: General characters of phylum Porifera, Canal system in Porifera (in brief).

Unit 4: 2 Hours

Radiata: General characters of phylum Cnidaria and Ctenophora; Polymorphism.

Unit 5: 2 Hours

Helminthes: General characters of Helminthes (Platyhelminthes and Nematelminthes).

Unit 6: 7 Hours

Coelomates (Non-chordates):

General characters of phylum Annelida; Metamerism.

General characters of phylum Arthropoda; Vision in insects.

General characters of phylum Mollusca; Pearl Formation.

General characters of phylum Echinodermata; Water Vascular system in starfish.

Unit 7: 2 Hours

Protochordates: Salient features of Hemichordates, Urochordates and Cephalochordates.

Unit 8: 12 Hours

Vertebrates: Brief description of vertebrates.

General characters of Agnatha.

General characters of Pisces; Cartilaginous and Bony fishes, Catadromous and Anadromous migration.

General characteristics of Amphibia; Adaptations for terrestrial life.

General characteristics of Reptilia; Biting mechanism of snakes.

General characteristics of Aves; Flight adaptations in birds.

General characteristics of Mammals; Brief description of prototherian, metatherian and eutherian mammals; Dentition.

Practical: 60 Hours

1. Study of specimens:

Non-chordates: Euglena, Noctiluca, Paramecium, Sycon, Physalia, Tubipora, Meandrina, Taenia, Ascaris, Nereis, Heteronereis, Aphrodite, Hirudinaria, Peripatus, Limulus, Cancer, Daphnia, Julus, Scolopendra, Apis, cockroach, termite, butterfly, Chiton, Dentalium, Octopus, Asterias and Antedon.

Chordates: Balanoglossus, Herdmania, Amphioxus, Petromyzon, Sphyrna, Pristis, Hippocampus, Exocoetus, Diodon/ Tetraron, Ichthyophis/ Uraeotyphlus, Bufo, Hyla, Salamandra, Rhacophorus, Draco, Uromastix, Naja, Viper, identification of poisonous and non-poisonous Any three common birds, Funambulus, Loris and Bat.

2. Study through permanent slides:

- (a) Cross section of Sycon and Ascaris (male and female).
- (b) Septal and pharyngeal nephridia of earthworm.
- (c) Placoid, cycloid and ctenoid scales of fishes.

3. Study of organ systems: (Subject to permission from animal ethics committee as per UGC guidelines/ from suitable models).

- (a) Digestive system of cockroach.
- (b) Urinogenital system of rat.

Suggested Readings:

- 1. Barnes, R.D. (1992). Saunders College Pub. USA.
- 2. Ruppert, E. E., Fox, R. S., & Barnes, R. D. (2004). Invertebrate zoology: A functional evolutionary approach (5th ed.). Brooks/Cole Publishing Company.

3. Campbell and Reece (2005). Biology, Pearson Education, (Singapore) Pvt. Ltd.
4. Young, J.Z. (2004). The Life of Vertebrates. III Edition, Oxford University Press.
5. Raven, P.H. and Johnson & G.B. (2004). Biology, VI Edition, Tata McGraw Hill Publications

E- contents:

- <http://vle.du.ac.in>
- Animal Diversity Web (ADW); an online database of animal natural history, distribution, classification, and conservation biology. Web resource <https://animaldiversity.org/>
- Online Zoo; <https://www.activewild.com/online-zoo/>.

Keywords:

Coelomates, Chordates, Non chordates, Vertebrates, Metamerism, Coelom, Migration.

Teaching and Learning Process:

Teaching-Learning process will include delivery of lectures using boards, multimedia presentation, short documentaries on animal diversity, imparting practical based knowledge through specimens, live demonstration of diversity in surroundings.

Assessment methods:

- Continuous assessment during entire semester along with the summative assessment by the semester-end.
- Testing through multiple choice questions at the end of each lecture.
- Assess through the project-based work.

17. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 18-1-1, 18-1-2 & 18-1-4 dated 18.08.2022 (in continuation of notification 209, 215 and 216 dt 21.09.22, 06.10.22 and 10.10.22) regarding replacement of Major/ Non-Major of few Syllabi of 1st Semester

Add the following:

Following syllabi of BA (Prog.) Major and Non-Major of Semester-I may be replaced with the existing syllabi to be implemented from academic session 2022-2023 under NEP-UGCF-2022:

Category II

(B.A (Prog.) with *BENGALI Discipline* as Major

**DISCIPLINE SPECIFIC CORE COURSE -1 (DSC-1) – : Prak-Uponibesher Bangla Sahitya
(10th to 18th Shatak)**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|--|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Prak-Uponibesher Bangla Sahitya (10 th to 18 th Shatak) | 4 | 3 | 1 | NIL | Class 12 th pass in any subject | Studied Bengali Up to 10 th standard Or working knowledge of Bengali Language |

Learning Objectives:

To give the students a detail idea about Pre-Colonial Bengali Literature.

Learning outcomes:

The course will enlighten the students about Pre-Colonial Bengali Literature, it's characteristics and features. It will also introduce students about their socio – cultural background of Bengal.

SYLLABUS OF DSC- 2

UNIT – I (3 Weeks)

বৈষ্ণব পদাবলী(বিদ্যাপতি, চণ্ডীদাস, জ্ঞানদাস, গোবিন্দদাস), শাক্ত পদাবলী(রামপ্রসাদ সেন, কমলাকান্ত ভট্টাচার্য)

UNIT – II (6 Weeks)

ময়মনসিংহ গীতিকা, জঙ্গনামা, নাথ সাহিত্য, রায়মঙ্গল ও শীতলা মঙ্গল, পীর সাহিত্য

UNIT - III (3 Weeks)

বাউল ও ফকিরী গান, কবিওয়ালা ও কবিগান

Essential/recommended readings

অমরেন্দ্রনাথ রায় (সম্পা.), ২০০২, শাক্ত পদাবলী চয়ন, কলিকাতা বিশ্ববিদ্যালয়, কলকাতা
অমিত্রসূদন ভট্টাচার্য (সম্পা.) ২০০৪, বড়ু চণ্ডীদাসের শ্রীকৃষ্ণকীর্তন সমগ্র, দে'জ পাবলিশিং, কলকাতা
খগেন্দ্রনাথ মিত্র প্রমুখ, (সম্পা.), ১৯৯০, বৈষ্ণব পদাবলী চয়ন, কলিকাতা বিশ্ববিদ্যালয়, কলিকাতা
বৃন্দাবন দাস, ১৯৯৩, শ্রীচৈতন্যভাগবত, শ্রীচৈতন্যমঠ, মায়াপুর, পশ্চিমবঙ্গ
ব্রজেন্দ্রনাথ বন্দ্যোপাধ্যায় ও সজনীকান্ত দাস(সম্পা) ১৪২১ বঙ্গাব্দ, ভারতচন্দ্র-গ্রন্থাবলী, বঙ্গীয়-সাহিত্য-পরিষৎ, কলকাতা
মুহম্মদ এনামুল হক (সম্পা.), ১৯৯৯, শাহ মুহম্মদ সগীর বিরচিত ইউসুফ-জোলেখা, মাওলা ব্রাদার্স, ঢাকা

Suggestive readings (if any)

আশুতোষ ভট্টাচার্য, ২০০৬, বাংলা মঙ্গলকাব্যের ইতিহাস, এ, মুখার্জী এন্ড কোং, কলকাতা
জহর সেনমজুমদার, ২০০৯, মধ্যযুগের কাব্য : স্বর ও সংকট, বঙ্গীয় সাহিত্য সংসদ, কলকাতা
তারাপদ মুখোপাধ্যায়, ১৯৭১, শ্রীকৃষ্ণকীর্তন, মিত্র ও ঘোষ, কলকাতা

DISCIPLINE SPECIFIC CORE COURSE (DSC-2): Bangla Bhasha, Sahitya O Itihas Parichay

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |

DISCIPLINE SPECIFIC CORE COURSE (DSC-1): History of Tamil Language

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------|---------|-----------------------------------|----------|---------------------|-----------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| History of Tamil Language | 04 | 03 | 01 | - | Class 12 th pass | Studied Tamil up to 10 th standard and above (or) working knowledge of Tamil Language |

Learning Objectives:

This course aims at introducing the history of Tamil language beginning from the origin of the Tamil script available from the cave inscriptions and archeological excavations to the modern developments of 20th century. The earliest available literature of Tamil, the *Sangam* Anthology and *Tolkāppiyam* are taken as the source to discuss the structure of ancient Tamil. The latter texts of grammatical treatises, epics, commentaries etc., stand as the resource for the study of evolution of Tamil during the medieval period. It discusses phonological, morphological, semantic, and syntactic changes taken place in the language.

Learning Outcomes:

This course would enlighten the students the place of Tamil in Dravidian family of languages, various dialects of Tamil and the impact of Sanskrit and other languages in Tamil.

SYLLABUS OF DSC-1

Unit -I (15 Hours)

- Tamil Languages and Script
- Units and Verities of Tamil Language

Unit -II (15 Hours)

- Origin & History of Tamil Language

Unit -III (15 Hours)

- Special features of Tamil Language

Unit -IV (15 Hours)

- Phonological, Morphological, and syntactic changes
- Semantic changes & Dialects of Tamil

Essential/recommended Readings:

1. Varadarajan.M. 2017. *Mozhi Varalaru*, Chennai: Pari Nilayam.
2. Suyambu, P., 2005, *Moḷi Varalārril Tamīl*, Chennai: Visalakshi Nilaiyam.
3. Meenakshisundaram, T.P., (Trans. S. Jeyaprakasam), 1982, *Tamiḷ Moḷi Varalāru*, Madurai: Sarvodaya Ilakkiyappannai.

Suggestive Readings:

1. Sastri, Suriya Narayana, 2003, *Tamiḷmoḷiyin Varalāru*, Chennai: International Institute of Tamil Studies.
2. Saktivel, S., 1991 (2nd Ed.), *Tamiḷmoḷi Varalāru*, Chennai: Manivasagar Nulagam.
3. Rajendran. M., (Ed.), *Tamiḷmoḷi Varalāru*, Chennai: Directorate of Tamil Development.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2 (DSC-2): An Introduction of Tamil Language**Credit distribution, Eligibility and Prerequisites of the Course**

|-----------------------------------|----------|-----------------------------------|----------|---------------------|-------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC 1 Philosophical Issues | 4 | 3 | 1 | 0 | Passed Class XII | Nil |

Learning Objectives

- The primary objective of this course is to introduce the main philosophical issues to students
- It will encourage the students to think critically about some of the most important questions that philosophers ask
- It will also teach students how analytical and rigorous answers are possible to hard questions

Learning Outcomes

- By studying this course, a student should be able to demonstrate a clear understanding of the background the philosophical issues.
- They will acquire a good understanding of the key concepts of Indian schools as well as Western philosophy.
- They will have a sound understanding of epistemological, metaphysical, and ethical issues and shall be able to go for further studies in the subject.

Unit I Introduction

12 Hours

- What is Philosophy?
- What is a Philosophical Issue?
- Origins of Indian Philosophy

Moore, B. N., & Bruder, K. (2001). *Philosophy: The power of ideas* (5th ed.). New York: McGraw-Hill, pp. 1-5, 13-15

Warder, A K (2018). *A course in Indian Philosophy*, Motilal Banarsidass, Pg. 4-19

Unit II Metaphysical Issues

16 Hours

- What is metaphysics?
- Idea of Reality, Being, and Becoming

Laurence, Stephen and Cynthia Macdonald (eds.), 1998, *Contemporary Readings in the Foundations of Metaphysics*, Oxford: Blackwell.pp 1-21

Unit III. Epistemological Issues

12 Hours

- What is Knowledge?
- Prama, Prameya and Pramana

Lehrer, K. (1990). *Theory of knowledge*. Boulder, CO: Westview Press.pg 2-4

Puligandla, R. (2008). *Fundamentals of Indian Philosophy*, D K Printworld, pp. 184-191

Unit IV. Ethical Issues

20 Hours

- Morality and Ethics
- Buddhist Ethics

Rachels, J., & Rachels, S. (2012). "What is Morality?" In *The Elements of Moral Philosophy* 7e. McGraw Hill. pp 1 to 13

Keown, Damien (2018). "Buddhist Ethics", in Billimoria, Purushottama (ed.) (2018). *Routledge History of Indian Philosophy*. Routledge, pp. 496-505

Essential/recommended readings

Gupta, R.K., (1995), *Social Action and Non-violence*, ICPR, New Delhi.

Hiriyana, M. (1951), *Outlines of Indian Philosophy*, Allen & Unwin, London.

Kar, Bijayananda (1985), *Indian Philosophy*, Ajanta Publications, Delhi.

Keown, D. (1992), *The Nature of Buddhist Ethics*, Macmillan, London.

Lama, Dalai (1999), Ethics for the New Millennium, Riverhead Books, New York.
 O'Connor, D.J., (1964), Critical History of Western Philosophy, Free Press of Glencoe, London.
 Raju, P.T., (1971), The Philosophical Traditions of India, George Allen & Unwin Ltd., London.

Suggestive Readings

Rao, V. Ramakrishna (1987), Selected Doctrines from Indian Philosophy, Mittal Publications, Delhi.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2 (DSC-2): Logic

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|----------|-----------------------------------|----------|---------------------|-------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Logic DSC 2 | 4 | 3 | 1 | 0 | Passed Class XII | Nil |

Learning Objective

- This course primarily helps in developing one's skill in correct reasoning or argumentation.
- It trains the student to construct good and sound arguments rejecting the vague and unsound ones at any point of time and situation.

Learning Outcomes

- Helps in sharpening the reasoning and argumentation skills of a learner and simultaneously helps in identifying the flaws.
- Enhances analytical skills so that one can resolve difficult issues and finally arrives at a reasonable solution.

Unit I Basic Logical Concepts

8 Hours

1. Proposition and Sentence
2. Deductive argument
3. Truth, Validity, and Soundness

Copi, Irving M., Carl Cohen, and Kenneth McMahon. *Introduction to Logic*. 14th ed. Delhi: Pearson, 2016. Ch 1-2.

Unit II Traditional Logic (A)

20 Hours

1. Terms and Distribution of terms
2. Categorical Propositions
3. Traditional Square of Opposition and Existential Import
4. Translating Ordinary Language Sentences into Standard form

Traditional Logic (B)

1. Immediate Inferences- Conversion, Obversion, and Contraposition
2. Categorical Syllogism: Figure and Mood
3. Syllogistic Rules and Fallacies
4. Venn Diagram

1. Copi, Irving M., Carl Cohen, and Kenneth McMahon. *Introduction to Logic*. 14th ed. Delhi: Pearson, 2016. Ch 5-7.

Unit III Symbolization Hours

20

1. Types of Truth functions: Negation, Conjunction, Disjunction (Alternation), Conditional (Implication), and Bi-Conditional (Equivalence)
2. Statements, Statement forms, and Logical status
3. Decision procedures: Truth table Method and Reductio ad Absurdum

1. Copi, Irving M., Carl Cohen, and Kenneth McMahon. *Introduction to Logic*. 14th ed. Delhi: Pearson, 2016. Ch 8.

Unit IV Indian Logic

12 Hours

1. Debate
2. Logic
3. Steps of Inference in Indian Logic

Warder, A K (2018). *A course in Indian Philosophy*, Motilal Banarsidass, Pg. 128-137 (“Debate and Logic”)

Essential/Recommended Readings

1. Copi, Irving M. *Introduction to logic*. 6th Ed. New York London: Macmillan Collier Macmillan, 1982. Ch5-7.
2. Ganeri, Jonardon (2001). *Indian Logic a Reader*. Psychology Press.

Suggestive Readings

- Jain, Krishna. *A Textbook of Logic*. New Delhi: D.K. Printworld, 2018.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

BA (Prog) with Philosophy as Non-Major
Category II

DISCIPLINE SPECIFIC CORE COURSE (DSC-1): Philosophical Issues

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|----------|-----------------------------------|----------|---------------------|-------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC 1 Philosophical Issues | 4 | 3 | 1 | 0 | Passed Class XII | Nil |

Learning Objectives

- The primary objective of this course is to introduce the main philosophical issues to students
- It will encourage the students to think critically about some of the most important questions that philosophers ask
- It will also teach students how analytical and rigorous answers are possible to hard questions

Learning Outcomes

- By studying this course, a student should be able to demonstrate a clear understanding of the background the philosophical issues.
- They will acquire a good understanding of the key concepts of Indian schools as well as Western philosophy.
- They will have a sound understanding of epistemological, metaphysical, and ethical issues and shall be able to go for further studies in the subject.

Unit I Introduction

12 Hours

- What is Philosophy?
 - What is a Philosophical Issue?
 - Origins of Indian Philosophy
-

Moore, B. N., & Bruder, K. (2001). *Philosophy: The power of ideas* (5th ed.). New York: McGraw-Hill, pp. 1-5, 13-15

Warder, A K (2018). *A course in Indian Philosophy*, Motilal Banarsidass, Pg. 4-19

Unit II Metaphysical Issues

16 Hours

- What is metaphysics?
- Idea of Reality, Being, and Becoming

Laurence, Stephen and Cynthia Macdonald (eds.), 1998, *Contemporary Readings in the Foundations of Metaphysics*, Oxford: Blackwell.pp 1-21

Unit III. Epistemological Issues

12 Hours

- What is Knowledge?
- Prama, Prameya and Pramana

Lehrer, K. (1990). *Theory of knowledge*. Boulder, CO: Westview Press.pg 2-4

Puligandla, R. (2008). *Fundamentals of Indian Philosophy*, D K Printworld, pp. 184-191

Unit IV. Ethical Issues

20 Hours

- Morality and Ethics
- Buddhist Ethics

Rachels, J., & Rachels, S. (2012). "What is Morality?" In *The Elements of Moral Philosophy* 7e. McGraw Hill. pp 1 to 13

Keown, Damien (2018). "Buddhist Ethics", in Billimoria, Purushottama (ed.) (2018). *Routledge History of Indian Philosophy*. Routledge, pp. 496-505

Essential/recommended readings

Gupta, R.K., (1995), *Social Action and Non-violence*, ICPR, New Delhi.

Hiriyana, M. (1951), *Outlines of Indian Philosophy*, Allen & Unwin, London.

Kar, Bijayananda (1985), *Indian Philosophy*, Ajanta Publications, Delhi.

Keown, D. (1992), *The Nature of Buddhist Ethics*, Macmillan, London.

Lama, Dalai (1999), Ethics for the New Millennium, Riverhead Books, New York.
O'Connor, D.J., (1964), Critical History of Western Philosophy, Free Press of Glencoe, London.
Raju, P.T., (1971), The Philosophical Traditions of India, George Allen & Unwin Ltd., London.

Suggestive Readings

Rao, V. Ramakrishna (1987), Selected Doctrines from Indian Philosophy, Mittal Publications, Delhi.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

B.A /BSc. (Program) with Statistics as Major

DISCIPLINE SPECIFIC CORE COURSE – I: DESCRIPTIVE STATISTICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------|---------|-----------------------------------|----------|---------------------|-------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Descriptive Statistics | 4 | 3 | 0 | 1 | Class X pass with Mathematics | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To motivate students towards intrinsic interest in statistical thinking.
- To analyze and interpret data.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the basic concepts of Statistics.
- Able to employ different types of data.
- Employ the graphical methods of displaying data.
- Use measures of locations.

SYLLABUS OF DSC - 1

Theory

Unit – 1

(12 Hours)

Data Representation

Introduction: Definition, importance, scope and limitations of Statistics. Population and Sample Concept of statistical population with illustrations, concept of sample with illustrations. Raw data, Attributes and variables, discrete and continuous variables, classification and construction of frequency distribution. Graphical Representation: Histogram, Frequency polygon, Frequency curve, Ogive curves and their uses. Examples and Problems.

Unit – 2

(18 Hours)

Measures of central tendency

Concept of central tendency, Criteria for good measures of central tendency.

Arithmetic mean: Definition, computation for ungrouped and grouped data, combined mean, weighted mean,

merits and demerits. Median: Definition, computation for ungrouped and grouped data, graphical method, merits and demerits. Mode: Definition, computation for ungrouped and grouped data, graphical method, merits and demerits. Quartiles: Definition, computation for ungrouped and grouped data graphical method. Numerical problems.

Unit – 3

(15 Hours)

Measures of Dispersion

Concept of dispersion and measures of dispersion, absolute and relative measures of dispersion. Range and Quartile Deviation: definition for ungrouped and grouped data, and their coefficients, merits and demerits. Mean Deviation: Definition for ungrouped and grouped data. Standard deviation and Variance: definition for ungrouped and grouped data, combined variance and standard deviation for two groups, coefficient of variation, , merits and demerits. Numerical problems.

Practical: 30 Hours

List of Practicals:

1. Problems based on graphical representation of data: Histograms, Frequency polygon, Ogive curve for equal class intervals.
2. Problems based on graphical representation of data: Histograms, Frequency polygon, Ogive curve for unequal class intervals.
3. Problems based on measures of central tendency using raw data, grouped data.
4. Problems based on change of origin and scale.
5. Problems based on measures of dispersion using raw data, grouped data.
6. Problems based on measures of dispersion for change of origin and scale.
7. Problems based on combined mean.
8. Problems based on combined variance.
9. Problems based on coefficient of variation.
10. Problems based on standard deviation of two groups

Essential Readings

DISCIPLINE SPECIFIC CORE COURSE – II: TIME SERIES ANALYSIS AND INDEX NUMBERS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Time Series Analysis and Index Numbers | 4 | 3 | 0 | 1 | Class X pass with Mathematics | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- Introduce the concept of time series, its components, and their estimation.
- Introduce the application of time series.
- Introduce the concept, formulation, and application of index numbers.

Learning outcomes

After completion of this course, the students will be able to:

- Understand the concepts of time series and index numbers.
- Formulate, solve, and analyze the use of time series and index numbers for real-world problems.

SYLLABUS

Theory

Unit – 1

(12 Hours)

Components of Time Series

Introduction to Time Series, Components of time series, Decomposition of time series- Additive and multiplicative model with their merits and demerits, Illustrations of time series, Measurement of trend by method of free-hand

curve, method of semi-averages and method of least squares (linear, quadratic and exponential).

Unit – 2

15 Hours

Trend and Seasonality

Fitting of modified exponential, Moving average method, Measurement of seasonal variations by method of simple averages, ratio to trend method, and ratio to moving average method.

Unit – 3

18 Hours

Index Numbers

Introduction to Index numbers, Problems in the construction of index numbers, Construction of price and quantity index numbers: simple aggregate, weighted aggregate (Laspeyres, Paasche's, and Fisher's Formula), simple and weighted average of price relatives, Criteria for a good index number, Time reversal and factor reversal test, Consumer price index number, its construction and uses, Uses and limitations of index numbers.

Practical : 30 Hours

List of Practicals:

1. Fitting of linear trend
2. Fitting of quadratic trend
3. Fitting of an exponential curve
4. Fitting of modified exponential curve.
5. Fitting of trend by moving average method (for n even and odd)
6. Measurement of seasonal indices by
 - a. Method of simple averages
 - b. Ratio-to-trend method
 - c. Ratio-to-moving-average method
7. Construction of price and quantity index numbers by simple aggregate method.
8. Construction of price and quantity index numbers by Laspeyres, and Fisher's Formula.
9. Construction of price and quantity index numbers by simple and weighted average of price relatives.
10. Construction of consumer price index number by
 - a. Family budget method
 - b. Aggregate expenditure method
11. Time Reversal Test and Factor Reversal Test

Essential Readings

BA (Prog.) with Economics as Major
Category-II

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introductory Microeconomics ECON001 | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To expose students to the basic principles of microeconomic theory
- To emphasis on the fundamental economic trade-offs and allocation problems due to scarcity of resources
- To use graphical methods to illustrate how microeconomic concepts can be applied to analyze real-life situations

Learning outcomes

The Learning Outcomes of this course are as follows:

- By studying the course, the students will understand economic trade-offs and opportunities.
- By studying the course, the students will understand the fundamentals of market mechanisms and government interventions.

SYLLABUS OF DSC-1

UNIT – I: Introduction to economic trade-offs (12 Hours)

Resources and opportunities, Gains from trade, Individual and society

UNIT – II: How market works (16 Hours)

Supply and demand, Price and resource allocation, Elasticity, Market, trade and welfare

UNIT – III: Role of government (16 Hours)

Taxation, Public good, Inequality and poverty

UNIT – IV: Individual decision and interactions (16 Hours)

Decision versus strategic interaction, How to think about strategic interactions, Real life

examples

Practical component (if any) - NIL

Essential/recommended readings:

- Mankiw, N. G. (2018). *Principles of Microeconomics* 8th ed.
- Frank, R. H., & Cartwright, E. (2010). *Microeconomics and behavior*. New York: McGraw-Hill.
- Dixit, A. K., & Skeath, S. (2015). *Games of strategy*: Fourth international student edition. WW Norton & Company.
- Acemoglu, D., Laibson, D., & List, J. (2017). *Microeconomics*. Pearson.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 2 (DSC-2): BASIC MATHEMATICS FOR ECONOMIC ANALYSIS

CREDIT DISTRIBUTION, ELIGIBILITY AND PREREQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Mathematics for Economic Analysis ECON021 | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- The objective of the course is train basic algebras that enables the study of economic theory at the undergraduate level, specifically the courses on microeconomics, macroeconomics, statistics and econometrics set out in this syllabus. In this course, particular economic models are not the ends, but the means for illustrating the method of applying mathematical techniques to economic theory in general. It contains understanding of basic functions, relations, real number systems, set operations, linear algebras and matrix operations used in economics.

Learning outcomes

The Learning Outcomes of this course are as follows:

- The course equips the students with exposition of economic problems with formal pre- situations algebraically and offers solution techniques to find equilibrium analysis. These tools are necessary for anyone seeking employment as an analyst in the corporate and policy framing world.

SYLLABUS OF DSC- 2

UNIT – I: Economic

Models (20 Hours)

Ingredients of mathematical models - variables, constants, parameters, equations, and identities; Real number system; Sets and functions; relations and their proper- ties; types of functions; functions of more than one variables; Limit, sequences and series: convergence, algebraic properties and applications; continuous functions: characterisation, properties with respect to various operations and applications; differentiable functions: characterisation, properties with respect to various operations and applications; second and higher order derivatives: properties and applications.

UNIT – II: Equilibrium Analysis in Economics (20 Hours)

Meaning of equilibrium; partial market equilibrium - linear and non-linear models; General market equilibrium

UNIT – III: Linear Models and Matrix Algebras and their Applications in Economics (20 Hours)

Matrix operations, Determinants and Cramer's Rule and their applications

Practical component (if any) - NIL

Essential/recommended readings

- Chiang, A and Wainwright, K. (2005). Fundamental methods of mathematical economics. Boston, Mass. McGraw-Hill/Irwin.
- Sydsaeter, K., Hammond, P. (2002). *Mathematics for economic analysis*. Pearson Educational.
- Hoy, M., Livernois, J., McKenna, C., Rees, R., Stengos, T. (2001). *Mathematics for Economics*, Prentice-Hall India.

18. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 52-38 dated 08.12.2022 regarding range of Generic Electives (GEs) offered to certain category of students of BA/B.Com Programme under UGCF-2022

Add the Following :

The range of Generic Electives (GEs) offered to certain category of students of

B.A./B.Com. Programme under UGCF 2022 have been revised keeping in view multidisciplinary and interest of students as under:

- (i) Students of B.A. program with two languages as the core disciplines be offered the open pool of Generic Electives (and not restrict them to choose only the GE-Languages)
- (ii) Students of B.A. program with one language as the core disciplines be offered to study only one GE-language (which will be two courses of the same language that may be studied as GE-1 and GE-3 **or** GE-2 and GE-4). The other GEs shall be the open pool of GEs.
- (iii) B.A./B.Com. Programme students who have never studied any Modern Indian Language (MIL) up to 8th Class shall be offered the open pool of GEs.

19. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 38-1-15 dated 8.12.2022 regarding Ability Enhancement Course (AECs) for Foreign Students in 1st Semester

Add the following:

Ability Enhancement Course (AECs)
Under UGCF-2022

Listed under Appendix-IIA to the Ordinance V (2-A) of the Ordinances of the
University

(With effect from academic year 2022-23)

**FOLLOWING IS THE SYLLABUS OF ABILITY ENHANCEMENT COURSE (AEC)
OFFERED UNDER UGCF-2022 IN FIRST SEMESTER FOR FOREIGN STUDENTS**

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Learning Objectives

1. विद्यार्थी की भाषाई दक्षता और भाषा-कौशल को बढ़ावा देना
2. व्यावहारिक कार्य को प्रोत्साहन देना

Learning outcomes

1. भाषा के शुद्ध उच्चारण, रचनात्मक लेखन, औपचारिक लेखन से अवगत कराना
2. अभिव्यक्ति कौशल का विकास

सेमेस्टर 1:

इकाई 1: लिपि ज्ञान

- वर्ण माला : स्वर, व्यंजन

- संयुक्त व्यंजन
- अनुस्वार एवं अनुनासिक
- विराम चिह्न
- संज्ञा-सर्वनाम

इकाई 2: हिंदी की आधारभूत शब्दावली (हिंदी एवं अंग्रेजी)

- फल-सब्जियाँ
- रंग-पर्व उत्सव
- सप्ताह के दिन
- ऋतुएं
- पर्यटन स्थल
- रिश्ते-नाते
- शरीर के अंग
- खाने-पीने की चीजें
- प्रमुख वस्तुएं

संदर्भ ग्रंथ :

1. देवनागरी लिपि एवं हिंदी वर्तनी का मानकीकरण, केंद्रीय हिंदी निदेशालय, शिक्षा विभाग, मानव संसाधन विकास मंत्रालय, भारत सरकार, नई दिल्ली
2. Basic Hindi Course for Foreigners, Central Hindi Institute, Agra, U.P Basic Hindi Vocabulary, Ministry of Education, Govt. of India.
3. English-Hindi Conversational Guide & Hindi-English Conversational Guide, Central Hindi Directorate, New Delhi
4. Fairbanks, G & Mishra, S.G. Spoken and written Hindi Cornell University Press, NewYork
5. Fairbanks, G & Pandit, P.B.: A Spoken approach, Deccan College, Pune
6. McGregor, R.S. Exercises in spoken Hindi, Oxford University Press, Oxford, England.

9. हिंदी : शब्द, अर्थ, प्रयोग: हरदेव बाहरी, अभिव्यक्ति प्रकाशन, दिल्ली
10. हिंदी का समसामयिक व्याकरण: यमुना काचरू, मैकमिलन, नई दिल्ली

20. Amendment to Ordinance V (2) & VII. [EC. Res. 78-7 dated 25.03.2022] regarding course curriculum prepared on competency based UG curriculum for MBBS course - 2nd Professional (New Scheme).

**Curriculum document for
MBBS CBME Phase II Batch for Microbiology**

(Maulana Azad Medical College, University College of Medical Sciences & Lady Hardinge Medical College New Delhi)

1. VISION

To provide state of the art, reliable diagnostic services and quality medical education that integrates recent advances and research to foster the development of a highly knowledgeable, skilled and competent undergraduate and postgraduate student in the subject of clinical microbiology.

MISSION

- To develop state of art facility, in terms of quality infrastructure and trained manpower so as to enable the students of medical microbiology to appreciate the aetiology, pathogenesis and laboratory diagnosis of infectious diseases.
- To deliver timely and quality diagnostic services to patients.
- To create an environment for need based quality research among faculty and Students.

2. OVERALL LEARNING OBJECTIVES FOR UNDERGRADUATE MEDICAL EDUCATION

The objectives are developed to foster the development of an 'Indian Medical Graduate' possessing requisite knowledge, skills and values with regard to infectious diseases as outlined in Competency Based Medical Education curriculum of National Medical Commission.

The undergraduate learner should be able to demonstrate:

1. An understanding of role of microbial agents in health and disease.
2. An understanding of the immunological mechanisms in health and disease.
3. Ability to correlate the natural history, mechanisms and clinical manifestations of infectious diseases as they relate to the properties of microbial agents.
4. Knowledge of the principles and application of infection control measures.
5. An understanding of the basis of choice of laboratory diagnostic tests and their interpretation, antimicrobial therapy, control and prevention of infectious diseases.

3. **COMPETENCIES:** Table 1 and Annexure I

4. **COURSE** (Topics, theory practical, laboratory clinical): As per CBME curriculum laid down by NMC for Indian medical Graduate: Table 1

5. **TEACHING LEARNING METHODS:** Table 1

The curriculum is based on NMC Document UG curriculum Part-I (available at <https://www.nmc.org.in/wp-content/uploads/2020/01/UG-Curriculum-Vol-I.pdf>). The Teaching learning methods, assessment tools, horizontal and vertical integration will be based on the document form NMC.

Subtopics to be taught in Microbiology for fulfillment of competencies

| Topics | Topics |
|--|--|
| Gen Microbiology | Immunology |
| Introduction, history, biosafety, universal precautions | Introduction |
| Bacteria in health and disease | Structure & Functions of Immune System |
| Bacterial Morphology & Physiology | Antigen & antibody |
| Bacterial Genetics | Antigen-Antibody Reaction |
| Isolation & Identification of Bacteria including Culture Media & Culture Methods | Complement System |
| Antimicrobial Resistance | Humoral and cellular Immune Response |

| | |
|--|---|
| Bacterial Pathogenicity | Hypersensitivity |
| Sterilization & Disinfection | Autoimmunity |
| Gen properties Virus and lab diagnosis | Transplantation & Immunodeficiency |
| Gen properties of fungi | Tumour Immunology, Immunohematology, Immunoprophylaxis |
| Gen properties of parasites | GIT & Hepatobiliary |
| CVS & Blood | Diarrhoea & dysentery, Cholera, |
| Rheumatic fever & Infective endocarditis | Enteric fever |
| Infections causing anaemia | Food poisoning |
| Kala Azar & Toxoplasma | Intestinal Protozoal, nematodes & Trematodes infections |
| Malaria & Filariasis | Helicobacter/APD |
| Brucella, Borrelia, Listeria, S minor | Viral GI infections including hepatitis |
| Viral Haemorrhagic fevers | Respiratory Infections |
| HIV | Bacterial URTI |
| Musculoskeletal system skin and soft tissues infections | Viral pneumonia |
| Anaerobic infections | Bacterial LRTI |
| Bone & Joint Infections | Genitourinary & STD infections |
| Skin & soft tissue infections | UTI, E Coli, Proteus, Klebsiella |
| CNS infections | STD: Syphilis & gonorrhoea |
| Bacterial meningitis | Gonorrhoea |
| Viral Meningitis | |
| Encephalitis | |
| Zoonotic diseases and miscellaneous | |
| Zoonotic infections | Emerging and re-emerging infections |
| Oncogenic virus | Opportunistic infections |
| Infection control, PPE, BMW & HAI | Environmental microbiology |

Table 1: Specific learning objective and topic as per CBME

| Session | SLOs |
|--|--|
| General Microbiology & Immunology | |
| MI1.1 Describe the different causative agents of Infectious diseases, the methods used in their detection, and discuss the role of microbes in health and disease | |
| MI1.1a Introduction – Microbiology & History, Biosafety & standard precautions | <ol style="list-style-type: none"> 1. Describe the scope of clinical Microbiology 2. Describe the different branches of Microbiology with suitable examples 3. Describe Whittaker classification 4. Enumerate important milestones of Medical Microbiology 5. Describe contribution of Louis Pasteur & Robert Koch in |

| | |
|--|--|
| | <p>details</p> <ol style="list-style-type: none"> Describe the development of Chemotherapy and contributions of Ehrlich and Fleming Describe standard precautions, Biosafety Describe various components, & their use of standard precautions. |
| MI 1.1b Introduction of Bacteria in health and disease | <ol style="list-style-type: none"> Describe Normal flora and its benefits Differentiate between pathogen, commensals, and saprophyte. Describe opportunistic pathogen Describe the pathogen Define: Health, Disease, infectious agents, commensalism, parasite, pathogen and opportunistic pathogen. Explain the pathogenesis of bacterial infection. Discuss the various microbial factors contributing to disease. Enumerate the Global burden of common infectious diseases Describe common infectious diseases in India |
| MI 1.1c Bacterial Morphology | <ol style="list-style-type: none"> Describe salient feature of eukaryotic and prokaryotic cell Describe morphology cell structure, different shapes and arrangement of bacterial cells Describe the structure and function of Cell organelles |
| MI 1.1d Physiology & Metabolism | <ol style="list-style-type: none"> Describe Physiology and metabolism of bacteria. Describe the growth curve of bacteria Describe anaerobiosis |
| MI 1.1e General principle of identification of Bacteria | <ol style="list-style-type: none"> Microscopy and culture of bacteria Enumerate common culture media and biochemical reactions and its use Describe the use of automation in identification of bacteria Enumerate molecular techniques for identification |
| MI1.1f Bacterial genetics | <ol style="list-style-type: none"> Discuss Replication, mechanism of gene transfer, mutation and gene rearrangement in bacteria. Describe Principals of genetic engineering. |
| MI1.1g General Properties and Classification of Viruses (Including Bacteriophages) | <ol style="list-style-type: none"> Describe the general features of virus Describe the structure and symmetry of viruses Describe viral replication Classify viruses Describe bacteriophages, its replication cycles and use |
| MI1.1h Laboratory Diagnosis of Viral infection | <ol style="list-style-type: none"> Enumerate the technique used in viral lab diagnosis Describe the use of Microscopy and inclusion bodies Describe tissue culture and detection of viral growth in it Describe serological methods for Lab Diagnosis Describe the molecular methods for laboratory diagnosis of viral diseases |

| | |
|--|---|
| MI1.1i General Properties and Classification of Fungi | <ol style="list-style-type: none"> 1. Describe the general features of Fungi 2. Classify fungi on morphological and taxonomical bases 3. Enumerate different mycoses with suitable example 4. Describe lab diagnosis of fungal infections |
| MI1.1j General Properties and Classification of Parasites | <ol style="list-style-type: none"> 1. Classify parasites giving suitable examples 2. Enumerate common parasitic pathogen 3. Classify protozoa and helminths giving suitable examples 4. Describe various modes of transmission of different parasites. 5. Enumerate different methods used for laboratory diagnosis of parasitic diseases |
| MI 1.3 Describe the epidemiological basis of common infectious diseases | |
| MI 1.3 Describe the epidemiological basis of common infectious diseases | <ol style="list-style-type: none"> 1. Describe host parasite relationship 2. Discuss the various sources and reservoirs of infections. 3. Describe different routes of transmission with suitable examples 4. Enumerate common strategies to prevent infectious disease. 5. Describe the various epidemiological patterns of infectious disease. |
| MI 1.4 Classify and describe the different methods of sterilization and disinfection. Discuss the application of the different methods in the laboratory, in clinical and surgical practice | |
| MI 1.4 Sterilization & Disinfection | <ol style="list-style-type: none"> 1. Define: Sterilization, disinfection, asepsis, antiseptics, and decontamination. 2. List different methods of sterilisation and disinfection 3. Describe various methods of sterilization (principle, method, use). 4. Classify disinfectants and describe various methods of disinfection. 5. Explain various monitoring methods applied for individual methods of sterilisation procedures and disinfectants . 6. Enumerate new methods of sterilization |
| MI 1.5 Choose the most appropriate method of sterilization and disinfection to be used in specific situations in the laboratory, in clinical and surgical practice | |
| MI 1.5 Sterilization & Disinfection | <ol style="list-style-type: none"> 1. Differentiate between sterilization and disinfection. 2. Describe Spaulding Classification of medical devices. 3. Describe the practical use of disinfectants according to clinical condition. 4. Recommend various methods of sterilization / disinfection for medical devices. 5. Describe the process and functioning of CSSD. |
| MI1.6 Describe the mechanisms of drug resistance, and the methods of antimicrobial susceptibility testing and monitoring of antimicrobial therapy | |

| | |
|--|--|
| MI 1.6 Antimicrobial agents, mechanisms of antimicrobial resistance and antimicrobial susceptibility testing | <ol style="list-style-type: none"> 1. Classify antimicrobial agents and their mechanism of resistance. 2. Define and classify antimicrobial resistance. 3. List and describe mechanism of action of antimicrobial agents. 4. Describe acquired and intrinsic resistance. 5. Describe various methods of antimicrobial susceptibility testing. 6. Describe disc diffusion methods, E test and MIC methods in detail. 7. Define: Bacteriostatic, bactericidal, pharmacodynamics, pharmacokinetics, MIC, MBC, agar dilution. 8. Describe relevance of AST. 9. Describe antibiotic stewardship program, its utility and principles. |
| MI1.7 Describe the immunological mechanisms in health | |
| MI1.7a Introduction to immunity | <ol style="list-style-type: none"> 1. Define and classify immunity 2. Define and contrast innate and acquired immunity 3. Describe mechanisms of innate immunity 4. Define and describe the salient features of active, passive and acquired immunity 5. Define local immunity, herd immunity and adoptive immunity |
| MI 1.7b Structure and function of immune system | <ol style="list-style-type: none"> 1. Describe the structure and function of Central and peripheral lymphoid organs. 2. Describe the development of T and B lymphocytes 3. Describe the types of T and B lymphocytes 4. Compare and Contrast T cells and B cells 5. Describe morphology and function of macrophage 6. Describe the structure and functions of human MHC gene complex 7. Outline the other cells of Immune System 8. Describe class, properties and functions of important cytokines |
| MI 1.7c Antigens | <ol style="list-style-type: none"> 1. Define antigen and antigenicity 2. Define and classify epitope & haptens 3. Describe alloantigens, isoantigen, heteroantigen, autoantigen and heterophile antigen. 4. Define immunogenicity and describe the factors affecting it. 5. Describe various determinants of antigenicity 6. Define adjuvant with examples 7. Describe mechanisms of adjuvant 8. Describe T cell dependent/independent antigens and superantigens |
| MI1.7d Antibody | <ol style="list-style-type: none"> 1. Define antibody 2. Describe the structure and function of antibody |

| | |
|---|---|
| | <ol style="list-style-type: none"> Classify immunoglobulins Describe the structure and functions of IgG, IgM, IgA, IgE and IgD Describe antigenic determinants of immunoglobulins Describe abnormal Immunoglobulins Define the monoclonal antibody Describe the hybridoma technique for production of monoclonal antibody Enumerate various applications of monoclonal antibody |
| MI 1.7e Antigen Antibody reactions | <ol style="list-style-type: none"> Describe general properties of antigen antibody reactions. Describe lattice hypothesis Classify antigen antibody reactions. Describe the principle, method, types and uses of precipitation, agglutination and neutralization reaction. Describe the principle, method, types and uses of complement fixation test, ELISA, immunofluorescence assay, CLIA. Radioimmuno assay, western blot and rapid tests. |
| MI 1.7f Complement | <ol style="list-style-type: none"> Define complement and enumerate complement activation pathways. Describe the classical and alternate pathway of complement Compare and contrast Classical and Alternative complement pathways Describe the biological effects of complement Enumerate common complement deficiency and associated diseases |
| MI 1.8 Describe the mechanisms of immunity and response of the host immune system to infections | |
| Immune response | <ol style="list-style-type: none"> Define cell mediated and humoral immune response Describe the process of antigen presentation Describe the cell mediated immune response Describe humoral immune response Describe the activation and differentiation of B cells Describe, compare and contrast the events of primary and secondary immune response |
| MI1.9 Discuss the immunological basis of vaccines and describe the Universal Immunisation schedule | |
| MI 1.9 Immunoprophylaxis | <ol style="list-style-type: none"> Define immunoprophylaxis Describe the types and explain the scientific basis of vaccines [live attenuated, killed, toxoid, subunit Enumerate commonly used vaccines Describe Universal immunisation program and National Immunisation Schedule Describe the 'Cold Chain System" and the steps involved in vaccine development |

| | |
|--|--|
| | 6. Describe the newer approaches for vaccine development |
|--|--|

MI1.10 Describe the immunological mechanisms in immunological disorder (hypersensitivity, autoimmune disorders and immunodeficiency states) and discuss the laboratory methods used in detection.

| | |
|-------------------------------------|--|
| MI 1.10a Hypersensitivity | <ol style="list-style-type: none"> 1. Define hypersensitivity. 2. Classify hypersensitivity and describe their features. 3. Describe the mechanism and clinical presentation of Type I,II,III & IV hypersensitivity |
| MI 1.10b Autoimmune | <ol style="list-style-type: none"> 1. Define Autoimmunity 2. Describe mechanisms of immune (central and peripheral) tolerance 3. Describe mechanisms of autoimmunity 4. Describe the pathogenesis of common autoimmune diseases 5. Describe laboratory tests of autoimmune diseases 6. Describe the role of Immunofluorescent test in diagnosis of autoimmune diseases. 7. Describe newer approaches for treatment of autoimmune diseases |
| MI1.10c Immunodeficiency | <ol style="list-style-type: none"> 1. Define and enumerate Immunodeficiency 2. Classify immunodeficiency diseases 3. Describe common immunodeficiency diseases |

MI 1.11 Describe the immunological mechanisms of transplantation and tumor immunity

| | |
|------------------------------|--|
| Transplant & tumour immunity | <ol style="list-style-type: none"> 1. Describe the role of Histocompatibility antigens in transplant immunology 2. Describe the types of graft rejection 3. Describe mechanism and factors affecting graft rejection 4. Describe graft versus host reaction 5. Describe approaches for prevention of graft rejection 6. Describe Tumor antigens (TSTA and TATA) 7. Describe mechanism of immune response against tumour cells 8. Describe immune surveillance theory 9. Explain the role of vaccine, monoclonal antibodies and cytokines in cancer immunotherapy. |
|------------------------------|--|

CVS and Blood

MI2.1 Describe the etiologic agents in rheumatic fever and their diagnosis

| | |
|--|---|
| MI2.1 Rheumatic fever | 1. Define Rheumatic fever and name it's causative agent 2. Classify Streptococcus species 3. Describe the morphology, pathogenesis, toxins, virulence factors, antigenic structures, clinical features, epidemiology of streptococcus pyogenes 4. Describe the infections caused by S pyogenes and list the suppurative and non-suppurative sequelae of Streptococcus pyogenes 5. Describe the pathogenesis, clinical features and complications of Rheumatic fever 6. Describe the laboratory diagnosis of rheumatic fever and of other infection caused by beta haemolytic Streptococci. |
| MI2.2 Describe the classification etio-pathogenesis, clinical features and discuss the diagnostic modalities of Infective endocarditis | |
| MI 2.2 Infective endocarditis (S. viridans, CONS, HACEK Enterococcus) | 1. Classify IE and enumerate the causative organisms 2. Describe the morphology, pathogenesis, virulence factors, antigenic structures, clinical features, epidemiology of S. viridans, CONS, HACEK organisms, Enterococcus 3. Describe the pathogenesis and clinical features of infective endocarditis. 4. Describe the Laboratory diagnosis of IE. 5. Briefly discuss the antimicrobial treatment of IE |
| MI2.4 List the common microbial agents causing anemia. Describe the morphology, mode of infection and discuss the pathogenesis, clinical course, diagnosis and prevention and treatment of the common microbial agents causing Anemia | |
| MI 2.4 Infections causing anemia: [Trematodes (Schistosoma), Nematodes (Ancylostoma, N. americanus, Trichuris trichuria) , Cestodes (D latum)]. | 1. Enumerate the microbial agents causing Anaemia 2. Describe morphology, modes of transmission, pathogenicity, life cycle of parasites causing anaemia ([Trematodes (Schistosoma), Nematodes (Ancylostoma, N. americanus, Trichuris trichuria) , Cestodes (D latum)]) 3. Discuss clinical course of Anaemia caused by each microbial agent 4. Describe laboratory diagnosis of each microbial agent causing Anaemia. 5. Describe treatment, prevention and control of each microbial agent |
| MI2.5 Describe the etio-pathogenesis and discuss the clinical evolution and the laboratory diagnosis of kalaazar, malaria, filariasis and other common parasites prevalent in India | |

| | |
|---|---|
| MI2.5a Kala Azar (Leishmania)& sleeping sickness (Trypanosoma) | <ol style="list-style-type: none"> 1. Classify the common Leishmania species causing human disease and the clinical syndromes caused by them 2. Describe the morphology, modes of transmission, pathogenicity, life cycle of Leishmania donovani and Trypanosoma 3. Discuss the clinical presentation, complications and laboratory diagnosis of kala azar and trypanosomiasis. 4. Describe PKDL 5. Describe treatment, prevention and control of kala azar and trypanosomiasis. 6. Classify the Trypanosomes infecting man and the diseases caused by them |
| MI2.5b Toxoplasmosis | <ol style="list-style-type: none"> 1. Describe the morphology, modes of transmission, pathogenicity, life cycle of Toxoplasma gondii. 2. Describe the clinical presentation, complications and laboratory diagnosis of Toxoplasmosis. 3. Discuss the treatment, prevention and control of Toxoplasmosis. |
| MI 2.5c Malaria and Babesia. | <ol style="list-style-type: none"> 1. Enumerate the causative Plasmodium species of human malaria 2. Describe the morphology, modes of transmission, pathogenicity, life cycle of Plasmodium species. 3. Describe the clinical presentation, complications immunity and laboratory diagnosis of malaria. 4. Discuss the treatment, prevention and control of malaria. 5. Describe the morphology, modes of transmission, pathogenicity, life cycle of Babesia. 6. Describe the clinical presentation and laboratory diagnosis of Babesiosis |
| MI 2.5d Filariasis | <ol style="list-style-type: none"> 1. Enumerate the filarial nematodes causing lymphatic filariasis 2. Describe the morphology, modes of transmission, pathogenicity, life cycle of loaloa, oncocercavolulus, Wuchereriabancrofti and Brugiamalayi. 3. Describe the clinical presentation, complications immunity and laboratory diagnosis of filariasis. 4. Discuss the treatment, prevention and control of filariasis. 5. Differentiate between the microfilaria of loaloa, oncocercavolulus, Wuchereriabancrofti and Brugiamalayi. |
| MI2.5e Miscellaneous Infections of blood:Brucella. | <ol style="list-style-type: none"> 1. Describe the epidemiology of Brucella 2. Describe the classification, morphology, and virulence factors of Brucella 3. Describe the epidemiology pathogenesis, mode of transmission, clinical features and laboratory diagnosis of Brucellosis 4. Describe the complications, treatment, prevention and control of Brucellosis. |

| | |
|--|--|
| MI2.5e Miscellaneous Infections of blood: Borrelia, Listeria, Spirillum minor, Parvovirus & EBV. | <ol style="list-style-type: none"> 1. Describe the epidemiology, morphology, virulence factors and pathogenicity of Borrelia, Listeria, Parvovirus and Epstein Barr Virus and spirillum minor. 2. Describe the pathogenesis, clinical features and diagnostic modalities of infections caused by these agents. 3. Describe the complications, treatment, prevention and control of listeriosis, rat bite fever, relapsing fever and Lyme disease. |
| MI2.5f Viral haemorrhagic fevers: Arboviruses, Filovirus, rebovirus | <ol style="list-style-type: none"> 1. Enumerate and classify the viruses causing haemorrhagic fevers. 2. Describe the morphology, mode of transmission pathogenesis and virulence factors of viral agents causing VHF. 3. Describe the clinical features, complications and laboratory diagnosis of VHF. 4. Describe treatment prevention and control of VHF. |
| MI2.7 Describe the epidemiology, the etio- pathogenesis, evolution complications, opportunistic infections, diagnosis, prevention and the principles of management of HIV | |
| MI 2.7 HIV | <ol style="list-style-type: none"> 1. Describe morphology, antigenic structure, pathogenesis, serotypes, replication of HIV. 2. Describe clinical features including WHO clinical staging of HIV/AIDS for adults 3. Describe global and Indian epidemiology of AIDS. 4. Enumerate opportunistic infections occurs in HIV infected people 5. Describe laboratory diagnosis of HIV/AIDS 6. Describe NACO strategy for HIV diagnosis 7. Describe treatment strategies in brief. 8. Describe PEP as per NACP guidelines. 9. List HIV vaccine strategies |

GIT Infections

MI3.1 Enumerate the microbial agents causing diarrhea and dysentery. Describe the epidemiology, morphology, pathogenesis, clinical features and diagnostic modalities of these agents

| | |
|--|---|
| MI3.1a Gastro intestinal tract infections: general, Diarrhoea, Dysentery, Introduction to Enterobacteriaceae, E coli, Shigella, Campylobacter, other Enterobacteriaceae members. | <ol style="list-style-type: none"> 1. Define diarrhoea and dysentery. 2. Describe the epidemiology of diarrhoea and dysentery 3. Enumerate the microbial agents causing diarrhoea and dysentery 4. Describe the pathogenesis, clinical features and complications of diarrhea & dysentery. 5. Differentiate the clinical features of diarrhoea and dysentery. 6. Describe laboratory diagnosis of diarrhoea and dysentery. 7. Describe the epidemiology, morphology, cultural characteristics, virulence markers, identification strategies of diarrheagenic E. coli, Shigella & other Enterobacteriaceae causing diarrhoea and dysentery. |
| MI3.1b Cholera: Vibrio, Plesiomonas and Aeromonas | <ol style="list-style-type: none"> 1. Define cholera. 2. Describe the epidemiology of cholera 3. Describe the pathogenesis, clinical features and complications of cholera. 4. Describe various methods of clinical and laboratory diagnosis of cholera. 5. Describe the epidemiology, morphology, cultural characteristics, virulence markers, identification strategies of Vibrio cholera, Aeromonas, Plesiomonas 6. Describe the treatment, prevention and control of cholera. |
| MI3.1c Parasitic Gastro intestinal tract infections: Entamoeba and Giardia | <ol style="list-style-type: none"> 1. Describe the epidemiology, morphology, life cycle, pathogenesis, clinical features and diagnosis of Entamoeba histolytica, Balantidium coli and Giardia 2. Describe the epidemiology, morphology, life cycle, pathogenesis, clinical features and diagnosis of coccidian parasites. 3. Describe the treatment, prevention and control of infections caused by Entamoeba histolytica, Balantidium coli, Giardia and coccidian parasites |
| MI3.1d Viral GI infections | <ol style="list-style-type: none"> 1. Describe the epidemiology, morphology, pathogenesis, clinical features and diagnostic modalities of viral gastroenteritis. 2. Describe the epidemiology, morphology, pathogenesis, immunity, clinical features, |

| | |
|---|---|
| | diagnosis, prevention and control of gastroenteritis caused by rotavirus, adenovirus, Norwalk agent and norovirus |
| MI 3.1e Parasitic GI Infections-I & II: Intestinal nematodes (Ascaris, Enterobius Trichinella Strongyloidiasis) Trematodes (Liver fluke etc.) | <ol style="list-style-type: none"> 1. Describe the epidemiology, morphology, life cycle and pathogenesis, of cestodes (Taenia saginata, T. solium, H. nana, Echinococcusgranuloses) 2. Describe the epidemiology, morphology, life cycle, pathogenesis, clinical features and diagnosis of trematodes (Fasciola hepatica & F. buski) 3. Describe the epidemiology, morphology, life cycle, pathogenesis, clinical features and diagnosis of intestinal nematodes. 4. Describe the laboratory diagnosis, treatment, control and prevention of diseases caused by these organisms. |
| MI 3.3 Describe the enteric fever pathogens and discuss the evolution of the clinical course and the laboratory diagnosis of the diseases caused by them | |
| MI 3.3 GI Infections: Enteric fever | <ol style="list-style-type: none"> 1. List the various pathogens causing enteric fever. 2. Describe the pathogenesis of Typhoid & paratyphoid fever. 3. Describe the morphology, virulence factors, cultural characteristics and identification strategies for Salmonella Typhi, S. Paratyphi A and B. 4. Describe the laboratory diagnosis of typhoid and paratyphoid fever. 5. Describe clinical course, epidemiology, treatment and complications of enteric fever. 6. Describe multidrug resistant Salmonella 7. Discuss treatment, prevention and control of enteric fever. |
| MI3.5 Enumerate the causative agents of food poisoning and discuss the pathogenesis, clinical course and laboratory diagnosis | |
| MI 3.5 Food Poisoning {Staphylococcus aureus Bacillus cereus Clostridium perfringens Bacillus cereus Vibrio cholerae Vibrio parahaemolyticus Enterotoxigenic Escherichia coli | <ol style="list-style-type: none"> 1. Define and classify various types of Food Poisoning. 2. Enumerate and classify the causative agents of food poisoning and commonly incriminated food items 3. Describe the pathogenesis, clinical course with relation to the etiological agent. 4. Describe the laboratory diagnostic of food |

| | |
|--|------------|
| Enterohemorrhagic Escherichia coli Non typhoidal Salmonella Shigella spp.} | poisoning. |
|--|------------|

MI3.6 Describe the etio-pathogenesis of Acid peptic disease (APD) and the clinical course. Discuss the diagnosis and management of the causative agent of APD

| | |
|---|--|
| MI 3.6 APD: Helicobacter pylori | <ol style="list-style-type: none"> 1. Describe Acid peptic disease. 2. Describe clinical course of APD. 3. Describe the pathogenesis of APD due to H. pylori 4. Describe the morphology, cultural characteristics, and identification strategies of Helicobacter pylori. 5. Describe diagnosis, treatment, control and prevention of acid peptic disease. |
|---|--|

MI3.7 Describe the epidemiology, the etio-pathogenesis and discuss the viral markers in the evolution of Viral hepatitis. Discuss the modalities in the diagnosis and prevention of viral hepatitis

| | |
|-----------------------------------|--|
| MI 3.8a Viral Hepatitis | <ol style="list-style-type: none"> 1. Define and describe viral hepatitis 2. Enumerate and describe the viruses causing hepatitis 3. Describe the epidemiology, pathogenesis and clinical features of hepatitis A, B, C, D, E and G viruses. 4. Discuss the viral markers in the evolution of acute and chronic Viral hepatitis. 5. Describe the modalities in the diagnosis, treatment and prophylaxis of hepatitis A, B, C, D, E and G viruses. |
|-----------------------------------|--|

MI3.8 Choose the appropriate laboratory test in the diagnosis of viral hepatitis with emphasis on viral markers

| | |
|-----------------------------------|---|
| MI 3.8b Viral Hepatitis | <ol style="list-style-type: none"> 1. Enumerate and describe the viral markers diagnostic of viral hepatitis 2. Describe the evolution, rise and fall of various markers. 3. Discuss the viral markers in the evolution of Viral hepatitis (A, B, C, D, E and G). 4. Describe the utility of each marker with respect to clinical stage of hepatitis. |
|-----------------------------------|---|

Skin and soft tissue infections

MI 4.1 Enumerate the microbial agents causing anaerobic infections. Describe the etiopathogenesis, clinical course and discuss the laboratory diagnosis of anaerobic infections

| | |
|---|--|
| MI 4.1a Anaerobes and anaerobic infections including anaerobic culture methods | <ol style="list-style-type: none"> 1. Define anaerobes 2. Describe features of anaerobic infections 3. Enumerate and classify pathogenic anaerobic bacteria 4. Describe the pathogenesis, clinical course, laboratory diagnosis and complications of common anaerobic infection. 5. Describe different methods of anaerobiosis |
| MI4.1b Tetanus and gas gangrene | <ol style="list-style-type: none"> 1. Define gas gangrene 2. Enumerate the causative agents of gas gangrene 3. Describe the morphology, virulence factors, cultural characteristics of Clostridium perfringens. 4. Describe the pathogenesis, clinical course and laboratory diagnosis of gas gangrene. 5. Describe the treatment, prevention and control of gas gangrene. 6. Define tetanus and name the causative agent 7. Describe the Morphology, virulence factors, cultural characteristics of Clostridium tetani 8. Describe the pathogenesis, clinical course and laboratory diagnosis of tetanus 9. Describe the treatment, prevention and control of tetanus |
| MI4.1c Botulinum and Miscellaneous anaerobes} | <ol style="list-style-type: none"> 1. Define botulism and its types 2. Describe the morphology, virulence markers, cultural characteristics of Clostridium botulinum. 3. Describe the epidemiology, pathogenesis, clinical manifestations, complications & laboratory diagnosis of botulism 4. Describe role of anaerobic organisms as normal gut flora 5. Describe antibiotic associated colitis and its aetiology 6. Describe the pathogenesis, clinical features and management of antibiotic associated colitis 7. Enumerate non sporing anaerobes 8. Enumerate the diseases caused by common non sporing anaerobes 9. Describe the pathogenesis and clinical features of various infections caused by non sporing anaerobes. 10. Discuss laboratory diagnosis for infections caused by nonsporing anaerobes |
| MI4.2 Describe the etiopathogenesis, clinical course and discuss the laboratory diagnosis of bone & joint infections | |
| MI4.2 Joint and bone infections: Osteomyelitis & arthritis (Staph aureus, CONS) Parvovirus | <ol style="list-style-type: none"> 1. Enumerate common bacterial and viral agents causing osteomyelitis, septic arthritis, diabetic foot infections 2. Describe the pathogenesis, clinical features and laboratory diagnosis of osteomyelitis and arthritis. |

| | |
|--|--|
| | <ol style="list-style-type: none"> 3. Differentiate between gonococcal and non gonococcal arthritis 4. Define osteomyelitis 5. Enumerate causative agents of osteomyelitis 6. Describe the pathogenesis, clinical features, laboratory diagnosis and management of Osteomyelitis. |
| MI4.3 Describe the etio-pathogenesis of infections of skin and soft tissue and discuss the clinical course and the laboratory diagnosis | |
| MI 4.3 a Skin and soft tissue infections: Classification, etiology and general considerations, Parasitic Skin manifestations (Ectoparasites, Larva migrans, PKDL) | <ol style="list-style-type: none"> 1. Enumerate the organisms of normal skin flora 2. Discuss the role of normal flora of skin 3. Define and classify SSTIs 4. Describe the varied clinical presentations with etiological agents of SSTIs 5. Describe the etiopathogenesis, clinical presentation and management of superficial and deep skin infections 6. Describe lab diagnosis of various types of SSTI 7. Enumerate the parasites involved in skin and soft tissue infections. 8. Describe etiology, types, clinical presentation and management of larva migrans. 9. Describe etiology, clinical presentation and management of PKDL |
| MI 4.3b: Leprosy and NTM | <ol style="list-style-type: none"> 1. Define and classify leprosy 2. Describe morphology and cultural characters of M.leprae 3. Describe the pathogenesis and clinical presentations in leprosy 4. Describe the role of immunity in leprosy 5. Describe lepra reactions 6. Describe lab diagnosis, treatment and control of leprosy 7. Describe and classify Non tuberculus Mycobacteria (NTM). 8. Describe the etiopathogenesis, clinical presentation and management of infections caused by NTM |
| MI 4.3 c: Viral exanthemas | <ol style="list-style-type: none"> 1. Enumerate the causes of viral exanthematous infections 2. Describe the etiopathogenesis of viral exanthematous infections 3. Describe the morphology, virulence factors, epidemiology and immunity of Measles virus, Chicken pox virus, small pox virus and Rubella virus. 4. Describe the clinical features, complication and diagnosis of measles, small pox, chicken pox and Rubella. |

| | |
|--|---|
| | 5. Describe the treatment, prevention and control for viral exanthematous infections. |
| MI 4.3d Superficial fungal infections | <ol style="list-style-type: none"> 1. Enumerate various surface infections of the skin and its appendages caused by fungal agents, along with their etiology 2. Describe the microscopic and cultural characteristics of fungal agents (Candida, Pityriasis versicolor, Tinea nigra, Piedra, onychomycosis, dermatophytes etc.) causing infections of skin 3. Enumerate various clinical types of dermatophytosis with their causative agents 4. Describe the morphological and cultural characters of dermatophytes. 5. Describe the laboratory diagnosis of superficial fungal infections 6. Describe the management of superficial fungal infections |
| MI 4.3e Subcutaneous mycosis, mycetoma | <ol style="list-style-type: none"> 1. Define mycetoma 2. Enumerate the microbial agents (Bacteria & Fungi) causing mycetoma and subcutaneous mycosis 3. Describe the pathogenesis, clinical presentation laboratory diagnosis and treatment of subcutaneous mycosis and mycetoma. |

| CNS Infections | |
|--|---|
| MI5.1 Describe the etiopathogenesis, clinical course and discuss the laboratory diagnosis of meningitis | |
| MI 5.1a Infections of CNS: Introduction & Pyogenic meningitis | <ol style="list-style-type: none"> 1. Enumerate various infective syndromes of CNS 2. Define and classify Meningitis . 3. Differentiate between Acute & Chronic meningitis 4. Enumerate the bacterial, viral and parasitic causes of acute/pyogenic meningitis according to age. 5. Describe the morphology, antigenic structure and virulence factors of various etiological agents of pyogenic meningitis. (Neisseria meningitidis, Streptococcus pneumoniae, Haemophilus influenzae). |

| | |
|---|--|
| MI5.1 b Aseptic meningitis | <ol style="list-style-type: none"> 1. Enumerate the bacterial, viral, fungal and parasitic etiological agents of aseptic meningitis. 2. Describe the morphology, antigenic structure and virulence factors of various etiological agents of aseptic meningitis. (Leptospira, Free living amoebae, Enteroviruses (poliovirus, echovirus, Coxsackie), Cryptococcus neoformans). 3. Describe the pathogenesis, clinical presentation, diagnosis, treatment, control and prevention of aseptic meningitis (Leptospira, Free living amoebae, Enteroviruses (poliovirus, echovirus, Coxsackie), Cryptococcus neoformans) 4. Differentiate the clinical findings of pyogenic meningitis and aseptic meningitis. |
| MI 5.2 Describe the etiopathogenesis, clinical course and discuss the laboratory diagnosis of encephalitis | |
| MI 5.2a Encephalitis | <ol style="list-style-type: none"> 1. Enumerate common etiological agents causing encephalitis with special reference to India. 2. Describe the morphology, virulence factors, antigenic structure and pathogenesis of causative agents of encephalitis. (Rabies, Tick borne encephalitis viruses, HSV-2 & Nipah) 3. Describe the epidemiology, clinical features, diagnosis, treatment, control and prevention of Rabies. 4. Describe the epidemiology, clinical features, diagnosis, treatment, control and prevention of tick borne encephalitis. 5. Describe the epidemiology, clinical features, diagnosis, treatment, control and prevention of parasitic encephalitis |
| MI 5.2b Miscellaneous infections of CNS | <ol style="list-style-type: none"> 1. Define prions and slow virus infections 2. Describe the morphology, virulence factors, antigenic structure and pathogenesis of slow viruses and prions 3. Describe the epidemiology, clinical features, diagnosis, treatment, control and prevention of prion disease. |

Respiratory Tract Infections

MI6.1 Describe the etio-pathogenesis, laboratory diagnosis and prevention of Infections of upper and lower respiratory tract

| | |
|--|--|
| MI 6.1a Respiratory tract infections: Introduction | <ol style="list-style-type: none"> 1. Describe the normal defence mechanism of respiratory tract 2. Enumerate various clinical types of respiratory infections with examples. 3. Describe the mode of transmission of upper and lower respiratory tract infections 4. Enumerate the causative agent of various type of respiratory infections. 5. Outline the laboratory diagnosis of patient with respiratory infection. |
|--|--|

| | |
|---|--|
| MI 6.1b Viral URTI including common cold & croup | <ol style="list-style-type: none"> 1. Enumerate the causative viral agents of common cold, pharyngitis, croup, sinusitis, otitis media. 2. Describe classification, morphology, antigenic structure, virulence factor of causative agent (Adeno, Rhino, Mumps, Echo, Par echo, Coxsackie A, RSV, Corona, Influenza & Parainfluenza viruses). 3. Discuss the pathogenesis, epidemiology and immunity of causative agent. 4. Discuss the laboratory diagnosis, treatment and control of common cold, croup, mumps and pharyngitis. |
| MI 6.1c Tuberculosis | <ol style="list-style-type: none"> 1. Define and classify tuberculosis 2. Classify mycobacteria causing tuberculosis 3. Describe morphology, pathogenesis, virulence factors and cultural characteristics of Mycobacterium tuberculosis. 4. Describe the epidemiology, clinical manifestations, complications and laboratory diagnosis of pulmonary tuberculosis. 5. Discuss the treatment, control and prevention of tuberculosis. 6. Describe the strategies and case management as per RNTCP |
| MI6.1d Bacterial URTI-I | <ol style="list-style-type: none"> 1. Enumerate the causative bacterial agents of pharyngitis, diphtheria, whooping cough (croup), sinusitis, otitis media. 2. Describe the clinical features, pathogenesis and immunity of diphtheria and whooping cough. 3. Describe the morphology, virulence factors and cultural characteristics of bacterial agents causing pharyngitis. 4. Describe clinical features, pathogenesis, complications and laboratory diagnosis of pharyngitis, diphtheria and whooping cough. 5. Describe the treatment, prevention and control measures for diphtheria, whooping cough and pharyngitis. |
| MI6.1e Bacterial URTI-II | |
| MI 6.1f Bacterial pneumonia other than Mycobacteria -I | <ol style="list-style-type: none"> 1. Define the clinical types of Pneumonia [CAP, HAP/VAP & AP] 2. Enumerate the causative bacterial agents of pneumonia (other than Mycobacteria) 3. Describe the morphology, antigenic structure, virulence markers, cultural characteristics of various bacterial agent (S. pneumoniae, Staph. aureus, H. influenzae, Mycoplasma, Chlamydia, Klebsiella, Pseudomonas, Acinetobacter, Legionella). 4. Describe the clinical features, pathogenesis, clinical features, complications and lab diagnosis of bacterial pneumonia. 5. Describe the treatment, prevention and control measures for pneumonia. 6. Describe the clinical features, pathogenesis, clinical course of Atypical pneumonia & legionella pneumonia. 7. Discuss the laboratory diagnosis, treatment, prevention and control of atypical pneumonia. |
| MI 6.1g Bacterial pneumonia other than Mycobacteria -II | |

| | |
|---|---|
| MI 6.1h Fungal pneumonia | <ol style="list-style-type: none"> 1. Enumerate the various fungal agents of pneumonia 2. Describe the morphology, epidemiology, virulence and cultural characteristics of agent (Candida, Cryptococcus, Dimorphic fungi {Histoplasma, coccidioides, paracoccidioides C.immitis, P.brazilliansis} Aspergilus, P.Jeroveci, Penicillium, {Oral thrush, ABPA }) 3. Discuss the predisposing factors and pathogenesis of fungal pneumonia. 4. Describe the clinical features, complications, laboratory diagnosis, treatment, control and preventive methods of fungal pneumonia. |
| MI 6.1i Viral LRTI-I | <ol style="list-style-type: none"> 1. Enumerate the causative viral agents of pneumonia, ARDS, ILI, SARI. 2. Describe epidemiology, classification, morphology, virulence factors, antigenic structure, immunity of the agent (paramyxovirus, orthomyxovirus, Corona, MERS COV, SARS, SARS-CoV2). 3. Describe the pathogenesis and immunity of viral pneumonia. 4. Define and Classify influenza viruses. 5. Discuss its pathogenesis [antigenic structure and variations] 6. Describe epidemiology including antigenic shift and drift of influenza virus. 7. Describe the clinical features, complications, laboratory diagnosis, treatment, control and preventive methods of viral pneumonia. |
| MI 6.1j Miscellaneous disorders of lung (Bronchitis, Bronchiectasis , Lung abscess, empyema, pleural effusion | <ol style="list-style-type: none"> 1. Enumerate the causative agents of Bronchitis, Bronchiectasis, Lung abscess, empyema, pleural effusion 2. Enumerate the parasitic agents causing lung infection 3. Describe the pathogenesis & clinical manifestations of Bronchitis, Bronchiectasis, Lung abscess, empyema, pleural effusion 4. Discuss the treatment, prevention & control of Bronchitis, Bronchiectasis, Lung abscess, empyema, pleural effusion 5. Describe the pulmonary manifestations of various parasites causing lung disorder (E.histolytica, E.granulosus) 6. Describe the epidemiology, morphology, life cycle, of P.westermani 7. Describe the pathogenesis, clinical features, complications, treatment and control of paragonimiasis 8. Discuss the laboratory diagnosis of varied lung infections. |

Genitourinary system and urinary tract infections

MI 7.1 Describe the etio-pathogenesis and discuss the laboratory diagnosis of infections of genitourinary system

| | |
|---|--|
| MI 7.1 Genitourinary system infections | <ol style="list-style-type: none"> 1. Enumerate the microorganisms found as part of normal flora of Genitourinary system. 2. Discuss the role of normal flora in health of genitourinary tract. 3. Define and Classify Genitourinary Tract infections, Reproductive Tract infections and Sexually Transmitted Infections 4. Describe the etio-pathogenesis of Genitourinary Tract infections, Reproductive Tract infections and Sexually Transmitted Infections 5. List the clinical syndromes associated with the RTIs 6. Name the etiological agents of the various clinical syndromes 7. Classify Urinary Tract Infections 8. Describe etiopathogenesis of Urinary Tract infections 9. Describe the laboratory diagnosis of Genitourinary infections |
| MI 7.2 Describe the etio-pathogenesis and discuss the laboratory diagnosis of sexually transmitted infections. Recommend preventive measures | |
| MI 7.2 a Painless Genital ulcers: Syphilis | <ol style="list-style-type: none"> 1. Name the causative agent of Syphilis 2. Classify Treponemes 3. Describe the pathogenesis and clinical manifestations of various stages of Syphilis 4. Describe the morphology, virulence factors and cultural characteristics of Treponema pallidum 5. Describe the laboratory diagnosis of syphilis including congenital syphilis 6. Describe treatment, control and prevention of syphilis |
| MI 7.2b STD-II Genital ulcers and warts | <ol style="list-style-type: none"> 1. Enumerate the causative agents of genital warts, painful genital ulcer. 2. Classify Herpesviruses 3. Describe the pathogenesis, clinical features and laboratory diagnosis of genital herpes, chancroid, Donovanosis. 4. Describe the epidemiology, morphology & cultural characteristics of Haemophilus ducreyi, HSV, Klebsiella granulomatis 5. Discuss Anogenital Warts and Human Papilloma Virus associated lesions. |

| | |
|---|--|
| MI 7.2c Vaginal/Urethral Discharge -I Urethritis gonococcal and NGU (Gonorrhoea, Chlamydia, Trichomonas, Bacterial vaginosis, ureaplasma, Candida | <ol style="list-style-type: none"> 1. Enumerate the organisms causing vaginal/urethral discharge 2. Describe the morphology, cultural characteristics, methods for identification and antimicrobial susceptibility testing of <i>Neisseria gonorrhoeae</i> 3. Describe the pathogenesis, clinical features, laboratory diagnosis and treatment of gonorrhea 4. Define Non-gonococcal urethritis and cervicitis 5. List the causative agents of NGU, LGV 6. Classify family Chlamydiaceae 7. Describe the morphology, cultivation, typing and life cycle of <i>Chlamydia trachomatis</i> 8. Discuss the pathogenesis, complications and clinical features of genital <i>Chlamydia trachomatis</i> infections 9. Discuss the laboratory diagnosis of genital <i>C. trachomatis</i> infections |
| MI 7.2d Vaginal/ Urethra Discharge -II (Gonorrhoea, Chlamydia, Trichomonas, Bacterial vaginosis, Candida | <ol style="list-style-type: none"> 1. Describe the morphology, cultural characteristics, methods for identification of <i>Mycoplasma</i> and ureaplasma. 2. Describe the morphology, pathogenesis, life cycle and laboratory diagnosis of <i>Trichomonas vaginalis</i>. 3. Discuss the laboratory diagnosis of NGU and non-gonococcal endocervicitis 4. Enumerate the organisms associated with Bacterial Vaginosis 5. Describe the morphology, pathogenesis, life cycle and laboratory diagnosis of organisms involved in bacterial vaginosis. |
| MI 7.2e Miscellaneous STI | <ol style="list-style-type: none"> 1. Enumerate the non-sexually transmitted microbial causes of infections of genitourinary system 2. Describe the pathogenesis of these infections. (PID, Genital warts (HPV), Molluscum contagiosum, pubic lice, scabies) 3. Describe the clinical features of these infections 4. Discuss the laboratory diagnosis of these infections |
| MI7.2f Lab diagnosis and syndromic management of STI | <ol style="list-style-type: none"> 1. Describe Syndromic management of STDs and Reproductive Tract Infections 2. Describe treatment, prevention and control of STDs |
| MI 7.3 Describe the etio-pathogenesis, clinical features, the appropriate method for specimen collection, and discuss the laboratory diagnosis of Urinary tract infections | |

| | |
|----------------------|---|
| MI 7.3 UTI | <ol style="list-style-type: none"> 1. Enumerate the etiological agents causing Urinary Tract Infections 2. Describe the predisposing factors, pathogenesis and clinical features of UTI 3. Describe the laboratory diagnosis of UTI. , 4. Define significant bacteriuria and interpret patients test reports 5. Describe the methods used to differentiate between upper and lower UTI 6. Describe the morphology, cultural characteristics, methods for identification and antimicrobial susceptibility testing of Proteus, Morganella and Providencia |
|----------------------|---|

| | |
|---|---|
| Zoonotic and Miscellaneous Infections | |
| MI8.1 Enumerate the microbial agents and their vectors causing Zoonotic diseases. Describe the morphology, mode of transmission, pathogenesis and discuss the clinical course, laboratory diagnosis and prevention | |
| MI8.1a Zoonotic disease: Introduction, epidemiology and prevention. MI 8.1b Entomology and vectors in disease MI 8.1c Rickettsia, Bartonella, Coxiella MI 8.1d Miscellaneous Zoonosis: Yersinia, Bacillus anthracis, Pasteurella, Franscicella | <ol style="list-style-type: none"> 1. Define: Zoonoses 2. Enumerate the microbial agents and their vectors causing Zoonotic diseases. 3. Describe the morphology, mode of transmission, pathogenesis, clinical course, laboratory diagnosis and prevention of Zoonotic diseases: 4. Describe the morphology, cultural characteristics, methods for identification of Bacillus anthracis, Brucella species, Yersinia pestis, Leptospira, Ricketssia species, Rhabdovirus. 5. Describe the pathogenesis, clinical features, laboratory diagnosis and treatment of Anthrax, Brucellosis, Plague, Leptospirosis, Rickettsia, Rabies, |
| MI8.2 Describe the etio-pathogenesis of opportunistic infections (OI) and discuss the factors contributing to the occurrence of OI, and the laboratory diagnosis | |
| MI 8.2a Opportunistic infections: General Bacterial, Parasitic and Virus | <ol style="list-style-type: none"> 1. Define Opportunistic infections 2. Classify and enumerate opportunistic infections. 3. Describe the etiopathogenesis of Opportunistic infections and discuss the factors contributing to opportunistic infections. 4. Describe diagnosis of opportunistic infections |
| MI 8.2b Opportunistic infections: Mycosis | <ol style="list-style-type: none"> 1. Enumerate fungi causing OI 2. Describe laboratory diagnosis of opportunistic infections |
| MI8.3 Describe the role of oncogenic viruses in the evolution of virus associated malignancy | |

| | |
|--|---|
| Oncogenic virus | <ol style="list-style-type: none"> 1. Describe oncogenesis 2. Describe the properties of cells transformed by viruses. 3. Enumerate oncogenic DNA and RNA viruses 3. Define and describe Oncogenes/ Proto-oncogenes 4. Describe the mechanism of viral oncogenesis. |
| MI8.4 Describe the etiologic agents of emerging Infectious diseases. Discuss the clinical course and diagnosis | |
| Emerging and reemerging Infections | <ol style="list-style-type: none"> 1. Define: Emerging infectious agents. 2. Enumerate emerging infectious agents in world and in India. 3. Describe the factors that contribute to emerging and reemerging infections. 4. Discuss epidemiology of emerging infections with special reference to Indian context. 5. Discuss their clinical course and diagnosis. |
| MI8.5 Define Healthcare Associated Infections (HAI) and enumerate the types. Discuss the factors that contribute to the development of HAI and the methods for prevention | |
| HAI | <ol style="list-style-type: none"> 1. Define Healthcare Associated Infections (HAI) 2. Enumerate and describe common types of HAI 3. Enumerate microbial agents responsible for various types of HAI 4. Discuss the factors that contribute to the development of HAI, including sources, mode of transmission and epidemiology of infectious agents 5. Discuss the methods of prevention of HAI |
| MI 8.6 Describe the basics of Infection control | |
| MI 8.6 Infection control | <ol style="list-style-type: none"> 1. Define and describe the concept of Hospital/ Healthcare Infection Control 2. Enumerate and describe the concepts and methods of Infection control. 3. Define Standard precautions, transmission based precautions, and contact precautions. 4. Describe the components of Standard precautions, transmission based precautions, and contact precautions. 5. Describe Respiratory etiquettes, sharps safety, safe injection practices, sterilization, disinfection, good housekeeping, PPE donning/doffing, hand hygiene, post-exposure prophylaxis, etc.) 6. Describe the constitution and functions of Hospital Infection Control Committee. 7. Define and classify Biomedical waste. 8. Discuss management of Biomedical Waste as per latest Biomedical Waste Management Rules. |

| | |
|--|---|
| MI 8.8 Describe the methods used and significance of assessing the microbial contamination of food, water and air | |
| MI 8.8 Milk, food and air Microbiology | <ol style="list-style-type: none"> 1. Enumerate the bacteria that can be found in food, water and air. 2. Describe the methods used and significance of assessing the microbial contamination of water air, food, and milk. |
| MI 8.13 Choose the appropriate laboratory test in the diagnosis of the infectious disease | |
| MI 8.13a PUO | <ol style="list-style-type: none"> 1. Define PUO 2. Enumerate the causative agents of PUO 3. Enumerate the samples and describe sample collection techniques and transport 4. Describe blood collection technique 5. Describe the sample processing, identification and confirmation |
| MI 8.13b Congenital infections | <ol style="list-style-type: none"> 1. Enumerate various congenital infections. 2. Enumerate various test to screen for congenital infections 3. Describe the pathogenesis, complications and screening for congenital infections. |
| MI 8.13c URTI | <ol style="list-style-type: none"> 1. Enumerate various clinical types of upper respiratory infections with examples. 2. Describe the mode of transmission of upper and lower respiratory tract infections 3. Enumerate the causative agent of various type of respiratory infections. 4. Enumerate the samples and describe sample collection techniques and transport 5. Describe the sample processing, identification and confirmation |
| MI 8.13d LRTI | <ol style="list-style-type: none"> 1. Enumerate various clinical types of lower respiratory infections with examples. 2. Describe the mode of transmission of upper and lower respiratory tract infections 3. Enumerate the causative agent of various type of respiratory infections. 4. Enumerate the samples and describe sample collection techniques and transport 5. Describe the sample processing, identification and confirmation |
| MI 8.13e Wound infection | <ol style="list-style-type: none"> 1. Enumerate various clinical types of wound infections. 2. Enumerate the causative agent of various type of wound infections. 3. Enumerate the samples and describe sample collection techniques and transport 4. Describe the sample processing, identification and |

| | |
|--|---|
| | confirmation |
| MI 8.13f Meningitis | <ol style="list-style-type: none"> 1. Enumerate various clinical types of meningitis. 2. Enumerate the causative agent of various type of meningitis. 3. Enumerate the samples and describe sample collection techniques and transport 4. Describe the sample processing, identification and confirmation |
| MI 8.13g Eye/ENT infections | <ol style="list-style-type: none"> 1. Enumerate various clinical types of eye and ENT infections. 2. Enumerate the causative agent of various type of Eye and ENT infections. 3. Enumerate the samples and describe sample collection techniques and transport 4. Describe the sample processing, identification and confirmation |
| MI8.15 Choose and Interpret the results of the laboratory tests used in diagnosis of the infectious disease | |
| MI 8.15 Lab diagnosis of PUO, URTI, LRTI, Meningitis, wound infections, Eye, ENT infections | <ol style="list-style-type: none"> 1. Enumerate various clinical types of infections with examples. 2. Describe the mode of transmission of infections 3. Enumerate the causative agent of various type of infections. 4. Enumerate the samples and describe sample collection techniques and transport 5. Describe the sample processing, identification and confirmation |
| MI 8.16 Describe the National Health Programs in the prevention of common infectious disease | |
| MI 8.16 | <ol style="list-style-type: none"> 1. Enumerate various National programs for prevention of infectious diseases. 2. Enumerate the components and strategies of control program. 3. Describe the implementation of National Program at various levels. 4. Describe the evaluation of National Program. |

6. Assessment

Student will maintain a log book as given in Annexure II. Practical record book will also be maintained by students to record practical findings for day to day work and assessments. Both theory and practical to be assessed.

(a) Formative

- **First Term**

Assessments (2): General Microbiology, Immunology & CVS

End term Exam- January last week to February 1st week.

- **Second Term**

Assessment (3): Respiratory, GIT & Hepatobiliary

End Term Exam: April last week to May 1st week.

- **Third Term**

Assessment (2): SDL & Zoonotic, CVS, GUT, Miscellaneous

Sent Up Examination: August last week to September 1st week.

Section 3: Schedule of Internal assessment (IA) in Microbiology

| IA | 1 st IA (Jan-Feb) | 2 nd IA (April-May) | Sent up examination | Final Examination |
|--|---------------------------------|-----------------------------------|----------------------------|----------------------------|
| Theory | 50 | 50 | Paper 1-100 Paper 2-100 | Paper 1-100 Paper 2-100 |
| Practical (including 10 marks log book & practical file) | 50 | 50 | 100 | 100 |
| Total | 100 | 100 | 300 | 300 |

b) Internal Assessment

Maintained in card format for all teachers. Feedback given after end of each assessment. Internal assessment is divided in two components. Day to day assessments based on performance in tutorials, seminars, Practical class and skill session will be given weightage of 20%, while term exam assessments, end competency assessments will be included in term assessments given weightage of 80 %. IA sheet will be maintained for each student mentioning the suggested and taken remedial measures.

| Viva based on practical exercises | | 30 |

| | |
|-------|-----|
| Total | 100 |
|-------|-----|

Note: The students will submit practical file and log book during the Examination.

*Numerical scoring: The steps of the staining procedure and interpretation are scored as follows

| Steps Done | Marks allotted |
|---|----------------|
| Performing the stain following all the steps (1 mark each) | 3 |
| -Primary stain | |
| -Decolourisation | |
| -Secondary stain | |
| Focusing the stained slide with appropriate adjustments of the Microscope | 2 |
| Identifying the structures under the Microscope/Observation and inference | 3 |
| Diagram and writing the report | 2 |
| Total | 10 |

7) ASSESSMENT OF INDIVIDUAL COMPETENCIES: (To be done similarly for each competency)

- 1) Competency identified: MI 1.2 (a)
- 2) Name of the activity: Perform and identify the different causative agents of Infectious diseases by Gram Stain
- 3) Components of the activity:
 - a) Practical session to demonstrate the procedure for stain.
 - b) Performing the procedure by the student and focussing the slide.
 - c) Recording the observation and the inference with a neat labelled diagram
 - d) Feedback given on the session.
- 4) Criteria for successful completion: The student has to perform the activity 5 times and score more than 5/10 in each attempt

| Attempt Number | Date of performing the activity | Marks scored out of 10 | Rating Below Expectations(B); Meets Expectations(M); Exceeds Expectations(E) | Signature of faculty | Signature of student |
|----------------|---------------------------------|------------------------|---|----------------------|----------------------|
| 1 | | | | | |
| 2 | | | | | |

| | | | | | |
|---|--|--|--|--|--|
| 3 | | | | | |
| 4 | | | | | |
| 5 | | | | | |

Documentation of activity (diagram and observation and inference) – to be written in the Record book.

Recommended action when unsuccessful : Repeat after discussion

Note:

Keeping the basic structure of internal assessment intact, minor adjustments in unit I and II can be done based on the course covered.

For detailed assessment instructions refer to Assessment Blueprint document for CBME batch 2021

Internal assessment will be calculated for theory (40) marks and practical (20) marks Student will require to get 50 % combined in theory & practical (not less than 40 % in each) for eligibility to appear for university exam.

21. Amendment to Ordinance V (2) & VII. [EC. Res. 78-7 dated 25.03.2022] regarding course curriculum prepared on competency based UG curriculum for MBBS course -2nd Professional (New Scheme).

Pathology

VISION

The broad goal of pathology curriculum is to make undergraduates aware of pathological basis of disease, have comprehensive scientific knowledge of the gross and microscopic features of various organs affected in different pathological lesions and their correlation with clinical presentation.

Learning objectives (overall)

At the end of curriculum, student should be able to

a) **KNOWLEDGE**

1. Explain pathological basis of disease.
2. Identify gross and microscopic features of common pathological lesions
3. Know the etiopathogenesis of common clinical conditions
4. Know genetic basis of diseases with knowledge of genetic tools for diagnosis of diseases

b) **SKILL**

At the end of course, student should be able to

1. Make good peripheral smear AND describe the peripheral blood picture
2. Analyze lab reports and its correlation with clinical diagnosis
3. Describe the correct technique to perform blood grouping & cross matching,
4. Identify the etiology of meningitis based on given CSF parameters
5. Interpret liver function and viral hepatitis serology panel and able to differentiate various types of jaundice

c) ATTITUDE AND COMMUNICATIONS

At the end of course, student should be able to

1. Show due respect in handling of specimens, slides and microscope
2. work efficiently in a team
3. Communicate efficiently with teachers and peer groups
4. Develop professional attributes in terms of discipline, punctuality, accountability and respect to teachers

Competencies

Detailed competencies are shown in annexure 1

Learning objective for each competency are added in annexure 2

| S.No. | Topic | Competency | Theory/practical/ laboratory/ clinical |
|-------|----------------------------|---|--|
| 1) | Introduction to Pathology | PA 1.1: Describe the role of a pathologist in diagnosis and management of disease: PA1.2: Enumerate common definitions and terms used in Pathology PA 1.3: Describe the history and evolution of Pathology | Theory/practical |
| 2) | Cell Injury and Adaptation | PA2.1: Demonstrate knowledge of the causes, mechanisms, types and effects of cell injury and their clinical significance PA2.2: Describe the etiology of cell injury. Distinguish between reversible-irreversible injury: mechanisms; morphology of cell injury PA2.3: Intracellular accumulation of fats, proteins, carbohydrates, pigments PA2.4: Describe and discuss Cell death- types, mechanisms, necrosis, apoptosis (basic as contrasted with necrosis), autolysis PA2.5: Describe and discuss pathologic calcifications, gangrene PA2.6: Describe and discuss cellular adaptations: atrophy, hypertrophy, hyperplasia, metaplasia, dysplasia PA2.7: Describe and discuss the mechanisms of cellular aging and Apoptosis PA2.8: Identify and describe various forms of cell injuries, their manifestations and consequences in gross and microscopic specimens | Theory/ practical/ laboratory/ clinical |

| | | | |
|----|-----------------------|--|--|
| 3) | Amyloidosis | <p>PA3.1: Describe the pathogenesis and pathology of amyloidosis</p> <p>PA3.2: Identify and describe amyloidosis in a pathology specimen</p> | Theory/practical/ laboratory/clinical |
| 4) | Inflammation | <p>PA4.1: Define and describe the general features of acute and chronic inflammation including stimuli, vascular and cellular events</p> <p>PA4.2: Enumerate and describe the mediators of acute inflammation</p> <p>PA4.3: Define and describe chronic inflammation including causes, types non- specific and granulomatous; and examples of each</p> <p>PA4.4: Identify and describe acute and chronic inflammation in gross and microscopic specimens</p> | Theory/practical/ laboratory/clinical |
| 5) | Healing and repair | <p>PA5.1: Define and describe the process of repair and regeneration including wound healing and its types</p> | Theory/practical/ laboratory/ clinical |
| 6) | Hemodynamic disorders | <p>PA6.1: Define and describe edema, its types, pathogenesis and clinical correlation</p> <p>PA6.2: Define and describe hyperemia, congestion, hemorrhage</p> <p>PA6.3: Define and describe shock, its pathogenesis and its stages</p> <p>PA6.4: Define and describe normal haemostasis and the etiopathogenesis and consequences of thrombosis</p> <p>PA6.5: Define and describe embolism and its causes and common types</p> <p>PA6.6: Define and describe Ischaemia /infarction its types, etiology, morphologic changes and clinical effects</p> <p>PA6.7: Identify and describe the gross</p> | Theory/practical/ laboratory/ clinical |

| | | | |
|----|---------------------------|--|--|
| | | and microscopic features of infarction in a pathologic specimen | |
| 7) | Neoplastic disorders | <p>PA7.1: Define and classify neoplasia. Describe the characteristics of neoplasia including gross, microscopy, biologic, behaviour and spread. Differentiate between benign from malignant neoplasm</p> <p>PA7.2: Describe the molecular basis of cancer</p> <p>PA7.3: Enumerate carcinogens and describe the process of Carcinogenesis</p> <p>PA7.4: Describe the effects of tumor on the host including paraneoplastic syndrome</p> <p>PA7.5: Describe immunology and the immune response to cancer</p> | Theory/practical/ laboratory/ clinical |
| 8) | Basic diagnostic cytology | <p>PA8.1: Describe the diagnostic role of cytology and its application in clinical care</p> <p>PA8.2: Describe the basis of exfoliative cytology including the technique & stains used</p> <p>PA8.3: Observe a diagnostic cytology and its staining and interpret the specimen DOAP</p> | Theory/practical/ laboratory/ clinical |
| 9) | Immunopathology and AIDS | <p>PA9.1: Describe the principles and mechanisms involved in immunity</p> <p>PA9.2: Describe the mechanism of hypersensitivity reactions</p> <p>PA9.3: DESCRIBE HLA SYSTEM and immune systems involved in transplant and mechanism of transplant rejection</p> <p>PA9.4: Define autoimmunity. Enumerate autoimmune disorders</p> | Theory/practical/ laboratory/ clinical |

| | | | |
|------|--|--|--|
| | | <p>PA9.5: Define and describe the pathogenesis of systemic Lupus Erythematosus</p> <p>PA9.6: Define and describe the pathogenesis and pathology of HIV and AIDS</p> <p>PA9.7: Define and describe the pathogenesis of other common autoimmune diseases</p> | |
| 10) | Infections and Infestations | <p>PA10.1: Define and describe the pathogenesis and pathology of malaria</p> <p>PA10.2: Define and describe the pathogenesis and pathology of Cysticercosis</p> <p>PA10.3: Define and describe the pathogenesis and pathology of leprosy</p> <p>PA10.4: Define and describe the pathogenesis and pathology of common bacterial, viral, protozoal and helminthic diseases</p> | Theory/practical/ laboratory/ clinical |
| 11). | Genetic and paediatric diseases | <p>PA11.1: Describe the pathogenesis and features of common cytogenetic abnormalities and mutations in childhood</p> <p>PA11.2: Describe the pathogenesis and pathology of tumor and tumourlike conditions in infancy and childhood</p> <p>PA11.3: Describe the pathogenesis of common storage disorders in infancy and childhood</p> | Theory/practical/ laboratory/ clinical |
| 12) | Environmental and nutritional diseases | <p>PA12.1: Enumerate and describe the pathogenesis of disorders caused by air pollution, tobacco and alcohol</p> <p>PA12.2: Describe the pathogenesis of disorders caused by protein calorie malnutrition and starvation</p> <p>PA12.3: Describe the pathogenesis of obesity and its consequences</p> | Theory/practical/ laboratory/ clinical |

| | | | |
|-----|-----------------------------|--|--|
| 13) | Introduction to haematology | <p>PA13.1:Describe hematopoiesis and extramedullary hematopoiesis</p> <p>PA13.2:Describe the role of anticoagulants in hematology</p> <p>PA13.3:Define and classify anemia</p> <p>PA13.4:Enumerate and describe the investigation of anemia</p> <p>PA13.5:Perform, Identify and describe the peripheral blood picture in Anemia</p> | Theory/practical/ laboratory/ clinical |
| 14) | Microcytic anemia | <p>PA14.1:Describe iron metabolism</p> <p>PA14.2:Describe the etiology, investigations and differential diagnosis of microcytic hypochromic anemia</p> <p>PA14.3:Identify and describe the peripheral smear in microcytic anemia</p> | Theory/practical/ laboratory/ clinical |
| 15) | Macrocytic anemia | <p>PA15.1:Describe the metabolism of Vitamin B12 and the etiology and pathogenesis of B12 deficiency</p> <p>PA15.2:Describe laboratory investigations of macrocytic anemia</p> <p>PA15.3:Identify and describe the peripheral blood picture of macrocytic Anemia</p> <p>PA15.4:Enumerate the differences and describe the distinguishing features of megaloblastic and non-megaloblastic macrocytic anemia</p> | Theory/practical/ laboratory/ clinical |
| 16) | Hemolytic anemia | <p>PA16.1: Define and classify hemolytic anemia</p> <p>PA16.2: Describe the pathogenesis and clinical features and hematologic indices of hemolytic anemia</p> <p>PA16.3: Describe the pathogenesis, features, hematologic indices and peripheral blood picture of sickle cell anemia and thalassemia</p> <p>PA16.4: Describe the etiology pathogenesis, hematologic indices and peripheral blood picture of Acquired hemolytic anemia</p> <p>PA16.5: Describe the peripheral blood picture in different hemolytic anemia</p> <p>PA16.6: Prepare a peripheral blood smear and identify hemolytic anaemia</p> | Theory/practical/ laboratory/ clinical |

| | | | |
|-----|-----------------------|---|--|
| | | from it PA16.7: Describe the correct technique to perform a cross match | |
| 17) | Aplastic anemia | PA17.1: Enumerate the etiology, pathogenesis and findings in aplastic anemia PA17.2: Enumerate the indications and describe the findings in bone marrow aspiration and biopsy | Theory/practical/ laboratory/clinical |
| 18) | Leucocytic disorders | PA18.1: Enumerate and describe the causes of leucocytosis leucopenia lymphocytosis and leukemoid reactions. PA18.2: Describe the etiology, genetics, pathogenesis classification, features, hematologic features of acute and chronic leukemia | Theory/practical/ laboratory/clinical |
| 19) | Lymph node and spleen | PA19.1: Enumerate the causes and describe the differentiating features of lymphadenopathy PA19.2: Describe the pathogenesis and pathology of tuberculous lymphadenitis PA19.3: Identify and describe the features of tuberculous lymphadenitis in a gross and microscopic specimen PA19.4: Describe and discuss the pathogenesis, pathology and the differentiating features of Hodgkin's and non-Hodgkin's lymphoma PA19.5: Identify and describe the features of Hodgkin's lymphoma in a gross and microscopic specimen PA19.6: Enumerate and differentiate the causes of splenomegaly PA19.7: Identify and describe the gross specimen of an enlarged spleen | Theory/practical/ laboratory/ clinical |

| | | | |
|-----|-------------------------------|--|--|
| 20) | Plasma cell disorders | PA20.1: Describe the features of plasma cell myeloma | Theory/practical/ laboratory/clinical |
| 21) | Hemorrhagic disorders | <p>PA21.1: Describe normal hemostasis</p> <p>PA21.2: Classify and describe the etiology, pathogenesis and pathology of vascular and platelet disorders including ITP and haemophilia</p> <p>PA21.3: Differentiate platelet from clotting disorders based on the clinical and hematologic features</p> <p>PA21.4: Define and describe disseminated intravascular coagulation, its laboratory findings and diagnosis of disseminated intravascular coagulation</p> <p>PA21.5: Define and describe disseminated intravascular coagulation AND VIT K DEFICIENCY</p> | Theory/practical/ laboratory/clinical |
| 22) | Blood banking and transfusion | <p>PA22.1: Classify and describe blood group systems (ABO and RH)</p> <p>PA22.2: Enumerate the indications, describe the principles, enumerate and demonstrate the steps of compatibility testing</p> <p>PA22.4: Enumerate blood components and describe their clinical uses</p> <p>PA22.5: Enumerate and describe infections transmitted by blood Transfusion</p> <p>PA22.6: Describe transfusion reactions and enumerate the steps in the investigation of a transfusion reaction</p> <p>PA22.7: Enumerate the indications and describe the principles and procedure of autologous transfusion</p> | Theory/practical/ laboratory/clinical |

| | | | |
|-----|------------------------|---|--|
| 23) | Clinical Pathology | <p>PA23.1:Describe abnormal urinary findings in disease states and identify and describe common urinary abnormalities in a clinical specimen</p> <p>PA23.2:Describe abnormal findings in body fluids in various disease States</p> <p>PA23.3:Describe and interpret the abnormalities in a panel containing semen analysis, thyroid function tests, renal function tests or liver function tests</p> | Theory/practical/ laboratory/clinical |
| 24) | Gastrointestinal tract | <p>PA24.1:Describe the etiology, pathogenesis, pathology and clinical features of oral cancers</p> <p>PA24.2:Describe the etiology, pathogenesis, pathology, microbiology, clinical and microscopic features of peptic ulcer disease</p> <p>PA24.3:Describe and identify the microscopic features of peptic ulcer</p> <p>PA24.4:Describe etiology and pathogenesis and pathologic features of carcinoma of the stomach</p> <p>PA24.5:Describe etiology and pathogenesis and pathologic features of Tuberculosis of the intestine</p> <p>PA24.6:Describe etiology and pathogenesis and pathologic and distinguishing features of Inflammatory bowel disease</p> <p>PA24.7:Describe the etiology, pathogenesis, pathology and distinguishing features of carcinoma of the colon</p> | Theory/practical/ laboratory/clinical |

| | | | |
|-----|----------------------|---|--|
| 25) | Hepatobiliary system | <p>PA25.1:Describe bilirubin metabolism, enumerate the etiology and pathogenesis of jaundice, distinguish between direct and indirect hyperbilirubinemia</p> <p>PA25.2:Describe the pathophysiology and pathologic changes seen in hepatic failure and their clinical manifestations, complications and consequences.</p> <p>PA25.3:Describe the etiology and pathogenesis of viral and toxic hepatitis: distinguish the causes of hepatitis based on the clinical and laboratory features. Describe the pathology, complications and consequences of hepatitis</p> <p>PA 25.4: Describe the pathophysiology, pathology and progression of alcoholic liver disease including cirrhosis</p> <p>25.5:Describe the etiology, pathogenesis and complications of portal hypertension SDL</p> <p>PA25.6 : Interpret liver function and viral hepatitis serology panel. Distinguish obstructive from non- obstructive jaundice based on clinical features and liver function tests</p> | Theory/practical/ laboratory/clinical |
| 26) | Respiratory system | <p>26.1:Define and describe the etiology, types, pathogenesis, stages, morphology and complications of pneumonia</p> <p>26.2:Describe the etiology, gross and microscopic appearance and complications of lung abscess</p> <p>PA26.3:Describe the etiology, types, pathogenesis, stages, morphology and complications and evaluation of Obstructive airway disease (OAD) and bronchiectasis</p> <p>PA26.4;Define and describe the etiology, types, pathogenesis, stages, morphology microscopic appearance and</p> | Theory/practical/ laboratory/clinical |

| | | | |
|-----|-----------------------|---|--|
| | | <p>complications of tuberculosis</p> <p>PA26.5: Define and describe the etiology, types, exposure, environmental influence, pathogenesis, stages, morphology, microscopic appearance and complications of Occupational lung disease</p> <p>PA26.6: Define and describe the etiology, types, exposure, genetics environmental influence, pathogenesis, stages, morphology, microscopic appearance, metastases and complications of tumors of the lung and pleura</p> <p>PA26.7: Define and describe the etiology, types, exposure, genetics environmental influence, pathogenesis, morphology, microscopic appearance and complications of mesothelioma</p> | |
| 27) | Cardiovascular system | <p>PA27.1: Distinguish arteriosclerosis from atherosclerosis. Describe the pathogenesis and pathology of various causes and types of arteriosclerosis</p> <p>PA27.2: Describe the etiology, dynamics, pathology types and complications of aneurysms including aortic aneurysms</p> <p>PA27.3: Describe the etiology, types, stages pathophysiology, pathology and complications of heart failure</p> <p>PA27.4: Describe the etiology, pathophysiology, pathology, gross and microscopic features, criteria and complications of rheumatic fever</p> <p>PA27.5: Describe the epidemiology, risk factors, etiology, pathophysiology, pathology, presentations, gross and microscopic features, diagnostic tests and complications of ischemic heart disease</p> <p>PA27.6: Describe the etiology,</p> | Theory/practical/ laboratory/clinical |

| | | | |
|-----|---------------|--|--|
| | | <p>pathophysiology, pathology, gross and microscopic features, diagnosis and complications of infective endocarditis</p> <p>PA27.7:Describe the etiology, pathophysiology, pathology, gross and microscopic features, diagnosis and complications of pericarditis and pericardial effusion</p> <p>PA27.8:Interpret abnormalities in cardiac function testing in acute coronary syndromes</p> <p>PA27.9:Classify and describe the etiology, types, pathophysiology, pathology, gross and microscopic features, diagnosis and complications of cardiomyopathies</p> <p>PA27.10:Describe the etiology, pathophysiology, pathology features and complications of syphilis on the cardiovascular system</p> | |
| 28) | Urinary Tract | <p>PA28.1:Describe the normal histology of the kidney</p> <p>PA28.2:Define, classify and distinguish the clinical syndromes and describe the etiology, pathogenesis, pathology, morphology, clinical and laboratory and urinary findings, complications of renal failure</p> <p>PA28.3:Define and describe the etiology, precipitating factors, pathogenesis, pathology, laboratory urinary findings, progression and complications of acute renal failure</p> <p>PA28.4:Define and describe the etiology, precipitating factors, pathogenesis, pathology, laboratory urinary findings progression and complications of chronic renal failure</p> <p>PA28.5: Define and classify glomerular</p> | Theory/practical/ laboratory/clinical |

| | | | |
|--|--|--|--|
| | | <p>diseases. Enumerate and describe the etiology, pathogenesis, mechanisms of glomerular injury, pathology, distinguishing features and clinical manifestations of glomerulonephritis</p> <p>PA28.6: Define and describe the etiology, pathogenesis, pathology, laboratory, urinary findings, progression and complications of IgA nephropathy</p> <p>PA28.7: Enumerate and describe the findings in glomerular manifestations of systemic disease</p> <p>PA28.8: Enumerate and classify diseases affecting the tubular Interstitium</p> <p>PA28.9: Define and describe the etiology, pathogenesis, pathology, laboratory, urinary findings, progression and complications of acute tubular necrosis</p> <p>PA28.10: describe the etiology, pathophysiology, lab findings and distinguishing features progression and complications of acute and chronic pyelonephritis and reflux nephropathy</p> <p>PA28.11: Define classify and describe the etiology, pathogenesis pathology, laboratory, urinary findings, distinguishing features progression and complications of vascular disease of the kidney</p> <p>PA28.12: Define classify and describe the genetics, inheritance, etiology, pathogenesis, pathology, laboratory, urinary findings, distinguishing features, progression and complications of cystic disease of the kidney</p> <p>PA28.13: Define classify and describe the etiology, pathogenesis, pathology, laboratory, urinary findings, distinguishing features progression and complications of renal stone disease and obstructive</p> | |
|--|--|--|--|

| | | | |
|-----|--------------------|--|--|
| | | <p>uropathy</p> <p>PA28.14: Classify and describe the etiology, genetics, pathogenesis, pathology, presenting features, progression and spread of renal tumors</p> <p>PA28.15: Classify and describe the etiology, genetics, pathogenesis, pathology, presenting features, progression and spread of renal tumors</p> <p>PA28.16: Describe the etiology, genetics, pathogenesis, pathology, presenting features and progression of urothelial tumors</p> | |
| 29) | Male Genital Tract | <p>PA29.1: Classify testicular tumors and describe the pathogenesis, pathology, presenting and distinguishing features, diagnostic tests, progression and spread of testicular tumors</p> <p>PA29.2: Describe the pathogenesis, pathology, presenting and distinguishing features, pathogenesis and spread of carcinoma of the penis</p> <p>PA29.3: Describe the pathogenesis, pathology, hormonal dependency presenting and distinguishing features, urologic findings & diagnostic tests of benign prostatic hyperplasia</p> <p>PA29.4: Describe the pathogenesis, pathology, hormonal dependency presenting and distinguishing features, diagnostic tests, progression and spread of carcinoma of the prostate</p> <p>PA29.5: Describe the etiology, pathogenesis, pathology and progression of prostatitis GROSS</p> | Theory/practical/ laboratory/clinical |

| | | | |
|-----|----------------------|--|--|
| 30) | Female Genital Tract | <p>PA30.1: Describe screening, diagnosis and progression of carcinoma of the cervix</p> <p>PA30.2: Describe the pathogenesis, etiology, pathology, diagnosis and progression and spread of carcinoma of the endometrium</p> <p>PA30.3: Describe the pathogenesis, etiology, pathology, diagnosis and progression and spread of carcinoma of the leiomyomas and leiomyosarcomas</p> <p>PA30.4: Classify and describe the etiology, pathogenesis, pathology, morphology, clinical course, spread and complications of ovarian tumors</p> <p>PA30.5: Describe the etiology, pathogenesis, pathology, morphology, clinical course, spread and complications of gestational trophoblastic neoplasms</p> <p>PA30.6: Describe the etiology and morphologic features of cervicitis (Non core)</p> <p>PA30.7: Describe the etiology, hormonal dependence, features and morphology of endometriosis</p> <p>PA30.8: Describe the etiology and morphologic features of adenomyosis</p> <p>PA30.9: Describe the etiology, hormonal dependence and morphology of endometrial hyperplasia</p> | Theory/practical/ laboratory/clinical |
| 31) | Breast | <p>PA31.1: classify and describe the types, etiology, pathogenesis, of benign breast disease</p> <p>PA31.2: classify and describe the epidemiology, pathogenesis, classification, morphology, prognostic factors, hormonal dependency, staging and spread of carcinoma of the breast</p> | Theory/practical/ laboratory/clinical |

| | | | |
|-----|------------------|--|--|
| | | <p>PA31.3: Describe and identify the morphologic and microscopic features of carcinoma of the breast (P)</p> <p>PA31.4: Enumerate and describe the etiology, hormonal dependency and pathogenesis of gynecomastia (NON CORE)</p> | |
| 32) | Endocrine system | <p>PA32.1: Enumerate, classify and describe the etiology, pathogenesis, pathology and iodine dependency of thyroid swellings</p> <p>PA32.2: Describe the etiology, cause, iodine dependency, pathogenesis, manifestations, laboratory and imaging features and course of thyrotoxicosis</p> <p>PA32.3: Describe the etiology, pathogenesis, manifestations, laboratory and imaging features and course of thyrotoxicosis/ hypothyroidism AND THYROID TUMORS</p> <p>PA32.4: Classify and describe the epidemiology, etiology, pathogenesis, pathology, clinical laboratory features, complications and progression of diabetes mellitus</p> <p>PA32.5: Describe the etiology, genetics, pathogenesis, manifestations, laboratory and morphologic features of hyperparathyroidism</p> <p>PA32.6: Describe the etiology, laboratory, morphologic features, complications and metastases of pancreatic cancer</p> <p>PA32.7: Describe the etiology, pathogenesis, manifestations, laboratory, morphologic features, complications of adrenal insufficiency</p> <p>PA32.8: Describe the etiology, pathogenesis, manifestations, laboratory,</p> | Theory/practical/ laboratory/clinical |

| | | | |
|-----|----------------------|--|--|
| | | <p>morphologic features, complications of Cushing's syndrome</p> <p>PA32.9: Describe the etiology, pathogenesis, manifestations, laboratory and morphologic features of adrenal neoplasms</p> | |
| 33) | Bone and soft tissue | <p>PA33.1: Classify and describe the etiology, pathogenesis, manifestations, radiologic and complications of osteomyelitis</p> <p>PA 33.2: Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications and metastases of bone tumors</p> <p>PA 33.3: Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications and metastases of soft tissue tumors</p> <p>PA 33.4: Classify and describe the etiology, pathogenesis, manifestations, radiologic and morphologic features and complications of Paget's disease of the bone</p> <p>PA 33.5: Classify and describe the etiology, immunology, pathogenesis, manifestations, radiologic and laboratory features, diagnostic criteria and complications of rheumatoid arthritis</p> | Theory/practical/ laboratory/clinical |
| 34) | Skin | <p>PA34.1: Describe the risk factors pathogenesis, pathology and natural history of squamous cell carcinoma of the skin</p> <p>PA34.2: Describe the risk factors pathogenesis, pathology and natural history of basal cell carcinoma of the skin</p> <p>PA34.3: Describe the distinguishing</p> | Theory/practical/ laboratory/clinical |

| | | | |
|-----|------------------------|--|--|
| | | <p>features between a nevus and melanoma. Describe the etiology, pathogenesis, risk factors morphology clinical features and metastases of melanoma</p> <p>PA34.4: Identify, distinguish and describe common tumors of the skin</p> | |
| 35) | Central Nervous System | <p>PA 35.1 Describe the etiology, types and pathogenesis, differentiating factors, CSF findings in meningitis</p> <p>PA35.2: Classify and describe the etiology, genetics, pathogenesis, pathology, presentation sequelae and complications of CNS tumors</p> <p>PA35.3: Identify the etiology of meningitis based on given CSF parameters (P)</p> | Theory/practical/ laboratory/clinical |
| 36) | Eye | <p>PA36.1: Describe the etiology, genetics, pathogenesis, pathology, presentation, sequelae and complications of retinoblastoma</p> | Theory/practical/ laboratory/clinical |

Holidays and exams :

| Term | Exam | Vacations/preparatory leaves |
|------------------|--|------------------------------|
| 1 | 05/1-10/1 | 17/12-31/12 |
| 2 | 20/4-26/4 theory 7 days practical till 08/5 | 16/6-30/6 |
| 3 | 9/8-15/8 theory 16/8-23/8 practicals | |
| University exams | 5/9 onwards | |

Teaching learning methods

1. Didactic lectures
2. Small group teaching
3. Self directed learning by arranging seminars and symposium
4. Problem card based learning
5. Practical –
 - Performing hematological exercises –TLC, DLC, Peripheral smear making and staining
 - Performing urine examination and interpreting various lesions
 - Analyse lab reports and its correlation with clinical diagnosis
 - Perform the correct technique of blood grouping and cross matching
6. Identifying gross pathology of various organs
7. Study of histopathology slides of various diseases
8. AETCOM

A handwritten signature in blue ink, with a checkmark above it, located to the left of the list items 6, 7, and 8.

Paper I: General principles of Pathology, Clinical Pathology and Hematology

| Sl.No. | Topic | Approximate weight-age |
|--------|---------------------------------------|------------------------|
| 1 | Cell injury and adaptation | 10 |
| 2 | Inflammation and repair | 10 |
| 3 | Hemostasis/ Circulatory disturbances | 8 |
| 4 | Immunopathology | 6 |
| 5 | Infectious pathology | 8 |
| 6 | Genetic and Environmental diseases | 4 |
| 7 | Neoplasia | 10 |
| 8 | Childhood diseases | 4 |
| 9 | RBC Disorders | 10 |
| 10 | WBC disorders | 10 |
| 11 | Lymphoreticular system | 4 |
| 12 | Diseases of Coagulation & Bleeding | 8 |
| 13 | Blood Banking | 4 |
| 14 | Clinical pathology incl cytopathology | 4 |
| | | 100 |

Guidelines for assessment: 20% MCQ

80% SAQ

30% of Questions should be on etiopathogenesis

30% on morphology preferably with clinical correlation

40% Problem based / lab diagnosis/reasoning

Variations in the scheme as per the consensus of examiners and moderator

Part I

1. Structured essay Question 8 marks
2. Differentiate between 4 questions x 4 = 16 marks

Part II

3. Structured essay Question 8 marks
4. Short notes; 4 questions x 5 = 20 marks

Part III

5. Structured essay Question 8 marks
6. Short notes 4 questions x 5 = 20 marks

Paper II Systemic Pathology

| S.no | Topic | Approximate weight age |
|------|--|------------------------|
| 1 | Cardiovascular | 10 |
| 2 | Respiratory | 10 |
| 3 | Gastrointestinal Tract | 15 |
| 4 | Hepatic and Biliary Tract, exocrine pancreas | 15 |
| 5 | Endocrine system | 8 |
| 6 | Urinary tract | 10 |
| 7 | Male genital tract | 6 |
| 8 | Female genital tract | 8 |
| 9 | Breast | 6 |
| 10 | CNS | 4 |
| 11 | Skin and soft tissue | 4 |
| 12 | Bone & Joints | 4 |
| | | 100 |

Guidelines for assessment: 20% MCQ 80% SAQ
 30% of Questions should be on etiopathogenesis
 30% on morphology preferably with clinical correlation
 40% Problem based/lab diagnosis/reasoning
 Variation in the scheme as per the consensus of examiners/ moderator

Part I

- | | |
|-----------------------------|----------------------------|
| 1 Structured essay Question | 8 marks |
| 2. Differentiate between | 4 questions x 4 = 16 marks |

Part II

- | | |
|------------------------------|----------------------------|
| 3. Structured essay Question | 8 marks |
| 4. Short notes ; | 4 questions x 5 = 20 marks |

Part III

- | | |
|------------------------------|----------------------------|
| 5. Structured essay Question | 8 marks |
| 6. Short notes | 4 questions x 5 = 20 marks |

Eligibility for appearing in examination and pass criteria as per NMC guidelines

PATHOLOGY PRACTICAL EXAMINATION

Pattern & Marks Distribution

MAX MARKS : 100

Observation and reasoning

| S. No. | Activity | Marks |
|--------|---|-----------|
| 1 | Examine Three histopathology slides, identify the parent tissue, write microscopic features, give diagnosis and make a labelled diagram | 3x5= 15 |
| 2 | Examine the stained peripheral smear provided, do DLC, give the report and three causes of the findings | 1 x 5 = 5 |

| | | |
|---|---|-----------|
| 3 | Study the case history provided. Examine the given peripheral smear/ bone marrow smear, write your observations and give your diagnosis. | 1 x 5 = 5 |
| 4 | Test for Hemoglobin by Sahli's hemoglobinometer or TLC by Neubauer's chamber. Write observation, inference. Performance of this test will be observed by 1 examiner | 1 x 5 = 5 |
| 5 | With the given blood sample, prepare and stain the peripheral smear and focus the smear. Performance of this test will be observed by 1 examiner for smear making and staining. | 5+ 5 = 10 |
| 6 | Urine Chemical Test: (Test for Protein/sugar/ketone bodies): perform urine chemical test by conventional method. Student has to write the result, inference and give answer to additional questions asked. Performance of this test will be observed by 1 examiner | 15 |
| 7 | OSPE: <ul style="list-style-type: none"> • Three gross – specimens • Two Instrument identification & related Questions • One observation and interpretation of test: Blood group identification by Slide method • One urine sediment/ PAP stain • One parasite • Two clinical case histories and lab findings for diagnosis | 10 |
| 8 | Viva voce : Analytical skill-Case based discussion / Interpretation to assess clinical application; based on case histories discussion on approach to diagnosis, reasoning based on test findings/ specimens /images | 30 |

| | | |
|---|---------------------------------|------------|
| | /instruments / charts/ lab data | |
| 9 | AETCOM | 5 |
| | Total | 100 |

Internal assessment (IA)

Chapter end assessment, approx 10 : 10x10 =

100 (Total 50 for Theory & 50 for OSPE/ Spotting -
to be added in term examinations theory & practical respectively)

Should include short essay questions, objective questions, ospe , practicals and practical logbook

| Exam | Theory | | Practical | |
|------------------------------------|--------------------|----------------------------|--------------------|-----------------------------|
| | Academic knowledge | Other* academic activities | Academic knowledge | Other** academic activities |
| Chapter end assessment (10x10=100) | 40 | 10 | 40 | 10 |
| Term I | 40 | 10 | 40 | 10 |
| Term II | 80 | 20 | 80 | 20 |
| Term III | 200 | | 100 | |
| Total | 400 | | 300 | |

Term I Theory: 50= (40+10 MCQ)

Practical : 50

Term II Theory: 100= (80 + 20 MCQ)

Practicals : 100

Term III : same format as university exam

As per CBME recommendations, upto 20% marks of IA should be from log book assessment.

It has been recommended that 80% of both theory and practical IA should be from Academic knowledge and rest 20% from other academic activities

*Other academic activities for Theory include: Interest in subject, Active participation, Scientific attitude, other academic activity participation (e.g. quiz, poster making, etc) and Logbook.

**Other academic activities for Practical include: Assignment completion (Practical notebook etc), Attitude, Ethical work habits, Communication and Logbook.

IA taken during the whole tenure will be added

Internal assessment: all above (Theory 400; Practicals : 300) added and IA calculated for Theory (40) and Practical (20)

Eligibility as per NMC guidelines: Learners must secure at least 50% marks of the total marks (Combined theory and Practical marks; not less than 40% marks in theory and practical separately) assigned for internal assessment.

Eligibility for appearing in examination and pass criteria as per NMC guidelines

22. Amendment to Ordinance V (2) & VII. [EC. Res. 78-7 dated 25.03.2022] regarding course curriculum prepared on competency based UG curriculum for MBBS course -2nd Professional (New Scheme).

**Revised Pharmacology Curriculum (CBME)
2020 Onwards**

CURRICULUM OF PHARMACOLOGY FOR MEDICAL STUDENTS

Preamble

Pharmacology is the science of medicines. The knowledge of the molecular basis of drug action, its therapeutic applications, the adverse effects caused by the medications, their prevention and treatment and the effects of administering two or more drugs to a patient will be learnt in the context of its clinical application and not just as facts. The use of medicines for treating patients with the required medications, at the right dose, in the right way, for the right duration and at an appropriate cost, with consideration for all

social, environmental and economic factors that may impact the therapy. The emphasis will be on clinical relevance of pharmacology knowledge.

1. VISION / GOAL

The broad goal of teaching pharmacology to under graduate students is to inculcate rational and scientific basis of therapeutics. To provide knowledge of pharmacology based on evidence and to foster the development of a highly knowledgeable, skilled and competent Indian Medical Graduates imbued with the concept of rational Pharmaco-therapeutics. Simultaneously focus is to impart requisite skills, attitudes, values and responsiveness, so that the students are able to function appropriately and effectively as doctors at the community level while being globally relevant.

2. LEARNING OBJECTIVES (overall)

- i. To equip the Indian Medical Graduate (IMG) with the knowledge of scientific basis of therapeutics and the skills of rational prescribing.
- ii. The student should acquire knowledge of the principles and application of Pharmacotherapy.
- iii. The student should be able to demonstrate appropriate use of medicines in disease with consideration to its efficacy, safety, suitability and cost for the individual and mass therapy.
- iv. The student should have an understanding of general considerations of antimicrobial resistance and antibiotic stewardship program

Access knowledge about medicines through reliable resources to enable the students to fulfill their roles of an Indian Medical Graduate as a clinician, leader, communicator, lifelong learner and professional

3. COMPETENCIES

The student during the training program should acquire the following competencies:

(a) Knowledge /Cognitive Domain

At the end of the course the learner shall be able to:

1. Understand the general principles of drug action and handling of drugs by the body in all the individuals including children, elderly, lactating and pregnant women and those having a renal and/or hepatic disease and genetic variations.

2. Prescribe drugs rationally by:
 - a. Understanding the importance of both the non pharmacological (non-drug) and pharmacological (drug) treatment
 - b. Selection of drugs based on suitability, tolerability, efficacy and cost.
3. Apply pharmacokinetic principles in clinical practice pertaining to the drugs used in commonly encountered conditions, National Health Programmes and emergency medical conditions.
4. Foresee, prevent and manage adverse drug events and drug/food/traditional medicine interactions.
5. Use antimicrobials judiciously for therapy and prophylaxis, understanding the rapid development of Antimicrobial resistance (AMR).
6. Understand and implement the concepts of essential medicines, pharmacoeconomics and evidence-based medicine for improving the community health care.
7. Describe the clinical presentation and management of common poisoning including bites and stings.
8. Understand the basic concepts of new drug development with emphasis on design and conduct of clinical trials and interpretation of their results.

(b) Skills/ Psychomotor Domain

At the end of the course the learner shall be able to perform and interpret following Skills

1. Write a correct, complete and legible prescription for common ailments including those in the National health Programmes and emergency medical conditions. And should be able to modify the prescription in case of drug interactions.
2. Calculate the drug dosage using appropriate formulae for an individual patient.
3. Administer the required dose of different drug formulations using appropriate devices and techniques (e.g injections, inhalers, transdermal patches etc.).
4. Advice and interpret the therapeutic monitoring reports of important drugs.
5. Identify, analyze and report adverse drug reactions to appropriate authorities.
6. Retrieve drug information from appropriate sources including the electronic resources.

7. Analyse critically drug promotional literature in terms of pharmacological actions of the ingredients, rational/irrational nature of the preparation, economics of the use and claims by the pharmaceutical companies.

(c) Communication affective attitude Domain

1. Effectively explain to patients, the effects and side effects of drugs, including the need for medication adherence.
2. Communicate effectively with pharmacological reasoning with health care team on rational use of drugs and improving spontaneous reporting of adverse events.
3. Motivate patients with chronic diseases to adhere to the line of management as outlined by the health care provider.
4. Demonstrate respect in interactions with peers, and other healthcare professionals.
5. Demonstrate ethical behavior and integrity in one's work.
6. Demonstrate ability to generate awareness about the use of generic drugs in patients.
7. Understand the legal and ethical aspects of prescribing drugs.
8. Acquire skills for self-directed learning to keep up with developments in the field and to continuously build to improve on skills, expertise and perpetual professional development.

4. COURSE

Course content for detailed competencies given below in Appendix 1

| PH | Competency |
|------|--|
| 1.1 | Define and describe the principles of pharmacology and pharmacotherapeutics |
| 1.2 | Describe the basis of Evidence based medicine and Therapeutic drug monitoring |
| 1.3 | Enumerate and identify drug formulations and drug delivery systems |
| 1.4 | Describe absorption, distribution, metabolism & excretion of drug |
| 1.5 | Describe general principles of mechanism of drug action |
| 1.6 | Describe principles of Pharmacovigilance & ADR reporting systems |
| 1.7 | Define, identify and describe the management of adverse drug reactions (ADR) |
| 1.8 | Identify and describe the management of drug interactions |
| 1.9 | Describe nomenclature of drugs i.e. generic, branded drug |
| 1.10 | Describe parts of a correct, complete and legible generic prescription. Identify errors in prescription and correct appropriately |
| 1.11 | Describe various routes of drug administration, eg. oral, SC, IV, IM, SL |
| 1.12 | Calculate the dosage of drugs using appropriate formulae for an individual patient, including children, elderly and patient with renal |

| | |
|------|--|
| | dysfunction |
| 1.13 | Describe mechanism of action, types, doses, side effects, indications and contraindications of adrenergic and anti-adrenergic drugs |
| 1.14 | Describe mechanism of action, types, doses, side effects, indications and contraindications of cholinergic and anticholinergic drugs |
| 1.15 | Describe mechanism/s of action, types, doses, side effects, indications and contraindications of skeletal muscle relaxants |
| 1.16 | Describe mechanism/s of action, types, doses, side effects, indications and contraindications of the drugs which act by modulating autacoids, including: anti-histaminic, 5-HT modulating drugs, NSAIDs, drugs for gout, anti-rheumatic drugs, drugs for migraine |
| 1.17 | Describe the mechanism/s of action, types, doses, side effects, indications and contraindications of local anesthetics |
| 1.18 | Describe the mechanism/s of action, types, doses, side effects, indications and contraindications of general anesthetics, and preanesthetic medications |
| 1.19 | Describe the mechanism/s of action, types, doses, side effects, indications and contraindications of the drugs which act on CNS, (including anxiolytics, sedatives & hypnotics, anti-psychotic, antidepressant drugs, anti-manics, opioid agonists and antagonists, drugs used for neurodegenerative disorders, anti-epileptics drugs) |
| 1.20 | Describe the effects of acute and chronic ethanol intake |
| 1.21 | Describe the symptoms and management of methanol and ethanol poisonings |
| 1.22 | Describe drugs of abuse (dependence, addiction, stimulants, depressants, psychedelics, drugs used for criminal offences) |
| 1.23 | Describe the process and mechanism of drug deaddiction |
| 1.24 | Describe the mechanism/s of action, types, doses, side effects, indications and contraindications of the drugs affecting renal systems including diuretics, antidiuretics- vasopressin and analogues |
| 1.25 | Describe the mechanism/s of action, types, doses, side effects, indications and contraindications of the drugs acting on blood, like anticoagulants, antiplatelets, fibrinolytics, plasma expanders |
| 1.26 | Describe mechanisms of action, types, doses, side effects, indications and contraindications of the drugs modulating the renin-angiotensin and aldosterone system |
| 1.27 | Describe the mechanisms of action, types, doses, side effects, indications and contraindications of antihypertensive drugs and drugs used in shock |
| 1.28 | Describe the mechanisms of action, types, doses, side effects, indications and contraindications of the drugs used in ischemic heart disease (stable, unstable angina and myocardial infarction), peripheral vascular disease |

| | |
|------|--|
| 1.29 | Describe the mechanisms of action, types, doses, side effects, indications and contraindications of the drugs used in congestive heart failure |
| 1.30 | Describe the mechanisms of action, types, doses, side effects, indications and contraindications of the antiarrhythmics |
| 1.31 | Describe the mechanisms of action, types, doses, side effects, indications and contraindications of the drugs used in the management of dyslipidemias |
| 1.32 | Describe the mechanism/s of action, types, doses, side effects, indications and contraindications of drugs used in bronchial asthma and COPD |
| 1.33 | Describe the mechanism of action, types, doses, side effects, indications and contraindications of the drugs used in cough (antitussives, expectorants/ mucolytics) |
| 1.34 | Describe the mechanism/s of action, types, doses, side effects, indications and contraindications of the drugs used as below: 1. Acid-peptic disease and GERD 2. Antiemetics and prokinetics 3. Antidiarrhoeals 4. Laxatives 5. Inflammatory Bowel Disease 6. Irritable Bowel Disorders, biliary and pancreatic diseases |
| 1.35 | Describe the mechanism/s of action, types, doses, side effects, indications and contraindications of drugs used in hematological disorders like: 1. Drugs used in anemias 2. Colony Stimulating factors |
| 1.36 | Describe the mechanism of action, types, doses, side effects, indications and contraindications of drugs used in endocrine disorders (diabetes mellitus, thyroid disorders and osteoporosis) |
| 1.37 | Describe the mechanisms of action, types, doses, side effects, indications and contraindications of the drugs used as sex hormones, their analogues and anterior Pituitary hormones |
| 1.38 | Describe the mechanism of action, types, doses, side effects, indications and contraindications of corticosteroids |
| 1.39 | Describe mechanism of action, types, doses, side effects, indications and contraindications the drugs used for contraception |
| 1.40 | Describe mechanism of action, types, doses, side effects, indications and contraindications of 1. Drugs used in the treatment of infertility, and 2. Drugs used in erectile dysfunction |
| 1.41 | Describe the mechanisms of action, types, doses, side effects, indications and contraindications of uterine relaxants and stimulants |

| | |
|------|--|
| 1.42 | Describe general principles of chemotherapy |
| 1.43 | Describe and discuss the causes, extent and burden of Antimicrobial Resistance (AMR). Rational use of antimicrobials including antibiotic stewardship program |
| 1.44 | Describe the first line antitubercular drugs, their mechanisms of action, side effects and doses. |
| 1.45 | Describe the drugs used in MDR and XDR Tuberculosis |
| 1.46 | Describe the mechanisms of action, types, doses, side effects, indications and contraindications of antileprotic drugs |
| 1.47 | Describe the mechanisms of action, types, doses, side effects, indications and contraindications of the drugs used in malaria, KALA-AZAR, amebiasis and intestinal helminthiasis |
| 1.48 | Describe the mechanisms of action, types, doses, side effects, indications and contraindications of the drugs used in UTI/ STD and viral diseases including HIV |
| 1.49 | Describe mechanism of action, classes, side effects, indications and contraindications of anticancer drugs |
| 1.50 | Describe mechanisms of action, types, doses, side effects, indications and contraindications of immunomodulators and management of organ transplant rejection |
| 1.51 | Describe occupational and environmental pesticides, food adulterants, pollutants and insect repellents |
| 1.52 | Describe management of common poisoning, insecticides, common sting and bites |
| 1.53 | Describe heavy metal poisoning and chelating agents |
| 1.54 | Describe vaccines and their uses |
| 1.55 | Describe and discuss the following National Health Programmes including Immunisation, Tuberculosis, Leprosy, Malaria, HIV, Filariasis, Kala Azar, Diarrhoeal diseases, Anaemia & nutritional disorders, Blindness, Non-communicable diseases, cancer and Iodine deficiency |
| 1.56 | Describe basic aspects of Geriatric and Pediatric pharmacology |
| 1.57 | Describe drugs used in skin disorders |
| 1.58 | Describe drugs used in Ocular disorders |
| 1.59 | Describe and discuss the following: Essential medicines, Fixed dose combinations, Over the counter drugs, Herbal medicines |
| 1.60 | Describe and discuss Pharmacogenomics and Pharmacoeconomics |
| 1.61 | Describe and discuss dietary supplements and nutraceuticals |
| 1.62 | Describe and discuss antiseptics and disinfectant |
| 1.63 | Describe Drug Regulations, acts and other legal aspect |
| 1.64 | Describe overview of drug development, Phases of clinical trials and Good Clinical Practice |
| | CLINICAL PHARMACY |

| | |
|----------------------------------|--|
| 2.1 | Demonstrate understanding of the use of various dosage forms (oral/local/parenteral; solid/liquid) |
| 2.2 | Prepare oral rehydration solution from ORS packet and explain its use |
| 2.3 | Demonstrate the appropriate setting up of an intravenous drip in a simulated environment |
| 2.4 | Demonstrate the correct method of calculation of drug dosage in patients including those used in special situations |
| CLINICAL PHARMACOLOGY | |
| 3.1 | Write a rational, correct and legible generic prescription for a given condition and communicate the same to the patient |
| 3.2 | Perform and interpret a critical appraisal (audit) of a given prescription |
| 3.3 | Perform a critical evaluation of the drug promotional literature |
| 3.4 | To recognise and report an adverse drug reaction |
| 3.5 | To prepare and explain a list of P-drugs for a given case/condition |
| 3.6 | Demonstrate how to optimize interaction with pharmaceutical representative to get authentic information on drug |
| 3.7 | Prepare a list of essential medicines for a healthcare facility |
| 3.8 | Communicate effectively with a patient on the proper use of prescribed medication |
| EXPERIMENTAL PHARMACOLOGY | |
| 4.1 | Administer drugs through various routes in a simulated environment using mannequins |
| 4.2 | Demonstrate the effects of drugs on blood pressure (vasopressor and vaso-depressors with appropriate blockers) using computer aided learning |
| COMMUNICATION | |
| 5.1 | Communicate with the patient with empathy and ethics on all aspects of drug use |
| 5.2 | Communicate with the patient regarding optimal use of a) drug therapy, b) devices and c) storage of medicines |
| 5.3 | Motivate patients with chronic diseases to adhere to the prescribed management by the health care provider |
| 5.4 | Explain to the patient the relationship between cost of treatment and patient compliance |
| 5.5 | Demonstrate an understanding of the caution in prescribing drugs likely to produce dependence and recommend the line of management |
| 5.6 | Demonstrate ability to educate public & patients about various aspects of drug use including antimicrobials as prescription drugs, drug dependence and OTC drugs |
| 5.7 | Demonstrate an understanding of the legal and ethical aspects of prescribing drugs |

RECOMMENDED HOURS of Pharmacology Teaching

| | |
|------------------------|-------------|
| Total | - 230 hours |
| Lectures | - 80 hours |
| Practicals | - 138 hours |
| Self Directed Learning | - 12 hours |

5. TEACHING LEARNING METHODS

Teaching Learning methods used would include both for large group teaching and small group teaching. Approximately one third of time will be for didactic lectures.

Large group -Any instructional large group method including traditional lecture and interactive lecture.

Small Group – Any instructional method involving small groups of students in an appropriate learning context. These topics included are those where more intensive and interactive learning sessions are required.

Will be as follows

-Demonstration-Observation-Assistance-Performance (DOAP) - Sessions: A practical session that allows the student to observe a demonstration, assist the performer, perform in a simulated environment, perform under supervision or perform independently.

Demonstration of different routes of drug administration i.e. Intravenous, Intramuscular, subcutaneous, Inhalation, Drug formulation exercises (Clinical Pharmacy).

- Problem based learning for Small Group Discussions - Drug nomenclature, Home remedies and house hold measures, Fixed dose drug combinations, Prescription writing, Rational Use of Medicines, Drug Advertisement, Drug dose calculation, Drug interaction, Drug food interactions and interaction of drugs of modern & traditional medicines, Antimicrobial Stewardship Program & Rational Use of antimicrobials, Essential Medicine concept, P Medicine exercises for treatment of common disease conditions, Monitoring drug therapy, Ethics in Human Volunteer Experiment, Adverse Drug Reaction (ADR) form filling exercise.

-Computer Assisted Learning - Experiments showing effects of drugs on physiological systems. For example Effect of drugs on Rabbit Eye, Effect of drugs on Dog Blood Pressure, Effect of drugs on Frog Rectus abdominis muscle.

-Student Presentations - Evolution of Medicine and Pharmacology, Sources of Medicines, Drug formulations, Pharmacological basis of House hold remedies, Indian Systems of Medicines , Systemic Pharmacology etc.

-Preparation of Charts and Models - Evolution of Medicine and Pharmacology, House hold remedies, Drug dosage forms.

-Clinical Exposure - Clinical case discussions on common disease conditions, ADR monitoring and reporting.

-Self Directed Learning - A process in which individuals take the initiative, with or without the help of others in diagnosing their learning needs, formulating learning goals, identifying human and material sources for learning, choosing and implementing appropriate learning methods.

Preparation for seminars, projects, student presentations on areas of interest and relevant to learning of Pharmacology.

6. ASSESSMENT

a) Formative Assessment: Formative assessment shall be done periodically throughout the course.

b) Internal Assessment:

i) No less than three internal assessment exams shall be conducted during the course.

ii) **Certifiable competencies:** Achievement of certifiable competencies would also be recorded in logbooks. The student must have completed the required certifiable competencies and completed the log book to be eligible for appearing at the final university examination. (Appendix 2: List of Certifiable competencies)

iii) **Log Book:** Log book is to be maintained to record all activities like Drug formulations, Computer Assisted Learning exercises, Experimental Pharmacology, Clinical Pharmacology and other academic activities. It has to be submitted to the department regularly and would be assessed regularly (Appendix 3).

Internal assessment will be calculated for Theory (40) marks & Practical (20) marks.

50% combined in theory and practical (not less than 40% in each) for eligibility for appearing for University Examinations.

c) Summative theory practical and Viva voice pattern with distribution of marks :
At the end of the course a final examination will be conducted by the University.

University (Professional) examination: There will be a Theory and Practical + Viva examination .

i) THEORY PAPERS

There shall be two theory papers.

Each paper shall be of 03 hours duration and of 100 marks.

THEORY PAPER - PHARMACOLOGY

Theory (200 marks) (Paper I – 100, Paper II – 100)

PAPER – I (100 Marks)

Topics: General Pharmacology, Drugs acting on Autonomic nervous system, Drugs acting on Central nervous system, Drugs acting on Peripheral nervous system, Drugs acting on Cardio vascular system, Drugs acting on Kidney, Drugs acting on Respiratory system.

PAPER – II (100 Marks)

Topics: Chemotherapy of infective, parasitic disorders and malignancy, Drugs acting on Reproductive system, Drugs related to Endocrinal system, Drugs acting on Gastrointestinal system, skin and mucous membrane, Autacoids, Drugs affecting Blood and blood formation, Vitamins, Antiseptics and disinfectant, Diagnostic agents, Chelating agents, Vaccines and sera, Environmental pollutants.

THEORY QUESTION PAPER FORMAT

Each paper will have three Parts. Part I of 20 marks, & Part II of 40 marks each. Each part will have two questions

Each paper 100 marks

Part I

20 marks

Objective type questions

- Q1. Multiple type questions of inferential, reasoning type (5 x 2 marks=10)
Q2. State True or False / Fill in the blanks, Match the following (5 x 2 marks =10)
Mechanism of action/Therapeutic uses/ adverse effects of drugs,
Drug of choice type of questions

Part II

40 marks

- Q 3. Explain why (rationale of) giving suitable examples (5 x 4 marks= 20 marks)
Q 4. a)Long structured question based on a Case scenario (10 marks)
b)Short notes (2 x 5 =10 marks)

Part III

40 marks

- Q5. Discuss the therapeutic status of a medicine (4 x 5 marks = 20 marks)
 Q6. Discuss giving the therapeutic goals the drug treatment of a medical condition (2 x 10 marks= 20 marks)
-

ii) PRACTICALS & VIVA

Total marks -100 marks

Practical -70 marks

Viva-voce 30 marks

Practical (70 marks)

- | | |
|------------------------------------|----------|
| 1. Clinical Pharmacy | 20 marks |
| 2. Clinical Pharmacology | 30 marks |
| 3. Attitude, Ethics ,Communication | 10 marks |
| 4. Experimental Pharmacology | 10 marks |

7. RECOMMENDED READING

(A) TEXT

1. Essentials of Medical Pharmacology by K.D. Tripathi latest ed. Jaypee brothers, Medical Publishers, India.
2. Sharma and Sharma's Principles of Pharmacology latest ed. by H. L. Sharma and K. K. Sharma Publishers: Paras Medical Publishers, New Delhi
3. Basic & Clinical Pharmacology Bertram G. Katzung, Susan B. Masters, Anthony J. Trevor, latest ed. McGraw-Hill Companies.

(B) REFERENCE BOOKS

1. Lippincott's Illustrated Reviews : Pharmacology : by Mary J Mycek, Richard A Harvey, Pamela C Champe latest ed Lippincott Williams & Wilkins.
2. Goodman & Gilman's the Pharmacological Basis of Therapeutics by Joel Griffith Hardman, Alfred Goodman Gilman, Lee Limbird, Theodore W. Rall latest ed, McGraw-Hill Professional.

(C) AETCOM module

1. Johnson AR, Siegler M, Winslade WJ. Clinical Ethics: A Practical Approach to Ethical Decisions in Clinical Medicine. New York: Mc Graw Hill Inc, 2015 (latest edition).
2. Timms O. Biomedical Ethics. Elsevier India, 2019 (latest edition)

8. ELECTIVES

May be offered to students in the subject. A student has a choice of four weeks of elective posting after 3rd MBBS part I Professional examination. The departments can offer options for a student to do the same in Pharmacology.

Appendix 1

(I) Concepts of General and Clinical Pharmacology

1. Introduction: definition, historical perspective, branches and scope of the subject of pharmacology and its relation with other medical disciplines.
2. Nature and sources of Drugs, Drug nomenclature and dosage forms.
3. Routes of drugs' administration; advantages and disadvantages of different routes.
4. Pharmacokinetic considerations: drug absorption, distribution, bio transformations and excretion.
5. Pharmacokinetic concepts of bioavailability, apparent volume of distribution (aVd), half life ($t_{1/2}$), and clearance (CL) that are used to decide the doses and rational dosing during the drug treatment.
6. Pharmacodynamics; site and mechanism of drug action, drug receptors and receptor regulation, concepts of agonists, antagonists, partial agonist and inverse agonist drugs
7. Quantitative aspect of drug action: analysis of dose response curve and therapeutic index (safety index).
8. Factors affecting drug action and doses, how to prolong or shorten the drug action and effects.
9. Drug interactions and concept of pharmacogenomics/-genetics in drug action, effects and ADRs.
10. Adverse drug reactions (ADRs) and role of pharmacovigilance activity in ADR monitoring.
11. Concept of evidence-based medicine, essential medicines, pharmacoeconomics, Pdrugs and rational prescribing.
12. Development of new drugs : pre-clinical and clinical phases of drug evaluation.
13. Scope and relevance of Clinical Pharmacology.
14. Essential medicine, rationality of fixed dose combinations.
15. Drug regulation acts and other legal aspects.

(b) Systemic Pharmacology – Drug oriented teaching

(Here a core information about drugs is to be given that should include pharmacological actions, mechanism of action, indications, contraindications, side effects, drug interactions, precautions etc.)

(II) Drugs Affecting Autonomic Nervous System (ANS)

- 16. Introduction to Pharmacology of ANS
- 17. Cholinergic drugs: cholinceptor agonist and cholinesterase inhibiting drugs
- 18. Anticholinergic drugs: cholinceptor blocking agents
- 19. Adrenergic drugs: adrenoceptor agonist and sympathomimetic drugs
- 20 Anti-adrenergic drugs: adrenoceptor antagonists and sympatholytic agents

(III) Drugs Affecting Peripheral Nervous System (PNS)

- 21. Local anaesthetics
- 22. Skeletal muscle relaxants

(IV) Drugs Affecting Cardiovascular System (CVS)

- 23. Drugs affecting vascular tone and volume of circulation, renin angiotensin system and other mechanisms affecting this system
- 24. Antihypertensive drugs
- 25. Anti-anginal drugs, management of Myocardial Infarction
- 26. Drugs for heart failure
- 27. Anti-arrythmic agents
- 28. Anti-dyslipidemic agents, drugs used in peripheral vascular disease
- 29. Nitric oxide donors and inhibitors and basic concepts of treatment of shock

(V) Drugs Affecting Autacoids, Inflammation and Gout

- 30. Histamine, serotonin & their antagonists, treatment of migraine
- 31. Prostaglandins, Leukotrienes, Platelet activating factor
- 32. Non Steroidal Anti inflammatory Drugs
- 34. Drug treatment of gout, rheumatoid arthritis & other autoimmune diseases

(VI) Drugs Affecting Kidney Function

- 35. Diuretics
- 36. Antidiuretics

(VII) Drugs Affecting Respiratory System

- 37. Antitussives, expectorants, mucolytics
- 38. Drug treatment of bronchial asthma, Chronic Obstructive Pulmonary disease

(VIII) Drugs Affecting Gastro-intestinal System

- 39. Drugs for gastric acidity, peptic ulcer & Gastro esophageal reflux disease

- 40. Antiemetic and prokinetic agents
- 41. Drugs for constipation and Inflammatory Bowel Disease
- 42. Antidiarrhoeal agents

(IX) Drugs Acting on Blood

- 43. Agents used to treat anemias and haematopoietic growth factors
- 44. Coagulants and anticoagulants
- 45. Antiplatelet drugs
- 46. Fibrinolytic, antifibrinolytic, plasma expanders

(X) Drugs Affecting Central Nervous system

- 47. Introduction and basic concepts of drugs affecting CNS activity: Neurotransmitters and their pathways and important sites of Central Nervous System effect of drugs
- 48. Sedative hypnotic drugs
- 49. General anaesthetics with preanaesthetic medications
- 50. Antiepileptic drugs
- 51. Antipsychotic drugs
- 52. Antianxiety drugs
- 53. Antidepressant and antimaniac drugs
- 54. Opioid analgesic and antagonists
- 55. Antiparkinsonian drugs and drugs for other neurodegenerative and movement disorders
- 56. Pharmacology of ethyl alcohol and other alcohols
- 57. Pharmacology of CNS stimulants, psychomimetic drugs, drug dependence and substance abuse

(XI) Drugs Affecting Endocrine System and its Diseases

- 58. Pharmacology of pituitary and hypothalamic hormones
- 59. Thyroid hormones and antithyroid drugs
- 60. Estrogen, progesterone and inhibitors
- 61. Oral contraceptives & Hormone replacement therapy
- 62. Androgen
- 63. Drugs for diabetes mellitus: Insulin and oral antidiabetic agents
- 65. Corticosteroids
- 66. Parathyroid hormones and drugs affecting calcium balance
- 67. Drugs acting on uterus
- 68. Drug treatment for infertility and erectile dysfunctions

(XII) Pharmacology of Chemotherapeutic Agents

- 69. Introduction and basic principles of chemotherapy of infection, infestation and neoplastic diseases and concepts of resistance to chemotherapeutic agents
- 70. Sulfonamides
- 71. Quinolones

72. Beta lactam antibiotics
73. Aminoglycosides
74. Macrolides and ketolides
75. Tetracycline and chloramphenicol
76. Oxazolidinones, streptogramin and other antibiotics
77. Antimycobacterial drugs, antitubercular drugs; treatment of MDR and XDR tuberculosis
78. Antileprosy drugs
79. Antifungal drugs
80. Antimalarial drugs
81. Antiamoebic and other antiprotozoal drugs
82. Drugs used in filariasis and kalaazar
83. Anthelmintic agents
84. Antiviral, anti-AIDS drugs
85. Chemotherapy of Urinary tract infection & Sexually transmitted diseases
86. Basic principles of cancer chemotherapy
- (XIII) Immunopharmacology**
87. Vaccines, immunomodulators and treatment of transplant rejection disorders
- (XIV) Miscellaneous Topics**
88. Drugs acting on skin and mucous membrane
89. Vitamins, nutraceuticals and probiotics
90. Pharmacology of Diagnostic agents
91. Paediatric pharmacology
92. Geriatric pharmacology
93. Pharmacology of chelating agents
94. Indian Systems of Medicines

Appendix 2. Certifiable Competencies

| | Certifiable competencies | Number required to certify |
|-----|--|-----------------------------------|
| 3.1 | Write a rational, correct and legible generic prescription for a given condition and communicate the same to the patient | 5 |
| 3.2 | Perform and interpret a critical appraisal (audit) of a given prescription | 3 |
| 3.3 | Perform a critical evaluation of the drug promotional literature | 3 |
| 3.5 | To prepare and explain a list of P-drugs for a given case/condition | 3 |

Appendix 3

M.B.B.S. STUDENT'S LOG BOOK (PHARMACOLOGY)

GENERAL INSTRUCTIONS

1. This logbook is a record of the academic/co-curricular activities in Pharmacology of the designated student.
2. The student is responsible for getting the entries in the logbook verified by the faculty in-charge in the next class.
3. Entries in the Logbook will reflect the activities undertaken in the department of Pharmacology during your course.
4. The student has to get this logbook verified by the mentor and the Head of the department before submitting the application of the University examination.

The log book must have

- 1) Details of Students
 - Name
 - Roll Number
- 2) Details of attendance
- 3) Details of all skill based exercises done
- 4) Details of Certifiable skills
- 5) Details of group discussions/ presentations
- 6) Details of any project work done
- 7) Any other Cocurricular activity related to the subject

A format for **Certifiable skill**

Skill: PH 3.1 Write a rational, correct and legible generic prescription for a given condition and communicate the same to the patient

Domain: Skills

Level of competency: Perform

Core: Yes

The student has to perform this activity- Present **five** prescription for common diseases for certification.

| Exercise name | Date | Completed | | Rating | | |
|---------------|------|-----------|----|--------------------|-------------------|---------------------|
| | | Yes | No | Below expectations | Meet expectations | Exceed expectations |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |
| | | | | | | |

LOG BOOK CERTIFICATE

This is to certify that the candidate Ms _____ Reg No. _____, admitted in the year _____ in the _____ Medical college, New Delhi, has satisfactorily completed / has not completed all assignments / requirements mentioned in this logbook for Second year MBBS course in the subject of Pharmacology during the period from _____ to _____. She/ is/is not eligible to appear for the summative (University) assessment as on the date given below.

Signature of Faculty Name and Designation

Countersigned by Head of the Department

23. Amendment to Ordinance VI (Clause M. Evaluation and Assessment (19) vide E.C Res. No. 78-9/- dated 25.03.2022]

| Existing | | | | | Amended | | | | |

15. Vilanilam, V. John, The Socio Cultural Dynamics of Indian Television: From SITE to Insight to Privatization, Television in Contemporary Asia, David French and Michael Richards (eds). London: Sage, 2000.

**CATEGORY I
(Semester II)**

DISCIPLINE SPECIFIC CORE COURSE – DSC A2: MEDIA AND SOCIETY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Media, Society and Culture | 4 | 3 | 0 | 1 | Class XII Pass | NIL |

Learning Objectives

The course explores the impact of media in society, the patterns of media representations, constructions and stereotypes, and media as a social institution.

Learning Outcomes

The course will impart a sociological understanding of media representations to the students, which may help them to balance the news process and the information needs of the public.

SYLLABUS OF DSC A2 – Media and Society

Unit 1 – Introduction to Society and Media (12 Hours)

1. Basic concepts
2. Relationship between media and society
3. Media in socio-cultural and economic context

Text

1. Media, Culture and Society: An Introduction, Chapter- Introduction by Paul Hodkinson, 2010, Sage Publications
2. Introduction to Sociology (ninth edition) Chapter-3 Part Two-Anthony Giddens by Mitchell Duneier
3. Pandey, Vinita, 2016, Indian society and culture, Rawat Publications
4. Deshpande, Satish, 2004, Contemporary India: a sociological view, Penguin, chap 1 – Squinting at society.

Unit 2 – Media and Power (12 Hours)

1. Communication and social order
2. Socio-political power
3. Democracy and Internet

Text

1. Communications, power and social order by James Curran, chapter 2

2. New media and Power in James Curran's Media and Power by Routledge 2002, chapter 8 Young people, the internet and civic participation - Ted Talk

Unit 3 – Media Content and Representation (09 Hours)

1. What is representation?
2. Construction
3. Stereotypes

Text

1. Epic Contents: Television and Religious Identity in India (134-151) Chapter 6 by Purnima
2. Mankekar in Media Worlds: Anthropology on New Terrain, 2002
3. Media Representation and the Global Imagination: A Framework, Chapter 1 by Orgad Shani, Cambridge, Polity, 2012
4. Slippery Subjects-Gender, meaning, and the Bollywood audience-
eprints.lse.ac.uk

Unit 4 – Mapping the Field and Rethinking Audience (12 Hours)

Practical – 30 Hours

Text

1. Selected chapters from Will Brooker, Jeremyn Deborah, 2003, Audience Studies Reader, Routledge.
2. Simon Cottle (ed), 2000, Ethnic Minorities and the Media, Introduction- Media Research and Ethnic Minorities: Mapping the field, Open University Press
3. Sonia Livingstone, 2008, Relationships between Media and Audiences: prospects for audience reception studies, LSE Research online (<http://eprints.lse.ac.uk/1005/>)
4. Students will produce a 2000-word paper analyzing the media representation through any soap, film, news coverage on a particular issue of their choice. This would be combined with their exposure to some interactions with functionaries in the media who would acquaint them with challenges of negotiating between the needs of news making and presenting social issues or events.

Suggested Readings

1. Benshoff, Harry M. America on Film: Representing Race, Class, Gender and Sexuality at the movies. Wiley Blackwell, 2009.
2. Berger and Asa Arthur. Media and Society: A Critical Perspective. Rowman & Littlefield, 2012.

DISCIPLINE SPECIFIC CORE COURSE –DSC B2: ICT & DIGITAL MEDIA

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| ICT and Digital Media | 4 | 2 | 1 | 1 | Class XII Pass | NIL |

Learning Objectives

The course intends to improve students' knowledge and skills in Information and Media Technology – including both hardware and software.

Learning Outcomes

Through this course, students will become capable of creatively using various ICT devices and digital platforms.

SYLLABUS OF DSC B2 – ICT and Digital Media

Unit 1 – ICT: Basic Concepts (12 Hours)

1. Hardware and Software Components of Computer Systems – A Brief Sketch; Different File Formats and Media Codecs
2. Computer Networks, Network Topology (Internet, Intranet and World Wide Web)
3. Telecommunications – 3G and 4G,
4. Digitization and Convergence of Technologies; Media Convergence

5. Social Construction of Technology

Unit 2 – Digital and Social Media (12 Hours)

1. Concepts: New Media: Definition and Features (Lev Manovich); Cyber Media; Digital Media; Web and Mobile Web; User and the Screen; Economy of New Media
2. Search Engines (Google etc); Internet Search; and its tools
3. Basics of Web Publishing / Blogs and the ‘Blogosphere’; Tools & Applications; WordPress etc.
4. Social Networking and Media Platforms - Facebook, Twitter, YouTube, Instagram, WhatsApp, Social Bookmarking, Skype
5. Social Media and the Post-Modern Public Sphere

Unit 3 – ICT and New Media Applications (12 Hours)

1. Practical Skills: MS Word, MS Power Point, MS Excel (Basics of using them) etc.
2. ICT as an Economic Arena: Digital Marketing, E-Commerce and E-Banking
3. Community Informatics & E-Governance - Cyber Mohalla and Akshaya Projects
4. Basic Concepts: Virtual Reality – 2D/3D Modelling and Simulation; Gaming; Artificial Intelligence; Metaverse
5. Cyber Space Activism & Social Inclusion (Gender, Human Rights and Subaltern Issues)

Unit 4 – ICT and New Media: Ethical Concerns (09 Hours)

1. Globalization & Emerging Cyber cultures, Netiquette, Facets of Cybercrime, Trolling etc.
2. Information Rights and Intellectual Property Rights – Copyright and Copy Left, Plagiarism, Open-Source Approach and Creative Commons
3. Electronic Documents and Digital Signature
4. Cyber Laws Basics, Internet Governance and Regulatory Frameworks

Suggested Projects

1. How to make presentations using MS Word, Power Point, Excel etc.
2. Presentation on Cyber cultures, netiquettes, trolling, differences between new and old media
3. Presentation/Articles on how to use Internet search as a secondary research tool.

Suggested Readings

DISCIPLINE SPECIFIC CORE COURSE – DSC C2 : MEDIA, POLITY AND LEGAL SYSTEMS IN INDIA

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Media, Polity and Legal Systems in India | 4 | 3 | 0 | 1 | Class XII Pass | NIL |

Learning Objectives

The course will introduce the students to the polity, constitution and legal systems in India.

Learning Outcomes

Knowledge of the constitution and legal systems in India will help the students to be responsible and disciplined in their journalistic endeavours and enable them to report the political and governance issues, with larger perspectives.

SYLLABUS OF DSC- – DSC C2 – Media, Polity and Legal Systems in India

Unit 1 - Indian Constitution and Governance (12 Hours)

1. Fundamental Rights: Issues and Debates (Debates on Equality and Liberty, Freedom of Speech, Issue of Reservation, Custodial Deaths, Police Atrocities etc.)
2. Directive Principles of State Policy: Issues and Debates (Uniform civil Code, Cow Protection)
3. Centre-State Relations: Federal v/s Unitary Debates, Federal Issues in Indian Politics, Governor: Power and Functions
4. Media – Government relationship (Media -Legislature, Media -Judiciary)

Unit 2 - Indian Democracy (09 Hours)

1. Legislature: Lok Sabha and Rajya Sabha: Relative Roles and Functions, Issues in Functioning of the Parliament
2. Executive: President, Prime Minister and Council of Ministers
3. Judiciary: High Court and Supreme Court, Judicial Review and Judicial Activism, Public Interest Litigation, Controversies and Issues related to Independence of Judiciary
4. Panchayati Raj Institutions and Grassroots Democracy in India

Unit 3 - Parties, Party System and Electoral Politics in India (12 Hours)

1. Party System in India and the Rise of Coalitions; Types of Parties – National and State level
2. Election Commission and Electoral Reforms
3. Law Commission and National Committee for Review of the Constitution
4. Identity Politics: Gender, Caste, Class and Religion in Indian Politics
5. E-Media and Governance; Covering Campaigns, Elections and Governance

Unit 4 – Media, Polity and Democracy (12 Hours)

1. Democracy and Freedom of the Press; Freedom of Expression and responsibility of the Journalists
2. Power and responsibility of the media; Media as a Watchdog Vs. Government censorship
3. Role of the media in semi-democratic regimes and authoritarian regimes; Media as

promoter of democracy in non-democratic regimes

4. Edward Snowden. Wiki Leaks Case Studies: Freedom of the Press versus National Security Concerns
5. Future of the News Media: Issues and Concerns

Suggested Projects

1. Group project on the success of e-governance and the role of the media
2. Present and analyse on any one aspect (class, caste, gender) and contemporary politics in India
3. Discussions on the independence of the judiciary and the recent controversies around judicial activism
4. Write a paper on the Uniform Civil Code arguing on the merits and demerits of the same

Suggested Readings

Add the following:

Syllabi of Semester-II of the following departments under Faculty of Social Sciences based on Under Graduate Curriculum Framework -2022 to be implemented from the Academic Year 2022-23.

FACULTY OF SOCIAL SCIENCES

DEPARTMENT OF POLITICAL SCIENCE

Category-I

BA (Hons.) Political Science

DISCIPLINE SPECIFIC CORE COURSE – 4: Perspectives on Public Administration

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Perspectives on Public Administration DSC 4 | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

The course provides an introduction to the discipline of public administration. This paper encompasses public administration in its historical context with an emphasis on the various classical and contemporary administrative theories. The course also explores some of the non-mainstream trends, including feminism and perspectives from the Global South on public administration

Learning outcomes

On completion of this course, the student can be expected to

- Have a comprehensive understanding of the conceptual roots of the discipline of Public Administration
- Understand how theorising is done in this discipline
- Understand how new perspectives like that of gender influence the orientation of both theory and practice in the discipline.

SYLLABUS OF DSC-4

UNIT – I (12 Hours)

Public Administration as a Discipline

- a. Ancient Roots of Public Administration: Perspectives from India (Kautilya's Arthashastra)
- b. Modern PA: An overview of the theoretical journey
- c. Principles of Public Administration
- d. Theorising Public Administration

UNIT – II (15 Hours)

Mainstream/ Traditional Theoretical Perspectives

- a. Scientific management (F.W.Taylor)
- b. Ideal-type bureaucracy (Max Weber)
- c. Human relations theory (Elton Mayo)
- d. Rational decision-making (Herbert Simon)
- e. Ecological approach (Fred Riggs)

UNIT – (09 Hours)

Contemporary Theoretical Perspectives

- a. New Public Management, New Public Service
- b. Multiple Perspectives on Governance: Good Governance, Collaborative Governance, Network Governance, Digital Governance

UNIT – IV (09 Hours)

Gender Perspectives on Public Administration

- a. Gender and Governance
- b. Gender sensitivity and participation in administration

Essential/recommended readings

Unit 1. Public Administration as a Discipline

- a. Ancient Roots of Public Administration

Kumar, A. Administration in Kautilya's Arthashastra in M.M. Shankhder & G. Kaur *Politics in India* Deep and Deep Publications, New Delhi, 2005, pp. 83-94.

Muniyapan, B. Kautilya's Arthashastra and Perspectives on Organizational Management *Asian Social Science* Vol. 4, No. 1 January 2008, PP. 30-34.

- b. Modern PA: An overview of the theoretical journey

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5: Methods and Approaches in Comparative Political Analysis

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Methods and Approaches in Comparative Political Analysis DSC 5 | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

This is a foundational course in comparative politics. The aim of this course is to introduce students to the foundational concepts, methods, approaches and the historical legacy of the discipline. The paper offers in-depth discussion on methods, different approaches in terms of their advantages and disadvantages to help understand politics in a critical-comparative framework. Students would be made familiar to the diversity of approaches to study politics such as institutionalism, political culture, political economy and specific debates within each of the approaches. Discussion on a diversity of approaches will highlight different tools, perspectives and parameters to understand the behaviour and functioning of institutions in a political system. This paper would also impart students the ability to use the analytical frame of gender with reference to specific issues like the women's political representation in comparative perspective. The paper will inculcate reflective thinking and research aptitude in students as they will learn to apply these critical outlooks in understanding politics and political processes, particularly from the perspective of developing societies.

Learning outcomes

On successful completion of the course, students would demonstrate:

- An understanding of the nature, scope, methodology, and legacy of the sub-discipline.
- Awareness of the evolution of the sub-discipline of comparative politics and the challenge of Eurocentrism in the discipline.
- An in-depth understating of various approaches to the study of politics in a comparative framework.
- A basic training in comparative research.

SYLLABUS OF DSC- 5

UNIT – I (09 Hours)

Understanding Comparative Politics

- a. Nature and scope
- b. Why Compare

- c. Understanding Comparative Method: How to compare countries: large *n*, small *n*, single countries studies
- d. Going beyond Eurocentrism

UNIT – II (6 Hours)

Approaches to Studying Comparative Politics: Political System, Structural functional analysis

UNIT – III (6 Hours)

Approaches to Studying Comparative Politics: Traditional and Neo-Institutionalisms

- a. Historical Institutionalism
- b. Rational Choice Theory
- c. Sociological Institutionalism

UNIT – IV (9 Hours)

Approaches to Studying Comparative Politics: Political Culture

- a. Civic Culture (Sydney Verba)
- b. Subculture (Dennis Kavanagh)
- c. Hegemony (Antonio Gramsci)
- d. Post materialism (Ronald Inglehart)
- e. Social capital (R. Putnam)

UNIT – V (9 Hours)

Approaches to Studying Comparative Politics: Political Economy

- a. Underdevelopment
- b. Dependency
- c. Modernisation
- d. World Systems Theory

UNIT – VI (6 Hours)

Gendering Comparative Politics

- a. The Gender Lacuna in Comparative Politics
- b. Political Representation: Women in Government and Politics

**DISCIPLINE SPECIFIC CORE COURSE – 6: Introduction to International Relations:
Theories, Concepts and Debates**

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|------------------------|-----------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to International Relations: Theories, Concepts and Debates DSC 6 | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

This paper introduces students to some of the key theories, concepts and debates of international relations. While historically contextualizing the evolution of mainstream IR theories, students will also learn about the leading debates aimed at de-centering and pluralizing the knowledge-base of IR. The debates and conversations on the genealogies of Indian perspectives on IR are anchored in this backdrop. The students will learn how to critically engage with the Eurocentric view of IR through decolonial accounts that foreground the agency of the colonial experience, race and culture that not only identify proximately with the Global South but are also co-constitutive of European modernity, the social sciences and the foundations of the IR discipline. The course weaves in some of the major concepts—power, sovereignty, empire and international order—that push the boundaries of the discipline through understandings derived from diverse standpoints. The final segment—Global IR and the relational turn in international relations—apprises the students with the new directions in the discipline.

Learning outcomes

At the end of this course, the students would have acquired:

- Familiarization with key theories, concepts, and debates of International Relations.
- Comprehensive re-reading of the origin of IR and its mainstream theories and concepts, with basic tools to question statist ontology and reification of eurocentrism.
- Appreciation of decolonial accounts that challenge the mainstream and parochial International Relations.
- Understanding of the genealogy and contributions of the IR scholarship in India to the disciplinary debates through a re-reading of its classical texts and, contemporary writings.
- Analysis of the assumptions and key concepts of IR such as power, sovereignty, empire and international order.
- Learning about the new directions in IR via a critical engagement with Global IR and the relational turn in IR.

SYLLABUS OF DSC-6

UNIT – I (12 Hours)

What is IR and, its Contested Origins

- a. What is IR
- b. Reading the Big Bangs
- c. Bringing in De-colonial Accounts
- d. Understanding the genealogy of IR discipline in India

UNIT – II (15 Hours)

Theories of IR

- a. Introduction to IR Theories
- b. Realpolitik (Kautilya)/ Realism/ Neo-Realism
- c. Liberalism/ Neo-liberalism
- d. Marxism/ Neo-Marxism
- e. Feminism
- f. Constructivism

UNIT – III (9 Hours)

Concepts

- a. Power
- b. Sovereignty
- c. Empire
- d. International Order

UNIT – IV (9 Hours)

Exploring the Future Trajectories

- a. Global IR
- b. A Relational Turn?

Essential/recommended readings

Unit I. What is IR and the story of its contested origins

a. What is IR?

Essential Readings

David Blaney (2020), “Where, When and What is IR?”, in Arlene B. Tickner and Karen Smith (eds.) *International Relations from the Global South: World of Difference*. Routledge: New York.

DISCIPLINE SPECIFIC CORE COURSE (DSC-2A): Indian Government and Politics

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Indian Government and Politics MDSC 2A | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

This course aims to familiarize students with constitutional government and nature of politics in India and the relationship between the two. It focusses on the originary moment of the Indian Republic through an understanding of the philosophy and the features of the Constitution while demonstrating how the processes of state formation and nation making coincided with constitution-making and the interlacing between the two. The course also introduces students to the institutions of the state, the constitutional rules governing them and the political trajectory of their evolution. The course then proceeds by way of familiarity with varied political processes that have dominated the nature of Indian politics including reflections on the development paradigm followed by the Indian state and a critical perspective on the character of Indian state itself. While focusing on the constitutional framework and design laid down for governance, the course delves deeper into the political processes through which a divergent space for actual politics is carved out, in India.

Learning outcomes

On successful completion of the course, students would demonstrate:

- Understanding of the Indian Constitution, its basic features and the rights and duties of the citizens as well as the constitutional obligations of the state
- Knowledge of state institutions in India, the constitutional provisions governing them and actual their working
- Understanding into the nature of Indian society and its relationship with politics through the prism of caste, class, gender, religion, etc.
- Knowledge of party system and political parties in India
- Awareness of the development debates in India and its relationship with the social movements

SYLLABUS OF MDSC-2A

UNIT – I (6 Hours)

Indian Constitution: basic features, debates on Fundamental Rights, Directive Principles and Federalism

UNIT – II (6 Hours)

State formation and nation building: Integration of princely states, linguistic re-organisation of states

UNIT – III (6 Hours)

Political institutions at the Centre and State levels: Parliament, Judiciary, Prime Minister, Chief Minister

UNIT – IV (4.5 Hours)

Social structure and political power: caste, class, gender

UNIT – V (4.5 Hours)

Religion and politics: debates on secularism and communalism

UNIT – VI (4.5 Hours)

Political parties and party systems

UNIT – VII (4.5 Hours)

Development strategies: planned economy, neo-liberal restructuring

UNIT – VIII (4.5 Hours)

Social movements: workers, farmers, environmental, and women's movements

UNIT – IX (4.5 Hours)

The nature of state in India: developmental, welfare, regulatory

DISCIPLINE SPECIFIC CORE COURSE (DSC-2B): India's Foreign Policy**CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| India's Foreign Policy MDSC 2B | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

This course introduces India's foreign policy to students by first explaining its key determining principles and objectives. They will learn about the central issues and developments pertaining to India's foreign policy at the bilateral, regional and global levels. The course also imparts an understanding of India's evolving relations with the superpowers during the Cold War and post-Cold War period with a special focus on India's neighbourhood diplomacy. India's bargaining strategies and positioning in international climate change negotiations and international economic governance will be taught to help the students understand changing positions and developments of India's role in the global domain since independence. This facilitates an understanding about the shift in India's identity from being a postcolonial state to an emerging power in the contemporary multipolar world.

Learning outcomes

At the end of this course, the students would acquire:

- Basic knowledge of the determinants, principles and key drivers of India's foreign policy.
- Understanding the original rationale of India's non-alignment policy and its relevance in the contemporary context as to how India exercises strategic autonomy in foreign policy choices.
- An insight about India's position in changing global power equations particularly its bilateral ties with powerful nations like the US and Russia along with India's largest neighbour, China.
- Understanding of India's neighbourhood diplomacy in South Asia with regard to important challenges pertaining to border disputes, migration and refugees
- Grasp of India's negotiation strategies in dealing with global challenges in the realm of trade and environmental governance.

SYLLABUS OF MDSC-2B**UNIT – I (12 Hours)****India's Foreign Policy: Meaning, Determinants and Evolution****1.1 Domestic and International Determinants of India's Foreign Policy**

- 1.2 Objectives and Principles
- 1.3 Non-Alignment and Beyond: Concepts, Policy and Relevance

UNIT – II (15 Hours)

Changing Relations with the Global Powers from Cold War to the Post-Cold War Era

- 2.1 India and USA
- 2.2 India and Russia
- 2.3 India and China
- 2.4 India and EU

UNIT – III (9 Hours)

India and the Neighbourhood: Issues and Challenges

- 3.1 Border disputes
- 3.2 Migration and Refugee Issues
- 3.3 Cross-border Terrorism

UNIT – IV (9 Hours)

India in the Contemporary Multipolar World

- 4.1 India's Engagements in Multilateral Forums: Negotiations on Trade and Climate Change
- 4.2 India as a Global Power: Prospects and Challenges

Essential/recommended readings

DISCIPLINE SPECIFIC CORE COURSE (MDSC-2A): Indian Government and Politics

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Indian Government and Politics MDSC 2A | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

This course aims to familiarize students with constitutional government and nature of politics in India and the relationship between the two. It focusses on the originary moment of the Indian Republic through an understanding of the philosophy and the features of the Constitution while demonstrating how the processes of state formation and nation making coincided with constitution-making and the interlacing between the two. The course also introduces students to the institutions of the state, the constitutional rules governing them and the political trajectory of their evolution. The course then proceeds by way of familiarity with varied political processes that have dominated the nature of Indian politics including reflections on the development paradigm followed by the Indian state and a critical perspective on the character of Indian state itself. While focusing on the constitutional framework and design laid down for governance, the course delves deeper into the political processes through which a divergent space for actual politics is carved out, in India.

Learning outcomes

On successful completion of the course, students would demonstrate:

- Understanding of the Indian Constitution, its basic features and the rights and duties of the citizens as well as the constitutional obligations of the state
- Knowledge of state institutions in India, the constitutional provisions governing them and actual their working
- Understanding into the nature of Indian society and its relationship with politics through the prism of caste, class, gender, religion, etc.
- Knowledge of party system and political parties in India
- Awareness of the development debates in India and its relationship with the social movements

SYLLABUS OF MDSC-2A

UNIT – I (6 Hours)

Indian Constitution: basic features, debates on Fundamental Rights, Directive Principles and Federalism

UNIT – II (6 Hours)

State formation and nation building: Integration of princely states, linguistic re-organisation of states

UNIT – III (6 Hours)

Political institutions at the Centre and State levels: Parliament, Judiciary, Prime Minister, Chief Minister

UNIT – IV (4.5 Hours)

Social structure and political power: caste, class, gender

UNIT – V (4.5 Hours)

Religion and politics: debates on secularism and communalism

UNIT – VI (4.5 Hours)

Political parties and party systems

UNIT – VII (4.5 Hours)

Development strategies: planned economy, neo-liberal restructuring

UNIT – VIII (4.5 Hours)

Social movements: workers, farmers, environmental, and women's movements

UNIT – IX (4.5 Hours)

The nature of state in India: developmental, welfare, regulatory

**COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY THE
DEPARTMENT OF POLITICAL SCIENCE**

Credit distribution, Eligibility and Pre-requisites of the Course

GENERIC ELECTIVES (GE-1): Ideas in Indian Political Thought

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Ideas in Indian Political Thought GE-1 | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

This paper is designed for students who are from other disciplines and wish to have a basic understanding of the various themes that has shaped Indian society and politics. It revolves around key concepts based on original texts which would help the students to critically engage with the ideas.

Learning outcomes

After completion of this course, students will be able to

- answer about the nature and form of statecraft that existed in Ancient India.
- explain how the texts in ancient India interpreted Dharma and Danda
- answer what were sources and mechanisms to practice Nyay in ancient India.
- make distinction between Rastra and Rajya.
- explain the meaning and foundations of Varna and how are they different from caste.

SYLLABUS OF GE-1

UNIT – I (6 Hours)

Dharma and Danda: Kautilya

UNIT – II (6 Hours)

Gender: Tarabai Shinde

UNIT – III (6 Hours)

Culture and Nationalism: Vivekananda

UNIT – IV (6 Hours)

Swaraj: Gandhi

UNIT – V (6 Hours)

Nyaya: Ambedkar

UNIT – VI (7.5 Hours)

Hindutva: Savarkar

UNIT – VII (7.5 Hours)

Integral Humanism: Deen Dayal Upadhyaya

Essential/recommended readings

1. Dharma and Danda: Kautilya

Mehta, V.R. (1992) 'The Pragmatic Vision: Kautilya and His Successor', in *Foundations of Indian Political Thought*, Delhi: Manohar, pp. 88- 109.

Sharma, R S (2005), *Aspects of Political Ideas and Institutions in Ancient India*, Motilal Banarsidass, New Delhi pp 143-164

2. Gender: Tarabai Shinde

O' Hanlon, Rosalind (2002) *A comparison between women and men: Tarabai Shinde and the critique of Gender Relations in Colonial India*. New Delhi: Oxford University Press.

Lele, Jayant (1998) *Gender Consciousness in Mid-Nineteenth Century Maharashtra*, in Anne Feldhaus *Images of women in Maharastrain Society*. The University of New York Press: New York

3. Culture and Nationalism: Vivekananda

GENERIC ELECTIVES (GE-2) : Introduction to the Indian Constitution

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to the Indian Constitution GE-2 | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

The course aims to introduce the students to the foundational text of constitutional democracy in India - the Indian Constitution. By providing an overview of the socio-political context of its origin and its basic tenets, which provide the organizing framework for democracy in India, the course expects to bring historical insights in making the constitutional text comprehensible. The course traces the history of the Constitution both in the colonial legislations and in the declaration and reports produced in the course of the Indian National Movement. It focuses on the creation and the working of the Constituent Assembly as part of a transformative vision for independent India. The basic features of the Constitution form the core themes of the course introducing students to the philosophy behind them and the final form in which they were adopted in the Indian Constitution to make it a document for social revolution. The course aims at providing students with both a textual and a contextual introduction to the Indian Constitution.

Learning outcomes

On successful completion of the course, the students will demonstrate

- Knowledge of the origin and contents of the Indian Constitution
- Awareness of the rights and duties of the citizens and the obligations of the state
- Familiarity with the functioning of constitutional governance in India and the division of power between different tiers of the government.

SYLLABUS OF GE-2

UNIT – I (8 Hours)

Constitutional antecedents and the making of the Constitution of India

UNIT – II (7 Hours)

Basic features of the Indian Constitution

UNIT – III (8 Hours)

Fundamental Rights

UNIT – IV (7 Hours)

Obligations of State and Duties of Citizens

UNIT – V (8 Hours)

UNIT – VI (7 Hours)

Centre-State Relations and Decentralization

Essential/recommended readings

Readings:

1. Constitutional antecedents and the making of the Constitution of India

(a) Constitutional antecedents

GENERIC ELECTIVES (GE-3): Nationalism in India

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--------------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Nationalism in India GE-3 | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

The course aims to help students understand the national movement in India. It looks at the movement from different theoretical perspectives that highlight its varied dimensions. The course begins by looking at the Indian responses to colonial dominance in the nineteenth century, and traces the development of the anti-colonial struggle up to the mid-20th century. It successively focuses on the events leading to the Partition and the Independence in 1947. In the process, the course also tries to focus on the various tensions and debates within nationalism in India as it engaged with the questions of communalism, class struggle, caste and gender.

Learning outcomes

On successful completion of the course, students would:

- Gain an understanding of the different theoretical views on the emergence and development of nationalism in India and the tensions that existed between them
- Demonstrate knowledge of the historical trajectory of the development of the nationalist movement in India, with specific focus on its different phases
- Understand the contribution of various social movements in the anti-colonial struggle
- Demonstrate awareness of the history of partition and independence

SYLLABUS OF GE-3

UNIT – I (8 Hours)

Approaches to the Study of Nationalism in India: Nationalist, Imperialist, Marxist, and Subaltern

UNIT – II (7 Hours)

Reformism and Anti-Reformism in the Nineteenth Century: Major Social and Religious Movements in 19th century

UNIT – III (12 Hours)

Nationalist Politics and Expansion of its Social Base

- a. Phases of Nationalist Movement: Liberal Constitutionalists, Swadeshi and the Radicals; Beginning of Constitutionalism in India
- b. Gandhi and Mass Mobilisation: Non-Cooperation Movement, Civil Disobedience Movement, and Quit India Movement
- c. Revolutionaries, Socialists, and Communists

UNIT – IV (12 Hours)

Social Movements

Peasants, Tribals, Workers, Women and anti-caste movements

UNIT – V (6 Hours)

Partition, Independence and Integration of states

Communalism in Indian Politics, The Two-Nation Theory and Partition, Independence and Integration of Indian States

Essential/recommended readings

Approaches to the Study of Nationalism in India

GENERIC ELECTIVES (GE-4): Understanding International Relations

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Understanding International Relations GE-4 | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

This course aims to make students understand the intersections between politics, economics, culture and nature that shape human life in the contemporary world. These intersectional relations foreground the multiple interactions that constitute the reality of the group life of humans. The issues around which the course is designed consists of the role of state in international politics, cultural identities such as the nation and, issues such as global poverty and global inequalities. Additionally, the course dwells on the psycho-cultural and politico-economic causes of violence, oppression and injustices that make the world a contested space. It examines the ways in which information technology shapes the course of human life in the age of globalization and how the phenomenon of the international manifests both in the virtual and the material world. Going beyond the Westphalian conception of territoriality, the course looks at the ways in which IR manifests in the realm of art/cinema/museums.

Learning outcomes

On successful completion of the course, students would be able to:

- Understand the nature of the contemporary world in which we live through connected histories, economies and societies.

- Analyze the ways in which our world is shaped in both territorial and non-territorial forms leading to basic planetary understandings of both human and non-human relations.
- Enhance cognitive abilities to map out the multiple and complex interactions in international relations between peoples, histories and civilisations.
- To understand the role of the state and its interface with the market, probe into the cultural identities of a nation, analyse global poverty and climate change politics.
- To critically analyse the politics of ‘common yet differentiated responsibilities.’
- Think critically about issues of global inequalities, violence, and injustices in the age of globalization.
- Appreciate the ways in which aesthetic articulation(s) problematize and interrogate the international and our ways of being therein.

SYLLABUS OF GE-4

UNIT – I (7.5 Hours)

Making Sense of the World

- 1.1 What is IR?
- 1.2 Understanding Space: How do we sense our planet
- 1.3 Ways of knowing and being: - Peoples, Histories and Civilisations

UNIT – II (11 Hours)

States, Nations and Markets

- 2.1 State and Diffusion of authority/power
- 2.2 Nations and Nationalism
- 2.3 States and Markets

UNIT – III (11 Hours)

Inequalities

- 3.1 Politico-military inequalities: big states, small states
- 3.2 Economic inequalities: rich states, poor states
- 3.3 Climate Change: Global commons and differentiated responsibilities

UNIT – IV (7.5 Hours)

Sites of Conflict and Forms of Violence

- 4.1 Changing Landscape/ Nature of Conflict
- 4.2 Forms of Violence

UNIT – V (8 Hours)

Knowing our Virtual and Creative World: The Visual Turn in IR

- 5.1 Internet
- 5.2 Museums
- 5.3 Cinemas

Essential/recommended readings

1.1. What is IR?

GENERIC ELECTIVES (GE-5): Governance: Issues and Challenges

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Governance: Issues and Challenges GE-5 | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

This paper deals with concepts and different dimensions of governance highlighting the major debates in the contemporary times. There is a need to understand the importance of the concept of governance in the context of a globalising world, environment, administration, development. The essence of governance is explored through the various good governance initiatives introduced in India.

Learning outcomes

On successful completion of the course, the students will be

- acquainted with the changing nature of governance in the era of globalization.
- introduced to the most contemporary ideas of sustainable development and green governance.
- familiarised with a rigorous introduction to the best practices in India on good governance.

SYLLABUS OF GE-5

UNIT – I (11 Hours)

Government and Governance: Concepts

- a) Role of State in The Era of Globalisation
- b) State, Market and Civil Society

UNIT – II (7 Hours)

Governance and Development

Changing Dimensions of Development Strengthening Democracy through Good Governance

UNIT – III (8 Hours)

Environmental Governance

- a) Human-Environment Interaction
- b) Green Governance: Sustainable Human Development

UNIT – IV (7 Hours)

Local Governance

- a) Democratic Decentralisation
- b) People's Participation in Governance

UNIT – V (12 Hours)

Good Governance Initiatives in India: Best Practices

- a) Public Service Delivery
- b) Electronic Governance
- c) Citizens Charter & Right to Information
- d) Corporate Social Responsibility

GENERIC ELECTIVES (GE-6): Western Political Philosophy

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|----------------|--|-----------------|----------------------------|-----------------------------|------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Western Political Philosophy GE-6 | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

This course familiarizes the students with the manner in which the political questions are posed and answered normatively by select thinkers. The aim is to introduce to the students the questions, ideas and values of political philosophy addressed by political thinkers and juxtapose the same to contemporary political thinking.

Learning outcomes

By the end of the course students would be able to:

- Understand how to read and decode the classics and use them to engage contemporary socio-political issues.
- Connect with historically written texts and their interpretations.
- Clearly present their own arguments and thoughts about contemporary issues and develop ideas to engage with the latter.

SYLLABUS OF GE-6

UNIT – I (18 Hours)

Classical Political Philosophy

- a) Plato
- b) Aristotle

UNIT – II (27 Hours)

Renaissance and Modern Political Philosophy

- a) Machiavelli
- b) Hobbes
- c) Rousseau
- d) Mill
- e) Marx

Essential/recommended readings

Unit 1

R. Kraut (1996) 'Introduction to the study of Plato', in R. Kraut (ed.) *The Cambridge Companion to Plato*. Cambridge: Cambridge University Press, pp. 1-50.

GENERIC ELECTIVES (GE-7): Politics of Globalisation

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-----------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Politics of Globalisation GE-7 | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

This course examines the paradoxes of contemporary globalisation. It has been crafted in a manner as to introduce to the students from diverse disciplinary backgrounds the complex multifaceted nature of the contemporary phenomenon of globalization. Students will learn about the evolution of globalization by examining whether globalization is a mere historical process, or, it is also a socio-cultural, politico-economic and, psychological phenomenon and, understand these through different conceptual frames. It then makes the students understand the debates that have been put forth for and against globalization. The course introduces the discourse regarding the Eurocentric formulations of globalization and the ways in which the non-European voices have historically been marginalized in the shaping of Western modernity. Students will also learn about the political, economic and cultural facets of globalization. As a political phenomenon, the course seeks to understand as to how globalization has impacted upon the functioning of the sovereignty of nation-states. In the realm of economy, it introduces the impact of time/space compression upon the macroeconomic structures of trade and finance as well as the structural transformation that information and communications technology has brought in the working of the global political economy. As a cultural phenomenon, the course also discusses the new global mobilizations in the form of global social movements, movements of people across borders and the political and economic impact of global epidemics.

Learning outcomes

Upon successful completion of this course, students will have the knowledge and skills to:

- Understand the nature, significance, and principal debates in the literature on globalisation and the concept of globalization as both a historical process and, a socio-cultural phenomenon.
- Study various approaches which will augment student's knowledge on international political economy.
- Demonstrate basic knowledge of the interconnectedness of global issues, processes, and dynamics.
- Develop insight into the alternative understanding of globalisation and various critical aspects related to it like who are the beneficiaries in this process.
- Understand diverse global challenges like global migration and epidemics.

- Learn the ways in which globalization holds promise for a better world and a developed world and, at the same time, understand how it is laden with deep-seated tendencies to engender strands of inequalities and spur erosion of local cultures.

SYLLABUS OF GE-7

UNIT – I (11 Hours)

Conceptualizing Globalisation

- 1.1 Is Globalisation New? Historical Perspectives
- 1.2 Approaches to Understand globalisation
- 1.3 The Globalisation Debate

UNIT – II (7 Hours)

Globalization: A Eurocentric Project?

- 2.1 The Question of Post-Coloniality
- 2.2 Making Sense of Globalization for the People at the Margins

UNIT – III (8 Hours)

Sovereign State in a Globalised World

- 3.1 Political Dimensions
- 3.2 Shift from State to Market?

UNIT – IV (8 Hours)

Role of International Institutions: Multi-dimensionality of Globalisation

- 4.1 World Bank, International Monetary Fund, World Trade Organisation and, G-20
- 4.2 The Globalisation of Trade
- 4.3 Global Epidemics and Working of World Health Organization

UNIT – V (11 Hours)

Responses and Resistances to Globalization

- 5.1 Global Social Movements
- 5.2 International Migration

Essential/recommended readings

Unit 1. Conceptualizing Globalisation

Essential Readings

GENERIC ELECTIVES (GE-8): Introduction to Public Policy

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|------------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Public Policy GE-8 | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

The paper seeks to provide an understanding to the concept of Public Policy. Public Policy is a proposed course of action of a government to realize its socio-economic objectives. The essence of public policy lies in its effectiveness in translating the governing philosophy into programmes and policies and making it a part of community living. This course will help to understand the complexities of public policy and its interaction with the socio-economic structure.

Learning outcomes

By the end of this course a student will acquire the following knowledge and skills.

- Contextualization of knowledge;
- Praxis and technique;

- c. Critical Thinking;
- d. Research and Communication

SYLLABUS OF GE-8

UNIT – I (9 Hours)

Public Policy

- (a) Concept, Characteristics and Significance
- (b) Determinants of Public Policy
- (c) Policy Impact: Socio-Economic

UNIT – II (14 Hours)

Theoretical Approaches to Public Policy

- (a) Elite Theory
- (b) Group Theory
- (c) Incremental Theory
- (d) Rational Choice Theory

UNIT – III (9 Hours)

Process of Public Policy

- (a) Policy Formulation
- (b) Policy Implementation
- (c) Policy Evaluation

UNIT – IV (13 Hours)

Public Policy: Case Studies

- (a) Education – National Education Policy (NEP) 2020
- (b) Health – National Health Mission (NHM)
- (c) Employment – Mahatma Gandhi National Rural Employment Guarantee Act (MNREGA)
- (d) Economic Empowerment – Pradhan Mantri Jan-Dhan Yojana (PMJDY), Direct Benefit Transfer (DBT)

Essential/recommended readings

GENERIC ELECTIVES (GE-9): Women and Politics in India: Concepts and

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------------|--|-----------------|----------------------------|-----------------------------|------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Women and Politics in India: Concepts and Debates GE-9 | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

The course attempts to bring together feminist theory and praxis by focussing on conceptual categories theorized by feminism and the mobilization of the feminist epistemology to focus on key concerns surrounding the everyday existence of women. This course would serve as the fundamental introduction to the history of women's movement with particular emphasis on the women's movement in India. The course opens up the question of women's agency, taking it beyond the question of women empowerment and locates women as radical social agents. It attempts to question the complicity of social structures and relations in preserving gender inequality. This is extended to cover new forms of precarious work and labour under the new economy.

Learning outcomes

After completing this course, the students will be able to:

- Understand the concept of patriarchy, feminism, gender, etc.
- Understand the intersection between family, community and state in feminist debates
- Demonstrate awareness of the history of the women's movement in India
- Show familiarity with and awareness of the key issues taken up by the women's movement

SYLLABUS OF GE-9

UNIT – I (7.5 Hours)

Patriarchy and Feminism

- a. Sex-Gender Debates
- b. Public and Private Dichotomy
- c. Power

UNIT – II (7.5 Hours)

Family and Community

UNIT – III (7.5 Hours)

Law, State and Women

UNIT – IV (7.5 Hours)

History of the Women's Movement in India

UNIT – V (7.5 Hours)

Violence against women

UNIT – VI (7.5 Hours)

Women and Labour: Unpaid labour, Reproductive and care work, Sex work

GENERIC ELECTIVES (GE-10): Digital Social Sciences

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Digital Social Sciences GE-10 | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

Digital technology in the discipline of Social Science cannot be viewed only as a tool for research but as something that transforms the nature of Social Science and the object of its study- the society- in course of researching about it. This very aspect of digital technology and its capacity for social transformation is the mainstay of the emerging field of Digital Social Sciences. The course aims to introduce students to this field of Digital Social Science sby primarily focussing on two intertwined aspects of the field- first, impact of digital technologies on the society and two, the role of digital technologies in the study of Social Sciences or the study of society. The intertwined aspect of the twin focus can be alternately formulated as the attempt of the course to understand social change taking place under the impact of digital technology while digital technology providing with the tools to map out these changes. The course begins with a basic introduction to digital literacy and its contribution to pedagogic Social Science and proceeds by way of foundational introduction to prominent technologies and digital spaces through which the aspects of the social can be understood. The course throws light on how the digital turn has redefined the contours of debates surrounding personal identity and social identification through biometrical techniques having consequences both for social welfare and social surveillance; whether access to the digital spaces is impacting social cleavages, creating space for democracy or re-entrenching social inequality through the digital divide; is the digital economy offering new forms of employment or restructuring the vulnerability of the forms of labour; and how is algorithm driven digital space reformulating social choice and social classification. These are some of the illustrative questions through which the course intends to reflect upon the evolving relationship between digital technologies and social sciences.

Learning outcomes

On successful completion of the course, the students would demonstrate:

- An understanding of digital technology and the ways in which it shapes the society.
- An understanding into how digital tools are used as research and pedagogic devices to map out social changes
- Clarity on concepts of the digital world such as Big Data, Artificial Intelligence, Algorithm, etc.
- Familiarity with digital techniques such as the biometrics and digital spaces such as the Social Media in the sphere of communication or the Gig Economy in the market sphere

SYLLABUS OF GE-10

UNIT – I (4 Hours)

Digital Literacy in Social Sciences

UNIT – II (7 Hours)

Digital Information and Science of Society

UNIT – III (7 Hours)

Biometrics and identification

UNIT – IV (8 Hours)

Access to Technology and the Internet

UNIT – V (8 Hours)

Social Media and Public Sphere

UNIT – VI (4 Hours)

Labour in Digital Economy

UNIT – VII (7 Hours)

Artificial Intelligence and Algorithm

Essential/recommended readings

1. Digital Literacy in Social Sciences

Polizzi, Gianfranco, 'Information literacy in the digital age: why critical digital literacy matters for democracy.' In: Goldstein, Stéphane (ed.) *Informed societies: why information literacy matters for citizenship, participation and democracy*. Facet Publishing, London, UK (2020), 1-23.

DEPARTMENT OF ECONOMICS

CATEGORY-I BA (HONS.) ECONOMICS

DISCIPLINE SPECIFIC CORE COURSE -4 (DSC-4): INTRODUCTORY MACROECONOMICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introductory Macroeconomics ECON004 | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To introduce students to the basic concepts of macroeconomics
- To discuss the preliminary concepts associated with the determination and measurement of aggregate macroeconomic variables like GDP, savings, investment, money, inflation, unemployment and the balance of payments
- To introduce the simple analytical frame- work (e.g., the IS-LM model) for analysing the relationships among key macroeconomic variables

Learning outcomes

The Learning Outcomes of this course are as follows:

- The students would be able to familiarise the broad macroeconomic concepts like GDP, inflation, money supply, interest rate and their inter-linkages and their interrelationships.
- By studying the course, the students will able to critically evaluate various macroeconomic policies and their effects on output and interest rate in the economy.

SYLLABUS OF DSC-4

UNIT – I: Introduction to Macroeconomic issues and National Income Accounting (12 Hours)

Basic issues studied in macroeconomics; measurements of gross domestic product, income, expenditure and the circular flow; real versus nominal GDP; price indices; national income accounting for open economy, balance of payments accounts; current, capital and financial accounts.

UNIT – II: Money (10 Hours)

Functions of money; quantity theory of money; demand for money; determination of money supply and demand; credit creation; tools of monetary policy.

UNIT – III: Simple Theory of Income Determination (11 Hours)

Classical and Keynesian systems; simple Keynesian model of income determination

UNIT – IV: IS-LM Analysis and Aggregate Demand (12 Hours)

Derivations of the IS and LM curves; fiscal and monetary multipliers; derivation of aggregate demand

Practical component (if any) - NIL

Essential/recommended readings:

- Andrew Abel, Ben Bernanke and Dean Croushore (2011). *Macroeconomics* (7th edition), Pearson.
- Richard T. Froyen (2013). *Macroeconomics: Theories and Policies* (10th ed.), Pearson.
- Blanchard, O. (2006). *Macroeconomics* (6th edition). Pearson
- Blanchard, O. (2017). *Macroeconomics* (7th edition). Pearson
- Dornbusch, R., S. Fischer and R. Startz. *Macroeconomics* (6th edition). McGraw- Hill
- Dornbusch, R., S. Fischer and R. Startz. *Macroeconomics* (11th edition). McGraw-Hill

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5 (DSC-5): INTERMEDIATE MATHEMATICAL METHODS FOR ECONOMICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PREREQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Intermediate Mathematical Methods for Economics ECON005 | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To transmit the body of basic mathematics that enables the study of economic theory at the undergraduate level, specifically the courses on microeconomic theory, macroeconomic theory, statistics and econometrics set out in this syllabus
- Particular economic models are not the ends, but the means for illustrating the method of applying mathematical techniques to economic theory in general
- The sophistication would be maintained at a standard level to grow in the profession

Learning outcomes

The Learning Outcomes of this course are as follows:

- The course builds the mathematical foundations necessary for further study of a variety of disciplines including postgraduate economics, statistics, computer science, finance and data analytics
- The analytical tools introduced in this course have applications wherever optimization techniques are used in business decision-making for managers and entrepreneurs alike
- These tools are necessary for anyone seeking employment as an analyst in the corporate world.

SYLLABUS OF DSC- 5

UNIT –I: Linear Algebra (15 Hours)

Vector spaces: algebraic and geometric properties, scalar product, norm, orthogonality; linear transformations: properties, matrix representation and elementary operations; systems of linear equations: properties of their solution sets; determinants: characterization, properties and applications; eigenvalues and eigenvectors, diagonalization, spectral theorem.

UNIT – II: Functions of several real variables (15 Hours)

Geometric representation: graphs and level curves; differentiable functions: characterisation, properties with respect to various operations and applications; second order derivatives: properties and applications; the implicit function theorem, application to comparative statics; homogeneous and homothetic functions: characterisation, applications.

UNIT – III: Multivariate optimization (15 Hours)

Convex sets; geometric properties of functions: convex functions, their characterisation, properties and applications; quasi convex functions, their characterisation, properties and applications; unconstrained optimisation: geometric characterisation, characterisation using calculus, applications.

Essential/recommended readings

- Sydsaeter, K., Hammond, P. (2002). *Mathematics for economic analysis*, Pearson Educational.
- Hoy, M., Livernois, J., McKenna, C., Rees, R., Stengos, T. (2001). *Mathematics for Economics*, Prentice-Hall India.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

| Economics ECON006 | | | | | Mathematics | |
|------------------------------|--|--|--|--|--------------------|--|

Learning Objectives

The Learning Objectives of this course are as follows:

- This course focuses on techniques for statistical inference. The main objective of the course is to help students understand how to draw inference from samples regarding the underlying populations using point estimation, interval estimation and hypothesis testing.

Learning outcomes

The Learning Outcomes of this course are as follows:

- An important learning outcome of the course will be the capacity to use and analyse statistics in everyday life. The course will improve students' ability to analyse data, make decisions, form predictions, and conduct research.

SYLLABUS OF DSC-6

UNIT - 1: Sampling distribution of a Statistic (12 Hours)

Concept of Statistic and parameter, Sampling distributions, Central Limit Theorem.

UNIT - 2: Estimation (12 Hours)

Estimator and methods of estimation, Point Estimation: method of moments and method of maximum likelihood; Interval Estimation, Properties of an estimator: Consistency, Unbiasedness, Efficiency and Sufficiency, confidence level and sample size, intervals based on Z-distribution, t-distribution and chi-squared distribution, F-distribution.

UNIT – 3: Inference (9 Hours)

Meaning of a statistical hypothesis, errors in hypothesis testing: Type 1 and Type 2 errors, power of a test.

UNIT - 4: Hypothesis Testing (12 Hours)

Testing of a population Mean, proportions - small and large sample tests, P-value; Testing for variance; Testing hypothesis for two samples, testing for equality of means; testing for ratio of variances.

Practical component (if any) - NIL

Essential/recommended readings

- Devore, J. (2012). *Probability and statistics for engineers*, 8th ed. Cengage Learning.
- John A. Rice (2007). *Mathematical Statistics and Data Analysis*, 3rd ed. Thomson Brooks/Cole
- Larsen, R., Marx, M. (2011). *An introduction to mathematical statistics and its applications*. Prentice Hall.

| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Statistics for Economics ECON022 | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- The course teaches students the basics of probability theory and statistical inference based on simple technical rigor. It includes introductory probability theories, sample

distribution and hypothesis testing that set a necessary foundation for the econometrics course taught as a General Elective.

Learning outcomes

The Learning Outcomes of this course are as follows:

- The student will be able to analyse the data using basic statistical concepts. They will understand sampling characteristics, estimation as well as examine the hypotheses using discrete and continuous distributions.

SYLLABUS OF DSC- 4

UNIT – I: Introduction and overview (09 Hours)

Populations and samples; sample statistics; Descriptive Statistics.

UNIT – II: Basic concepts of probability (12 Hours)

Spaces and events; probability concepts, conditional probabilities

UNIT – III: Probability distributions and Sampling (12 Hours)

Random variables – discrete and continuous, various probability distributions - functions and characteristics; Commonly used distributions - uniform, binomial, exponential, Poisson, hypergeometric and Normal random variables. Jointly distributions- conditional distributions and expectations, covariance and correlation

Unit – IV: Estimation and Hypothesis testing (12 Hours)

Estimation of population parameters - methods of moments and maximum likelihood procedures; properties of estimators; confidence intervals; Defining statistical hypotheses; distributions of test statistics; testing hypotheses related to population parameters; Type I and Type II errors; power of a test

Practical component (if any) - NIL

Essential/recommended readings

- Larsen, R., Marx, M. (2011). *An Introduction to Mathematical Statistics and its Applications*, Prentice Hall.
- James McClave, P. George Benson, Terry Sincich (2017), *Statistics for Business and Economics*, Pearsons Publication.
- Anderson D. R, Sweeney D.J. et. al (2019), *Statistics for Business & Economics*, 13th ed. Cengage Learning.
- Sheldon Ross (2017), *Introductory Statistics*, 4th Edition, Academic Press

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Category III

B.A. Programmes with Economics as Non-Major or Minor discipline

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introductory Macroeconomics ECON004 | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To introduce students to the basic concepts of macroeconomics
- To discuss the preliminary concepts associated with the determination and measurement of aggregate macroeconomic variables like GDP, savings, investment, money, inflation, unemployment and the balance of payments
- To introduce the simple analytical framework (e.g., the IS-LM model) for analysing the relationships among key macroeconomic variables

Learning outcomes

The Learning Outcomes of this course are as follows:

- The students would be able to familiarise the broad macroeconomic concepts like GDP, inflation, money supply, interest rate and their inter-linkages and their interrelationships.
- By studying the course, the students will be able to critically evaluate various macroeconomic policies and their effects on output and interest rate in the economy.

SYLLABUS OF DSC-3

UNIT – I: Introduction to Macroeconomic issues and National Income Accounting (12 Hours)

Basic issues studied in macroeconomics; measurements of gross domestic product, income, expenditure and the circular flow; real versus nominal GDP; price indices; national income accounting for open economy, balance of payments accounts; current, capital and financial accounts.

UNIT – II: Money (10 Hours)

Functions of money; quantity theory of money; demand for money; determination of money supply and demand; credit creation; tools of monetary policy.

UNIT – III: Simple Theory of Income Determination (11 Hours)

Classical and Keynesian systems; simple Keynesian model of income determination

UNIT – IV: IS-LM Analysis and Aggregate Demand (12 Hours)

Derivations of the IS and LM curves; fiscal and monetary multipliers; derivation of aggregate demand

Practical component (if any) - NIL

Essential/recommended readings:

- Andrew Abel, Ben Bernanke and Dean Croushore (2011). *Macroeconomics* (7th edition), Pearson.
- Richard T. Froyen (2013). *Macroeconomics: Theories and Policies* (10th ed.), Pearson.
- Blanchard, O. (2006). *Macroeconomics* (6th edition). Pearson
- Blanchard, O. (2017). *Macroeconomics* (7th edition). Pearson
- Dornbusch, R., S. Fischer and R. Startz. *Macroeconomics* (6th edition). McGraw- Hill
- Dornbusch, R., S. Fischer and R. Startz. *Macroeconomics* (11th edition). McGraw-Hill

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Category-IV

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY DEPARTMENT OF ECONOMICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|------------------------|----------------------|-----------------------------|
| | | | | | | |
| GENERIC ELECTIVES (GE-4): PRINCIPLES OF MACROECONOMICS I | | | | | | |
| | | Lecture | Tutorial | Practical/ Practice | | |
| Principles of Macroeconomics I ECON026 | 4 | 3 | 1 | 0 | Class XII pass | NIL |
| Learning Objectives | | | | | | |

The Learning Objectives of this course are as follows:

- This course introduces the basic concepts in Macroeconomics both in closed and open economy. It deals with the behaviour and characteristics of aggregate economy. This course introduces the definition, measurement of the macroeconomic variables like GDP, consumption, savings, investment and balance of payments. The course also discusses various theories and approaches of determining GDP.

Learning outcomes

The Learning Outcomes of this course are as follows:

- The students will learn the broad understanding of macroeconomic variables and their measurement issues like GDP, inflation, money supply, interest rate and their inter-linkages. It will also allow them to critically evaluate various macroeconomic policies and their effects on output and interest rate in the economy.

SYLLABUS OF GE-4

UNIT – I: Introduction (05 Hours)

What is macroeconomics? Macroeconomic issues in an economy

UNIT – II: National Income Accounting (10 Hours)

Concepts of GDP and National Income; measurement of national income and related aggregates; nominal and real income; limitations of the GDP concept

UNIT – III: Determination of GDP (10 Hours)

Actual and potential GDP; aggregate expenditure; consumption function; investment function; equilibrium GDP; concepts of MPS, APS, MPC, APC; autonomous expenditure; Concept of multiplier

UNIT – IV: National Income Determination in an Open Economy with Government (10 Hours)
Income determination; Fiscal Policy: impact of changes in government expenditure and taxes; net exports function; net exports and equilibrium national income.

UNIT – V: Money in a Modern Economy (10 Hours)

Concept of money in a modern economy; monetary aggregates; demand for money; quantity theory of money; liquidity preference and rate of interest; money supply and credit creation; monetary policy.

Practical component (if any) - NIL

Essential/recommended readings

- Andrew Abel, Ben Bernanke and Dean Croushore (2011). *Macroeconomics* (7th edition). Pearson
- Richard T. Froyen (2013). *Macroeconomics: Theories and Policies* (10th ed.), Pearson.
- Blanchard, O. (2018). *Macroeconomics* (7th edition). Pearson
- Blanchard, O. (2006). *Macroeconomics* (6th edition). Pearson
- Dornbusch, R., and S. Fischer. (1994). *Macroeconomics* (6th edition). McGraw- Hill
- R. Dornbusch, S. Fischer and R. Startz. (2018). *Macroeconomics* (12th edition). McGraw-Hill

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-5): BASIC STATISTICS FOR ECONOMICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Statistics for Economics ECON022 | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- The course teaches students the basics of probability theory and statistical inference based on simple technical rigor. It includes introductory probability theories, sample

distribution and hypothesis testing that set a necessary foundation for the econometrics course taught as a General Elective.

Learning outcomes

The Learning Outcomes of this course are as follows:

- The student will be able to analyse the data using basic statistical concepts. They will understand sampling characteristics, estimation as well as examining the hypotheses using discrete and continuous distributions.

SYLLABUS OF GE- 5

UNIT – I: Introduction and overview (09 Hours)

Populations and samples; sample statistics; Descriptive Statistics.

UNIT – II: Basic concepts of probability (12 Hours)

Spaces and events; probability concepts, conditional probabilities

UNIT – III: Probability distributions and Sampling (12 Hours)

Random variables – discrete and continuous, various probability distributions - functions and characteristics; Commonly used distributions - uniform, binomial, exponential, Poisson, hypergeometric and Normal random variables. Jointly distributions- conditional distributions and expectations, covariance and correlation

Unit – IV: Estimation and Hypothesis testing (12 Hours)

Estimation of population parameters - methods of moments and maximum likelihood procedures; properties of estimators; confidence intervals; Defining statistical hypotheses; distributions of test statistics; testing hypotheses related to population parameters; Type I and Type II errors; power of a test

Practical component (if any) - NIL

- Anderson D. R, Sweeney D.J. et. al (2019), *Statistics for Business & Economics*, 13th ed. Cengage Learning.
- Sheldon Ross (2017), *Introductory Statistics*, 4th Edition, Academic Press

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-6): INDIAN ECONOMY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Indian Economy ECON030 | 4 | 3 | 1 | 0 | Class XII pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- This course introduces the economic problems related to the Indian economy by familiarizing them with the research studies on areas relating to economic development and policy in India with an emphasis on contemporary debates.

Learning outcomes

The Learning Outcomes of this course are as follows:

- The students will be able to learn the development paradigm adopted in India since independence and evaluate its impact on economic as well as social indicators of progress. Students will have the ability to explore current policy debates and contribute to policy making in an informed way using relevant databases. They will also learn how to conduct independent research in these areas

SYLLABUS OF GE-3

Unit 1 : Historical and general overview of Indian economy since Independence (05 Hours)

Unit 2 : Growth and structural change (09 Hours)

Unit 3 : The Indian economy in a comparative perspective (09 Hours)

Unit 4 : Key issues: poverty, inequality, education, health and gender (09 Hours)

Unit 5 : Agriculture, industry, services and international trade (09 Hours)

Practical component (if any) - NIL

Essential/recommended readings

- Kumar, Dharma (2005) ed the article on The Indian Economy 1970 to 2003 in revised version of CEHI Vol II
- Balakrishnan, Pulapre (2010) *Economic Growth in India: History and Prospect*. OUP.
- Rakshit, Mihir (2011) *Macroeconomics of Post-reform India*. OUP
- Rakshit, Mihir (2010) *Money and Finance in the Indian Economy*. OUP

DEPARTMENT OF GEOGRAPHY

Category-I **BA (Hons.) Geography**

DISCIPLINE SPECIFIC CORE COURSE – 4 (DSC-4): GEOMORPHOLOGY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| GEOMORPHOLOGY | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand the association between geomorphologic landforms, concepts and processes.
- To critically evaluate and connect information about geomorphic processes.
- To provide a theoretical and empirical framework for understanding landscape evolution and the characteristics of individual types of geomorphic landscapes.

Learning outcomes

The Learning Outcomes of this course are as follows:

- To know the functioning of earth systems in real time and analyze how the natural and anthropogenic operating factors affects the development of landforms.
- To distinguish between the mechanisms that controls these processes.
- To assess the roles of structure, stage and time in shaping the landforms, interpret geomorphological maps and apply the knowledge in geographical research.

SYLLABUS OF DSC-4

UNIT – I (3 Hours)

Geomorphology: Definitions, Principles, Recent Trends

UNIT – II (9 Hours)

Plate Tectonics: Concept, Mechanism, Boundaries, Movements and Resultant effects

UNIT – III (9 Hours)

Denudation: Weathering, Mass Wasting, Erosion

UNIT – IV (10 Hours)

Landform development: Cyclic (ideas of Davis and Penck), non-cyclic and poly-cyclic concepts

UNIT – V (14 Hours)

Landforms: Fluvial, Aeolian, Glacial, and Coastal Landforms

Practical component (if any) - NIL

Suggestive readings

1. Bloom, A.L., (2003). Geomorphology: A Systematic Analysis of Late Cenozoic Landforms. First Indian Reprint. Delhi: Pearson Education (Singapore) Pte. Ltd.
2. Dyal., P. (2014). Bho-Akriti Vigyan. Rajesh Publications, New Delhi (Hindi).
3. Gupta, S.L. (2008). Bho-Akriti Vigyan. University of Delhi (Hindi).
4. Jat., B.C. (2004). Bho-Akriti Vigyan. Rawat Publications, New Delhi, (Hindi).
5. Singh, S. (1998). Geomorphology. PrayagPuskak Bhawan: Allahabad.
6. Strahler, A.H. and Strahler, A.N. (1992). Modern Physical Geography, Fourth Edition. John Wiley & Sons, Canada.
7. Summerfield, M.A, (1991). Global Geomorphology: an Introduction to the Study of Landforms. Longman, New York.
8. Tarbuck, E.J., Lutgens, F.K and Tasa, D. (2012). Earth Science, Thirteenth Edition, Prentice Hall. Delhi.
9. Thornbury, W.D., (1993). Principles of Geomorphology, Second Edition. Wiley Eastern Limited, New Delhi.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5 (DSC-5): POPULATION GEOGRAPHY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| POPULATION GEOGRAPHY | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- It introduces the basic concepts of population geography to the students.
- An understanding of the importance and need of Demographic data.
- Spatial understanding of population dynamics.

Learning outcomes

The Learning Outcomes of this course are as follows:

- The students would get an understanding of the distribution and trends of population growth in the developed and less developed countries, along with population theories.
- The students would get an understanding of the dynamics of the population.
- An Understanding of the implications of population composition in different regions of the world.

SYLLABUS OF DSC-5

UNIT – I (5 Hours)

Nature and Scope of Population Geography, Sources of Population Data with special reference of Indian Census.

UNIT – II (10 Hours)

Population Size, Distribution and Growth – Determinants and Patterns; Theories of Growth – Malthusian Theory and Demographic Transition Theory.

UNIT – III (10 Hours)

Population Dynamics: Fertility and Mortality – Measures and Determinants, Migration – Determinants and Implications.

UNIT – IV (10 Hours)

Dynamics of Population Pyramids and Women Empowerment and Indian Population Policies.

UNIT – V (10 Hours)

Contemporary Issues - Ageing of Population, Demographic Dividends, Global Refugee Crisis.

Practical component (if any) - NIL

Suggestive readings

1. Bhende A. and Kanitkar T. (2019). Principles of Population Studies. Himalaya Publishing House, New Delhi, India.
2. Chandna, R.C. (2017). Geography of Population. Kalyani Publishers, Ludhiana, India.
3. Clarks, John, I. (1972). Population Geography. Pergamon Press, New York.
4. Hassan M.I. (2020). Population Geography, A Systematic Exposition. Routledge Taylor and Francis Group, New York.
5. Lutz, W., Warren, C. S. and Scherbov, S. (2004). The End of the World Population Growth in the 21st Century. UK: Earthscan.
6. Majumdar, P.K. (2010). Fundamentals of Demography. Rawat publications, Jaipur.
7. Maurya, S. D. (2021). *JansankyaBhugol*. Sharda Pustak Bhawan, Allahabad.
8. Newbold, K. B. (2017). Population Geography: Tools and Issues. Rowman and Littlefield Publishers, NY, USA.

9. Saroha, J. (2021). JansankhyaBhugol, JanankikievamJansankhyaAdhayan. M.K. Books, New Delhi.
10. Weeks, John R. (2020) Population: An Introduction to Concepts and Issues. Cengage Learning, Boston.

DISCIPLINE SPECIFIC CORE COURSE – 6 (DSC-6): STATISTICAL METHODS IN GEOGRAPHY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| STATISTICAL METHODS IN GEOGRAPHY (PRACTICAL) | 4 | 0 | 0 | 4 | 12th Pass | NIL |

Note: one credit of practical is equal to two hours

Learning Objectives

The Learning Objectives of this course are as follows:

- The concept of quantitative information in general and Geographical data in particular. The importance of data analytics. The ways data is collected, or data is taken from different sources. The sampling methods' application for data collection purposes.
- To understand the ways to handle the collected data through classification, tabulation and stigmatization.
- To compute relations and impacts among the data series.

Learning outcomes

The Learning Outcomes of this course are as follows:

- To differentiate between qualitative and quantitative information.
- To know the nature of various data, different sources and methods of data collection.
- To present data through graphical and diagrammatic formats.
- To analyse the variations in spatial and non-spatial data.

SYLLABUS OF DSC-6

UNIT – I (20 Hours)

Data in Geography: Sources of Data, Scales of Measurements in Geography, Tabulation, Frequency Distribution, Geographical Data Matrix.

UNIT – II (30 Hours)

Descriptive Statistics: Central Tendencies – Mean, Median, Mode; Measures of Partitions - Quartile, Decile, Percentile; Measures of Dispersion- Standard Deviation and Coefficient of Variation; Spatial Centro-graphic Techniques – Mean Centre, Median Centre.

UNIT – III (20 Hours)

Sampling Methods: Sampling (Simple Random, Systematic, and Stratified); and Non-probability sampling.

UNIT – IV (30 Hours)

Theoretical Distribution: Concept of Probability Distribution (Theoretical only), Normal Distribution – Characteristics, Area under Normal Curve.

UNIT – V (20 Hours)

Relationship Analysis: Correlation - Spearman's and Karl Pearson's coefficient of correlation; Simple Regression.

Practical component (if any) – Practical File*

Suggestive readings

1. Alvi Z. (1995). Statistical Geography: Methods and Applications. Rawat Publications, Jaipur.
2. Mahmood A. (1999). Statistical Methods in Geographical Studies. Rajesh Publications, New Delhi.
3. Pal S. K. (1998). Statistics for Geoscientists. Tata McGraw Hill, New Delhi.
4. Rogerson P.A. (2014). Statistical Methods for Geography: A Student's Guide. Sage, New Delhi.

9. Walford N. (2011). Practical Statistics for Geographers and Earth Scientists. Wiley-Blackwell, West Sussex, United Kingdom.
10. SPSS (Statistical Package for Social Sciences)
11. Tableau Desktop software/R.

Note:

- *1. Students should construct/collect data matrix (75X5) with each row 75 representing an aerial unit (district/village/town) and 5 columns of relevant attributes of areal units.
2. All the exercises will be based on the data matrix collected by the students.
3. Simple calculator is allowed in the examination.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY THE DEPARTMENT OF GEOGRAPHY

GENERIC ELECTIVES (GE-4): GLOBALIZATION AND MOBILITY

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|----------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| GLOBALIZATION AND MOBILITY | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand the concept of mobility and migration.
- To understand the global cities, global village and borderless world.
- To understand flexible labour market and mass mobility.

Learning outcomes

The Learning Outcomes of this course are as follows:

- The students will able to learn the concept of migration.
- Students will able to differentiate between mobility and migration.
- Students will able to learn the implications of flexible labour market.

SYLLABUS OF GE-4

UNIT – I (3 Hours)

Globalization: Concept and Indicators; Mobility and Migration: Concept and Significance.

UNIT – II (12 Hours)

Global Cities, Global Village and Borderless World: Intensification and integration of Economic and Political Relations across borders.

UNIT – III (10 Hours)

Role of freedom of Trade and Information Technology on Human Mobility. Challenges of Globalization.

UNIT – IV (10 Hours)

Mobility: Frequency, Trends, Patterns and Factors; Pressure on Social Infrastructure.

UNIT – V (10 Hours)

Globality: Implications of Flexible Labour Market, Individual and Mass Mobility.

Practical component (if any) - NIL

| | | Lecture | Tutorial | Practical/ Practice | | |
| DISASTER MANAGEMENT | 4 | 3 | 1 | 0 | 12 th Pass | NA |

Learning Objectives

The Learning Objectives of this course are as follows:

- Understanding the basic concepts of disaster management.
- Detailed analysis about the different types of disasters in India.
- Evaluating the role of institutional frameworks to mitigate the disasters in the country.

Learning outcomes

The Learning Outcomes of this course are as follows:

- In depth understanding about the various disasters in the country.

- It will provide thorough understanding about the human responses to the disasters.
- It will highlight the responses and mitigation measures to both natural and manmade disasters.

SYLLABUS OF GE-5

UNIT – I (10 Hours)

Disasters, Hazards, Risk, Vulnerability- Definition, Concept and Classification; Hazard, Risk Vulnerability Capacity (HRVC) - Methods, Analysis and Mapping

UNIT – II (10 Hours)

Disaster Management- Disaster Management Cycle, Community Based Disaster Management

UNIT – III (7 Hours)

Floods, Earthquake, Drought, Cyclone

UNIT – IV (10 Hours)

Industrial, War, Fire, Epidemics, Nuclear

UNIT – V (8 Hours)

Strategies for disaster management: International- Yokohama Strategy for a Safer World 1994, Hyogo framework for Action 2005-2015; Sendai Framework for Disaster Risk Reduction 2015-2030; Indian Policy for disaster management: Disaster Management Act 2005, 10 point Agenda of Prime minister on DRR

GENERIC ELECTIVES (GE-6): INDIGENOUS KNOWLEDGE SYSTEM AND PRACTICES

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|------------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| INDIGENOUS KNOWLEDGE AND PRACTICES | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To know the meaning of indigenous knowledge system and its significance.
- To be aware of the concept of sustainability and ecosystem services.
- To be acquainted with about the indigenous knowledge of soil and water conservation techniques.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Students will be able to know the importance of our indigenous knowledge system.
- Students will learn how indigenous knowledge system will be effective to conserve out resources.
- Students will able to know about the intellectual property rights and socio-cultural heritage.

SYLLABUS OF GE-6

UNIT – I (5 Hours)

Introduction: Concept, Meaning and Definition, Approaches of Indigenous Knowledge System, Identification, Documentation, and Validation of Indigenous Knowledge system, Significance of Indigenous Knowledge System.

UNIT – II (10 Hours)

Indigenous Knowledge System (IKS), Sustainability and Ecosystem Services: Indigenous Knowledge and Sustainability, Indigenous Knowledge and Ecosystem Services, Nature Based Solutions (NBSs).

UNIT – III (10 Hours)

Indigenous Knowledge System and Practice: Case Studies: Agriculture, Land and Soil, Water, Forest.

UNIT – IV (10 Hours)

Indigenous Knowledge System and Rights of Communities: Role of Institutions, Intellectual Property Rights (IPRs), Indigenous Knowledge System and Socio-cultural Heritage.

UNIT – V (10 Hours)

Policy Implications/Way Forward: Revival and recognition of Indigenous Knowledge System, Integration of Intergenerational transmission of Indigenous Knowledge System, Need for Policy framework and Role of Various Initiatives with respect to India, Strength, Weakness, Opportunities and Threats (Challenges).

Practical component (if any) - NIL

DISCIPLINE SPECIFIC CORE COURSE– 6 (DSC-6): FIELD WORK PRACTICUM- II

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| FIELD WORK PRACTICUM-II DSC 6 SW203 | 4 | 0 | 0 | 4 | 12th Pass | NIL |

Learning Objectives

- To develop understanding of identities of people, dynamics of relationships, resources and opportunities to deal with them
- Develop an ability to critically examine and appreciate programmes and services of governmental and non-governmental social welfare/developmental organizations
- To acquire skills of working with people at individual, group and community level by integrating class room learning into real life situation

Learning outcomes

At the end of the semester, students will be able to

- Critically examine the agency's structure, functions, resources, service delivery system etc.
- Integrate theoretical knowledge with field practice (i.e. methods, principles, skills, techniques etc.)
- Write analytical field work reports

SYLLABUS OF DSC-6

Tasks/Activities:

1. Perform the assigned tasks during scheduled concurrent field work. The field work agency will remain the same in an academic year. Every student will be assigned a College supervisor for personalized learning and mentoring throughout the academic year.
2. Field work includes- observation visits, orientation programmes, task-based field visits, individual conferences/ mentoring, group conference scientific or experienced based paper presentation, report writing, critical discussion of the reports, workshops, seminars and skill-oriented sessions. Direct field work hours have to be 120 hours in a semester.
3. Work with volunteers, para-professionals/outreach workers in the field work agency such as - non-governmental organisations (NGOs) or voluntary organisations (VOs) and governmental organisations (GOs); and/or community.
4. Student will perform the agency-based field work tasks assigned by the respective Agency Supervisor.
5. Regular reporting to all concerned persons (both at agency and college level) during scheduled field visits, meetings and supervisory/individual conferences to seek regular guidance. Minimum 80% of attendance is required in each components of field work.
6. Prepare daily report in prescribed format and submit to the college supervisor on weekly basis. Prepare learning plan, agency/community profile in a timely and appropriate manner to both the College and Agency Supervisor. Students will engage in 3 hours of report writing per week.
7. The students must get the reports checked during the scheduled Individual Conference (IC) with the college supervisor on weekly basis. Attend Group conferences (GC), prepare group conference paper in consultation with college supervisor, thus learning the roles of presenter, chairperson, and recorder. The individual mentoring (IC & GC) to students by the college supervisor will include 1 hour per week.
8. Attend skill-based workshops as and when organised by the Department.
9. The students are required to submit self-evaluation report in the prescribed format for term end examination. Field work practicum follows continuous evaluation by the supervisor.

Practical component (if any) – 100% Field work

(Direct field work: 120 hours, field work mentoring & report writing: 60 hours)

Essential Readings

DEPARTMENT OF SOCIOLOGY

Category I

BA (Honors) Sociology

DISCIPLINE SPECIFIC CORE COURSE – 04: Sociological Perspectives

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|------------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC 04 Sociological Perspectives | 4 | 3 | 1 | 0 | 12th Pass | Nil |

Course Learning Objectives:

1. To introduce students to how society is studied by sociologists.
2. To inculcate the ability to distinguish between different sociological perspectives.
3. To introduce original sociological writing, to familiarize students with the rich texture of sociological prose and understand the need to engage with complex ideas about society.
4. To make students alive to the productive tension between universal and particular in the development of theoretical approaches in sociology by understanding the social context of different theoretical approaches.

Course Learning Outcomes:

Students will be able to:

1. *Describe* major theoretical perspectives in sociology and the context of their emergence.
2. *Read* and critically *engage* with the original works of various sociological thinkers and *interpret* the central argument.
3. *Distinguish* and *compare* different theoretical perspectives in sociology.
4. *Use* theoretical perspectives to examine social realities.

Outline Syllabus of DSC-4:

Unit 1. On the Plurality of Sociological Perspective (08 Hours)

Unit 2. Functionalism (12 Hours)

Unit 3. Conflict Perspective (12 Hours)

Unit 4. Interpretive Sociology (12 Hours)**Unit 5. Interactionism (08 Hours)****Unit 6. Feminist Perspective (08 Hours)**

Practical component (if any) - NIL

Essential/Recommended Readings:**Unit 1. On the Plurality of Sociological Perspectives**

Willis, Evan, 1996, *The Sociological Quest: An Introduction to the Study of Social Life*. New Jersey: Rutgers University Press. Ch. 7. Theory and Method. Pp 107-132.

Unit 2 Functionalism

Turner, Jonathan. 1987, *The Structure of Sociological Theory*, New Delhi: Rawat Publications. Chapter 2, Functional Theorizing. Pp 37-56.

Durkheim, Emile. 1982, *The Rules of Sociological Method*, New York: Free Press. Chapter 1, What is a Social Fact? Pp. 50 – 59.

Unit 3. Conflict Perspective

Sanderson, Stephen. 2007. Conflict Theory. In *The Blackwell Encyclopaedia of Sociology*, edited George Ritzer, New York: Blackwell Publishing. Pp. 662-665.

Marx, K. and F. Engels. 1969. Selected Works Vol. 1. Moscow: Progress Publishers. Pp. 502-506 (Abstract of Preface from A Contribution to the Critique of Political Economy).

Marx, Karl and Fredrich Engels. 1977. *The Manifesto of the Communist Party*. In The Selected Works, Volume I. Moscow: Progress Publishers. Pp. 108-119.

Unit 4. Interpretive Sociology

Freund, Julien, 1970, *The Sociology of Max Weber*, Penguin Books. Chapter 3, Interpretative Sociology. Pp 87-116.

Weber, Max., 2004. Science as a Vocation. in David Owen and Tracy Strong eds. Max Weber: The Vocation Lectures. 2004. Indianapolis/ Cambridge, Hachette Publishing Company. pp.1-31.

Unit 5. Interactionism

Giddens, Anthony, 2010, *Sociology*, 6th edition, Polity, Chapter 7, ‘Social Interaction in Everyday Life’, Pp. 247-280.

Goffman, Erving, 1979. *Gender Advertisements*, New York: Harper and Row Publications, Chapter 1, Gender Display. Pp. 1-9.

Unit 6. Feminist Perspective

Jackson, S. and S. Scott (eds.), 2002, *Gender: A Sociological Reader*, London: Routledge, Introduction, & Liz Stanley, Should 'Sex' Really be 'Gender'-Or 'Gender' Really be 'Sex'?, Pp. 1-26, Pp 31-41.

Suggested Readings:

Blumer, Herbert. 2002 'Symbolic Interactionism' from Craig Calhoun (ed.) *Contemporary Sociological Theory*. Oxford: Blackwell. Pp. 66 – 77.

Scott, S. *Making Sense of Everyday Life*. Cambridge: Polity Press. Chapter 2 Theorizing the Mundane. Pp 10-32.

Smith, Dorothy E. 1987, *The Everyday World as Problematic*. Boston: North West University Press. Chapter 2. A Sociology for Women. Pp. 49-69.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE –05: Social Stratification

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC 05 Social Stratification | 4 | 3 | 1 | 0 | 12th Pass | Nil |

Course Learning Objectives:

1. To introduce social stratification which is the systematic study of structured social inequalities as a substantive area that lies at the heart of sociology.
2. To introduce students to theoretical perspectives and empirical studies that are integral to the discipline.
3. To teach students how social inequality is constituted as a sociological problematique
4. To familiarize students with key concepts and theoretical perspectives that inform the study of stratification.
5. To examine key axes of stratification such as caste, class, gender, ethnicity and race and their intersections.
6. To familiarize students with key processes of stratification: social mobility and social reproduction.
7. To appraise students of the multiple operations of social inequalities and the reproduction of inequality in society.

Course Learning Outcomes:

Students will be able to:

1. *Recognize* social inequalities as a multifarious and culturally specific social reality.
2. *Define* the concepts, *outline* the principal theories and *recall* the critical debates in the arena of social stratification.
3. *Appreciate* the significance of sociological knowledge of social stratification for public discourse and *translate* the conceptual learning into well formulated sociological research projects.

Outline Syllabus of DSC-05:

Unit I: Understanding Social Stratification (16 Hours)

Unit II: Social Stratification: Axes and Issues (44 Hours)

- a. Caste
- b. Class

- c. **Gender**
- d. **Ethnicity**
- e. **Race**
- f. **Social Mobility and Social Reproduction**

Practical component (if any) - NIL

Essential/Recommended Readings:

Unit I: Understanding Social Stratification

DISCIPLINE SPECIFIC CORE COURSE – 06: Families and Intimacies

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC 06 Families and Intimacies | 4 | 3 | 1 | 0 | 12th Pass | Nil |

Course Learning Objectives:

1. This course seeks to sociologically examine the worlds of family, intimacy and marriage in their diverse forms while understanding changes in its structures and experiences of it.
2. The course will equip students with a critical understanding of basic concepts and sociological explanations of the way in which socially embedded relationships of affect in the family and intimate relationships intersect with economies of power, work, and control over resources in contemporary societies.

Course Learning Outcomes:

Students will be able to:

1. *Examine* the institutions of family and marriage as pivotal social institutions of intimacy from a sociological and socio-anthropological perspective.
2. *Discuss* historical and socio-cultural perspectives on the understanding of marriage, family and intimacy.
3. *Problematised* universality and *outline* and *observe* the structural and experiential realities of marriage and family.
4. *Identify* the variations in family structures and experiences using ethnographic accounts from different socio-cultural contexts.
5. *Describe* the critical implications of family change as they are related to social policy and legal issues.

Outline Syllabus of DSC-06:

Unit 1: An Invitation to Families & Intimacies (20 Hours)

This unit familiarises students with the basic sociological concepts of marriage and family which are regarded as pivotal institutions of intimacy for all societies. It also explains the historical changes that these institutions have undergone.

Unit 2: Familial Worlds (20 Hours)

The unit examines different familial worlds with an emphasis on kinship, gender, body and demography in India and other parts of the world.

Unit 3: Marriage & Intimacies (20 Hours)

In this Unit the focus is on exploring the ways in which marriage and family have been comprehended in contemporary societies. It also focuses on the impact of technology on family and intimacy.

Practical component (if any) - NIL

Essential/Recommended Readings:

DISCIPLINE SPECIFIC CORE COURSE – 04: Religion and Society

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC 04 Religion and Society | 4 | 3 | 1 | 0 | 12th Pass | Nil |

Course Learning Objectives:

The course introduces students to a sociological understanding of religion including beliefs, practices, and religious organisations. The three key components of this course are - sociological approaches to the understanding of religion; manifestations of religion in diverse forms and practices; and a focus on contemporary religious practices. The objective of the course is to offer an empirical and comparative view of religion and its role in society.

Course Learning Outcomes:

1. Understanding religion from a cultural, social, symbolic and comparative perspective.
2. Understanding religion as a socially constituted reality.
3. Familiarity with some of the contemporary issues in the sociology of religion.
4. A sociological understanding of the diversity of religious life.

Outline Syllabus of DSC-04:

Unit I. Introduction to Sociology of Religion (24 Hours)

- a. Meaning and Scope
- b. Sacred and Profane
- c. Religion and Rationalization
- d. Religion as a cultural system

Unit II. Myth, Body, and Rituals as elements of Religion (24 Hours)

- a. Ritual
- b. Body
- c. Myth

Unit III. Contemporary Issues in Religion (12 Hours)

- a. Religion and Media
- b. Secularism

Practical component (if any) - NIL

Essential/Recommended Readings:

Unit I. Introduction to Sociology of Religion:

a. Meaning and Scope

Béteille, A. 2002. *Sociology: Essays on Approach and Method*. OUP: New Delhi, Pp 134-150.

Berger, P. 1967. *The Sacred Canopy*. Garden City: New York, Pp175- 186.

b. Sacred and Profane

Durkheim, E. 2001. *The Elementary Forms of the Religious Life*. Carol Cosman (trans). Oxford: Oxford University Press, Pp 25-46; 87-100; 153-182.

c. Religion and Rationalization

Weber, Max. 1905. *The Protestant Ethic and the Spirit of Capitalism*, New York: Free Press, Pp 102-125

d. Religion as a Cultural System

Category III

BA (Prog.) with Sociology as Non-Major

DISCIPLINE SPECIFIC CORE COURSE – 03: Sociology of India

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------------|----------------|--|-----------------|----------------------------|-----------------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC 03 Sociology of India | 4 | 3 | 1 | 0 | 12th Pass | Should have Done DSC (MDS) 01 |

Course Learning Objective:

1. This paper aims to provide an outline of the institutions and processes of Indian society.
2. The central objective is to initiate students into studying Indian society through a sociological lens.
3. The students will be able to identify key social structures of Indian society.

Course Learning Outcomes:

Students will be able to:

1. *Recognize* the bases of plurality of Indian society.
2. *Explain* the concepts of caste, tribe, class, village, and religion.
3. *Examine* the dynamics of social change in India.

Outline Syllabus of DSC-03:

Unit I. Introducing India (08 Hours)

Unit II. India as a Plural Society (08 Hours)

Unit III. Social Institutions, Processes and Change (44 Hours)

- a. Caste
- b. Tribe
- c. Class
- d. Village
- e. Religion

Practical component (if any) - NIL

Essential/Recommended Readings:

Unit I. Introducing India (Weeks 1-2)

Stern, Robert W. 2003. *Changing India*. Cambridge: Cambridge University Press. Pp. 16-31.

Unit II. India as a Plural Society. (Week 3)

Mason, P. 1967. "Unity and Diversity: An Introductory Review" in Philip Mason(ed.) *India and Ceylon: Unity and Diversity*. London: Oxford University Press, Introduction. Pp. 1-29

Unit III. Social Institutions, Processes, and Change. (Weeks 4-12)

a. Caste

Ambedkar, B.R. 1977. "Castes in India: Their Mechanism, Genesis and Development," *Jullundhur, Bhim Patrika*. Pp 2-32.

Srinivas, M.N., 1956, "A Note on Sanskritization and Westernization", *The Far Eastern Quarterly*, Volume 15, No. 4, pp 481-496.

b. Tribe

Xaxa, V. Tribes in India, in Veena Das ed. *The Oxford India Companion to Sociology and Social Anthropology* Vol I. New Delhi: Oxford University Press, 2003. Pp.373 – 408.

c. Class

Dhanagare, D.N., 1991, "The Model of Agrarian Classes in India", in Dipankar Gupta(ed.), *Social Stratification*. Delhi: Oxford University Press, pp. 271-275.

CATEGORY-IV

COMMON POOL OF GENERIC ELECTIVES (GE) OFFERED BY DEPARTMENT OF SOCIOLOGY

GENERIC ELECTIVES (GE-04): Gender, Power and Violence

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| GE 04 Gender, Power and Violence | 4 | 3 | 1 | Nil | 12th Pass | Nil |

Course Learning Objective:

1. To examine the varied expressions and ramifications of gendered violence in a variety of contexts.
2. To understand and analyse gender violence as both routine and spectacular, and structural, symbolic and situated.
3. To explain how gender is socially constructed, and increase awareness of the presence of gender violence on multiple bodies in varied locations and contexts.
4. To identify and analyze social movements and everyday forms of resistance against gender violence.

Course Learning Outcomes:

Students will be able to:

1. *Establish* the connections between the social construction of gender across cultures and the forms and experiences of gender violence.
2. *Describe* and *debate* different theoretical perspectives on the genesis and manifestation of gender violence across societies and cultures and its personal, social, cultural, political and economic consequences.
3. *Analyze* the significance of public discourse in general and the role of the state and public policy in addressing and curbing gender violence.
4. *Debate* individual and collective struggles and strategies used to resist gender violence.

Syllabus of GE 04:

Unit I. Conceptual Frameworks for understanding Gender and Violence (24 Hours)

- a. Deconstructing Gender and Gendered Violence**
- b. Embodiments of Violence: Multiplicities & Responses**

Unit II. Intersectional Debates (24 Hours)

- a. Power & Violence: Individuals & Community**
- b. Nation-States, (In) Security & Sexual Violence**
- c. Invisibilized Vulnerabilities**

Unit III. Legal Discourses on Gender Violence: Local and Global Experiences (12 Hours)

Practical component (if any) - NIL

Essential/Recommended Readings:

Unit I. Conceptual Frameworks for understanding Gender and Violence: (Weeks-1-6)

a. Deconstructing Gender and Gendered Violence

Boyle Karen. (2019). 'What's in a Name? Theorizing the inter-relationships of gender and violence'. *Feminist Theory* 2019. Vol 20(1) 19-36

Audio Visual Materials: Recommended for screening and Tutorial discussion

A Girl in the River: The Price for Forgiveness (Pakistan): Dir. Sharmeen Obaid Chinoy: 40 mins

A Pinch of Skin (India): Dir. Priya Goswami: 28 mins

Kony 2012 (Uganda): Dir. Jason Russell: 30 mins

Sri Lanka's Killing Fields: Dir. Callum Macrae: 49 mins

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-05): Sociology of Intimate Life

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| GE 05 Sociology of Intimate Life | 4 | 3 | 1 | Nil | 12th Pass | Nil |

Course Learning Objectives:

1. To introduce students to some of the processes that shape intimate life in contemporary societies.
2. To explore the concept of intimacy and map the historical transformations this phenomenon has undergone.
3. To chart the configuration of intimacy in our times in multiple dimensions such as institutions, gender, sexuality, love and care.
4. To initiate discussion about ideals of equality and compassion in intimate relations.

Course Learning Outcomes: Students will be able to:

1. *Outline* sociological conceptions of Intimacy.
2. *Describe* the historical transformation of intimate relations and their present status.
3. *Appreciate* the significance of intimate relationships in weaving and sustaining the social fabric.
4. *Apply* this understanding of the interconnections between the public and private realms into policy making.

Syllabus of GE 05:

Unit I Intimacy: An Introduction (16 Hours)

Unit II Themes in Sociology of Intimacy (44 Hours)

- a. Institutions and Intimacies
- b. Gender, Sexuality and Intimacy
- c. Intimacy and Love
- d. Intimacy and Care

e. Intimacy and Democracy

Practical component (if any) - NIL

Essential/Recommended Readings:

Unit I. Intimacy: An Introduction

Jamieson, Lynn. (1998). Introduction, Chapters 1 & 2. In *Intimacy: Personal Relationships in Modern Societies*. (pp. 1-42). Polity Press.

Unit II. Themes in Sociology of Intimacy

a. Institutions and Intimacies:

Coontz, Stephanie. (2013). The Radical Idea of Marrying for Love (pp. 163-173). In David M. Newman. (Ed.) *Sociology: Readings Exploring the Architecture of Everyday Life*. Sage Publications.

GENERIC ELECTIVES (GE-06): Invitation to Sociological Theory

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|----------|-----------------------------------|----------|---------------------|-----------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| GE 06 Invitation to Sociological Theory | 4 | 3 | 1 | Nil | 12th Pass | Nil |

Course Learning Objectives:

1. To familiarize students with fundamental sociological perspectives.
2. To enable students to analyse social reality on the basis of these perspectives.
3. To help students apply sociological theories to their lifeworld.

Course Learning Outcomes:

Students will be able to:

1. *Analyze* the multiple dimensions of social reality.
2. *Compare* and *contrast* different sociological perspective on these processes..
3. *Develop* a critical orientation while observing and reviewing social realities.
4. *Apply* various sociological theories to social contexts and thereby assessing the causes and consequences of various social phenomena

Syllabus of GE 06:

Unit 1. Understanding Sociological Theory (08 Hours)

Unit 2. Functionalism (16 Hours)

Unit 3. Conflict Theory (08 Hours)

Unit 4. Interpretive Sociology (08 Hours)

Unit 5. Interactionism (10 Hours)

Unit 6. Feminist Sociology (10 Hours)

Practical component (if any) - NIL

Essential/Recommended Readings:

Unit 1. Understanding Sociological Theory

DEPARTMENT OF HISTORY

Category I

BA (Hons.) History

DISCIPLINE SPECIFIC CORE COURSE -1 (DSC-1) – : History of India – II: c.300 to 750 CE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| History of India – II c.300 CE - 750 CE DSC 1 | 4 | 3 | 1 | 0 | 12 th Pass | Should have studied History of India -I (From the beginning to fourth century BCE) |

Learning Objectives

The Learning Objectives of this course are as follows:

This course is about the early historical and the early medieval periods of Indian history. It explores the transition from the early historical to the early medieval phase highlighting major changes that shaped the character of Indian civilization. The course tries to delineate the important developments in the arena of economy, society, religion and culture. The purpose of this course is to familiarise students with the ways in which historians work with sources of various kinds and reconstruct our past.

Learning outcomes

After completing this course, the students will be able to

- Discuss the ways in which historians have questioned the characterization of the Mauryan state.
- Delineate changes in agriculture, technology, craft-production, urban development, trade and use of currency.
- Analyse critically the changes in the varna/caste systems and the changing nature of gen-der relations and property rights.
- Write and undertake projects related to religious developments, art, architecture, and forms of patronage.

SYLLABUS OF DSC-1

Unit I: Development of Political Structures (c. 4th century BCE to c. 300 CE) (12 Hours)

1. The Mauryan empire; the nature of dhamma
2. Post-Mauryan polities with special reference to the Kushanas and the Satavahanas
3. Tamilakam

Unit II: Economy and society (c. 4th century BCE to c. 300 CE) (16 Hours)

1. Expansion of agrarian economy and production relations
2. Urban growth: north India, central India, the Deccan and south India; craft production; trade interactions across the Indian sub-continent and beyond
3. Social stratification: varna; jati; untouchability; gender; marriage and property relations

Unit III: Polity, Economy and Society (c. 4th century to 750 CE) (16 Hours)

1. The nature of polities
2. Agrarian developments, land grants and peasantry
3. Urban patterns; trade and currency
4. Society: the proliferation of jatis: changing norms of marriage and inheritance

Unit IV: Religion and Cultural developments (c. 4th century BCE – 750 CE) (16 Hours)

1. Theistic Traditions
2. Art and architecture; forms of patronage (Sculptures, Stupas, Rock Cut Caves, and Temples)

Practical component (if any) - NIL

Essential/recommended readings

Unit I. This unit would enable students to trace the history of changing political developments from the Mauryan to post-Mauryan states.

DISCIPLINE SPECIFIC CORE COURSE – 2 (DSC-2): Social Formations and Cultural Patterns of the Medieval World – II

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code DSC 2 | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Social Formations and Cultural Patterns of the Medieval World – II | 4 | 3 | 1 | 0 | 12 th Pass | Should have studied Social Formations and Cultural Patterns of the Ancient World – I |

Learning Objectives

The Course seeks to develop a historical understanding of the major developments in some parts of the Ancient and Medieval world. These include the process of colonisation undertaken by the Greek city-states (polis) and by Rome and the far-reaching political experiments under-taken here. The Course provides a scope for understanding the subject of slavery in its varied dimensions in the Ancient world and this in turn prepares the students to understand historically the concepts of freedom and bondage as also the larger process of ordering and reordering of society through coercion, consent and revolts. We discuss the Medieval world in the Course by analysing the nature of European ‘feudal’ society and economy of the 8th to the 14th centuries. As different sections of society forged newer military and economic ties, the medieval institutions, particularly the Church, played an important role in the confirmation of these ties. The European social world was shaped into an intricate structure comprising powerful institutions like monarchy and the Church. The Course provides a scope to understand the medieval economy of Western Europe, particularly through its agrarian dimensions and relatively newer labour systems like serfdom. And finally, the Course allows an undergraduate student to reflect on questions related to the emergence and spread of Islam. An enquiry into the role of Islam in the transformation of a tribal identity to a Caliphal State in West Asia from the 7th to 9th centuries deepens the understanding of the long-term historical processes.

Learning outcomes

Upon completion of this course the student shall be able to:

- Identify the main historical developments in Ancient Greece and Rome.
- Gain an understanding of the restructuring of state and society from tribe-based polities to
- those based on territorial identity and citizenship.
- Trace the emergence and institutionalisation of social hierarchies and marginalisation of dissent.
- Explain the trends in the medieval economy.
- Analyse the rise of Islam and the move towards state formation in West Asia.

- Understand the role of religion and other cultural practices in community organisation.

SYLLABUS OF DSC- 2

Unit 1: Ancient Greece and Rome: (20 Hours)

1. Evolution of the 'polis' and changing political formations in Ancient Greece: Athens
2. and Sparta.
3. Rome from the Republic to Principate (c. 500 BCE- 200 CE)
 - a. Conflict of the Orders: Imperial expansion and social tensions in the Republic
4. Slavery in Ancient Greece and Rome
5. Crisis of the Roman Empire

Unit II: Feudal societies in medieval Europe (8th – 14 centuries) (20 Hours)

1. The emergence of Feudal states: Church, State and Society
2. Growth of the Medieval economy- Patterns and Processes: 8th - 11th centuries
3. Transition in the feudal economy from 11th – 14th centuries– (i) Agriculture: changes in serfdom and seigneurie (ii) Growth of towns and trade and their impact (iii) Onset of 'feudal crisis' in 13th and 14th centuries[S1]

Unit III: Early Islamic Societies in West Asia: Transition from tribe to state (20 Hours)

1. Pre-Islamic tribal society in Arabia and Rise of Islam
2. State formation: The Caliphate – Rashidun, Umayyads and early Abbasids (c.632 CE to c. 800CE)

Practical component (if any) - NIL

Essential/recommended readings

1. **Unit 1:** This Unit will be disaggregated and taught in sequence, first Greece then Rome. In the context of Greece, it will provide an understanding of the changing cultural, social, economic and political trends in Ancient Greece. It will then focus on Roman military expansion and its impact on social conflict, institutionalisation of slavery, and the crisis of the Roman Empire.

DISCIPLINE SPECIFIC CORE COURSE– 3 (DSC-3): History of the USA: Reconstruction to New Age Politics

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code DSC 3 | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| History of the USA: Reconstruction to New Age Politics | 4 | 3 | 1 | 0 | 12th Pass | Should have studied History of the USA: Independence to Civil War |

Learning Objectives

The course attempts to understand the changing political culture of the USA in the aftermath of the Civil War. The focus is not only to delineate the changes brought in during the phase of Reconstruction followed by the growth and expansion of industrialization and urbanization process with its inherent contradictions and complexities that had an impact on the gender roles giving way to the Feminist Movement and assisted in the mobilization of the African-Americans gravitating towards the beginnings of the Civil Rights Movement. The course links the consolidation of American capitalism with the crystallization of American imperialism and its eventual emergence as a global power.

Learning outcomes

Upon the completion of this course the student shall be able to:

- Explain the reasons for the implementation of ‘Radical’ Reconstruction and the causes for its limited success
- Analyze the growth of capitalism in the USA
- Discern the history of Populist and Progressive Movements
- Describe the nature of the Women’s Liberation Movement and its changing contours from the nineteenth to twentieth centuries
- Trace the significance of the African-American Movement and how it eventually assisted in the emergence of Civil Rights Movement under Martin Luther King Jr.

SYLLABUS OF DSC-3

Unit I: Reconstruction (12 Hours)

1. The Makings of Radical Reconstruction; Rise of New Social Groups in the South, Carpetbaggers, Scalawags, Ku Klux Klan and Free Blacks

Unit II: The Gilded Age - Economic, Social Divide and Reform (16 Hours)

1. Growth of Capitalism – Big Business; Competition, Consolidation, Monopolism
2. The Populist Challenge: Agrarian Crisis and Discontent

3. The Politics of Progressivism: Movement, Manifestations under Theodore Roosevelt and Woodrow Wilson

Unit III: Gender Roles and the Rise of African-American Movement (16 Hours)

1. Cult of Womanhood in the nineteenth century: The White (Case study of Lowell Textile Mill Women Workers), Black and Indigenous Women
2. The Emergence of Black Leadership: Booker T. Washington; W.E.B. DuBois, NAACP
3. The Rise of the Civil Rights Movement: Martin Luther King Jr.

Unit IV: USA in the World Politics (16 Hours)

1. Imperialistic Ambition and Power: The Spanish-American War; Role of USA in East Asia and Latin America
2. USA in the First and Second World Wars

Practical component (if any) - NIL

Essential/recommended readings

Unit I: The Unit examines the reasons for the Radical Congressmen taking over the Reconstruction process and how the establishment of radical governments in the Southern states led to the rise of new social groups and the resultant consequences thereof.

- Boyer, P.S., H. Sitkoff et al. The Enduring Vision: A History of the American People. Vol. II. 5th edn. Massachusetts: Houghton Mifflin Company, 2003.

- Foner, E. 'The New View of Reconstruction'. American Heritage, Vol. 34, Issue 6, October-November 1983.

Unit II: This Unit delves into the three most important aspects of American history. The rise of Big Businesses their methods and techniques to capture and monopolize markets and the impact these sweeping economic changes had on American society eventually led to the rise of two most significant movements, the Populist movement at the agrarian level and the Progressive movement at the urban and industrial level.

Category II

BA(Prog.) with History as Major

DISCIPLINE SPECIFIC CORE COURSE (DSC-1): History of India, 300 CE to 1200 CE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code DSc 1 | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|---|
| | | Lecture | Tutorial | Practical/ Practice | | |
| History of India, 300 CE to 1200 CE | 4 | 3 | 1 | 0 | 12 th Pass | Should have studied History of India from earliest times up to 300 CE |

Learning Objectives

This course broadly covers period from late historic centuries to the early medieval times. Considered as a watershed, Gupta period marked the beginnings of some significant historical changes that left their imprint on the coming centuries. The aim of this course is to analyze these changes in terms of their spatial context and chronological framework that led to the transition towards the early medieval period.

Learning outcomes

On successful completion of this Course, the students will be able to:

- Develop an understanding of the ever fluid political scenario of the period identified in this paper, with special focus on regional polities.
- Identify the historical importance of the accelerated practice of land grants issued by ruling houses.
- Delineate changes in the realm of economy, society and culture with emphasis on newer forms of art and architecture.
- Contextualize the evolution and growth of regional styles of temple architecture and the evolving role of these temples as centers of socio-economic and political activities.

SYLLABUS OF DSC-1

Unit I: Survey of the Sources. (8 Hours)

Unit II: The Guptas and the Vakatakas: Administration, economy, society and cultural development. (12 Hours)

Unit III: Towards Early Medieval: changes in post - Gupta period with special reference to Vardhanas, Pallavas and Chalukyas. (12 Hours)

Unit IV: Rashtrakutas, Palas and Pratiharas: tripartite struggle for supremacy. (8 Hours)

Unit V: Emergence of Rajput states in Northern India: Socio - economic foundations. (12 Hours)

Unit VI: The Cholas: State and administration, economy and culture. (8 Hours)

Practical component (if any) - NIL

Essential/recommended readings

Unit-I: This Unit introduces the student to the varied sources used for writing history of ancient India from c. 300 CE onwards and their interpretations.

- Sharma, R.S. (1995). "An Analysis of Land grants and their Value for Economic History" in Perspectives in Social and Economic History of Early India. New Delhi: Munshiram Manoharlal. (Chapter 18)
- शर्मा, आर. एस. (2000). प्रारम्भिक भारत का आतथाक सामाजिक और इततहास. तिल्ली : तहन्दी माध्यम कार्ान्वर् तनि शालर्, तिल्ली तवश्वतवद्यालर्. (अध्यार् 18)
- Singh, Upinder. (2013). A History of Ancient and Early Medieval India: From the Stone Age to the 12th century. New Delhi: Pearson. (Chapter 1)

(DSC-2): Medieval Societies: Global Perspectives

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code DSC 2 | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------------|--|-----------------|----------------------------|-----------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| MEDIEVAL SOCIETIES: GLOBAL PERSPECTIVES | 4 | 3 | 1 | 0 | 12th Pass | Should have studied Ancient Societies |

Learning Objectives

1. The objective of the course is to enable the students to have a comprehensive understanding of evolution and establishment of medieval civilization with special focus on polity, society, economy, religion and culture during medieval times. The attempt would be to study feudalism in medieval European context. The endeavor would be to trace the trajectory of origin, development and crisis of feudalism. Alongside, the course intends to acquaint the learners about the rise and spread of Islam during medieval era along with the forms of cultural pattern that shaped the popular Islamic practices like tassawuf. In addition to that, students would also be exposed to medieval China particularly with Sung, Mongols and Ming dynasties. The focus is just not on dynastic changes but also the dynamism in administrative machinery, political ideology, economy, culture and China's external relations in the period under survey. The technology of China gave way to spectacular growth in wealth, commerce, agricultural surplus, trade and monetization which finally led to cultural efflorescence.

Learning outcomes

After completion of the course the student shall be able to –

- Identify the medieval societies in global context especially focussing on Europe, Central Asia, India and China with clarity in.
- Analyse the rise of Islam and move towards state formation in west Asia.
- Understand the role of religion and other cultural practices in community organisation.
- What was medieval China and the science and civilization there.
- Finally the technological growth that led to cultural efflorescence during the later period. (Ming period)

COURSE CONTENT

UNIT I.

MEDIEVAL WORLD (20 Hours)

- (a) Understanding Feudalism: European and Indian
- (b) Church and nobility; Peasants and state
- (c) Feudal relationships and socio-economic changes: growth of trade and emergence of urban centres; feudal crisis
- (d) Cultural Patterns: Crystallization of hierarchies; medieval life and thought

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY DEPARTMENT OF HISTORY

GENERIC ELECTIVES (GE-1): Delhi through the Ages: From Colonial to Contemporary Times

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|---------------------|-----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Delhi through the Ages: From Colonial to Contemporary Times | 4 | 3 | 1 | 0 | 12 th Pass | Should have studied Delhi through the Ages: The Making of its Early Modern History |

Learning Objectives

This course examines the physical and social transformation of Delhi from colonial to contemporary times. Focusing on the echoes of political developments on urban form and social experience, it aims to explore the historical antecedents of some of the capital's contemporary dilemmas.

Learning outcomes

Upon completion of this course the student shall be able to:

- Analyse the political developments and their legacy for the shaping of the city.
- Discern the importance of 'local' social, ecological and cultural processes that shape and reshape the city
- Explain the historical roots of the problems of sustainable urbanization with regard to Delhi.

SYLLABUS OF GE-1

Unit I: Delhi in the 19th Century - Mughal Court, Company Raj, 1857 and its Aftermath (16 Hours)

Unit II: Building New Delhi - Imperial Ideology and Urban Morphology (12 Hours)

Unit III: Delhi in 1947- Partition and its Aftermath (16 Hours)

Unit IV: Making of Contemporary Delhi – Spaces, Politics and Socialites (16 Hours)

Essential Readings

Unit I. This unit should familiarise students with the city in light of the colonial past and the present. It will also help them locate the political developments for shaping of the city. The unit examine political developments and their legacy during 1857 and how the rebellion in Delhi influenced its evolution.

GENERIC ELECTIVES (GE-2): History and Culture: Representations in Texts, Objects and Performance Histories

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------|-----------------------------------|----------|---------------------|-----------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| History and Culture: Representations in Texts, Objects and Performance Histories | 4 | 3 | 1 | 0 | 12th Pass | NIL |

Learning Objectives

This course aims to explore culture through its intangible and tangible attributes that are discussed in four themes including traditions of kingship and courtly culture; inter-cultural perceptions of 'other' religious communities and gender; performing ritual devotions through recitation of songs and processions; and exploring performance of narrative traditions using inanimate objects like, masks, puppets and cloth/paper scrolls. The themes are representations from oral and manuscript cultures from India. Specialized essays have been attached to every theme with the purpose of explaining the meaning, form, and context of these representations from the past. The readings represent ethnic and spatial (across geographical space and time) range and draw on diverse methodologies.

Further, this module seeks to explore the continuity of cultural patterns, iconic representations, and styles of performance into our present times. For example, the iconic raja (king) of the premodern times continues to perform royal ritual and sacrificial ceremonies, into contemporary times when India is a republic. The court jester of the past lingers on into the present as represented by Hajari Bhand. The complex nature of inter-cultural discourse between the Hindus and Muslims continues into the present and we know that neither community represents monolithic form. What shall we make of these multifaceted representations? How do performative traditions evolve over time? In absence of kingly patrons who will patronize the bhand, temple priest, picture showman with his scrolls? What kind of changes have evolved in the narrative traditions? The pedagogy of interdisciplinary approach is thus inbuilt into the structure of this course. Readings and audio-visual material have been knitted into themes to encourage active participation and discussion in the classroom. It will be impossible to claim any 'com-prehensive' treatment of India's culture over the duration of one semester. We may, however, be introduced to some significant vignettes of the whole.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Identify complex nature of kingship in medieval times through the case study of Krishnadevaraya of Vijayanagara.

- Understand the nature of interaction between the two dominant communities in the past. The paradigm of ‘clash of civilizations’ appears to be an exaggerated view.
- Appreciate the complex nature of religious communities in the past, when neither the Hindu nor Muslims represented monolithic identities.
- Read the intricate nature of interactions between men and women and the fact that identities were differently expressed than in the colonial times.
- Understand how culture is communicated through narrative strategies and performative acts.
- Appreciate that textuality and performativity are not binary opposites and are mutually interactive.
- Develop analytical skills that are necessary for students of literature, sociology, anthropology, religion, psychology, political science and South Asian studies.

SYLLABUS OF GE-2

| | |
|---|------------|
| Unit I: Kings, bhands & politicians | (16 Hours) |
| Unit II: Perceiving cultures & Negotiating identities | (16 Hours) |
| Unit III: Performing Devotion: Rituals, songs & processions | (16 Hours) |
| Unit IV: Storytelling with objects: Masks, puppets & scrolls | (12 Hours) |

Practical component (if any) - NIL

Essential/recommended readings

Unit I: Kingship is identified as a key component of India’s civilizational ethos. In the years following Indian Independence, kingdoms were dissolved, but this did not provoke the disappearance of kings: royal rituals continued to be celebrated as members of the royal families became politicians; and court jesters linger on as buffoons.

- David Dean Shulman, *The King and the Clown in South Indian Myth & Poetry*, Princeton University Press, 1985, Excerpt from Chapter 4, “The Kingdom of Clowns: Brahmins, Jesters & Magicians”, Princeton: Princeton University Press, 1985, pp. 152-213, available in Meenakshi Khanna, ed., *The Cultural History of Medieval India*, New Delhi: Social Science Press, 2012 (2007), pp. 3-24.

- John Emigh and Ulrike Emigh, “Hajari Bhand of Rajasthan: A Joker in the Deck”, in *The Drama Review: TDR*, Vol. 30, No. 1 (Spring, 1986), pp. 101-130.

Unit II: This rubric draws on four essays based on multilingual textual sources such as inscriptions, poetic texts, chronicles and travellers accounts composed during 8th to 19th centuries. The scholars have problematised issues relating to cultural perceptions and identities of religion and gender. Contrary to popular view that an encounter between the Hindus and Muslims perpetuated clashes, the authors of these essays present a complex understanding of identities that were not perceived as monolithic. These readings will clarify the methodological approaches used by historians to unravel narratives from the past in the quest for explaining the present.

- Brajadulal Chattopadhyaya, “Images of Raiders and Rulers” in B. D. Chattopadhyaya, ed., *Representing the Other: Sanskrit Sources and the Muslims, Eighth to Fourteenth Century*, New Delhi: Manohar, 1998, pp. 101-125

Unit III. The acts of devotion, whether these are observed in private spaces or in public sphere, formulate expressions of religious identities. Many rituals, like the recitation of songs dedicated to Siva or and the procession of icons in the temple at Madurai; lamentation over the martyrdom of Husain and parading of the replica of his tomb shrine during Muharram, developed during medieval times. Political patronage was necessary for such devotional acts in the past as well as in the present.

Unit IV. In the three narrative traditions discussed in this rubric the human agency (Purusha) exists in specific kind of relation with inanimate objects used in performance. These objects have meanings embedded in the social and political contexts of various cultural traditions and express processes by which notions of ‘self’/ ‘selves’ are constructed & reconstructed.

GENERIC ELECTIVES (GE-3): Indian Society: A Historical Perspective

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Indian Society: A Historical Perspective | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

Indian society has witnessed the evolution of a composite culture with coming together of multiple traditions after negotiating existing differences in the society, which persist even today. This course uses a socio-historical perspective to trace the processes of continuity and change through which various social categories have emerged and got entrenched, even while the society itself evolved and remained fluid. The first unit uses a variety of primary and secondary texts intends to explore key issues in ancient Indian social history such as varna, jati, class, caste, gender, marriage relations, different types of social and religious thinking and varied cultural experiences. During the medieval period, with the expansion of agrarian societies there was formation and proliferation of castes which had sub-regional specificities and variations. There is a need to take cognizance of the fact that there was considerable economic, social and occupational mobility at both individual and group level. The medieval period also saw conforming and conflicting trends in the religious sphere which manifested itself through the various branches and schools, like the Bhakti cults. After the advent of colonial rule, the national movement witnessed various alternative tendencies which many a times ran counter to the nationalist agenda which gave the national movement its own distinctive identity. The persisting search for uniformity is problematised in the face of existing differences that existed at various levels of the society and also highlight the contestation between forces of exclusion and inclusion. This course makes a conscious attempt to convey historical processes through which various 'categories' have emerged and thereby emphasize the fluid character of categorization. The goal is to focus on moments of convergence and divergences in society and how a composite, multi-layered, complex society emerged after negotiating differences in the society, some of which even persists today.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Develop a critical understanding of the historical context of institutions like varna, jati, caste, kinship and marriage relations and early religious thought.
- Examine the complex relations between different social groups beginning from the hunter gatherers to the medieval trading and artisan communities.
- Understand the inherent politics and contradictions in the religious milieu of the medieval period.
- Outline various alternative currents in subaltern voices.
- Have a better understanding of the contemporary issues and challenges in the society

SYLLABUS OF GE-3

Unit I: Varna and jati; kinship and marriage; socio-religious ideologies in Early Traditions: (12 Hours)

1. Varna and jati in Vedic and Brahmanical traditions.

2. Forms of Kinship and regional variations; Marriage, family and households in early traditions,
3. Buddhism and Jainism.

Unit II: Social and occupational categories (some case studies from earliest times to 1700 CE): (16 Hours)

1. Early Hunter gatherers and Pastoral communities,
2. Tribal and Peasant communities,
3. Traders, Crafts persons and artisan communities.

Unit III: Social and Religious Movements (Case studies from 1000 -1800 CE): (16 Hours)

1. Devotional movements and social change

Unit IV: Contemporary society and its challenges: (some case studies) (16 Hours)

1. Subaltern voices and Social movements,
2. Environmental and Urban movement,
3. Gender and social imbalance
4. Plurality and Cultural diversities.

Practical component (if any) - NIL

Essential/recommended readings

Unit I: The unit traces the historical context of social institutions like varna, jati, caste, kinship and marriage relations and explores the social context of Vedic, Brahmanical, Buddhist, Jain and Shramanic thought in early India.

- Frits Staal, *Discovering the Vedas, Origins, Mantras, Rituals, Insights*, Part III and IV, Penguin, 2017, pp.47-63
- S. Jaiswal, *Introduction. Caste, Origin, Function and Dimensions of change*, Delhi: Manohar, 2000, Introduction
- Trautmann, Thomas R. *Dravidian Kinship*, (Cambridge Studies in Social and Cultural Anthropology, Series Number 36) Cambridge University Press, 1982 (Ch-1,4)
- Peter Harvey, *Buddha in his Indian context in an Introduction to Buddhism*, Cambridge University Press, 2017, pp.8-31.
- Paul Dunda, *The Jains*, Psychology Press, 2002, Introduction

Unit II: In this unit an attempt is made at exploration of the variegated societies that existed in the ancient, the lives of hunter- gatherers, pastoralist, peasants and tribal communities from earliest times. It also tracks the formation of authoritarian regimes and with the emergence of pan-regional market economics, there emerged various occupational categories with their unique identities and culture. The idea is to emphasize fluidity and reflect mobility in caste system which would be the key to understanding processes of change and continuity.

GENERIC ELECTIVES (GE-4): Understanding Indian Heritage

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code GE-4 | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------------|---------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Understanding Indian Heritage | 4 | 3 | 1 | 0 | 12 th Pass | NIL |

Learning Objectives

The aim of this paper is to make students familiar with the concept of heritage and its numerous forms. It will develop the contested character of heritage and why it needs to be conserved. More importantly the paper highlights how both tangible and intangible heritage needs to be accessed. Issues of loot and repatriation and heritage preservation and conservation in turn point out how heritage and culture often becomes tropes to status claims of a country, a nation, a society and a region in front of the international world community. Matters of selective preservation and conservation can be addressed. It seeks to familiarize students with the evolution of heritage legislation and how 'measures from above are not always arbitrary. In some cases they have been a reaction to demands from below. The paper hence would be of particular value to students who are interested in heritage by also highlighting the national significance (international and domestic) raising public consciousness and sensitivity to heritage preservation.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Explain the complex character of heritage.
- Analyse the historical processes which result in the making of heritage.
- Describe the significance of cultural diversity in the creation of heritage.
- Discuss the issues of ownership and legislation to prevent 'loss' of heritage.
- Assess initiative of government bodies and NGO's to conserve and preserve heritage given the prioritization of development as well as in 'conflict' ridden zones/spaces.
- Discuss the importance of heritage for the country, the communities, region and society at large.

SYLLABUS OF GE-3

Unit I: Defining Heritage: (12 Hours)

MEANING of antiquity'; 'archaeological site'; 'tangible and intangible heritage'; "art treasure". Regional case studies of intangible heritage—dances, music, dance drama, oral stories, theatre, folk performances etc—can be given to make the concept more clear.

Unit II: Issues of Loot and Repatriation: Heritage, Ownership and Legislation: (16 Hours)

1. Conventions and Acts—International and National.
2. Antiquity smuggling and repatriation.

Unit III: Heritage Preservation and Conservation: (16 Hours)

1. Development, conflict (specific case study of UNESCO site Nizamuddin Basti or any such space where both tangible and intangible heritage merge; Muziris heritage project etc).
2. Heritage related Government departments, museums and regulatory bodies.
3. Conservation initiatives.

Unit IV: Heritage Interpretation: (16 Hours)

1. Heritage, Modernity and memory.
2. Participatory Heritage, Exhibitions, Heritage walks etc.
3. Digitizing Heritage
4. Management tools for interpretive projects

Practical component (if any) - NIL

Essential/recommended readings

Unit I: The unit will introduce the meanings of heritage associated politics. For a better understanding students will be encouraged to engage with terms like the meaning of antiquity, archaeological site, tangible heritage, intangible heritage and art treasure. The challenges posed in conservation of intangible heritage: case studies of food culture (Old Delhi, Lucknow, Hyderabad, Calicut, Calcutta or any UNESCO heritage site in India) or folk theatre or art (madhubani, Gond etc) can be taken up.

- Charters and Conventions available on UNESCO and ASI websites. (www.unesco.org ; www.asi.nic.in)
- Keynote address by Bouchenaki, Mounir . ‘The Interdependency of the Tangible and Intangible Cultural Heritage.’ ICOMOS 14th General Assembly and Scientific Symposium
- Lahiri, N. (2012), Marshalling the Past—Ancient Indian and its Modern Histories. Ranikhet: Permanent Black (Chapter 4 and 5

37. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 38-1-1 dated 08.12.2022 regarding Syllabi of 2nd Semester of Skill Enhancement Courses (SECs)

Add the following:

**Skill Enhancement Courses (SECs)
Under
UGCF-2022
Listed under Appendix-II-A to the Ordinance V (2-A) of the Ordinances of the
University
(with effect from Academic Year 2022-23)**

A student who pursues any undergraduate programme in the University and its Colleges is offered a pool of Skill Enhancement Courses. A list of such courses as passed by the Executive Council in its meeting dated 08.12.2022 is as below:

| Sl.No. | Course Title | Total Credits:2 |
|---------------|---|------------------------|
| 1. | Apiculture | |
| 2. | Bioinoculants for Agriculture and Sustainable Development | |
| 3. | Early Child Care and Education Settings | |
| 4. | Healthy and Sustainable Food Choices | |
| 5. | Image Styling | |
| 6. | Content development and Media for Children | |
| 7. | Small Scale Catering | |
| 8. | Radiation Safety | |
| 9. | Chemistry Lab Operations and Safety Measures | |
| 10. | Chemistry of Cosmetics and Hygiene Products | |
| 11. | Basic Analytical Techniques | |
| 12. | Essential Food Nutrients | |
| 13. | Forensic Chemistry | |
| 14. | Green Methods in Chemistry | |

15. Lab Testing and Quality Assurance
16. Chemistry of Food Flavors and Colourants
17. PCB Designing and Fabrication
18. Electronic Product Testing
19. Culinary Science
20. Chocolate Crafts
21. Pasta and Patisserie Technology
22. Frozen Dessert Technology
23. Indian Snack Industry
24. Dairy Processing
25. Fruits and Vegetable Processing
26. Food Waste and By-Product Utilisation
27. Minimal Food Processing
28. Working with People
29. Life Skill Education
30. Participatory Learning and Action
31. Programme Media
32. Environmental impact and Risk Assessment
33. Sustainably Reporting
34. Environmental Auditing
35. Document Preparation & Presentation Software
36. Innovation and Entrepreneurship
37. IT Skills and Data Analysis – I
38. IT Skills and Data Analysis- II
39. R Programming for Business Analytics
40. Yoga in Practice
41. Floriculture
42. Mushroom Culture and Technology-I
43. Hydroponic and Aeroponic Farming
44. Viewing and Capturing Diversity in Nature
45. Plant Aromatics and Perfumery

46. Nursery Gardening and Landscaping
47. Horticulture
48. Mushroom Culture and Technology – II
49. Biofertilizers
50. Organic Farming
51. Green Belt Development for Smart Cities
52. Big Data Analytics-I
53. Big Data Analytics-II
54. Social Media Marketing
55. Design Thinking
56. Aquaculture Entrepreneurship
57. Bio-floc Technology
58. Fish Breeding and Larviculture
59. Formulation of Fish Feed
60. Ornamental Fish Culture: Opportunity and Scope
61. Pearl Culture
62. Sericulture-I: Mulberry Silkworm Rearing
63. Sericulture-II: Eri Silkworm Rearing
64. Sericulture-III: Silk Technology
65. Sericulture-IV: Application of Sericulture in Therapeutic and Cosmetic Industry

Apiculture

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Apiculture | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To help the student to become familiar with the significance of beekeeping as an economically viable industry.
- To help the student to understand the different species of honeybees, their biology, behaviour and role in pollination.
- To train the students to learn the techniques of honey bee rearing, optimization of techniques based on climate and geographical regions, and various measures to be taken to maximize the benefits.
- To understand the significance of beekeeping in the diversification of agriculture for the rural communities to increase their income and create employment opportunities and at the same time to develop entrepreneurial skills required for self-employment in the beekeeping sector.

Learning Outcomes

After studying this course, the students will be able to:

- Comprehend the various species of honey bees in India, their social organization and its importance.
- Appreciate the opportunities and employment in apiculture – in public, private and government sector.
- Gain thorough knowledge about the techniques involved in bee keeping and honey production.
- Make various products and by-products obtained from beekeeping sector and their importance.
- Develop entrepreneurial skills necessary for self-employment in beekeeping sector.
- Enhance collaborative learning and communication skills through practical sessions, teamwork, group discussions, assignments and projects.

Skill development and job opportunities

- After completion of this course students would obtain the training in collection, identification, and various ways/aspects of bee rearing.
- The students can also take a job as an apiary worker, often called a beekeeper, manage colonies of honeybees for the production of honey as well as pollination services.
- The course would also provide a basic training to enable the students to construct hives and replace combs.
- Enhance entrepreneurial skills by collecting and packaging hive products including honey, beeswax and pollen.
- Make decisions on yards, treatment, splits, honey harvesting and all other beekeeping decisions.

- Identify and report hive health concerns.

SYLLABUS (Practical)

Unit 1: Biology of Bees

16 hours

Historical background of apiculture, classification and biology of honey bees, Social organization of bee colony, behavioral patterns (bee dance, swarming).

Practical Exercises:

1. Study of the life history of honey bees: *Apis cerana indica*, *Apis mellifera*, *Apis dorsata*, *Apis florea*, *Melipona* sp. from specimen/ photographs - Egg, larva, pupa, adult (queen, drone, worker).
2. Study of morphological structures of honey bees through permanent slides/photographs—mouthparts, antenna, wings, sting apparatus and temporary mount of legs (antenna cleaner, mid leg, pollen basket).
3. Study of natural beehive and identification of queen cells, drone cells and brood.

Unit 2: Rearing of Bees

18 hours

Artificial Bee rearing (Apiary), Beehives – Newton and Langstroth; Bee Pasturage; Selection of bee species for apiculture – *Apis cerana indica*, *Apis mellifera*; Bee keeping equipment methods of extraction of honey (Indigenous and Modern) & processing; Apiary management - Honey flow period and lean period, effects of pollutants on honeybees.

Practical Exercises:

1. Distinguishing characters of workers of three bee species.
2. Importance of site selection for bee keeping.
3. Study of an artificial hive (Langstroth/Newton), its various parts and beekeeping equipment: draw diagrams of bee boxes proportionate to the body size and measure the body length and wing size.
4. Preparation of mount of pollen grains from flowers.

Unit 3: Diseases and Enemies

10 hours

Bee diseases control and preventive measures: enemies of bees and their control.

Practical Exercises:

1. Diagnosis of honeybee diseases: Protozoan diseases, Bacterial diseases, Viral diseases (one each)- symptoms, nature of damage and control.
2. Identification of honeybee enemies: Predators-Insects and non-insects.

Unit 4: Bee Economy

8 hours

Products of apiculture industry (Honey, Bees Wax, Propolis, Royal jelly, Pollen etc.) and their uses; Modern methods in employing artificial Beehives for cross pollination in horticultural gardens-stationary and migratory bee keeping.

Practical Exercises:

1. Video demonstration of wax extraction and preparation of comb foundation sheets.
2. Analysis of honey – purity, physical and biochemical parameters (any two constituents).
3. Study of bee pasturage – visit to fields/gardens/orchards for studying the bee activity (role in pollination, nectar collection, videography of honeybee activity) and preparation of herbarium of nectar and pollen yielding flowering plants (floral mapping).

Unit 5: Entrepreneurship in Apiculture

8 hours

Bee keeping industries – Recent advancements, employment opportunities, economics in small and large-scale beekeeping, scope for women entrepreneurs in beekeeping sector, study of development

programs and organizations involved in beekeeping in India.

Exercise:

1. Visit to an apiary/honey processing unit/institute and submission of a report.

Essential/Recommended readings

Singh, S. (1962). Beekeeping in India, Indian Council of Agricultural Research, New Delhi.

Mishra, R.C. (1995). Honeybees and their management in India. Indian Council of Agricultural Research, New Delhi.

Prost, P. J. (1962). Apiculture. Oxford and IBH, New Delhi.

Rahman, A. (2017). Beekeeping in India. Indian Council of Agricultural Research, New Delhi.

Gupta, J.K. (2016). Apiculture, Indian Council of Agricultural Research, New Delhi.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

BIOINOCULANTS FOR AGRICULTURE AND SUSTAINABLE DEVELOPMENT

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|----------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| BIOINOCULANTS FOR AGRICULTURE AND SUSTAINABLE DEVELOPMENT | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To make students aware of the role of microorganisms in sustainable development and remediation.
- To develop their own biofertilizers and other kinds of bio-inoculants for use in agriculture and environment.
- Skill development in initiating a bioinoculant-based low cost startup.

Learning outcomes

After studying this course, the students will be:

- Able to identify the role of microbes in sustainable development and how microbes can be used in remediation of damaged environments.
- Skilled in isolating microorganisms from a variety of different sites. Will learn Selection, purification and preservation of useful cultures.
- Skilled in formulating bioinoculants and test its efficacy.

SYLLABUS

Practical

Unit 1

20 hours

Introduction and scope of bioinoculants: Biofertilizers: success story – biofertilizer production under ICAR - How Biofertilizers for Corn Went Commercial. Biopesticides: success story of using biopesticides for nematode management in horticultural crops. Bioinoculants as a solution to the problem of parali (stubble) burning: case study of “PUSA Decomposer”. Bioinoculants for reforestation. Bioinoculants for the reclamation of waste lands having alkaline, acidic, heavy metal-contaminated soils. Bioinoculants for clearance of oil spills. Mycorrhizal inoculants. Some important commercially available bioinoculants.

Unit 2**28 hours**

Isolation of microorganisms for the preparation of bioinoculants: Isolation of phosphate solubilizers, free-living nitrogen fixers, heavy metal-accumulating microbes, alkalophiles, acidophiles from suitable soil samples. Observation of colony morphology and microscopic structure of selected microbes and preservation of these cultures in slants and glycerol stocks.

Unit 3**12 hours**

Formulation of bioinoculant using selected microbes (student group project): Culturing of selected microbes from those isolated, and formulating them into a bioinoculant. Preparation of workflow for evaluating efficacy in potted plants and in fields, for determining shelf life, and stability.

Essential/Recommended readings

1. Microbiology: A Lab Manual by J. G. Cappuccino and C. T. Welson. 12th edition.
2. Pearson. 2020.
3. Bio-inoculants as prospective inputs for achieving sustainability: Indian Story by C. Gupta et al. Economic Affairs. Vol. 65, No. 1, pp. 31-41. 2020.
4. Bioinoculants for bioremediation applications and disease resistance: Innovative Perspectives by T. Chaudhary and P. Shukla. Indian J Microbiol. 59 (2): 129–136. 2019.
5. Remediation of metalliferous soils through the heavy metal resistant plant growth promoting bacteria: paradigms and prospects by M. Ahemad. Arabian Journal of Chemistry, 12 (7);1365-1377. 2019.
6. Laboratory manual of Microbiology and Biotechnology by K.R. Aneja. 2nd edition. Scientific International Pvt. Ltd., Delhi. 2018.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Early Child Care and Education Settings

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Early Child Care and Education Settings | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand the significance of early childhood years and the importance of ECCE
- To understand developmental milestones and delays in development
- To plan, organize and create care facilities and developmentally appropriate material for infants and young children.
- To be acquainted with the ECCE centre, its daily routine, requirements, functioning and evaluation of the programme.
- To trace the progression of children in early childhood setting

Learning outcomes

After studying this course, the student will be able to:

- Explain the significance of early childhood development and ECCE
- Become familiar with developmental milestones and learn to assess children in early years.
- Understand, plan and organize care activities for young children
- Prepare activities and aids for fostering development in the early years
- Learn about evaluation of an ECCE programme

SYLLABUS

Unit 1: Importance of early years and significance of ECCE

20 hours

The unit will help to develop an understanding on the concept and importance of ECCE

- Meaning and objectives of ECCE and importance of early years

- Norms and developmental milestones of infants and young children
- Observations, developmental checklists and developmental delays
- Nurturing care framework and early childcare practices
- Review of existing ECCE programmes and policies in India

Unit 2: Developmentally appropriate activities for young children 20 hours

The unit will focus on ways to promote development during early years through play and exploratory activities.

- Care and stimulation activities for infants and young children
- Plan and prepare multi-sensory materials and activities to promote development across domains: Physical motor, socio-emotional, cognitive and language development
- Use of music, dance, drama, storytelling, puppetry, rhymes/poems and art and craft
- Importance of- Indoor and outdoor activities; individual and group activities; free play and guided play; circle time
- Activities for school readiness

Unit 3: Components of ECCE Programme 20 hours

The unit will focus on the understanding of infrastructure, materials and equipment, curriculum development and assessing the development of children.

- Daily routines in child care and preschool centres
- Creating safe spaces for children: Organizing indoor and outdoor material and equipment
- Understanding the ECCE curriculum: Developing daily, weekly and monthly plans
- Assessing children's development across domains
- Indicators of a quality ECCE centre

Essential/Recommended Readings

- ECCE National Curriculum Framework-

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Healthy and Sustainable Food Choices

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title& Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Healthy and Sustainable Food Choices | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To identify healthier food options
- To understand portion control for foods
- To demonstrate skill for preparing healthy and nutritious dishes
- To link sustainability with healthy food choices

Learning Outcomes

After studying this course, the student will be able to:

- Select and prepare healthier food options
- Relate the influence of food environment on food choices
- Comprehend the importance of sustainable food choices

SYLLABUS

Unit 1: Healthy food choices

12 hours

Identification of healthy and unhealthy foods and Understanding the immediate food environment

- Food labels and basics of nutrient profiling models to classify foods as HFSS
- Nutrient profiling of commonly consumed food items
- Exploring the food environment by mapping the food outlets and food available near home and college

Unit 2: Food portion sizes and related factors

12 hours

Understanding food portion sizes and its relation to nutrient density

- The concept of portion/serving sizes and portion control
- Estimation of energy and nutrient density of selected food products using nutrient composition database

Unit 3: Basics of food preparation

20 hours

Planning and preparation of healthy and nutritious dishes

- Planning and preparation of the following:
 - Snacks
 - Soups and Salads
 - Desserts
 - Meal combinations

Unit 4: Sustainability and healthy food

16 hours

Linking the concept of healthy eating with sustainability

- Identification of nutritious food sources which have minimal impact on the environment
- Case study on understanding food supply chain and carbon footprints of any commonly consumed foods

Essential/Recommended readings

- Chadha R and Mathur P (2015). Nutrition - A Lifecycle Approach. New Delhi: Orient Blackswan Pvt Ltd.
- Longvah T, Ananthan R, Bhaskarachary K and Venkaiah K (2017). Indian Food Composition Tables. National Institute of Nutrition, Indian Council of Medical Research, Department of Health Research, Ministry of Health and Family Welfare, Government of India, Hyderabad.
- Khanna K, Gupta S, Seth R, Mahna R, Rekhi T (2004). The Art and Science of Cooking: A Practical Manual, Revised Edition. New Delhi: Elite Publishing House Pvt Ltd.

Note: Learners are advised to use the latest edition of readings.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Image Styling

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------|---------|-----------------------------------|----------|------------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Image Styling | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To strengthen the student's hands on experience in using different tools of improving the visual and non-visual appearance
- To train the students with technical and professional ways of understanding wardrobe needs and their development
- To develop skills in understanding fashion trends for planning personal shopping .

Learning Outcomes

After studying this course the student will be able to:

- Demonstrate the practical ways to strengthen physical image based on body type, face shape and personal style analysis.
- Understand the effect of elements and principles of design on visual appearance.
- Explain the fashion trends of apparel and accessories.
- Identify wardrobe elements and the processes of planning and organization.
- Plan personal shopping of apparel and accessories based on physical traits, personal style and budget.

SYLLABUS

Practical

Unit 1: Physical traits and analysis

16 hours

Learning the first step in styling by developing skills to analyze individual characteristics such as body type, proportions, face shapes etc.

Subtopics:

- Body types
- Body proportion
- Face shapes
- Personal colour analysis

Unit 2: Application of elements and principles of design for image styling **16 hours**

Understanding the basics of design by learning about the various elements and principles of design, their role in the success of a design, and their importance in personal styling.

Subtopics:

- Effects of design elements and principles on clothing and visual appearance
- Effect of garment components on visual appearance

Unit 3: Wardrobe planning **12 hours**

Learning the skills of wardrobe planning, analysis and management as per apparel and accessory needs.

Subtopics:

- Wardrobe analysis
- Wardrobe essentials
- Organization and categorization of wardrobe
- Elements of a basic wardrobe
- Optimising wardrobe and budgeting

Unit 4: The business of styling **16 hours**

Understand the working of styling business. Developing the art of styling. Analyzing the present market trends.

Subtopics:

- Dress vs Style
- Analysis of trends of apparels and accessories
- Survey of apparel and accessory stores/ brands with respect to style, size and price.
- Types of stylists: Freelance stylists, Celebrity stylists, Editorial stylists
- Marketing your business
- Forms and Contracts

Essential Readings

- Constantine, S. & Woodall, T. *The Body Shape Bible: Forget Your Size Discover Your Shape Transform Yourself*, published by Weidenfeld & Nicolson (1877), ASIN: B01K14NWB8
- Funder, D.C. 2001, *The Personality Puzzle (2nd ed)*, New York: W.W. Norton
- Phares, J.E. 1991, *Introduction to Personality (3rd ed)*, New York: Harper Collins
- Rasband, J. *Wardrobe Strategies for Women*, published by Fairchild Books; Student edition (September 18, 2001), ISBN-10: 1563672596

Suggested Readings

- Baumgartner, J. *You are What You Wear*, Da Capo Press (2012)
- Mc Call, *Sewing in Color*, Hamlyn Publishing Group 11th edition (1975)
- Romano, C. *Plan your Wardrobe*, New Holland Publishers (1998)
- Vega, L. *The Image of Success*, American Management Association (2010)

Note: Learners are advised to use the latest edition of readings.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Content Development and Media for Children

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|------------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Content development and Media for Children | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To explore and review current trends in media and content for children
- To plan developmentally appropriate media and content for children
- To create culturally appropriate content for learning

Learning Outcomes

After studying this course, the student will be able to:

- Identify forms of content and media available for children
- Understand the impact of content and media on thoughts, attitudes and values of children
- Create age-appropriate content and media for children

SYLLABUS

Unit 1: Content for children: Relationship and interaction

20 hours

This unit will cover the different forms of content available to children and will create a linkage between children, content and context

- Exploring different forms of content for children (exposure to history and folk forms)
- Children's usage and significance of print, audio visual content
- Review and analysis of available content for children
- Enabling parents/caregivers to be able to use content appropriately with children

Unit 2: Media for Children

20 hours

This unit will discuss the different forms of media available to children in the contemporary context and also focus on advances in media technology

- Different media forms available for children

- Children's use and significance of media forms
- Assessing the portrayal of children in media; assessing the quality of Print, App or TV program, website, film
- Media literacy for children, parents and caregivers

Unit 3: Developing content and media for children

20 hours

This unit will enable students in developing content and media for children.

- Scripting for children: content and structure; Literature for and by children; Writing stories/poems for children (significance of humour, wonder, logic)
- Music/ Dance/Theatre/puppetry as sources for content development and dissemination
- Creating age-appropriate content for:
 - Developmental and domain specific needs
 - Children activity box/ Preschool Kit
 - Interactive Mobile applications/Digital content

Essential readings

- Condry, J. (1989). *The Psychology of Television*. Lawrence Erlbaum, Associates, Inc.
- Daniel, A.K. (2012). *Storytelling across the Primary Curriculum*. London: Routledge.
- Engel, S. (1999). *The Stories Children Tell: Making Sense of the Narratives of Childhood*. USA: W.H.. Freeman and Company.
- Honig, A. (1983). *Television and young children*. Young children 38(4).

- Livingstone, S. (2002). *Young People and New Media*. New Delhi: Sage
- Prakash, S. & Mathur, P. (2000). *Children and TV*. NCERT,
- Real, M. R. (1996). *Exploring Media Culture*. New Delhi: Sage
- Singer D.G. & Jerome L. (2012). *Handbook of Children and Media*. California: Sage.

Suggestive Readings:

- Calvert, S.L. & Wilson, B.J. (2008). *The Handbook of Children, media and Development*. United Kingdom: Blackwell Publishing.
- Jordan, A.B. & Romer, D. (2014). *Media and the Well-Being of Children and Adolescents*. New York: Oxford University Press.

Note: Learners are advised to use the latest edition of readings.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Small Scale Catering

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title& Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Small Scale Catering | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To comprehend fundamentals of menu planning through management of resources in a food service establishment.
- To develop insight for recipe standardization and to apply acquired skills in menu planning and quantity food production.
- To use knowledge of preliminary steps for starting a small-scale catering unit.

Learning Outcomes

After studying this course, the student will be able to:

- Comprehend fundamentals of menu planning through management of resources in a food service establishment.
- Develop insight for recipe standardization.
- Apply acquired skills in menu planning and quantity food production
- Use the knowledge of preliminary steps for starting a small-scale catering unit.

SYLLABUS

Unit 1: Introduction to Food Service

12 hours

Kinds of food service establishments, kinds of food service outlets

- Market survey of various food products raw and processed in different kinds of markets.
- Survey of a nearby small-scale catering unit

Unit 2: Food Production

32 hours

- Menu planning: Importance of menu, factors affecting menu planning, types of menus, menu planning for different kinds of food service units, features of good menu card
- Basics of food purchase, receiving and storage
- Quantity food production: standardization of recipes, quantity food preparation techniques, recipe adjustments and portion control
- Hygiene and Sanitation

- Planning menus within specified budget for the following:
- Menu for a birthday party/ nursery school.
 - Packed tiffin lunch for MNC employees.
 - Cyclic menu for catering breakfast, lunch and dinner for PG/ hostel girls.

- ☐ Evaluation of menu card
- ☐ Visit to a small-scale catering unit
- ☐ Use of computers in inventory and billing
- ☐ Standardization of a recipe
- ☐ Scaling up of recipe for large number of customers (75)
- ☐ Food stall/ event catering
- ☐ Demonstration of specific dishes for entrepreneurial set up
- ☐ Use of checklist to assess implementation of good hygiene and sanitation practices in a small-scale catering unit

Unit 3: Planning of a Food Service Unit

16 hours

- Preliminary planning: survey of types of units, identifying clientele, menu, operations and delivery
- Planning the set up:
 - Identifying resources (money, manpower, time, facilities, equipment, utilities, types of kitchen areas, flow of work and work area relationship), types of services and delivery system, business registration
 - Basics of Finance (Components of cost and factors affecting them, determining the selling price)
- Market survey/visit for equipment
- Development of a business plan

Essential/Recommended Readings

- Desai V. (2011) The Dynamics of Entrepreneurial Development and Management, Himalaya Publishing House Pvt. Ltd., Mumbai.
- Mohini, S. (2005) Institution Food Management New Age International Publishers.
- West, B.B.& Wood, L. (1988) Food Service in Institutions 6th Edition Revised By Hargar FV, Shuggart SG, &Palgne Palacio June, Macmillan Publishing Company New York.

Suggested Readings

- Knight, J.B. & Kotschevar, L.H. (2000) Quantity Food Production Planning & Management 3rd edition John Wiley & Sons.
- Payne-Palacio, J. & Theis, M. (2011) Foodservice Management: Principles and Practice 12th edition.
- Taneja, S. & Gupta, S. L. Entrepreneur Development- New Venture Creation. GalgotiaPublishing Company

Note: Learners are advised to use the latest edition of readings.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

RADIATION SAFETY

| Course Title and Code | Credits | Credit distribution of the course | | | Eligibility Criteria | Pre-requisite of the course |
|-----------------------|---------|-----------------------------------|----------|-----------|--|-----------------------------|
| | | Lecture | Tutorial | Practical | | |
| Radiation Safety | 2 | 1 | 0 | 1 | Class XII pass with Physics and Mathematics as main subjects | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To focus on the applications of nuclear techniques and radiation protection.
- To not only enhance the skills towards the basic understanding of the radiation but also provide the knowledge about the protective measures against radiation exposure.
- To impart all the skills required by a radiation safety officer or any job dealing with radiation such as X-ray operators, jobs dealing with nuclear medicine: chemotherapists, operators of PET, MRI, CT scan, gamma camera etc.

Learning Outcomes:

After studying this course, the student will be able to:

- Understand and use the applications of nuclear techniques and radiation protection to guard against nuclear radiation hazards.
- Understand and use the units of radiations and their safety limits, the devices to detect and measure radiation.
- Understand and use radiation safety management, biological effects of ionizing radiation, operational limits and basics of radiation hazards evaluation and control, radiation protection standards,
- Use the devices which apply radiations in medical sciences, such as X - r a y, MRI, PET, CT-scan with the required safety measures.

SYLLABUS

THEORY COMPONENT

Unit 1:

6 hours

Radiation and its interaction with matter: Basic idea of different types of radiation electromagnetic (X-ray, gamma rays, cosmic rays etc.), nuclear radiation and their origin.

Nuclear Radiation: Basic idea of Alpha, Beta, Gamma neutron radiation and their sources (sealed and unsealed sources).

Interaction of Charged Particles (including alpha particles): Heavy charged particles (e.g. accelerated ions) - Beth-Bloch Formula, Scaling laws, Mass Stopping Power, Range, Straggling.

Interaction of Beta Particles: Collision and Radiation loss (Bremsstrahlung).

Interaction of Photons: Linear and Mass Attenuation Coefficients.

Interaction of Neutrons: Collision, slowing down and Moderation.

Unit 2:**4 hours**

Radiation detection and monitoring devices: Basic concepts and working principle of gas detectors, Scintillation Detectors, Solid State Detectors and Neutron Detectors, Thermo- luminescent Dosimetry.

Radiation Quantities and Units: Basic idea of different units of activity, KERMA, exposure, absorbed dose, equivalent dose, effective dose, collective equivalent dose, annual limit of intake (ALI) and derived air concentration (DAC).

Unit 3:**2 hours**

Radiation Units, dosage and safety management: Basic idea of different units of activity, KERMA, exposure, absorbed dose, equivalent dose, effective dose, collective equivalent dose, annual limit of intake (ALI) and Derived air concentration (DAC).

Radiation safety management: Biological effects of ionizing radiation, Operational limits and basics of radiation hazards, its evaluation and control: radiation protection standards.

Unit 4:**3 hours**

Application of radiation as a technique: Application in medical science (e.g., basic principles of X-rays, MRI, PET, CT scan, Projection Imaging Gamma Camera, Radiation therapy), Archaeology, Art, Crime detection, Mining and oil. Industrial Uses: Tracing, Gauging, Material Modification, Sterilization, Food preservation.

PRACTICAL**30 hours**

Minimum five experiments need to be performed from the following, graphs to be plotted using any graphical plotting software

- 1) Estimate the energy loss of different projectiles/ions in Water and carbon, using SRIM/TRIM etc. simulation software, (different projectiles/ions to be used by different students).
- 2) Simulation study (using SRIM/TRIM or any other software) of radiation depth in materials (Carbon, Silver, Gold, Lead) using H as projectile/ion.
- 3) Comparison of interaction of projectiles with $Z_P = 1$ to 92 (where Z_P is atomic number of projectile/ion) in a given medium (Mylar, Carbon, Water) using simulation software (SRIM etc).
- 4) SRIM/TRIM based experiments to study ion-matter interaction of heavy projectiles on heavy atoms. The range of investigations will be $Z_P = 6$ to 92 on $Z_A = 16$ to 92 (where Z_P and Z_A are atomic numbers of projectile and atoms respectively). Draw and infer appropriate Bragg Curves.
- 5) Calculation of absorption/transmission of X-rays, γ -rays through Mylar, Be, C, Al, Fe and $Z_A = 47$ to 92 (where Z_A is atomic number of atoms to be investigated as targets) using XCOM, NIST (<https://physics.nist.gov/PhysRefData/Xcom/html/xcom1.html>).
- 6) Study the background radiation in different places and identify the source material from gamma ray energy spectrum. (Gamma ray energies are available in the website <http://www.nndc.bnl.gov/nudat2/>).
- 7) Study the background radiation levels using Radiation meter.
- 8) Study of characteristics of GM tube and determination of operating voltage and plateau length using background radiation as source (without commercial source).
- 9) Study of counting statistics using background radiation using GM counter.
- 10) Study of radiation in various materials (e.g. KSO₄ etc.). Investigation of possible radiation in different routine materials by operating GM counter at operating voltage.
- 11) Study of absorption of beta particles in Aluminum using GM counter.
- 12) Measurement of gamma ray attenuation co-efficient of aluminium using GM counter.
- 13) Estimation of half thickness for aluminium using GM Counter.

Essential Readings:

- Basic ideas and concepts in Nuclear Physics: An introductory approach by K Heyde, third edition, IOP Publication, 1999.
- Nuclear Physics by S N Ghoshal, First edition, S. Chand Publication, 2010.
- Nuclear Physics: Principles and Applications by J Lilley, Wiley Publication, 2006.
- Fundamental Physics of Radiology by W J Meredith and B Massey, John Wright and Sons, UK, 1989.
- An Introduction to Radiation Protection by A Martin and S A Harbisor, John Willey and Sons, Inc. New York, 1981.

Suggestive Readings:

- Radiation detection and measurement by G F Knoll, 4th Edition, Wiley Publications, 2010.
- Techniques for Nuclear and Particle Physics experiments by W R Leo, Springer, 1994.
- Thermoluminescence dosimetry by A F Mcknlly, Bristol, Adam Hilger (Medical Physics Hand book 5
- Medical Radiation Physics by W R Hendee, Year book Medical Publishers, Inc., London, 1981.
- Physics and Engineering of Radiation Detection by S N Ahmed, Academic Press Elsevier, 2007.
- IAEA Publications: (a) General safety requirements Part 1, No. GSR Part 1 (2010), Part 3 No. GSR Part 3 (Interim) (2010); (b) Safety Standards Series No. RS-G-1.5 (2002), RS-G-1.9 (2005), Safety Series No. 120 (1996); (c) Safety Guide GS-G-2.1 (2007).

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Chemistry Lab Standard Operations and Safety Measures

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-------------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemistry Lab Operations and Safety Measures | 2 | 0 | 0 | 2 | XII th Pass with Science | NIL |

Learning Objectives

- To cultivate efficient working skills among the students to work in a chemistry laboratory
- To create a trained workforce which can responsibly learn imbibe and explore verticals on structured knowledge safely.
- To make students aware of different chemicals and their properties being used in the chemistry laboratory.

Learning outcomes

After studying this course, the student will be:

- Able to design and implement safe working practices in chemistry laboratory.
- Able to safely handle different glass apparatus
- Able to handle the chemicals and equipment safely and properly.
- Able to design working protocols related to various methods and instruments in chemistry laboratory.

SYLLABUS

Practicals/ Hands-on Training:

(60 hours)

Part A: Safety Measures

- 1) Design an illustrative chart exhibiting creativity at transaction of Do's and Don'ts instructions for working in a chemistry laboratory.
- 2) i. Carry out Classification and labeling of the given set of chemicals based upon Globally Harmonized System.
ii. Carry out detailed survey of the Chemical Abstract Service (CAS) Registry Number and identify the given set of CAS RN and explain the different sections of CAS RN.
- 3) Carry out preparation of the indicative MSDS (Material Safety Data Sheet) of given set of chemicals as per Standard MSDS format.
- 4) Design an illustrative chart exhibiting creativity at transaction of Common Safety Symbols along with its description. Associate appropriate safety symbol with each of the given set of chemicals.

- 5) Draw and elucidate the National Fire Protection Association Hazard Labels.
- 6) i. Identify and enlist the Incompatible Chemicals from a given set of chemicals available in the laboratory.
ii. Carry out investigations on Labeling and storage of Chemical in laboratory.
- 7) i. On the basis of MSDS analysis, identify the required storage conditions for the given set of chemicals.
ii. Describe procedure for the storage, maintenance and handling of compressed gas cylinders.
iii. Explore guidelines for the Storage of shelf chemicals and reagents.
- 8) i. Carry out a brief review of common pathways by which working Chemicals can enter the Body.
ii. Carry out a detailed study of the Limits of Exposure of given Chemicals.
- 9) i. Classify the Hazard based on storage, handling, and disposal of chemicals.
ii. Identification and describe handling protocols for Substances with Greater Hazardous Nature.
- 10) Carry out detailed investigations on procedural protocols for safe Disposal of Chemicals.
- 11) i. Carry out study on recommended Safety and Emergency Equipment essential for the safe practices in a Chemistry Laboratory.
ii. Study the guidelines in the Event of a Chemical Accident or Spill.
- 12) i. Write detailed description on Fire Safety in the laboratory.
ii. Carry out investigations of the data regarding Institute Safety Policies: Safety Audits / Inspections.

Part B: Chemistry Lab Standard Operations

- 1) Carry out exploration on Holding, Handling and use of Common Laboratory Apparatus as per given list of laboratory apparatus (Appendix A).
- 2) Carry out investigations of various types of apparatus in labs based on material they are made of such as Pyrex Glass (borosilicate Glass) Apparatus, Fused Silica Apparatus: Corning Vycor Glass, Porcelain apparatus, Plastic Apparatus, Metal Apparatus.
- 3) Understanding the protocol of Cleaning and drying and polishing of Glassware apparatus.
- 4) Carry out detailed investigations on Identification, diagrammatic representation, set up of Apparatus assemblies and details exploration on operational procedural protocols for glassware apparatus with Interchangeable ground glass joints: Typical Assemblies.
- 5) i. Carry out calibration of Volumetric/ Graduated Glassware Apparatus along with description on Temperature Standards.
ii. Carry out Calibration of thermometers.
- 6) i. Carry out exploration and investigations of working protocol for various heating equipment in laboratory: Burners, Hot Plates, Electrical Heating Mantles, Electric Oven,

- Microwave Oven, Muffle Furnace, Infrared lamps, Crucible and Beaker Tongs and Emersion heaters.
- ii. Carry out exploration and investigations of working protocol for various Stirring apparatus in laboratory: Stirring rods; Policeman, Boiling rods, Use of Mechanical agitation-Magnetic Stirrer and Mechanical Shaker.
 - iii. Carefully analyze the Glass, Cork and Rubber Stoppers and investigate their preparation and appropriate applications.
- 7) i. Carry out detailed investigations of Heating and Cooling Bath, and determine their working ranges and working protocols.
 - ii. Explore and differentiate between different forms of water for Laboratory Use: Distilled (Grade I to III), De-ionized and tap water, and carry out conductance measurement /other analytical investigations for the differentiation purpose.
- 8) i. Differentiate among Various types of Filter Paper and explore their applications.
 - ii. Preparation of a fluted filter paper and its advantages.
 - iii. Classification of reagents as AR/ GR grade.
- 9) i. Care and Use of Analytical Balance: Mass and Weight, Two-Pan Balance and Electronic Balance.
 - ii. Carry out Calibration of weighing balances and accuracy in measurement.
- 10) Introduction to Chromatographic adsorption: Paper and Thin Layer Chromatography. Preparation of Thin Layer Chromatography (TLC) Plates.
- 11) i. Use of melting point apparatus. Experimental determination of the melting point using various methods.
 - ii. Experimental determination of the boiling point using various methods.
- 12) To Purify given organic solvents.
- 13) i. Hand on training for working with typical assemblies of apparatus for distillation and refluxing.
 - ii. Assessment of Fire hazards attending the distillation of inflammable solvents.
- 14) i. Purification of given solid organic compounds by crystallisation method.
 - ii. Recrystallization of given non-volatile organic solids and outline the Difficulties encountered in recrystallization process.
- 15) Removal of traces of colouring matter and use of decolourising carbon.
- 16) i. Carry out exploration and investigations of working and working protocol for Filtration Apparatus: Filtration with suction.
 - ii. Explore and imbibe knowledge about types of Vacuum Pump; Water and Oil Pump and their applications.
- 17) Investigate Conventions for Drying of the recrystallized material.
- 18) i. Introduction to Gas absorption traps and their importance.
 - ii. Recrystallization in an atmosphere of inert gas.

- 19) i. Performing Evaporation of the solvent in the laboratory.
 - ii. Preparation of anhydrous liquids or solutions of organic compounds in organic solvents.
- 20) i. Various procedures for the precipitation and washing of the precipitates.
 - ii. Application of various methods and instruments for drying of solid organic compounds.
- 21) i. Incineration of Filter paper with precipitate.
 - ii. Differentiate between various types of centrifugation methods, principle, uses and application of centrifugation method.
 - iii. Calculation of yields for different chemical processes.
- 22) In-depth Understanding and Preparation of Chemical Laboratory Reagents.
- 23) Explore methodologies of Preparation and Storage of Standard Solutions.

Important Instruction Note on working approach:

A minimum of 5 exercises from Part A and 10 exercises from Part B is required to be discussed/performed/investigate. Moreover, exercises related to MSDS, CASRN safety symbols identification is required to be performed mandatorily.

Mandatory exercises:

Part A Exercise No.: 2, 3, 4, 5 and 9

Part B Exercise No.: 1 to 10.

The exercises mentioned above will be performed by the student strictly in accordance with the instructions received and only under the supervision of the teacher concerned.

Essential Readings:

1. Skoog D.A., West D.M., Holler F.J., Stanley R.C., **Fundamentals of analytical chemistry**, 9th Edition, Cengage Learning.
2. Mendham, J.; Denney, R.C.; Barnes, J.D.; Thomas, M.J.K. (2007), **Vogel's Quantitative Chemical Analysis**, 6th Edition, Prentice Hall.
3. Furniss, B. S; Hannaford, A. J.; Smith, Peter W. G.; Tatchell, A. R; **Vogel's Text Book of Practical Organic Chemistry**, 5th Edition, Longman Scientific and Technical, Longman Group Ltd.
4. Garland, C. W.; Nibler, J. W.; Shoemaker, D. P. (2003), **Experiments in Physical Chemistry**, 8th Edition, McGraw-Hill, New York.
5. <https://iupac.org/>
6. <https://edu.rsc.org/resources/practical/experiments>

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Chemistry of Cosmetics and Hygiene Products

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|-------------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemistry of Cosmetics and Hygiene Products | 2 | 0 | 0 | 2 | XII th Pass with Science | NIL |

Learning Objectives

- To introduce the concept of cosmetics in terms of chemistry and their formulation.
- To make students understand the role of each ingredients in the preparation of the cosmetic products.
- To give an idea about the role of herbal ingredients in the making of any cosmetic product.

Learning Outcomes

After studying this course, the student will:

- Be familiar with the basic principles of various cosmetic formulations
- Be aware of different ingredients and their roles in cosmetic products.
- Appreciate the role of herbal ingredients in various cosmetic products
- Use safe, economic and body-friendly cosmetics
- Prepare new innovative formulations to achieve the aimed efficacies and effects

SYLLABUS

Practicals/Hands-on-training

60 hours

1. Definition, History and Classification of cosmetic & cosmeceutical products.

Skin Care Products: Basic structure and function of skin. Principles of formulation of skin care products. Role of herbs in Skin Care: Aloe and turmeric. General Ingredients and preparation of

(a) Preparation of Talcum powder (chemical based and herbal)

(b) Face cream/ vanishing cream/ cold cream/ suntan cream/lather shaving cream (any two)

(c) Body lotion

2. Hair Care Products: Basic structure of hair and classification of hair. Principles of formulation of Hair care products. Types of shampoo and conditioners. Role of herbs in Hair care: Henna and amla. Role of primary and secondary surfactants in shampoo. General Ingredients and preparation of

(a) Shampoo (chemical based and herbal)

(b) Conditioners

3. Hand Care and hygiene Products: Principles of formulation of hand sanitizers and hand wash. General Ingredients and preparation of:

(a) Hand wash

(b) Hand sanitizer

4. Nail preparation: Structure of nail, Nail lacquers, Nail polish remover. General Ingredients and preparation of:

(a) Nail polish and nail polish remover

5. Personal hygiene products: Total fatty matter, alkali content and pH of soaps. Bathing soap and toilet soap. Antiperspirants and deodorants. General Ingredients and preparation of

(a) Soaps

(b) Cream Soaps

6. Oral hygiene products: Common problem associated with teeth and gums. Role of herbs in oral care: Neem and clove. Principles of formulation of Oral hygiene products. Flavours and essential oils. General Ingredients and preparation of

(a) Tooth powder (chemical based and herbal)

(b) Tooth paste

Essential Readings

- Barel, A.O.; Paye, M.; Maibach, H.I. (2014), **Handbook of Cosmetic Science and Technology**, CRC Press.
- Garud, A.; Sharma, P.K.; Garud, N. (2012), **Text Book of Cosmetics**, Pragati Prakashan.
- Gupta, P.K.; Gupta, S.K. (2011), **Pharmaceutics and Cosmetics**, Pragati Prakashan
- Butler, H. (2000), **Poucher's Perfumes, Cosmetic and Soap**, Springer

Suggestive Readings:

- Flick, E.W. (1990), **Cosmetic and toiletry formulations**, Noyes Publications / William Andrew Publishing.
- Natural Ingredients for Cosmetics; EU Survey 2005
- Formulation Guide for cosmetics; The Nisshin OilliO Group, Ltd.

- Functional Ingredients & Formulated Products for Cosmetics & Pharmaceuticals; NOF Corporation

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Basic Analytical Techniques

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------|---------|-----------------------------------|----------|------------------------|-------------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basic Analytical Techniques | 2 | 0 | 0 | 2 | XII th Pass with Science | NIL |

Learning Objectives

- To make students aware of the importance and the concepts of chemical analysis of water and soil samples collected from different sources
- To make them learn few techniques like chromatography, analytical techniques and instrumentation techniques, for example: spectrophotometry and flame photometry.

Learning Outcomes

After studying this course, the student will be able to:

- Handle analytical data
- Determine the pH and conductance of soil samples, which can be useful in agriculture sector
- Do quantitative analysis of metal ions in water samples
- Separate ions using chromatographic techniques
- Estimate macronutrients using Flame photometry.

SYLLABUS

Practical:

60 hours

1. Determination of pH of soil samples collected from college nursery, sports ground and the soil collected from Yamuna River Bank.
2. Determination of conductance of soil samples collected from college nursery and sports ground.
3. Determination of pH of different types of aerated drinks and fruit juices.
4. Estimation of Calcium and Magnesium ions as Calcium carbonate (total hardness) by complexometric titration.
5. Determination of pH, acidity, and alkalinity of water samples collected from different water body/supply sources like Yamuna water, MCD supply water, Groundwater, water samples collected from water sewage treatment plants (Delhi /NCR).
6. Determination of dissolved oxygen (DO) of a water sample collected from different sources (at least two sources).
7. Determination of BOD of water sample collected from different water sources.

8. Paper chromatographic separation (*ascending and circular both*) of the mixture of metal ion (Ni^{2+} and Co^{2+}) and (Cu^{2+} and Cd^{2+}).
9. To study the use of phenolphthalein in trap cases.
10. Estimation of macro-nutrients: Potassium, calcium and magnesium in soil samples by flame photometry.
11. Spectrophotometric determination of Iron in vitamin / dietary tablets / different solutions of iron.
12. Spectrophotometric identification and determination of caffeine and benzoic acid in soft drink.
13. Spectrophotometric determination of cadmium and chromium in the given water sample.
14. Determination of ion exchange capacity of anion / cation exchange resin (using batch procedure if use of column is not feasible).
15. Visit STP plants and different chemical industries.

Essential Readings:

- Svehla, G. (1996), **Vogel's Qualitative Inorganic Analysis**, Prentice Hall.
- Mendham, J.; Denney, R.C.; Barnes, J.D.; Thomas, M.J.K. (2007), **Vogel's Quantitative Chemical Analysis**, 6th Edition, Prentice Hall.
- De, A. K. (2021), **Environmental Chemistry**, 10th edition. New Age International Pvt. Ltd.

Note: Learners are advised to use the latest edition of readings.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Essential Food Nutrients

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|----------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Essential Food Nutrients | 2 | 1 | 0 | 1 | XIIth Pass with Science | NIL |

Learning Objectives

- To develop a basic understanding of the components of food, their source, properties and interactions as well as changes that occur during processing, storage, and utilization

Learning Outcomes

After studying this course, the student will be able to:

- Account for chemistry of foods: composition of food, role of each component
- Recognize some of the reactions and changes in individual food components which occur during processing, handling and storage

SYLLABUS

Theory:

Unit 1: Carbohydrates

3 hours

Introduction, sources, functions, deficiencies, Structures of monosaccharides and disaccharides: glucose, fructose, galactose; lactose, maltose, sucrose, maltitol, concept of reducing and non-reducing sugars; role of carbohydrates as sweeteners in food; lactose intolerance, galactosemia, dental plaque, overview of carbohydrate metabolism.

Unit 2: Lipids

5 hours

Introduction, sources, functions, deficiencies, classification (fatty acids, phospholipids, fats & oils, waxes), common fatty acids present in oils and fats, Omega- 3,6,9 fatty acids, trans fats, chemical properties: iodine value, saponification value, effect of frying on fats, changes in fats and oils-rancidity, lipolysis, flavor reversion, auto-oxidation and its prevention.

Unit 3: Proteins

5 hours

Introduction, sources, functions, deficiencies, protein structure (primary, secondary and tertiary), physico-chemical & functional properties of proteins, food proteins: animal and plant proteins.

Unit 4: Vitamins & Minerals

2 hours

Vitamins: Introduction, classification: fat-soluble vitamins & water-soluble vitamins.

Minerals: Introduction, classification: macrominerals (Ca, P, Mg) & microminerals (Se, Fe, I, Co, Zn, Cu, Se, Cr).

Role of vitamins and minerals in food chemistry.

Practicals/Hands-on Training

30 hours

1. Determination of moisture in food products by hot air oven-drying method.
2. Colorimetric determination of iron in vitamin/dietary tablets.
3. Estimation of Vitamin C in a given solution/lemon juice/chillies by 2, 6 Dichlorophenol indophenol method.
4. Estimation of total soluble sugar content by ferricyanide method (volumetric analysis).
5. Determination of saponification value of the given fat/oil.
6. Determination of iodine value of the given fat/oil.
7. Qualitative tests for proteins and carbohydrates.
8. Qualitative Estimation of cholesterol by Liebermann Burchard method.

Essential Readings:

Theory:

- deMan, J.M., Finley, J.W., Hurst, W.J., Lee, C.Y. (2018), **Principles of Food Chemistry**, 4th Edition, Springer.
- Msagati, T.A.M. (2013), **Chemistry of Food Additives and Preservatives**, Wiley-Blackwell.
- Fennema, O.R. (2017), **Food Chemistry**, 5th Edition, CRC Press.
- Attokaran, M. (2017), **Natural Food Flavors and Colorants**, 2nd Ed., Wiley-Blackwell.
- Potter, N.N., Hotchkiss, J.H, (1995) **Food Science**, 5th Ed., Chapman & Hall.
- Brannen, D., Davidsin, P.M., Salminen, T. Thorngate III, J.H. (2002), **Food Additives**, 2nd Edition, CRC Press.
- Coultate, T. (2016), **Food: The Chemistry of its Components**, 6thEdn., Royal Society of Chemistry.
- Belitz, H. D.; Grosch, W. (2009), **Food Chemistry**, Springer.
- Course: FOOD CHEMISTRY (iasri.res.in)

Practicals:

- Ranganna, S. (2017). **Handbook of analysis and quality control for fruits and vegetable products**, 2ndEdn., McGraw Hill Education
- Sawhney, S.K., Singh, R. (2001), **Introductory Practical Biochemistry**, Narosa Publishing House

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Forensic Chemistry

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------|---------|-----------------------------------|----------|---------------------|-------------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Forensic Chemistry | 2 | 1 | 0 | 1 | XII th Pass with Science | NIL |

Learning Objectives

- To introduce students to this fascinating branch of science and familiarize them with important concepts like fingerprints, explosives/arson, drugs and their detection.

Learning outcomes

After studying this course, the student will be able to:

- Describe latent fingerprints, various methods of detection of latent fingerprints, explosive analysis in forensic science, collection and preservation of evidence from crime scene etc

SYLLABUS

Theory:

Unit 1: History of Development of Forensic Science in India

2 hours

Definitions, Scope and Need of forensic science, Ethics in forensic science, History of forensic science, Basic principles of forensic science, Organizational structure of forensic science laboratories, Different branches in forensic science

Unit 2: Fingerprints

5 hours

Definition, History of fingerprint identification, Fingerprint as forensic evidence, Visible Finger marks, Latent Finger marks, ten-digit classification, Methods of Development of latent fingerprints using conventional methods–Powdering (Black and grey, fluorescent and magnetic), Methods of development of latent fingerprint using chemical method (iodine fuming, silver nitrate, Ninhydrin, Vacuum metal deposition), Automated Fingerprint identification system (AFIS), Poroscopy and Edgescopy

Unit 3: Forensic Chemistry

8 hours

Scope & significance of Forensic Chemistry, Types of cases/exhibits received for analysis. Trap Cases: Collection, and Preliminary analysis of evidence in trap cases.

Alcoholic Beverages: Types of alcohols, country made liquor, illicit liquor, denatured spirits, Indian made foreign alcoholic and non-alcoholic beverages.

Dyes: Scope & Significance of dyes in crime investigation, analysis of ink by TLC and UV visible spectrophotometry. Petroleum products and their adulterations: Chemical composition of various

fractions of Petroleum Products, Analysis of petrol, kerosene, diesel.

Fire/Arson and Explosives Fire: Introduction to Fire & Arson, origin of fire, Chemistry of Fire, Fire tetrahedron, Firefighting operations, preservation of fire scene, collection of evidences, Seat of fire, cause of fire, motives, Analysis of fire debris, Case studies related to fire and Arson. Explosive and Explosion: Scope & significance of explosive analysis in forensic science, Types of explosives, deflagration and detonation, explosive trains, collection, preservation and forwarding of exhibits, preliminary analysis of explosives. Dos and Don'ts. Case studies related to explosives.

Drugs of abuse: Classification, including designer drugs. Ill effects of drugs of abuse, Preliminary and confirmatory tests.

Practicals/ Hands-on Training

30 hours

1. Development of fingerprint through conventional powder method.
2. Development of fingerprint through chemical methods.
3. To check the alcohol presence in different liquor.
4. Phenolphthalein test for trap cases.
5. Identification of Handwriting Individual Characteristics.
6. Study of Disguise in handwriting.
7. TLC of amino acids

Essential/recommended readings

- Saferstein, R. (1990) Criminalistics, Prentice Hall, New York.
- Basic Principles of Forensic Chemistry by JaVed I. Khan • Thomas J. Kennedy Donnell R. Christian, Jr.
- Fundamentals of FINGERPRINT ANALYSIS Hillary Moses Daluz
- Clarke's Analysis of Drugs and Poisons 3rd Ed.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Green Methods in Chemistry

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|----------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Green Methods in Chemistry | 2 | 0 | 0 | 2 | XIIth Pass with Science | NIL |

Learning Objectives:

The learning objectives of this course are as follows:

- To create awareness about the chemistry that is good for human health and the environment.
- To provide thorough knowledge of the green chemistry principles, and new remediation technologies for the cleaning up of hazardous substances.
- To develop basic skills to be able to design, develop and run chemical processes in a sustainable way.

Learning Outcomes:

After studying this course, the student will be able to:

- Design and develop materials/ processes that reduce the use and generation of hazardous substances in industry.
- Describe how injudicious use of chemicals can have an adverse/potentially damaging effect on humans and the environment.
- Propose ideas for innovative approaches to environmental and societal challenges.
- Critically analyse the existing traditional chemical pathways/processes and creatively think about bringing environmentally benign reformations in these protocols.
- Convert biomass into valuable chemicals through green technologies.

SYLLABUS

Practicals/Hands-on Training

60 hours

1. Definition and Importance of green chemistry. Introduction to the prevention of waste/ by products and waste/ pollution prevention hierarchy. Provide the scheme for the traditional as well as green method for the synthesis of ibuprofen and ask students to compare the amount and hazards of waste generated in both the processes.
2. Principle and calculation of atom economy. Use of molecular model kit to stimulate the reaction

to investigate how the atom economy can illustrate Green Chemistry.

Preparation of propene by two methods can be studied

(I) Hoffman elimination

(II) Dehydration of propanol

The other types of reactions, like addition, elimination, substitution and rearrangement should also be studied for the calculation of atom economy

3. Prevention/ minimization of hazardous/ toxic products reducing toxicity. Risk = (function) hazard x exposure.

(a) Nitration of salicylic acid using green method $\text{Ca}(\text{NO}_3)_2$

(b) Preparation and characterization of nanoparticles of gold using tea leaves/silver nanoparticles using plant extracts.

(c) Preparation of dibenzalacetone by cross aldol condensation reaction using base catalysed green method

(d) Acetylation of primary aromatic amine using the green method.

4. Use of Green solvents and comparison of greenness of solvents:

(a) Explain about supercritical fluids with special reference to carbon dioxide. Extraction of D-limonene from orange peel using liquid CO_2 prepared from dry ice

(b) Introduction to water as a solvent for chemical reactions. preparation of Manganese (III) acetylacetonate using green method

(c) Advantages and application of solventless processes in organic reactions.

(i) Benzil- Benzilic acid rearrangement in solid State under solvent-free Condition.

(ii) Mechanochemical solvent free, solid–solid synthesis of azomethine using *p*- toluidine and *o*-vanillin/*p*-vanillin

5. Energy requirements for reactions – alternative sources of energy: use of microwaves and photochemical energy.

(a) Photoreduction of benzophenone to benzopinacol in the presence of sunlight.

(b) Microwave assisted ammonium formate-mediated Knoevenagel reaction: *p*-anisaldehyde, ethyl cyanoacetate, ammonium formate.

6. Selection of renewable starting material rather than depleting, Illustrate with few examples such as biodiesel and polymers from renewable resources (such as green plastic). Preparation of biodiesel from waste cooking oil and characterization.

7. Importance of using catalytic reagents in preference to stoichiometric reagents; catalysis and green chemistry, comparison of heterogeneous and homogeneous catalysis, biocatalysis, asymmetric catalysis and photocatalysis.

(a) Benzoin condensation using Thiamine Hydrochloride as a catalyst instead of cyanide

(b) Rearrangement of diazoamino benzene to *p*-aminoazo benzene using K10 montmorillonite clay

8. Students should be asked to prepare a presentation/project based on any of the following topics:

- Bhopal Gas Tragedy and safer route to carbaryl synthesis
- Flixiborough accident and safer route to cyclohexanol
- Use of Surfactants for SC-CO₂ for precision cleaning and dry cleaning of garments replacing PERC.
- A brief study of Green Chemistry Challenge Awards (Introduction, award categories and study about five last recent awards)
- Healthier Fats and oils by Green Chemistry: Enzymatic Interesterification for production of No Trans-Fats and Oils.
- Synthesis of anti-tuberculosis drug Paramycin from waste water stream
- Syntheses of vitamin D₃ using photochemical energy
- Greener Manufacturing of Sitagliptin Enabled by an Evolved Transaminase
- Microwave assisted solvent free synthesis of aspirin
- Synthesis of 6-Aminopenicillanic Acid (6-APA) from penicillin G using biocatalyst.

Essential Readings:

Theory:

- Anastas, P.T., Warner, J.C. (2014), Green Chemistry, Theory and Practice, Oxford University Press.
- Lancaster, M. (2016), Green Chemistry: An Introductory Text, 3rd Ed., RSC Publishing.
- Cann, M.C., Connely, M. E. (2000), Real-World cases in Green Chemistry, American Chemical Society, Washington.
- Matlack, A.S. (2010), Introduction to Green Chemistry, 2nd Ed., CRC Press.
- Alhuwalia, V.K.; Kidwai, M.R. (2012), New Trends in Green chemistry, Kluwer Academic Publishers, Springer.
- Sidhwani, I.T; Sharma, R.K. (2020), An Introductory Text on Green Chemistry, Wiley India Pvt Ltd.
- [Etzkorn](#), F. A . (2019), Green Chemistry: Principles and Case Studies, Royal Society of Chemistry.

Practicals:

- Kirchoff, M., Ryan, M.A. (2002), **Greener approaches to undergraduate chemistry experiment**, American Chemical Society, Washington DC.
- Sharma, R.K., Sidhwani, I.T., Chaudhari, M.K. (2013), **Green Chemistry Experiments: A monograph**, I.K. International Publishing House Pvt Ltd. New Delhi.
- Pavia, D.L., Lamponam, G.H., Kriz, G.S.W. (2006), **Introduction to organic Laboratory Technique- A Microscale approach**, 4th Edition, Brooks-Cole Laboratory Series for Organic chemistry.
- Sidhwani, I.T. ; Saini, G.; Chowdhury, S. **Wealth from Waste: A green method to produce biodiesel from waste cooking oil and generation of useful products from**

waste further generated. University of Delhi, Journal of Undergraduate Research and Innovation, Volume 1, Issue 1, February 2015, ISSN: 2395-2334.

- Sharma, R. K., Gulati, S., Mehta, S. (2012), **Preparation of Gold Nanoparticles Using Tea: A Green Chemistry Experiment**, Journal of Chemical Education, 89 (10), 1316-1318.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Lab Testing and Quality Assurance

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|---------|-----------------------------------|----------|---------------------|-------------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Lab Testing and Quality Assurance | 2 | 1 | 0 | 1 | XII th Pass with Science | NIL |

Learning Objectives:

The objective of this course is :

- To introduce the concept of quality check and quality control in chemical industries.

Learning Outcomes:

By the end of the course, the students will be able to:

- Describe role of quality control chemist
- Discuss and demonstrate analytical and separation techniques
- Carry out sample preparation
- Illustrate fundamentals of quality check
- Describe and use safety procedures

SYLLABUS

Unit 1: Introduction

2 hours

Industry and sub-sectors, standards for manufacturing in life-sciences, drug regulatory agencies, role of quality control chemist, quality management systems

Unit 2: Modern Analytical methods and separation techniques

5 hours

Gravimetric methods, volumetric methods, electroanalytical methods, spectroscopic methods, chromatographic techniques

Unit 3: Sample preparation

2 hours

Basics of sample preparation, preservation and storage, standards and guidelines for sample handling, good storage practices

Unit 4: Quality check**6 hours**

Overview, productivity concept, statistical analysis of laboratory data, measurements, calibrations, validation, reference standards and materials, requirements of a calibration lab, fundamentals of advanced QC approaches, Trouble shooting in QC, documentation, audit/ process related query, Quality certifications, Government regulations in industries like pharmaceuticals, food supplements, cosmetics.

Practicals/Hands-on-Training**30 hours**

1. Calibration of glassware
2. Weighing of samples, accuracy of measurements
3. Preparation of TLC plates and separation of amino acids
4. Working protocols of various laboratory instruments-oven, pH-meter, conductivity meter, water baths, muffle furnace, spectrophotometer.
5. Calibration of instruments like colourimeter, pH-meter, conductivity meter, spectrophotometer using reference standards or reference materials.

Suggested exercise: Visit some industries to study the validation of simple procedures.

Essential readings:

- Skoog D.A., West D.M., Holler, F.J., Crouch S.R., **Fundamentals of Analytical Chemistry**, 9th Edition, Cengage learning.
- **Quality control chemist participant manual** prepared by LSSSDC in collaboration with NSDC India.
- iso.org

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Chemistry of Food Flavors and Colourants

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|-------------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chemistry of Food Flavors and Colourants | 2 | 1 | 0 | 1 | XII th Pass with Science | NIL |

Learning Objectives:

The learning objectives of this course are as follows:

- To provide introduction to quality attributes of food such as appearance and flavour.
- To impart an understanding of the chemistry of the flavour as well as colour constituents of foods.

Learning Outcomes:

By the end of the course, the students will be able to:

- Describe mechanisms of flavor perception
- Demonstrate various mechanisms of flavor formation
- Discuss the chemical dimension of flavour.
- Recognize off-flavor defects in foods and strategies to control it.

SYLLABUS

Unit 1: Flavors

9 hours

Introduction and importance of flavors in food.

Taste & Odour: Structure and physiology of taste organs- tongue, papillae, taste buds, salivary glands, Mechanism of taste and odour perception

Basic Types of taste : Salty, Sweet, Bitter, Sour, Umami taste, Chemical dimensions of basic tastes (sweet, salt, sour, bitter and umami), odour and other sensations (like astringency, coolness, pungency/pungency), Non-nutritive and nutritive sweeteners (including structures of aspartame, saccharin, sucralose, Stevioside), Molecular Theory of Sweetness, Taste Inhibition and enhancement, Chemical dimension of Flavors (peppers, peppermint, coriander, cinnamon, onion), Chemistry of food flavorings: Maillard browning, enzymic browning reactions, caramelisation browning, Off-Flavour in Food (Rancidity in Fats/Oils, Non Enzymic Browning), Control of enzymic browning (acidulants, chelating agents, heat treatment etc)

Unit 2: Food Colours

6 hours

Introduction, importance, classification: Natural food colourants (Anthocyanins, Carotenoids, Chlorophyll), Examples of Pigments in common food (turmeric, tomato, carrot, orange); Nature-identical colourants (β -Carotene, Canthaxanthin and Riboflavin); Artificial/synthetic colourants: Azo dyes (e.g. amaranth dye, tatzazine, citrous red); Quinoline (e.g. quinoline yellow); Phthalein (e.g. erythrosine); Triarylmethanes and indigoid (e.g. indigo carmine), FD&C Dyes and Lakes.

Practicals/Hands-on-Training

30 hours

1. Determination of the taste threshold for the different sensations – sweet, salty, sour.
2. Extraction of limonene from orange peels using supercritical carbon dioxide.
3. Quantitative determination of food dyes in powdered drink mixes by spectrophotometric method.
4. Extraction and separation of pigments present in spinach by Thin Layer Chromatography (TLC).
5. Experiment to demonstrate the enzymic browning and its prevention.
6. Determination of rancidity of edible oils by Kriess Test.
7. Estimation of carotenoids in sample by colorimetric method.

Essential readings:

Theory:

- DeMan, J.M., Finley, J.W., Hurst, W.J., Lee, C.Y. (2018), **Principles of Food Chemistry**, 4th Edition, Springer.
- Msagati, T.A.M. (2013), **Chemistry of Food Additives and Preservatives**, Wiley-Blackwell.
- Fennema, O.R. (2017), **Food Chemistry**, 5th Edition, CRC Press.
- Attokaran, M. (2017), **Natural Food Flavors and Colorants**, 2nd Ed., Wiley-Blackwell.
- Potter, N.N., Hotchkiss, J.H. (1995) **Food Science**, 5th Ed., Chapman & Hall.
- Brannen, D., Davidsin, P.M., Salminen, T. Thorngate III, J.H. (2002), **Food Additives**, 2nd Edition, CRC Press.
- Coultate, T. (2016), **Food: The Chemistry of its Components**, 6th Edn., Royal Society of Chemistry.
- Belitz, H. D.; Grosch, W. (2009), **Food Chemistry**, Springer.
- Course: FOOD CHEMISTRY (iasri.res.in)

Practicals:

- Ranganna, S. (2017). **Handbook of analysis and quality control for fruits and vegetable products**, 2nd Edn., McGraw Hill Education
- Sawhney, S.K., Singh, R. (2001), **Introductory Practical Biochemistry**, Narosa Publishing House

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

PCB Designing and Fabrication

CREDIT DISTRIBUTION, ELIGIBILITY AND PREREQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| PCB Designing and Fabrication | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of the course are as follows:

- To give a comprehensive understanding and hands-on exposure to the various processes, industrial tools, protocols, and design specifics which are involved in PCB Designing
- To enable the students to design an electronic printed circuit board for a specific application using industry-standard software after going through the complete procedural steps of developing circuit schematic, board files, image transferring, assembly, soldering, and testing.

Learning Outcomes

After Studying this course, the student will be able to:

- Identify the various types of devices/components that may be mounted on PCB
- Understand the PCB layout techniques for optimized component density and power saving.
- Perform design and printing of PCB with the help of various image transfer and soldering techniques
- Understand the current trends and scope of the PCB industry

Syllabus

Practical

Unit 1: PCB Fundamentals

12 hours

PCB Advantages, components of PCB, Electronic components, Microprocessors and Microcontrollers, IC's, Surface Mount Devices (SMD). Classification of PCB - single, double, multilayer, and flexible boards, Manufacturing of PCB, PCB standards.

Unit 2 : Schematic & Layout Design

16 hours

Schematic diagram, General, Mechanical, and Electrical design considerations, Placing and Mounting of components, Conductor spacing, routing guidelines, heat sinks and package density, Net list, creating components for a library, Tracks, Pads, Vias, power plane, grounding.

Unit 3: PCB Design Processes

20 hours

Design automation, Design Rule Checking; Exporting Drill and Gerber Files; Drills; Footprints and Libraries Adding and Editing Pins, copper-clad laminates materials of copper-clad laminates, properties of laminates (electrical & physical), types of laminates, soldering

techniques. Film master preparation, Image transfer, photo printing, Screen Printing, Plating techniques, Etching techniques, Mechanical Machining operations, Lead cutting and Soldering Techniques, Testing, and quality controls.

Unit 4 : PCB Technology

12 hours

Introduction of PCB prototyping machines, Schematic Entry, PCB Parts creation, Auto Routing, Post Design, Brief overview of various models available, Recent Trends, and environmental concerns in the PCB industry.

Exercises

PCB Designing, Fabrication, Component Mounting and Testing using Standard Procedures (Hardware)

A. Analog Electronic Circuits

1. Verification of Thevenin theorem
2. Designing of RC Low Pass Filter and High Pass Filter circuits
3. To study current-Voltage characteristics of a p-n junction diode (forward bias and reverse bias)
4. Designing of Centre tapped full wave rectifier – without and with shunt capacitance filter.
5. Simple circuit to glow an LED
6. Design, fabrication, and testing of a 9 V power supply with Zener regulator
7. Design and study of voltage divider biasing.
8. Designing of a CE based amplifier of given gain

B. Digital Electronic Circuits

1. To verify and design AND, OR, NOT and XOR using NAND gates
2. Design a Half adder and Full Adder
3. Design a Half Subtractor and Full Subtractor

PCB Design Softwares recommended

- KiCAD (Open Source Electronics Design Automation Suite) <https://www.kicad.org/>
- EasyEDA (Online PCB Design Tool) <https://easyeda.com/>
- PADS - Siemens EDA (PCB Design Software) <https://eda.sw.siemens.com/en-US/pcb/pads/>
- Any other similar PCB designing software

Essential/recommended readings

- Printed Circuit Board – Design & Technology, Walter C. Bosshart, Tata McGraw Hill, 2008.
- Printed Circuit Board –Design, Fabrication, Assembly & Testing, R.S. Khandpur, First Edition, Tata McGraw-Hill Education Pvt. Ltd., 2005.
- Printed Circuit Board Design Using Autocad, Chris Schroeder, Newnes Publisher, 1998.
- Printed Circuits Handbook, Clyde F. Coombs, Jr, Happy T. Holden, Sixth Edition, Publisher: McGraw-Hill Education, 2016.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Electronic Product Testing

CREDIT DISTRIBUTION, ELIGIBILITY AND PREREQUISITES OF THE COURSE

| Course title& Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Electronic Product Testing | 2 | 0 | 0 | 2 | Class XII | NIL |

Course Learning Objectives

The Learning Objectives of the course are as follows:

- To enable students for testing of various electronic and electrical components and instruments such as diode, transistor, transformer, switches, fuses, cables, CRO, multimeters, voltmeter, ammeters etc.
- To give an insight upon the SMD and its soldering and de-soldering, EDS.
- To help students to have insight knowledge of SMPS, UPS and batteries along with maintenance of consumer electronics gadgets like computers, Audio Amplifiers, Induction Top, Solar Panel etc.
- To enhance their capabilities of assembling, fault diagnosis and rectification in a systematic way. To enrich students about reliability and quality control standards of equipment.

Course Learning Outcomes

After studying this course, the student will be able to:

- Test different types of electronic and electrical components and instruments.
- Practice soldering and de-soldering processes with correct methods.
- Testing of SMPS, UPS, Inverters and batteries.
- Identify faults in consumer electronics gadgets such as audio amplifiers, computers, Induction top, Microwave, solar panel.

Syllabus Practical

Unit 1 : Introduction

16 hours

Overview of Basic Measuring Instruments: CROs, Multimeter, Power supplies, LCR meter, Signal Generator and Power Analyzer.

Testing of various Devices: a) Semiconductor Devices: Single and Two junction Devices, Thyristor b) Electrical Devices: Transformers, relays, switches and fuses, cables and connectors, Batteries, Idea about ICs, PCBs, Sensors.

Unit II : Soldering and Power Sources

16 hours

Basics of soldering: Soldering tools and materials (solder, flux), Types of soldering irons (Wattage, temperature, Tips), Soldering/ disordering station. Concept of ESD (Electrostatic discharge). The SMD (surface mounted Devices) and its soldering and de-soldering

Basics of SMPS (Switch Mode Power Supply), UPS (Uninterrupted power supply), batteries and Inverters along with their block diagram and Pin configuration of some important ICs used in it. Touch current and touch voltage.

Unit III : Appliance Testing and Computer Assembling

12 hours

Testing of Induction cook Top, microwave, Solar panel; Installation and Requirements, stand alone and Grid connected PV system.

Basics of computer assembling and testing. Brief description about its specifications and costing Factors.

Unit IV : Reliability and Quality Standards

16 hours

Concept of Reliability: Scope, objectives and factors influencing equipment effectiveness, Acceptance Testing, Type Testing , Safety Testing, Identification of legends, symbols, color codes, Safety, safety standards, safety certificates (CE, UL and VDE), General awareness of quality standards, quality management systems & documentation, Idea of ISO 17025, ISO 9001, Calibration and Uncertainty of measurements, Effect of environmental testing(refer to IEC60068-1 for guidance), Awareness on disposal of Electronic waste

Exercises

1. An overview of testing of basic electronic / electrical components (BNC cable, switches and fuses, Capacitors, Inductors, Transformers, Relays, diodes, transistor, Thyristor, IC, Potentiometer etc.); Design a curve tracer on CRO for component testing.
2. Control the intensity and color of bi-Color LED with the help of POT, SPDT switch and 9V battery.
3. Soldering and De-soldering processes; SMD
4. Safety testing of SMPS (Applicable Standard: IS 14886).
 - a. Safety Testing (Earth Leakage current Test, Dielectric Test, Short Circuit Protection)
 - b. Performance Testing (Line Regulation, Load Regulation for a variation of Load Min to Max load and vice versa, Efficiency at nominal input and rated load)
5. Tubular Batteries (Applicable standard: IS 1651) Test for Capacity, Test for voltage during discharge
6. Personal Computer (Applicable Standard: IS 14896)
 - a. Safety Testing (Earth Leakage current Test, Dielectric Test) Performance Testing (Microprocessor used,
 - b. RAM expansion Capacity, Clock Rate and RAM Capacity, Effect of Power Supply variations)
7. Inverter (Applicable Standard: IS 13314)
 - a. Visual Inspection, High Voltage Test, Insulation Resistance Test, No –Load Test, Output Test

8. UPS (Applicable Standard: IEC 62040-3)
 - a. Steady State Input Voltage Tolerance, Output-Normal Mode – No Load, Output-Normal Mode – Full Load, Output-Stored Energy Mode – No Load, Output- Stored Energy Mode – Full Load, Output-Normal Mode – Over Load, Output-Stored Energy Mode – Over Load Output-Normal Mode – Short Circuit, Output- Stored Energy Mode – Short Circuit, Efficiency and Input Power factor
9. Audio Amplifier (Applicable Standard: IEC 60065)
 - a. Audio frequency response at various power levels, Response to various inputs sources like DVD player, IPOD, CD player, etc., audio output power, Power Consumption, Voltage range
10. Solar Panel system: Testing and Efficiency

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

CULINARY SCIENCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-requisite of the Course (if any) |
|-------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Culinary Science | 2 | 1 | 0 | 1 | Class XII | NIL |

Learning Objectives:

Culinary science skill paper is about the cuisine arts of food preparation, cooking, and presentation of food. Students will be equipped with knowledge of various tools and equipments used for cooking, different cooking techniques, working in establishments such as restaurants and relatively large institutions such as hotels and hospitals, standardized cooking practices and recipes.

The learning objectives of the course are:

- To develop cuisine arts of food preparation, cooking, and presentation of food.
- The practical exercises aim to provide hands-on training to develop the skill of various cooking techniques and knowledge about various tools and equipment used for cooking

Learning Outcomes

After studying this course, the student will be able to:

- Develop different cooking and presentation skills.
- Get hands-on training to develop the skill to prepare Indian traditional and nutritious recipes.
- Develop the ability to work in establishments such as restaurants, food courts, kiosks, fast food centers large institutions such as hotels and hospitals.

SKILL DEVELOPMENT AND JOB OPPORTUNITIES':

Employment Opportunities:

- Apprentice in Small Catering units/ Kiosk/ Restaurant
- Food Supplier
- Food Storekeeper
- Food Stylist / Designer

SYLLABUS

Credits: 2

Total lectures (45): 45 Hours/ 15 weeks

Theory: 30%, Credit – 1 (Lectures – 15)

Practical/ Field work/ Hands on learning: 70%, Credit – 1 (Lectures – 30)

Unit 1: Basic Culinary Concepts**(8 hours)**

Description: This unit is an introductory unit about the culinary science and basic food ingredients, importance of hygiene to serve safe food.

Subtopics:

- Culinary Terms
- Basic Safety and Hygiene
- Basic food ingredients
- Recipe Evaluation: Sensory evaluation scales

Unit 2: Kitchen Techniques and Technology**(7 hours)**

Description: This unit is about methods of cooking, storage and organizing the storage and imparting knowledge about various kitchen equipment and accessories.

Subtopics:

- Methods: Moist heat, Dry heat, Frying, Microwave Cooking
- Basic Equipment: Gas stove/Cooking range, Refrigerator, Oven, Microwave, Electrical Blenders, Air Fryer
- Kitchen Aids: Cooking Equipment, Measuring Equipment, Baking Equipment, Assorted Knives, Assorted tools, Service Equipment.
- Storage and organization of work area

PRACTICALS**30 hours**

1. General Instructions: Working in Food Lab/ Kitchen, Weight of edible portion, Temperature, Abbreviations used in recipes **(2 hours)**
2. Basic Indian Gravies: White, Makhani, Salan, Red gravies, Kadi **(2 hours)**
3. Beverages: Tea, Coffee, Cold Coffee, Smoothies, Milk Shakes, Fruit Punch, Iced Tea, Panna, Mojito. **(2 hours)**
4. Indian Breads: Chapatti, Paratha, Naan, Kulcha, Bhatura, Bedmi Puri, Sandwich (open, grilled, rolled), Puranpoli, Kathi roll. **(2 hours)**
5. Indian Rice Cooking: Boiled, Curd, Tomato, Lemon, Fried, Pulao, Tamarind, Biryani, Poha **(2 hours)**
6. Soups: Stock, Clear soups, Cream soups **(2 hours)**
7. Salads and Salad cuts/ craft: Coleslaw, Quinoa salad, Corn & Walnut, Exotic seeds salad, Salad vegetable cuts and crafts **(2 hours)**
8. Vegetables Preparations: Dry veg, Koftas, Stuffed veg, Baked veg preparations. **(2 hours)**
9. Indian Dry Snacks with Dips: Dhokla, Idli, Uttapam, Kachori, Khandvi, Chilla, Dumplings, (Momos/Dim sums/ wontons) **(4 hours)**
10. Indian Savory Snacks: Assorted Pakoras, Dahi Bhalla, Cutlets, Samosa, Tikki, Paneer Tikka **(4 hours)**
11. Traditional Deserts 1: Halwa, Kulfi, Kheer, Gulab Jamun **(2 hours)**
12. Traditional Deserts 2: Rasmali, Ladoo, Burfi, Jalebi, Gujia, Rasgulla **(2 hours)**
13. Baking: Tea cake, Muffins **(2 hours)**

CHOCOLATE CRAFTS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-requisite of the Course (if any) |
|-------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Chocolate Crafts | 2 | 1 | 0 | 1 | Class XII | NIL |

LEARNING OBJECTIVES:

This Skill Enhancement Course enables student to understand the basic principles, hygiene and precautions of chocolate cookery. The emphasis of this will be to develop the skill required for preparation of various chocolates and its packaging and marketing.

The learning objectives of the course are:

- To learn the skill to craft different types of chocolates
- To learn the basic principles, hygiene and precautions of chocolate crafting and entrepreneurship in chocolate industry.

LEARNING OUTCOMES

After studying this course, the student will be able to:

- Have the understanding of different chocolates and acquire the skill to handle them.
- Develop the abilities and showcase skills for preparation of molded, center filled, free hand cluster, chocolate accessories, garnishes and ancillary chocolate recipes
- Get acquainted with techniques of packaging, costing and marketing of chocolates.
- Gain knowledge and skill to start small scale chocolate enterprise

SKILL DEVELOPMENT AND JOB OPPORTUNITIES':

Employment Opportunities:

- Apprentice in Small Catering units/ Kiosk/ Restaurant
- Entrepreneurship in chocolate industry
- Food Stylist / Designer

SYLLABUS

Credits: 2

Total lectures (45): 45 Hours/ 15 weeks

Theory: 30%, Credit – 1 (Lectures – 15)

Practical/ Field work/ Hands on learning: 70%, Credit – 1 (Lectures – 30)

THEORY

Unit 1: Introduction to Chocolates

(7 hours)

Description: The focus of this unit is on chocolates, various aspects of chocolate processing and learning the precautions to make good chocolates.

Subtopics:

- Chocolates: history and types of compound and couverture chocolates.
- Processing of cocoa bean to manufacture chocolate liquor, cocoa butter, cocoa powder, chocolate and chocolate chips.
- Precautions and hygiene practices while handling chocolate.

Unit 2: Applications of Chocolates

(8 hours)

Description: The focus of this unit is on using the chocolates to make different products, understanding and rectifying the faults.

Subtopics:

- Molded, center filled, free hand clusters, garnishes and accessories.
- Recipe development, costing and packaging of chocolates.
- Faults in chocolates like sugar bloom and fat bloom, their reasons and correction. temperature and moisture control while handling chocolate.

PRACTICALS

1. Introduction to different kinds of chocolates: Compound and Couverture; their sensory analysis and mouth feel. **(2 hours)**
2. Market survey of Indian and Internationally made chocolates with respect to label reading (ingredients). **(2 hours)**
3. Equipment's (molds, scrapers, piping bags, nozzles, cooking thermometers, microwave, double boiler) and precautions to be used in handling chocolate. **(2 hours)**
4. Making molded compound chocolate. **(2 hours)**
5. Variations of molded chocolates. **(2 hours)**
6. Making center filled chocolate. **(2 hours)**
7. Variations of center filled chocolate **(2 hours)**
8. Making free hand chocolate clusters. **(2 hours)**
9. Making chocolate accessories and garnish. **(4 hours)**
10. Ancillary chocolate recipes like chocolate sauce, ganache and hand **(2 hours)**

rolled truffles.

- | | |
|--|-----------|
| 11. Tempering of couverture chocolate. | (2 hours) |
| 12. Packaging and labeling of chocolates. | (2 hours) |
| 13. Visit to chocolate factory or chocolate exhibition and sale trial. | (4 hours) |

PASTA AND PATISSERIE TECHNOLOGY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-requisite of the Course (if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Pasta And Patisserie Technology | 2 | 1 | 0 | 1 | Class XII | NIL |

Learning Objectives

This Skill Enhancement Course is about developing an understanding and skill about the types, role of ingredients, processing/production, innovations, sensory attributes and quality assessment of Pasta and Patisserie. The student can also study SEC on Bakery Enterprise, Food Business and Cafeteria Management to enhance scope of work opportunities.

The learning objectives of the course are:

- To provide students with basic knowledge of pasta technology.
- To familiarize students with patisserie technology/ skill.

Learning Outcomes

After studying this course, the student will be able to:

- Develop understanding of the pasta and patisserie technology.
- Acquire skill to prepare different pasta and patisserie.
- Work in specialized pasta and patisserie outlets such as restaurants, food courts, kiosks, fast food centers as well as in large institutions such as hotels, hospitals and food processing units.

SKILL DEVELOPMENT AND JOB OPPORTUNITIES’:

Employment Opportunities:

- Apprentice in Small Catering units/ Kiosk/ Restaurant
- Entrepreneurship in pasta and patisserie technology
- Food Stylist / Designer for pasta and patisserie

SYLLABUS

Credits: 2

Total lectures (45): 45 Hours/ 15 weeks

Theory: 30%, Credit – 1 (Lectures – 15)

Practical/Field work/Hands on learning: 70%, Credit – 1 (Lectures – 30)

THEORY

Unit 1: Introduction to Pasta

(7 hours)

Description: This unit will include history of pasta , types of pasta, pasta making tools and equipment and understanding different sauces for preparing pasta dishes

Subtopics:

- History and types of pasta: packaged and handmade.
- Types: names and shapes of pasta.
- Tools and equipment commonly used for manufacturing pasta and preparing pasta dishes.
- Different types of sauces used for preparing pasta dishes: Tomato sauce, Béchamel, Bolognese, pesto and aglio olio.

Unit 2: Introduction to Patisserie

(8 hours)

Description: This unit is about different types of Patisserie like short crust pastry, choux pastry, puff pastry, sponge cake, shortened travel cakes, cheese cakes, cookies, brownies and biscotti.

Subtopics:

- Short crust Pastry: Tarts and Pies
- Choux Pastry: Eclairs, Profiteroles.
- Puff Pastry: Patties, French Hearts, Vol au vents.
- Sponge cake and its decoration techniques.
- Shortened travel cakes and its variations.
- Cheesecakes with different toppings.
- Cookies, Brownies and Biscotti.

PRACTICALS

30 hours

1. Market survey of Packaged Pasta and patisserie. **(2 hours)**
2. Orientation and handling of the tools and equipment used in Pasta making (mechanical pasta roller and cutter, rolling pins, serrated knives, ravioli cutters, drying rack and drying trays, stock pots, pans). **(2 hours)**
3. Making the Pasta dough, shaping Pasta (Fettuccine, Farfalle, Macaroni, Noodles, Spaghetti, Vermicelli), drying and storage. **(4 hours)**
4. Making Stuffed Pasta: Ravioli with fillings like spinach and Ricotta Cheese; herbed cream cheese. **(2 hours)**
5. Making Sauces: Tomato, Bechamel, Pesto and preparing Pasta dishes with them. **(2 hours)**

- | | |
|--|-----------|
| 6. Making Baked Pasta: Mac n cheese and Lasagna. | (2 hours) |
| 7. Preparation of short crust pastry: Tarts or Pies | (2 hours) |
| 8. Preparation of Choux pastry: Eclairs or Profiteroles. | (2 hours) |
| 9. Preparation of Puff pastry: Patties/ Vol au vents/ French Hearts | (4 hours) |
| 10. Preparation of cakes (sponge cake/shortened cake) and their variations/decoration with whipped cream frosting. | (4 hours) |
| 11. Preparation of Cheesecake with fruit compote topping. | (2 hours) |
| 12. Preparations of Brownies or biscotti | (2 hours) |

FROZEN DESSERT TECHNOLOGY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-requisite of the Course (if any) |
|----------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Frozen Dessert Technology | 2 | 1 | 0 | 1 | Class XII | NIL |

LEARNING OBJECTIVES

This course will help learners be equipped with the skills of developing, packaging, innovating and marketing of frozen desserts like ice creams, sorbets, ice popsicles, yoghurts, traditional *kulfi*, etc. During the past decade, the frozen food industry has grown, with an array of innovations in ice-creams, frozen yogurt, gelato and traditional desserts such as *shrikhand*. There is vast scope for the development of lower-fat, reduced-sugar products which may lead to increased sales. This course will equip the students with knowledge and skills necessary to work in the frozen food industry.

The learning objectives of the course are:

- To learn basic concepts on processing, distribution and storage of frozen desserts
- To develop the skill of preparing various types of frozen desserts

LEARNING OUTCOMES

After studying this course, the student will be able to:

- Prepare/ process/pack/handle/sell different types of frozen desserts
- Work in frozen food industry or start own business – manufacturing, distribution and retail.

SKILL DEVELOPMENT AND JOB OPPORTUNITIES’:

Employment Opportunities:

- Apprentice, supervisor, processor in frozen food manufacturing units/ distribution and retail outlets
- Entrepreneurship in frozen food industry
- Food Stylist / Designer for frozen desserts

SYLLABUS

Credits: 2

Total lectures (45): 45 Hours/ 15 weeks

Theory: 30%, Credit – 1 (Lectures – 15)

Practical/Field work/Hands on learning: 70%, Credit – 1 (Lectures – 30)

THEORY

Unit 1: Food Freezing

(7 hours)

Description: This unit will give an introduction to the concept of frozen foods/industry, their properties. It will also include the various equipments, freezing systems/methods which can be used to process, store and maintain cold chain during distribution.

Subtopics:

- Background, description and properties of frozen foods
- Freezing time
- Equipment and Freezing systems (direct and indirect contact)
- Act, regulations and standards

Unit 2: Frozen Desserts

(8 hours)

Description: This unit will focus on salient types of frozen desserts; both milk based as well as water based. It will include the composition, physical properties, processing, storage, freezing, common defects, packaging.

Subtopics:

Subtopics:

- Definitions and important terminology
- Ice-cream – composition, physical properties, processing, storage, freezing, common defects, packaging
- Ice based sherbets, sorbets, ice candies, popsicles
- Other frozen desserts – frozen yogurt, *shrikhnad*, mellorine, parevine, ice-cream sandwiches
- Future trends (novelties)

PRACTICALS

1. Market survey of frozen desserts and accessories and basics of working in food lab. **(2 hours)**
2. Preparation, packaging, labeling and sensory evaluation of vanilla ice cream **(4 hours)**
3. Preparation, packaging, labeling and sensory evaluation of any fruit based ice cream (mango, strawberry, pineapple etc.) **(4 hours)**
4. Preparation, packaging, labeling and sensory evaluation of Kulfi or nuts and fruit ice cream **(4 hours)**
5. Preparation, packaging, labeling and sensory evaluation of ice cream with egg or gelato or frozen custard **(4 hours)**
6. Preparation, packaging, labeling and sensory evaluation of ice cream sandwich or novelties **(4 hours)**
7. Preparation, packaging, labeling and sensory evaluation of ice-lolly/ popsicles/ ice-candies **(4 hours)**
8. Preparation, packaging, labeling and sensory evaluation of *Shrikhand* or frozen yogurt **(4 hours)**

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

INDIAN SNACK INDUSTRY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-requisite of the Course (if any) |
|------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Indian Snack Industry | 2 | 1 | 0 | 1 | Class XII | NIL |

LEARNING OBJECTIVES

With changing lifestyles and rising income levels, the processed Indian Snack industry has grown exponentially in recent years due to a massive upsurge in the demand for snack (ready to eat/ ready to cook) products in India. This course will equip our students with knowledge and skills necessary to work in the snack industry, contribute to the growth and after gaining some experience start-up their own micro/macro enterprises.

The learning objectives of the course are:

- To provide students with the basic knowledge of Indian snack industry.
- To familiarize students with different types of Indian snacks.

LEARNING OUTCOMES

After Studying this course, the student will be able to

- Describe various aspects of Indian snacks industry and regional snacks.
- Identify various types of snacks and their processing
- Prepare traditional, regional and healthy snacks.

SKILL DEVELOPMENT AND JOB OPPORTUNITIES':

Employment Opportunities:

- Apprentice in Small Catering units/ Kiosk/ Restaurant
- Start-up of micro/macro enterprises
- Able to set up home based/ small scale food catering units
- Work in Cloud Kitchen
- Food Stylist / Designer

SYLLABUS

Credits: 2

Total lectures (45): 45 Hours/ 15 weeks

Theory: 30%, Credit – 1 (Lectures – 15)

Practical/ Field work/ Hands on learning: 70%, Credit – 1 (Lectures – 30)

THEORY

Unit 1: Indian Snack Industry Current Scenario**(6 hours)**

Description: This unit is an introductory unit about what is a snack food, the history and current trends of snacks industry and regional snacks of India.

Subtopics:

- Definition and history of snack foods in India.
- Current scenario of Indian snack industry.
- Indian regional snacks and their salient features.

Unit 2: Processing of Snacks**(9 hours)**

Description: This unit is about different types of Indian snacks and common packaging materials and techniques used in snack industry.

Subtopics:

- Packed Snacks of India: Classification of packaged snacks, common packaging materials and techniques
- Ready to cook (RTC) snacks, Instant snacks, Freshly prepared snacks, Extruded snacks.
- Usage of oils for frying and various seasonings
- Healthy snacks preparations (innovations in snack preparation)
- FSSAI License and regulations

PRACTICALS**30 hours**

1. Weights, Measures and Food hygiene practices **(2 hours)**
2. Basic cooking terminologies and techniques of preparation **(2 hours)**
3. Pakoras/ fritters: Assorted pakoras, Bondas and its variations **(2 hours)**
4. Cutlets and Tikkis – Mixed Veg cutlets, Sago cutlets, Aloo tikki, Vegetable tikki, **(2 hours)**
5. Dough snacks: Kachori, Samosa, Spring rolls, Mathri, Kathi rolls, Pani puri **(4 hours)**
6. Vadas: Dahi vada, Masala vadas, Medu vada and accompaniments **(2 hours)**
7. Dips (Accompaniments): Mint chutney, Imli chutney, coconut chutney, Salsa sauce, Hummus, Hung curd dips, Guacamole etc. **(4 hours)**
8. Marinates: Curd marinates, Green marinates, Pickled marinate etc. **(2 hours)**
9. Tikkas and Kababs: Paneer tikka, Soya chaaps, Seekh kabab, Hara kabab **(2 hours)**

- | | |
|---|-----------|
| 10. Healthy snacks 1: Sprouts, Cheela, Roasted snacks, Bhel, Fruit chat | (2 hours) |
| 11. Healthy Snacks 2: Fermented snacks (Idli (variations), Dhokla) | (2 hours) |
| 12. Extruded snacks: Bhujia, Chakli, Fafda, Gathiya | (2 hours) |
| 13. Packaging materials and techniques of packaging snacks | (2 hours) |

ESSENTIAL READINGS:

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DAIRY PROCESSING

Credit Distribution, Eligibility and Pre-Requisites of The Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (If any) |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Dairy Processing | 2 | 0 | 0 | 2 | XII (PCM/PCB) | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To study the processing of milk products

Learning Outcomes

After studying this course, the student will be able to:

- Gain skills in dairy product development and hands-on training for the processing of different milk products.
- Establish a food industry/start up based on their learnings in the subject.
- Start providing 3rd party manufacturing to premier dairy-based industries.
- Work in any dairy based industry.

Syllabus

Practical Exercises:

60 hours

The learners are required to perform the following:

- Processing of Flavoured milk
- Preparation of Dahi
- Preparation of Ghee
- Preparation of milk based traditional Indian sweet
- Preparation of Ice cream
- Preparation of milk based instant mix
- Preparation of whey based drink
- Milk based new product development
- How to plan a startup, budgeting, marketing / case study/ entrepreneur (anyone of the above)
- Regulations, Licensing and registration of a startup

Essential/recommended readings

- De, Sukumar. (2007). Outlines of dairy technology. Oxford University Press.
- Webb B.H. & Alford (2005). Fundamentals of dairy chemistry. CBS Publisher
- P.F. Fox, T. Uniacke-Lowe and J.A.O' Mahony (2005). Dairy Science and Technology. Taylor & Francis.
- P. Walstra, Jan T.M. Wouters and Tom J. Geurts (2015). Dairy chemistry and Biochemistry. Springer

Note: Learners are advised to use the latest edition of readings.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Skill progression

India is indisputably the largest milk producer in the world. Overall, dairy industry in India engages about 80 million households in rural area. The course 'Skills in Dairy Processing' provides valuable skills to the candidates required to be in a dairy industry. The course is planned to provide a hands-on training experience to the students in relevance to the dairy product preparation and setting up an enterprise. The other courses like Technology of Milk and milk products, Food Quality Management, Agri-business management, Sensory science, Food standards and regulations in the upcoming semesters will provide a deeper insight to the subject and will help students to improve their skill set.

FRUITS & VEGETABLE PROCESSING

Credit Distribution, Eligibility and Pre-Requisites of The Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (If any) |
|--|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fruits and Vegetable Processing | 2 | 0 | 0 | 2 | XII (PCM/PCB) | NIL |

Learning Objectives

- To provide hands-on training to students for the entire process of selection, preparation, packaging, & presentation of variety of fruits & vegetable products.
- To impart skills of scale-up production of fruits & vegetable products & by products for setting their own enterprise.

Learning Outcomes

After studying this course, the student will be able to:

- Create variety of value-added products of consumer's choice & need.
- Enhance the level of processing, level of value addition, share in global food trade & employability.

Skill Development and Job Opportunities: Justification

The food processing sector is one of the largest sectors in India in terms of production, growth, consumption, and export. However, there exists a definite lack in processing and storage infrastructure and skilled manpower, which are essential to reducing the waste and enhancing the value addition and shelf life of the farm products. The government has ambitious plans to increase the level of processing, value addition and share in global food trade. This will have a spike in the requirement for qualified and trained fruits & vegetable processing professionals. The main objective of having this paper is to impart knowledge of processing various value added fruits & vegetable products which is ultimately used to enhance the employability of any candidate studying the paper including food technology graduates.

Syllabus

Practical

60 hours

Practicals based on different processing/ preservation techniques.

1. Preparation of canned fruits /vegetables
2. Preparation of chips from potato/bittergourd/apples etc.
3. In bottle pasteurization of fruit juices, nectars, purees etc.
4. Preparation of fruit squashes

5. Preparation of fruit cordials
6. Preparation of fruit jams/jellies
7. Preparation of fruit nectars
8. Preparation of mango/chilli/ lime pickle
9. Preparation of Tomato puree & product
10. How to plan a startup, budgeting, marketing / case study/ entrepreneur (anyone of the above)
11. To study the Regulation, Licensing & registration of particular

Essential Readings

- Girdharilal., Siddappaa, G.S and Tandon, G.L.(2009). Preservation of fruits & vegetables. ICAR, New Delhi.
- Thompson, A.K., (2003). Fruits and vegetables; Harvesting, handling and storage. Blackwell Publishing.

Suggested Readings:

- Somogyi, L.P., Ramaswamy, H.S. and Hui, Y.H. (1996). Biology, Principles and Applications. Volume 1. Technomic Publishing Company, Inc.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Food Waste and By-product Utilisation

Credit Distribution, Eligibility and Pre-Requisites of The Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (If any) |
|---------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Food Waste and By-product Utilisation | 2 | 0 | 0 | 2 | XII (PCM/PCB) | NIL |

Learning Objectives

Environment sustainability is a key area of interest to government, scientist, environmentalist, researchers, and students. The present course is designed to address the issues of food waste and further their utilization into value added products. It's a multidisciplinary subject which can be taken by students of varied background. The objectives of the course are as follow:

- To improve students' understanding of basic food industry waste and by-product.
- To provide students an opportunity in understanding the significance of treating and utilizing food waste and by-products.
- To study effluent treatment plant.
- The practicals provide hands-on training in different type of food waste and by-products, further their utilization.
- After completion of course students can apply for courses specific to any category of food waste and further specialize in it.

Eligibility: Being interdisciplinary in its nature and scope, the course will be equally engaging and beneficial for students of all subject streams.

Learning Outcomes

After Studying this course, the student will be able to:

- Identify waste produced from different sectors of the food industry.
- Utilise waste from the food industry.
- Understand waste water treatment.

Skill Development and Job Opportunities:

- Students are eligible to handle the processing and operations at effluent treatment plant running in food and chemical-based industries.
- Students can provide consultancy to waste industries.
- Students can also start with hands-on training to students and industrialist on handling and utilizing the waste from industries.
- Students can work with Ministry of Agriculture to devise ways of utilizing the food waste.

- Students can start his/her own start-up by providing waste water treatment services to food industries.
- The course will provide basic training enabling students to apply to advanced food waste management courses.

Syllabus

Practical

60 hours

1. Identification of waste from agriculture and food processing (Dairy/ Meat/ Fruits Vegetables / Alcoholic beverages/ cereals)
2. Study and layout of waste water treatment system (ETP)
3. Identification of co-products from F&V industry, estimation and utilization to develop value added products (pectin, banana fibre, lycopene from tomato waste, watermelon/ pumpkin rind).
4. Identification of waste from animal industry and utilisation to develop value added products (gelatin, egg shell).
5. Identification of various co-products from dairy industry, estimation and utilization to develop value added products (utilisation of ghee residue, buttermilk beverage, whey).
6. Identification of co-products from cereal industry, estimation and utilization to develop value added products (cereal husk, wheat fibre).
7. Determination of physico-chemical properties of wastewater.
8. Production of alcohol/ acetic acid from waste material.

Essential readings

- Marriott, N. G., Gravani, R. B., & Schilling, M. W. (2006). Principles of food sanitation(Vol. 22). New York: Springer.
- Sadasivam, A, & Manickam, A. (2021). Biochemical Methods. New Age InternationalPublishers.
- Green, J. H., & Kramer, A. (1979). Food Processing. Waste Management. Avi PublishingCompany, 629.
- Herzka, A. and Booth, R.G. Food Industry and Trade: Recycling Waste. Applied SciencePublishers, 1981.
- Tegge, G., Green, J. H., and A. Kramer. Food Processing Waste Management; AVIPublishing, 1979

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Paper and Skill Progression

The paper provides understanding a huge untapped sector if food wastage. This waste across globe is an environment concern. Students will be able to deeper understanding to the huge market of food wastage from industries. The course is designed to provide exclusive hands on training to students so that they can contribute the same to industries in search of food waste management.

MINIMAL FOOD PROCESSING

Credit Distribution, Eligibility and Pre-Requisites of The Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (If any) |
|-------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Minimal Food Processing | 2 | 1 | 0 | 1 | XII (PCM/PCB) | NIL |

Learning Objectives

- To provide the best combination of health, nutrition and convenience based on minimal food processing
- To impart skills in food processing for extending the shelf life with minimal processing that results in minimum changes to sensory characteristics and nutritional qualities, yet imparting convenience to the consumer.
- To make students aware of the various novel technologies being developed and used for minimal processing across the world.

Learning Outcomes

After studying this course, the student will be able to:

- Have skills and knowledge of methods of preservation by minimal processing of food.
- Do minimal processing of different food samples.

Job/Employment Opportunities:

- Students can establish his/her start-up specialized in minimal food processing of foods.
- Students can help in Research and Development in food industries to explore various novel technologies for minimal processing.
- Students can either collaborate or join with any Food Industry and help in developing various thermal and non-thermal techniques in food processing.

Syllabus

THEORY

Total Lecture (Nos): 15 Hours

Unit 1: Basic minimal processing

(8 Hours)

Introduction and importance of minimal processing, Preparation and pre-treatments, Minimal processing of foods by thermal, refrigeration and freezing methods, MAP (Modified Atmosphere Packaging) and CAP (Controlled Atmosphere Packaging). Physiological responses and biochemical changes during minimal processing of fruits and vegetables, Meat, Fish, poultry and Dairy products. Role of minimal processing in economic creation.

Unit 2: Advanced technologies in minimal processing of foods**(7 Hours)**

Principle and applications of; irradiation, pulsed electric field processing, high pressure processing, pulsed light, ultrasound, ohmic heating, sous vide.

PRACTICALS**(30 Hours)**

1. To study basic hygiene and sanitation requirements for minimal processing
2. Preparation and pre-treatment method for minimal processing of fruits and vegetables.
3. Minimal processing of Meat products.
4. Minimal Processing of fish and Poultry.
5. Minimal processing by Vacuum/ MAP/CAP/ edible coating.
6. Minimal Processing of Dairy Products.
7. To study the shelf life and quality characteristics of minimally processed foods available in the market
8. To study the effect of packaging material on shelf life of different minimally processed foods.
9. To determine the cost of minimally processed food.

Essential Readings:

- Fellows, P. J. (2009). Food processing technology: principles and practice. Elsevier
- Rahman, M. S. (Ed.). (2007). *Handbook of food preservation*. CRC press.
- Tewari, G., & Juneja, V. (Eds.). (2008). *Advances in thermal and non-thermal food preservation*. John Wiley & Sons.

Suggestive Readings:

- Barbosa-Canovas, G. V., Tapia, M. S., & Cano, M. P. (Eds.). (2004). *Novel food processing technologies*. CRC press.
- Bansal, V., Siddiqui, M. W., & Rahman, M. S. (2015). Minimally processed foods: overview. *Minimally processed foods*, 1-15.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

WORKING WITH PEOPLE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| WORKING WITH PEOPLE | 2 | 1 | 0 | 1 | Class XII | NIL |

Learning Objectives

The learning objectives of this course are as follows:

- To inculcate values in strengthening knowledge and skills in field work practice learning
- To develop aptitude and attitude to work in the field
- To enhance skills of self-awareness, self-development, goal setting and time management

Learning outcomes

At the end of the semester the students will be able to

- Develop a practical understanding of using different skills while working with individuals and groups
- Develop skills and competencies to work effectively in field settings
- Acquire understanding about self, goal setting, networking, and communication

SYLLABUS

Course Content

| | |
|---|-----------------------|
| Unit I: Developing Personal and Professional Self | (No. of hours) |
| Unit Description: This unit will provide a conceptual understanding of Self-awareness and sensitivity. The students will learn about goal setting, time management and ethics in social work practice. | 3 |
| Subtopics: | |
| <ul style="list-style-type: none"> ● Understanding personal self and professional self. | |

| | |

| | | Lecture | Tutorial | Practical/ Practice | | |
| LIFE SKILL EDUCATION | 2 | 1 | 0 | 1 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To impart life skills education in field work practice
- To strengthen life skills for career building, critical thinking, attitudinal base for innovate leadership
- To learn the application of life skills in diverse field work settings

Learning outcomes

At the end of the semester the students will be able to

- Focus on development of values in strengthening knowledge and life skills, bringing high quality standards in field work practice-learning
- Understand the strength-based life skill development, team work, innovate leadership, design thinking and career building skills
- Develop universal human values while utilizing life skills in field work

PARTICIPATORY LEARNING AND ACTION

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| PARTICIPATORY LEARNING AND ACTION | 2 | 1 | 0 | 1 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand the basic principles and process of using Participatory Learning in field work settings
- To learn various techniques of Participatory Learning for working in rural and urban communities
- To learn the skills involved in application of participatory learning techniques

Learning outcomes

At the end of the semester the students will be able to

- Identify the situations where participatory learning techniques can be applied
- Demonstrate the process of various techniques and skills of participatory learning in field setting
- Analyse PLA data and reflect the same in report writing

SYLLABUS

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

PROGRAMME MEDIA

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-Hospital Front Office Operations I requisite of the course (if any) |
|------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| PROGRAMME MEDIA | 2 | 1 | 0 | 1 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand the concept of programme media and its importance in field work practice
- To learn about various types of programme media and their effective use in field work
- To learn to demonstrate creative ideas and tools in field settings

Learning outcomes

At the end of the semester the students will be able to

- Learn the concept of programme media in social work
- Develop various programme media tools to be used in field settings
- Demonstrate the skills essential for using programme media in the field work

SYLLABUS

| | |
|--|---|
| Unit I: Understanding Programme Media Unit Description: This unit will give an opportunity to the students to understand the concept of programme media in social work. | (No. of hours) 4 Weeks: I-IV |
| Subtopics: <ul style="list-style-type: none"> • Programme media: Concept, characteristics, purpose and significance • Communication in programme media | |

| | |
|---|---|
| <ul style="list-style-type: none"> • Role of programme media: propaganda and public opinion | |
| Unit II: Mediums and Methods of Programme Media Unit Description: Student will learn different types of programme media to be used for diagnostic, problem-solving and therapeutic purposes. | (No. of hours) 4 Weeks: V-VIII |
| Subtopics: <ul style="list-style-type: none"> • Types of programme media: Talk, public meeting & hearing, group discussion, press conference, movement, advertisement, campaign, storytelling and entertainment/games • Information and digital literacy: Concept, importance and components • People's participation in programme: Film screening, discussion and review | |
| Unit III: Handmade Creations and Creative Writings in Social Work Unit Description: This unit will give an opportunity to the students to learn various handmade creations and creative writings of programme media to interact with client groups. | (No. of hours) 3 Weeks: IX-XI |
| Subtopics: <ul style="list-style-type: none"> • Handmade creations: Collage, poster making, wall paintings • Creative writings: short story writing, slogans writing and preparing brochures, hand-outs & pamphlets, FAQs • IEC materials: Flip chart, flash cards, flyers, leaflets, banners, hoardings and standee | |
| Unit IV: Programme Media for Masses Unit Description: The students will be engaged in various learning activities related to application of programme media in field settings. | (No. of hours) 4 Weeks: XII-XV |
| Subtopics: <ul style="list-style-type: none"> • Tools preparation: Puppet shows & folk songs, • Performing arts: street plays, drama & theatre &, mime, skit and role plays • Significance of digital media: TV, community radio broadcast and various social media platforms | |

Practical component (if any) – Unit III & IV application based

(30 hours)

Essential readings

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

ENVIRONMENTAL IMPACT AND RISK ASSESSMENT

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|-----------|-----------------------------------|----------|---------------------|-------------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| ENVIRONMENTAL IMPACT AND RISK ASSESSMENT | 02 | 0 | 0 | 02 | Class XII with Science | NIL |

Learning Objectives

- To gain insights into the concepts of environmental impact assessment (EIA) and its relevance for sustainable development
- To acquire knowledge of the socio-ecological and economic perspectives of any developmental project.
- To evaluate methodologies to conduct and analyze EIA acceptable per prevalent regulations

Learning outcomes

The Learning Outcomes of this course are as follows.

After studying the course, the students will be able to:

- Conduct EIA of any developmental project and analyze its environmental and other implications
- Serve as consultant to different agencies working on EIA and a developmental plan
- Evolve strategies to ensure development and conservation hand-in-hand
- Formulate sustainable development strategies for any development plan varying in scale
- Identify and classify different development projects based on their sales and impacts on the environment

SYLLABUS: ENVIRONMENTAL IMPACT AND RISK ASSESSMENT

Practicals/Hands-on Exercises (02 Credits: 60 hours)

1. Based on the given project details, classify them as Category A and Category B1 and B2 projects.
2. Prepare the scope of any recent developmental project of Category A which received Environmental Clearance.

3. To prepare a questionnaire and compilation of primary data to study the scope of the project based on public participation.
4. Identify the impacts due to a Mining Project using the checklist method.
5. Based on the impacts identified in Activity 4, formulate mitigating measures for the project.
6. Determine the impacts due to a large-scale hydropower project in a given state using the matrix method and geo-spatial data,
7. Prepare an environmental management plan for a mining project.
8. To conduct a public hearing for any project and prepare a draft for the process.
9. Prepare a brief life cycle assessment of a smartphone.
10. Prepare a brief EIA report of a River Valley Project.

Teaching learning interface for practical skills

To impart training on technical and analytical skills related to the course objectives, a wide range of learning methods will be used, including (a) laboratory practicals; (b) field-work exercises; (c) customized exercises based on available data; (d) survey analyses; and (e) developing case studies; (f) demonstration and critical analyses; and (h) experiential learning individually and collectively.

Prospective Sectors:

As per the Ministry of Environment, Forests, & Climate Change (MoEF&CC), Govt. of India, ~30 sectors require EIA for Environmental Clearance before any project activity. Some of them include Mining, Oil and gas exploration, development & production, River valley, hydel, drainage and irrigation projects, thermal Power plants, Nuclear power projects, Coal washeries, Mineral, Metallurgical industries, Cement plants, Petroleum industry, Coke oven plants, Asbestos milling, Chlor-alkali industry, Soda ash Industry, Chemical fertilizers, Pesticides industry, Synthetic organic chemicals industry, Distilleries, Integrated paint industry, Pulp & paper industry, Induction/arc furnaces, Air ports, All ship breaking yards, Industrial estates, Common hazardous waste treatment, storage and disposal facilities, Highways, railways, transport terminals, mass rapid transport systems, Building and large construction projects, Townships, and area development projects.

Essential/recommended readings

- EIA 2020. Ministry of Environment, Forest and Climate Change, Draft Environment Impact Assessment Notification, 2020, <http://environmentclearance.nic.in/writereaddata/om/6998FGGHOI_Gaztte_EIA2020_Comments.pdf>.

- Mareddy, A.R. (2017) Environmental Impact Assessment Theory and Practices, Butterworth Heinemann.

Suggested readings

- Judith, P. 1999. Handbook of Environmental Impact Assessment. Blackwell Science.
- Lawrence, D.P., 2013. Impact assessment: practical solutions to recurrent problems and contemporary challenges. John Wiley & Sons.
- Marriott, B. 1997. Environmental Impact Assessment: A Practical Guide. McGraw-Hill, New York, USA.
- Petts, J. (1999). Handbook of Environmental Impact Assessment. Vol. 1, Blackwell Science.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

SUSTAINABILITY REPORTING

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------------------|-----------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| SUSTAINABILITY REPORTING | 02 | 0 | 0 | 02 | Class XII | NIL |

Learning Objectives

- To gain insights into the step-by-step process of writing a sustainability report using internationally acceptable standards.
- To evolve a holistic view of sustainability and understand the carrying capacity of ecosystems for human needs.
- To acquire skills to address sustainability challenges in a global context.
- To evaluate industrial/organizational processes/programmes based on the interconnections among economic, environmental, and social activities

Learning outcomes

The Learning Outcomes of this course are as follows.

After studying the course, the students will be able to:

- Develop a multi-disciplinary and holistic perspective of sustainability and identify key factors determining sustainability and associated benefits
- Write sustainability reports using universal, sector, and topic standards
- Explain sustainability challenges and effective methods to communicate it to different stakeholders
- Apply sustainability concepts, and GRI Standards for sustainable industries
- Serve as environmental consultants to different industries
- Advise governments on sustainable environmental policies

SYLLABUS: SUSTAINABILITY REPORTING

Practicals/Hands-on Exercises (02 Credits: 60 hours)

1. Investigate the framework for sustainability reporting outlined by global reporting initiatives (GRI)
2. Analyse universal, sector, and topic standards given by GRI

3. Develop sustainability reporting of your institute
4. Examine and report the sustainability of your residential society or residential area around your College
5. Compare and contrast sustainability reporting of the market in your neighbourhood and the selected mining industry
6. Visit a thermal power plant in and around your city and write its sustainability report
7. Using appropriate standards, evaluate the sustainability of a Cement Factory in your city
8. Field survey of a waste treatment facility in your city, assess their sustainability and give recommendations if required.
9. Analyze the potential and limitations of certified tools and software recommended by the GRI for sustainability reporting
10. Examine and evaluate sustainability reports available on different sectors and topics worldwide and give appropriate recommendations, if any.

Teaching learning interface for practical skills

To impart training on technical and analytical skills related to the course objectives, a wide range of learning methods will be used, including (a) laboratory practicals; (b) field-work exercises; (c) customized exercises based on available data; (d) survey analyses; and (e) developing case studies; (f) demonstration and critical analyses; and (h) experiential learning individually and collectively.

Prospective Sectors:

All Multi-National Companies, (b) Environmental and Sustainability Consultancies, (c) Environmental NGOs, (d) World Bank, and (e) UNDP

Essential/recommended readings

- Bini, L. and Bellucci, M., 2020. Integrated Sustainability Reporting: Linking Environmental and Social Information to Value Creation Processes. Springer.
- A Short-Introduction to GRI Standards.

Suggested readings

- Greiling, D., Traxler, A.A. and Stötzer, S., 2015. Sustainability reporting in the Austrian, German and Swiss public sector. International Journal of Public Sector Management.
- <https://www.globalreporting.org/reporting-support/reporting-tools/certified-software-and-tools/>

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

ENVIRONMENTAL AUDITING

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| ENVIRONMENTAL AUDITING | 02 | 0 | 0 | 02 | Class XII | NIL |

Learning Objectives

- To gain an understanding of the fundamental principles and components of environmental auditing
- To train in conducting an environmental audit in any organization/ institution
- To implement critical thinking toward environmental problems and formulate local solutions for their mitigation

Learning outcomes

After studying the course, the students will be able to:

- Conduct an environmental audit in a scientific manner
- Recommend organizations to adopt specific sustainable strategies
- Serve as catalyst to evolve sense of ownership and responsibility among organizations/industries towards solving local environmental problems.
- Pursue environmental auditing for higher studies and a future career.

SYLLABUS: ENVIRONMENTAL AUDITING

Practicals/Hands-on Exercises (02 Credits: 60 hours)

1. Prepare a working plan (in the form of a flowchart/ graphical abstract) for the environmental audit of any organization/ institution focusing on pre-audit, on-site and post-audit objectives and activities
2. Prepare a brief profile of any selected organization/ institution (Area, land use, green cover, organizational setup, demography etc.) and discuss its environmental policy and the environmental management systems
3. Prepare an interpretive electricity consumption report of the organization/ institution over a five-year period (both actual or arbitrary data can be used).

4. Prepare an interpretive water consumption report of the organization/ institution over a five-year period (both actual or arbitrary data can be used). Also, identify the sources of wastewater discharge and its management, if any.
5. Survey the campus and prepare a list of the plant/ animal (or both) diversity, highlighting its importance and threats faced.
6. Prepare a monthly air quality level dataset nearest to the institution's location, extracting data from the National Air Quality Index (CPCB) website. Prepare a report on causes of variation and measures taken by an organization to improve air quality levels
7. Prepare a comprehensive assessment report of Solid Waste Management at the organization/ institution highlighting compliance to Solid Waste Management Rules, 2016.
8. Formulate a scientifically sound protocol for identifying and disposing of e-waste and hazardous waste at any organization based on E-waste (management) rules, 2016 and Hazardous waste (management) rules, 2016.
9. Examine various environment-related practices and activities of the organization/ institution that have impacted the neighbouring communities and prepare a social audit questionnaire for studying the impact.
10. Compile the data, results, and analysis of all previous practicals and prepare a detailed environmental audit report of your selected organization/ institution.

Teaching learning interface for practical skills

To impart training on technical and analytical skills related to the course objectives, a wide range of learning methods will be used, including (a) laboratory practicals; (b) field-work exercises; (c) customized exercises based on available data; (d) survey analyses; and (e) developing case studies; (f) demonstration and critical analyses; and (h) experiential learning individually and collectively.

Prospective Sectors:

- (a) Universities/Colleges, (b) Environmental Consultancies, (c) Environmental NGOs, and (d) Indian Audit & Revenue Departments

Essential/recommended readings

- Cahill, L.B (2017). Environmental Health and Safety Audits: A Compendium of Thoughts and Trends, 2nd Edition, Bernan Press.
- Council, N.C., Britain, G. and Unit, E.F., 2011. Handbook for Phase 1 Habitat Survey: A Technique for Environmental Audit. Nature Conservancy Council.
- Ho G, Anda, M., Brennan, J., 2015. Water Auditing and Water Conservation. IWA Publishing
- Pain, S.W., 2010. Safety, Health, and Environmental Auditing: A Practical Guide. CRC Press.
- Thuman, A., Niehus, T., Younger, W.J., 2012. Handbook of Energy Audits, 9th ed. Routledge, Taylor and Francis
- Van Guilder, C.V., 2014. Environmental Audits. Mercury Learning & Information.

Suggested readings

- Barton, H., and Bruder N., 1993. A Guide to Local Environmental Auditing. Routledge, Taylor and Francis

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DOCUMENT PREPARATION & PRESENTATION SOFTWARE

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Document Preparation & Presentation Software | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives:

- To develop proficiency in the use of document preparation software such as document LaTeX, LibreOffice.
- To make a presentation using LaTeX, LibreOffice.
- To serve as a tool for conveying/communicating one's ideas, views, and observations.

Learning Outcomes

On completion of the course, a student will be able to

- Create a text document using LaTeX using a standard template.
- Incorporate well-formatted mathematical equations, algorithms, figures, tables and references in a document.
- Use Zotero for reference management.
- Format text, including alignment, emphasis and fonts.
- Handle basic aspects of document structure, including sections, subsections, paragraphs, and bulleted and enumerated lists.
- Page set a document including header, footer, and page numbering.
- Make a presentation.

Syllabus

Practical

Unit 1: Introduction

(4 Hours)

1. Create a LaTeX/ LibreOffice document having several paragraphs, including comments in LaTeX.
2. Organize content into sections, including preface/abstract. Using the article and book class of LaTeX. Handling errors.

Unit 2: Styling Pages (6 Hours)

1. Loading and using packages, setting margins, header and footer, and page orientation.
2. Organizing the document into multiple columns

Unit 3: Formatting Content (10 Hours)

1. Formatting text (styles, size, alignment)
2. Adding colours to a block of text/ page
3. Adding ordered and unordered lists
4. Inserting mathematical expressions – subscripts, superscripts, fractions, binomials, aligning equations, operators, Greek and mathematical symbols, and mathematical fonts.

Unit 4: Tables and Figures (10 Hours)

1. Create basic tables
2. Adding different types of borders to a table
3. Merging rows and columns
4. Splitting tables across multiple pages.
5. Incorporating figures and subfigures, explore different properties like rotation and scaling.

Unit 5: Algorithms and Equations (12 hours)

1. Incorporating algorithms, body typesetting, organizing algorithms across multiple pages.
2. Incorporating equations, indentation, and captioning.

Unit 6: Referencing and Indexing (6 hours)

1. Insert captions, labels, and references
2. Incorporate cross-referencing (refer to sections, table, and images)
3. Incorporate a bibliography
4. Create a back index.

Unit 7: Making Presentations (12 hours)

1. Create a slideshow
2. Incorporate logo
3. Highlight important points
4. Create a title page
5. Make a table of contents
6. Incorporate special effects in a slideshow.

Exercises:

For the following figures, create LaTeX documents using concepts from above:

1.

Hello World!

Prof. Naveen Kumar

November 15, 2022

Hello World! Today I am learning L^AT_EX. L^AT_EX is a great program for writing math. I can write in line math such as $a^2 + b^2 = c^2$. I can also give equations their own space:

$$\gamma^2 + \theta^2 = \omega^2$$

2.

Integrals, Sums and Limits

Dr. Neeraj Kumar Sharma

1 Integrals

Integral $\int_a^b x^2 dx$ inside text.

The same integral on display:

$$\int_a^b x^2 dx$$

and multiple integrals:

$$\begin{aligned} &\iint_V \mu(u, v) du dv \\ &\iiint_V \mu(u, v, w) du dv dw \\ &\oint_V f(s) ds \end{aligned}$$

2 Sums and products

Sum $\sum_{n=1}^{\infty} 2^{-n} = 1$ inside text.

The same sum on display:

$$\sum_{n=1}^{\infty} 2^{-n} = 1$$

Product $\prod_{i=a}^b f(i)$ inside text.

The same product on display:

$$\prod_{i=a}^b f(i)$$

3 Limits

Limit $\lim_{x \rightarrow \infty} f(x)$ inside text.

The same limit on display:

$$\lim_{x \rightarrow \infty} f(x)$$

3.

Equations

Prof. Naveen Kumar¹, Dr. Neeraj Kumar Sharma², and Sakeena Shahid³

¹Department of Computer Science, University of Delhi

²Ram Lal Anand College, University of Delhi

³SGTB Khalsa College, University of Delhi

November 15, 2022

1 Maxwell's Equations

“Maxwell's equations” are named for James Clark Maxwell and are as follow:

$$\vec{\nabla} \cdot \vec{E} = \frac{\rho}{\epsilon_0} \quad \text{Gauss's Law} \quad (1)$$

$$\vec{\nabla} \cdot \vec{B} = 0 \quad \text{Gauss's Law for Magnetism} \quad (2)$$

$$\vec{\nabla} \times \vec{E} = -\frac{\partial \vec{B}}{\partial t} \quad \text{Faraday's Law of Induction} \quad (3)$$

$$\vec{\nabla} \times \vec{B} = \mu_0 \left(\epsilon_0 \frac{\partial \vec{E}}{\partial t} + \vec{J} \right) \quad \text{Ampere's Circuital Law} \quad (4)$$

Equations 1, 2, 3, and 4 are some of the most important in Physics.

2 Matrix Equations

$$\begin{pmatrix} a_{11} & a_{12} & \cdots & a_{1n} \\ a_{21} & a_{22} & \cdots & a_{2n} \\ \vdots & \vdots & \ddots & \vdots \\ a_{n1} & a_{n2} & \cdots & a_{nn} \end{pmatrix} \begin{bmatrix} v_1 \\ v_2 \\ \vdots \\ v_n \end{bmatrix} = \begin{bmatrix} w_1 \\ w_2 \\ \vdots \\ w_n \end{bmatrix}$$

4.

List of mathematical functions:

- Trigonometric functions

- sine
- cosine
- tangent

- Special functions

- Beta function
- Gamma function
- Riemann zeta function

5. Add the following algorithm to the document.

Algorithm 1: Example code

Input: Your Input

Output: Your output

Data: Testing set x

```
1  $\sum_{i=1}^{\infty} := 0$                                      // this is a comment
  /* Now this is an if...else conditional loop          */
2 if Condition 1 then
3   | Do something                                     // this is another comment
4   | if sub-Condition then
5   |   | Do a lot
6 else if Condition 2 then
7   | Do Otherwise
  /* Now this is a for loop                             */
8   | for sequence do
9   |   | loop instructions
10 else
11   | Do the rest
  /* Now this is a While loop                           */
12 while Condition do
13   | Do something
```

6.

| | | |
|-----------------|-------|-------|
| col1 | col2 | col3 |
| Multiple row | cell2 | cell3 |
| | cell5 | cell6 |
| | cell8 | cell9 |

7.

| Country List | | |
|------------------------------|---------------------|-------------|
| Country Name or Area Name | ISO ALPHA 2 Code | ISO ALPHA 3 |
| Afghanistan | AF | AFG |
| Aland Islands | AX | ALA |
| Albania | AL | ALB |
| Algeria | DZ | DZA |
| American Samoa | AS | ASM |
| Andorra | AD | AND |
| Angola | AO | AGO |

8. Insert four sub-figures as given below, and add captions. Also, refer to these sub-figures in the text.

Figure 1: This is a figure containing several subfigures.

In the text, you can refer to subfigures of figure 1 as 1a, 1b, 1c and 1d and to the sub-index as (a), (b), (c) and (d).

9. Add a table of contents, a list of figures, and a list of tables in the document as given below.

Contents

| | |
|-------------------|---|
| Table of contents | 1 |
| 1 First Section | 2 |
| 2 Second Section | 2 |

List of Tables

| | |
|--------------------------|---|
| 1 Just a table | 2 |
|--------------------------|---|

List of Figures

| | |
|------------------------------|---|
| 1 This is an image | 2 |
|------------------------------|---|

10. Add a list of references in the document as given below and cite them in the text.

This document is an example of `natbib` package using in bibliography management. Three items are cited: *The L^AT_EX Companion* book [2], the Einstein journal paper Einstein [1], and the Donald Knuth's website [3]. The L^AT_EX related items are [2, 3].

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Innovation and Entrepreneurship | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The primary objectives of the course will be to:

- Encourage the process of creative thinking and innovation
- Build an entrepreneurial perspective to identify and tackle problems and explore new opportunities
- Gain insight into building business models and plans
- Identify tools and strategies that entrepreneurs may use for start-up, innovation and reinvention
- Understand how to go from an idea to product and scale it up for sustainability
- Develop skills to work in teams and build connections, collaborations and social networks .

Learning Outcomes

By the end of the course students should be able to:

- Identify and comprehend the concepts of creativity, innovation and invention in various contexts.
- Enrich their theoretical and conceptual foundations in entrepreneurship.
- Gain hands-on experience that shall empower them to identify business and social opportunities and venture in the entrepreneurial landscape.
- Prepare themselves to take informed decisions in establishing start-ups and ongoing innovation in organisations.

PEDAGOGY

While suitable concepts and theory will be utilized, the emphasis of the course will be on inquiry driven hands-on activities and experiential learning in a team setting. As this is essentially a group activity based course, the two lectures scheduled for each week shall be held together. The class to be split up ideally in groups of 5 – 7 students each, who will work

together for the rest of the semester on identifying a specific problem and by semester-end present a feasible innovative prototype capable of being funded as a start-up.

SYLLABUS

Unit I: Understanding Creativity

- Understanding the concept and process of creativity; students exploring within themselves the nature of the creative process; approaches to understanding creativity (Ref. B1)
- Differentiate between invention and innovation (Ref. OR1)
- Understanding entrepreneurial mindset and skills (creativity, decision making, risktaking behaviour, networking) and entrepreneurship in different contexts (eg. Social, Cooperative, Commercial, Public, Not for Profit organisations) (Ref. B1)
- Case studies of some successful innovations/start-ups – Different group can be given a different Case Study and the groups can have a discussion on same (Ref. Suggestive Case Studies A)

(15 practical hours)

Unit II: Ideation

- Identifying a specific problem through observation, contemplation, networking and research (Ref. B2)
- Generating ideas for problem solving using mind mapping, brainstorming, focus groups, idea generation tool kit (SCAMPER) (Ref. B1)
- Learning through failures of others – case studies of some ventures that could not sustain – Different group can be given a different Case Study and the groups can have a discussion on same (Ref. Suggestive Case Studies B)

(15 practical hours)

Unit III: Understanding the business

- Building a business plan using the lean canvas model (Ref. OR2)
- Understanding customers/stakeholders and evaluating the business plan through survey/questionnaire/interview/secondary research (Ref. B1 and B2)
- Designing, prototyping and iteration (Ref. B2)
- Networking and growth strategies (Ref. B3)
- Building and managing organisations (Ref. B3)
- Role of leadership and team based culture (Ref. B3 and OR4)

(20 practical hours)

Unit IV: Venturing Forth

- Financing the innovation: pitching and communicating the idea
- Sources of finance: crowdfunding, venture capital, equity funds, angel investing, borrowing (including government initiatives, bank and public funded schemes) (Ref. OR5 and OR6)
- Various forms of IPR (patent, copyright, trademark, geographical indication, industrial design) (Ref. OR7 and OR8)
- Setting and scaling up (Ref. B3)
- Entrepreneurial resilience and ongoing creativity (Ref. B1)

(10 practical hours)

3. HMT watches
4. Atlas Cycles
5. Jet Airways
6. Kodak
7. Stayzilla
8. SKS Microfinance IPO
9. Satyam Computers
10. Groupon Inc.

Weekly Plan:

Week I: Understanding the concept and process of creativity; Approaches to understanding creativity; differentiate between invention and innovation.

Week II: Activity week - Students exploring within themselves the nature of the creative process in groups (eg. exploring the surroundings for possible problems and challenges that may have innovative solutions).

Week III: Understanding entrepreneurial mindset and skills (creativity, decision making, risk taking behaviour, networking) in different contexts through discussion of a case study (may select one case study from Suggestive Case Studies A).

Weeks IV - IX: Activity Weeks - The class to be split up ideally in groups of 5 – 7 students each, who will work together for the rest of the semester on identifying a specific problem and by semester-end present a feasible innovative prototype capable of being funded as a start-up.

Week IV: To begin with, each group shall identify a problem through observation, contemplation, brainstorming, networking and research.

Week V: Each group to generate ideas for solving their identified problem using mind mapping, focus groups, idea generation tool kit (SCAMPER).

Week VI: Each group to critically assess the feasibility of the proposed ideas by learning through the failures of others – case studies of some ventures that could not sustain (may use a case study from Suggestive Case Studies B).

Week VII: Each group to build a business plan using the lean canvas model and survey/questionnaire/interview/secondary research.

Week VIII: Each group to design and prototype their proposed business solution/model/product.

Week IX: The groups evaluate their proposed business plan/model using feedback from networking. Submission of formal business plan (written) by each group.

Week X: Formulating growth/scaling up strategies; building and managing organisations; role of leadership and team based culture, entrepreneurial resilience and ongoing creativity.

Week XI: Financing the innovation: pitching and communicating the idea. Sources of finance: crowdfunding, venture capital, equity funds, angel investing, borrowing (including government initiatives, bank and public funded schemes)

Week XII: Various forms of IPR (patent, copyright, trademark, geographical indication, industrial design)

Week XIII, XIV and XV: Activity weeks - Submission of final project report (written) and presentation (oral) by each group, Viva.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

IT Skills and Data Analysis - I

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|------------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| IT Skills and Data Analysis - I | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The primary objectives of the course will be to:

- Familiarise the student with the quantitative skills required for representing and interpreting data for the purpose of decision making.
- Equip the student with some fundamental concepts, which play a critical role in understanding and visualizing real world data.
- Enable the student to analyze data and problem situations using relevant IT tools.

Learning Outcomes

By the end of the course students will be able to

- Represent and interpret data in tabular and graphical forms
- Understand and interpret the measures of central tendency and dispersion.
- Use IT tools such as spreadsheets to visualise and analyse data.

PEDAGOGY

Relevant concepts and theory will be introduced which will be supplemented by hands-on activities enabled by the use of spreadsheets. This is a two credit course and will comprise two lecture periods per week. As this is essentially an activity-based course, it will involve two consecutive lecture periods, once in a week.

SYLLABUS

Practical

Unit I : What is Statistics ? (24 hours)

This unit provides an introduction to the fundamentals of datasets, sources of data, frequency distributions and graphical representations of data. The aim is to give students a hands-on experience of initiating data analysis through a spreadsheet.

- Concept of datasets (Variables, Observations)
Reference 1, Chapter 2
- Different types of variables (Quantitative and Qualitative)
Reference 1, Chapter 2
- Distinction between primary and secondary sources of data
Reference 1, Chapter 2
- Basic idea of using questionnaire to collect primary data for analysis
Reference 2, Chapter 1 [Section 1.6]
- How to construct a questionnaire
Reference 1, Chapter 1
- Concept of frequency distribution: cumulative and relative frequencies
Reference 2, Chapter 2
- Introduction to spreadsheet
Reference 2, Chapter 2
 - Tabular and graphical presentation of data: data tables, frequency curve, histogram, bar graphs, pie charts (through the use of spreadsheets)
Reference 2, Chapter 2

Unit II: Measures of Central Tendency and Dispersion (36 hours)

The focus of this unit will be to familiarise the student with summary statistics to describe datasets. In particular, two important characteristics of data, viz., central tendency and dispersion, will be used to summarise datasets using a spreadsheet. The concept of the Normal distribution and its characteristics will be discussed to highlight its relevance in modelling real life phenomenon.

- Measures of central tendency: mean, median, mode
Reference 2, Chapter 3
- Examples of situations where it is appropriate to use the mean, median and mode as a measure of central tendency
Reference 2, Chapter 3
- Weighted mean
Reference 2, Chapter 3
- Measures of dispersion: range, variance, standard deviation
Reference 2, Chapter 3

- Quartiles, deciles and percentiles
Reference 2, Chapter 3
- Visualize the measures of central tendency and dispersion through frequency curve and histogram
Reference 2, Chapter 3
- Skewness and kurtosis
Reference 2, Chapter 3
- Normal curve and its basic properties : visual representation of population characteristics (height, weight, IQ etc.)
Reference 2, Chapter 5 [Section 5.6]

References (Readings and Resources)

1. Rowntree, D., Statistics without tears - A primer for non-mathematicians, Allyn and Bacon, 2018.
2. Levin, Rubin, Rastogi and Siddiqui, Statistics for Management, 7th Edn, 2014

Suggested Data Sources

The following data sets are suggested to carry out the activities

1. <https://data.worldbank.org/>
2. <https://www.statista.com/>
3. <https://data.gov.in/>
4. <https://censusindia.gov.in/>
5. <https://www.kaggle.com/>
6. <http://data.un.org/>

Weekly Plan

Weeks I and II: Students learn about the concept of datasets (Variables, Observations) ; Different type of Variables (Quantitative and Qualitative); Distinction between primary and secondary sources of data

Weeks III and IV: Basic idea of using questionnaire and how to construct a it; Concept of frequency distribution - cumulative and relative frequencies; Introduction to spreadsheet

Weeks V and VI: Tabular and graphical presentation of data: data tables, frequency curve, histogram, bar graphs, pie charts. Students to explore various representations on spreadsheet using datasets

Weeks VII and VIII: Introduction of Measures of Central Tendency: Mean, Median, Mode through appropriate examples explaining the use of each one of them in various situations. Understanding the concept of Weighted mean;

Weeks IX and X: Measures of dispersion: Range, Variance, Standard deviation; Visualizing the measures of central tendency and dispersion through frequency curve and histogram. Understanding Quartiles, deciles and percentiles numerically.

Weeks XI and XII: Representation of population characteristics using the basic properties of a Normal Curve, skewness and kurtosis.

Weeks XIII and XIV: Assignments based on Units 1 and 2 using spreadsheets to consolidate the learning of concepts covered.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

IT Skills and Data Analysis - II

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| IT Skills and Data Analysis - II | 2 | 0 | 0 | 2 | Class XII | IT Skills and Data Analysis - I |

Learning Objectives

The primary objectives of the course will be to

- Familiarise the student with the quantitative skills required for correlating the data for the purpose of decision making.
- Equip the student to visualise functions which play a critical role in understanding and visualizing real world data.
- Enable the student to analyze data and problem situations using relevant IT tools.

Learning Outcomes

By the end of the course students will be able to

- Establish relationships between variables using correlation and regression analysis.
- Visualize functions and differentiate between linear and nonlinear functions.
- Use IT tools such as spreadsheets to visualise and analyse data.

PEDAGOGY

Relevant concepts and theory will be introduced which will be supplemented by hands-on activities enabled by the use of spreadsheets. This is a two credit course and will comprise two lecture periods per week. As this is essentially an activity-based course, it will involve two consecutive lecture periods, once in a week.

SYLLABUS

Unit I: Functions and their graphical representations (16 hours)

This unit introduces the graphical visualisation of functions to understand the relationship between two variables.

- Definition and graphical representation of a function, vertical line test
Reference 3
- Polynomial functions: linear, quadratic and cubic functions
Reference 3
- Reciprocal, exponential and logarithmic functions
Reference 3
- Concept of slope of a function through graphical representation
Reference 3

Unit II: Relationship between Variables (28 hours)

Students will learn about scatter diagrams and correlation analysis as a means to describe the nature and strength of association between two variables. The concept of regression analysis will be introduced as a method for quantifying the relationship between two variables. Further, multiple linear regression will be discussed for situations where more than one independent variable is needed to estimate the dependent variable. The focus will be mainly on interpreting estimated regression coefficients.

- Scatter diagrams
Reference 2, Chapter 12
- Correlation analysis : measure and interpretation of correlation coefficient and coefficient of determination
Reference 2, Chapter 12
- Hypotheses, model specification and testing
Reference 2, Chapter 12
- Bi-variate regression analysis: method of least squares, curve of best fit as a model for prediction
Reference 2, Chapter 12
- Multiple Linear Regression
Reference 2, Chapter 13

Weeks 12 – 14: Project Presentations and Viva (16 hours)

References (Readings and Resources)

1. Rowntree, D., Statistics without tears - A primer for non-mathematicians, Allyn and Bacon, 2018.

2. Levin, Rubin, Rastogi and Siddiqui, Statistics for Management, 7th Edn, 2014
3. Boundless Algebra : <https://courses.lumenlearning.com/boundless-algebra/>

Suggested Data Sources

The following data sets are suggested to carry out the activities

1. <https://data.worldbank.org/>
2. <https://www.statista.com/>
3. <https://data.gov.in/>
4. <https://censusindia.gov.in/>
5. <https://www.kaggle.com/>
6. <http://data.un.org/>

Weekly Plan

Weeks I and II: Understanding the definition of a function; graphical representation of a function and vertical line test; visualising various kinds of functions (Linear, quadratic and cubic functions)

Weeks III and IV: Reciprocal, exponential and logarithmic functions; Interpreting and visualising the concept of slope of a function through graphical representations.

Weeks V and VI: Scatter Diagrams; Correlation analysis - measure and interpretation of correlation coefficient and coefficient of determination.

Weeks VII to IX: Hypotheses, model specification and testing; Understanding Bi-variate Regression analysis: Method of Least Squares; Curve of best fit as a model for prediction.

Weeks X and XI: Multiple Regression Analysis

Weeks XII to XIV: Project Presentations and Viva

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

R Programming for Business Analytics

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| R Programming for Business Analytics | 2 | 0 | 0 | 2 | XII pass | NIL |

Learning Objectives

- To introduce the basic concepts in R programming.
- To equip the students with the popular statistical programming language R.
- To familiarize the students with utility of 'R' for managerial decision making.

Learning outcomes

Upon successful completion of this course the student will be able to:

- Learn Syntax and Semantics of R Programming
- Understand the file system and data handling in R.
- Visualize and analyse the data using statistical methods.
- Apply best practice model design methodologies to real problems using R

SYLLABUS

Unit I: Introduction to R, Data Handling and Data Visualization (16 hours)

Introduction to R and familiarization of R Studio, Basic components in R Studio. R Syntax and programming, Understanding *tidyverse*, *tibble*, *dplyr*, *ggplot2*, *tidyr*, *purrr*, *readr*, *forcats*, *stringr* for tidying, manipulating and plotting data,

Unit II: Optimization Models using R (12 hours)

Linear Programming Models, Optimization models, understanding *optim()*,

Unit III: Machine Learning with R - Introduction to Supervised Learning

(16 hours)

Classification based on similarities with k-nearest neighbours, odds with logistic regression, maximizing separation with discriminant analysis, classifying with decision trees, regression with kNN, random forest, XGBoost, Understanding *mlr*, *classif.*, *regr.*

Unit IV: Machine Learning with R - Introduction to Unsupervised Learning (16 hours)

Dimension Reduction- Maximizing variance with Principal Component Analysis; k-mean cluster, understanding *cluster*. .

Essential/recommended readings

- Boehmke, B. & Brandon, G.(2020). Hands-on Machine Learning with R, CRC Press.
- Horton, N.J. & Kleinman, K.(2015) Using R & R Studio for Data Management, Statistical Analysis, and Graphics, CRC Press.
- Peng, R. D. (2016). *R programming for data science* (pp. 86-181). Victoria, BC, Canada: Leanpub.
- Lander, J. P. (2014). *R for everyone: Advanced analytics and graphics*. Pearson Education.
- Teetor, P. (2011). *R cookbook: Proven recipes for data analysis, statistics, and graphics*. " O'Reilly Media, Inc."
- Zhao, Y., & Cen, Y. (2013). *Data mining applications with R*. Academic Press.

Note: Learners are advised to use the latest edition of readings.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

YOGA IN PRACTICE

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Yoga in Practice | 2 | 0 | 0 | 2 | Class XII Pass | NIL |

Total Credits: 02

Learning Objectives:

Students will be able to discern real significance of yogic operations from original sources and will be prone to practicing in their day to day life.

Learning Outcomes:

- (i) Student will form an understanding of the concept of yoga.
- (ii) Students will learn various aspects of the science of yoga.
- (iii) Theoretical and practical knowledge of Aasanas and pranayams to lead a balanced life.

SYLLABUS OF YOGA IN PRACTICE

Practical Unit: I

30 hours

- (i) Definition and types of yoga:

Karma yoga, Gyana yoga, Bhakti yoga, Laya yoga, Raja yoga, Hatha yoga, Mantra yoga,

Kundalini yoga. (योग एवं ४ांश – अध्याय -१)

- (ii) Ashtanga Yoga:

Yam- Ahinsa, Satya, Asteya, Brahmacharya, Aparigrah.

Niyam- Saucha, Santosha, Tapa, Swadhyaya, Ishwarpranidhana

Asan, Pranayam- (the types of Pranayama: Puraka, rechak & Kumbhaka), Pratyahara, Dharana, Dhyana & Samadhi etc.

- (iii) Shat Chakra,s:

Mooladhara, Swadhishtana, Manipur, Anahata, Vishudha, Aagya, Sahasrara- (Sahasradhara chakra). (योग एवं ४ांश – अध्याय – २-३)

Unit: II

30 hours

Asana,s and their advantage:-

(i) Asana in standing position:

Surya Namaskara, Tadasana, Padahastana, Garudasana, Natarajasana, Cakrasana.

(ii) Asana in sitting position:

Padmasana, Vajrasana, Siddhasana, Bhadrasana, Gomukhasana, Shashankasana, Mandukasana, Kukkutasana.

(iii) Asana in stomach side position:

Dhanurasana, Bhujangasana, Mayurasana, Marjarasana, Makarasana.

(iv) Asana in backbone side position:

Uttanapadasana, Naukasana, Sarvangasana, Sheershasana, Savasana etc.

(v) Practice of pranayama- Purak, Rechak and Kumbhaka. (योग एवं 4ाव - अाय - ३-४, ६)

Essential Readings:

1. योग दर्शन – महर्षि पतंजलि, टीकाकार-हरकृ ददास गोयका, गीता प्रेस, गोरखपुर, उत्तर प्रदेश,

४० वां पुनर्मुद्रण ।

2. योग एवं 4ाव - डॉ० विजय कुमार, चौखटा विभारती, वाराणसी, उत्तर प्रदेश, प्र० संरण - २०२१ ।

3. प्राणायाम रह4 - (वैयानिक तों के साथ) - 4ामी रामदेव, दिद प्रकाशन, दिद योग मर, पतंजलि योगपीठ ,

कनखल, हरार ।

4. योग साधना एवं योग चिकित्ा रह4- 4ामी रामदेव, दिद प्रकाशन, दिद योग मर, पतंजलि योगपीठ ,

कनखल, हरार ।

5. शतयुव पुष - 4ामी रामेराना सर4ती, आ प्रकाशन, कुं डे वालान, दिद-सं० २०६२ । (विदिक पुकालय, मुई)

Suggestive Readings:

1. योग चिरपी - 4ामी अै तान सर4ती, गुकुल वृावन वातक शोध संान, आसफ अली रोड, नई दिद-२००६ ।

2. ढायाम का मह - 4ामी ओमान सर4ती, हरयाणा साहिवा संान, गुकुल झर, हरयाणा - २००६ ।

3. आयुवदीय पउक चिकित्ा- आचार्य विहाधर शु4, भारतीय केीय चिकित्ा पषद्, नई दिद- 1

4. रोग और योग- 4ामी कमन सर4ती, योग पके शन, मुंगेर, बिहार, संरण- २०१३ ।

5. सूर्य योग विहा - राजीव जैन त्रिलोक, मंजुल पशिंग हाउस, भोपाल, म प्रदेश, संरण -

२००५ ।

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Floriculture

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Floriculture | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

- To acquaint students with the basic principles and importance of Floriculture.
- To teach students about flowering plants that can be grown in different seasons in Delhi-NCR.
- To make students aware about exotic flowering plants of ornamental value and their propagation in laboratories and greenhouses.
- To provide information about employment, business opportunities and other avenues in the Floriculture sector (Floriculturist).

Learning Outcomes

After completion of this course learners will be able to:

- identify and describe the ornamental flowering plants in Delhi-NCR.
- practice the methods of preparing soil and water, cultivation and propagation methods.
- design, prepare and apply appropriate combinations of plants and methods of cultivation for commercial setup.
- adapt to the job role of Floriculturist (employment/ entrepreneurship)

SYLLABUS

Practicals: 60 hours

1. Introduction to floriculture, tools and equipments. 4 hours
2. Study of diversity in shape, size, and colour of flowers (including basic botany, nomenclature, common name and general uses). 4 hours
3. Identification and preparation of an inventory of herbaceous flowering plants, climbers, shrubs, and trees around the campus. 4 hours
4. Study the various physico-chemical soil properties for understanding different soils/soil-types. 8 hours
5. Methods of preparation of floral beds, soil preparation, greenhouse design and

- | | |
|---------------------|---------|
| fumigation methods. | 8 hours |
|---------------------|---------|
6. Methods of seed sowing and raising flowering plants through seeds, bulbs and through vegetative methods in planters, containers and in outdoor environments. Role of light, plant growth regulators and nutrients in blooming and flowering. 8 hours
 7. Bacterial and fungal diseases and pests of ornamental flowers and their management. 4 hours
 8. Interior decoration methods, flower arrangements (Japanese, Western and Indian). 4 hours
 9. Harvesting, methods to increase the shelf life of flowers, post-harvest care and marketing platforms for the floriculture industry. 8 hours
 10. Field visit to nearby nursery/garden to understand basic aspects of Garden design. 4 hours
 11. Project Report on any five flowering plants that are grown commercially, their share in the global market, methods used for selling the products and importance of the floriculture industry in job creation. 4 hours

Essential Readings:

1. Randhawa, G.S., Mukhopadhyay, A. (1986). Floriculture in India. New York, NY: Allied Publishers.
2. Larson, R. A. (Ed.). (2012). Introduction to floriculture. Elsevier.

Suggestive Readings:

1. Pal, S. L. (2019). Role of plant growth regulators in floriculture: An overview. J. Pharmacogn. Phytochem, 8, 789-796.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Mushroom Culture and Technology I

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|-----------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Mushroom Culture and Technology I | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning objectives

To make students aware about

- mushroom growing techniques.
- medicinal and nutritional value of mushrooms.

Learning Outcomes

After successful completion of the course, students will be able to:

- practice the techniques for cultivation of various edible mushrooms
- setup entrepreneurial small scale units for self-employment
- apply the skills as Mushroom Grower in large scale industries.

SYLLABUS

Practical**: 60 hours

** Specimens and examples studied may vary depending on seasonal factors and availability

1. To study the principle and operation of Autoclave, Incubator, Laminar Air Flow/ BSL 2 facility. 4 hours
2. To study edible mushrooms (*Agaricus*, *Pleurotus*, *Boletus*, *Lentinula*, *Calocybe*, *Volvariella*, *Morchella*). 4 hours
3. To study poisonous mushrooms (*Amanita*, *Cortinarius*, *Psilocybe*, *Coprinopsis*). 4 hours
4. To study medicinal mushrooms (*Ganoderma*, *Ophiocordyceps*, *Chaga*, *Hericium*).

- | | |
|--|---------|
| | 4 hours |
| 5. Preparation of various types of compost and media which can be used for cultivation of mushroom. | 4 hours |
| 6. To study the common fungal, bacterial, viral, and insect borne diseases of mushrooms (any 2 from each). | 4 hours |
| 7. To study the cultivation technique of <i>Agaricus</i> mushroom. | 4 hours |
| 8. To study the cultivation technique of <i>Pleurotus</i> mushroom. | 4 hours |
| 9. To study the cultivation technique of <i>Calocybe/ Volvariella</i> mushroom. | 4 hours |
| 10. To study the cultivation technique of <i>Ganoderma</i> mushroom. | 4 hours |
| 11. To study the nutritional value and market value of mushrooms, and post-harvest technologies like packaging and preservation. | 4 hours |
| 12. Various requirements for setting up a mushroom cultivation unit (“kuccha” or cemented house). | 4 hours |
| 13. Entrepreneurship in cultivation of mushrooms. | 4 hours |
| 14. Government policies related to the promotion of mushroom cultivation. | 4 hours |
| 15. Visit to an Institute or Center conducting mushroom cultivation (Report to be submitted). | 4 hours |

Essential Readings:

1. Bahl, N. (2015). Hand Book on Mushroom. Page no. 1-166. Oxford & IBH Publishing Company.
2. Russell, S. (2014). The Essential Guide To Cultivating Mushroom. Storey Publishing. North Adams, M.A. 01247.
3. Zied, D. C., Gimenez, A. P. (017) Edible and Medicinal Mushroom page no. 1-585. John Wiley & Sons Ltd. UK.
4. Chang, S.T., Miles, P.G. (2004) Mushrooms Cultivation, Nutritional Value, Medicinal effect and Environmental Impact, CRC Press.
5. Fletcher, J.T., Gaze, R.H. (2007). Mushroom Pest and Disease Control. CRC Press.
6. Ahlawat, O.P., Tewari , R.P. (2007) .Cultivation Technology Of Paddy Straw Mushroom (*Volvariella volvacea*). Pages 1-44 National Research Center for Mushroom (Indian Council of Agricultural Research) Chambaghat, Solan (HP).
7. Rai, R.D., Arumuganathan, Y. (2008). Post Harvest Technology of Mushrooms. National Research Center for Mushroom (Indian Council of Agricultural Research) Chambaghat, Solan (HP)

8. Singh, M., Vijay, B., Kamal, S., Wakchaure, G.C. (2011) . Mushrooms Cultivation, Marketing and Consumption., Publishers Directorate of Mushroom Research (ICAR) Chambaghat, Solan.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Hydroponic and Aeroponic Farming

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Hydroponic and Aeroponic Farming | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning objectives:

- The objective of the course is to provide hands-on experience to students on various aspects of hydroponics and aeroponics.
- To make students self-reliant and employable by providing the necessary knowledge and experience to establish hydroponic and aeroponic systems.

Learning Outcomes:

After completing the course, learners will be able to:

- develop basic hydroponics and aeroponics facilities at any given location (pilot scale and/or industrial scale).
- devise and implement a strategy for marketing of the product.
- apply the knowledge to fulfill certification rules and various government policies.
- establish themselves as entrepreneurs (Hydroponic cultivator).

Syllabus

Practical:

1. Study of techniques used in hydroponics (Circulating methods such as Nutrient Film Technique (NFT), Deep Flow Technique (DFT), Dutch bucket; Non circulating methods such as Root dipping, Floating, Capillary action; Aeroponics such as root mist and fog feed techniques). 8 hours
2. Study of various instruments used in hydroponics (Pressure gauge, Filters, PVC Tanks, Venturi/Reciprocating Pump/Mixing tank, EC meter, pH meter, TDS meter, water pump, net cups, air pump, thermometer, lux meter, drip irrigation system. 8 hours

3. Construction of sustainable hydroponic and aeroponic units (including greenhouse facilities) 8 hours
4. Preparation of growth media for Hydroponics. 4 hours
5. Estimation of NPK, DO, TDS, pH of growth media. 4 hours
6. Study of suitable conditions for Hydroponics-quality, light intensity, photoperiod and temperature. 4 hours
7. Growing a leafy vegetable/fruity vegetable/medicinal herb /aromatic plant in Hydroponics /Aeroponic solution. 16 hours
8. Study of safety measures, certification standards and government policies. 4 hours
9. Visit to Hydroponic/Aquaculture/Aeroponic farm/Institute. 4 hours

Essential Readings:

1. Meier Schwarz. (1995). Soilless Culture Management. Advanced Series in Agricultural Sciences, vol 24. Springer, Berlin.
2. Hasan, M.; Sabir, N.; Singh, A.K.; Singh, M.C.; Patel, N.; Khanna, M.; Rai, T.; and Pragnya, P. (2018). Hydroponics Technology for Horticultural Crops, Tech. Bull. TB-ICN 188/2018. Publ. by I.A.R.I., New Delhi.
3. Misra, R.L., Misra S. (2017). Soilless Crop production. Daya Publishing House, Astral

Suggestive Readings:

1. Goddek, S., Joyce, A., Kotzen, B., Burnell, G.M. (2019). Aquaponics Food Production Systems. Springer, Cham.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Viewing and Capturing Diversity in Nature

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Viewing and Capturing Diversity in Nature | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning objectives

- Understand fundamentals of digital cameras and smartphone photography technology.
- Develop a working knowledge of digital image analysis and processing.
- Understand the importance and use of Nature photography in business and as career goal.
- Enhance appreciation for the tremendous aesthetics inherent in nature.

Learning Outcomes

On successful completion of this course, a student will be able to:

- Describe and use the digital camera and smartphone camera functions and their applications
- employ different photographic equipment to enhance their photographic skills and create digital resources.
- discriminate between the photographic variables with reference to weather and season.
- employ the photographic skills in various professions and for entrepreneurship.

Syllabus

Practicals: 60 hours

1. To study the parts of a digital camera. 4 hours
2. To study the principle and working of digital camera/ smartphone camera. 4 hours
3. Working and handling of light microscopes (Dissection and Compound). 4 hours
4. Study of plant forms through microscopic lens (Single-celled, colonial forms, filamentous forms, multicellular and complex forms). 8 hours

5. To study techniques of capturing shots (using light and lenses effectively, macro and micro photography, wide angle and close-ups). 4 hours
6. Study of plant adaptations through photographs (Aquatic and desert plants). 4 hours
7. To capture and understand the Ecological Interactions. 8 hours
8. Identification of different plant life forms through online available tools/ search engines. 8 hours
9. Outdoor/ Campus Photography: Plants, Environment, Landscapes and Cityscape. 4 hours
10. Foldscope: The domestic microscope. Use the Foldscope to explore microscopic organisms in pond water. 4 hours
11. Project Work: To make a portfolio of diverse landscaping patterns/ selected themes through outdoor visits. 8 hours

Essential Readings:

1. Ang., T. (2008). Fundamentals of modern Photography. London, Mitchell.
2. Freeman Patterson “The Art of Seeing” by Key Porter Books.
3. Tim Fitzharris “Landscape Photography” Firefly Books.
4. Kelby, S. (2012). The digital photography book. Peachpit Press.
5. Langford, M., Fox, A., and Smith, R.S. (2013). Langford basic photography: the guide for serious photographers. Amsterdam: Focal Press/Elsevier.
6. Peterson, B. (2016). Understanding exposure: how to shoot great photographs with any camera. AmPhoto Books.

Suggestive readings:

1. Sharma P.D. (2008) Ecology and Environment. Rastogi Publishers.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Plant Aromatics and Perfumery

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|--------------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Plant Aromatics and Perfumery | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning objectives

- Provide the basic understanding of aromatic and medicinal plants including classification and methods of extracting essential oils.
- Practical demonstration of extraction and quality assessment of the product obtained.

Learning Outcomes

After completion of the course, learners will be able to:

- extract essential oils from a variety of plants and plant parts.
- develop strategy for promotion and marketing of the aromatic and essential oils.
- establish their own startup, become self-reliant and/or adapt to job roles in beauty and wellness sector.

Syllabus

Practicals: 60 hours

1. Classification of essential oils on the basis of chemical composition, aroma and extraction methods. 4 hours
2. Principles, processing and techniques of extraction of essential oils. 4 hours
3. Cultivation practices of the common aromatic crops (any five) - Rose, Lavender, Peppermint, Spearmint, Basil, Citronella, Vetiver, Palmrosa, Lemongrass. 8 hours

4. Extraction process of essential oil from fruit/ fruit peel by steam distillation (e.g. orange, lemon). 4 hours
5. Extraction of essential oil from bark by steam distillation (e.g. cinnamon). 4 hours
6. Extraction of essential oils from flower by steam distillation (e.g. clove, rose, jasmine, lavender, rosemary). 4 hours
7. Extraction of essential oil from leaves and stems by steam distillation (e.g. lemongrass, eucalyptus, citronella, bottlebrush). 4 hours
8. Extraction of essential oil from seeds by steam distillation (e.g. fennel, nutmeg). 4 hours
9. Extraction of essential oil from root (e.g. vetiver) and rhizome (e.g. ginger, curcuma) by steam distillation 4 hours
10. Determination of oil content in aromatic crop/material by Clevenger's method. 4 hours
11. Quality assessment of essential oils through *sensory evaluation* (odour, colour), physical tests (specific gravity, refractive index, optical rotation, solubility), chemical tests (determination of acid value, ester value). 8 hours
12. Demonstration/Illustration of Instruments and techniques quality assessment of Gas chromatography (GC) and Thin layer chromatography (TLC). 4 hours
13. Field Visit to essential oils and perfumery Institute/Industry. 4 hours

Essential Readings:

1. EIRI BOARD. (2008). Handbook of Essential Oils Manufacturing and Aromatic Plants 5/E edition, Engineers India Research Institute (India), New Delhi.
2. Kochhar, S.L. (2016). Economic Botany – A Comprehensive Study, 5th Edition. New Delhi, India: Cambridge University Press.

Suggestive Readings:

1. Başer, K.H.C., Buchbauer, G. (2020). Handbook of Essential Oils: Science, Technology, and Applications, 3rd edition, CRC Press.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Nursery, Gardening and Landscaping

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Nursery, Gardening and Landscaping | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning objectives

The program is aimed to teach students the basic knowledge required to develop entrepreneurship skills in the development of Nursery, Gardening and Landscaping. This course would train students to initiate a remunerative enterprise owing to a high demand of skilled professionals in this field.

Learning Outcomes

After completing this course, the learners will be able to:

- describe and differentiate between the types of gardens.
- practice different methods for propagation of plants.
- execute several nursery and gardening operations.
- assess growing conditions of different horticultural plants, their general requirements and understand their role in landscaping.

Syllabus

Practical: 60 hours

1. Methods of preparation of nursery beds and sowing of seeds. Media for propagation of plants in Nursery Beds, Pots and Mist chamber. 12 hours
2. Study and practice of different propagation methods viz., cutting, layering, division, grafting and budding. 4 hours
3. Introduction and practicing Bonsai training, pruning and wiring. 4 hours

4. Study of different types of gardens (indoor and outdoor) and key features of gardens (Paths & Avenues, Hedges & Edges, Lawn, Flowerbeds, Arches & Pergolas, Fencing, Water bodies, Rock garden). 8 hours
5. Methods for selection and enlisting of suitable plants for different locations and in different types of gardens. 4 hours
6. Identification of key horticultural plants, Herbs including different types of grasses – foliage and flowering, Shrubs including hedge plants - foliage and flowering, Avenue trees – foliage and flowering, Climbers, Lianas, Epiphytes, Creepers, Trailers, Aquatic plants, Succulents, Weeds. 8 hours
7. Study of important gardens of India (any five). 4 hours
8. Methods of Landscape designing of Residential areas and Public Gardens, Aquatic Garden, Rock Garden, Industrial gardens. 4 hours
9. Concept and Application of Computer aided Designing (CAD) for landscape designing/ Preparation of landscape designs for school and college using CAD technology. 8 hours
10. Demonstration of different composting methods for Biofertilizers. 4 hours

Essential Readings:

1. A handbook of Landscape: CPWD
2. Gopaldaswamiengar, K. S., Parthasarathy, G., Mukundan, P. (1991). Complete Gardening in India. India: Gopaldaswamy Parthasarathy, 'Srinivasa'.
3. Hartmann, H. T., Kester, D. E., Hartmann, H. T., Kester, D. E. (1975). Plant Propagation: Principles and Practices. India: Prentice-Hall.
4. Roy, R. K., Roy, R. K. (2013). Fundamentals of Garden Designing: A Colour Encyclopedia. India: New India Publishing Agency.
5. Littlepage, R., Littlepage, R. (2017). Fundamentals of Garden Design: An Introduction to Landscape Design. (n.p.): CreateSpace Independent Publishing Platform.

Suggestive reading:

1. Hodge, G., Hodge, G. (2014). Practical Botany for Gardeners: Over 3,000 Botanical Terms Explained and Explored. United Kingdom: University of Chicago Press.
2. The Royal Horticultural Society Gardening Manual. (2000). United Kingdom: Dorling Kindersley.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Horticulture

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|---------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Horticulture | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning objectives

- To acquaint students with the basic, principles, concepts and importance of Horticulture
- To train students in lawn designing, species selection for lawns, parks, home gardens and terrace gardens.
- To provide information about the employment and business opportunities and other avenues in the horticulture sector

Learning Outcomes

After completion of the course, learners will be able to:

- design gardens and learn the art of landscape design.
- describe and implement methods of preparing soil, cultivation and propagation for growing hedges, climbers, vegetables, and fruit yielding plants
- create and maintain nurseries, green houses and implement innovative practices in maintenance, harvesting and storage of horticultural produce.
- apply the skills for enhancing the job opportunities (Horticulturist) as well as self-employment.

Syllabus

Practical: 60 hours

1. Introduction to Horticulture; Garden tools and safety. 4 hours
2. Lawn making and lawn care: recognizing soils and drainage systems, types of grasses. 4 hours
3. Choosing the appropriate plants (species selection) for plantation in different seasons and locations (Outdoor, roof-top, balcony, rock gardens); Flowering annuals, herbaceous

- perennials, vines and climbers, ornamental trees, bulbous and foliage plants, cacti and succulents. 4 hours
4. Vegetable Garden: Sowing, raising seedlings, transplantation methods; choosing the right vegetables for the season. 4 hours
 5. Seed germination, viability tests and comparison of other parameters of seeds (stored from different years/different temperatures). 4 hours
 6. Weeding, manuring, and irrigation methods used in lawns, parks, and vegetable gardens. 4 hours
 7. Propagation and plant care: propagation by layering, cutting and other methods. 4 hours
 8. Pruning: pruning roses, shrubs, and trees. 4 hours
 9. Supporting plants: bamboos, strings, and enclosures. 4 hours
 10. Maintenance and care of lawns and gardens: understanding diseases caused by pests and pathogens; protecting garden plants from infections, treating the plants with organic and biopesticides. 4 hours
 11. Bonsais: Art and craft. 4 hours
 12. One week internship on field or in a company/organisation (Landscape Design) that shall be facilitated by the college and report to be submitted. 8 hours
 13. Methods and plantation approaches in various garden designs: Japanese, Mughal, Buddhist, English and Indian Gardens. 4 hours
 14. Enhancing beauty of a garden using flowering plants, Garden walls, Fencing, Steps, Hedge, Edging, Lawn, Flower beds, Borders, aquatic garden with flowers; Case studies: Some selected gardens of India. 4 hours

Essential Readings:

1. Edmondson, J.L., Cunningham, H., Densley Tingley, D.O. et al. (2020). The hidden potential of urban horticulture. *Nat Food* **1**, 155–159.
2. Musser E., Andres. (2005). *Fundamentals of Horticulture*. New Delhi, Delhi: McGraw Hill Book Co. 2.
3. Sandhu, M.K. (1989). *Plant Propagation*. Madras, Bangalore: Wile Eastern Ltd.
4. Bird, C. (Ed.). (2014). *The fundamentals of horticulture: Theory and practice*. Cambridge University Press.
5. *The Practical Gardener* (1994). Reader's Digest Special Volume.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Mushroom Culture and Technology-II

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Mushroom Culture and Technology-II | 2 | 0 | 0 | 2 | Class XII | NIL |

Cultivation of Button mushroom and King oyster mushroom

Prerequisites:

Compost preparation for button mushroom would start around October-November and further cultivation steps will take place from January. Compost and spawn should be prepared before going to the next step.

Learning objectives:

- To develop skills for growing button and king oyster mushroom

Learning Outcomes:

After completion of this course, the learner will be able to:

- prepare casing soil and apply over spawn-run compost bags.
- implement harvesting, packaging and marketing of produce as per FSSAI standards.

Syllabus

Practical**: 60 hours

** Specimens and examples studied may vary depending on seasonal factors and availability

1. To add and mix spawn of button mushroom to pre-prepared compost (Spawning). 4 hours
2. To set up ideal mushroom house for cultivation of button mushroom. 8 hours
3. To maintain ideal environmental conditions for spawn run. 4 hours
4. Preparation and sterilization of casing soil. 4 hours

5. To apply casing soil over the spawn run compost bags and incubating for case run. 4 hours
6. To maintain appropriate conditions for pin head formation and fruiting of button mushroom. 8 hours
7. Harvesting of first flush of button mushrooms. 4 hours
8. Post-harvest packaging and storage of button mushrooms. 4 hours
9. Maintaining the environmental conditions for the second flush of button mushroom. 4 hours
10. To prepare and sterilize substrate bags for cultivation of king oyster mushroom. 4 hours
11. To add the spawn of king oyster mushroom in the substrate bags under aseptic conditions and incubator under appropriate conditions. 4 hours
12. To induce fruiting of king oyster mushroom by scraping the mycelium from the edges and surface of spawn run bags. 4 hours
13. Harvesting, post-harvest packaging and storage of king oyster mushrooms. 4 hours

Essential Readings:

1. Aggarwal, A., Sharma, Y.P., Angra, E. (2021). A textbook on mushroom cultivation, Theory and Practices. Newrays Publishing House, 2021.
2. Tiwari, S.C. Kapoor, P. (2018). Mushroom Cultivation. Mittal Publications. ISBN - 978-8183249232.
3. Bahl, N. (2015). Hand Book on Mushroom. Page no. 1-166. Oxford & IBH Publishing Company. ISBN- 13:978-8120413993.
4. Russell, S. (2014). The Essential Guide To Cultivating Mushroom. Storey Publishing. North Adams, MA 01247 page no. 1-233. ISBN 978-1-61212-146-8.
5. Chang, S.T. Miles, P.G. (2004). Mushrooms Cultivation, Nutritional Value, Medicinal effect and Environmental Impact. Page no. 1-477, CRC Press.
6. Fletcher, J.T., Gaze, R.G. (2007). Mushroom Pest and Disease Control. CRC Press.
7. Rai, R.D., Arumuganathan, Y. (2008). Post harvest technology of mushrooms. Pages 1-72. National Research Center for Mushroom (Indian Council of Agricultural Research) Chambaghat, Solan-173 213 (HP)

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Biofertilizers

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|-----------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Biofertilizers | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning objectives:

To help the students understand:

- the concept of biofertilizers and develop the skills for handling microbial inoculants.
- the growth and multiplication conditions of useful microbes and their role in mineral cycling and nutrition to plants.
- various methods of decomposition of biodegradable waste and their conversion to compost.

Learning outcomes:

After completion of this course, the learners will be able to:

- describe the different methods of composting.
- assess quality of compost and its role in soil nutrition.
- apply methods of bio-control
- develop a composting unit for production of biofertilizers (generate employment)

Syllabus

Practical: 60 hours

1. Introduction to rhizobial symbiosis - Study of *Rhizobium* and its isolation from root nodules of leguminous plants by Gram staining method. 4 hours
2. Study of different bio-composting methods (microbes and earthworm). 8 hours
3. Compost quality assessment and its role in soil nutrition - Test for pH, NO³⁻, SO₄²⁻, Cl⁻ and organic matter of different composts. 8 hours

4. Introduction to Arbuscular mycorrhiza - Study of arbuscular mycorrhizal fungi from plant roots by staining methods. 4 hours
5. Isolation of arbuscular mycorrhizal spores from rhizosphere soil. 4 hours
6. Study structure of *Anabaena* and *Azolla* structure - Isolation of *Anabaena* from *Azolla* leaf. 4 hours
7. Study various biocontrol methods and their application Pheromone trap, *Trichoderma*, *Pseudomonas*, Neem etc. 4 hours
8. Projects on any one of the following topics: *Rhizobium* technology, AMF technology, Organic farming, Bio composting, Vermicomposting, *Azolla* culture etc. The design of the project should be such that it includes a continuous work of at least 6 weeks and a dissertation submission/ presentation/ CE - continuous evaluation. 24 hours

Essential Readings:

1. Kumaresan, V. (2005). *Biotechnology*. New Delhi, Delhi: Saras Publication.
2. Sathe, T.V. (2004). *Vermiculture and Organic Farming*. New Delhi, Delhi: Daya publishers.
3. Subha Rao, N.S. (2000). *Soil Microbiology*. New Delhi, Delhi: Oxford & IBH Publishers.
4. Khosla, R. (2017). *Biofertilizers and Biocontrol Agents for Organic Farming* Kojo Press.

Suggestive Readings:

1. Azotobacter - Isolation and characterization -- <https://youtu.be/1Z1VhgJ2h6U>
2. Rhizobium -- Identification and characterization - <https://youtu.be/jELlo-pMvc4>.
3. 3-Days Online Workshop On Arbuscular Mycorrhizal Fungi_ Biodiversity, Taxonomy and Propagation 19-2 (2022-01-20 at 02_27 GMT-8) – <https://youtu.be/LKzK4luSRc4>
4. Vayas, S.C, Vayas, S., Modi, H.A. (1998). *Bio-fertilizers and organic Farming*. Nadiad, Gujarat: Akta Prakashan.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Organic Farming

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Organic Farming | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning objectives:

- To create awareness among the students about organic farming and its importance in sustainable agriculture.
- To provide a skill set of Organic farming to students to help them become self-reliant.

Learning Outcomes:

After completion of this course the learners will be able to:

- practice organic farming along with application of indigenous knowledge.
- establish entrepreneurial ventures and generate employment (Organic Grower).
- evaluate the organic produce as per FSSAI standards (Government rules).

Syllabus

Practical: 60 hours

1. Study of Organic Farming as an integrated approach. 4 hours
2. Soil analysis-physical testing and assessment of soil types, weightment, water movement, soil conditioners, etc. 8 hours
3. Manure preparation and introduction to compost, composting and its value addition quality test. 4 hours
4. Study of Indigenous Technology Knowledge (ITK) for nutrient, insect, pest disease and weed management. 8 hours
5. Study of various agriculturally useful Biofertilizers. 4 hours
6. Biocontrol agents including Integrated Pest Management. 4 hours

7. Study of traditional organic input preparation/formulation of Biofertilizer, biopesticides, plant health promoters like *Panchgavya*, *Beejamrut* etc. 8 hours
8. Study of the system of organic certification and inspection. 4 hours
9. Branding of rural products, FSSAI, marketing, packaging and handling of organic produce. 4 hours
10. Current Government schemes related to organic farming. 4 hours
11. Visit organic farms to study the various components and their utilization. 8 hours

Essential Readings:

1. Dhama, A.K. (2014). Organic Farming for Sustainable Agriculture (2nd edition), Agrobios (India), Jodhpur.
2. Sharma, Arun K. (2013). A Handbook of Organic Farming, Agrobios (India), Jodhpur
3. Palaniappan, S.P. and Anandurai, K. (1999). Organic Farming – Theory and Practice. Scientific Pub. Jodhpur
4. Thapa, U and Tripathy, P. (2006). Organic Farming in India, Problems and prospects, Agritech, Publising Academy, Udaipur.
5. Jaivik Kheti Sahayak Pustika- National Centre for Organic and Natural Farming, Department of Agriculture & Farmers Welfare, GoI.

Suggestive Readings:

1. National Program for Organic Production-APEDA, Ministry of Commerce & Industry, GoI.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Green Belt Development for Smart Cities

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course Title & Code | Credits | Credit Distribution Of The Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Green Belt Development for Smart Cities | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning objectives:

- To introduce students with one of the key green skill development programs under the Skill India mission by the Government of India.
- To acquaint students with various methods and techniques used in development of green infrastructure for smart cities

Learning Outcomes:

After completion of the course, students will be able to:

- measure factors (biotic and abiotic) contributing to sustainable, healthy environment.
- Assess, describe and use the appropriate plants for restoring polluted environment.
- use their skills enhancing for green infrastructure development (UN-SDG).

Syllabus

Practical:

1. Methods of vegetation sampling and calculation of importance value index 4 hours
2. Measuring Tree Basal Area, Height and Canopy Cover to estimate green cover of an area.
8 hours
3. Understanding of Instruments for measuring microclimatic variables viz., light, wind, temperature, humidity and precipitation 4 hours
4. Estimation of Total Carbon stock of an area. 8 hours
5. Understanding methods for selection of plants according to pollutant load of both air and water (includes field survey) 4 hours

6. Assessing air pollution tolerance of plant species using APTI (Air pollution tolerance index). 8 hours
7. Use Open Source Softwares for mapping the GPS points and generating a cover map. 4 hours
8. Measurement of Dissolved Oxygen (DO) from treated wastewater. 8 hours
9. Measurement of BOD and TDS from tank and treated pond. 8 hours
10. Determination of total dissolved and suspended solids in water. 4 hours

Essential Readings:

1. Bell, J. R., Wheater, C. P., Cook, P. A., Bell, J. R., Wheater, C. P., Cook, P. A. (2011). Practical Field Ecology: A Project Guide. United Kingdom: Wiley.
2. Singh J.S., Singh S.P. & Gupta S.R. · 2014. Ecology, Environmental Science & Conservation. (2014). India: S. Chand Pvt. Limited.
3. Measurements for Estimation of Carbon Stocks in Afforestation and Reforestation Project Activities under the Clean Development Mechanism, A field Manual UNFCCC.
4. Slingsby, D., Cook, C., Slingsby, D., Cook, C. (2016). Practical Ecology. United Kingdom: Macmillan Education UK.
5. Mukerji, K. G. (2013). Laboratory Manual of Food Microbiology. India: I.K. International Publishing House Pvt. Limited.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

BIG DATA ANALYTICS-I

Credit Distribution, Eligibility and Pre-Requisites of the Course

| Course title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|----------------------|---------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Big Data Analytics-I | 2 | 1 | 0 | 1 | 12 th Pass | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To understand the Big Data platform and its uses.
- Provide an overview of Apache Hadoop.
- Provide HDFS concepts and Interfacing with HDFS.
- Provide an overview of Map Reduce Programming.

Learning Outcomes

The Learning Outcomes of this course are as follows:

- After studying this course, students will be able to identify Big Data and its Business Implications.
- After studying this course, students will be able to list the components of Hadoop and Hadoop Eco-Systems.
- After studying this course, students will be able to access and process data on distributed file system.
- After studying this course, students will be able to manage job execution in Hadoop environment.

Syllabus:

Unit-1: Understanding Big Data

2 hours

Data Storage and Analysis-The process of data analysis, Characteristics of Big Data, Big Data Analytics, Typical Analytical Architecture, Requirement for new analytical architecture, Challenges in Big Data Analytics – Need of big data frameworks

Unit-2: Foundations of Big Data Systems

4 hours

Getting started with Hadoop, Requirement of Hadoop Framework, Design principle of Hadoop –Comparison with other system, Understanding Hadoop Ecosystem: Hadoop Components – Hadoop 1 vs Hadoop 2

Unit-3: HDFS (Hadoop Distributed File System)

4 hours

The Design of HDFS, Hadoop Daemon's – HDFS Commands, HDFS Concepts,

Command Line Interface, Hadoop file system interfaces-Loading data into HDFS, read/write process to HDFS

Unit-4: Introduction to Parallel Programming with Map Reduce

5 hours

Map Reduce Programming: I/O formats, Map side join, Reduce Side Join, Secondary sorting, Pipelining Map Reduce jobs (Map Reduce Execution Pipeline)- Map, Shuffle and Sort, Reduce

Practical Exercises 30 hours

- Downloading and installing Hadoop.
- Understanding different Hadoop modes. Startup scripts, Configuration files.
- Hadoop Implementation of file management tasks, such as Adding files and directories, retrieving files and Deleting files.
- Run a basic word count Map reduce program to understand map reduce paradigm: To count words in a given file, to view the output file, and to calculate the execution time.
- Map Reduce Program to analyse time-temperature statistics and generate report with max/min temperature.

Essential/recommended readings

- Seema Acharya, Subhasini Chellappan, “Big Data Analytics” Wiley 2015.
- Tom White, “Hadoop: The Defective Guide”, O’Reilly, 4th Edition, 2015.
- Donald Miner, Adam Shook, “Map Reduce Design Pattern”, O’Reilly, 2012.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

BIG DATA ANALYTICS-II

Credit Distribution, Eligibility and Pre-Requisites of the Course

| Course title & Code | Credits | Credit Distribution of the Course | | | Eligibility Criteria | Pre-requisite of the course (if any) |
|---------------------------|---------|-----------------------------------|----------|------------------------|-------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Big Data Analytics-II | 2 | 1 | 0 | 1 | 12 th Pass | Big Data Analytics-I |

Learning Objectives

The Learning Objectives of this course are as follows:

- Provide hands on Hadoop Eco System.
- Provide an overview of Apache Spark.
- To understand Machine Learning with Big Data.
- Provide an overview of GPU Computing.

Learning Outcomes

The Learning Outcomes of this course are as follows:

- After studying this course, students will be able to develop Big Data Solutions using Hadoop Eco System.
- After studying this course, students will be able to use Spark for the effective analysis of the Big Data.
- After studying this course, students will be able to use Machine Learning Techniques with Big Data.
- After studying this course, students will be able to use GPU Computing for parallel computations.

Syllabus:

Practical

Unit-1: Big Data Systems- The Advances

(3 hours)

Data flow, Data Ingest with Flume and Scoop and Hadoop archives, Hadoop I/O: Compression, Serialization, Avro and File-Based Data structures.

Unit-2: Introduction to Apache Spark

(3 hours)

Introduction, Architecture of Spark, Resilient Distributed Datasets, Spark Transformations, Writing Spark Application - Spark Programming in Scala, Python, R, Java - Application Execution

Unit-3: Machine Learning with Big Data

(3 hours)

Introduction to machine learning, Supervised vs Unsupervised learning, Cluster

analysis, understanding k means clustering, Implementation of k means clustering with Map Reduce.

Unit-4: Introduction to GPU Computing

(6 hours)

Introduction to GPU Computing, CUDA Programming Model, CUDA API, Simple Matrix, Multiplication in CUDA, CUDA Memory Model, Shared Memory Matrix Multiplication, Additional CUDA API Features.

Practical Exercises 30 hours

- Implementation of Matrix Multiplication with Hadoop Map Reduce.
- Implementation of K-means clustering using Map Reduce.
- To study and implement basic functions and commands in R/Python programming.
- To build Word cloud, a text mining method using R/Python for easy to understand and visualization than a table data.
- To implement clustering program using R/Python programming

Essential/recommended readings

- Seema Acharya, Subhasini Chellappan, “Big Data Analytics” Wiley 2015.
- Mike Frampton, “Mastering Apache Spark”, Packt Publishing, 2015.
- Tom White, “Hadoop: The Defective Guide”, O’Reilly, 4th Edition, 2015.
- Nick Pentreath, Machine Learning with Spark, Packt Publishing, 2015.
- Mohammed Guller, Big Data Analytics with Spark, Apress, 2015.
- Donald Miner, Adam Shook, “Map Reduce Design Pattern”, O’Reilly, 2012.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Social Media Marketing

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Social Media Marketing | 2 | 1 | 0 | 1 | Pass in XII | Pass in 'Digital Marketing' (SEC-Sem 1) |

Learning Objectives

- To provide basic knowledge of social media marketing concepts
- To enhance skills as social media marketer and start a career in social media marketing.

Learning Outcomes

After completion of the course, learners will be able to:

1. Evaluate the role of social media in marketing, advertising and public relations.
2. Assess the optimal use of various social media platforms for social media marketing.
3. Analyse the importance of social media for developing an effective marketing plan, and assess ways to measure its performance.
4. Describe practical skills required for creating and sharing content through online communities and social networks.
5. Demonstrate and appreciate social media ethics to use social media spaces effectively.

SYLLABUS:

Unit 1: Introduction to Social Media Marketing: (4 hours)

Social Media Marketing- Concept and Importance.

Social Media Platforms- Online communities and Forums; Blogs and Microblogs, Social Networks, other contemporary social media platforms: Goals, Role in Marketing and Use as listening tools. Trends in SMM. Social Media Influencers.

Unit 2: Social media marketing Plan and Performance Measurement: (6 hours)

SMM Plan- Setting Goals, Determining Strategies, Identifying Target Market, Selecting Tools, Selecting Platforms, Implementation: Measuring Effectiveness - Conversion rate, amplification rate, applause rate: on page and on post level.

Unit 3: Content Creation and Sharing using Case Campaigns: (5 hours)

Blogging, Streaming Video and Podcasting: Criteria and approach-70/20/10 with risk variants, 50-50 content, Brand Mnemonic, Brand story. Contextualising content creation. Social Media Ethics.

Practical Exercises: 30 hours

The learners are required to:

1. Discuss the importance of social media in marketing, advertising and public relations by analysing relevant case studies.

2. Examine the use of social media by your institution to improve alumni engagement.
3. Identify social media platforms for marketing a good, a service, an institution, an event and a person.
4. Promote any college event of your choice using social media. Measure the effectiveness of your campaign.
5. Create a blog/ vlog on any topic of your interest. Measure performance of your blog post.
6. Prepare a social media marketing plan for any product of your choice.
7. Prepare a calendar for scheduling various posts/campaigns via buffer or tweet deck. Find out the conversion rate, amplification rate, and the applause rate. Calculate the engagement rate and economic value/per visitor of the concerned campaigns.
8. Observe the engagement rate in twitter campaigns of your college and suggest improvements, if needed.
9. Assess the reviews/ratings, comments, likes, and dislikes of blog posts in the categories of health and nutrition, or yoga counselling, or family therapy.
10. Examine the twitter handles of Delhi Government or of Delhi University and find out how consistent they are in their reaction checks?
11. Design a social media plan for sensitising citizens for timely tax payments (Assuming that you are an honest tax-payer and feel that everyone should be like you).

Essengial Readings

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Design Thinking

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------|---------|-----------------------------------|----------|------------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Design Thinking | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

To provide basic understanding of problem search, design process, design thinking and ability to convert an innovative product idea to a prototype.

Learning Outcomes

After studying the course, the student will be able to:

- Understand innovation process
- Do product designing
- Empathy research.
- Do designing brief and proof of concept.
- Do prototyping, product testing and validation

SYLLABUS:

Unit I: Design thinking and innovation in product or process designing. Identifying user needs. Human Centered Design. **(8 hours)**

Unit II: Innovation Opportunities. Problem space exploration. Ideation. Empathy Research **(13 hours)**

Unit III: Novel product or process Opportunities. Solution space exploration. Design brief. Concept generation. User validation **(13 hours)**

Unit IV: Converting ideas to product. Developing Prototypes. Iterative improvement. Proof of concept - Product testing and validation **(18 hours)**

Unit V: Disruptive design innovations – case studies **(8 hours)**

Teaching Plan

Week 1: Design thinking and innovation in product or process designing

Week 2: Identifying user needs. Human Centered Design

Week 3: Innovation Opportunities.
Week 4: Problem space exploration. Ideation.
Week 5: Empathy Research
Week 6: Novel product or process Opportunities.
Week 7: Solution space exploration. Design brief.
Week 8: Concept generation. User validation
Week 9: Converting ideas to product.
Week 10: Developing Prototypes.
Week 11: Iterative improvement.
Week 12: Proof of concept - Product testing and validation
Week 13, 14 & 15: Disruptive design innovations – case studies

Essential Readings:

1. *Creative Confidence: Unleashing the creative potential within us all* by Tom Kelley & David Kelley, Crown Business (New York, 2013)
2. *The Design of everyday things* by Don Norman, Basic Books (2013)
3. *Design Thinking: Understanding how designers think and work* by Nigel Cross, Bloomsbury Visual Arts (2019)

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Aquaculture Entrepreneurship

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Aquaculture Entrepreneurship | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To give first-hand training on traditional and technology-based Aquaculture.
- To understand the importance of different types of ponds required for aquaculture.
- To understand the requirement of advanced technology for sustainable development of aquaculture in India.
- To gain experience in the management of optimum water quality in the fish production systems.
- To enhance the quality of aquacrops and increase the production.

Learning Outcomes

By the end of the course, the students will be able to:

- Identify the useful aquaculture systems for sustainable aquaculture development.
- Recognize the suitable and economically important aquacultural species.
- Understand the importance of aquaculture in nutrition security, poverty elevation and employment generation.

Skill development and job opportunities

After completion of this course students may be

- Employed in various aquaculture related business including prawn and fish farms.
- Fully equipped to start own entrepreneurship in fish farming.

SYLLABUS:

Practical

Unit I: Pond-based Traditional Aquaculture

20 Hours

Introduction to indigenous pond-based fish culture systems and identification of economically important cultivable finfishes and shellfishes. The impact of aquatic organisms in the production of aquacrops.

Exercises:

1. Designing (layout) and drawing of a self-sustainable Aquaculture farm showing different ponds.

2. Selection and identification of cultivable finfishes and shellfishes (prawns, mussels, crabs).
3. Collection and identification of various freshwater aquatic plants. Understanding of the role of different aquatic plants in aquaculture.
4. Identification of harmful aquatic insects and their remedial measures.
5. The study of diurnal fluctuations of major water quality parameters (*viz.*, temperature, pH, dissolved oxygen, ammonia etc.) in a pond.

Unit II: Recirculating Aquaculture System (RAS)

20 Hours

Application of advance technology like, Recirculating Aquaculture System (RAS) for the sustainable development of Aquaculture in India.

Exercises:

1. Designing of a land-based Recirculating Aquaculture System (RAS).
2. Evaluation of various types of filters like, mechanical, chemical and biological filters in the maintenance of water quality in the RAS.
3. The study of role of flow rate and duration of circulation in the maintenance of water quality in the RAS.
4. The monitoring of temperature, pH, dissolved oxygen, ammonia, nitrite, nitrate, phosphate etc. at different hours of water circulation.
5. Culture of various fishes and prawns in the RAS.
6. Visit to a Recirculating Aquaculture System.

Unit III: Aquaponics System

20 Hours

Application of Aquaponics System to grow multiple crops simultaneously and thereby, increases the production of aquacrops in per unit area in a sustainable manner. Thus, enhances the earning of Fish farmers.

Exercises:

1. Designing of an Aquaponics System.
2. Evaluation of role of various types of edible (lettuce, tomato, water spinach etc.) and ornamental plants in the maintenance of ammonia levels in the fish culture units.
4. Identification of microorganisms functioning in the Aquaponics System.
5. Culture of various fishes and prawns in the Aquaponics System.
6. The monitoring of temperature, pH, dissolved oxygen, ammonia, nitrite, nitrate, phosphate etc. in the fish culture units.
7. Visit to an Aquaponics System.

Recommended Readings:

- AOAC, Association of Official Analytical Chemists. 2019. Official Methods of Analysis. Washington, DC: Association of Official Analytical Chemists Inc.
- APHA, American Public Health Association. 2017. Standard Methods for the

Examination of Water and Wastewater. 23rd ed. Washington DC, USA: American Public Health Association, American Water Works Association, Water Environment Federation.

- Chakrabarti, R. and Sharma, J. G. 2008. Aquahouse. New Dimension of Sustainable Aquaculture. DIPAS, Indian Council of Agricultural Research, New Delhi, India.
- Holt, G. J. 2021. Larval Fish Nutrition. Willey-Blackwell, UK.
- ICAR, Indian Council of Agricultural Research. 2013. Handbook of Fisheries and Aquaculture. Directorate of Knowledge Management in Agriculture, Indian Council of Agricultural Research, New Delhi, India.
- Pillay, T. V. R. 2005. Aquaculture. Principles and Practices. Blackwell Publishing, New Delhi, India.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Bio-floc Technology

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Bio-floc Technology | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To learn about the basics of Bio-floc technology and it's important as a skill for self-sustainable and self-employment
- To learn production of fish in the larger scale with minimum use of water source and land to help in the total production of fish for human consumption in India.
- To learn about how to set-up the technology looking into the different conditions and availability of space and training.
- To teach fundamental concept of running this system with the biological knowledge of bacteria culture, water quality management
- To learn the types of fish species, types of feed and feeding, density of fish to be maintain in the particular volume of water etc.

Learning Outcomes

The Learning Outcomes of this course are as follows:

- After studying this course, students will be able to gain insight into fish culture using minimum amount of water, land, fish feed and with high biosecurity.
- After studying this course, students will be able to learn and explain about the bio-floc technology and they can set up bio-floc tanks for themselves and for others in the form of industries and entrepreneurship as well as for start-up with the help of existing Government funding and self funding.
- After studying this course, students will be able to understand and implement bio-floc system and this can be an alternative skill for earning, self-employment, job generation and contribute in large scale fish production which are hygienic, organic and good protein source for human health.

SYLLABUS:

Practical

Unit-I

12 Hours

Introduction to basics of Bio-floc technology and its applications in aquaculture industry, Standard operating procedure, Microbial Role in Bio-floc System, Design Set-up and installation of Bio-floc system, Biosecurity, Advance over pond aquaculture, basic equipment's and necessary items.

Exercises

1. Inoculation of bacteria and its role in Bio-floc technology.
2. Plankton and microbial analysis of bio-floc.
3. Set-up and Installation of Bio-floc system.

Unit-II

12 Hours

Optimum water quality parameters and its management. Floc water preparation and floc volume measurement. Monitoring and management of dissolved oxygen, pH, conductivity, temperature, salinity, ammonia, nitrate, nitrite, TDS. Measurement of floc volume and its control. Role of bacteria in management of water quality.

Exercises

1. Analysis of following water quality parameters in Bio-floc culture tanks using kits: temperature, pH, conductivity, salinity, TDS, ammonia, nitrate, nitrite.
2. Water preparation for Bio-floc system.
3. Measurement of floc volume using imhoff cone.

Unit-III

12 Hours

Suitable species selection, Pre-stocking and post stocking management, Food and feeding management, Production performance, Nursery rearing days, Survival (%), Average body weight at harvest, feed conversion ratio.

Exercise

1. Identification of suitable fish, feeding habits, stocking capacity, growth rate and duration of culture.
2. The study of Feed Conversion Ratio (FCR) and Feed Conversion Efficiency (FCE).

Unit-IV

12 Hours

C: N ratio management, Nutritional requirements and protein levels in the food.

Source of carbon, calculation of carbon and nitrogen ratio, suitable C:N ration management in the initial floc preparation and during culture days. Selection of species-specific food with optimum protein level, food size, quantity of feed according to per cent body weight, feeding rate.

Exercise

1. Calculation of C: N ratio and its management from the TAN content in the floc water.
2. Mouth size and food size and growth study.

Unit-V

12 Hours

Disease management and prophylactic treatment, Economics values of fish and its marketing strategies. Common disease in bio-floc, identification of disease its causes, species-specific disease, stress management and treatment. Steps for prevention and protections of possible disease, possible control measures with setup systems by controlling light, temperature etc. Sludge management. Economics values of fish and its marketing strategies. Production capacity and requirements, start-up and entrepreneurship opportunities, funding and grants for setting up from Government.

Exercise

1. Fungal, bacterial, parasitic and viral disease commonly found in bio-floc fish culture system.
2. Identification and economically important fish species for culture in bio-floc system like prawn, other new economic species etc.

3. Write a Project for start-up or entrepreneurship and governmental grants.
4. Visit to hatcheries with super-intensive models.

Recommended Readings:

- Avnimelech, Y. 2015. Bio-floc Technology- a Practical Guidebook. 3rd ed. World Aquaculture Society, USA.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Fish Breeding and Larviculture

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Fish Breeding and Larviculture | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To give first-hand training on various aspects of brood stock maintenance of carps and air breathing fishes.
- To understand the breeding techniques for carps and air breathing fishes.
- To understand the larviculture techniques for carps.
- To gain experience on the larviculture techniques of air breathing fishes.
- To gather knowledge in the management of optimum water quality for larviculture.
- To gather knowledge on the nutritional requirements of the cultivable species.
- To gain knowledge on the impact of live food in larviculture.

Learning Outcomes

By the end of the course, the students will be able to:

- Produce seeds of carps and air breathing fishes.
- Start the Fish hatchery business.
- Start fish-food production.
- Initiate entrepreneurship in fish seeds production.

Skill development and job opportunities

After completion of this course students may be

- Employed in various aquaculture related business including prawn and fish farms.
- Fully equipped to start own entrepreneurship in fish farming.

SYLLABUS:

Practical

Unit I: Breeding of Economically Important Fishes

20 Hours

Breeding of various fishes in the captivity and production of quality fish seeds for aquaculture.

Exercises:

1. Management of brood stock units and breeding of carps.
2. Maintenance of brood stock units and breeding of air breathing fishes.
3. Estimation of major water quality parameters *viz.*, temperature, pH, dissolved oxygen, conductivity etc. in the fish breeding units.

Unit II: Culture of Important Live Food Organisms

15 Hours

Culture of various live food organisms using organic manures and feeding of different fish larvae produced.

Exercises:

1. Culture of live food organisms *viz.*, rotifers, cladocerans, copepods, chironomid larva etc. using organic manures (like cattle manure, poultry wastes and mustard oil-cake).
2. Evaluation of major water quality parameters *viz.*, temperature, pH, dissolved oxygen, ammonia etc. in the live food culture units.
3. The enrichment of live food organisms (with vitamin C, DHA, EPA etc.) to enhance the nutritional value of the live food for fish larvae.

Unit II: Larviculture

25 Hours

Culture of larvae of carps and air breathing fishes and production of healthy seeds for stocking ponds.

Exercises:

1. Culture of fish larvae in the static water/ Recirculating Aquaculture Systems (RAS).
2. Measurement of water quality parameters (*viz.*, temperature, pH, dissolved oxygen, ammonia etc.) in the larvae culture unit regularly.
3. Feeding of fish larvae with live food thrice daily.
4. The study of morphological and physiological changes in the larvae during ontogenic development.
5. Visit to a fish farm.

Recommended Readings:

- AOAC, Association of Official Analytical Chemists. 2017. Official Methods of Analysis. Washington, DC: Association of Official Analytical Chemists Inc.
- APHA, American Public Health Association. 2017. Standard Methods for the Examination of Water and Wastewater. 23rd ed. Washington DC, USA: American Public Health Association, American Water Works Association, Water Environment Federation.
- Chakrabarti, R. and Sharma, J. G. 2008. Aquahouse. New Dimension of Sustainable Aquaculture. DIPAS, Indian Council of Agricultural Research, New Delhi, India.
- Holt, G. J. 2021. Larval Fish Nutrition. Willey-Blackwell, UK.

- ICAR, Indian Council of Agricultural Research. 2013. Handbook of Fisheries and Aquaculture. Directorate of Knowledge Management in Agriculture, Indian Council of Agricultural Research, New Delhi, India.
- Pillay, T. V. R. 2005. Aquaculture. Principles and Practices. Blackwell Publishing, New Delhi, India.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Formulation of Fish Feed

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Formulation of Fish Feed | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To give first-hand training on identification of various indigenous ingredients for formulation of fish feed.
- To gather knowledge on the nutritional requirements of the cultivable species.
- To gain knowledge on the impact of formulated feeds on fish growth.
- To enhance the quality of aquacrops and increase the production.

Learning Outcomes

By the end of the course, the students will be able to:

- Identify the useful ingredients for fish feed formulation.
- Learn to prepare fish feed using locally available ingredients.
- Start the Fish feed production industry.
- Initiate entrepreneurship on Fish feed production.

Skill development and job opportunities

After completion of this course students may be

- Employed in various aquaculture related business including prawn and fish farms.
- Fully equipped to start own fish feed production industry.

SYLLABUS:

Practical

Unit I: Selection of ingredients

20 Hours

Identification of various types of non-conventional ingredients for fish feed formulation. Evaluation of their nutritional quality. Preparation of fish feed and feeding of the prepared feeds to the cultivable fishes and prawns. The study of impact of the prepared feeds on the performances of fishes and prawns.

Exercises:

1. Identification of various types of locally available ingredients (*viz.* macrophytes, oil-cakes, plants etc.) for fish feed formulation.
2. Evaluation of the nutritional values (*viz.* protein, lipid, carbohydrates, ash, amino acids, fatty acids) of these ingredients.
3. Assay of presence of anti-nutritional factors (*viz.* tannin, saponin, phytic acid, oxalic acid etc.) in these ingredient

Unit II: Formulation of Fish Feed

20 Hours

Preparation of fish feed using traditional method and computerized soft ware. Evaluation of quality of prepared feed for the cultivable species.

Exercises:

1. Formulation of fish feed using “Pearson Square” method.
2. Formulation of fish feed using computerized soft ware.
3. The assay of biochemical composition of formulated feed: protein, lipid, carbohydrate, ash, amino acids, fatty acids.

Unit III: Feeding of Fish

20 Hours

The feeding of the prepared feeds to the cultivable fishes and prawns. The study of impact of the prepared feeds on the performances of fishes and prawns. Evaluation of nutritional value of fishes for human consumption.

Exercises:

1. The feeding of the prepared feeds to the cultivable fishes and prawns.
2. Evaluation of impact of the prepared feeds on the survival, growth and production of fishes and prawns.
3. Assessment of Feed Conversion Ratio (FCR) and Feed Conversion Efficiency (FCE) of the feed.
4. Assay of nutritional value of the produced fishes/ prawns for human consumption.
5. Evaluation of impact of prepared feed on the water quality of the culture system.
6. Visit to a Fish feed preparation facility/ industry.

Recommended Readings:

- AOAC, Association of Official Analytical Chemists. 2017. Official Methods of Analysis. Washington, DC: Association of Official Analytical Chemists Inc.
- APHA, American Public Health Association. 2017. Standard Methods for the Examination of Water and Wastewater. 23rd ed. Washington DC, USA: American Public Health Association, American Water Works Association, Water Environment Federation.
- Chakrabarti, R. and Sharma, J. G. 2008. Aquahouse. New Dimension of Sustainable Aquaculture. DIPAS, Indian Council of Agricultural Research, New Delhi, India.
- Holt, G. J. 2021. Larval Fish Nutrition. Willey-Blackwell, UK.
- ICAR, Indian Council of Agricultural Research. 2013. Handbook of Fisheries and Aquaculture. Directorate of Knowledge Management in Agriculture, Indian Council of Agricultural Research, New Delhi, India.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Ornamental Fish Culture: Opportunity and Scope

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Ornamental Fish Culture: Opportunity and Scope | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To give first-hand training on Aquarium preparation and decoration.
- To gain hands-on training on breeding and culture of various Ornamental fishes.
- To gain experience in the management of optimum water quality in the fish aquarium.
- To gather knowledge on the nutritional requirements of the cultivable species.

Learning Outcomes

By the end of the course, the students will be able to:

- Prepare and decorate ornamental fish aquarium.
- Identify the suitable and economically important Ornamental fish species.
- Initiate entrepreneurship on Aquarium making and Ornamental fish production.

Skill development and job opportunities

After completion of this course students will be

- Fully equipped to start own entrepreneurship in **aquarium making and its decoration**.
- Aware about the requirements to start their own **Ornamental fish industry**.

SYLLABUS:

Practical

Unit I: Preparation of Aquarium and Its Decoration

20 Hours

Preparation of glass aquaria of various shapes and their decoration using locally available materials. The impact of aquatic plants in the maintenance of healthy environment in the aquarium.

Exercises:

1. Construction of glass aquaria of various shapes (rectangular, square, round etc.).
2. Identification and culture of useful aquatic plants for the decoration of fish aquarium.
3. Decoration of aquarium with plants and locally available materials.

Unit II: Breeding of Ornamental Fishes and Culture of Plants

20 Hours

Identification of economically important cultivable Ornamental plants and fishes for culture.

Exercises:

1. Identification of economically important Ornamental fishes and their breeding.
2. Culture of young larvae and feeding them live food.
3. Regular monitoring of water quality parameters viz. temperature, pH, conductivity, dissolved oxygen, ammonia etc. in the fish aquarium.
4. Culture of zooplankton (rotifers, cladocerans, copepods etc.) using organic manures for the feeding of fish larvae.
5. Production of plants for the decoration of aquarium.

Unit III: Production of Marketable Ornamental Fishes

20 Hours

Culture of compatible fishes together and feeding them with live food and prepared diets. Keep them ready for local market.

Exercises:

1. Maintenance of aquarium.
2. Feeding of ornamental fishes with various natural foods and prepared diets.
3. Evaluation of their growth rate and colour development.
4. Development of marketing strategy for the produced ornamental fishes in well decorated aquaria.
5. Visit to any Aquarium Facility.

Recommended Readings:

- AOAC, Association of Official Analytical Chemists. 2019. Official Methods of Analysis. Washington, DC: Association of Official Analytical Chemists Inc.

- APHA, American Public Health Association. 2017. Standard Methods for the Examination of Water and Wastewater. 23rd ed. Washington DC, USA: American Public Health Association, American Water Works Association, Water Environment Federation.
- Chakrabarti, R. and Sharma, J. G. 2008. Aquahouse. New Dimension of Sustainable Aquaculture. DIPAS, Indian Council of Agricultural Research, New Delhi, India.
- Holt, G. J. 2021. Larval Fish Nutrition. Willey-Blackwell, UK.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Pearl Culture

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Pearl Culture | 2 | 0 | 0 | 2 | XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To learn the basics of Pearl culture and it's important as a skill for self-sustainable and self-employment.
- To impart a comprehensive knowledge regarding morphology, anatomy, physiology, food and feeding behaviour, related diseases and its control measures of the mother Pearl Oyster.
- To gather a comprehensive knowledge of various types of implantations in Oyster and also the technique of insertion of beads for the formation of Pearl.
- To gather experience of post-operative care.
- To learn the techniques of harvesting, processing, sorting and marketing of the Pearl produced.

The Learning Outcomes:

By the end of the course, the students will be able to:

- Gain overall idea about Pearl oyster - its biology, morphology especially the histology of mantle, pearl formation etc.
- Recognize the suitable species of oyster for pearl culture in India.
- Set up a pearl culture system in pond/ tanks.
- Start entrepreneurship on Pearl culture.
- Start-up with the help of existing Government funding.

Skill development and job opportunities

After completion of this course students may be

- Employed in various pearl farming related businesses.
- Fully equipped to start own entrepreneurship in **pearl farming**.
- Completely aware about the requirements to start their own **Pear processing industry**.

SYLLABUS:

Practical

Unit-I

20 Hours

Introduction to pearl culture. Morphology and anatomy of pearl culture. Structure and histology of mantle. Origin of pearls, mussels producing pearls. Identification of species capable of producing pearl.

Exercises:

1. Set-up and Installation of culture system (sac culture, raft culture) for sustainable production.

2. Identification of suitable species capable to produce pearl.
3. The study of morphology and growth rate of the pearl oyster.
4. Measurement of major water quality parameters.
5. Feeding of the pearly oyster.

Unit-II

20 Hours

Implantation of foreign particles for pearl formation and post operation care.

Exercise:

1. Preparation of the graft tissue for insertion.
2. Pearl oyster surgery and insertion technique of bead.
3. Post-operational care.
4. Culture of the pearl oyster using natural food .
5. Regular monitoring of the water quality parameters.

Unit-III

20 Hours

Harvesting of Pearl and its processing. Sorting of Pearl. Marketing and economics concerned.

Exercises:

1. Bleaching and collection of pearls.
2. Cleaning of pearls.
3. Sorting of pearls.
4. Marketing of pearl.
5. Visit to a pear production site.

Recommended Readings:

- Beveridge, M.C.M. 1987. Cage aquaculture. Fishing News.
- Bardach, J.E.W . 1972. Aquaculture farming and husbandry of freshwater and
Sorting of Pearl. Marketing and economics concerned with Pearl Culture. Generation
marine organisms
- Dobilet, D. 199. Pearl Farming. Australia: Nat Geographic Mag publication.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Sericulture I: Mulberry Silkworm Rearing

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Sericulture I: Mulberry Silkworm Rearing | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To make the students aware about the significance of sericulture as a profit-making enterprise.
2. To help the students to understand the biology of silkworms and its nutritional requirement to secrete quality silk.
3. To give an understanding about the techniques of silkworm rearing, reeling of silk and various measures to be taken to maximize the benefits.
4. To help the students to know about various uses of silk and develop entrepreneurial skills required for self-employment in sericulture and silk production sector.

Learning Outcomes

Upon completion of the course, students should be able to:

1. Learn about the history of sericulture and silk route.
2. Recognize various species of silk moths in India, and exotic and indigenous races.
3. Be aware about the opportunities and employment in sericulture industry- in public, private and government sector.
4. Gain thorough knowledge about the techniques involved in silkworm rearing and silk reeling.
5. Develop entrepreneurial skills necessary for self-employment in mulberry and seed production and be apprised about practicing sericulture as a profit-making enterprise.
6. Enhance collaborative learning and communication skills through practical sessions, team work, group discussions, assignments and projects.

Skill Development and Job Opportunities

1. Sericulture is multi-disciplinary activity consists of mulberry leaf production, silkworm rearing (cocoon production), silkworm egg production, silk reeling (yarn production), twisting, Warp and weft making, printing and dyeing, weaving, finishing, garment designing, marketing etc.
2. The demand for silk is bound to increase in the coming years This course will therefore help in generating employment, economic development and improvement in the quality of life of unemployed youth.

3. This course will generate entrepreneurs in this field. Sericulture offers gainful employment not only the rural masses but also for the educated youth in semi-urban and urban areas.
4. Effective utilization of waste generated in the industry will help in making the sericulture sector more viable, stable and create more employment opportunities.
5. Sericulturists fall under the category of primary activities. They usually find employment in sectors like government and research development centres.

SYLLABUS:

Introduction to sericulture. Life cycle of silkworm and its characteristic features, Rearing of mulberry silk worm **(60 hours)**

Practical

1. Study of models of rearing houses, appliances used in silkworm rearing
2. Preparation and application of disinfectants in rearing house and appliances
3. Technique for hot and cold acid treatment of silkworm eggs, its advantages and disadvantages
4. Rearing Techniques: Harvesting and preservation technique; leaf selecting for different instants; mulberry leaf estimation; Identification of moulting larva, care during moulting, mounting and mounting density, types of mountages; Harvesting of cocoons, assessment of cocoons.
5. Selection of moth, pairing and despairing, preparation of eggs (loose and sheet, surface sterilization of eggs)
6. Visit to seed cocoon markets, commercial grainage and cold storage centre to know activities of cocoon markets, preparation of laying and cold storage of eggs.
7. Mulberry Crop Cultivation: Preparation of nursery beds, Different propagation methods – grafting and layering, Planting System and Intercultural Operations: - pit and row system, mulching, irrigation.
8. Visit to Sericulture research institute

Essential Readings

- Manual on Sericulture (1976); Food and Agriculture Organisation, Rome Ullal, S.R. and Narasimhanna M.N. (1987) Handbook of Practical Sericulture; 3rd Edition, CSB, Bangalore

Suggested Readings

- Yonemura, M. and Rama Rao, N. (1951) A Handbook of Sericulture. I. Rearing of silk-worms. Government Branch Press, Mysore.

- Sathe, T. V. and Jadhav, A. (2002) Sericulture and Pest Management. Daya Publishing House
- Yup-Lian, L. (1991) Silkworm Diseases. Food and Agricultural Organization.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

Sericulture II: Eri Silkworm Rearing

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Sericulture II: Eri Silkworm Rearing | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To make the students aware about the significance of sericulture as a profit-making enterprise.
2. To help the students to understand the biology of silkworms and its nutritional requirement to secrete quality silk.
3. To give an understanding about the techniques of silkworm rearing, reeling of silk and various measures to be taken to maximize the benefits.
4. To help the students to know about various uses of silk and develop entrepreneurial skills required for self-employment in sericulture and silk production sector.

Learning Outcomes

Upon completion of the course, students should be able to:

1. Learn about the history of sericulture and silk route.
2. Recognize various species of silk moths in India, and exotic and indigenous races.
3. Be aware about the opportunities and employment in sericulture industry- in public, private and government sector.
4. Gain thorough knowledge about the techniques involved in silkworm rearing and silk reeling.
5. Develop entrepreneurial skills necessary for self-employment in mulberry and seed production and be apprised about practicing sericulture as a profit-making enterprise.
6. Enhance collaborative learning and communication skills through practical sessions, team work, group discussions, assignments and projects.

Skill Development and Job Opportunities

Sericulture mainly focuses on silkworms rearing with the main aim of silk production. There are several applications of this:

1. The demand for silk is bound to increase in the coming years This course will therefore help in generating employment, economic development and improvement in the quality of life of unemployed youth. This course will generate entrepreneurs in this field.
2. . Sericulture by-products have remarkable application in the preparation of compost. Sericulture waste upon enrichment can be converted to high value manures.
3. Silk consists of two types of proteins, silk fibroin and sericin.
 - a. Sericin contributes about 20-30 per cent of total cocoon weight. It is characterized by its high content of serine and 18 amino acids, including essential amino acids. Sericin has wide applications in pharmaceuticals and cosmetics such as, wound healing, bioadhesive moisturizing, antiwrinkle and antiaging properties.
 - b. Silk fibroin, has a variety of applications in pharmaceutical, food, and fodder industries. Silk fibroin is used for bone formation, silk thread in surgery, and drug delivery system . Silk fibroin has unique properties including good adherence with flexibility to wound bed, absorption of exudates, biocompatibility, biodegradability, minimal inflammatory reaction and in skin grafting due to its outstanding mechanical properties.
4. Mulberry, the sole food plant of silkworm has also the potential to be used in pharmaceutical and food industry.

Syllabus:

Introduction to non-mulberry sericulture (Eri, Tassar, Muga). Morphology of Eri silkworm, Propagation of host plant. **(60 hours)**

Practical

1. Propagation of castor food plant
2. Study of models of rearing houses, appliances used in Eri silkworm rearing
3. Preparation and application of disinfectants in rearing house and appliances
4. Rearing techniques of Eri silkworm, Eri mother moth examination, mounting method and storage of cocoons.
5. Incubation of eri eggs and its egg hatching ratio

Essential Readings

- Manual on Sericulture (1976); Food and Agriculture Organisation, Rome Ullal, S.R. and Narasimhanna M.N. (1987) Handbook of Practical Sericulture; 3rd Edition, CSB, Bangalore

Suggested Readings

Learning Objectives

The Learning Objectives of this course are as follows:

1. To make the students aware about the significance of sericulture as a profit-making enterprise.
2. To help the students to understand the biology of silkworms and its nutritional requirement to secrete quality silk.
3. To give an understanding about the techniques of silkworm rearing, reeling of silk and various measures to be taken to maximize the benefits.
4. To help the students to know about various uses of silk and develop entrepreneurial skills required for self-employment in sericulture and silk production sector.

Learning Outcomes

Upon completion of the course, students should be able to:

1. Learn about the history of sericulture and silk route.
2. Recognize various species of silk moths in India, and exotic and indigenous races.
3. Be aware about the opportunities and employment in sericulture industry- in public, private and government sector.
4. Gain thorough knowledge about the techniques involved in silkworm rearing and silk reeling.
5. Develop entrepreneurial skills necessary for self-employment in mulberry and seed production and be apprised about practicing sericulture as a profit-making enterprise.
6. Enhance collaborative learning and communication skills through practical sessions, team work, group discussions, assignments and projects.

Skill Development and Job Opportunities

Sericulture mainly focuses on silkworms rearing with the main aim of silk production. There are several applications of this:

1. The demand for silk is bound to increase in the coming years This course will therefore help in generating employment, economic development and improvement in the quality of life of unemployed youth. This course will generate entrepreneurs in this field.
2. . Sericulture by-products have remarkable application in the preparation of compost. Sericulture waste upon enrichment can be converted to high value manures.
3. Silk consists of two types of proteins, silk fibroin and sericin.
 - a. Sericin contributes about 20-30 per cent of total cocoon weight. It is characterized by its high content of serine and 18 amino acids, including essential amino acids.

Sericin has wide applications in pharmaceuticals and cosmetics such as, wound healing, bioadhesive moisturizing, antiwrinkle and antiaging properties.

- b. Silk fibroin, has a variety of applications in pharmaceutical, food, and fodder industries. Silk fibroin is used for bone formation, silk thread in surgery, and drug delivery system. Silk fibroin has unique properties including good adherence with flexibility to wound bed, absorption of exudates, biocompatibility, biodegradability, minimal inflammatory reaction and in skin grafting due to its outstanding mechanical properties.
4. Mulberry, the sole food plant of silkworm has also the potential to be used in pharmaceutical and food industry.

Syllabus:

Introduction to Silk Technology

(60 hours)

Practical

Introduction to different textile fibres.

Cocoon stifling- different methods and determination of degree of drying.

Determination of commercial characters of cocoon: average cocoon weight, shell weight, shell percentage, average filament length, reelability, raw silk recovery percentage, renditta and denier.

Identification of silk, cotton, wool and synthetic fibres by various tests.

Raw silk testing and grading by mechanical tests like winding test, seriplane test and cohesion test.

Study of silk manufacturing unit.

Essential Readings

Sericulture IV: APPLICATION OF SERICULTURE IN THERAPEUTIC AND COSMETIC

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Sericulture IV: Application of Sericulture in Therapeutic and Cosmetic Industry | 2 | 0 | 0 | 2 | Class XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

1. To make the students aware about the significance of sericulture as a profit-making enterprise.
2. To help the students to understand the biology of silkworms and its nutritional requirement to secrete quality silk.
3. To give an understanding about the techniques of silkworm rearing, reeling of silk and various measures to be taken to maximize the benefits.
4. To help the students to know about various uses of silk and develop entrepreneurial skills required for self-employment in sericulture and silk production sector.

Learning Outcomes

Upon completion of the course, students should be able to:

1. Learn about the history of sericulture and silk route.
2. Recognize various species of silk moths in India, and exotic and indigenous races.
3. Be aware about the opportunities and employment in sericulture industry- in public, private and government sector.
4. Gain thorough knowledge about the techniques involved in silkworm rearing and silk reeling.
5. Develop entrepreneurial skills necessary for self-employment in mulberry and seed production and be apprised about practicing sericulture as a profit-making enterprise.
6. Enhance collaborative learning and communication skills through practical sessions, team work, group discussions, assignments and projects.

Skill Development and Job Opportunities

1. Sericulture is multi-disciplinary activity consists of mulberry leaf production, silkworm rearing (cocoon production), silkworm egg production, silk reeling (yarn production), twisting, Warp and weft making, printing and dyeing, weaving, finishing, garment designing, marketing etc.

2. The demand for silk is bound to increase in the coming years This course will therefore help in generating employment, economic development and improvement in the quality of life of unemployed youth.
3. This course will generate entrepreneurs in this field. Sericulture offers gainful employment not only the rural masses but also for the educated youth in semi-urban and urban areas.
4. Effective utilization of waste generated in the industry will help in making the sericulture sector more viable, stable and create more employment opportunities.
5. Sericulturists fall under the category of primary activities. They usually find employment in sectors like government and research development centres.

Syllabus:

Sericulture as a tool for rural development. Uses of different by-products of sericulture in pharmaceuticals and Cosmetics **(60 hours)**

Practical

1. Identify and collection of different waste materials of mulberry, silkworm rearing and silk reeling
2. Prepare different useful products of mulberry leaf waste and sticks.
3. Silkworm sericin in- medical textiles, regenerative drugs, and tissue engineering, cosmeceuticals, food additives, and manufacturing of valuable biomaterials.
4. Silkworm pupa in the field of therapeutics, cosmetics, animal feed, fertilizer, etc.
5. Sericulture wastes in sustainable applications for biofuels generation.
6. Entrepreneurial ideas to convert waste material of sericulture into raw material for other industries.
7. IT/ non IT based projects of sericulture.

Essential Readings

- Manual on Sericulture (1976); Food and Agriculture Organisation, Rome Ullal, S.R. and Narasimhanna M.N. (1987) Handbook of Practical Sericulture; 3rd Edition, CSB, Bangalore

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi

38. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 38-1-4 dated 08.12.2022 regarding Syllabi of 2nd Semester of departments under Faculty of Mathematical Sciences.

Add the following:

Syllabi of Semester-II of the following departments under Faculty of Mathematical Sciences based on Under Graduate Curriculum Framework -2022 to be implemented from the Academic Year 2022-23.

FACULTY OF MATHEMATICAL SCIENCES

DEPARTMENT OF MATHEMATICS

Category-I
B.Sc. (Hons.) Mathematics

DISCIPLINE SPECIFIC CORE COURSE – 4: LINEAR ALGEBRA

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Linear Algebra | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | DSC-I: Algebra |

Learning Objectives: The objective of the course is to introduce:

- The concept of vectors in R^n , and their linear independence and dependence.
- Rank and nullity of linear transformations through matrices.
- Various applications of vectors in computer graphics and movements in plane.

Learning Outcomes: This course will enable the students to:

- Visualize the space R^n in terms of vectors and their interrelation with matrices.
- Familiarize with basic concepts in vector spaces, linear independence and span of vectors over a field.
- Learn about the concept of basis and dimension of a vector space.
- Basic concepts of linear transformations, dimension theorem, matrix representation of a linear transformation with application to computer graphics.

SYLLABUS OF DSC-4

UNIT – I: Matrices and System of Linear Equations (18 hours)

Fundamental operations with vectors in Euclidean space R^n , Linear combinations of vectors, Dot product and their properties, Cauchy-Schwarz inequality, Triangle inequality, Solving linear systems using Gaussian elimination, Gauss-Jordan row reduction, Reduced row echelon form, Equivalent systems, Rank and row space, Eigenvalues, Eigenvectors, Eigenspace, Diagonalization, Characteristic polynomial of a matrix, Cayley-Hamilton theorem.

UNIT – II: Introduction to Vector Spaces (12 hours)

Vector spaces, Subspaces, Algebra of subspaces, Linear combination of vectors, Linear span, Linear independence, Bases and dimension, Dimension of subspaces.

UNIT – III: Linear Transformations (15 hours)

Linear transformations, Null space, Range, Rank and nullity of a linear transformation, Matrix representation of a linear transformation, Algebra of linear transformations, Invertibility and isomorphisms; Application: Computer Graphics-Fundamental movements in a plane, homogenous coordinates, composition of movements.

Essential Readings

1. Andrilli, S., & Hecker, D. (2016). *Elementary Linear Algebra* (5th ed.). Elsevier India.
2. Friedberg, Stephen H., Insel, Arnold J., & Spence, Lawrence E. (2003). *Linear Algebra* (4th ed.). Prentice-Hall of India Pvt. Ltd. New Delhi.

Suggestive Readings

- Lay, David C., Lay, Steven R., & McDonald, Judi J. (2016). *Linear Algebra and its Applications* (5th ed.). Pearson Education.
- Kolman, Bernard, & Hill, David R. (2001). *Introductory Linear Algebra with Applications* (7th ed.). Pearson Education, Delhi. First Indian Reprint 2003.
- Hoffman, Kenneth, & Kunze, Ray Alden (1978). *Linear Algebra* (2nd ed.). Prentice Hall of India Pvt. Limited. Delhi. Pearson Education India Reprint, 2015.

DISCIPLINE SPECIFIC CORE COURSE – 5: CALCULUS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Calculus | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | DSC-2: Elementary Real Analysis |

Learning Objectives: The primary objective of this course is:

- To introduce the basic tools of calculus, also known as ‘science of variation’.
- To provide a way of viewing and analyzing the real-world.

Learning Outcomes: This course will enable the students to understand:

- The notion of limits, continuity and uniform continuity of functions.
- Geometrical properties of continuous functions on closed and bounded intervals.
- Applications of derivative, relative extrema and mean value theorems.
- Higher order derivatives, Taylor’s theorem, indeterminate forms and tracing of curves.

SYLLABUS OF DSC-5

UNIT – I: Limits and Continuity (15 hours)

Limits of functions ($\varepsilon - \delta$ and sequential approach), Algebra of limits, Squeeze theorem, One-sided limits, Infinite limits and limits at infinity; Continuous functions and its properties on closed and bounded intervals; Uniform continuity.

UNIT – II: Differentiability and Mean Value Theorems (15 hours)

Differentiability of a real-valued function, Algebra of differentiable functions, Chain rule, Relative extrema, Interior extremum theorem, Rolle’s theorem, Mean-value theorem and its applications, Intermediate value theorem for derivatives.

UNIT – III: (15 hours)

Successive Differentiation, Taylor’s Theorem and Tracing of Plane Curves

Higher order derivatives and calculation of the n th derivative, Leibnitz’s theorem; Taylor’s theorem, Taylor’s series expansions of e^x , $\sin x$, $\cos x$. Indeterminate forms, L’Hôpital’s rule; Concavity and inflexion points; Singular points, Asymptotes, Tracing graphs of rational functions and polar equations.

Essential Readings

1. Anton, Howard, Bivens, Irl, & Davis, Stephen (2013). *Calculus* (10th ed.). John Wiley & Sons Singapore Pvt. Ltd. Reprint (2016) by Wiley India Pvt. Ltd. Delhi.
2. Bartle, Robert G., & Sherbert, Donald R. (2011). *Introduction to Real Analysis* (4th ed.). John Wiley & Sons. Wiley India edition reprint.

3. Prasad, Gorakh (2016). *Differential Calculus* (19th ed.). Pothishala Pvt. Ltd. Allahabad.
4. Ross, Kenneth A. (2013). *Elementary Analysis: The Theory of Calculus* (2nd ed.). Undergraduate Texts in Mathematics, Springer. Indian reprint.

Suggestive Readings

- Apostol, T. M. (2007). *Calculus: One-Variable Calculus with an Introduction to Linear Algebra* (2nd ed.). Vol. 1. Wiley India Pvt. Ltd.
- Ghorpade, Sudhir R. & Limaye, B. V. (2006). *A Course in Calculus and Real Analysis*. Undergraduate Texts in Mathematics, Springer (SIE). Indian reprint.

DISCIPLINE SPECIFIC CORE COURSE – 6: ORDINARY DIFFERENTIAL EQUATIONS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Ordinary Differential Equations | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | NIL |

Learning Objectives: The main objective of this course is to introduce the students:

- The exciting world of differential equations.
- Their applications and mathematical modeling.

Learning Outcomes: The course will enable the students to:

- Learn the basics of differential equations and compartmental models.
- Formulate differential equations for various mathematical models.
- Solve first order non-linear differential equations, linear differential equations of higher order and system of linear differential equations using various techniques.
- Apply these techniques to solve and analyze various mathematical models.

SYLLABUS OF DSC-6

UNIT – I: First-Order Differential Equations (12 hours)

Concept of implicit, general and singular solutions for the first order ordinary differential equation; Bernoulli's equation, Exact equations, Integrating factors, Initial value problems, Reducible second order differential equations; Applications of first order differential equations to Newton's law of cooling, exponential growth and decay problems.

UNIT – II: Second and Higher-Order Differential Equations (18 hours)

General solution of homogenous equation of second order, Principle of superposition for a homogenous equation, Wronskian and its properties, Linear homogeneous and non-homogeneous equations of higher order with constant coefficients, Method of variation of parameters, Method of undetermined coefficients, Two-point boundary value problems, Cauchy- Euler's equation, System of linear differential equations, Application of second order differential equation: Simple pendulum problem.

UNIT – III: Formulation and Analysis of Mathematical Models (15 hours)

Introduction to compartmental models, Lake pollution model; Density-dependent growth model, Interacting population models, Epidemic model of influenza and its analysis, Predator-prey model and its analysis, Equilibrium points, Interpretation of phase plane

Practical (30 hours)- Practical / Lab work to be performed in a Computer Lab:

Modeling of the following problems using SageMath/Mathematica/MATLAB/Maple/Maxima/Scilab etc.

1. Solutions of first, second and third order differential equations.
2. Plotting of family of solutions of differential equations of first, second and third order.
3. Solution of differential equations using method of variation of parameters.
4. Growth and decay model (exponential case only).
5. Lake pollution model (with constant/seasonal flow and pollution concentration).
6. Density-dependent growth model.
7. Predatory-prey model (basic Volterra model, with density dependence, effect of DDT, two prey one predator).
8. Epidemic model of influenza (basic epidemic model, contagious for life, disease with carriers).

Essential Readings

1. Barnes, Belinda & Fulford, Glenn R. (2015). *Mathematical Modeling with Case Studies, Using Maple and MATLAB* (3rd ed.). CRC Press. Taylor & Francis Group.
2. Edwards, C. Henry, Penney, David E., & Calvis, David T. (2015). *Differential Equations and Boundary Value Problems: Computing and Modeling* (5th ed.). Pearson Education.
3. Ross, Shepley L. (2014). *Differential Equations* (3rd ed.). Wiley India Pvt. Ltd.

BA. (Prog.) with Mathematics as Major

Category II

DISCIPLINE SPECIFIC CORE COURSE (DSC-2): ANALYTIC GEOMETRY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Analytic Geometry | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | NIL |

Learning Objectives: The course aims at:

- Identifying and sketching curves, studying three dimensional objects, their geometric properties and applications.
- Use of vector approach to three-dimensional geometry makes the study simple and elegant.

Learning Outcomes: This course will enable the students to:

- Learn concepts in two-dimensional geometry.
- Identify and sketch conics namely, ellipse, parabola and hyperbola.
- Learn about three-dimensional objects such as straight lines and planes using vectors, spheres, cones and cylinders.

SYLLABUS OF DSC-2

UNIT – I: Conic Sections

(15 hours)

Techniques for sketching parabola, ellipse and hyperbola; Reflection properties of parabola, ellipse, hyperbola, and their applications to signals; Classification of quadratic equation representing lines, parabola, ellipse and hyperbola; Rotation of axes; Second degree equations.

UNIT – II: Vectors, Lines and Planes

(18 hours)

Rectangular coordinates in 3-dimensional space, vectors viewed geometrically, vectors in coordinate systems and vectors determined by length and angle; Dot product; Projections; Cross product, scalar triple product, vector triple product and their geometrical properties; Parametric equations of lines, direction cosines and direction ratios of a line, vector and symmetric equations of lines, angle between two lines; Planes in 3-dimensional space, coplanarity of two lines, angle between two planes, distance of a point from a plane, angle between a line and a plane, distance between parallel planes; Shortest distance between two skew lines.

UNIT – III: Sphere, Cone and Cylinder**(12 hours)**

Equation of a sphere, plane section of sphere, tangents and tangent plane to a sphere; Equation of a cone, enveloping cone of a sphere, Reciprocal cones and right circular cone; Equation of a cylinder, enveloping cylinder and right circular cylinder.

Essential Readings

1. Anton, Howard, Bivens, Irl, & Davis, Stephen (2013). *Calculus* (10th ed.). John Wiley & Sons Singapore Pte. Ltd. Indian reprint (2016) by Wiley India Pvt. Ltd. Delhi.
2. Narayan, Shanti & Mittal, P. K. (2007). *Analytical Solid Geometry*. S. Chand & Company Pvt Ltd. India.

Suggestive Readings

- Bell, Robert J.T. (1972). *An Elementary Treatise on Coordinate Geometry of Three Dimensions*. Macmillan & Co. Ltd. London.
- George B. Thomas, Jr., & Ross L. Finney (2012). *Calculus and Analytic Geometry* (9th ed.). Pearson Indian Education Services Pvt Ltd. India.

DISCIPLINE SPECIFIC CORE COURSE – 2 (Discipline A-2): Elementary Linear Algebra**CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------------|---------|-----------------------------------|----------|---------------------|---|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Elementar y Linear Algebra | 4 | 3 | 1 | 0 | Class XII pass with Mathematic s | NIL |

Learning Objectives: The objective of the course is:

- To introduce the concept of vectors in R^n .
- Understanding the nature of solution of system of linear equations.
- To view the $m \times n$ matrices as a linear function from R^n to R^m and vice versa.
- To introduce the concepts of linear independence and dependence, rank and linear transformations has been explained through matrices.

Learning Outcomes: This course will enable the students to:

- Visualize the space R^n in terms of vectors and the interrelation of vectors with matrices.
- Familiarize with concepts of bases, dimension and minimal spanning sets in vector spaces.
- Learn about linear transformation and its corresponding matrix.

SYLLABUS OF DSC-2

UNIT – I: Euclidean Space R^n and Matrices (18 hours)

Fundamental operations with vectors in Euclidean space R^n , Linear combinations of vectors, Dot product and their properties, Cauchy-Schwarz inequality, Triangle inequality, Solving system of linear equations using Gaussian elimination, Application: Curve Fitting, Gauss-Jordan row reduction, Reduced row echelon form, Application: Solving several systems simultaneously, Equivalent systems, Rank and row space of a matrix, Eigenvalues, Eigenvectors, Eigenspace, Diagonalization, Characteristic polynomial of a matrix.

UNIT – II: Introduction to Vector Spaces (12 hours)

Definition, Examples and some elementary properties of vector spaces, Subspaces, Span, Linear independence and linear dependence of vectors, Basis and dimension of a vector space, Maximal linearly independent sets, Minimal spanning sets.

UNIT – II: Linear Transformations (15 hours)

Linear transformations: Definition, Examples and elementary properties, The matrix of a linear transformation, Kernel and range of a linear transformation, The dimension theorem, one-to-one and onto linear transformations, Invertible linear transformations, Isomorphic vector spaces.

Essential Reading

1. Andrilli, S., & Hecker, D. (2016). *Elementary Linear Algebra* (5th ed.). Elsevier India.

Suggestive Readings

(Category-IV)
COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED
BY THE DEPARTMENT OF MATHEMATICS

GENERIC ELECTIVES (GE-2(i)): ANALYTIC GEOMETRY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Analytic Geometry | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | NIL |

Learning Objectives: The course aims at:

- Identifying and sketching curves, studying three dimensional objects, their geometric properties and applications.
- Use of vector approach to three-dimensional geometry makes the study simple and elegant.

Learning Outcomes: This course will enable the students to:

- Learn concepts in two-dimensional geometry.
- Identify and sketch conics namely, ellipse, parabola and hyperbola.
- Learn about three-dimensional objects such as straight lines and planes using vectors, spheres, cones and cylinders.

SYLLABUS OF GE-2(i)

UNIT – I: Conic Sections **(15 hours)**

Techniques for sketching parabola, ellipse and hyperbola; Reflection properties of parabola, ellipse, hyperbola, and their applications to signals; Classification of quadratic equation representing lines, parabola, ellipse and hyperbola; Rotation of axes; Second degree equations.

UNIT – II: Vectors, Lines and Planes **(18 hours)**

Rectangular coordinates in 3-dimensional space, vectors viewed geometrically, vectors in coordinate systems and vectors determined by length and angle; Dot product; Projections; Cross product, scalar triple product, vector triple product and their geometrical properties; Parametric equations of lines, direction cosines and direction ratios of a line, vector and symmetric equations of lines, angle between two lines; Planes in 3-dimensional space, coplanarity of two lines, angle between two planes, distance of a point from a plane, angle between a line and a plane, distance between parallel planes; Shortest distance between two skew lines.

UNIT – III: Sphere, Cone and Cylinder**(12 hours)**

Equation of a sphere, plane section of sphere, tangents and tangent plane to a sphere;
Equation of a cone, enveloping cone of a sphere, Reciprocal cones and right circular cone;
Equation of a cylinder, enveloping cylinder and right circular cylinder.

Recommended Readings:

1. Anton, Howard, Bivens, Irl, & Davis, Stephen (2013). *Calculus* (10th ed.). John Wiley & Sons Singapore Pte. Ltd. Indian reprint (2016) by Wiley India Pvt. Ltd. Delhi.
2. Narayan, Shanti & Mittal, P. K. (2007). *Analytical Solid Geometry*. S. Chand & Company Pvt Ltd. India.

Suggestive Readings:

- Bell, Robert J.T. (1972). *An Elementary Treatise on Coordinate Geometry of Three Dimensions*. Macmillan & Co. Ltd. London.

GENERIC ELECTIVES (GE-2(ii)): INTRODUCTION TO LINEAR ALGEBRA**CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Linear Algebra | 4 | 3 | 1 | 0 | Class XII pass with Mathematics | NIL |

Learning Objectives: The objective of the course is:

- To introduce the concept of vectors in R^n .
- Understand the nature of solution of system of linear equations.
- To view the $m \times n$ matrices as a linear function from R^n to R^m and vice versa.
- To introduce the concepts of linear independence and dependence, rank and linear transformations has been explained through matrices.

Learning Outcomes: This course will enable the students to:

- Visualize the space R^n in terms of vectors and the interrelation of vectors with matrices.
- Understand important uses of eigenvalues and eigenvectors in the diagonalization of matrices.
- Familiarize with concepts of bases, dimension and minimal spanning sets in vector spaces.
- Learn about linear transformation and its corresponding matrix.

SYLLABUS OF GE-2(ii)

UNIT – I: Vectors and Matrices (18 hours)

Fundamental operations and properties of vectors in R^n , Linear combinations of vectors, Dot product and their properties, Cauchy-Schwarz and triangle inequality, Orthogonal and parallel vectors; Solving system of linear equations using Gaussian elimination, and Gauss-Jordan row reduction, Reduced row echelon form; Equivalent systems, Rank and row space of a matrix; Eigenvalues, eigenvectors and characteristic polynomial of a square matrix; Diagonalization.

UNIT – II: Vector Spaces (12 hours)

Definition, examples and some elementary properties of vector spaces; Subspaces, Span, Linear independence and dependence; Basis and dimension of a vector space; Diagonalization and bases.

UNIT – III: Linear Transformations (15 hours)

Definition, examples and elementary properties of linear transformations; The matrix of a linear transformation; Kernel and range of a linear transformation, The dimension theorem, one-to-one and onto linear transformations.

Essential Reading

DEPARTMENT OF OPERATIONAL RESEARCH

Category I

BSc. (Hons.) Operational Research

DISCIPLINE SPECIFIC CORE COURSE – 4: Advanced Linear Programming

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Advanced Linear Programming DSC-4 | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Basic Linear Programming |

Learning Objectives

The Learning Objectives of this course are as follows:

- To enrich the knowledge of students with advanced concepts and techniques of linear programming problem along with real life applications
- To make students understand the theoretical basics of different computational algorithms used in solving linear programming and related problems.

Learning outcomes

Students completing this course will be able to:

- Explain the relationship between a linear program and its dual, including strong duality and complementary slackness, and understand the economic interpretation of duality.
- Learn an alternative method for solving linear programming problems.
- Perform sensitivity analysis to identify the direction and magnitude of change of a linear programming model's optimal solution as the input data changes.
- Formulate specialized linear programming problems, namely transportation and assignment problems and describe theoretical workings of the solution methods for transportation and assignment problems, demonstrate solution process by hand and solver.

SYLLABUS OF DSC-4

Unit I (12 Hours): Duality: Duality in linear programming, Duality theorems (Weak duality, Strong duality, Existence theorem and Complementary slackness conditions), Economic interpretation of duality, Dual simplex method.

Unit II (09 Hours): Sensitivity Analysis: Post Optimality Analysis (change in resource vector, change in cost vector, addition and deletion of a constraint, addition and deletion of a decision variable).

Unit III (15 Hours): Transportation problem (TP) : TP and its formulation, finding initial basic feasible solution of TP using North-West Corner rule, Least Cost method and Vogel's Approximation method, MODI method for finding optimal solution, Special cases in TP.

Unit IV (09 Hours): Assignment problem (AP) : AP and its formulation, Hungarian method for solving AP, Special cases in AP, Transshipment and Travelling salesmen problem.

Practical component (if any) – 30 Hours

Practical/Lab to be performed on a computer using OR/Statistical packages

1. Solution to linear programming problem through dual simplex method.
2. Computational sensitivity analysis with respect to changes in the cost vector.
3. Computational sensitivity analysis with respect to changes in the resource vector.
4. Solution of transportation problem.
5. Solution of assignment problem.
6. Solution of travelling salesman problem.

Essential/recommended readings

DISCIPLINE SPECIFIC CORE COURSE – 5: Statistics

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Statistics DSC-5 | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- The aim of this course is to acquaint the students with the fundamental concepts of Probability and Statistics, to provide an understanding of the processes by which real-life statistical problems are analysed
- To develop an understanding of the role of Statistics in Operational Research.

Learning Outcomes

Students completing this course will be able to:

- Quantify uncertainty using probability, learn how to find probability using the concepts of random variables and distribution functions, obtain characteristics of the underlying distributions, and study functional relationships between two random variables.
- Know various discrete and continuous probability distributions along with their characteristics and identify the situations where they provide realistic models.
- Know about the modes of convergence in probability theory.
- Define the functional relationship between two variables and gain a foothold in basic concepts of forecasting.

SYLLABUS OF DSC-5

Unit I (06 Hours): Probability: Probability Axioms, Conditional Probability and Bayes' Theorem and its Applications.

Unit II (15 Hours): Random Variables, Distribution Functions and Moments: Introduction, Expectation and Variance, Moment Generating Functions and Characteristic Function, Multidimensional Random Variable, Conditional Expectation and Conditional Variance. Joint, Marginal and Conditional Distributions. Independent Random Variables.

Unit III (15 Hours): Probability Distributions and Large Sample Theory: Discrete and Continuous Probability Distributions (Binomial, Poisson, Geometric Negative binomial, Uniform, Exponential, Normal), Weak Law of Large Numbers, Strong Law of Large Numbers. Central Limit Theorem.

Unit IV (9 Hours): Regression and Forecasting: Karl Pearson's Coefficient of Correlation, Lines of regression, Introduction to Forecasting.

Practical component (if any) -

1. Practicals to Analyse frequency distribution using moments.
2. Practicals to demonstrate applications of Binomial, Poisson and Normal Distributions
3. Practicals to understand Fitting of discrete distributions-Binomial, Poisson, Negative Binomial
4. Fitting of continuous distributions-Exponential. Normal
5. Finding Karl Pearson's Correlation Coefficient using raw and grouped data
6. Analysis of data to be used for forecasting- graphically, using summary statistics, and various measures of forecasting accuracy that are used to help judge the appropriateness of a model
7. Regression Analysis and forecasting using Lines of regression

Essential/recommended readings

- Hogg, R.V., Craig, A.T., and McKean, J.W. (2019). *Introduction to Mathematical Statistics* (8th ed.). Pearson.

DISCIPLINE SPECIFIC CORE COURSE – 6: Python Programming for Business Modelling

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|--|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Python Programming for Business Modelling DSC-6 | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To introduce the basic concepts of Python programming. The course will familiarize the students with Python's ability to handle different data formats such as numbers, strings, lists, dictionaries, sets, tuples, etc.
- The students will be made familiar with the concepts of loops. Modularization of code using inbuilt functions as well as user defined functions will also be explained.
- To introduce the basics for various useful libraries so as to equip the students with modern computing skills.

Learning outcomes

Upon successful completion of this course the student will be able to:

- Learn Python installation and configuration.
- Understand simple scripting using Python.
- Learn Syntax and Semantics of Python Programming.
- Understand different data types and arithmetical, logical and relational expressions in Python.
- Understand the control structures and functions in Python by writing codes for some real-world problems.
- Handle simple data structures, lists, dictionaries, sets and tuples.
- Modularize the code using inbuilt functions and user defined functions.
- Handle various managerial decision making related problems

SYLLABUS OF DSC-6

Unit I (6 Hours)

Python installation, Basic Terminal Commands, interactive mode and script mode, Structure of a Program, Simple Python Script Writing, script execution, debugging errors and understanding simple programs in Python

Unit II (12 Hours)

Identifiers and keywords; literals, numbers, and strings; Operators and expressions; Input and Output statements; control structures (conditional statements, loop control statements, break, Continue and pass).

Unit III (10 Hours)

Introduction to Functions and its definition: Modules, built in and user-defined functions, passing arguments and returning values, default arguments, functions as data.

Unit IV (8 Hours)

Data Structures: Strings, Lists, Tuples, Sets, Dictionaries, Analysing their functions and basic operations.

Unit V (9 Hours): Introduction to Core Libraries in Python : Numpy Library for Arrays (Creating and accessing One and Multi-Dimensional Array), Pandas Library for Data Processing (Basics of DataFrame), Matplotlib Library for Visualization (Pie Chart, Scatter Plot, Histogram, Bar Chart), SciPy Library for Statistics (for handling basic statistics like; Descriptive Statistics, Rank, Determining Homogeneity of Variances, Correlation), Using PuLP for solving Linear Programming Problems

Practical component (if any) –

1. Write a program to enter a name and display: “Hello, Name”.
2. Write a program to compute the roots of a quadratic equation.
3. Write a program to print a pyramid **pattern** with 8 rows.
4. Write a menu-driven program to enter a number and print whether the number is odd or even.
5. Write a program to build a **random number generator** that generates random numbers between 1 and 6 (simulates a dice).
6. Write a program that takes two **lists** and returns “True” if they have at least one common member.
7. Write a program to check if one **list** is reverse of another.
8. Write a program to check if a given **array** is Monotonic.
9. Write a program to find the maximum number out of 3 entered numbers. (**loop**)
10. Write a program to build a menu driven **calculator** and perform basic arithmetic operations between two numbers. (Addition, Subtraction, Multiplication and Division)
11. Write a program to create a **dictionary** and remove one key.
12. Write a program to enter 5 subject’s marks and print the grades A/B/C/D. (**loop**)
13. Write a program to print a Fibonacci sequence. (**loop**)
14. Write a program in python to plot a **graph** for the function $y = x^2$.
15. Programmes related to creating and modifying List, Tuple and Dictionary.
16. Programmes to find correlation between dependent and independent variables.
17. Programme to develop a regression model on an existing data set.

18. Programmes for data visualization (Charts using plot() function, Pie Chart, Scatter Plot, Histogram, Bar Chart)
19. Programmes for handling descriptive statistics using SciPy.
20. Solution to linear programming problems using PuLP Library.
21. Solution to deterministic EOQ based models for Inventory Management

Discrete and Continuous Probability Distributions (Binomial, Poisson, Geometric Negative binomial, Uniform, Exponential, Normal), Weak Law of Large Numbers, Strong Law of Large Numbers. Central Limit Theorem.

Unit IV (09 Hours): Regression and Forecasting: Karl Pearson's Coefficient of Correlation, Lines of regression, Introduction to Forecasting.

Practical component (if any) -

1. Practicals to Analyse frequency distribution using moments.
2. Practicals to demonstrate applications of Binomial, Poisson and Normal Distributions
3. Practicals to understand Fitting of discrete distributions-Binomial, Poisson, Negative Binomial
4. Fitting of continuous distributions-Exponential. Normal
5. Finding Karl Pearson's Correlation Coefficient using raw and grouped data
6. Analysis of data to be used for forecasting- graphically, using summary statistics, and various measures of forecasting accuracy that are used to help judge the appropriateness of a model
7. Regression Analysis and forecasting using Lines of regression

Operational Research Courses for Undergraduate Programme of study
with Operational Research as one of the Core Disciplines

(B.A Programme with Operational Research as non-Major or Minor discipline)

Category III

DISCIPLINE SPECIFIC CORE COURSE – 3: Advanced Linear Programming

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-----------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Advanced Linear Programming DSC-3 | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Basic Linear Programming |

Learning Objectives

The Learning Objectives of this course are as follows:

- To enrich the knowledge of students with advanced concepts and techniques of linear programming problem along with real life applications
- To make students understand the theoretical basics of different computational algorithms used in solving linear programming and related problems.

Learning outcomes

Students completing this course will be able to:

- Explain the relationship between a linear program and its dual, including strong duality and complementary slackness, and understand the economic interpretation of duality.
- Learn an alternative method for solving linear programming problems.
- Perform sensitivity analysis to identify the direction and magnitude of change of a linear programming model's optimal solution as the input data changes.
- Formulate specialized linear programming problems, namely transportation and assignment problems and describe theoretical workings of the solution methods for transportation and assignment problems, demonstrate solution process by hand and solver.

SYLLABUS OF DSC-3

Unit I (12 Hours): Duality: Duality in linear programming, Duality theorems (Weak duality, Strong duality, Existence theorem and Complementary slackness conditions), Economic interpretation of duality, Dual simplex method.

Unit II (09 Hours): Sensitivity Analysis: Post Optimality Analysis (change in resource vector, change in cost vector, addition and deletion of a constraint, addition and deletion of a decision variable).

Unit III (15 Hours): Transportation Problem (TP): TP and its formulation, finding initial basic feasible solution of TP using North-West Corner rule, Least Cost method and Vogel's Approximation method, MODI method for finding optimal solution, Special cases in TP.

Unit IV (09 Hours): Assignment problem (AP): AP and its formulation, Hungarian method for solving AP, Special cases in AP, Transshipment and Travelling salesmen problem.

Practical component (if any) –

Practical/Lab to be performed on a computer using OR/Statistical packages

1. Solution to linear programming problem through dual simplex method.
2. Computational sensitivity analysis with respect to changes in the cost vector.
3. Computational sensitivity analysis with respect to changes in the resource vector.
4. Solution of transportation problem.
5. Solution of assignment problem.
6. Solution of travelling salesman problem.

GENERIC ELECTIVES (GE-2): Production and Inventory Management

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------|-----------------------------------|----------|---------------------|--|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Production and Inventory Management GE-2 | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

The objective of this course is to introduce fundamental concepts in production and inventory management and at the same time, develop the students' modelling and analytical skills.

Learning outcomes

After completion of the course, students will possess knowledge and skills required to

- Gain an understanding of key concepts of Production and Inventory management and its role in various organizations.
- Apply selective inventory control techniques and understand its significance.
- Determine optimal order quantity for various deterministic and probabilistic inventory models.
- Understand quantity discount models in inventory management.
- Formulate and develop Production Planning and Scheduling models.
- To apply and extend production and inventory models to analyse real world systems.

SYLLABUS OF GE-2

Unit I (9 Hours): Production and Inventory Management, Introduction , Different types of costs in inventory system, Selective inventory classification (VED, XML, FNSD, ABC) and its use in controlling inventory.

Unit II (15 Hours): Deterministic continuous review models: Economic order quantity (EOQ) model with and without shortages, Finite replenishment rate Inventory models without and with planned shortages. Determination of reorder point, Quantity discount models.

Unit III (9 Hours): Probabilistic inventory models: Single period probabilistic inventory models with discrete and continuous demand.

Unit IV (12 Hours): Production Planning and Scheduling,: Introduction, Aggregate production plan, Formulation of lot size production problem: Wagner and Within algorithm. Basic concepts of Just-in-Time (JIT) and Material Requirement Planning (MRP).

Practical component (if any) -

Practical/Lab to be performed on a computer using OR/Statistical packages

1. Problems based on selective inventory classification. (ABC and FNS analysis)
2. To find optimal inventory policy for EOQ model.
3. To find optimal inventory policy for EOQ model with finite supply.
4. To find optimal inventory policy for EOQ model with backorders.
5. To solve all units quantity discounts model.
6. To solve Incremental quantity discount model
7. To find optimal inventory policy for Probabilistic inventory model with discrete demand.
8. To find optimal inventory policy for Probabilistic inventory model with continuous.
9. Solution of procurement/production scheduling model.

DEPARTMENT OF COMPUTER SCIENCE

BSc. (Hons.) Computer Science -DSC

Category I

DISCIPLINE SPECIFIC CORE COURSE – 4: Object Oriented Programming

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC04 Object Oriented Programming with C++ | 4 | 3 | 0 | 1 | Class pass with Mathematics XII | Nil |

Learning Objectives

This course is designed to introduce programming concepts using C++ to students. The course aims to develop structured as well as object-oriented programming skills using C++ programming language. The course also aims to achieve competence amongst its students to develop correct and efficient C++ programs to solve problems spanning multiple domains.

Learning outcomes

On successful completion of the course, students will be able to:

- Write simple programs using built-in data types of C++.
- Implement arrays and user defined functions in C++.
- Write programs using dynamic memory allocation, handling external files, interrupts and exceptions.
- Solve problems spanning multiple domains using suitable programming constructs in C++.
- Solve problems spanning multiple domains using the concepts of object oriented programming in C++.

SYLLABUS OF DSC-4

UNIT – I (3 Hours)

Introduction to C++: Overview of Procedural and Object-Oriented Programming, Using main() function, Header Files, Compiling and Executing Simple Programs in C++

UNIT – II (12 Hours)

Programming Fundamentals: Data types, Variables, Operators, Expressions, Arrays, Keywords, Decision making constructs, Iteration, Type Casting, Input-output statements, Functions, Command Line Arguments/Parameters

UNIT – III (15 Hours)

Object Oriented Programming: Concepts of Abstraction, Encapsulation. Creating Classes and objects, Modifiers and Access Control, Constructors, Destructors, Implementation of Inheritance and Polymorphism, Template functions and classes

UNIT – IV (9 Hours)

Pointers and References: Static and dynamic memory allocation, Pointer and Reference Variables, Implementing Runtime polymorphism using pointers and references

UNIT – V (6 Hours)

Exception and File Handling: Using try, catch, throw, throws and finally; Nested try, creating user defined exceptions, File I/O Basics, File Operations

Practical component (if any) -30 Hours

1. Write a program to compute the sum of the first n terms of the following series:

$$sum = 1 - \frac{1}{2^2} + \frac{1}{3^3} - \dots$$

The number of terms n is to be taken from the user through the command line. If the command line argument is not found then prompt the user to enter the value of n.

2. Write a program to remove the duplicates from an array.
3. Write a program that prints a table indicating the number of occurrences of each alphabet in the text entered as command line arguments.
4. Write a menu driven program to perform string manipulation (without using inbuilt string functions):
 - a. Show address of each character in string
 - b. Concatenate two strings.
 - c. Compare two strings
 - d. Calculate length of the string (use pointers)
 - e. Convert all lowercase characters to uppercase
 - f. Reverse the string
 - g. Insert a string in another string at a user specified position
5. Write a program to merge two ordered arrays to get a single ordered array.

6. Write a program to search a given element in a set of N numbers using Binary search
(i) with recursion (ii) without recursion.
7. Write a program to calculate GCD of two numbers (i) with recursion (ii) without recursion.
8. Create a Matrix class. Write a menu-driven program to perform following Matrix operations (exceptions should be thrown by the functions if matrices passed to them are incompatible and handled by the main() function):
 - a. Sum
 - b. Product
 - c. Transpose
9. Define a class Person having name as a data member. Inherit two classes Student and Employee from Person. Student has additional attributes as course, marks and year and Employee has department and salary. Write display() method in all the three classes to display the corresponding attributes. Provide the necessary methods to show runtime polymorphism.
10. Create a Triangle class. Add exception handling statements to ensure the following conditions: all sides are greater than 0 and sum of any two sides are greater than the third side. The class should also have overloaded functions for calculating the area of a right angled triangle as well as using Heron's formula to calculate the area of any type of triangle.
11. Create a class Student containing fields for Roll No., Name, Class, Year and Total Marks. Write a program to store 5 objects of Student class in a file. Retrieve these records from the file and display them.
12. Copy the contents of one text file to another file, after removing all whitespaces.

DISCIPLINE SPECIFIC CORE COURSE – 5: Discrete Mathematical Structures

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC 05 Discrete Mathematical Structures | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

This course is designed as a foundational course to make students learn about the mathematical constructs that are used in Computer Science such as Boolean algebra, sets, relations, functions, principles of counting, and recurrences. In this course, the knowledge of mathematical notation, ideas and concepts learnt at the pre-college levels is extended to orient the students towards mathematical thinking required in Computer Science.

Learning outcomes

On successful completion of the course, students will be able to:

- Relate mathematical concepts and terminology to examples in the domain of Computer Science.
- Model real world problems using various mathematical constructs.
- Use different proofing techniques; construct simple mathematical proofs using logical arguments.
- Formulate mathematical claims and construct counterexamples.

SYLLABUS OF DSC- 5

UNIT – I (06 Hours)

Sets, Functions, Sequences and Summations, Relations: Sets: Set Operations, Computer Representation of Sets, Countable and Uncountable Set, Principle of Inclusion and Exclusion, Multisets; Functions: One-to-one and Onto Functions, Inverse Functions and Compositions of

Functions, Graphs of Functions Sequences and Summations: Sequences, Special Integer Sequences, Summations; Relations: Properties of Binary Relations, Equivalence relations and Partitions, Partial Ordering Relations and Lattices.

UNIT – II (09 Hours)

Logic and Proofs: Propositional Logic, Propositional Equivalences, Use of first-order logic to express natural language predicates, Quantifiers, Nested Quantifiers, Rules of Inference, Introduction to Proofs, Proof Methods and Strategies, Mathematical Induction.

UNIT – III (09 Hours)

Number Theory: Division and Integers, Primes and Greatest Common Divisors, Representation of Integers, Algorithms for Integer Operations, Modular Exponentiation, Applications of Number Theory.

UNIT – IV (06 Hours)

Combinatorics/Counting: The Pigeonhole Principle, Permutations and Combinations, Binomial Coefficients, Generalized Permutations and Combinations, Generating Permutations and Combinations.

UNIT – V (09 Hours)

Graphs and Trees: Graphs: Basic Terminology, Multigraphs and Weighted Graphs, Paths and Circuits, Eulerian Paths and Circuits, Hamiltonian paths and Circuits, Shortest Paths, Spanning Trees, Graph Isomorphism, Planar Graphs; Trees: Trees, Rooted Trees, Path Lengths in Rooted Trees.

UNIT – VI (06 Hours)

Recurrence: Recurrence Relations, Generating Functions, Linear Recurrence Relations with Constant Coefficients and their solution.

Practical component (if any) – 30 Hours

1. Create a class SET. Create member functions to perform the following SET operations:
 - 1) is member: check whether an element belongs to the set or not and return value as true/false.
 - 2) powerset: list all the elements of the power set of a set .
 - 3) subset: Check whether one set is a subset of the other or not.
 - 4) union and Intersection of two Sets.
 - 5) complement: Assume Universal Set as per the input elements from the user.
 - 6) set Difference and Symmetric Difference between two sets.
 - 7) cartesian Product of Sets.

Write a menu driven program to perform the above functions on an instance of the SET class.

2. Create a class RELATION, use Matrix notation to represent a relation. Include member functions to check if the relation is Reflexive, Symmetric, Anti-symmetric, Transitive. Using these functions check whether the given relation is: Equivalence or Partial Order relation or None

3. Write a Program that generates all the permutations of a given set of digits, with or without repetition.
4. For any number n , write a program to list all the solutions of the equation $x_1 + x_2 + x_3 + \dots + x_n = C$, where C is a constant ($C \leq 10$) and $x_1, x_2, x_3, \dots, x_n$ are nonnegative integers, using brute force strategy.
5. Write a Program to evaluate a polynomial function. (For example store $f(x) = 4n^2 + 2n + 9$ in an array and for a given value of n , say $n = 5$, compute the value of $f(n)$).
6. Write a Program to check if a given graph is a complete graph. Represent the graph using the Adjacency Matrix representation.
7. Write a Program to check if a given graph is a complete graph. Represent the graph using the Adjacency List representation.
8. Write a Program to accept a directed graph G and compute the in-degree and out-degree of each vertex.

DISCIPLINE SPECIFIC CORE COURSE – 6: Probability for Computing

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|----------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC06 Probability for computing | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

This course introduces the students to the fundamental concepts and topics of probability and statistics, whose knowledge is important in other computer science courses. The course aims to build the foundation for some of the core courses in later semesters.

Learning outcomes

After successful completion of this course, the student will be able to:

- Use probability theory to evaluate the probability of real-world events.
- Describe discrete and continuous probability distribution functions and generate random numbers from the given distributions.
- Find the distance between two probability distributions
- Define and quantify the information contained in the data.
- Perform data analysis in a probabilistic framework.
- Visualize and model the given problem using mathematical concepts covered in the course.

SYLLABUS OF DSC-6 UNIT-I (09 Hours)

Basic Probability: Introduction to the notion of probability, Random experiment, Sample space and Events, Probability defined on events, Algebra of events. Conditional probabilities, independent events, Bayes' theorem.

UNIT-II (12 Hours)

Random Variables: Introduction to Random Variables, Probability mass/density functions, Cumulative distribution functions. Discrete Random Variables (Bernoulli, Binomial, Poisson, Multinomial and Geometric). Continuous Random Variables (Uniform, Exponential and Normal). Expectation of a Random Variable, Expectation of Function of a Random Variable and Variance. Markov inequality, Chebyshev's inequality, Central Limit Theorem, Weak and Strong Laws of Large Numbers.

UNIT-III (09 Hours)

Joint Distributions: Jointly distributed Random Variables, Joint distribution functions, Independent Random Variables, Covariance of Random Variables, Correlation Coefficients,

Conditional Expectation.

UNIT-IV (15 Hours)

Markov Chain and Information Theory: Introduction to Stochastic Processes, Chapman–Kolmogorov equations, Classification of states, Limiting and Stationary Probabilities. Random Number Generation, Pseudo Random Numbers, Inverse Transformation Method, Rejection Method, Uncertainty, Information and Entropy, Mutual Information, KL Divergence.

Practical component (if any) – 30 Hours

The goal of this lab is to develop data interpretation skills. Following exercises are designed to enable students to understand data characteristics either by visualization or by interpreting computed measures. All the exercises are to be completed using MS Excel functions and graphs. At the end of each exercise, the student should be able to draw a conclusion and state in a concise manner. Teachers are expected to guide students to obtain real data available through the internet for the following exercises.

1. Plotting and fitting of Binomial distribution and graphical representation of probabilities.
2. Plotting and fitting of Multinomial distribution and graphical representation of probabilities.
3. Plotting and fitting of Poisson distribution and graphical representation of probabilities.
4. Plotting and fitting of Geometric distribution and graphical representation of probabilities.
5. Plotting and fitting of Uniform distribution and graphical representation of probabilities.
6. Plotting and fitting of Exponential distribution and graphical representation of probabilities.
7. Plotting and fitting of Normal distribution and graphical representation of probabilities.
8. Calculation of cumulative distribution functions for Exponential and Normal distribution.
9. Given data from two distributions, find the distance between the distributions.
10. Application problems based on the Binomial distribution.
11. Application problems based on the Poisson distribution.
12. Application problems based on the Normal distribution.
13. Presentation of bivariate data through scatter-plot diagrams and calculations of covariance.
14. Calculation of Karl Pearson's correlation coefficients.
15. To find the correlation coefficient for a bivariate frequency distribution.
16. Generating Random numbers from discrete (Bernoulli, Binomial, Poisson) distributions.

17. Generating Random numbers from continuous (Uniform, Normal) distributions.

18. Find the entropy from the given data set.

Science as one of the Core Disciplines**

Category II

DISCIPLINE SPECIFIC CORE COURSE (DSC-2): Data Structures using C++

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|--|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC02: Data Structures using C++ | 4 | 3 | 0 | 1 | Class pass with Mathematics XII | Nil |

Learning Objectives

The course aims at developing the ability to use basic data structures like arrays, stacks, queues, lists, trees to solve problems. C++ is chosen as the language to understand implementation of these data structures.

Learning outcomes

On successful completion of the course, students will be able to:

- Compare two functions for their rates of growth.
- Understand abstract specification of data-structures and their implementation.
- Compute time and space complexity of operations on a data-structure.
- Identify the appropriate data structure(s) for a given application and understand the trade-offs involved in terms of time and space complexity.
- Apply recursive techniques to solve problems.

SYLLABUS OF DSC-2 UNIT – I (06 Hours)

Growth of Functions, Recurrence Relations. Functions used in analysis, asymptotic notations, asymptotic analysis, solving recurrences using recursion tree, Master Theorem.

UNIT – II (12 Hours)

Arrays, Linked Lists, Stacks, Queues, Deques. Arrays: array operations, applications, sorting, two-dimensional arrays, dynamic allocation of arrays; Linked Lists: singly linked lists, doubly linked lists, circularly linked lists, Stacks: stack as an ADT, implementing stacks using arrays, implementing stacks using linked lists, applications of stacks; Queues:

queue as an ADT, implementing queues using arrays, implementing queues using linked lists, double-ended queue as an ADT. Time complexity analysis of operations on all data structures.

UNIT – III (06 Hours)

Sorting: Insertion Sort, Count Sort and their complexity analysis.

UNIT – IV (03 Hours)

Recursion: Recursive functions, linear recursion, binary recursion.

UNIT – V (06 Hours)

Trees, Binary Trees. Trees: definition and properties, binary trees: definition and properties, traversal of binary trees and their time complexity analysis.

UNIT – VI (09 Hours)

Binary Search Trees, Balanced Search Trees: Binary Search Trees: insert, delete (by copying), search operations, time complexity analysis of these operations; Balanced Search Trees and (2,4) Trees: motivation and introduction.

UNIT – VII (03 Hours)

Binary Heap, Priority Queue: Binary Heaps: motivation and introduction, application of heaps - Priority Queues.

Practical component (if any) – 30 Hours

1. Perform matrix addition and multiplication.
2. Implement following recursive functions:
 - a. Factorial of a number
 - b. N^{th} fibonacci number
 - c. Power function: x^y
3. Implement singly linked lists.
4. Implement doubly linked lists.
5. Implement circular linked lists.
6. Implement stack data structure and its operations using arrays.
7. Implement stack data structure and its operations using linked lists.
8. Convert Prefix expression to Infix and Postfix expressions, and evaluate.
9. Implement queue data structure and its operations using arrays.
10. Implement queue data structure and its operations using linked lists.
11. Implement Binary Trees and its traversals.

Category III

DISCIPLINE SPECIFIC CORE COURSE (DSC-2): Data Structures

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------|----------|-----------------------------------|----------|---------------------|--|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| DSC02: Data Structures | 4 | 3 | 0 | 1 | Class XII with pass Mathematics | Nil |

Learning Objectives

The course aims at developing the ability to define, differentiate, implement the basic data structures like arrays, stacks, queues, lists, trees and use them to solve problems. C++ is chosen as the language to understand implementation of these data structures.

Learning outcomes

On successful completion of the course, students will be able to:

- Understand abstract specification of data-structures.
- Implement data structures as ADT..
- Identify the appropriate data structure(s) for a given application.
- Apply recursive techniques to solve problems.

SYLLABUS OF DSC-2

UNIT – I (15 Hours)

Arrays, Linked Lists, Stacks, Queues, Deques: Arrays: array operations, applications, sorting, two-dimensional arrays, dynamic allocation of arrays; Linked Lists: singly linked lists, doubly

linked lists, circularly linked lists, Stacks: stack as an ADT, implementing stacks using arrays, implementing stacks using linked lists, applications of stacks; Queues: queue as an ADT, implementing queues using arrays, implementing queues using linked lists, double-ended queue as an ADT.

UNIT – II (06 Hours)

Searching and Sorting: Linear Search, Binary Search, Insertion Sort, Count Sort.

UNIT – III (09 Hours)

Recursion: Recursive functions, linear recursion, binary recursion.

UNIT – IV (06 Hours)

Trees, Binary Trees: Trees: definition and properties, binary trees: definition and properties, traversal of binary trees.

UNIT – V(09 Hours)

Binary Search Trees: insert, delete (by copying), search operations.

Practical component (if any) – 30 Hours

1. Perform matrix addition and multiplication.
2. Implement following recursive functions:
 - Factorial of a number
 - N^{th} fibonacci number
 - Power function: x^y
3. Implement singly linked lists.
4. Implement doubly linked lists.
5. Implement circular linked lists.
6. Implement stack data structure and its operations using arrays.
7. Implement stack data structure and its operations using linked lists.
8. Convert Prefix expression to Infix and Postfix expressions, and evaluate.
9. Implement queue data structure and its operations using arrays.
10. Implement queue data structure and its operations using linked lists.
11. Implement Binary Trees and its traversals.

Essential/recommended readings

1. Goodrich, M.T., Tamassia, R., & Mount, D. *Data Structures and Algorithms Analysis in C++*, 2nd edition, Wiley, 2011.
2. Cormen, T.H., Leiserson, C.E., Rivest, R. L. Stein C. *Introduction to Algorithms*, 4th edition, Prentice Hall of India, 2022.

- (ii) Langsam Y., Augenstein, M. J., & Tanenbaum, A. M. *Data Structures Using C and C++*, Pearson, 2009.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – A2 : DATA INTERPRETATION AND VISUALIZATION USING PYTHON

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| A2: Data Interpretation and Visualization using Python | 4 | 3 | 0 | 1 | Class pass with Mathematics XII | knowledge of Python |

Learning Objectives

This course is designed to introduce the students to the application of Python to get a deterministic view of data and interpret results..

Learning outcomes

On successful completion of the course, students will be able to:

- Interpret Data
- Obtain a deterministic view of data
- Perform data handling using Numpy arrays
- Load, clean, transform, merge and reshape data using Pandas
- Visualize data using Pandas and matplotlib libraries

SYLLABUS OF A2

UNIT – I (06 Hours)

Introduction to basic statistics and analysis: Fundamentals of Data Analysis, Statistical foundations for Data Analysis, Types of data, Descriptive Statistics, Correlation and covariance, Linear Regression, Statistical Hypothesis Generation and Testing, Python Libraries: NumPy, Pandas, Matplotlib

UNIT – II (09 Hours)

Array manipulation using Numpy: Numpy array: Creating Numpy arrays; various data types of Numpy arrays, indexing and slicing, swapping axes, transposing arrays, data processing using Numpy arrays

UNIT – III (12 Hours)

Data Manipulation using Pandas: Data Structures in Pandas: Series, DataFrame, Index objects, Loading data into Pandas data frame, Working with Data Frames: Arithmetics, Statistics, Binning, Indexing, Reindexing, Filtering, Handling missing data, Hierarchical indexing, Data wrangling: Data cleaning, transforming, merging and reshaping

UNIT – IV (12 Hours)

Plotting and Visualization: Using Matplotlib to plot data: figures, subplots, markings, color and line styles, labels and legends, plotting functions in Pandas: Line, bar, Scatter plots, histograms, stacked bars, Heatmap

UNIT-V (06 Hours)

Data Aggregation and Group operations: Group by Mechanics, Data aggregation, General split-apply-combine, Pivot tables and cross tabulation.

Practical component (if any) – 30 Hours

Use a dataset of your choice from Open Data Portal ([https:// data.gov.in/](https://data.gov.in/), UCI repository) or load from scikit, seaborn library for the following exercises to practice the concepts learnt.

1. Load a Pandas dataframe with a selected dataset. Identify and count the missing values in a dataframe. Clean the data after removing noise as follows
 - a. Drop duplicate rows.
 - b. Detect the outliers and remove the rows having outliers
 - c. Identify the most correlated positively correlated attributes and negatively correlated attributes
2. Import iris data using sklearn library or (Download IRIS data from: <https://archive.ics.uci.edu/ml/datasets/iris> or import it from sklearn.datasets)

- i. Compute mean, mode, median, standard deviation, confidence interval and standard error for each feature
 - ii. Compute correlation coefficients between each pair of features and plot heatmap
 - iii. Find covariance between length of sepal and petal
 - iv. Build contingency table for class feature
3. Load Titanic data from sklearn library, plot the following with proper legend and axis labels:
 - a. Plot bar chart to show the frequency of survivors and non-survivors for male and female passengers separately
 - b. Draw a scatter plot for any two selected features
 - c. Compare density distribution for features age and passenger fare
 - d. Use a pair plot to show pairwise bivariate distribution
4. Using Titanic dataset, do the following
 - a. Find total number of passengers with age less than 30
 - b. Find total fare paid by passengers of first class
 - c. Compare number of survivors of each passenger class
5. Download any dataset and do the following
 - a. Count number of categorical and numeric features
 - b. Remove one correlated attribute (if any)
 - c. Display five-number summary of each attribute and show it visually

Essential/recommended readings

Common Pool of Generic Electives (GE) Courses
Offered by Department of Computer Sciences
Category-IV

GENERIC ELECTIVES (GE-2a): Data Analysis and Visualization

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre- requisite of the course |
|--|----------|-----------------------------------|----------|---------------------|--|------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| GE2a Data Analysis and Visualization using Python | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | knowledge of Python |

Learning Objectives

This course is designed to introduce the students to real-world data analysis problems, their analysis and interpretation of results in the field of exploratory data science using Python.

Learning outcomes

On successful completion of the course, students will be able to:

- Apply descriptive statistics to obtain a deterministic view of data
- Apply basic and advanced level statistical function on data
- Perform data handling using Numpy arrays
- Do data cleaning and transformation before extracting useful information
- Visualize data for ease of understanding the revealed information

SYLLABUS OF GE-2a

UNIT – I & II (09 Hours)

Introduction to basic statistics and analysis: Fundamentals of Data Analysis, Statistical foundations for Data Analysis, Types of data, Descriptive Statistics, Python Libraries: NumPy, Pandas, Matplotlib

Array manipulation using NumPy: NumPy array: Creating NumPy arrays, various data types of NumPy arrays

UNIT – I & II (09 Hours)

Introduction to basic statistics and analysis: contd..

Correlation and covariance, Linear Regression, Statistical Hypothesis Generation and Testing

Unit 2 Array manipulation using Numpy: contd..

Indexing and slicing, swapping axes, transposing arrays, data processing using Numpy arrays

UNIT – III (15 Hours)

Data Manipulation using Pandas: Data Structures in Pandas: Series, Data Frame, Index objects, loading data into Panda's data frame, Working with Data Frames: Arithmetics, Statistics, Binning, Indexing, Reindexing, Filtering, Handling missing data, Hierarchical indexing, Data wrangling: Data cleaning, transforming, merging and reshaping

UNIT – IV (12 Hours)

Plotting and Visualization: Using Matplotlib to plot data: figures, subplots, markings, color and line styles, labels and legends, Plotting functions in Pandas: Lines, bar, Scatter plots, histograms, stacked bars, Heatmap

Practical component (if any) – 30 Hours

Use data set of your choice from Open Data Portal ([https:// data.gov.in/](https://data.gov.in/), UCI repository) or load from scikit, seaborn library for the following exercises to practice the concepts learnt.

1. Load a Pandas data frame with a selected dataset. Identify and count the missing values in a data frame. Clean the data after removing noise as follows
 - a. Drop duplicate rows.
 - b. Detect the outliers and remove the rows having outliers
 - c. Identify the most correlated positively correlated attributes and negatively correlated attributes
2. Import iris data using sklearn library or (Download IRIS data from: <https://archive.ics.uci.edu/ml/datasets/iris> or import it from sklearn.datasets)
 - a. Compute mean, mode, median, standard deviation, confidence interval and standard error for each feature
 - b. Compute correlation coefficients between each pair of features and plot heatmap
 - c. Find covariance between length of sepal and petal
 - d. Build contingency table for class feature
3. Load Titanic data from sklearn library , plot the following with proper legend and axis labels:
 - a. Plot bar chart to show the frequency of survivors and non-survivors for male and female passengers separately
 - b. Draw a scatter plot for any two selected features
 - c. Compare density distribution for features age and passenger fare

- d. Use a pair plot to show pairwise bivariate distribution
4. Using Titanic dataset, do the following
 - a. Find total number of passengers with age less than 30
 - b. Find total fare paid by passengers of first class
 - c. Compare number of survivors of each passenger class

Project students are encouraged to work on a good dataset in consultation with their faculty and apply the concepts learned in the course.

Essential/recommended readings

- (ii) Miller J.D. *Statistics for Data Science*, Packt Publishing, 2017.

GENERIC ELECTIVES (GE-2b): Data Analysis and Visualization using Spreadsheet

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|----------|-----------------------------------|----------|---------------------|--|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| GE2b Data Analysis and Visualization using Spreadsheet | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

This course is designed to inculcate statistical thinking about data to the students who have studied Mathematics up to Class 10th ONLY. It gently introduces the students to basic statistics, and builds gradually to cover advanced functionalities for data analysis in spreadsheets. The objective is to enhance the knowledge of statistics and enable students to make sense of data by analyzing and visualizing it using spreadsheets, interpreting the results and gaining insights.

Learning outcomes

On successful completion of the course, students will be able to:

- Analyze and visualize data using spreadsheets
- Apply basic and advanced level statistical functions in spreadsheets
- Gain practical, hands-on experience of data analysis using spreadsheet

SYLLABUS OF GE-2b

UNIT – I (09 Hours)

Introduction to Basic Statistics

Fundamentals of Data Analysis, Statistical foundations for Data Analysis, Types of data, Descriptive Statistics, Correlation and covariance, Linear Regression.

UNIT – II (15 Hours)

Data Handling

Spreadsheet concepts, managing worksheets, formatting cells, entering data, Handling operators in formula, Cell referencing and naming of cells and cell ranges, Sorting, Multilayer sorting, Data validation, Find and Replace, Paste special, Filter and advanced filter, Formatting as table, Pivot tables, Formulae vs functions, Cell formulae vs Array formulae.

Mathematical functions, Statistical functions, Logical functions, Date and Time functions, Lookup and reference: Hlookup, and Vlookup, Index and Match functions, Text functions.

What-if-analysis: Goal-seek, Data tables, Scenario manager.

UNIT – III (12 Hours)

Data Analysis

Explore a data model: its content, and its structure, using the Power Pivot add-in. Learning DAX formula language. Create calculated fields and calculated measure for each cell, filter context for calculation, and explore several advanced DAX functions.

Cube formulas to retrieve data from data model.

UNIT – IV (09 Hours)

Data Visualization

Different types of charts including Pivot charts: Column, Line, Pie, Bar, Scatter charts. Fine tuning of charts: Chart Elements, Chart Styles, Chart Filters, Box Plot.

Practical component (if any) – 30 Hours

1. In a meeting of a marketing department of an organization it has been decided that price of selling an item is fixed at Rs. 40. It was resolved to increase the selling of more items and getting the profit of Rs. 50000/-. Use Goal Seek to find out how many items you will have to sell to meet your profit figure.
2. Create worksheet related to crop production of various crops in Indian states in last five years (wheat, rice, pulses, soya-bean, and cane-sugar etc).
 - i) Make a bar chart
 - ii) Make a pie chart
 - iii) Make a box plot
3. Study and perform the various DAX functions to analyse the data.
4. Create workbook related to sales of Business Company having various products in last four quarters for 10 sales persons.
 - i) Make a line graph to show the growth/decline in the sales
 - ii) Show the graph of each sales person's sales
 - iii) Find the two sales persons done in last 2 quarters
 - iv) Find the sales persons consistent in last four quarters
 - v) Find the most popular product of the company and the current popular product of company.
5. Create a Pivot-table showing the Customer Names who placed orders with GSS during 2019-2022. For each customer, also show the total number of orders, Total Sales, and Total Profit. Add a Slicer or a Filter that can be used to show the information specifically for each Customer Segment. Use information from the Pivot-table to answer the following questions (Hint: Filter and sort the data in the Pivot-table to locate the answer):
 - i) Which small business customer had the highest sales?
 - ii) Which corporate customer placed the greatest number of orders in 2019-2022? How many orders were placed by the corporate customer?
 - iii) Which consumer customer was the most profitable one?
 - iv) What is the sales figure of the least profitable home office customer?
6. Consider the following worksheet: (enter 5 records)

| FULL NAME | GRADE 1/2/3 | BASIC SALARY | HRA | PF | GROSS | NET | VA | VA>HRA |
|-----------|-------------|--------------|-----|----|-------|-----|----|--------|
| | | | | | | | | |

HRA is calculated as follows:

| Grade | HRA (% of basic) |
|-------|------------------|
| 1 | 40% |
| 2 | 35% |
| 3 | 30% |

PF is 8% for all grades

VA is 15000, 10000, 7000 for Grades 1, 2 and 3.

Gross=Basic + HRA+VA

Net=Gross - PF

- i) Find max, min and average salary of employees in respective Grade.
 - ii) Count no. of people where VA>HRA
 - iii) Find out most frequently occurring grade.
 - iv) Extract records where employee name starts with “A” has HRA>10000
 - v) Print Grade wise report of all employees with subtotals of net salary and also grand totals.
 - vi) Use subtotal command.
 - vii) Extract records where Grade is 1 or 2 and salary is between 10000 and 20000 both inclusive.
7. Create workbook related to sales of Business Company having various product in last ten quarters for 20 sales persons. Perform the following on workbook:
 - i) Create and modify a Pivot-table
 - ii) Apply Pivot-table styles and formatting
 - iii) Filter a Pivot-table
 - iv) Insert a slicer to filter a Pivot-table
 - v) Create a Pivot Chart
8. Create a PivotTable showing Total Sales breakdown by Region, Product Category, and Product Sub-Category. Use information from the PivotTable to answer the following questions:
 - i) What was the Total Sales figure included in this data set?
 - ii) Which Product Category had the highest sales?

- iii) Which Region had the lowest sales?
iv) What was the Total Sales of Appliances in Delhi?

9. You are required to prepare a payroll statement in the given format making maximum use of cell referencing facility:

| Code | Name | Category | Is HRA to be Paid | Basic | DP | DA | HRA | TA | CCA | Gross |
|------|-------|----------|-------------------|-------|----|----|-----|----|-----|-------|
| 1 | | | Y | | | | | | | |
| 2 | | | N | | | | | | | |
| | Total | | | | | | | | | |

Required:

- Basic salary (Allow any Basic salary in the range of Rs.10000-35000)
- DP is 50% of Basic Salary.
- DA (as a Percentage of Basic + DP) is more than 35000 then 40% of basic else 30% of basic.
- HRA is to be paid @ 40% of (Basic plus DP) to those whom HRA payable is yes.
- TA is to be paid @ Rs. 800 PM if Basic Salary is Less than Rs.12000, otherwise the TA is Rs. 1000 PM)
- CCA is to be paid @ Rs. 300 PM if Basic Salary is less than Rs.12000/- otherwise the CCA is Rs. 500 PM)
- Gross salary is the sum of Salary and all other allowances
- Deduction: a) GPF 10% of (Basic +DP) subject to a minimum of Rs.2000/- b) IT 10% of Gross Salary
- Net salary is Gross salary minus total deductions.

10. Consider the following worksheet for APS 1st year students:

| S.No. | Name | Physics | Chem | Bio | Maths | CS | Total | % | Grade |
|-------|------|---------|------|-----|-------|----|-------|---|-------|
| | | | | | | | | | |

| | | | | | | | | | |
|---|--|--|--|--|--|--|--|--|--|
| 1 | | | | | | | | | |
| 2 | | | | | | | | | |
| 3 | | | | | | | | | |
| 4 | | | | | | | | | |
| 5 | | | | | | | | | |

The value of Grade is calculated as follows:

| | |
|----------------|---------|
| If % ≥ 90 | Grade A |
|----------------|---------|

| | |
|-------------------------|---------|
| If % ≥ 80 & < 90 | Grade B |
| If % ≥ 70 & < 80 | Grade C |
| If % ≥ 60 & < 70 | Grade D |

Otherwise, students will be declared fail.

- i) Calculate Grade using if function
- ii) Sort the data according to total marks
- iii) Apply filter to display the marks of the students having more than 65% marks.
- iv) Enter the S.No. of a student and find out the Grade of the student using VLOOKUP.
- v) Extract all records where name
 - a) Begins with “A”
 - b) Contains “A”
 - c) Ends with “A”

Essential/recommended readings

1. Gupta, S.P., *Elementary Statistical Methods*, Sultan Chand and Sons, New Delhi, 2017.

2. Goldmeier, J., *Advanced Excel Essentials*, Apress, 2014.
3. Slager, D., *Essential Excel 2016: A Step-by-Step Guide*, Apress, 2016.
4. Valerie M. Sue and Matthew T. Griffin, *Data Visualization and Presentation with Microsoft Office*, SAGE, 2016.
5. Schmuller, J., *Statistical Analysis with Excel for Dummies*, 4th edition., Wiley India Pvt Ltd., 2020.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DEPARTMENT OF STATISTICS

B. Sc. (H) Statistics

Category-I

DISCIPLINE SPECIFIC CORE COURSE-4: THEORY OF PROBABILITY DISTRIBUTIONS

CREDIT DISTRIBUTION, ELIGIBILITY, AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the Course | | | Eligibility Criteria | Pre-requisite of the Course (if any) |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Theory of probability distributions | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Descriptive Statistics, Probability Theory, Calculus |

Learning Objectives

The learning objectives of this course are as follows:

- Acquaint students with requisite tools for problem-solving available in statistical methodology.
- Prepare students to handle two/three-dimensional data and familiarize them with different measures of association as well as regression.
- Introduction to various discrete and continuous distributions and their properties.

Learning Outcomes

The learning outcomes of this course are as follows:

- Understand the role of expectation and its usefulness. Get familiar with different kind of generating functions and their strength and weaknesses
- Handle problems based on two-dimensional random variables using Jacobians and bivariate transformations.
- Understand and exploit various measures of correlation and regression for problem-solving.
- Familiarize with the concept of partial and multiple correlation coefficients and their properties
- Get acquainted with various discrete and continuous distributions their properties and interrelations and solve problems based on them.

SYLLABUS OF DSC-4

Theory

UNIT I

(09 Hours)

Expectation

Mathematical Expectation: Conditional expectations and its properties. Bivariate transformations with illustrations. Moments, moment generating function and its properties. Cumulants, cumulant generating function and its properties. Characteristic function and its properties. Inversion theorem for continuous random variables (without proof) along with applications.

UNIT II

(12 Hours)

Expectation (contd.)

Some inequalities involving expectation - Cauchy Schwartz Inequality, Jensen's inequality.

Two-dimensional random variables: Joint probability mass function/ Joint probability density function, marginal and conditional probability mass function/ probability density function, independence of random variables, examples based on joint/marginal/conditional pmf/pdf.

Conditional expectation and variance, Jacobian of transformation, Bivariate transformation of random variables, and Examples based on bivariate transformation.

UNIT III

(09 Hours)

Correlation and Regression

Properties of various measures of correlation and regression using expectation, Correlation Ratio, Intra-class correlation, Partial and multiple correlations – definition, Yule's notation, the plane of regression, properties of residuals, multiple and partial correlation coefficients and their properties (derivation based on three variables), the relationship between multiple, partial and total correlations and examples based on them.

UNIT IV

(15 Hours)

Probability Distributions

Discrete probability distribution – Binomial, Poisson- measures of central tendency, dispersion, skewness and kurtosis, recurrence relations based on moments, moment generating function, cumulant generating function, characteristic function, additive property, fitting of distribution, and examples based on application.

Continuous Probability distribution - Normal - measures of central tendency, dispersion, skewness and kurtosis, recurrence relations based on moments, moment generating function, cumulant generating function, characteristic function, additive property fitting of distribution and examples based on application, Uniform distribution – moments, mgf, mean deviation and examples based on bivariate transformations.

PRACTICAL – 30 Hours

List of Practicals:

1. Practical based on regression lines and properties of regression coefficients.
2. Practical based on Correlation ratio.
3. Practical based on Intra-class correlation.
4. Practical based on multiple correlation coefficient.
5. Practical based on partial correlation coefficient.

6. Practical based on planes of regression.
7. Word problems based on applications of Binomial distribution.
8. Practical based on fitting of Binomial distribution (when parameters are given).
9. Practical based on fitting of Binomial distribution (when parameters are not given).
10. Practical based on calculation of area under the normal curve.
11. Practical based on calculation of ordinates given area under the normal curve.
12. Practical based on fitting of the normal curve when parameters are not given.
13. Practical based on use of normal approximation to the binomial distribution.

Practical work to be conducted using electronic spreadsheet / EXCEL/ Statistical Software Package/ SPSS.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE-5: APPLIED STATISTICS I

CREDIT DISTRIBUTION, ELIGIBILITY, AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the Course | | | Eligibility Criteria | Pre-requisite of the Course (if any) |
|----------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Applied Statistics I | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Descriptive Statistics |

Learning Objectives

The learning objectives of this course are as follows:

- This course will help students to know the applications of Statistics and learn and apply these concepts in real life situations.
- This course will give exposure to two applied fields of statistics viz. Vital Statistics and Index Numbers.
- They will be having hands on practice of working on the data related to above mentioned fields.
- This course will help them understand about the working of the Indian Official Statistical System.

Learning Outcomes:

The learning outcomes of this course are as follows:

- Understanding of the distinction between Vital Statistics and Demography.
- Knowledge of basic measures of Mortality, Fertility, and Population Growth.
- Ability to construct of Life Tables.
- Understanding of fundamental concepts of Index Numbers.
- Ability to construct Price and Quantity Index numbers, Consumer and Wholesale Price Index Numbers.
- Knowledge of Official Statistical System in India, Statistical offices at the Centre and States along with their functions.

SYLLABUS OF DSC-5

Theory

UNIT I

(18 Hours)

Vital Statistics

Introduction, Sources of collecting vital statistics, Errors in census and registration data, Uses of Vital Statistics. Measurements of mortality: Crude death rate (CDR), Age specific death rate (ASDR), Standardized death rates and Infant mortality rate.

Life table: Assumptions, description and construction of Complete life table. Definition of Abridged life table.

Measurements of fertility: Crude birth rate (CBR), General fertility rate (GFR), Age specific fertility rate (ASFR), Total fertility rate (TFR).

Measurements of population growth: Crude rate of natural increase, Pearle's vital index, Gross reproduction rate (GRR) and Net reproduction rate (NRR).

UNIT 2

(12 Hours)

Index numbers

Introduction, Problems involved in the construction of index numbers, Constructions of index numbers of Prices and Quantities. Index numbers based on Average of Price Relatives, Criteria for a good Index numbers. Errors in the measurement of Price and Quantity Index Numbers, Consumer price index number, Concept of Wholesale price index number with interpretation. Uses and Limitation of Index numbers.

UNIT 3

(15 Hours)

Indian Official Statistics

Introduction, Present official statistical system in India, Statistical offices at the Centre, Statistical offices in the States, Methods of collection of official statistics on population, price (retail as well wholesale).

PRACTICAL -30 Hours

List of Practicals:

1. To calculate CDR and ASDR for a given set of data
2. To find Standardized death rate by Direct and Indirect method
3. To construct a complete life table
4. To fill in the missing entries in a life table
5. To calculate CBR and GFR for a given set of data
6. To calculate ASFR for a given set of data
7. To calculate TFR for a given set of data
8. To calculate Crude rate of Natural Increase and Pearle's Vital Index
9. To calculate GRR and NRR for a given set of data and compare them
10. To Construct price and quantity index numbers by Laspeyre's, Paasche's, Marshall-Edgeworth, Drobish -Bowley, Walsch and Fisher's Formula.
11. To test the goodness of an Index number using Time Reversible Test and Factor Reversible Test
12. To Construct price index numbers based on Average of Price Relatives
13. To Construct Chain base index numbers
14. Base shifting, Splicing and Deflating of Index Numbers
15. To construct Consumer price index number using Aggregate Expenditure method and Family Budget method and compare

Practical work to be conducted using electronic spreadsheet / EXCEL/ Statistical Software Package/ SPSS.

DISCIPLINE-SPECIFIC CORE COURSE-6: ALGEBRA FOR STATISTICS

CREDIT DISTRIBUTION, ELIGIBILITY, AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the Course | | | Eligibility Criteria | Pre-requisite of the Course (if any) |
|------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Algebra For Statistics | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives

- Algebra serves as a building block that will enable students to learn more advanced techniques that will help them to solve problems more quickly and easily.

Learning Outcomes:

The learning outcomes of this course are as follows:

- Understanding the fundamental concepts of matrices and determinants
- Understanding of partitioning of matrices, Echelon form
- Solving Linear equations
- Knowledge of Vector spaces and Subspaces, Orthonormal Basis
- Identifying rank of a Matrix
- Computing generalized inverse, characteristic roots and vectors, quadratic forms

SYLLABUS OF DSC-6

Theory

UNIT I

(09 Hours)

Algebra of matrices

A review related to triangular, symmetric, and skew-symmetric matrices, singular, and non-singular matrices, and their properties.

Idempotent matrices, Hermitian and skew Hermitian matrices, orthogonal matrices, Trace of a matrix, unitary, involutory and nilpotent matrices. Adjoint and inverse of a matrix and related properties. Partitioning of matrices and simple properties.

UNIT II

(12 Hours)

Determinants

A review related to properties and applications of determinants for 3rd and higher orders. Alternant determinant, Circulant determinant, Jacobi's Theorem, the product of determinants. Use of determinants in solution to the system of linear equations, row reduction and echelon forms, the matrix equations $AX=B$, solution sets of linear equations, Applications of linear equations, inverse of a matrix.

UNIT III

(09 Hours)

Vector spaces

Vector spaces, Subspaces, sum of subspaces, Span of a set, Linear dependence and independence, dimension and basis, Gram Schmidt Orthogonalization Process. Rank of a matrix, row-rank, column-rank, standard theorems on ranks, rank of the sum, and the product of two matrices.

UNIT IV

(15 Hours)

Generalized Inverse

Generalized inverse (concept, properties with illustrations). Characteristic roots and characteristic vector, Properties of characteristic roots and characteristic vector, Cayley Hamilton theorem and application, Spectral Decomposition. Quadratic forms, Derivatives of linear functions, and quadratic forms. Linear orthogonal transformation and their diagonalization.

PRACTICAL – 30 Hours

List of Practicals:

1. Inverse of a matrix by method of partitioning.
2. Every non-singular square matrix can be expressed as product of elementary matrices.
3. Generalised Inverse of a matrix and Symmetric Generalised Inverse of a matrix.
4. Find XX' for any matrix X of order $n \times k$; $k < n$, where G is generalized inverse of X' and study its properties.
5. Construction of Idempotent matrix and study its properties.
6. Construction of Orthogonal matrix and study its properties.
7. Characteristic roots and characteristic vectors and its properties

8. Cayley Hamilton Theorem and application.
9. Quadratic Form:
 - (a) Reducing Quadratic Form into canonical form and find rank, index and signature of the form.
 - (b) Identify the nature of Quadratic Form.
10. Construction of an orthonormal basis vector using Gram Schmidt Orthogonalization process.

Practical work to be conducted using electronic spreadsheet / EXCEL/ Statistical Software Package/ SPSS.

ESSENTIAL READINGS:

B.Sc.(Prog.)/B.A(Prog.) with Statistics as Major

Category-II

DISCIPLINE SPECIFIC CORE COURSE – 3: Statistical

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Statistical Methods | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Descriptive Statistics |

Course Objectives:

The learning objectives include:

- To know the difference between discrete and continuous random variables.
- To develop the thinking of students so that they can use the concepts of statistical probability distribution in real life.
- To understand the concept of random variables, probability distributions and expectation

Course Learning Outcomes:

After completing this course, students should have developed a clear understanding of:

- Concept of random variables.
- Basic concepts of discrete & continuous random variables.
- Distinguish between Moments generating functions & Cumulant generating functions
- Concept of joint, marginal and conditional probability distribution for two dimensional random variables and their independence.
- Discrete probability distributions with their properties.
- Continuous probability distributions with their properties.

SYLLABUS OF DSC

Theory

Unit – 1 (15 hours)

Random Variables

Random variables: Discrete and continuous random variables, pmf, pdf and cdf, illustrations of random variables and its properties, expectation of random variable and its properties. Variance, covariance and their properties with illustrations. Moments and cumulants, moment generating function with properties, cumulants generating function and characteristic function.

Unit – 2 (08 hours)

Bivariate Probability Distribution

Bivariate probability distributions, marginal and conditional distributions, independence of variates (only general idea to be given). Transformation in univariate and bivariate distributions.

Unit – 3 (10 hours)

Discrete Probability Distributions

Discrete probability distributions – Binomial, Poisson- measures of central tendency, dispersion, skewness and kurtosis, recurrence relations based on moments, moment generating function, cumulant generating function, characteristic function, additive property, fitting of distribution and examples.

Unit – 4 (12 hours)

Continuous Probability Distributions

Continuous Probability distribution - Normal - measures of central tendency, dispersion, skewness and kurtosis, recurrence relations based on moments, moment generating function, cumulant generating function, characteristic function, additive property and examples. Exponential distribution – moment generating function and lack of memory. Gamma distribution – moment generating function, cumulant generating function and additive property.

Practicals

List of Practicals: (30 hours)

(Practical to be performed on computer using Microsoft Excel/Electronic Spreadsheet/SPSS/Any Statistical Package)

1. Problems based on expectations, variance and co-variances.
2. Fitting of binomial distributions for n and $p = q = \frac{1}{2}$ and for n and p given.
3. Fitting of binomial distributions computing mean and variance.

4. Fitting of Poisson distributions for give n and λ and after estimating mean.
5. Fitting of suitable distribution.
6. Application problems based on Binomial distribution.
7. Application problems based on Poisson distribution.
8. Problems based on the Area property of Normal distribution.
9. Application problems based on Normal distribution.
10. Problems based on bivariate probability distributions.

Essential Readings

DISCIPLINE SPECIFIC CORE COURSE – 4: APPLICATIONS IN STATISTICS

CREDIT DISTRIBUTION, ELIGIBILITY, AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the Course | | | Eligibility Criteria | Pre-requisite of the Course (if any) |
|----------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Applications in Statistics | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives:

- Acquaint students with the current official statistical system in India
- Familiarize students with important concepts of Demand Analysis
- Introduction to Utility and Production functions.

Learning Outcomes:

After taking this paper, the student should be able to:

- Understand the current and prevailing official statistical system in India, role of MoSPI, CSO, NSSO, and their important publication
- Understand the laws of demand and supply, Price and Income elasticity of demand.
- Differentiate between Partial and Cross Elasticities of Demand, Engel's law, Pareto's law, and different curves of concentration.
- Understand theory of utility function, Utility Curve, Marginal rate of substitution, Budget line, and Construction of Utility Curve.

SYLLABUS OF DSC

Theory

Unit I (12 Hours)

Indian Official Statistics

Present official statistical system in India, Methods of collection of official statistics and their reliability and limitations. Role of Ministry of Statistics & Program Implementation (MoSPI), Central Statistical Office (CSO), National Sample Survey Office (NSSO), and National Statistical Commission. Government of India's Principal publications.

Unit II (12 Hours)

Demand Analysis

Concept of differentiation and partial differential.

Introduction: Demand and Supply and its laws, Price Elasticity of Demand, Income elasticity of demand, Nature of commodities, Partial and Cross Elasticities of Demand, Types of data required for its estimation, computation of demand function from given price elasticity of demand, Engel's law and Engel Curves, Pareto's law of income distribution, Curves of concentration.

Unit III (12 Hours)

Utility Function

Introduction: Theory of Utility, Statistical decision making under Utilities, general definition of utility function, advantages and disadvantage of Utility function, Utility Curve, Basic axioms of Utility, example of utility function, Indifference curves and their properties, Marginal rate of substitution, Budget line, constrained utility maximization, Construction of Utility Curve.

Unit IV (09 Hours)

Production Function

Production function, Marginal productivity, Average productivity, Degree of production function, Linear homogeneous production function, Euler's theorem, Returns to scales, Isoquants, Isocost curves, Equilibrium of the firm, Marginal rate of technical substitution, Elasticity of substitution, Constant elasticity of substitution.

PRACTICAL - 30 Hours

List of Practical

1. Fitting of demand curve.
2. Calculate income elasticity of demand from given data.
3. Calculation of price elasticity of demand from the given data.
4. Estimation of constant demand function.
5. To fit Engel's curve and draw them.
6. Comparison of inequality in distribution of expenditure.
7. Fitting of Pareto distribution to given data.
8. Computation and plotting of Lorenz Curve and computation of concentration ratio.

Practical work to be conducted using electronic spreadsheet / EXCEL/ Statistical Software Package/ SPSS.

**COMMON POOL OF GENERIC ELECTIVES (GE) COURSES
OFFERED BY DEPARTMENT OF STATISTICS
CATEGORY-IV**

GENERIC ELECTIVES : INTRODUCTORY PROBABILITY

**CREDIT DISTRIBUTION, ELIGIBILITY, AND PRE-REQUISITES OF THE
COURSE**

| Course title & Code | Credits | Credit distribution of the Course | | | Eligibility Criteria | Pre-requisite of the Course (if any) |
|--------------------------|---------|-----------------------------------|----------|---------------------|---------------------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introductory Probability | 4 | 3 | 0 | 1 | Class XII pass with Mathematics | Nil |

Learning Objectives :

- Acquaint students with the mathematical foundation of probability.
- familiarize students with important tools for statistical analyses at introductory level.
- Introduction to some common discrete and continuous distributions and their properties.

Learning Outcomes:

After taking this paper, the student should be able to:

- Understand the meaning of probability and probabilistic experiment. Various approaches to probability theory and in particular the axiomatic approach. Laws of probability, conditional probability, conditioning, and reduced sample space, compute joint and conditional probabilities. Bayes' rule and applications.
- Understand the concept of a random variable, expectation and its properties, Compute variance and covariance in terms of expectation. Moment generating function and its properties.
- Get familiar with some standard discrete and continuous distribution and the usefulness of Central limit Theorem in daily life.

SYLLABUS OF GE

Theory

UNIT-I

(12 Hours)

Probability

Probability: Introduction, random experiments, sample space, events and algebra of events. Definitions of Probability – classical, statistical, and axiomatic. Conditional

Probability, laws of addition and multiplication, independent events, theorem of total probability, Bayes' theorem and its applications.

UNIT II

(18 Hours)

Random Variables

Random Variables: Discrete and continuous random variables, pmf, pdf, cdf. Illustrations of random variables and its properties. Expectation, variance, moments and moment generating function.

UNIT III

(15 Hours)

Probability Distributions

Standard probability distributions: Binomial, Poisson, Geometric, Negative Binomial, Hypergeometric, Uniform, Normal, Exponential, Beta, Gamma. De-Moivre Laplace and Lindeberg-Levy Central Limit Theorem (C.L.T.) (Only Statements)

PRACTICAL - 30 Hours

List of Practical:

1. Application problems based on addition law of probability.
2. Application problems based on conditional probability.
3. Application problems based on Bayes law.
4. Application problems based on Expectation of random variable.
5. Computing MGF and how it helps in finding moments.
6. Computing cdf for discrete and continuous random variables drawing its graph.
7. Fitting of binomial distributions for n and $p = q = \frac{1}{2}$
8. Fitting of binomial distributions for n and p given.
9. Fitting of binomial distributions computing mean and variance.
10. Fitting of Poisson distributions for given value of λ .
11. Fitting of Poisson distributions after computing mean.
12. Application problems based on binomial distribution.
13. Application problems based on Poisson distribution.
14. Problems based on area property of normal distribution.
15. To find the ordinate for a given area for normal distribution.
16. Application based problems using normal distribution.
17. Fitting of normal distribution when parameters are given.
18. Fitting of normal distribution when parameters are not given.
19. Computing probabilities using Microsoft Excel functions `binomdist()`, `poisson()`, `normsdist()`, `normsinv()`, `normdist()`, and `norminv()`.
20. Computing Binomial probabilities for large n and small p using Microsoft Excel functions `binomdist()` and `poisson()`.
21. Computing Binomial probabilities for large n and $p \in (0.4, 0.6)$ using Microsoft Excel functions `binomdist()` and `normdist()`.

Practical work to be conducted using electronic spreadsheet / EXCEL/ Statistical Software Package/ SPSS.

| | | Lecture | Tutorial | Practical/ Practice | | |
| Macroeconomics – I DSC-4 | 4 | 3 | 1 | 0 | Class XII | Nil |

Learning Objectives

This course aims at inculcating basic understanding of the fundamentals of macroeconomics. It will enable students to identify major macroeconomic issues, their applicability to the real economy.

Learning outcomes

By studying this course, the students will be able to:

- To understand the basic concept of circular flow of income in four sector economies and different approaches to measurement of National Income.
- To introduce basic concepts of the money market including demand and supply aspects of money.

- To apply the closed economy Hicks- Hansen (IS-LM) model for effectiveness of Fiscal and Monetary policies in the short run.
- To identify macroeconomic issues of developing countries in a global macro setting and its difference from issues of developed countries.

SYLLABUS OF DSC-4

UNIT–I: Introduction to Macroeconomics and National Income Accounting (6 Hours)

Origin of macroeconomics; Income, expenditure and the circular flow in three and four sectoral economies; real versus nominal GDP; price indices; measurements of gross domestic product; national income accounting for closed economy and for open economy and National Income Identity; balance of payments accounts and its components.

UNIT – II: Theory of Income Determination (9 Hours)

An introduction to Classical and Keynesian systems; Simple Keynesian Theory of Income Determination, Consumption function – MPC and APC, changes in equilibrium, Paradox of Thrift and Investment multiplier.

UNIT – III: Money, Interest and Monetary Policy (12 Hours)

Meaning and nature of money, Primary and secondary functions of money; Quantity Theory of Money–Cambridge version, Classical theory of interest rate, Loanable fund Theory and Keynesian Theory of Liquidity Preference and interest rate, Liquidity Trap; Credit Creation and Money Multiplier Determination of money supply and demand; credit creation; money multiplier, monetary base; tools of monetary policy

UNIT – IV:IS-LM Analysis and Aggregate Demand (12 Hours)

Goods market and money market, graphical derivations of the Hicks-Henson model (IS and LM functions); Properties of IS-LM curves, factors affecting the position and slope of IS-LM curves, determination of equilibrium income and interest rates; Studying the impact of fiscal and monetary policies using IS-LM framework;Macro policy in a global setting and developing countries

Unit V: Inflation (6 Hours)

Inflation: meaning; demand and supply side factors; natural rate theory; monetary policy-output and inflation (monetarist view); Phillips curve: short run and long run.

Essential/recommended readings

1. Abel Andrew B., Bernanke Ben and Croushore Dean (2011). Macroeconomics (7th edition). Pearson
2. Schiller Bradley R. and Gebhardt Karen (2019) Macro economy Today (14th edition), McGraw Hill
3. Froyen Richard T. (2013). Macroeconomics: Theories and Policies (10th ed.), Pearson.

4. Blanchard O. (2017). Macroeconomics (7th edition). Pearson
5. Dornbusch R., Fischer S., and Startz R. Macroeconomics (11th edition). McGraw-Hill
6. Colander David C. (2017) Macroeconomics (9th edition), McGraw Hill

Suggested readings

1. Gordwin, Harris, Nelson, Roach and Torris (2017) Macroeconomics in context (2nd edition), Routledge Taylor and Francis Pub Indian Edition
2. Government of India (GOI) (Latest Year), Economic Survey, Ministry of Finance New Delhi.
3. Government of India (GOI) (Latest Year), Handbook of Indian Economy, RBI Publication New Delhi.
4. Mankiw N. Gregory, Macroeconomics, Worth Publishers.
5. Chugh, S. (2015) Modern Macroeconomics, MIT Press.
6. D'Souza, E, Macroeconomics, Pearson Education

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5: FINANCIAL INSTITUTIONS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---|----------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Financial Institutions and Markets DSC-5 | 4 | 3 | 1 | 0 | Class XII | Nil |

Learning Objectives

This course provides an understanding of the existing financial institutions and markets in the Indian financial system. Students will be equipped with the knowledge of primary and secondary segments of the equity, money, and debt markets.

Learning outcomes

By studying this course, the students will be able to:

- To understand the role of banking and non-banking financial institutions in India.

- To learn the methods for companies to raise funds in the primary market
- To use the methodology to create stock price indices in India.
- To analyze the process of issuance, trading, and settlement in equity, debt and money market instruments.

SYLLABUS OF DSC- 2

UNIT – I:Financial Institutions in India

(9 Hours)

- Overview of Formal Financial System: Financial Institutions, Financial Markets, Financial Instruments, Financial Services, Role of Financial System in Economic Development.
- Banking and Non-Banking Institutions: Scheduled Commercial Banks in India, Risk Management Process in Banks, Non-Performing Assets, Tools to Manage Non-Performing Assets, Payment Banks.
- Credit Rating Agencies: Meaning, Methodology and Agencies in India.
- Housing Finance: Housing Finance Companies in India, Repricing of Loan, Floating vs. Fixed Rate, The Rest Method, Problems in Housing Finance.
- NBFCs in India: Objectives, Functions, Types, Difference between NBFCs and Banks, Role of NBFCs in Indian Economy.
- Regulatory Institutions: Reserve Bank of India (RBI), Securities Exchange Board of India (SEBI)

UNIT – II:Primary Market for Corporate Securities in India

(15 Hours)

- Financial Markets: Role and Importance of Financial Markets, Types of Financial Markets- Equity Market, Debt market, Money market, Forex Market.
- Procedure of an IPO: Entry Norms for IPOs -Profitability Route, QIB Route, Appraisal Route; Intermediaries to an Issue, Pricing Methods-Fixed Price Process, Book Building Mechanism (Book Building Process, Bidding Process, Reverse Book Building, Limitations), Green Shoe option.
- Methods of Raising Funds: Venture Capital, Private Equity, Public Issues- IPO, FPO, offer for sale; Rights Issue, Private Placement -Preferential Issue, Qualified Institutional Placements, Disinvestment of PSU- Objectives, Sell-off methods.
- Raising of Funds from International Markets-ADRs, GDRs, FCCB and Euro Issues, Masala Bonds.
- Listing and Delisting of Corporate Stocks in Indian Stock markets.

UNIT – III:Secondary Market in India

(12 Hours)

- Overview of Secondary Market: Functions of Secondary Market, Demutualization of Stock Exchange, Bulls and Bears in Stock Markets, Volatility and Circuit Breakers in stock Market, Stock exchanges in India; International stock exchanges, Capital Market Scams.
- Market Mechanism: Financial Instruments-Equity Shares, Debentures & Bonds, Derivatives. Types of Brokers, Depository Process in India.
- Trading, Clearing and Settlement of securities: Types of orders, Contract Note, Clearing Corporations (ICCL, NSCCL), Depositories (NSDL, CDSL), Settlement Mechanism.
- Risk Management: Margin Requirement and Capital requirement of a Broker, MTM and VaR Margins, Margin Trading and Margin Adjustments.

- Indian Stock Indices: Major Indices in India (Sensex and Nifty), Market Capitalization (free float, full float methodology), Calculation Methodology (Price weighted, Equal weighted, Fundamental weighted, Market Capitalisation weighted Index), Classification of Securities to be included in the Index, Impact of corporate actions (Rights, Bonus, and Stock split) on security prices and indices.

UNIT – IV: Money Markets & Debt Market in India

(9 Hours)

- Money Market: Characteristics, Functions and Benefits of Efficient Money Market, Participants in money markets, Money Market Instruments- Auctioned Treasury Bills (Features, Types, and Issuance/Sale by Auction), Commercial Paper (Guidelines and Process for Issuance), Commercial Bills (Features and Types), Certificate of Deposits (Guidelines and Process for Issuance), Call/Notice Money (Reason of volatility and Process of Issuance) Repo, Reverse Repo.
- Long Term Debt Market: Participants and Instruments in Debt market, Private Corporate Debt Market-Issue and listing of Debt Securities; Govt Securities Market-Issuers, Investors and Types; Govt Dated Securities- Issuance, Trading and Settlement. RBI Direct Portal for retail investors for Government Securities

Notes:

1. The relevant rules, regulations and guidelines of the RBI, the SEBI and other regulators for all of the above topics should be covered.

Essential/recommended readings

1. Khan M. Y. Indian Financial System. Tata McGraw Hill.
2. Kannan, R., Shanmugam, K.R., &Bhaduri, S. Non-Banking Financial Companies-Role in India's Development. Springer.
3. Pathak, B. Indian Financial System. Pearson.
4. Eakins, Stanley G. Finance: Investments, Institutions and Management. Addison-wesley Publications.
5. National Stock Exchange of India (2003), "Indian Securities Market: A Review", NSE, Mumbai.
6. RBI Website- <https://www.rbi.org.in/Scripts/NotificationUser.aspx?Id=12179&Mode=0>
7. NSE website: <https://www.nseindia.com/resources/publications-indian-securities-ismr>

Suggested readings

1. Desai, V. Indian Financial System and Development. Himalaya Publishing House.
2. Gordan, E. Natarajan, K. Indian Financial System. Himalaya Publishing House.
3. Madura, J. Financial Markets and Institutions. Cengage Learning.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 6: STATISTICS FOR BUSINESS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course(if any) |
|---|---------|-----------------------------------|----------|---------------------|----------------------|-------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Statistics for Business Economics -I DSC-6 | 4 | 3 | 0 | 1 | Class XII | Nil |

Learning Objectives

This course aims to introduce different kinds of data, its visual representation, and descriptive measures to analyse and describe times series data along with a theory and practice of indices.

Learning outcomes

By studying this course, students will be able to:

- To organize, manage, present data to gain proficiency in using statistical software for data analysis.
- To prepare a technical report/statistical analysis and interpret results to enhance the ability for broader implication of application in the statistical field.
- To conduct the survey in proper way to collect data on specific economic problem and to grasp different variety of probability/nonprobability sampling methods for selecting a sample from a population.
- To make intelligent judgments and informed decisions in the presence of uncertainty and variation.

SYLLABUS OF DSC-3

UNIT – I Descriptive Statistics

(12 Hours)

Sources of data, census and sample, methods of collection, types of data. Graphical representation – Simple Charts, Box Plot, Histogram; Measures of central tendency, dispersion, skewness and Moments.

UNIT – II Probability and distribution

(15 Hours)

Sample space, event and probability. Types of events: joint, conditional and independence. Theories of probability - Classical Theory of Probability; Relative Frequency Theory of Probability; Subjective Theory of Probability and Axiomatic Theory of Probability, Random variable - Discrete and continuous, mass and density functions, cumulative distributions and properties. Joint distributions, marginal and conditional distributions. Bayes Theorem; Mathematical expectation and variance.

Theoretical Discrete and Continuous Probability Distributions – Binomial, Poisson and Normal distributions

UNIT – III Time Series

(6 Hours)

Components. Measurement of trend: linear, exponential and growth. Change in origin and scale. Measurement of seasonal fluctuations.

UNIT – IV Index Numbers

(6 Hours)

Types of index number systems and their relations. Fixed and chain-base. Tests of adequacy. Base shifting, splicing and deflating. Consumer price index, GDP deflator and Stock Prices indices – BSE Sensex and Nifty Fifty.

UNIT – V Correlation and Regression

(6 Hours)

Covariance & Correlation – Bivariate Analysis: Cross-tabulations and Scatter Plot; Rank Correlation and Pearson's Correlation; Impact of origin shift and change in scale of Correlation; Linear Regression – Simple and Multiple.

Practical component (30 hours)- Laboratory work using spreadsheet software. Projects using primary or secondary data.

Assessment Method

Total Marks: 100

Practical: 25

Internal Assessment: 25

End Semester Exam: 3 Hours; Maximum Marks: 50

Essential/recommended readings

1. Devore, Jay L., (2012). Probability and Statistics for Engineering and the sciences. 8th Edition, Cengage Learning.

Suggested readings

1. Miller, Irwin and Marylees Miller. John E. Freund's Mathematical Statistics with Applications, Eighth Edition, Pearson Education.
2. Nagar, A.L., and R.K. Das. Basic Statistics, Second Edition, Oxford University Press
3. Gupta, S.C., Fundamentals of Mathematical Statistics, Himalaya Publishing House

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY THE DEPARTMENTS

GENERIC ELECTIVES (GE-1): INTRODUCTION TO DIGITAL MARKETING

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to Digital Marketing GEC-2 | 4 | 3 | 1 | 0 | Class XII | Nil |

Learning Objectives

To acquaint the students with the tools and techniques used by the digital marketers for driving the marketing decisions to attain marketing objectives and understand its integration with traditional marketing.

Learning outcomes

By studying this course, students will be able to:

- To understand the concept of digital marketing and its integration with traditional marketing.
- To understand customer value journey in digital context and behaviour of online consumers.
- To learn email, content and social media marketing and apply the learnings to create digital media campaigns.
- To examine various tactics for enhancing a website's position and ranking with search engines and search advertising.

SYLLABUS OF GE-1

UNIT – I: Fundamentals of Marketing

(6 Hours)

Importance of marketing; Core marketing Concepts; Company Orientations; Concept of Segmentation, Targeting-Positioning; 7 P's Framework; Product Life cycle; Pricing strategies, Types of distribution channels; Promotion Mix.

UNIT – II: Marketing in the Digital World**(9 Hours)**

Digital marketing: Concept, Features, Difference between traditional and digital marketing, Moving from traditional to digital Marketing; Digital Marketing Channels: Intent Based- SEO, Search Advertising; Brand Based- Display Advertising; Community Based-SMM; Others- Affiliate, Email, Content, Mobile; Customer Value Journey: 5As Framework; The Ozone O₃ Concept Key; Traits of online consumer

UNIT – III: Content, Email and Social Media Marketing**(15 Hours)**

Content Marketing: Developing a content marketing strategy; Email Marketing: Types of Emails in email marketing, Email Marketing best practices; Social Media Marketing: Building Successful Social Media strategy; Social Media Marketing Channels; Facebook, LinkedIn, YouTube (Concepts and strategies)

UNIT – IV: Search Marketing**(15 Hours)**

Detailed contents Introduction of SEM: Working of Search Engine; SERP Positioning; Search Engine Optimization: Overview of SEO Process; Goal Setting-Types On-Page Optimization: Keyword Research, SEO Process -Site Structure, Content, Technical Mechanics, Headings, Image & Alt text, Social Sharing, Sitemaps, Technical Aspects-Compatibility, Structured Data Markup.

Off Page Optimization: Link Formats, Link Building, Content Marketing, Social Sharing; Black and White Hat Techniques

Search Advertising: Overview of PPC Process; Benefits of Paid Search; Basis of Ranking; Goal Setting-Objectives; Account Setting-Creation of Google Ads, Campaign architecture, Campaign setup, Targeting, Bid Strategy, Delivery, Ad Scheduling, Ad Rotation, Keyword Selection; Ad Copy composition, Ad Extension

Overview of Display Advertising: Working of Display Advertising; Benefits and challenges.

Essential/recommended readings

1. Dodson, I. (2016). The art of digital marketing: the definitive guide to creating strategic, targeted, and measurable online campaigns. John Wiley & Sons.
2. Kartajaya, H., Kotler, P., & Setiawan, I. (2016). Marketing 4.0: moving from traditional to digital. John Wiley & Sons.
3. Ryan, Damien. Understanding Digital Marketing - Marketing Strategies for Engaging the Digital Generation. Kogan Page Limited.

Suggested readings

1. Kotler, P. (2009). Marketing management: A south asian perspective. Pearson Education, India.
2. Maity, Moutusy. Internet Marketing: A practical approach in the Indian Context. Oxford Publishing.
3. Gupta, Seema. Digital Marketing. McGraw Hill
4. Ultimate guide to digital Marketing. Digital Marketer

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-2): STATISTICS FOR BUSINESS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Statistics for Business GEC-4 | 4 | 3 | 0 | 1 | Class XII | Nil |

Learning Objectives

The objective is to enable students develop understanding of data and statistical tools available to describe it which shall facilitate to make evidence-based decisions using inferential statistics that are based on well-reasoned statistical arguments.

Learning outcomes

By studying this course, students will be able to:

- To learn tools and concepts of statistical analysis and interpretation.
- To comprehend fundamentals of probability theory.
- To develop skills in statistical computing, statistical reasoning and inferential methods.
- To comprehend and analyse real data like real indices.

SYLLABUS OF GE-2

UNIT – I Descriptive Statistics and Exploratory Data Analysis

(9 Hours)

- Types of Variables (Quantitative, Qualitative, discrete, continuous), Scales of Data Measurement (nominal, ordinal, Interval & Ratio), Variable-; Primary & secondary Data.
- Frequency distributions, Relative Frequency, Cumulative Distributions, Percentiles, Quartiles; Graphical representation of data- bar charts, pie, histograms, box plots.
- Measures of central tendency: Mean, median, mode, Geometric Mean, Harmonic Mean, Weighted Mean & their properties. Selection of a measure of central tendency.
- Measures of Dispersion: Range, inter-quartile range, quartile deviation, mean deviation, standard deviation, variance, coefficient of variance, properties of standard deviation. Moments.
- Skewness and Kurtosis: Meaning, measures- Karl Pearson, Bowley, Kelly's, Kurtosis- meaning and measurement of Kurtosis

UNIT – II Probability

(12 Hours)

- Axioms of probability; Review of counting rules, experiments, sample space, simple and complex events; Addition and multiplication rules; Concepts of Mutually exclusive events, independent events; Concepts of Joint, marginal and conditional probability; Bayes Theorem.

- Concept of Discrete and continuous Random Variables; Expected value and variance; Theoretical Discrete and Continuous Probability Distributions – Binomial, Poisson and Normal distributions

UNIT – III Sampling, Estimation and Hypotheses Testing (12 Hours)

- Population versus Sample; Sample Statistics versus population parameters; Definition and Statistical properties of a Random Sample; Point and Interval Estimation and Small Sample Properties of Estimators (unbiasedness, efficiency); Central Limit Theorem. (Interval estimation for mean for large samples)
- Basic concepts of Hypotheses Testing: Formulation of Null and Alternate Hypotheses; One-tailed and two-tailed Tests about population Mean; Concepts of Type I and Type II errors. (Hypothesis testing for mean and difference between mean for large samples only)

UNIT – IV: Index Numbers (6 Hours)

- Index Numbers: Use and construction of Laspeyres and Paasche index numbers; Fixed and chain base index numbers; Base shifting, splicing and deflating. Construction of real indexes: Consumer Price Index and Stock Market Indices – BSE SENSEX and NSE Nifty.

UNIT – V Correlation and Regression (6 Hours)

- Covariance & Correlation: Bivariate Analysis: Cross-tabulations and Scatter diagram; Rank Correlation and Pearson's Correlation; Linear Regression – Simple.

Practical component (30 hours)- Laboratory work using relevant software for statistical data analysis. Projects using primary or secondary data.

Practical component –yes

Assessment Method

Total Marks: 100

Practical: 25

Internal Assessment: 25

End Semester Exam: Duration: 3 Hours & Maximum Marks: 50

Essential/recommended readings

1. Spiegel, M.R.(2003). Theory & Problems of Statistics, Schaum's outline series, McGraw Hill.
2. Levin, Richard I. and Rubin, David (1998). Statistics for Management (7th Edition), Pearson.
3. Gupta, S.C. (2018). Fundamentals of Statistics, Himalaya Publishing House
4. Spiegel, M. and Stephens, Larry (2017). Statistics (Schaum's Outline Series), Tata-Mcgraw-Hill, New Delhi

Suggested readings

1. Nagar, A. L. and Das. R. K.. Basic Statistics (2nd Edition), Oxford University Press
2. Karmel, P. H. and Polasek, M. (1978). Applied Statistics for Economists (4th edition), Pitman.
3. Larsen, Richard J. and Marx, Morris L. (2011). An Introduction to Mathematical Statistics and its Applications. Prentice Hall.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

Category I

BACHELOR OF MANAGEMENT STUDIES

[UG Programme for Bachelor in Management Studies (Honours) degree in three years]

DISCIPLINE SPECIFIC CORE COURSE -4 (DSC-4)– : COST AND MANAGEMENT ACCOUNTING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Cost & Management Accounting (DSC-4) | 4 | 3 | 1 | 0 | Class XII Pass | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- The rapidly changing business environment requires managers to make informed decisions.
- This paper will equip the students with cost and management accounting concepts, techniques and practices which will help them in planning and controlling business operations and management decision making.

Learning Outcomes

The Learning Outcomes of this course are as follows:

- Understand and distinguish various types of costs in manufacturing and service organizations.
- Determine the costs of products and services.
- Identify relevant costs for decision making and undertake different analysis of various types of decisions.
- Prepare budgets and analyse variances from standard cost to identify areas in need of control.

SYLLABUS OF DSC-4

Unit 1: Nature, Scope of Management Accounting

(9 Hours)

Meaning, nature and scope of Cost Accounting and Management Accounting; Comparison between Cost Accounting & Management Accounting; Cost Control, Cost Reduction & Cost Management, Components of Total Cost & Preparation of Cost Sheet. Cost Ascertainment: Cost Unit and Cost Center. Overheads: Meaning, Cost Drivers, Accumulation, Allocation, Apportionment and Absorption.

Classification of Costs: Fixed, Variable, Mixed Cost; Product, and Period Costs; Direct and Indirect Costs; Relevant and Irrelevant Costs; Shut-down and Sunk Costs; Controllable, and Uncontrollable Costs; Avoidable, and Unavoidable Costs; Imputed / Hypothetical/Implicit Costs and Out-of-pocket Costs; Opportunity Costs; Expired, and Unexpired Costs.

Unit 2: Cost-Volume-Profit Analysis

(15 Hours)

Absorption Costing and Marginal costing, Contribution. Profit Volume Ratio, Break-even Analysis: Break-even Point, Composite Break-even Point, Cash Break-even Point, Margin of safety. Angle of Incidence.

Relevant Costs and Decision Making such as: Key Factor, Pricing, Product Profitability, Dropping a product line, Make or Buy, Export Order, Shut down vs. Continue operations.

Unit 3: Budgets and Budgetary Control

(9 Hours)

Meaning, Steps in Budgetary Control, Types of Budgets: Sales budget, Production Budget, Raw material consumption Budget, Raw Material Purchase Budget, Overhead Budgets, Cash Budget, and Master Budget. Fixed and Flexible Budgets, Zero based budgeting.

Unit 4: Standard Costing and Variance Analysis

(9 Hours)

Meaning of Standard Cost and Standard Costing, Advantages, Limitations and Applications; Material Cost Variance, Price and Usage Variance and Mix and yield Variance; Labor Cost Variance, Rate and Usage Variance, Idle time, Mix and Yield variance.

Unit 5: Contemporary Issues in Cost Accounting and Management Accounting (3 Week)

Introduction to the concept of Target Costing, Life Cycle Costing, Quality Costing, and Activity based Costing.

Practical component (if any) - NIL

Essential/Recommended Readings: Latest editions of the following to be used:

1. Horngren's Cost Accounting: A Managerial Emphasis. Pearson.
2. Arora, M.N. (2016) A Textbook of Cost and Management Accounting. Vikas Publishing House Pvt. Ltd.
3. Maheshwari, S.N. and Mittal, S.N. (2016) Cost Accounting: Theory and Problems. Shree Mahavir Book Depot.

Suggested Readings: Latest editions of the following to be used:

1. Arora, M.N. & Katyal Priyanka, Management Accounting: Theory, Problems & Solutions, Himalaya Publishing House
2. Lal, Jawahar. Advanced Management Accounting: Text, Problems & Cases, Sultan Chand & Company Ltd.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE CORE COURSE – 5 (DSC-5): MICROECONOMICS

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Microeconomics (DSC 5) | 4 | 3 | 1 | 0 | CLASS XII PASS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To learn application of micro economic concepts and techniques in evaluating business decisions taken by firms.
- To explain how tools of standard price theory can be employed to formulate a decision problem, evaluate alternative courses of action and finally choose among alternatives.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Apply the knowledge of the mechanics of supply and demand to explain working of markets.
- Understand the choices made by a rational consumer.
- Explain relationships between production and costs.
- Define key characteristics and consequences of different forms of markets.

SYLLABUS OF DSC- 5

Unit 1: Demand, Supply and Market Equilibrium (9 Hours)

Individual demand, market demand, individual supply, market supply, market equilibrium; Elasticities of demand and supply; Price elasticity of demand, income elasticity of demand, cross price elasticity of demand, elasticity of supply.

Unit 2: Theory of Consumer Behaviour (12 Hours)

Cardinal utility theory; ordinal utility theory (indifference curves, budget line, consumer choice, price effect, substitution effect, income effect for normal, inferior and giffen goods).

Unit 3: Producer and Optimal Production Choice (12 Hours)

Optimizing behaviour in short run (product curves, law of diminishing margin productivity, stages of production); optimizing behaviour in long run (isoquants, isocost line, optimal combination of resources); traditional theory of cost (short run and long run); modern theory of cost.

Unit 4: Market Structures**(12 Hours)**

Perfect competition: basic features, short run equilibrium of firm/industry, long run equilibrium of firm/industry, monopoly: basic features, short run equilibrium, long run equilibrium, comparison with perfect competition, welfare cost of monopoly; price discrimination; monopolistic competition: basic features, demand and cost, short run equilibrium, long run equilibrium, excess capacity; oligopoly kinked demand curve model, dominant price leadership model.

Practical component (if any) - NIL

Essential/recommended readings

1. Dominick Salvatore (2009). Principles of Microeconomics (5th Edition). Oxford University Press
2. Pindyck, Rubinfeld and Mehta (2009). Micro Economics (7th Edition) Pearson.

Suggested Readings

1. Lipsey and Chrystal (2008). Economics. (11th Edition). Oxford University Press

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE– 6 (DSC-6): PRINCIPLES OF MARKETING**Credit distribution, Eligibility and Pre-requisites of the Course**

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Principles of Marketing (DSC 6) | 4 | 3 | 1 | 0 | CLASS XII PASS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- This course aims to familiarize students with the marketing function in organizations.
- It will equip the students with understanding of the Marketing Mix elements and sensitise them to certain emerging issues in Marketing.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the concept of marketing and related concepts.

- An in-depth understanding to various elements marketing mix for effective functioning of an organization.
- Learn some of the tools and techniques of marketing with focus on Indian experiences, approaches and cases.

SYLLABUS OF DSC-6

Unit 1: Introduction

(12 Hours)

Nature, Scope and Importance of Marketing, Evolution of Marketing; Core marketing concepts; Company orientation – Production concept, Product concept, Selling concept, Marketing concept, Holistic marketing concept. Marketing Environment: Demographic, Economic, Political, Legal, Socio cultural, Technological environment (Indian context); Portfolio approach – Boston Consulting Group (BCG) matrix.

Unit 2: Segmentation, Targeting and Positioning

(12 Hours)

Concept; Levels of Market Segmentation, Basis for Segmenting Consumer Markets; Product decisions: Concept of Product Life Cycle (PLC), PLC marketing strategies, Product Classification, Product Line Decision, Product Mix Decision, Branding Decisions, Packaging & Labelling.

Unit 3: Pricing, Promotion and Marketing Channel Decisions

(15 Hours)

Pricing Decisions: Determinants of Price, Pricing Methods (Non-mathematical treatment), Adapting Price. Promotion Decisions: Factors determining promotion mix, Promotional Tools – Fundamentals of advertisement, Sales Promotion, Public Relations & Publicity and Personal Selling. Marketing Channel Decision: Channel functions, Channel Levels, Types of Intermediaries: Wholesalers and Retailers.

Unit 4: Marketing of Services

(6 Hours)

Unique characteristics of services, marketing strategies for service firms – 7Ps.

Practical component (if any) - NIL

Essential/recommended readings

1. Kotler, P., Armstrong, G., Agnihotri, P. Y., & UlHaq, E.: Principles of Marketing: A South Asian Perspective, Pearson.
2. Kotler, P. & Keller, K. L.: Marketing Management, Pearson. (15th Edition)

Suggested readings

1. Ramaswamy, V. S. & Namakumari, S.: Marketing Management: Global Perspective-Indian Context, Macmillan Publishers India Limited.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES

GENERIC ELECTIVES (GE-7): FAMILY BUSINESS MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Family Business and Management (GE 7) | 4 | 3 | 1 | 0 | CLASS XII PASS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- Students will develop an understanding of the dynamics of joining a family firm
- Explore and secure values and opportunities within the family business.

Learning outcomes

The Learning Outcomes of this course are as follows:

- To understand the various concepts of family business.
- Plan the growth and sustainability of family business.
- Describe the government support available for business.

SYLLABUS OF GE-7

Unit - 1: Family-Owned Business

(12 Hours)

Define family-owned business, nature, importance, and uniqueness of family business. Classic systems of a family enterprise (the family system, the ownership system, the enterprise system). Governance systems (enterprise governance, family governance - family council, owner governance - ownership form); creating a governance structure. Systems approach to family interaction (triangle, scapegoat, homeostasis, boundaries). Great families in business: building trust and commitment.

Unit -2: Diagnosing Family Entanglements

(12 Hours)

Family genogram. Developing Business family's genogram, the role of genograms and family messages to understand the family system. Using the Genogram to identify family scripts and themes. Family emotional intelligence - The ECI-U Model. Circumplex model of marriage and family systems (understanding family cohesion and family flexibility), Application of

circumplex model, clinical rating scale and developing circumplex model.

Unit - 3: Family-Owned Business and Readiness (12 Hours)

Personal Readiness (Identity, Change in Capacity, Temperament, Health), System Readiness – Family (Spouse, Children, Extended Family), System Readiness – Business (Enterprise Itself, Owners, Successors), System Readiness – Social and Cultural Context (Community and Cultural Norms).

Unit - 4: Succession Planning in Family-Owned Business (9 Hours)

Succession Planning. Advice to successes and successor. Moores and Barrett's 4L framework of family business leadership. the future of family business: new leaders of the evolution - three states of evolution - continuity and culture - changing the culture - commitment planning - organic competencies and business's future - thriving through competition - institutionalizing the change.

Practical component (if any) - NIL

Essential/recommended readings

1. Leach, P.: Family Business: The Essentials, Profile Books Ltd.
2. Sudipt Dutta, Family Business in India, Sage Publications, 1997.

Suggested readings

1. DeVries, M. F. K., & Carlock, R. S. (2010). Family Business on the Couch: A Psychological Perspective. John Wiley & Sons.
2. Hall, A. (2012). Family business dynamics: a role and identity-based perspective. Edward Elgar Publishing.
3. Gimeno, A., Bualenas, G. and Coma-Cros, J., Family Business Models.
4. De Pontet, S. B. (2017). Transitioning from the Top: Personal Continuity Planning for the Retiring Family Business Leader. Springer.
5. Liebowitz, B. (2011). The family in business: The dynamics of the family-owned firm. Business Expert Press.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-8): FINANCIAL PLANNING FOR INDIVIDUALS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Financial Planning For Individuals (GE 8) | 4 | 3 | 1 | 0 | CLASS XII | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To equip students with the knowledge and practical understanding of important dimensions of managing one's personal finance.
- To enable students' understand and plan their tax liabilities, investments, insurance coverage, and retirement.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the fundamentals of Personal Financial Planning.
- Learn the basics of managing personal tax liabilities.
- Able to ascertain and choose appropriate insurance policies for managing personal risks.
- Appreciate the importance of choosing the right investments for managing personal finance.
- Learn the basic concepts and underlying principles for Retirement Planning.

SYLLABUS OF GE-8

Unit -1: Basics of Personal Finance and Tax Planning (12 Hours)

Understanding Personal Finance. Rewards of Sound Financial Planning. Personal Financial Planning Process. Personal Financial Planning Life Cycle. Making Plans to Achieve Your Financial Goals. Common Misconceptions about Financial Planning. Personal Tax Planning – Fundamental Objectives of Tax Planning, Tax Structure in India for Individuals, Common Tax Planning Strategies – Maximizing Deductions, Income Shifting, Tax-Free and Tax- Deferred Income.

Unit -2: Managing Insurance Needs (12 Hours)

Insuring Life – Benefits of Life Insurance, Evaluating need for Life Insurance, Determining the Right Amount of Life Insurance. Choosing the Right Life Insurance Policy – Term Life Insurance,

Whole Life Insurance, Universal Life Insurance, Variable Life Insurance, Group Life Insurance, Other Special Purpose Life Policies. Buying Life Insurance – Compare Costs and Features, Select an Insurance Company, and Choose an Agent. Life Insurance Contract Features. Insuring Health – Importance of Health Insurance Coverage. Making Health Insurance Decision – Evaluate Your Health Care Cost Risk, Determine Available Coverage and Resources, Choose a Health Insurance Plan. Types of Medical Expense Coverage. Policy Provisions of Medical Expense Plans. Property Insurance – Basic Principles, Types of Exposure, Principle of Indemnity, and Coinsurance.

Unit -3: Managing Investments

(12 Hours)

Role of Investing in Personal Financial Planning, Identifying the Investment Objectives, Different Investment Choices. The Risks of Investing, The Returns from Investing, The Risk-Return Trade-off. Managing Your Investment Holdings – Building a Portfolio of Securities, Asset Allocation and Portfolio Management, Keeping Track of Investments. Investing in Equity – Common Considerations, Key Measures of Performance, Types of Equity Stock, Market Globalization and Foreign Stock, Making the Investment Decision. Investing in Bonds – Benefits of Investing in Bonds, Bonds Versus Stocks, Basic Issue Characteristics, The Bond Market, Bond Ratings. Investing in Mutual Funds and Exchange Traded Funds (ETFs) – Concept of Mutual Funds and ETFs, Benefits of Investing in Mutual Funds or ETFs, Some Important Cost Considerations, Services Offered by Mutual Funds, Selecting appropriate Mutual Fund and ETF investments, Evaluating the performance of Mutual Funds and ETF.

Unit 4: Investing in Real Estate and Retirement Planning

(9 Hours)

Investing in Real Estate – Some Basic Considerations. Modes of Real Estate Investment – Raw Land, Commercial Properties, Residential Properties, Real Estate Investment Trusts (REITs) and Infrastructure Investment Trust (InvITs).

Planning for Retirement – Role of Retirement Planning in Personal Financial Planning, Pitfalls to Sound Retirement Planning, Estimating Income Needs, Sources of Retirement Income

Practical component (if any) - NIL

Essential/recommended readings

1. Randall S. Billingsley, Lawrence J. Gitman, and Michael D. Joehnk (2017): Personal Financial Planning. Cengage Learning.
2. Susan M. Tillery, and Thomas N. Tillery: Essentials of Personal Financial Planning. Association of International Certified Professional Accountants.

Suggested readings -

1. Introduction to Financial Planning (4th Edition 2017) – Indian Institute of Banking & Finance.
2. Sinha, Madhu. Financial Planning: A Ready Reckoner. July 2017. Mc Graw Hill

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-9) INTRODUCTION TO INTERNATIONAL BUSINESS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Introduction to International Business (GE 9) | 4 | 3 | 1 | 0 | CLASS XII PASS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- The course would introduce students to international trading and investment environment
- Create awareness about emerging issues such as outsourcing and sustainable development in the context of international business.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the process of globalization and its impact on growth of international business.
- Appreciate the changing dynamics of the diverse international business environment.
- Analyse the theoretical dimensions of international trade as well as intervention measures adopted.
- Describe the forms of foreign direct investment and analyse benefits and costs of FDI.
- Demonstrate awareness about emerging issues in international business such as outsourcing and sustainable development.

SYLLABUS OF GE-9

Unit 1: Introduction to International Business (9 Hours)

Globalization – concept, significance and impact on international business; international business contrasted with domestic business; complexities of international business; internationalization stages and orientations; modes of entry into international businesses.

Unit 2: International Trade (12 Hours)

Theories of international trade – Theory of Absolute Advantage theory, Theory of Comparative Advantage, Factor Proportions theory and Leontief paradox, Product Life Cycle theory, Theory of National Competitive Advantage; Instruments of trade control.

Unit 3: International Business Environment (12 Hours)

Role of political and legal systems in international business; cultural environment of

international business; implications of economic environment for international business. International Economic Organisations: WTO- functions, structure and scope; World Bank and IMF.

Unit 4: International Finance and Contemporary Issues (12 Hours)

Types of FDI - Greenfield investment, Mergers & Acquisition, strategic alliances; benefits and drawbacks of FDI. Overview of Exchange Rate systems. Contemporary issues in international business: Outsourcing and its potential for India; international business and sustainable development.

Practical component (if any) - NIL

Essential/recommended readings

1. Bennett, R. International Business, Delhi: Pearson.
2. Cavusgil, S. T., Knight, G. & Riesenberger. International Business: Strategy, Management and the New Realities. Pearson India.
3. Charles, W L Hill & Jain, A. K. International Business, New Delhi: Tata McGraw Hill.

Suggested readings

1. Daniels, J. D., Radenbaugh, L. H. & Sullivan, D. P. International Business, Pearson Education.
2. Griffin, R. W & Pustay, M. W. International Business - A Managerial Perspective. Prentice Hall.
3. Menipaz, E., Menipaz A. and Tripathi S.S. International Business : Theory and Practice. New Delhi. Sage Publications India Pvt. Ltd.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time

GENERIC ELECTIVES (GE-10) PERSONAL SELLING

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Personal Selling (GE 10) | 4 | 3 | 1 | 0 | CLASS XII PASS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- To familiarize the students with the concept and practice of personal selling process, techniques and methods in the modern organizational setting.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Understand the concept of personal selling and related terms.
- An in-depth understanding of various stages in the selling process and the catalytic role of sales persons in the effective functioning of an organization.
- Learn some of the tools and techniques of selling process.

SYLLABUS OF GE-10

Unit 1: Personal Selling

(12 Hours)

An overview of personal selling; functions of a sales person, characteristics of a sales person, Sales as a career. Importance and role of Personal Selling, Building trust and Sales Ethics.

Unit 2: Theories of Selling

(9 Hours)

Personal Selling situations; Theories: AIDAS, Right set of circumstances theory, buying formula theory, Behavioural Equation Theory.

Unit 3: Selling Process

(15 Hours)

Prospecting: Need and Methods; Pre approach: Sales Knowledge; Sales presentation: methods, elements, the approach; Handling Objections: categories and techniques; Closing the sale: techniques; Post sale follow up, Communication for Relationship Building.

Unit IV: Sales Territory

(9 Hours)

Sales territory concept, reasons for establishing sales territories, procedure for setting up sales territories.

Practical component (if any) - NIL

Essential/recommended readings

1. Charles Futrell: Fundamentals of Selling, McGraw Hill (13th Edition).
2. Still, Cundiff & Govani: Sales Management, Prentice Hall of India (2nd Revised Edition).
3. Charles Futrell, ABC's of Relationship Selling through Service", McGraw Hill Publications (Latest Edition).

Suggested readings

1. Rolph E. Anderson, Essentials of personal selling: the new professionalism, Prentice Hall, 1995 (3rd Edition)

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-11) BASICS OF HUMAN RESOURCE

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Basics of Human Resource Management (GE 11) | 4 | 3 | 1 | 0 | CLASS XII PASS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- The objective of this course is to help the students to develop an understanding of the concept and functions of human resource management.
- The course also aims to explore the recent practices and trends in human resource management.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Enhance the understanding of role of human resource management and explore the recent trends of human resource management.

- Develop an understanding of human resource management functions and practices.
- Enhance awareness of certain important issues in industrial relations.

SYLLABUS OF GE-11

Unit -1: Introduction to Human Resource Management (9 Hours)

Introduction, Concept and Importance of Human Resource Management, Functions and Role of Human Resource Management; Globalization and its Impact on HR trends of Human Resource in India; Work life balance; Human Resource Information Systems; Overview of International HRM polycentric geocentric ethnocentric approaches.

Unit -2: Recruitment and Selection (12 Hours)

Human Resource Planning, Need and process, HR Forecasting Techniques Skill inventories; Job analysis-Uses, methods, Job description & Job specifications; Recruitment: Factors affecting recruitment, internal & external sources; Selection process; Orientation: Concept and process.

Unit -3: Training and Development (12Hours)

Training: Concept, Training Process, Methods of training; Management development: Concept & Methods; Performance Management System: Concept, uses of performance appraisal, performance management methods; Career planning: Importance and stages. Compensation: Components of pay, factors influencing compensation, steps in determining compensation, job evaluation; Incentives: Importance and types; Benefits: Need, types of benefits.

Unit -4: Industrial Relations (12 Hours)

Introduction to Industrial Relations; Industrial disputes: concept, causes & machinery for settlement of disputes; Employee Grievances- concept, causes, grievance redressal procedure; Discipline-concept, aspects of discipline & disciplinary procedure; Collective bargaining: concept, process, problems, essentials of effective collective bargaining.

Practical component (if any) - NIL

Essential/recommended readings

1. Dessler Gary, Warkkey Biju, *Human Resource Management*, Pearson.
2. Decenzo and Robbins, *Fundamentals of Human Resource Management*, John Wiley and sons.
3. Chhabra T.N, *Human Resource Management Concept & Issues*, Dhanpat Rai and company.

Suggested readings

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time

GENERIC ELECTIVES (GE-12) ETHICS AND GOVERNANCE IN BUSINESS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Ethics and Governance in Business (GE 12) | 4 | 3 | 1 | 0 | CLASS XII PASS | NIL |

Learning Objectives

The Learning Objectives of this course are as follows:

- The objective of this paper is to develop skills for recognizing and analyzing ethical issues in business and to equip students with moral reasoning for ethical decision making.
- The course aims to acquaint the students with basic concept and standards of corporate governance.

Learning outcomes

The Learning Outcomes of this course are as follows:

- Determining ethical dilemmas in common business situation and finding ways to solve it.
- Examine the role of ethics in different functional areas of business.
- Understand the importance of corporate governance in ensuring fairness, accountability and transparency in the organization.

SYLLABUS OF GE-12

Unit -1: Business Ethics

(9 Hours)

Introduction, meaning of ethics, moral and ethics, types of business ethical issues, why ethical problems occur in business, ethical dilemmas in business; Normative theories – Egoism, Utilitarianism, Ethics of duty, Ethics of rights and justice, Virtue ethics and ethics of care; Gandhian Ethics and its relationship with normative theories.

Unit -2: Ethical Issues in Functional Areas of Business

(15 Hours)

Finance: ethical issues in accounting, finance, banking, takeovers; Whistle blowing: kinds of whistle blowing, whistle blowing as morally prohibited, permitted and required, corporate disclosure; Insider trading.

HRM: Discrimination, affirmative action and reverse discrimination; Inclusion and preferential hiring; Sexual harassment.

Marketing: Green marketing; Product recalls; Ethics and Advertising.

Production: Safety and acceptable risk,, Product safety and corporate liability; Green production..

Information technology : Cyber-crime; Privacy and internet ethics

Unit -3: Corporate Governance

(12 Hours)

Concept, need to improve corporate governance standards, pillars of good governance; Role played by the Government as a regulator to improve corporate governance with reference to provisions introduced in the Companies Act. 2013; Board of Directors and their role in governance; Duties and responsibilities of auditors; Rights and privileges of shareholders, investor's problem and protection; Corporate governance rating process and parameters.

Unit -3: Corporate Governance Models and Committees

(9 Hours)

Models of corporate governance; Committees on Corporate Governance: UK scenario (Cadbury Committee), US scenario (Sarbanes Oxley Act), OECD principles; Indian experience: An overview of recommendations of corporate governance committees in India - CII Code of Best Practices, Kumar Mangalam Birla Committee, Naresh Chandra Committee, Narayan Murthy Committee, Kotak Committee, SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 with reference to composition and role of Board of Directors, and Role of independent directors

Practical component (if any) - NIL

Essential/recommended readings

1. Fernando, A.C., "Business Ethics and Corporate Governance", Pearson Education India. (Chapter 1, 2)
2. Velasquez, Manuel G., "Business Ethics- Concepts and Cases", PHI. (Chapter 1, 2)
3. Fernando, A.C., "Business Ethics – An Indian Perspective", Pearson. (Chapter 1 to, 4; 9 to 12, 14,15,18))
4. Crane, Andrew and Matten, Dirk., "Business Ethics", Oxford. (Chapter 1, 7, 8)
5. Ghosh, B N., "Business Ethics and Corporate Governance," Mc Graw Hill. (Chapter 8, 9, 11)
6. De George, Richard T., "Business Ethics", Pearson. (Chapter 3, 4, 13 to 16)
7. Sharma, J. P., "Corporate Governance, Business Ethics and CSR", Ane Books. (Chapter 12)
8. Stanwick, Peter and Stanwick, Sarah, " Understanding Business Ethics", Sage Publications. (Chapter 10)
9. Arnold, Denis G., Beauchamp, Tom L., and Bowie, Norman E., " Ethical Theory and Business", Pearson Education (Chapter 7)

Suggested readings

1. Fernando, A.C.- Business Ethics, Prentice Hall, Latest Edition.
2. Crane, Andrew and Matten, Dirk - Business Ethics, Oxford Publications.
3. Davies, Adrain – Best Practices in Corporate Governance (Gower), Latest Edition.
4. Fernando, A.C. – Corporate Governance :Principles, Policies, and Practices (Pearson Education).

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time

Category I

Bachelor of Business Administration (Financial Investment Analysis) [BBA (FIA)]

(Provide the details of the Discipline Specific Courses offered by your department for the UG Programme with your discipline as the Single Core Discipline)

DISCIPLINE SPECIFIC CORE COURSE – 4 (DSC-4): COST & MANAGEMENT ACCOUNTING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|--------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Cost & Management Accounting (DSC-4) | 4 | 3 | 1 | 0 | Class XII Pass | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- The rapidly changing business environment requires managers to make informed decisions.
- This paper will equip the students with cost and management accounting concepts, techniques and practices which will help them in planning and controlling business operations and management decision making.

Learning Outcomes

The Learning Outcomes of this course are as follows:

- Understand and distinguish various types of costs in manufacturing and service organizations.
- Determine the costs of products and services.
- Identify relevant costs for decision making and undertake different analysis of various types of decisions.
- Prepare budgets and analyse variances from standard cost to identify areas in need of control.

SYLLABUS OF DSC-4

Unit 1: Nature, Scope of Management Accounting

(12 Hours)

Meaning, nature and scope of Cost Accounting and Management Accounting; Comparison between Cost Accounting & Management Accounting; Cost Control, Cost Reduction & Cost Management, Components of Total Cost & Preparation of Cost Sheet. Cost Ascertainment: Cost Unit and Cost Center. Overheads: Meaning, Cost Drivers, Accumulation, Allocation, Apportionment and Absorption.

Classification of Costs: Fixed, Variable, Mixed Cost; Product, and Period Costs; Direct and Indirect Costs; Relevant and Irrelevant Costs; Shut-down and Sunk Costs; Controllable, and Uncontrollable Costs; Avoidable, and Unavoidable Costs; Imputed / Hypothetical/Implicit Costs and Out-of-pocket Costs; Opportunity Costs; Expired, and Unexpired Costs.

Unit 2: Cost-Volume-Profit Analysis

(12 Hours)

Absorption Costing and Marginal costing, Contribution. Profit Volume Ratio, Break-even Analysis: Break-even Point, Composite Break-even Point, Cash Break-even Point, Margin of safety. Angle of Incidence.

Relevant Costs and Decision Making such as: Key Factor, Pricing, Product Profitability, Dropping a product line, Make or Buy, Export Order, Shut down vs. Continue operations.

Unit 3: Budgets and Budgetary Control

(9 Hours)

Meaning, Steps in Budgetary Control, Types of Budgets: Sales budget, Production Budget, Raw material consumption Budget, Raw Material Purchase Budget, Overhead Budgets, Cash Budget, and Master Budget. Fixed and Flexible Budgets, Zero based budgeting.

Unit 4: Standard Costing and Variance Analysis

(9 Hours)

Meaning of Standard Cost and Standard Costing, Advantages, Limitations and Applications; Material Cost Variance, Price and Usage Variance and Mix and yield Variance; Labor Cost Variance, Rate and Usage Variance, Idle time, Mix and Yield variance.

Unit 5: Contemporary Issues in Cost Accounting and Management Accounting (3 hours)

Introduction to the concept of Target Costing, Life Cycle Costing, Quality Costing, and Activity based Costing.

Practical component (if any) - NIL

Essential/Recommended Readings: Latest editions of the following to be used:

1. Horngren's Cost Accounting: A Managerial Emphasis. Pearson.
2. Arora, M.N. (2016) A Textbook of Cost and Management Accounting. Vikas Publishing House Pvt. Ltd.
3. Maheshwari, S.N. and Mittal, S.N. (2016) Cost Accounting: Theory and Problems. Shree Mahavir Book Depot.

Suggested Readings: Latest editions of the following to be used:

1. Arora, M.N. & Katyal Priyanka, Management Accounting: Theory, Problems & Solutions, Himalaya Publishing House
2. Lal, Jawahar. Advanced Management Accounting: Text, Problems & Cases, Sultan Chand & Company Ltd.

Note: Latest edition of the readings may be used.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 5 (DSC-5): MACROECONOMICS

Credit distribution, Eligibility and Prerequisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|-------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------|--------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| MACROECONOMICS (DSC-5) | 4 | 3 | 1 | 0 | Class XII Pass | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- This course deals with the principles of Macroeconomics.
- The coverage includes determination of and linkages between major economic variables, level of output and prices, inflation, interest rates and exchange rates.
- The course is designed to study the impact of monetary and fiscal policy on the aggregate behaviour of individuals.

Learning Outcomes

The Learning Outcomes of this course are as follows:

- Understand the determination of key macroeconomic variables.
- Describe models of determination of equilibrium outputs, prices and rate of interest.
- Analyse the role of the Government in an economy and examine how it uses its fiscal and monetary policy to influence macro-economic variables.
- Explain the working of an open economy.

SYLLABUS OF DSC –5

Unit 1: Introduction to Macroeconomics and National Income Accounting (6 Hours)

Origin of macroeconomics; Income, expenditure and the circular flow in three and four sectoral economies; real versus nominal GDP; price indices; measurements of gross domestic product; national income accounting for open economy; National Income Identity.

Unit 2: Theory of Income Determination and Interest Rate (18 Hours)

Classical theory of income and employment and Simple Keynesian Theory of Income Determination, changes in equilibrium, Paradox of Thrift and Investment multiplier.

Quantity Theory of Money–Cambridge version, Classical theory of interest rate and Keynesian Theory of Liquidity Preference and interest rate, Liquidity Trap; Credit Creation and Money Multiplier

Goods market and money market, graphical derivations of the Hicks-Henson model (IS and LM functions); Properties of IS-LM curves, factors affecting the position and slope of IS-LM curves, determination of equilibrium income and interest rates; Studying the impact of fiscal and monetary policies using IS-LM framework.

Unit 3: Inflation

(9 Hours)

Inflation: meaning; demand and supply side factors; natural rate theory; monetary policy-output and inflation (monetarist view); Phillips curve: short run and long run.

Unit 4: Balance of Payment and International Trade

(12 Hours)

Brief introduction to Balance of Payment (BOP) account; market for foreign exchange and exchange rate; monetary and fiscal policy in open economy; Mundell Fleming model: perfect capital mobility and imperfect capital mobility under fixed and flexible exchange rate.

Practical component (if any) - NIL

Essential/Recommended Readings

1. Froyen, R. P. (2011): Macroeconomics-theories and policies (8th Edition). Pearson.
2. Dornbusch and Fischer (2010): Macro economics (9th Edition).Tata McGraw Hill.
3. N Gregory Mankiw (2010). Macro economics (7th Edition).Worth Publishers

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE– 6 (DSC-6): QUANTITATIVE TECHNIQUES

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course(if any) |
|---------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-------------------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| QUANTITATIVE TECHNIQUES (DSC-6) | 4 | 3 | 1 | 0 | Class XII Pass | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To apprise students with the construction of mathematical models for managerial decision situations and to use spreadsheets or computer software packages to obtain a solution wherever applicable.
- The emphasis is on understanding the concepts, formulation and interpretation.

Learning Outcomes: After the end of the course, students should be able to

- Identify, formulate and solve Linear Programming Problems graphically, mathematically and by using excel solver.
- Solve optimization problems like transportation and assignment problem.
- Develop critical thinking and use PERT and CPM techniques to improve decision making.
- Identify different types of decision-making environments and choose the appropriate decision-making approaches for each.

SYLLABUS OF DSC – 6

Unit 1: Optimization: Linear Programming Problem

(12 Hours)

Formulation of Linear Programming Problems, Graphical Solutions (Special cases: Multiple optimal solution, infeasibility, unbounded solution); Simplex Method, Big-M method and Two-phase method; Special cases, Duality (emphasis on formulation & economic interpretation); Post-optimality and Sensitivity Analysis. Applications of linear programming to Marketing, Finance, Operations Management, Data Envelopment Analysis etc.,

Unit 2: Transportation and Assignment Problem

(9 Hours)

Transportation Problem: Formulation, Solution by N.W. Corner Rule, Least Cost method, Vogel's Approximation Method (VAM), Modified Distribution Method; Degeneracy, Special cases: Multiple Solutions, Maximization case, Unbalanced case, Prohibited routes.

Assignment Problem: Hungarian Method, Special cases: Multiple Solutions, Maximization case, Unbalanced case, Restrictions on assignment.

Unit 3: Network Analysis

(12 Hours)

Basic Concept, Construction of AOA Network diagram, Critical Path Analysis, float and slack analysis (Total float, free float, independent float, Safety Float), probability consideration in PERT, Time-Cost Trade-off in Project.

Unit 4: Decision Theory

(12 Hours)

Decision making environment, Construction of Pay off Table, Opportunity Loss Table, Decision under uncertainty, Decision under Risk: EMV, EOL, EVPI.

Decision under Conflict: Game Theory, Two-person Zero-Sum games, Maximin Minimax Principle, Games without Saddle point- Mixed strategy, Dominance Rule; Reduction of $m \times n$ game and solution of 2×2 , $2 \times s$, and $r \times 2$ cases by Graphical Method.

Practical component (if any) - NIL

Essential/Recommended Readings

1. Vohra, N. D., Quantitative Management, Tata McGraw Hill.
2. Kanti Swarup, Gupta, P. K., & Man Mohan, Operations Research, Sultan Chand & Sons.

Suggested readings

1. Taylor, B. W., Introduction to Management Science, Pearson India.
2. Hillier, M. S., & Hillier, F. S., Introduction to Management Science, Pearson India.

Note: Latest edition of the readings may be used.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES

GENERIC ELECTIVES (GE-4): FUNDAMENTALS OF ECONOMETRICS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| FUNDAMENTALS OF ECONOMETRICS (GE-4) | 4 | 3 | 0 | 1 | Class XII Pass | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- This course provides a comprehensive introduction to basic econometric concepts and techniques.
- It covers estimation and diagnostic testing of simple, multiple regression models, panel data models, and dummy variable regression with qualitative response regression models.

Learning Outcomes

The Learning Outcomes of this course are as follows:

- Understanding of basic econometrics and its assumptions and the impact of violations of classical assumptions.
- Interpretation of functional forms of regression model.
- Understanding of models using dummy variables and Qualitative Response Regression Models.

SYLLABUS OF GE-4

Unit 1

(12 Hours)

Introduction to Econometrics and an overview of its applications; Simple Regression with Classical Assumptions; Properties of estimators, Least Square Estimation and BLUE, Multiple Regression Model and Hypothesis Testing Related to Parameters – Simple and Joint. Functional forms of regression models.

Unit 2

(9 Hours)

Understanding the impact of change in scale of variables on output. Indicators of Goodness of fit of a model; Understanding and calculation of R Square and adjusted R Square. Understanding and calculation of information criteria for model selection: AIC, BIC, and HQC. Understanding of outliers and their impact on the model's output.

Unit 3

(12 Hours)

Violations of Classical Assumptions: expected value of error term is zero, normality, multicollinearity, heteroscedasticity, autocorrelation, and model specification errors, their identification, their impact on parameters; tests related to and impact on the reliability and the validity of inferences in case of, violations of Assumptions; methods to take care of violations of assumptions.

Unit 4

(12 Hours)

Dummy variables: Intercept dummy variables, slope dummy variables, Interactive dummy variables, Use of Dummy Variables to model qualitative/Binary/Structural changes, Response Regression Models or Regression Models with Limited Dependent Variables - Use of Logit, and Probit Models.

Practical component (30 Hours) – *Recommendation Computer Package to be used: Use of softwares like E-Views, R, and STATA to solve real-life problems and check assumptions, taking care of*

assumption violations, and test goodness of fit, and for estimation of Logit, and Probit Models is recommended.

Essential/Recommended Readings:

1. Christopher Dougherty. Introductory Econometrics. Oxford University Press.
2. Gujarati, N. Damodar. Basic Econometrics. New Delhi: McGraw Hill.
3. Gujarati, N. Damodar. Econometrics by Examples. New Delhi: McGraw Hill.

Suggested Readings:

1. Pindyck, Robert S. and Daniel L. Rubinfeld Econometric Models and Economic Forecasts. Singapore: McGraw Hill.
2. Ramanathan, Ramu (2002). Introductory Econometrics with Applications (5th ed.). Thomson South-Western.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-5): ESSENTIALS OF FINANCIAL INVESTMENTS

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Essentials of Financial Investments (GE-5) | 4 | 3 | 1 | 0 | Class XII Pass | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To familiarize students with the essential concepts and fundamentals of financial investments.
- The course will enable them to understand and make informed choice about the various available financial investment alternatives.

Learning Outcomes

On successful completion of his course, the students will be able to:

- Understand the fundamentals of financial investments and the investment decision process.
- Able to compute various measures of risk and return, and understand their role for evaluating investments.
- Understand and carry out security analysis using different approaches.
- Learn basic approaches to valuation of securities and carry out portfolio analysis.

SYLLABUS OF GE-5

Unit 1: Investments – An Overview

(9 Hours)

Concept of Investment, Financial Investment Vs. Real Investment, Investment Vs Speculation, Objectives of Investment, Risk Return Trade Off, Investment Environment – Overview of Securities Market and Different Types of Financial Investment. Investment Decision Process, Direct Investing Vs Indirect Investing, Approaches to Investing – Active Vs Passive. Diversification, Hedging and Arbitrage.

Unit 2: Risk – Return Analysis

(9 Hours)

Concepts of Return and Risk, Types of Return - their Calculation & Utility: Absolute Return, Average Return, Expected Return, Portfolio Return, Holding Period Return, Effective Annualized Return, Risk-Adjusted Return. Causes (or Sources) and Types of Risk – Systematic and Unsystematic Risk, Calculation of Total, Systematic and Unsystematic Risk. Impact of Taxes (discuss relevant provisions of Income Tax Act, 1961) and Inflation on Investment – Computation of Post Tax and Real Returns.

Unit 3: Security Analysis**(15 Hours)**

Approaches to Security Analysis – Fundamental Analysis, Technical Analysis, and Efficient Market Hypothesis (EMH). Fundamental Analysis – EIC Framework, Economic Analysis, Industry Analysis, and Company Analysis. Technical Analysis – Basic Tenets of Technical Analysis, Tool of Technical Analysis – Charts, and Technical Indicators, Limitations of Technical Analysis. Difference between Fundamental Analysis and Technical Analysis. Efficient Market Theory (EMH) – Concept, Forms of Market Efficiency, Weak Form Hypothesis, Semi Strong Form, and Strong Form of Market Efficiency. Implications of EMH.

Unit 4: Fundamentals of Valuation and Portfolio Analysis**(12 Hours)**

Valuation of Equity Shares – Peculiar features of Equity Shares, Dividend Discount Model, Relative Valuation - Earning Multiplier or Price-Earnings (P/E) Model and Price to Book Ratio; Capital Asset Pricing Model (CAPM) – its assumptions and limitations. Valuation of Fixed Income Securities – Bond Fundamentals, Types of Bonds, Determination of Bond Prices and Bond Yield. Portfolio Analysis – Portfolio Management Process, Portfolio Analysis – Portfolio Risk, Portfolio Return, Markowitz Model.

Practical component (if any) - NIL

Essential/Recommended Readings:

1. Tripathi, Vanita: Security Analysis and Portfolio Management. Taxmann Publications.
2. Chandra, Prasanna: Investment Analysis and Portfolio Management. McGraw Hill Education.

Suggested Readings:

1. Rustagi, R.P., Investment Management. Sultan Chand Publications.
2. Reilly, F. K. & Brown, K.C. Analysis of Investments and Management of Portfolios, Cengage India Pvt. Ltd.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-6): PERSONAL FINANCE

Credit distribution, Eligibility and Pre-requisites of the Course

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|--------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| PERSONAL FINANCE (GE-6) | 4 | 3 | 1 | 0 | Class XII Pass | Nil |

Learning Objectives

The Learning Objectives of this course are as follows:

- To equip students with the knowledge and practical understanding of important dimensions of managing one's personal finance.
- They would be able to understand and do planning for their tax liabilities, investments, insurance coverage, and retirement.

Learning Outcomes

On successful completion of his course, the students will be able to:

- Understand the fundamentals of Personal Financial Planning.
- Learn the basics of managing personal tax liabilities.
- Able to ascertain and choose appropriate insurance policies for managing personal risks.
- Appreciate the importance of choosing right investments for managing personal finance.
- Learn the basic concepts and underlying principles for Retirement Planning.

SYLLABUS OF GE-6

Unit 1: Basics of Personal Finance and Tax Planning

(12 Hours)

Understanding Personal Finance. Rewards of Sound Financial Planning. Personal Financial Planning Process. Personal Financial Planning Life Cycle. Making Plans to Achieve Your Financial Goals. Common Misconceptions about Financial Planning. Financial Planning as a career choice. The Financial Planning Environment. Personal Tax Planning – Tax Avoidance versus Tax Evasion, Fundamental Objectives of Tax Planning, Tax Structure in India for Individuals, Common Tax Planning Strategies – Maximizing Deductions, Income Shifting, Tax-Free and Tax-Deferred Income.

Unit 2: Managing Insurance Needs

(12 Hours)

Basics Concepts – Risks, Risk Management and Underwriting. Insuring Life – Benefits of Life Insurance, evaluating need for Life Insurance, Determining the Right Amount of Life Insurance. Choosing the Right Life Insurance Policy – Term Life Insurance, Whole Life Insurance, Universal Life Insurance, Variable Life Insurance, Group Life Insurance, Other Special Purpose Life Policies. Buying Life Insurance – Compare Costs and Features, Select an Insurance Company, and Choose an Agent. Life Insurance Contract Features. Insuring Health – Importance of Health Insurance Coverage.

Making Health Insurance Decision – Evaluate Your Health Care Cost Risk, Determine Available Coverage and Resources, Choose a Health Insurance Plan. Types of Medical Expense Coverage. Policy Provisions of Medical Expense Plans. Property Insurance – Basic Principles, Types of Exposure, Principle of Indemnity, and Coinsurance.

Unit 3: Managing Investments

(12 Hours)

Role of Investing in Personal Financial Planning, Identifying the Investment Objectives, Different Investment Choices. The Risks of Investing, The Returns from Investing, The Risk-Return Trade-off. Managing Your Investment Holdings – Building a Portfolio of Securities, Asset Allocation and Portfolio Management, Keeping Track of Investments. Investing in Equity – Common Considerations, Key Measures of Performance, Types of Equity Stocks, Market Globalization and Foreign Stock, Making the Investment Decision. Investing in Mutual Funds and Exchange Traded Funds (ETFs) – Concept of Mutual Funds and ETFs, Benefits of Investing in Mutual Funds or ETFs, Some Important Cost Considerations, Services Offered by Mutual Funds, Selecting appropriate Mutual Fund and ETF investments, Evaluating the performance of Mutual Funds and ETF.

Unit 4: Investing in Real Estate and Retirement Planning

(9 Hours)

Investing in Real Estate – Some Basic Considerations. Modes of Real Estate Investment – Raw Land, Commercial Properties, Residential Properties, Real Estate Investment Trusts (REITs) and Infrastructure Investment Trust (InvITs).

Planning for Retirement – Role of Retirement Planning in Personal Financial Planning, Pitfalls to Sound Retirement Planning, Estimating Income Needs, Sources of Retirement Income.

Practical component (if any) - NIL

Essential/Recommended Readings:

1. Randall S. Billingsley, Lawrence J. Gitman, and Michael D. Joehnk (2017): Personal Financial Planning. Cengage Learning.
2. Susan M. Tillery, and Thomas N. Tillery: Essentials of Personal Financial Planning. Association of International Certified Professional Accountants.

Suggested Readings:

1. Introduction to Financial Planning (4th Edition 2017) – Indian Institute of Banking & Finance.
2. Sinha, Madhu. Financial Planning: A Ready Reckoner. July 2017. Mc Graw Hill

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

BA (Hons.) Multi Media and Mass Communication
Communication Research
DSC – 4

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|-------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Communication Research | 4 | 3 | 1 | 0 | Class XII Pass | NIL |

Course Objectives

1. To understand the role and functions of media research: aims, subjects, fields, primary and secondary sources.
2. To introduce various methodologies of research.
3. To introduce ways of analysing data generated by different kinds of research.
4. To develop a research proposal for academic and professional purposes.

Course Learning Outcomes

- i. Undertaking research for mass communication, understanding objectives.
- ii. Data collection and ethics of research.
- iii. Understand the various methodologies of research.
- iv. Develop a research proposal: structured format, citation of sources.

Unit 1: Introduction to Communication Research

(12 Hours)

- Definition, Role and Functions of Research
- Role of Theory in Research
- Primary and Secondary Data
- Types of Communication Research: Market Research, Consumer Research, Media Research, Archival Research, Online Research and Opinion Polls

Unit 2: Research Methodology

(18 Hours)

- Quantitative and Qualitative Methodology
- Quantitative Methods: Survey, Sample, Questionnaire Design
- Qualitative Methods: Content Analysis, Ethnographic Methods, Interview
- Tools of Data Analysis: Presentation and Visualisation of Data

Unit 3: Developing a Proposal

(15 Hours)

- Research Objectives, Aims and Questions, Review of Literature
- Feasibility: Field Access, Size of Sample, Time and Funding

- Ethical Issues and Questions: Informed consent, privacy issues, protection of sources, anonymity, Human Rights, IPR- Permission, Acknowledgement, Plagiarism
- Budget, Bibliography and Citation

Still Photography

DSC – 5

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------|---------|-----------------------------------|----------|---------------------|----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Still Photography | 4 | 2 | 0 | 2 | Class XII Pass | NIL |

Course Objectives

1. To train students with hands-on skills using different types of still cameras.
2. To train them for digital editing and manipulation in photography.
3. To familiarize students with the contemporary image making techniques.
4. To make them understand the theoretical perspective behind politics of an image.
5. To prepare students to use photography as a tool of creative expression.

Course Learning Outcomes

- i. Understanding and interpreting the photograph as a historical and technological artefact.
- ii. Familiarity with the elements of a still cameras and techniques of their usage.
- iii. Production with a still camera.
- iv. Skill acquisition of lighting techniques and digital editing for photography.
- v. Production of a theme based photography project.

Unit 1: The Photograph

(8 Hours)

- Photography, Photograph and Culture
- The Black and White; Colour and its Impact
- Image and Text: The Captioned Photo
- The Photograph in Virtual Spaces: Instagram, Pinterest, Snapchat, Flickr

Unit 2: Camera- Controls and Tools

(10 Hours)

- Image and the Camera
- Photographic Optics: Lenses- Types and Specifications
- Exposure: Aperture, Shutter Speed, ISO, Depth of Field, Perspective, Use of Filters
- Camera Settings: Menu and Resolution
- Shooting Modes: Point and Shoot, SLR, DSLR, SLD, SLT, Mirrorless and Mobile

Unit 3: Lighting Techniques and Editing

(12 Hours)

- Fundamental Lighting Concepts and Techniques: Colour Temperature and On-camera Flash

- White Balance and its Uses
- External Lighting Techniques
- Digital Editing: Adobe Photoshop, Lightroom, Apps and Open Sources

Practical (60 Hours):

- Hands-on with a DSLR and other professional-grade camera
- Application of Lighting Techniques and understanding Equipment in photograph
- Enhancing Skills in Digital photo Editing and other manipulation techniques using different software applications and mobile applications
- Improving skills in using mobile phones for digital photography applications

Teaching Learning Process

- Blended, interactive classroom teaching
- Hands-on equipment use in the Photography Lab
- Hands-on software training in the Multi Media Lab
- Production of photography Project
- Workshops
- Internships

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DESIGNING VISUAL COMMUNICATION

DSC – 6

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course |
|---------------------------------------|----------|-----------------------------------|----------|---------------------|-----------------------|-----------------------------|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Designing Visual Communication | 4 | 2 | 0 | 2 | Class XII Pass | NIL |

Course Objectives

1. To train students to understand various visual mediums of design.
2. To develop skills to use and interpret graphics for communication.
3. To understand the function of various design elements used for effective visual communication.
4. To acquire comprehensive skills in designing and creating layouts using manual techniques.

Course Learning Outcomes

- i. Understanding of graphics and images as visual communication.
- ii. Design and graphics as communication.
- iii. Acquiring comprehensive skills in designing.
- iv. Capacity to use acquired skills and knowledge to produce a book cover/ poster

Unit 1: Communication and Graphics

(8 Hours)

- What is Visual Communication?
- Elements and Principles of Design
- Roles and Responsibilities of a Graphic Designer
- Ethical Issues and Legal Implications in Visual Communication: Morphing and Manipulation

Unit 2: Colour Theory and Typography

(10 Hours)

- Introduction to the Theory of Colours: Primary, Secondary and Tertiary
- Colour Composition and Schemes
- Font Types and Font Families
- Character Settings in a Design

Unit 3: Technology in Visual Communication

(12 Hours)

- File Formats of Images
- Vector, Raster and Bitmap Graphics
- Working with Images

- Visual Communication: Photographs, Traditional and Folk Media, Films, Radio, Television and New Media

Practical (60 Hours):

- **Visual Communication Warm Up-** Exercise on Ideation : On a blank sheet of paper, make a random mark...a squiggle, pass the sheet to the person on your right, take the sheet from the person on your left and add something more...whatever occurs to you. Continue drawing and passing the sheets for about 3 minutes. Keep it moving! Objective- Only basic information is needed to convey the idea.
- **Exercise on Elements of design-** Create a Line Drawing using basic elements of design
- **Exercise on design Principles & Colour Theory-** Draw a Poster using negative and positive space, colour it using primary colours.
- **Exercise on Typography-** Type/ create a font in an image style.
- **Exercise on Illustration-** Illustrate 5 phrases you hear at College
- **Group Activity -** Storytelling exercise using shapes
-

Think of visuals as a language that has its own alphabet made up of basic shapes like squares and circles. Combine simple drawings to form visual words, sentences, and more complex thoughts like stories.

40. Amendment to Appendix -II-A to the Ordinance V (2-A) of the Ordinances of the University vide EC Resolution 38-1-6 dated 08.12.2022 regarding Syllabi of 2nd Semester of Department of Commerce

Add the following:

Syllabi of Semester-II of the Department of Commerce under Faculty of Commerce & Business Studies based on Under Graduate Curriculum Framework -2022 to be implemented from the Academic Year 2022-23.

Category-I

B.Com (Hons.)

Discipline Specific Core Course- 2.1(DSC-2.1): Corporate Accounting

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

| Course title & Code | Credits | Credit distribution of the course | | | Eligibility criteria | Pre-requisite of the course (if any) |
|----------------------------------|---------|-----------------------------------|----------|---------------------|----------------------|--|
| | | Lecture | Tutorial | Practical/ Practice | | |
| Corporate Accounting DSC- 2.1 | 4 | 3 | 1 | 0 | Pass in XII | Pass in Financial Accounting (DSC-1.3) |

Learning Objectives

The course aims to help learners to acquire conceptual knowledge of corporate accounting systems and to learn the techniques of preparing the financial statements of companies.

Learning Outcomes

After completion of the course, learners will be able to:

1. Analyse the matters related to issues of share capital, debentures, bonus shares, redemption of preference shares and debentures of a company.
2. Prepare financial statements of companies manually as well as using online software.
3. Interpret the valuation of intangible assets and shares.
4. Describe accounting for Amalgamation and Internal Reconstruction of Companies.
5. Prepare Annual Reports of companies and analyse the voluntary and mandatory information contained in them.

SYLLABUS OF DSC-2.1

Unit 1: Accounting for Share Capital and Debentures (6 hours)

Types of shares; Accounting for Share Capital, Issue of Rights and Bonus Shares; ESOPs and Buy-Back of shares; Issue and Redemption of preference Shares and Debentures. Underwriting of Shares and Debentures. [In reference to Relevant Accounting Standards (AS and Ind AS) and Guidance Notes as applicable.]

Unit 2: Financial Statements of Companies (12 hours)

Preparation of financial statements of corporate entities including one Person Company (excluding calculation of managerial remuneration) as per Division I and II of Schedule III of the Companies Act 2013; Related Parties as per AS-18, Preparation of Statement of Profit and Loss, Balance Sheet, Statement of Equity and Cashflow Statement manually and using appropriate software. Interpreting the ratios calculated as per Schedule III of the Companies Act 2013 [with reference to Relevant Accounting Standards (AS and Ind AS) and the relevant provisions of The Companies Act, 2013, as applicable.]. Calculation of EPS as per AS 20.

Unit 3: Valuation of Intangible Assets and Shares (9 hours)

Valuation of Intangible Assets and Shares. Value Added Statement, Economic Value Added, Market Value Added, and Shareholder Value Added.

Unit 4: Amalgamation of Companies and Internal Reconstruction (9 hours)

- (a) Accounting for Amalgamation of Companies (excluding inter-company holdings) applying AS 14/Ind AS 103.
- (b) Accounting for Different forms of Internal Reconstruction (excluding drafting of Internal Reconstruction Scheme).

Unit 5: Corporate Financial Reporting (9 hours)

Meaning, need and objectives; Constituents of Annual Report and how it is different from financial statements; Contents of report of the Board of Directors; XBRL Reporting. Drafting of Notes to Accounts. Segment Reporting as per AS - 17, Sustainability Reporting, Triple Bottom Line Reporting, CSR Reporting.

Notes:

1. The relevant Accounting Standards (both AS & Ind AS) for all of the above topics should be covered.
2. Any revision of the relevant Indian Accounting Standards/Accounting Standards would become applicable.
3. The relevant provisions of The Companies Act, 2013, as applicable for all of the above topics should be covered.

Practical Exercises:

The learners are required to:

1. Collect prospectus issued by reputed companies, and examine the matters related to issue of shares.
2. Prepare financial statements of companies manually as well as using appropriate software.
3. Examine the annual reports of business organisations to find out whether applicable accounting standards (AS and Ind AS) are complied with or not.
4. Value Intangible Assets and Shares of a company.
5. Collect information from business newspapers, periodicals, print and digital media on the amalgamation of companies and prepare a report.
6. Download annual reports of reputed companies from the websites and analyse the voluntary and mandatory information contained in these statements.
7. Download and analyse notes on accounts from the annual reports of reputed companies from the websites.
