International Economic Organisations: WTO- functions, structure and scope; World Bank and IMF.

Unit 5: International finance and contemporary issues in IB (9 hours)
Types of FDI - Greenfield investment, Mergers & Acquisition, strategic alliances; benefits and drawbacks of FDI.
Overview of exchange rate systems.
Contemporary issues in international business: Outsourcing and its potential for India; international business and sustainable development.

Exercises:
The learners are required to:

1. Demonstrate through case studies the suitability of each mode of entry in international business.
2. Conduct a comparative analysis of countries which are different in terms of political/legal/economic/cultural environment to understand the impact of these dimensions on international business.
3. Analyse data on trade of select countries to examine if trade patterns conform to different trade theories.
4. Conduct an in-depth study of a regional economic arrangement and evaluate its costs and benefits by applying the theoretical knowledge gained during the course
5. Make presentations on developments in contemporary issues affecting international business such as sustainable development.

Suggested Readings:

- Bennett, R. (2006). *International Business*. Delhi: Pearson.
- Cavusgil, S. T., Knight, G. & Riesenberger, J. (2006). *International Business: Strategy, Management and the New Realities*. Pearson India.
- Chaturvedi, D.D. & Jindal, D., & Kaur, R. (2022). *International Business*. Delhi: Scholar Tech Press.
- Hill, C.W.L., & Jain, A. K. (2011). *International Business*. New Delhi: Tata McGraw Hill.
- Daniels, J. D., Radenbaugh, L. H., & Sullivan, D. P. (2016). *International Business*. Uttar Pradesh, India: Pearson Education.

- Griffin, R. W., & Pustay, M. W. (2014). *International Business - A Managerial Perspective*. New Jersey, United States: Prentice Hall.
- Joshi, R.M. (2009). *International Business*. Delhi, India: Oxford University Press.
- Menipaz, E., Menipaz A., & Tripathi, S.S. (2017). *International Business: Theory and Practice*. Delhi, India: Sage Publications India Pvt. Ltd.

Additional Resources

- Economic Survey, various issues.
- RBI Report on Currency & Finance, various issues.
- World Investment Reports, UNCTAD
- Websites: RBI, IMF, World Bank, WTO.
- WTO Annual Reports

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Elective Course- 4.1 (DSE-4.1): Human Resource Development

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE-4.1: Human Resource Development	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to make students understand the various aspects of human resource development and its contribution in the organisation.

Learning outcomes

After completion of the course, learners will be able to:

1. Examine the evolution of HRD.
2. Analyse the role of HRD strategies in organisations.
3. Apply and evaluate a learning process starting with training needs, analysis, assessment and evaluation process.
4. Explore the role of training needs of employees.
5. Evaluate the training methods used in industry.

SYLLABUS OF DSE-4.1

Unit 1: Introduction (7 hours)

Human Resource Development (HRD)- concept, components, evolution, need and significance, difference between human resource management and human resource development, Role of HR manager, HRD culture and climate, contemporary issues in HRD.

Unit 2: Strategic Perspectives in HRD (11 hours)

Concept of Strategic HRD, HRD Interventions-Performance Appraisal, Potential Appraisal, Performance Coaching and Feedback, Career Planning, Training, Systems Development,

Rewards, Employee Welfare and Work Life balance, Roles of HR Developer, Physical and Financial Resources for HRD, HR Accounting, HRD Audit.

Unit 3: Learning Technology for HRD (9 hours)

Learning and HRD, Models and Curriculum, Principles of Learning, Individual and Group

Learning, Assessment Centre, Transactional Analysis, Behaviour Modeling and Self Directed Learning, Evaluating the HRD.

Unit 4: Human Resource Training and Development (T&D) (9 hours)

Concept and Importance, Assessing Training Needs, Designing and Evaluating Training & Development Programmes, Role, Responsibilities and challenges to Training Managers.

Unit 5: Training Methods (9 hours)

Training within Industry: On the Job & Off the Job Training, Management Development: Lecture Method, Role Play, In-basket Exercise, Simulation, Vestibule Training, Management Games, Case Study, Programmed Instruction, Sensitivity Training, Strategies of Training Program, Review on T&D Programmes in India.

Exercises:

The learners are required to:

1. Engage themselves in trainer competencies through developing and implementing experiential sessions
2. List the various rewards and employee welfare schemes
3. Assess the ways of self-directed learning
4. Design and evaluate training and development programs.
5. Analyse the case studies to understand various training methods.

Suggested Readings:

- Chabbra, T.N .(2016). *Human Resource Management: Concepts and Issues*. Delhi, India: DhanpatRai and Co. Publications.
- Durai, P. (2016). *Human Resource Management*. Delhi, India: Pearson Education.
- Graig, R. L. & Bittel, L. R. (2012). *Training and Development Hand Book*, Delhi, India: McGraw-Hill .
- ILO. (1975). *Teaching and Training Methods for Management Development Hand Book*. New York, United States: McGraw-Hill.
- Kapur, S. (2009). *Human Resource Development and Training in Practice*. Delhi, India: Beacon Books.
- Mondy, R.W., & Martocchio, J. J. (2016). *Human Resource Management* (14th ed.). London, United Kingdom: Pearson Education Publications.
- Nadler, L. (1980). *Corporate Human Resource Development*. New York, United States: Van Nostrand Reinhold, ASTD.
- Routry, P., & Kalyani, M. (2009). *Human Resource Development and Organisational Effectiveness*. Delhi, India: Excel Books.

- Rao, T.V. (2010). *Human Resource Development*. Delhi, India: Sage Publications.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Elective Course- 4.2 (DSE-4.2): Investment Management

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE-4.2: Investment Management	4	3	1	0	Pass in Class XII with Mathematics/Accountancy	Studied Financial Markets and Institutions (DSE 3.2)

Learning Objectives

The course aims to familiarize learners with different aspects of investment management and risks, introduce them to the framework of securities analysis and valuation and highlight the process of portfolio management

Learning outcomes

After completion of the course, learners will be able to:

1. Analyze the environment of investment and risk return framework.
2. Describe bonds in terms of valuation, yields, and risks.
3. Analyse equity shares using different approaches and models.
4. Construct, analyse, select and evaluate portfolios along with a deep understanding of capital market theory and associated models.
5. Comprehend and analyse futures and options and to be able to devise own investment strategies using various options trading strategies in the derivative market.

SYLLABUS OF DSE-4.2

Unit 1: Introduction to Investment (9 hours)

Concept of Investment, Investment Decision Process; Avenues for investment- features and classes; Difference between investment, speculation, and gambling; Primary market- IPO, Secondary Markets- Trading of securities; Security market indices; Return and risk: concept, calculation, trade-off between risk and return; Impact of taxes and inflation on investments.

Unit 2: Bond Analysis and Valuation (9 hours)

Bond Fundamentals; Estimating bond yields; Bond Valuation and Malkiel Theorems; Bond risks and credit rating; Present Scenario of Indian Debt Market.

Unit 3: Equity Analysis and Valuation (9 hours)

Fundamental Analysis; Technical Analysis and Efficient Market Hypothesis; Valuation of Equity Shares using Dividend Discount Model and P/E Ratio model.

Unit 4:Portfolio Management (9 hours)

Portfolio Management- Concept and need, Measurement of Portfolio Return and risk; Diversification- Markowitz Theory; Capital Asset Pricing Model.

Unit 5: Mutual Fund and Derivatives (9 hours)

Mutual Fund -concept and types; Performance Evaluation; Overview of Financial Derivatives- Forwards, Futures and Options.

Exercises:

The learners are required to:

1. Extract historical data on daily/monthly/annual prices for stocks in an index from a financial database. Evaluate them in terms of risk and return using appropriate software.
2. Estimate the Yield-to-Maturity of a corporate bond using relevant software.
3. Carry out moving average analysis on a stock of a real company to decide whether to buy, sell or hold the stock for one month using spreadsheets. Further, learners are also required to assess their decision after one month of decision making.
4. Select any 5 companies of your choice. Using appropriate models, forecast their future cash flows, growth rate and cost of capital. Estimate the intrinsic value of stocks of these companies using relevant software.
5. Select any 5 stocks of your choice. Extract past data on their prices and volumes from a financial database. Make investment decisions using appropriate technical analysis tools and techniques. Use any technical analysis software for this purpose.
6. Construct portfolios based on any firm attribute using past data on NSE 500 stocks. Assess the profitability of this investment strategy. Evaluate if the returns on this strategy are explained by standard risk models such as CAPM. Use relevant software for your estimations.
7. Build and analyse option strategies for Index and Stock options using any option building analytical tool.

Suggested Readings:

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Elective Course- 4.3 (DSE-4.3): Sustainability Marketing

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE 4.3-Sustainability Marketing	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

This course aims to familiarize the students with the concept and process of sustainable marketing.

Learning outcomes

After completion of the course, learners will be able to:

1. Describe the need of sustainable marketing in view of environmental, legal and ethical aspects.
2. Explore the opportunities for sustainable marketing strategies.
3. Identify the consumer behaviour for sustainable marketing.
4. Demonstrate how sustainable marketing can be applied in marketing mix strategies.
5. Discover the case studies of legal framework for sustainable marketing.

SYLLABUS OF DSE-4.3

Unit 1: Introduction (9 hours)

Sustainability- Concept, Issues, SDG Goals. Sustainability Marketing- Concept, Rationale, Evolution, Pillars of Sustainability Marketing, Linkage with SDGs.

Sustainability and Ethical Decision Making. Challenges of Practising SM- Sustainability and Profitability. Triple Bottom Line- An Overview.

Unit 2: Sustainability Marketing Opportunities (9 hours)

Sustainability Opportunities- Marketing Environment; Segmentation, Targeting and Positioning; Creating Value through Sustainability- Designing the Marketing Mix, Holistic Approach to Sustainability.

Unit 3: Consumer Behaviour and Sustainability Marketing (9 hours)

Unsustainable Lifestyles, Dimensions of Sustainable Consumer Behaviour. Motives of adapting Sustainable Consumer Behaviour, Attitude-Behaviour Inconsistency in Sustainable Buying Decisions, Environmental Consciousness; Sustainable Consumption- Beliefs, Social Norms, Values, Cases of Mindful Consumption and Responsible Consumption.

Unit 4: Sustainability and Marketing Mix Decisions (9 hours)

Developing and Reinforcing Behaviour through 3 R's- Recycle, Reuse and Reduce.

Sustainable Products, Sustainable Branding and Packaging. Sustainable Pricing Decisions, Sustainable Marketing Communication, Sustainability and Promotion Mix Decision, Marketing Channels and Sustainable Supply Chain.

Unit 5: Sustainability Legal Framework and its Implementation in India (9 hours)

An Overview of Legal Framework- Leading Cases and Developments. Role of Sustainable Marketing in Global Network.

Exercises:

The learners are required to:

1. Perform a role play (as a marketer and as consumers)
2. Make presentations of companies' case examples where marketers have adapted sustainable marketing mix strategies and how it impacted their business.
3. Represent their own Behaviour for mindful and responsible Behaviour.
4. Demonstrate how marketers can develop and reinforce consumer Behaviour through 3 R's.
5. Find out the leading case studies where sustainable marketing has emerged as an important issue.

Suggested Readings:

- Kotler, P.. (2012). *Rethinking Marketing: Sustainable Marketing Enterprise in Asia, Second Edition*. Delhi, India: Pearson.
- Belz, F.M., & Ken, P. (2012). *Sustainability Marketing: A Global Perspective*. Delhi, India: Willey publication
- Richardson, N. (2020). *Sustainable Marketing Planning*. Delhi, India: Routledge, Taylor and Francis Group.
- Peterson, M. (2021). *Sustainable Marketing: A holistic Approach*. Delhi, India: Sage Publication Ltd.
- Carvill,M., Butler, G., & Evans, G. (2021). *Sustainable Marketing: How to Drive Profits with Purpose*. United Kingdom: Bloomsbury Business.
- Fuller, D.A. (1999). *Sustainable Marketing: Managerial-Ecological Issues. Markets and Market Development*. United Kingdom: Sage Publications Inc.

Discipline Specific Elective Course- 4.4 (DSE-4.4): Analysis of Financial Statements

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE 4.4- Analysis of Financial Statements	4	3	1	0	Pass in Class XII with Mathematics/Accountancy	Studied Financial Reporting Analysis & Valuation (DSE3.4)

Learning Objectives

The course aims to help the learners to analyse accounting and other information incorporated in the corporate annual reports, and to analyse the operating, financial, and structural performance of business firms with the help of appropriate analytical tools.

Learning outcomes

After completion of the course, learners will be able to:

1. Analyse and interpret the quantitative information provided in the Financial Statements of a company.
2. Examine various techniques for financial statement analysis.
3. Analyze financial statements and make inter-firm comparisons using Accounting ratios.
4. Prepare a cash flow statement and perform cash flow analysis.
5. Analyse intra-firm and inter-firm comparisons using case study technique.

SYLLABUS OF DSE-4.4

Unit 1: Introduction (4 hours)

Introduction to Corporate Financial Statements, Financial/Accounting information contained in the Financial Statements; Meaning, objectives, and limitations of Financial Statement Analysis; Considerations for the economic and financial analysis.

Unit 2: Techniques of Financial Statement Analysis - I (7 hours)

Techniques of financial statement analysis – Comparative Financial Statements, Common-size Financial Statement, and Trend Analysis.

Unit 3: Techniques of Financial Statement Analysis - II (11 hours)

Meaning, objectives, and classification of Accounting Ratios and Ratio Analysis; Computation and application of accounting ratios for evaluation of performance (Activity and Profitability Analysis), evaluation of financial health (Liquidity, Solvency, and Structural Analysis); and market ratios. EVA analysis. Intra-firm and inter-firm comparison using ratio analysis. DuPont analysis.

Unit 4: Cash Flow Analysis (9 hours)

Meaning of Cash Flow; Objectives and Importance of Statement of Cash Flows; Preparation of Statement of Cash Flows as per AS 3 and Ind AS 7.

Unit 5:Analysis of Financial Statements- Case Study (14 hours)

A Case Study Intra-firm and inter-firm comparison of any three listed companies from any sector/industry for a period of five years using the spreadsheet, Industry Averages, Growth rates, CAGR, Z-score etc. using the techniques of financial statement analysis.

Exercises:

Learners are required to:

1. Extract historical annual reports of any reputed company.
2. Analyse the information contained in the financial statements using common size analysis and trend analysis.
3. From the financial statements, compute the accounting ratios to examine the operating efficiency, profitability, liquidity, and solvency of the company.
4. Prepare Cash flow statements from the information available in the financial statements.
5. Conduct a comparative analysis of any two listed companies using excel.

Suggested Readings:

Discipline Specific Elective Course- 4.5 (DSE-4.5): Decision Science

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE 4.5 – Decision Science	**4**	**3**	**1**	**0**	**Pass in Class XII with Mathematics/Accountancy**	**NIL**

Learning Objectives

The course aims to familiarise the learners with basic mathematical tools, emphasising applications to business and economic situations.

Learning outcomes

After completion of the course, learners will be able to:

1. Analyse quantitative techniques that play an important role in managerial decision-making.
2. Compare programming for business problems involving constrained optimization.
3. Examine, schedule, and coordinate the activities of a large-scale project using PERT and CPM.
4. Describe programming to assign sources and jobs to destinations and machines.
5. Examine how competitive choices in a business are made and how the business strategies are developed to reduce the customers' wait time.

SYLLABUS OF DSE – 4.5

Unit 1: Linear Programming (9 hours)

Formulation of Linear programming problems (LPPs) with more than two variables. Solution of LPPs by simplex method - maximization and minimization cases. The dual problem: Formulation, the relationship between Primal and Dual LPP, Primal and Dual solutions (excluding mixed constraints LPPs). The economic interpretation of the dual.

Unit 2: Assignment and Transportation (9 hours)

Assignment Problem, Hungarian Method of Assignment, Unbalanced Assignment Problems, Transportation Problem, Method to find the initial solution: North-west corner method, Least cost Method, Vogel's approximation method, Finding optimal solution: Stepping-stone method and Modified Distribution Method.

Unit 3: Sequencing and Game Theory (9 hours)

Introduction of sequencing, Notations, Terminology, and Assumptions, Processing n jobs through two and three machines, Introduction of Game Theory, Two-Person Zero-Sum Game, Pure Strategies (Minimax and Maximin Principles): Game with a saddle point. Mixed Strategies, Rule of Dominance.

Unit 4: Queuing Model and Replacement Theory (9 hours)

Introduction of Queuing Model, Structure of a Queuing System, Performance Measure of a Queuing System, Model I: {(M/M/1): (Infinite/FCFS)}, Introduction of Replacement, Replacement of items whose efficiency deteriorates with time.

Unit 5: Project Management: PERT and CPM (9 hours)

Introduction, Basic Difference PERT and CPM, Phases of Project Management, PERT/CPM Network Components and Precedence Relationships, Critical Path Analysis, Critical Path, Project Scheduling with uncertain activity times, Estimation of project completion time.

Exercises:

The learners are required to:

1. Identify the decision-making variables and assess their functional relationship with other variables affecting the decision in a business situation.

2. Establish the production sequence of a hypothetical manufacturing company.
3. Solve business problems as an application of linear programming/assignment/ transportation.
4. Estimate the time when an asset of a company should be replaced.
5. Use a hypothetical case of a project and plan, schedule, and coordinate the activities.

Note: Learners may use software packages.

Suggested Readings:

- Anthony, M., & Biggs, N. (1996). *Mathematics for Economics and Finance*. Cambridge, United Kingdom: Cambridge University Press.
- Budnick, P. (1986). *Applied Mathematics for Business, Economics, & Social Sciences*. New York, United States: McGraw Hill Publishing.
- Dowling, E. (2011). *Introduction to Mathematical Economics*. New York, United States: McGraw Hill Publishing.
- Hamdy, A. T. (2017). *Operational Research*. Pearson.
- Kapoor, V.K. (2013). *Operations Research: Quantitative Techniques for Management*. Delhi, India: Sultan Chand and Sons.
- Levin R. I., Rubin D.S., Stinson J.P., & Gardner E.S. Jr. (1986). *Quantitative Approaches to Management*. New York, United States: McGraw Hill International Editions.
- Vohra, N.D. & Arora, H. (2010). *Quantitative Techniques in Management*. Delhi, India: McGraw Hill.
- Tulsian, P.C. & Pandey, V. (2002). *Quantitative Techniques: Theory and Problems*. India: Pearson Education.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on Department's website.

POOL OF GENERIC ELECTIVE

General Elective Course- 4.1 (GE-4.1): Basics of Organisation Behaviour

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE-4.1 – Basics of Organisation Behaviour	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to enhance the understanding of the basic concept of Organisational Behaviour (OB) and the working of modern organisations. It focuses on the study of human behaviour at three levels: Individual, Interpersonal and Group.

Learning outcomes

After completion of the course, learners will be able to:

1. Analyse the working of organisations and human Behaviour.
2. Apply the concepts of OB in managing people at the workplace.
3. Critically evaluate the role of motivation theories in guiding human behaviour.
4. Recognise diverse leadership styles and strategies.
5. Summarise the ways to build supportive organisational culture.

SYLLABUS OF GE-4.1

Unit 1: Introduction (7 hours)

Introduction to organisational studies, importance of organisations, relationship between management and organizing function, emergence and development of Organisation Behaviour, Organisational Behaviour in changing times.

Unit 2: Individual Behaviour (9 hours)

Individual characteristics - Inherited characteristics vs. learned characteristics; Personality-concept and types; Components of Attitude, organisational commitmentand job satisfaction as work attitude; Sources and types of values; role of values and beliefs in the making of an individual.

Unit 3: Communication and Motivation (11 hours)

Communication - concept, process and types, essentials of effective communication; Johari Window.

Why people work - Maslow's Need Hierarchy theory, intrinsic and extrinsic rewards, monetary and non-monetary incentives, contemporary motivation practices.

Unit 4: Group Behaviour and Leadership (11 hours)

Importance of groups, groups vs. teams;

Leadership - trait theory, nature vs. nurture leadership; difference between a leader and a manager; Leadership styles (Likert) - exploitative, benevolent, consultative, and participative; making of great leaders, contemporary leadership practices.

Unit 5: Organisational Dynamics (7 hours)

Organisation as a system; organisational structure, relationship between organisation structure, system, and strategy; Managing conflict - reasons, types and resolutions; Managing stress.

Exercises:
The learners are required to:

1. Undertake a group activity to identify personality type.
2. Role play on Johari window
3. Conduct a primary survey to study the dynamics of group behaviour.
4. Apply and test various stress management techniques like deep breathing, Exercise, and mindfulness.
5. Identify the innovative ways of motivation practiced by contemporary organisations.

Suggested Readings:

- Greenberg, J. (2015). *Behaviour in organisations* (10th Ed.). India: Pearson Education.
- Hersey, P. K., Blanchard, D., & Johnson, D. (2013). *Management of organisational Behaviour*. London, United Kingdom: Pearson.
- Luthans, F. (2017). *Organisational Behaviour-An evidence based approach* (12th ed.). NewYork, United States: McGraw-Hill Education.
- Pareek, U. (2014). *Understanding Organisational Behaviour*. United Kingdom: Oxford University Press.
- Robbins, S. T. & Judge, T. A. (2019). *Essentials of organisational Behaviour*. London, United Kingdom: Pearson.
- Singh, A. K., & Singh, B. P. (2012). *Organisational Behaviour*. Delhi, India: Excel Books Pvt. Ltd.

- Singh, K. (2015). *Organisational Behaviour: Texts & Cases* (3rd ed.). India: Pearson. Additional Resources.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on Department's website.

General Elective Course- 4.2 (GE-4.2): Personal Financial Planning

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE 4.2- Personal Financial Planning	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to familiarize learners with different aspects of personal financial planning like savings, investment, taxation, insurance, and retirement planning and to develop the necessary knowledge and skills for effective financial planning.

Learning outcomes

After completion of the course, learners will be able to:

1. Analyse the meaning and appreciate the relevance of financial planning.
2. Appraise the concept of investment planning and its methods.
3. Examine the scope and ways of personal tax planning.
4. Analyse insurance planning and its relevance.
5. Identify the need for retirement planning and its relevance.

SYLLABUS OF GE-4.2

Unit 1: Introduction to Financial Planning (9 hours)

Financial goals, steps in financial planning, budgeting incomes and payments, time value of money. Introduction to savings, benefits of savings, management of spending & financial discipline, Setting alerts and maintaining sufficient funds for fixed commitments.

Unit 2: Investment Planning (9 hours)

Process and objectives of investment, concept and measurement of return & risk for various asset classes, measurement of portfolio risk and return, diversification & portfolio formation. Gold bond; Real estate; Investment in greenfield and brownfield Projects; Investment in fixed income instruments, financial derivatives & commodity market in India. Mutual fund schemes; International investment avenues. Currency derivatives and digital currency.

Unit 3: Personal Tax Planning (9 hours)

Tax structure in India for personal taxation, Scope of personal tax planning, exemptions and deductions available to individuals under different heads of income and gross total income. Comparison of benefits - Special provision u/s 115 BAC vis-à-vis General provisions of the Income-tax Act, 1961, tax avoidance versus tax evasion.

Unit 4: Insurance Planning (9 hours)

Need for insurance. Life insurance, health insurance, property insurance, credit life insurance and professional liability insurance.

.

Unit 5: Retirement Benefits Planning (9 hours)

Retirement plans goals, process of retirement planning, Pension plans available in India, Reverse mortgage, Estate planning.

Exercises:

The learners are required to:

1. Perform electronic fund transfers through net banking and UPI.
2. Identify certain recent Ponzi schemes in the market.
3. Prepare tax planning for a hypothetical individual.
4. List a few health insurance plans of different insurance companies for individuals.
5. Discuss the new pension schemes available for employees.

Suggested Readings:

- Halan, M.(2018). *Let's Talk Money: You've Worked Hard for It, Now Make It Work for You*. New York, United States: HarperCollins Publishers.
- Madura, J. (2016). *Personal Finance*. Delhi, India: Pearson.

- Indian Institute of Banking & Finance. (2017). *Introduction to Financial Planning*. Delhi, India: Taxmann Publication.
- Keown A.J. (2018). *Personal Finance*. New York, United States: Pearson.
- Pandit, A. (2014). *The Only Financial Planning Book that You Will Ever Need*. Mumbai, India: Network 18 Publications Ltd.,
- Sinha, M. (2017). *Financial Planning: A Ready Reckoner*. Delhi, India: McGraw Hill Education.
- Tripathi, V. (2019). *Fundamentals of Investment*. Delhi, India: Taxmann Publication.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

General Elective Course- 4.3 (GE-4.3): Brand Management

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE 4.3- Brand Management	4	3	1	0	Pass in Class XII	Studied Basics of Advertising (GE- 3.2)

Learning Objectives

The course aims to make students aware of brands, their evolution, extensions, simple brand management strategies and its practical implications for business. The course shall focus on developing skills to devise success actions for brand positioning and equity in the market.

Learning outcomes

After completion of the course, learners will be able to:

1. Comprehend the conceptual framework of brands.
2. Analyse various success actions of popular brands.
3. Describe the brand extensions.
4. Explore the life stages of a brand.
5. Apply brand management success actions to real life products.

.

SYLLABUS OF GE 4.3

Unit I : Introduction (9 hours)

Introduction to Brands and Brand Management, Concept of a Brand, Evolution of a Brand, Challenges and Opportunities, Brand Identity, Brands and Consumers, IMC: Evolution and Growth.

Unit II: Brand Positioning (9 hours)

Brand Building, Identifying and Establishing Brand Positioning and Values, Brand Repositioning, Life Stages of a Brand, Brand Personality, Brand Image.

Unit III: Designing Marketing Program (11 hours)

Brand Management Process, Designing And Implementing Brand Actions, Brand Extensions, Brand Reinforcement Strategies,

Unit IV: Brand Equity & Performance (11 hours)

Customer-based Brand Equity, Understanding Brand Performance: Brand Equity Management System, New Media Environment, Growing and Sustaining Brand Equity.

Unit V: Recent Issues in Branding (5 hours)

Managing Strong Brands, Managing Brands in the Digital Era. Contemporary Scene: storytelling, Internet and Social Media, Brands amplifiers, Legal and Ethical aspects in Brand Management.

Note: Real-life examples may be discussed in every unit, where ever possible to supplement the subject matter.

Exercises:

The learners are required to:

1. Choose popular brands and analyse the life-cycle of select brands.
2. Discuss suggestive strategies for brand positioning.
3. Use appeals for advertising and branding of products.
4. Understand the rationale behind a brand story.
5. Develop a brand story for a unique product idea.

Suggested Readings:

- Aaker, D. (2009). *Brand Leadership*. (UK Ed), United Kingdom: Simon & Schuster.
- Beverland, M. (2018). *Brand Management: Co-creating Meaningful Brands*. United Kingdom: SAGE Publications.

- Parameshwaran, M.G. (2006). *Building Brand Value*. India: McGraw Hill Education.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

General Elective Course- 4.4 (GE-4.4): Accounting for Managerial Decision Making

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE 4.4 – Accounting for Managerial Decision Making	4	3	1	0	Pass in Class XII with Mathematics/ Accountancy	Studied Financial Statements Analysis (GE- 3.4)

Learning Objectives

The course aims to enable students to acquire knowledge of concepts, methods and various techniques of accounting for the purpose of managerial planning, control and decision making.

Learning outcomes

After completion of the course, learners will be able to:

1. Examine the fundamentals of accounting and its branches.
2. Apply financial statements and analyse their use in managerial decision making.
3. Evaluate the budgetary control system as a tool of managerial planning and control.
4. Analyse the concept of cost-volume-profit analysis for use in short-term decision making.
5. Determine the relevant cost and make decisions related to different business situations using

marginal costing and differential costing techniques.

SYLLABUS OF GE-4.4

Unit 1: Fundamentals of Accounting (9 hours)
An Overview of Accounting: meaning, scope, objectives, accounting as part of information system, branches of accounting. Financial accounting process, accounting concepts, accounting standards. Basic cost concepts, cost classification, cost sheet, an overview of various types of costing methods.

Unit 2: Financial Statements and their Analysis (9 hours)
Understanding of financial statements. Interpretation of financial statements with the help of ratio analysis (liquidity ratios, profitability ratios, turnover ratios and solvency ratios) and cash flow analysis.

Unit 3: Budgetary Control System (9 hours)
Concept of budget, budgeting and budgetary control; objectives, merits and limitations; Functional Budgets; Fixed and Flexible budgeting.

Unit 4: Cost Volume Profit Analysis (9 hours)
Concept of marginal cost and marginal costing, marginal costing equation and contribution margin, Cost-volume-profit analysis; Break-even Analysis, Profit-volume ratio, break-even point, angle of incidence, margin of safety, key factor.

Unit 5: Decision Making under Specific Situations (9 hours)
Steps in decision making process. Concept of relevant costs. Solving various short -term decision making problems using marginal costing and differential costing techniques – Profitable product mix, Acceptance or rejection of special/ export offers, Make or buy, Addition or elimination of a product line, and pricing decisions.

Note: Use of Spreadsheet should be encouraged for doing basic calculations for various topics in the course and giving students subject related assignments for their internal assessment purposes.

Exercises:

The learners are required to:
1. Analyse the scope of accounting in different enterprises.
2. Evaluate the role of financial statements in managerial decision making.
3. Prepare and evaluate a budgetary control system for a hypothetical business.
4. Prepare a business plan and apply concepts of cost, volume, profit analysis on the same.
5. Analyse case studies on various decision-making situations.

General Elective Course- 4.5 (GE-4.5): Fundamentals of International Business

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE 4.5 – Fundamentals of International Business	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to impart the core body of knowledge in international business to the students. The course would introduce students to the international trading and investment environment and also create awareness about emerging issues such as outsourcing and sustainable development in the context of international business.

Learning Outcomes: After completion of the course, learners will be able to:

1. Analyse the process of globalization and its impact on growth of international business.
2. Evaluate the changing dynamics of the diverse international business environment.
3. Analyse the theoretical dimensions of international trade as well as intervention measures adopted.
4. Analyse the significance of different forms of regional economic integration and the role played by various international economic organisations.
5. Evaluate the forms of foreign direct investment and analyse benefits and costs of fdi.

Syllabus of GE-4.5

Unit 1: **Introduction to International Business (7 hours)**
Globalization - concept, significance and impact on international business; international business contrasted with domestic business; complexities of international business; internationalization stages and orientations; modes of entry into international businesses.

Unit 2: International Business Environment (11 hours)
Role of political and legal systems in international business; cultural environment of international business; implications of economic environment for international business.

Unit 3: International Trade (9 hours)
Theories of international trade – Theory of Absolute Advantage theory, Theory of Comparative Advantage, Factory Proportions theory and Leontief paradox, Product Life Cycle theory, Theory of National Competitive Advantage; Instruments of trade control.

Unit 4: Regional Economic Integration and International Economic Organisations (9 hours)
Forms of regional economic integration; Integration efforts amongst countries in Europe, North America and Asia: EU, USMCA, and SAARC; Cost and benefits of regional economic integration. International Economic Organisations: WTO- functions, structure and scope; World Bank and IMF.

Unit 5: International finance and contemporary issues in IB (9 hours)
Types of FDI - Greenfield investment, Mergers & Acquisition, strategic alliances; benefits and drawbacks of FDI.
Overview of Exchange Rate systems.

Contemporary issues in international business: Outsourcing and its potential for India; international business and sustainable development.

Exercises:
The learners are required to:

1. Demonstrate through case studies the suitability of each mode of entry in international business.
2. Conduct a comparative analysis of countries which are different in terms of political/legal/economic/cultural environment to understand the impact of these dimensions on international business.
3. Analyse data on trade of select countries to examine if trade patterns conform to different trade theories.
4. Conduct an in-depth study of a regional economic arrangement and evaluate its costs and benefits by applying the theoretical knowledge gained during the course
5. Make presentations on developments in contemporary issues affecting international business such as sustainable development.

Suggested Readings:

- Bennett, R. (2006). *International Business.* Delhi, India: Pearson.
- Cavusgil, S. T., Knight, G. & Riesenberger, J. (2007). *International Business: Strategy, Management and the New Realities*. India: Pearson India.
- Hill, C.W.L., & Jain, A. K. (2011). *International Business.* Delhi, India: Tata McGraw Hill.

SEMESTSER-V
B.Com (Hons.)

Discipline Specific Core Course- 5.1(DSC-5.1): Income Tax Law and Practice

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSC -5.1: Income Tax Law and Practice	4	3	0	1	Pass in Class XII with Mathematics/Accountancy	NIL

Learning Objectives

The course aims to impart knowledge of law pertaining to levy of income tax in India.

Learning outcomes

After completion of the course, learners will be able to:

1. Analyse the basic concepts of income tax and determine the residential status of different persons.
2. Compute income under the heads 'salaries' and 'income from house property'.
3. Compute income under the heads 'profits and gains of business or profession' and 'capital gains'.
4. Compute income under the head 'income from other sources' and understand the provisions relating to clubbing of income and set-off losses.
5. Analyse various deductions and computation of total income and tax liability of individuals.

SYLLABUS OF DSC-5.1

Unit 1: Introduction (9 hours)

Basic concepts: Income; Agricultural income, Person, Assessee, Assessment year, Previous year, Gross Total Income, Total income, Maximum marginal rate of tax and Permanent

Account Number (PAN); Residential status: Scope of total income on the basis of residential status; Exempted incomes under section 10; Learning lessons from Kautilya's Taxation Policy.

Unit 2: Computation of Income from Salaries and House Property (11 hours)

Income from Salaries; Income from House Property.

Unit 3: Computation of Income from Business or Profession and Capital Gains (11 hours)

Profits and gains of business or profession; Capital gains.

Unit 4: Income from Other Sources, Clubbing of Income and Set-off (7 hours)

Income from other sources; Income of other persons included in assessee's total income; Aggregation of income and set-off and carry forward of losses.

Unit 5: Deductions and Computation of Total Income and Tax Liability (7 hours)

Deductions from gross total income; Rebates and reliefs; Computation of total income and tax liability of individuals (On-line filing of Returns of Income & TDS).

Practical Exercises:

The learners are required to:

1. Prepare a case study for a person resident but not ordinarily resident in India having income under the head other sources of income.

2. Prepare a presentation indicating the impact of alternative tax regime structure on the tax liability of an assessee.

3. Present a hypothetical case wherein the impact of change in the capital gains taxes are reflected as per the relevant Financial Act.

4. Learn about various tax services available on the official website of Government of India.

5. Prepare a list of tax deductions available in case of a senior citizen.

6. Explore and attempt on-line filing of Returns of Income & TDS on Income tax e-filing website under ITR-1 and ITR-2.

Suggested Readings:

- Ahuja, G., & Gupta, R. (2022). *Simplified Approach to Income Tax.* Delhi, India: Flair Publications Pvt. Ltd.
- Bandypoadhyay, S. B., & Das, C. (2019). *TAXATION II* (1st ed., Vol. II). Delhi, India: Oxford University Press.
- Mittal, N. (2019). *Concept Building Approach to Income Tax Law and Practice* (1st ed.,

Vol. 1). Delhi, India: Cengage Learning India Pvt.

- Singhania, V. K., & Singhania, M. (2021). *Students' Guide to Income Tax | University Edition.* Delhi, India: Taxmann Publications Private Limited.

Additional Readings:

- Current Tax Reporter. Jodhpur, India: Current Tax Reporter.
- Income Tax Reports. Chennai, India: Company Law Institute of India Pvt. Ltd.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Core Course- 5.2 (DSC-5.2): Business Economics

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSC-5.2: Business Economics	4	3	1	0	Pass in Class XII with Mathematics/Accountancy	NIL

Learning Objectives

The course aims to acquaint the learners with Micro economics and its applications.

Learning outcomes

After the completion of the course, the learners will be able to:
1. Examine the nature and scope of business economics.
2. Analyse how consumers try to maximize their satisfaction by spending on different goods.
3. Evaluate the relationship between inputs used in production and the resulting outputs and costs.
4. Analyse and interpret various facets of and pricing under different market situations.
5. Discuss the contemporary issues and applications in micro economics.

SYLLABUS OF DSC-5.2

Unit 1: Introduction to Business Economics (5 hours)

Nature and scope of Business Economics, Demand and Supply: Meaning, law, Individual Vs Market, Movement Vs Shift, Market equilibrium. Elasticity of Demand: Price, income and cross elasticity. Measurement of elasticity of demand: outlay and percentage method. Elasticity of supply: concept and measurement (Percentage method).

Unit 2: **Consumer Behaviour (11 hours)**
Cardinal Vs Ordinal Utility, Indifference curves: features, budget line, consumers equilibrium, ICC and Engels curve, PCC and derivation of demand curve, Income and substitution effects of price change (normal, inferior and giffen goods), Applications: effect of interest rates on household savings, lump sum subsidy Vs excise subsidy.

Unit 3: Production and Cost (11 hours)

Production function: TP, AP and MP, Law of Variable proportions. Isoquants: properties, optimal combination of resources, expansion path and returns to scale.

Cost: Different cost concepts, Derivation of short run and long run cost curves (LAC and LMC), Economies and Diseconomies of scale.

Unit 4: Market Structures (11 hours)

Perfect competition: features, equilibrium under short run and long run, derivation of supply curve under short run and long run.

Monopoly: features, equilibrium under short run and long run, absence of supply curve, Price discrimination: degrees, conditions and dumping.
Monopolistic competition: features, product differentiation and excess capacity and equilibrium.
Oligopoly: Collusive and non- collusive: Cournot's model, Kinked demand curve, Cartels (OPEC and CIPEC)

Unit 5: **Contemporary Issues and applications (7 hours)**

Rent control, Minimum wages, Individual supply curve of labour, Peak load Pricing, Prisoners' dilemma and Game Theory.

Exercises:
The learners are required to:
1. Apply the concept of elasticity of demand and supply in real life.
2. Analyse the impact of changing prices on consumption of necessities by a household.
3. Visit any manufacturing unit and study its production process and costing.
4. Analyse the OPEC as a case of a successful cartel.
5. Comment on the contemporary issues and applications in micro economics.

Suggested Readings:

- Samuelson, P. A., Nordhaus, W. D., Chaudhari S., & Sen, A. (2019). *Economics (SIE)* (20th ed.). New York, United States: McGraw-Hill.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Core Course- 5.3 (DSC-5.3): Management Accounting

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSC 5.3 – Management Accounting	4	3	0	1	Pass in Class XII with Mathematics/ Accountancy	Studied Cost Accounting (DSC- 4.2)

Learning Objective: The course aims to enable students to acquire knowledge of concepts, methods and techniques of management accounting for the purpose of managerial planning, control and decision making.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Examine the conceptual framework of Management Accounting and identify the differences between various forms of accounting.
2. Analyse budgetary control system as a tool of managerial planning and control
3. Evaluate the standard costing system as a tool of managerial control.
4. Recognise the concept of marginal costing and cost-volume-profit analysis.
5. Analyse techniques of decision making.
6. Discuss the concept of responsibility accounting and performance measurement.

Syllabus of DSC-5.3

Unit 1: Introduction to Management Accounting (4 hours)
Meaning, objectives, nature and scope of management accounting, Difference between different forms of accounting- Cost, Financial and Management accounting, Cost control and Cost reduction.

Unit 2: Budgetary Control and Standard Costing Systems (18 hours)

(a) Budgeting and Budgetary Control: Concept of budget, budgeting and budgetary control; objectives, merits and limitations; Functional Budgets; Fixed and Flexible budgeting; An overview of different approaches to budgeting (Zero base budgeting, Performance budgeting and Programme budgeting)

(b) Standard Costing and Variance Analysis: Meaning of standard cost and standard costing; advantages, limitations and applications; Variance Analysis – material, labour, overheads and sales variances. Control ratios.

Unit 3: Marginal Costing (9 hours)
Concept of marginal cost and marginal costing; Absorption versus Variable Costing: Distinctive features and income determination; Cost-volume-profit analysis; Break-even Analysis-Statements, mathematical and graphical approaches; Profit-volume ratio, angle of incidence, margin of safety, key factor, determination of cost indifference point.

Unit 4: Decision Making (9 hours)
Steps in Decision making process. Concept of relevant costs. solving various short -term decision making problems using marginal costing and differential costing techniques – Profitable product mix, Acceptance or rejection of special/ export offers, Make or buy, Addition or elimination of a product line, sell or process further, operate or shut down and Pricing decisions

Unit 5: Performance Measurement (5 hours)
Responsibility Accounting: Concept, Significance, Different Responsibility Centres; Divisional Performance Measurement: Financial and Non-Financial measures;

Note: Spreadsheet may be used for doing basic calculations in Management Accounting and giving students subject related assignments for their internal assessment purposes.

Practical Exercises:
The learners are required to:

1. Discuss differences between various forms of accounting.
2. Prepare different types of budgets.
3. Apply the concept of zero base budgeting on a select firm by collecting relevant data.
4. Visit any manufacturing unit and study the relevance of marginal costing.
5. Compute variances and perform analysis.
6. Perform cost-volume-profit analysis.
7. Compute the foreign export sales price for a domestic firm engaged in manufacturing goods/services.
8. Evaluate various decision making techniques using case studies.
9. Identify the responsibility centres of a pharmaceutical industry.
10. Discuss case studies on divisional performance measurement.

Suggested Readings:

- Arora, M. N. (2019). *Management Accounting.* Delhi, India: Himalaya Publishing House.
- Goel, R. K., & Goel, I. (2019). *Concept Building Approach to Management Accounting for B.Com(Hons.),* Delhi, India: Cengage.

Discipline Specific Elective Course- 5.1 (DSE-5.1): Organisational Democracy and Industrial Relations

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE-5.1: Organisational Democracy and Industrial Relations	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course enables the learners to understand and apply the important concepts of Organisational democracy and industrial relations including trade unions, workers participation in management, collective bargaining, industrial disputes, grievance handling and various labour enactments through the pedagogy of case discussions and the practices of Indian Organisations in this context.

Learning outcomes

After completion of the course, learners will be able to:

1. Recognise organisational democracy and industrial relations in a changing environment.
2. Evaluate the effectiveness of trade unions and to analyse the legal framework of trade unions.
3. Identify the role of workers' participation in management and collective bargaining.
4. Analyse industrial disputes and implementation of its legal provisions and to evaluate the effectiveness of grievance redressal mechanism;
5. Discuss various legal enactments related to Industrial relations.

SYLLABUS OF DSE-5.1

Unit 1: Organisational Democracy and Industrial Relations: Introduction (9 hours)

Organisational Democracy: Concept, definition, nature of organisational democracy. elements, significance of organisational democracy. Industrial Relations: Concept, Nature, Objectives, Importance, Factors influencing Industrial Relations in changing Environment, Approaches to Industrial Relations.

Unit 2: Trade Union: Theoretical and Legal Framework (7 hours)

Theories of Trade Union Movement, Definition, Objectives, Registration of trade unions and Recognitions, Rights, Duties and Liabilities of registered trade union, problems of trade unions, dissolution of trade union, Factors influencing the growth of trade unions.

Unit 3: Workers' Participation and Collective Bargaining (9 hours)

Worker's participation: concept, principles, levels, objectives and importance; Strategies to make participative management more successful; Collective Bargaining: concepts, nature, Negotiations Techniques and Skills.

Unit 4: Industrial Disputes and Grievance Redressal (9 hours)

Industrial Disputes: concept, essentials of industrial dispute, classification, impact and causes. Grievance Handlings in industries: concept, meaning and nature of employees' grievance, Grievance redressal machinery in India- Preventive Machinery, Settlement Machinery: conciliation, arbitration and adjudication.

Unit 5: Other Labour Enactments (11 hours)

The Industrial Disputes Act, 1947: Important Definitions; various Authorities, Procedure, Powers and Duties of Authorities; The Factories Act, 1948: Provisions relating to Health, Safety, Welfare facilities, working hours, Employment of young persons, The Code on Wages, 2019, Minimum Wages Act 1948, Payment of Wages Act 1948 (Cover salient features only).

Note: Case studies are compulsory to develop the concept and evaluation of the students.

Exercises:

The learners are required to:

1. Discuss case studies on organisational democracy and industrial relations.
2. Evaluate the legal framework of trade unions in India.
3. Perform role play on collective bargaining situations.
4. Assess and prepare a report on the grievance redressal mechanism in India.
5. Analyse provisions under various labour enactments.

Suggested Readings:

- Sahoo, D. P. (2019). *Employee Relations Management - Texts and Cases.* Delhi, India: SAGE Publishing India.

- Mamoria, C. B., Mamoria, S., & Gankar. (2010). *Dynamics of Industrial Relations.* Delhi, India: Himalaya Publishing House.
- Monappa, A. (2012). *Industrial Relations and Labor laws.* Delhi, India: Tata McGraw Hill Edition.
- Monappa, A., Nambudiri, R., & Selvaraj P. (2012). *Industrial Relations and Labour Laws.* Delhi, India: Tata McGraw Hill Education.
- Padhi, P. K. (2019). *Industrial Relations and Labour Law.* Delhi, India: PHI Learning.
- Sharma, J. P. (2018). *Simplified Approach to Labour Laws.* Delhi, India: Bharat Law House.
- Sinha, P. R. N., Sinha, I. B., & Shekhar, S. P. (2017). I*ndustrial Relations, Trade Unions and Labour Legislation.* Delhi, India: Pearson Education.
- Srivastava, S. C. (2009). *Industrial Relations and Labour Laws.* Delhi, India: Vikas Publishing House.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Elective Course- 5.2 (DSE-5.2): International Finance

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE-5.2: International Finance	4	3	1	0	Pass in Class XII with Mathematics/Accountancy	Studied Investment Management (DSE-4.2)

Learning Objectives

The course aims to familiarize the students with the principles and practice of international finance.

Learning outcomes

After completion of the course, learners will be able to:

1. Describe the International Monetary System and the nature and scope of international finance.
2. Discuss various aspects of Foreign Exchange Markets.

3. Analyse the factors affecting the exchange rates.
4. Describe International Financial Markets and Instruments.
5. Evaluate various kinds of risks due to fluctuation in the exchange rate and management of these risks.

SYLLABUS OF DSE-5.2

Unit 1: International Financial Environment (9 hours)
Evolution of the International Monetary System, Bimetallism, Gold Standard, Bretton Woods System, Flexible Exchange Rate Regime and Current Exchange Rate Arrangements. Globalization and Multinational Enterprise. Issues in international finance.

Unit 2: Foreign Exchange Markets (9 hours)
Spot Markets, Spot Rate Quotations, Trading in Spot Markets, Cross Exchange Rates. Forward Markets: Concept of Forward Rates, Long and Short Forward Positions, Forward Premium and Discounts. Arbitrage, Hedging and Speculation.

Unit 3: Exchange Rate Determination (9 hours)
Factors affecting Exchange Rate, Relative Inflation Rate, Relative Interest Rate, Relative Income Levels, Government Controls, expectations, etc. Theories of Exchange Rate (Purchasing Power Parity, Interest Rate Parity and Fisher's Effect).

Unit 4: International Financial Markets and Foreign Exchange Risk Management (9 hours)
Foreign Portfolio Investment, International Bond & Equity market, GDR, ADR. International Financial Instruments, Foreign Bonds, Eurobonds and Global Bonds. Floating rate Notes, Zero-coupon Bonds. Types of risk exposure - Transaction exposure, Economic exposure and Translation exposure, Measurement of risk exposure. Management of currency risk using currency forwards and futures, currency options and currency swaps. Interest Rate Risk and its management.

Unit 5: International Capital Budgeting (9 hours)
Cross border investment decision: Types and issues, Greenfield investment vs. cross border M&As. Estimation of cash flows from cross border investment projects. Risks in cross border investment decision-currency risk, political risk, country risk, inflation risk etc. Valuation techniques by incorporating risk and other factors.

Exercises:
The learners are required to:
1. Study RBI and other websites to evaluate the impact of change in exchange rates.
2. Use various software to assess the impact of different factors on exchange rates,
3. Calculate cross exchange rate to find arbitrage opportunities.
4. Select the appropriate international financial instruments as per investment needs.
5. Select the appropriate instrument for managing the risk.

6. Study cross- border mergers and acquisitions.

General Elective Course- 5.2 (GE-5.2): Project Management

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE-5.2 Project Management	4	3	1	0	Pass in Class XII with Mathematics/Accountancy	NIL

Learning Objective: The course aims to enable the learners to evolve a suitable framework for the preparation, appraisal, monitoring, and control of projects undertaken in an organisation.

Learning Outcomes: After completion of the course, learners will be able to:

1. Discuss the concept and attributes of projects, project management system, process and its principles.

2. Assess technical feasibility, marketing feasibility and commercial viability; using NPV, and further to understand tax and legal aspects of a project;

3. Develop schedule for a specific project and its appraisal using various techniques;

4. Calculate project duration and assess project cost;

5. Evaluate project management in terms of risk and performance.

SYLLABUS of GE-5.2

Unit 1: Introduction (5 hours)

Concept and attributes of Project, Project Management Information System, Project Management Process and Principles, Role of Project Manager, Relationship between Project Manager and Line Manager, Project Stakeholder Analysis, Identification of Investment opportunities, Project life cycle, Project Planning, Monitoring and Control of Investment Projects, Pre-Feasibility study, Identify common sources of conflict within a project environment.

Unit 2: Project Preparation and Budgeting (11 hours)

Technical Feasibility, Marketing Feasibility, Financial Planning: Estimation of Costs and Funds (including sources of funds), Loan Syndication for the Projects, Demand Analysis and Commercial Viability (brief introduction to NPV), Project budget, Collaboration Arrangements, Tax considerations and legal aspects.

Unit 3: Project Scheduling and Appraisal (9 hours)

Decomposition of work into activities, determining activity-time duration. Business Criterion of Growth, Liquidity and Profitability, Social Cost Benefit Analysis in Public and Private Sector, Investment Criterion and Choice of techniques, Estimation of Shadow prices and Social discount rate.

Unit 4: Project Planning Techniques (11 hours)

Determine project duration through critical path analysis using PERT & CPM techniques. Resource allocations to activities. Cost and Time Management issues in Project Planning and Management.

Unit 5: Project Risk and Performance Assessment (9 hours)

Project Risk Management- Identification, Analysis and Reduction, Project quality management, Project Performance Measurement and Evaluation, Project Report, Project Closure and Audit.

Exercises:

The learners are required to:

1. Examine the project running in the local area and list the activities required for project completion.

2. Develop time estimates for various activities.

3. Evaluate the critical activities of the project using CPM technique.

4. Find out the delays in the activities, if any, and their impact on cost and project completion.

5. Discuss PERT and CPM techniques with help of any corporate example.

Suggested Readings:

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

General Elective Course- 5.3 (GE-5.3): Digital Marketing

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE-5.3 Digital Marketing	4	3	1	0	Pass in Class XII	Studied Brand Management (GE-4.3)

Learning Objective: The course aims to provide knowledge regarding the concepts, tools, techniques and relevance of digital marketing in the current scenario. It also enables the learners to learn the practical application of the Digital Marketing tools and the ethical and legal issues involved therein.

Learning Outcomes: After completion of course, learners will be able to:

1. Identify and assess the impact of digital technology in transforming the business environment and also the customer journey.
2. Describe the functioning of the digital marketers and how it is different than the traditional marketing practices
3. Discuss the significance of digital marketing tools, such as, SEO, Social media platforms, Online advertising, Blogging etc.
4. Analyse ethical considerations and the regulatory framework of digital marketing in India.
5. Describe the various ethical and legal issues in digital marketing.

SYLLABUS OF GE-5.3

Unit 1: Introduction (9 hours)

Concept, Scope and Importance of Digital Marketing, Traditional Marketing vs Digital Marketing, Challenges and opportunities for Digital Marketers, Digital Marketing landscape: an overview of Indian Markets.

Unit 2: Digital Marketing Management (9 hours)

Digital marketing-mix, Segmentation, Targeting, Differentiation and Positioning: Concept, Levels, and strategies in digital environment, Digital Technology and Customer Relationship Management, Digital Consumers and their Buying Decision process.

Unit 3: Digital Marketing Presence (9 hours)

Concept and role of Internet in Marketing, Online marketing Domains, The P.O.E.S.M. Framework, Website design and domain name branding, Search Engine Optimization stages, Types of traffic, Online Advertising: Types, formats, requisites of a good online advertisement, Email marketing: types and strategies.

Unit 4: Interactive Marketing (9 hours)

Interactive Marketing: Concept and options, Social media marketing: concept and tools, Online Communities and Social networks, Blogging: types and role, Video marketing: tools and techniques, Mobile marketing tools, PPC marketing, Payment options and Gateways.

Unit 5: Ethical and Legal Issues (9 hours)

Ethical Issues and Legal Challenges in digital marketing, Regulatory framework for digital marketing in India.

Exercises:

The learners are required to:

1. Discuss marketing strategies of Companies who have succeeded in marketing their products through online platforms.

2. Create a hypothetical online venture and discuss its marketing and advertising strategies.

3. Design an advertising campaign and run it on various social media handles: Facebook, Instagram, Twitter, LinkedIn, Snap Chat etc.

4. Implement various tools with the help of free softwares available online, such as Google Adword, Google Analytics etc.

5. Analyze the ethical considerations and the regulatory framework of digital marketing from the official website of Government of India.

6. Discuss various ethical and legal issues in digital marketing with the help of case study.

Suggested Readings:

General Elective Course- 5.4 (GE-5.4): Ethics and Governance

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE-5.4 Ethics and Governance	4	3	1	0	Pass in Class XII	NIL

Learning Objective: This course is designed keeping in view the dominant role that modern corporations play in creating desirable economic, social and environmental outcomes for the society. As corporate governance is intertwined with social responsibility, it requires a multi-disciplinary approach to understand the associated issues and challenges. Therefore, the course outlines the key theoretical and practical issues underpinning the study of both corporate governance (CG) and corporate social responsibility (CSR) in an integrated fashion.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Evaluate and analyse the concepts, tools and theories of ethics and the issues in ethics.
2. Recognize the essence of ethics in business.
3. Develop decision-making skills with regard to ethical governance.
4. Recognise major aspects of corporate governance principles and various theories and systems of corporate governance.
5. Recognise opportunities for reflection on the roles and responsibilities of directors towards the shareholders and other stakeholders covering both theory and relevant practices.
6. Discuss emerging issues and challenges in corporate governance.

SYLLABUS OF GE-5.4

Unit 1: Introduction to Ethics (9 hours)
Concept of moral reasoning and ethics; Contributions of moral thinkers and philosophers to the concepts of morality; Approaches to Moral reasoning; Essence of Ethics, Dimensions of Ethics; Human Values; Ethical concerns and dilemmas

Unit 2: Business Ethics (9 hours)
Concept; Principles; Theories of Business Ethics; Ethical Organisations, Code of Ethics; Ethical issues in business

Unit 3: Governance of Business Entities (9 hours)
The philosophical basis of governance; Corporate Governance- Meaning and significance; Conceptual framework; Corporate governance systems across the world; Corporate governance in India.

Unit 4: Corporate Frauds (9 hours)
Cases of corporate frauds and scams- Enron, Lehman Brothers; Satyam Computer Services; PNB Heist; IL&FS Fraud, ABG Shipyards, Yes Bank; Governance issues and challenges

Unit 5: Recent Issues and Challenges of Governance (9 hours)
Insider Trading; Whistle Blowing; Shareholders Activism; Class Action suits; Gender Diversity in Boards; Governance of Family entities; Governance of multi-national corporations.

Exercises:
The learners are required to:

1. Narrate the cases on ethics and values.
2. Perform simulation exercises to present ethics and ethical dilemmas.
3. Discuss corporate governance concerns highlighted in print and virtual media.
4. Organise brainstorming and discussion sessions on corporate frauds.
5. Project on critical analysis of recent cases on whistleblowing/insider trading/class action suits.
6. Interpret the various emerging issues and challenges in corporate governance with the help of case study.

Suggested Readings:

- Crane, A., Matten, D., Glozer, S., & Spence, L. J. (2019). *Business ethics: Managing corporate citizenship and sustainability in the age of globalization.* Oxford, United Kingdom: Oxford University Press.
- Monks, R. A. G., & Minow, N. (2011). *Corporate governance*. Hoboken, NJ, United States: John Wiley & Sons.
- Reddy, N. K., & Ajmera, S. (2015). *Ethics integrity and aptitude: For Civil Services Main Examination.* Delhi, India: McGraw Hill Education (India) Private Limited.
- Sharma, J. P. (2013). *Corporate Governance, Business Ethics and CSR:(with Case Studies and Major Corporate Scandals).* Delhi, India: Ane Books Pvt.

Additional Readings:

- Mallin, C. A. (2019). *Corporate governance.* Oxford, United Kingdom: Oxford University Press.

- Rani, D. G., & Mishra, R. K. (2017). *Corporate governance: Theory and practice.* Delhi, India: Excel Books India.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

SEMESTER-VI
B.Com (Hons.)

DSC- 6.1 : BUSINESS ANALYTICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSC -6.1: Business Analytics	4	2	0	2	Pass in Class XII with Mathematics/Accountancy	Studied Business Statistics (DSC-4.1)

Learning Objectives

This course aims to introduce the learners to business intelligence and analytics which includes describing business data, analysing the data using various statistical tools for creating predictive models and making inferences for solving business problems and for providing assistance in business decision making.

Learning outcomes

After completion of the course, the learners will be able to:

1. Describe skills for computation and aggregation of data using spreadsheets.
2. Analyse data with the help of pivot tables and pivot charts.
3. Analyse data using R packages and interpret the results.
4. Compare linear regression models using spreadsheet & r and interpret the results.
5. Examine textual data analysis using R

SYLLABUS OF DSC-6.1

Unit 1: Introduction (3 hours)

Data and Data Science; Data analytics and data analysis, Classification of Analytics, Application of analytics in business, Types of data: nominal, ordinal, scale; Big Data and its characteristics, Applications of Big data. Challenges in data analytics.

Unit 2: Data Preparation, Summarisation and Visualisation Using spreadsheet (6 hours)

Data Preparation and Cleaning, Sort and filter, Conditional formatting, Text to Column, Removing Duplicates, Data Validation, identifying outliers in the data, covariance and correlation matrix, Moving Averages, Finding the missing value from data; Summarisation; Visualisation: scatter plots, line charts, histogram, etc., Pivot Tables, pivot charts and interactive dashboards.

Unit 3: Getting started with R (6 hours)
Introduction to R, Advantages of R, Installation of R Packages, Importing data from spreadsheet files, Commands and Syntax, Packages and Libraries, Data Structures in R - Vectors, Matrices, Arrays, Lists, Factors, Data Frames, Conditionals and Control Flows, Loops, Functions, and Apply family.

Unit 4:Descriptive Statistics Using R (6 hours)
Importing Data file; Data visualisation using charts: histograms, bar charts, box plots, line graphs, scatter plots. etc; Data description: Measure of Central Tendency, Measure of Dispersion, Relationship between variables: Covariance, Correlation and coefficient of determination.

Unit 5: Predictive and Textual Analytics (9 hours)
Simple Linear Regression models; Confidence & Prediction intervals; Multiple Linear Regression; Interpretation of Regression Coefficients; heteroscedasticity; multi-collinearity.
Basics of textual data analysis, significance, application, and challenges. Introduction to Textual Analysis using R. Methods and Techniques of textual analysis: Text Mining, Categorization and Sentiment Analysis.

Note:

The General-Purpose Software referred in this course will be notified by the University Departments every three years. If the specific features, referred to in the detailed course above, are not available in that software, to that extent it will be deemed to have been modified.

Practical Exercises (60 hours):
The learners are required to:

1. Showcase their understanding of the basics of Spreadsheet: Organizing data with Spreadsheet – Performing simple computations and aggregations using Spreadsheet - Working with Summing and other Reporting functions in Spreadsheet - Working with pivot tables and charts -using Spreadsheet for Data Analytics: Power Query - Power Pivot - Power view - Power Map - Building tips – Display tips - Keyboard shortcuts – Mouse shortcuts - Standardized layouts - Understanding table-based and spreadsheet-based layouts.

2. Showcase their understanding of data cleansing techniques using External Data – Searching and Combining Data with Power Query: Getting started with Power Query - Know the Environment tabs and toolbars - Access new or existing reports - Importing and combining data from databases, web, files - Splitting and aggregating data - Discovering and Analyzing Data with Power Pivot: Database concepts - Loading Data into Power Pivot - using Power Query and Power map add-ins - Designing Pivot Table reports - Filtering data – Creating Custom functions and formulas - Formatting Pivot Tables - Managing Power Pivot Data - Setting Connection properties - Managing Data sources - Configuring Pivot Table Options, Preparation of Histograms - Pareto charts – Boxplots - Treemap and Sunburst charts.

3. Create Linear Regression Models using Spreadsheet; Interpretation of results. Applying tests for heteroscedasticity and multicollinearity.

4. Read datasets into R - Export data from R - Manipulate and Process Data in R -use functions and packages in R - Demonstrate with a Case Study to perform basic analytics using R.

5. Use R for analysing textual data; Data loading into Python; Pre-processing and Text Clean up; Generating a TF-IDF (Term Frequency Inverse Document Frequency) Matrix; Data Clustering; visualisation & Reporting.

Suggested Readings:

- Alexander, M., Decker, J., & Wehbe, B. (2014). *Microsoft business intelligence tools for spreadsheet analysis.* New Jersey, United States: Wiley.

- Rao, P. H. (2013). *Business analytics—an application focus.* Delhi, India: PHI Learning Private Limited.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Core Course- 6.2 (DSC-6.2): Corporate Governance

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSC-6.2: Corporate Governance	4	3	1	0	Pass in Class XII with Mathematics/ Accountancy	NIL

Learning Objectives

The course aims to develop critical thinking ability and provide knowledge of corporate governance, its procedures, techniques in accordance with current legal requirements and professional standards.

Learning outcomes

After completion of the course, learners will be able to:

1. Describe the concept and significance of corporate governance in a business setup.
2. Analyse the role of the board of directors.
3. Discuss important dimensions in corporate governance.
4. Analyse global corporate failures; understand international codes and its implications.
5. Discuss corporate governance regulatory framework in India.
6. Assess and analyse the problems of corporate governance in Indian Inc.

SYLLABUS OF DSC-6.2

Unit 1: Conceptual Framework of Corporate Governance (9 hours)

Corporate Governance: Meaning, significance and principles; Management and corporate governance; Theories of Corporate Governance: Agency Theory, Stewardship theory, Stakeholder Theory, Resource Dependency Theory, Managerial Hegemony Theory; Models of Corporate Governance; Art of Governance as per Kautilya's Arthashastra.

Unit 2: Recent Issues and Challenges of Corporate Governance (9 hours)

Board structure and Directors; Role of Board; Board Committees and their functions; Insider Trading; Whistle Blowing; Shareholders Activism; Role of institutional investors; Class Action suits. CSR and Corporate Governance. Concept of Gandhian Trusteeship.

Unit 3: Global Corporate Failures and International Codes (9 hours)

BCCI (United Kingdom), Maxwell (United Kingdom), Enron (USA), World.Com (USA), Vivendi (France), Lehman Brothers; Sir Adrian Cadbury Committee 1992, SOX 2002, OECD Principles of Corporate Governance.

Unit 4: Corporate Governance Regulatory Framework in India (9 hours)

Regulatory framework in India: Kumar Mangalam Birla (1999), NR Narayana Murthy Committee (2005), Relevant provisions of Companies Act, 2013, SEBI: Listing Obligations and Disclosure Requirements Regulations (LODR), 2015 and Uday Kotak Committee (2017).

Unit 5: Corporate Failures and Scams in India (9 hours)

Satyam Computer Services Ltd, Kingfisher Airlines, PNB Heist, IL&FS Group Crisis; ICICI Bank, Yes Bank; Common Governance Problems in various corporate failures in India and abroad.

Exercises:
The learners are required to:

1. Identify and analyse corporate governance models followed by companies incorporated in India and abroad.
2. Analyse Board composition and Board committees of different companies; Analyse cases on the topic of Whistle blowing/ Shareholder activism/ Insider trading.
3. Critically analyse global corporate governance failure and identify corporate governance issues therein.
4. Identify corporate governance issues and concerns raised in context of Indian companies and their implications (from published sources newspapers or websites).
5. Comment on the latest corporate governance regulatory framework in India.
6. Critically analyse major corporate governance failure to suggest common governance problems in Indian context.

Suggested Readings:

- *A handbook of corporate governance*. (2022). (3rd ed.). Institute of Directors. Delhi, India: IOD Publishing.
- Das, S. C. (2021). *Corporate governance in India: An evaluation. (4th ed.).* Delhi, India: PHI Learning Pvt. Ltd..

- Sharma, J. P. (2018). *Corporate governance, business ethics and csr: with case studies and major corporate scandals.* Delhi, India: Ane Books.
- Soloman, J. (2021). *Corporate governance and accountability*. (5th ed.). United States: Wiley
- Tricker, B., & Tricker, R. I. (2015). *Corporate governance: principles, policies, and practices.* United States: Oxford University Press.
- Tricker, B. (2020). *Elements in corporate governance*. United Kingdom: Cambridge University Press.

Additional Resources

- Mallin, C. A. (2019). *Corporate governance.* Oxford, United Kingdom: Oxford University Press.
- Rani, D. G., & Mishra, R. K. (2017). *Corporate governance: theory and practice.* India: Excel Books.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Latest amendments to the regulations shall be referred.

Discipline Specific Core Course- 6.3 (DSC-6.3): Goods and Services Tax (GST) and Customs Law

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSC 6.3 – Goods & Services Tax (GST) and Customs Law	4	3	1	0	Pass in Class XII with Mathematics/Accountancy	Nil

Objective:

The course aims to impart knowledge of principles and provisions of GST and Customs Law, the important legislation dealing with the indirect tax system in India; and to enable the students to apply the same practically.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Analyse the rationale of Goods and Services Tax (GST), constitutional amendment carried out to install GST in India and comprehend the composition and working of GST council
2. Interpret the meaning of supply under GST law, differentiate between intra-state and inter-state supply, provisions related to place of supply, time of supply and compute the value of supply.
3. Evaluate the utilization of input tax credit and the provisions of reverse charge mechanism.
4. Analyse various returns under GST and payment of taxes.
5. Evaluate the concepts of Customs Act, various custom duties and computation of the

assessable value for charging customs duty.

SYLLABUS OF DSC-6.3

Unit 1: Structure, Registration and Exemptions (9 hours)
Constitutional framework of indirect taxes before GST; Rationale for GST; Structure of GST (SGST, CGST, UTGST & IGST); GST Council; GST Network; State compensation mechanism.
Registration; Exemptions from GST.

Unit 2: Levy and Collection of GST (16 hours)
Scope of 'Supply'; Nature of supply: Inter-State, Intra-State; Classification of goods and services.
Composite and Mixed supplies; Composition levy scheme; Place of supply; Time of supply; Value of supply.

Unit 3: Input Tax Credit and Reverse Charge Mechanism (9 hours)
Eligible and ineligible input tax credit; Apportionments of credit and blocked credits; Tax credit in respect of capital goods; Availability of tax credit in special circumstances; Reverse Charge Mechanism.

Unit 4: Tax Invoice, Returns and Payment of Tax (7 hours)
Tax Invoice, Credit and debit notes, and e-Way bills; Returns; Payment of taxes; Taxability of e-Commerce.

Unit 5: Customs Law (4 hours)
Basic concepts, Territorial waters and High seas; Types of custom duties; Valuation.

Note: In case of any subsequent notifications/amendments regarding GST or customs law by the government, the syllabus would be updated accordingly.

Exercises:
The learners are required to:

1. Discuss relevant provisions of the CGST Act, IGST Act, GST (Compensation to States) Act and Constitution (One Hundred and First Amendment) Act from the official website of Government of India.
2. Refer relevant notifications and circulars from the official website of Government of India to differentiate between intra-state and inter-state supply and provisions related to place of supply.
3. Illustrate the utilization of input tax credit and the provisions of reverse charge mechanism.
4. Identify the eligible and ineligible tax credit under various circumstances.
5. Study cases related to utilization of input tax credit.
6. Enlist the process of returns under GST and payment of taxes.
7. Illustrate computation of the assessable value for charging customs duty with hands-on exercise.
8. Gather information available under the heading 'Popular help topics' on the official website of the Government of India.

Suggested Readings:

Discipline Specific Elective Course- 6.1 (DSE-6.1): Learning and Development in Organisations

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE-6.1: Learning and Development in Organisations	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims at equipping the learners with the concept and practice of Learning and Development in the modern organisational setting through the pedagogy of case study, counselling, discussions and recent experiences.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Analyse the various learning strategies used in real situations.
2. Compare individual development in terms of intelligence, creativity and personality.
3. Develop the learning needs to create a learning environment.
4. Demonstrate various techniques for enhancing decision–making and interpersonal skills.
5. Examine the need and importance of guidance & counselling.

SYLLABUS OF DSE-6.1

Unit 1: Introduction (7 hours)

Learning- concept, characteristics, principles, types, learning theories; Classical conditioning, operant conditioning, cognitive, observational and social learning; Learning strategies and constructivist approach to learning, learning in a digital world.

Unit 2: Individual Learning and Development (11 hours)

Individual development: Meaning and stages**;** Role of creativity in learning; process and measures of creativity; Personality- concept and determinants, approaches of development of personality; Intelligence – concept, measurement of intelligence; emotional intelligence and its relevance in learning and development of an individual.

Unit 3: Developing Learning Environment (11 hours)

Overview of learning methodologies- logic and process of learning; Principles of learning, Learning process, learning curve, learning management system; Criteria for method selection; skills of an effective trainer; Computer aided instructions- distance learning, e-learning; technologies convergence and multimedia environment.

Unit 4: Development Methodologies (11 hours)

Development techniques for enhancing decision–making and interpersonal skills, case-study, in-basket exercise, special projects, action learning, syndicate work, games, action maze, role play, experience learning, discovery learning, brainstorming, position rotation, team building, and sensitivity training.

Unit 5: Guidance and Counselling (5 hours)

Guidance: meaning, needs, principles, types, importance; counselling; meaning, nature objectives and importance, techniques of counselling; directive, nondirective, eclectic, ethics in counselling, effect of guidance and counselling on individual learning and development.

Exercises:
The learners are required to:

1. Analyse and interpret case study of any Indian organisations learning strategies.
2. Participate in simulation exercises in the classroom to conduct a learning assessment of oneself thereby preparing a questionnaire on learning and development of an individual.
3. Develop a learning and development module on the basis of selected strategies in the previoUnited States exercise.
4. To compare different learning requirements of individuals in the organisations as per their individual learning abilities.
5. To restructure the strategies after assessing the learning and development report.

Suggested Readings:

Discipline Specific Elective Course- 6.2 (DSE-6.2): Investment Banking and Financial Services

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE-6.2: Investment Banking and Financial Services	4	3	1	0	Pass in Class XII with Mathematics/Accountancy	Studied Financial Markets and Institutions (DSE-3.2)

Learning Objectives

The course aims to provide students with necessary theoretical and conceptual understanding of investment banking and financial services.

Learning Outcomes

After completion of the course, students will be able to:

1. Evaluate investment banking evolution, various activities and structure.

2. Analyse the process of issue management.
3. Examine role and functions of Mutual funds, Pension fund, Insurance and Leasing.
4. Examine role and functions of NBFC, Credit rating, Financial counselling, Portfolio management service, securitization, factoring and forfeiting.
5. Analyse process of Mergers and Acquisitions, its valuation techniques and methods of corporate restructuring.

SYLLABUS OF DSE-6.2

Unit 1 Investment Banking (9 hours)

Investment Banking: Introduction: Concept, Importance; Commercial Banks vs. Investment banks; Functions of Investment Banks; Types of Investment banking operations; Investment Banking in India – Evolution, characteristics; Recent Developments and the way ahead; Structure of Investment Banks; SEBI guidelines for Merchant Bankers, Pre-issue and Post-issue regulatory framework.

Unit 2 Issue Management (9 hours)

Issue Management**:** Emergence and role of Capital markets, Types of Issue: Public Issue, Book building, Green Shoe option, Private placements, Preferential allotment, Rights Issue, Bonus Issue, Depository Receipts; Process of Issue Management; Lead Managers – Duties and responsibilities of Lead Managers; Underwriting- concept and types; Issue management intermediaries; De-mat account – Concept and importance; Depository System – NSDL, CDSL.

Unit 3 Financial Services -I (9 hours)

Financial Services -I: Leasing – Concept and types of leasing; Venture Capital – various steps in venture financing; Start-ups – Concept and financing; Mutual Funds - Role, Types of Mutual Funds; Pension Funds; Insurance- Classification, Principles of insurance; An Overview of Regulatory Framework – RBI, SEBI, IRDA, PFRDA.

Unit 4 Financial Services -II (9 hours)

Financial Services -II: Banking products and services – Recent trends; Innovations in banking sector; NBFCs - Concept, Commercial Banks vs. NBFCs, Services provided by NBFCs; Housing Finance- Concept and Types, Housing Finance institutions; Credit Rating- Concept and significance, Credit Rating Agencies; Factoring and Forfaiting; Securitisation – concept, securitisation as a funding mechanism; Financial Counselling; Portfolio management services.

Unit 5 Mergers and Acquisitions (9 hours)

Mergers and Acquisitions: Process of M&A, Role of Investment Bankers in M&A; Rationale and considerations of M&A; Financial Evaluation of M&A; Valuation techniques – Comparable companies analysis, Precedent Transaction analysis, Discounted Cash Flow Analysis, Leveraged Buyouts; Takeover defenses; Corporate Restructuring – Methods of corporate restructuring; Challenges: Legal, ethical and governance issues in Investment Banking.

Exercises:

The learners are required to:

1. Compile various forms and documents required to be registered as a Merchant Banker.
2. Compile various forms and documents required for pre-issue and post-issue management of Equity shares.
3. Make a comparison of 1-year and 3-year holding period return offered by two mutual funds belonging to the same risk class
4. Compare credit rating of all the debt securities issued by any two companies. Analyse its effect on the credit worthiness of the company in terms of coupon rate and yield.
5. Compile various incidents where different companies have successfully defended a hostile takeover bid.

Discipline Specific Elective Course- 6.3 (DSE-6.3): Advertising

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE 6.3-Advertising	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The objective of this paper is to familiarise the students with concepts and techniques of advertising used in marketing.

Learning Outcomes

After completion of the course, learners will be able to:

1. Discuss communication objectives behind advertising of various products and services.
2. Describe advertising appeals, elements of print and broadcast advertisement.
3. Elucidate various advertising and media elements in the advertising decisions.
4. Discuss advertising effectiveness.
5. Explain various organizational arrangements and examine the ethical and legal issues of advertising.

SYLLABUS OF DSE-6.3

Unit 1: Introduction to Advertising (9 hours)

Communication Process-basic and elements; Communication Response Hierarchy Models: AIDA Model, Hierarchy of Effects Model, Advertising: significance, types and objectives; DAGMAR Approach; Target audience selection – approaches and basis; Setting of advertising budget: determinants and major methods. Integrated marketing communication- meaning and process.

Unit 2: Advertising Message (9 hours)

Advertising appeals – types; Advertising Copy - Elements of print and broadcast advertisements

Unit 3: Advertising Media Decisions (9 hours)

Major media types: merits and demerits; Factors influencing media choice; Media scheduling-types.

Unit 4: Advertising: Effectiveness (9 hours)

Rationale of Measuring Advertising Effectiveness: Evaluating Communication and Sales effects; Pre and Post-testing techniques

Unit 5: Organisational Arrangements (9 hours)

Advertising Agency: Role, types and selection; Agency remuneration - methods

Social, ethical and legal aspects of advertising in India; Role of Advertising Standards Council of India (ASCI), Recent developments and issues in Advertising

Exercises:

The learners are required to:

1. Discuss communication objectives behind advertising of any product or service.
2. Identify advertising appeals used in any advertisement.
3. Identify various media elements in advertising decisions.
4. Discuss a case study on advertising effectiveness.
5. Present a report on the role of ASCI.
6. Comment on various ethical and legal issues in advertising.
7. Perform a content analysis of various advertising campaigns to:
    a. Identify the objective of an advertisement forming part of an advertising campaign.
    b. Find out the target audience of a campaign.
    c. Prepare a report on various media options used in a campaign.
    d. Prepare a report on message strategy and copy elements used in the campaign.
8. Develop an advertising campaign for any product or service.

Discipline Specific Elective Course- 6.4 (DSE-6.4): Industrial Relations and Labour Laws

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE 6.4- Industrial Relations and Labour Laws	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to enable the students to learn the concepts of industrial relations including trade unions, discipline, grievance redressal and various labour laws/ code.

Learning outcomes

After completion of the course, learners will be able to:

1. Analyse the evolution of ind ustrial relations and its significance in the managerial world.
2. Evaluate the significance of international dimensions of ind ustrial relations in a globalized world.
3. Imbibe how to interact, negotiate and transact with trade unions.
4. Design and understand the discipline measures and grievance mechanisms.
5. Analyse the legal structure provided for handling the industrial disputes.

SYLLABUS OF DSE-6.4

Unit 1: Industrial Relations (IR) (11 hours)

Concept of Industrial Relations; Nature of Industrial Relations; Objectives of IR; Factors affecting IR in changing Environment, Evolution of IR in India; Role of State; Trade Union; Employers' Organisation; Human Resource Management and IR; Concept of GIG Economy and ramifications for industrial relations.

Unit 2: International Dimensions of Ind ustrial Relations (6 hours)
Role of ILO in Ind ustrial Relations: Adoption of conventions and recommendations, Influence on Indian labour legislation, Impact of globalization on IR.

Unit 3: Trade Union (11 hours)
Origin and growth, Unions in the era of liberalisation; Factors Affecting Growth of Trade Unions in India, Multiplicity & Recognition of Trade Unions; Major Provisions of Trade Union Law.

Unit 4: Discipline and Grievance Redressal (6 hours)
Discipline: Causes of indiscipline, Maintenance of discipline, Misconduct, Highlights of domestic enquiries; Labour turnover; Absenteeism; Grievance: Meaning and Grievance redressal machinery in India; Salient features of Industrial Employment Standing orders.

Unit 5: Industrial Disputes (11 hours)
Definitions of Industry, and Industrial Dispute; Procedure, Powers and Duties of Authorities for resolution of disputes; Strikes and Lockouts; Provisions relating to Layoff, Retrenchment, and Closure.

Exercises:
The learners are required to:

1. Examine various factors having bearing on industrial relations.
2. Analyse the ratification of ILO conventions by different countries.
3. Enlist the process of registering a trade union.
4. Study the Grievance redressal mechanism of any business unit.
5. Identify the recently reported industrial dispute in India in large corporate or MNC's having factories in India, and analyse latest case laws related to industrial disputes.

Suggested Readings:

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

From the date of implementation of labour codes, this syllabus shall be disseminated as per Industrial Relations code wherever applicable

Discipline Specific Elective Course- 6.5 (DSE-6.5): International Monetary and Financial Environment

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE 6.5 – International Monetary and Financial Environment	4	3	1	0	Pass in Class XII with Mathematics/Accountancy	NIL

Learning Objectives

The course aims to introduce learners to the international monetary and financial environment. Learners are also expected to understand the basic features of the international monetary system, foreign exchange market and exchange rate risk. In addition, the course creates awareness about international financial markets and instruments.

Learning outcomes

After completion of the course, learners will be able to:

1. Demonstrate an understanding of the international monetary system and balance of payments
2. Infer the importance of international finance in global context.
3. Analyse the factors affecting exchange rates and the inter linkages among them.
4. Summarize the evolution and spread of international financial markets and the implications of globalized finance.
5. Demonstrate how the international financial market operates and the inherent foreign exchange risk involved in it.
6. Evaluate and compare different types of international financial instruments.

SYLLABUS OF DSE – 6.5

Unit 1:International Monetary System (9 hours)
Overview of International Monetary System: evolution, Gold Standard, Bretton Woods system, the floating exchange rate regime; types of exchange rate systems; international agencies regulating and facilitating international financial flows: IMF, World Bank Group and its institutions, Bank for International Settlements,
Balance of Payments (BOP): concept, components of BOP, factors affecting BOP, BOP-equilibrium and disequilibrium.

Unit 2:Foreign Exchange Markets and Exchange Rate Determination (9 hours)
Foreign exchange markets: characteristics, functions, structure and participants; factors affecting exchange rate: relative inflation rates, relative interest rates, relative income levels, government controls, current account deficit, currency speculation and expectations, public debt, political stability and economic performance. Government intervention and influence on exchange rates.
Theories of exchange rate determination: Purchasing Power Parity; Interest Rate Parity, International Fisher effect

Unit 3:Foreign Exchange Derivatives (9 hours)
Spot market, spot rate quotations, bid-ask spreads, trading in spot markets, cross exchange rates; trading in forward markets, long and short forward positions, forwards premium and discount; arbitrage, hedging and speculation.

Unit 4:Foreign Exchange Risk Management (9 hours)
Types of foreign exchange risk: transaction exposure, translation exposure, economic exposure; hedging against foreign exchange exposure; Forwards market, Futures market and Options market; country risk analysis.

Unit 5:International Financial Markets and Instruments (9 hours)
Foreign Portfolio Investment: International bond and equity market, GDRs, ADRs, cross-listing of shares; global registered shares; international financial instruments: Foreign bonds, Eurobonds, Global Bonds, Floating rate bonds, Zero coupon Bonds; International Money Markets.

Exercises:
The learners are required to:

1. Illustrate and explain the direction of India's foreign trade and investment flows through an analysis of Balance of payments over a period of last five years.
2. Do practical questions on working of foreign exchange quotations
3. Conduct an inter-country comparison to understand the factors affecting exchange rates under different exchange rate systems
4. Explain through examples how companies use currency derivatives to minimise the risk.
5. Examine the market conditions under which companies use foreign currency instruments to raise funds

Suggested Readings:

Discipline Specific Elective Course- 6.6 (DSE-6.6): Business Research Methodology

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE -6.6 – Business Research Methodology	4	3	0	1	Pass in Class XII with Mathematics/Accountancy	NIL

Learning Objectives

The course aims to inculcate research aptitude among the learners and equip them with knowledge and skills required to successfully undertake various steps in the research process.

Learning outcomes

After completion of the course the learners will be able to:

1. Analyse research concepts, its types and steps in the research process.
2. Formulate research problems and assimilate various types of research design.
3. Create scales, sampling techniques and design data collection tools.
4. Recognise various techniques of data analysis and interpretation.
5. Prepare a complete research report in appropriate format.

SYLLABUS OF DSE-6.6

Unit 1: Introduction (9 hours)

Meaning and Scope of Research; Application of research in Business; Types of Research- qualitative, quantitative, longitudinal, cross-sectional, fundamental, applied, conceptual and empirical; Characteristics of Good Research; Steps in Research Process; Terminologies of research- Concept, Construct, Variables, Proposition and Hypothesis. Theory and Model; Literature Review and Formulation of Research Question; Philosophies of Research; Induction and Deduction Approach.

Unit 2: Research Design (9 hours)

Research Design- Meaning and Characteristics; Types of Research Design- Exploratory, Descriptive and Experimental. Meaning, Examples and Characteristics of Exploratory Research Design. Methods of Exploratory Research Design. Steps in Exploratory Research. Meaning,

Characteristics and Methods of Descriptive Research Design with examples. Meaning and Types of Experimental Research Design.

Unit 3: Data Collection (9 hours)
Measurement and Scaling; Primary scales of Measurement (Nominal, Ordinal, Interval and Ratio). Scales for Measurements of Constructs- Likert, Semantic Differential Scale and Staple; Reliability and Validity; Meaning and Sources of Primary and Secondary Data; Questionnaire Design (also using online tools); Census and Survey Method; Probability and Non-Probability Sampling Techniques; Sample Size Determination.

Unit 4: Data Analysis Using Spreadsheet (9 hours)
Data Preparation and Cleaning; Graphical Presentation of Data; Frequency Distribution, Descriptive Statistics; Steps in Hypothesis Testing; Hypothesis Testing- parametric (z test and t test) and non-parametric (chi- square test).

Unit 5: Report Writing and Ethics (9 hours)

Types of Reports; Steps in Report Writing; Format and Presentation of Report, Referencing (APA, Chicago manual etc.), Ethics in Business Research.

Practical Exercises (30 hours):

The learners are required to:

1. Prepare literature review from a topic of your choice involving business and economics. Also, comment on the following case 1:
   Case 1: A product manager wants to know the viability of a new innovative product being launched by his company. What are the steps that need to be followed in his research?
2. Identify the type of a research design that will be most appropriate in a given scenario as per Case 1.
3. Apply online tools and platforms, design a questionnaire using various kinds of questions including Likert scale statements to address a particular business problem.
4. Use spreadsheet to practice t- test, z-test and Chi- square test on the secondary data from a given sample set of data.
5. Prepare a brief report following proper format in Word processing software.

Discipline Specific Elective Course- 6.7 (DSE-6.7): Social Accounting

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Social Accounting DSE-6.7	4	3	1	0	Pass in Class XII with Mathematics/Accountancy	NIL

Learning Objectives

The course aims to help learners to know issues in Social Accounting and Reporting and how these issues can be reported more transparently and responsibly.

Learning Outcomes

After completion of the course, learners will be able to:

1. Compare Conventional Accounting System with Social Accounting.
2. Describe and measure various Social Costs and Social Benefits
3. Analyse Corporate Social Accounting.
4. Evaluate the framework and standards of Corporate social reporting.
5. Evaluate the impact of corporate activities at the National and Global Levels.

SYLLABUS OF DSE-6.7

Unit 1: Conventional Accounting and Shift in Paradigm (6 hours)
Traditional Framework of Accounting, Limitations with traditional framework of Accounting, Shift in Paradigm. Historical Development & Evolution of Social Accounting. Rationale for Social Accounting.

Unit 2: Social Benefits and Costs (9 hours)
Social Benefits and Costs. Measurement of Costs and Benefits. Social Impact Assessment of Business Activities. Seidler's Model for Social Income Statement, Abt's Model, Ralph's Comprehensive Social Benefit Cost Model.

Unit 3: Corporate Social Accounting (9 hours)
Definitions of Social Accounting, Responsibility Accounting, Objectives & Scope of Social Accounting. Role & Importance. Social Accounting in India. Approaches, Challenges in Social Accounting. Theories of Social Accounting (Stakeholder, Legitimacy, Institutional).

Unit 4: Corporate Responsibility Approach for Reporting (11 hours)

Social Performance Indicators. Corporate Social Responsibility, CSR Reporting Framework in Companies Act 2013. Sustainability Reporting. Triple Bottom Line. SEBI Guidelines on Business Responsibility & Sustainability Reporting. Stakeholder Engagement and Reporting. Need for Corporate Social Reporting.

Unit 5: National and Global Social Accounting (10 hours)
International accounting standards, frameworks, and guidance – SASB, GRI, SDG. National Income and Social Accounting, Social Accounting Matrix. Social Audit and Assurance. Socially Responsible Investment.

Exercises:

The learners are required to:

1. Prepare a small report on conventional accounting and shift in a paradigm based on the research papers.
2. Identify the different types of social costs based on the financial statements of selected companies.
3. Give a presentation on corporate social accounting by collecting information from the annual reports of select companies.
4. Evaluate the impact of the Corporate Responsibility Approach for Reporting on the financial performance of the select national companies based on their financial statements.
5. Prepare a project on analysing unique aspects of social accounting in the nonprofit sector and reporting on social outcomes and impact for nonprofits.
6. Do a comprehensive analysis of National and Global Social Accounting standards and procedures.

Suggested Readings:

Discipline Specific Elective Course- 6.8 (DSE-6.8): Environmental Accounting

Course title & Code	Credits	Credit distribution of the Course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Environmental Accounting DSE-6.8	4	3	1	0	Pass in Class XII with Mathematics/Accountancy	NIL

Learning Objectives

The course aims to help learners to know issues in Environmental Accounting and how these issues can be reported more transparently and responsibly.

Learning Outcomes

After completion of the course, learners will be able to:

1. Compare the Conventional Accounting System with Environmental Accounting.
2. Describe the Environmental costs and benefits.
3. Analyse Corporate Environmental Accounting.
4. Analyse the rationale of the New Accounting Framework and the Corporate Responsibility Approach.
5. Evaluate the impact of corporate activities at the National and Global Levels.

SYLLABUS OF DSE-6.8

Unit 1: Conventional Accounting and Shift in Paradigm (6 hours)
Traditional Framework of Accounting, Limitations with traditional framework of Accounting, Shift in Paradigm,

Increasing awareness of Environmental Issues. Rationale for Environmental Accounting. Importance of environmental accounting in sustainable development.

Unit 2: Environmental Costs (9 hours)
Different Levels of Environmental Costs, Components of Environmental Costs, Externalities, Costs of Externalities, True Cost and Hidden Cost and Life Cycle Assessment, Role of Environmental Costing, Environmental cost-benefit analysis, Energy and Environmentally Differentiated Accounting

Unit 3: Corporate Environmental Accounting (9 hours)
Corporate Environmental Accounting, Environmental Accounting Methods, Environmental Management Accounting and Environmental Audit. Carbon Accounting, Carbon footprint calculation and reduction strategies. Environmental Performance Indicators

Unit 4: Corporate Reporting on Environmental Impact (9 hours)
Triple Bottom Line Reporting, CSR Reporting and Green Accounting, SEBI Guidelines on Business Responsibility & Sustainability Reporting. Need & Significance of Environmental Reporting Standards, GRI, SASB, BR&SR. Green Energy Stocks & ESG Index

Unit 5: National and Global Environmental Accounting (12 hours)
National Environmental Accounting, System of Integrated Environmental and Economic Accounts (SEEA), Economy-wide material flow accounts, Environmental protection expenditure accounts, Assessment of Environment Cost and Benefits, Green Accounts and Green GDP, Greenhouse Gas Emissions; Global Environmental Accounting, Sustainable Economic Development and Environmental Kuznets Curve.

Exercises:
The learners are required to:

1. Prepare a small report on conventional accounting and shift in a paradigm based on the research papers.
2. Identify the different types of environmental costs based on the financial statements of selected companies.
3. Give a presentation on corporate environmental accounting by collecting information from the annual reports of select companies.
4. Evaluate the impact of the Corporate Responsibility Approach for Reporting on the financial performance of the select national companies based on their financial statements.
5. Make a comparative analysis of National and Global Environmental Accounting based on the policies adopted by selected national and global companies.

Suggested Readings:

General Elective Course- 6.1 (GE-6.1): Leadership Development

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE -6.1– Leadership Development	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to create an understanding of the various leadership theories amongst the upcoming leaders in order to decide as to which style of leadership they should follow in numerous situations that they might encounter in their careers or personal lives.

Learning outcomes

After completion of the course, learners will be able to:

1. Describe the meaning of the term leadership and various theories of leadership.
2. Interpret the various situations and decide the style of leadership based on the situation.
3. Discuss the theories of culture and its impact on leadership.
4. Recognise the concept of E Leadership in pandemic.
5. Analyse styles of several leaders and demonstrate qualities of a good leader.

SYLLABUS OF GE-6.1

Unit 1: Introduction (9 hours)

Meaning of Leadership, definitions of leadership, significance of leadership, qualities of a leader, difference between leadership and management, basic styles of leadership – autocratic, democratic, laissez faire (their meaning, features, advantages, disadvantages and suitability), Rensis Likert styles of management, Tanenbaum and Schmidt Model.

Unit 2: Theories of Leadership (14 hours)

Traditional Theories-Great Man Theory, Trait Theory, **Behavioural Theories**- Ohio Studies, Michigan Studies, Managerial Grid, **Contingency theories-** Fiedler's Theory, Hersey and

Blanchard Situational Model, Path Goal Theory, Transformational Leadership, Transactional Leadership, Charismatic Leadership, Servant Leadership, Ethical Leadership.

Unit 3: Culture and Leadership (7 hours)

Trompenaars Cultural Dimensions, Hofstede's study on culture, Hall's Cultural Theory, GLOBE Model: Global Leadership and organisational Behaviour Effectiveness, organisation Culture and Leadership, OCTAPACE profile by Uday Parekh - Openness, Collaboration, Trust, Autonomy, Proactive, Authenticity, Confrontation, Experimentation.

Unit 4: E Leadership (7 hours)

Meaning, definition, need and significance especially pre covid, during covid and post covid, social media and leadership, Use of social media and video conferencing tools for electronically connecting the team and the leaders, e-leadership and collaborative tools. Use of technology in providing e-leadership.

Unit 5: Contemporary Leaders (8 hours)

Cases on contemporary leaders like Narendra Modi, Indra Nooyi, Ratan Tata, Narayan Murthy.

Exercises:
The learners are required to:

1. Identify a Leader of your choice, prepare and present a report highlighting the important traits that have contributed to the effectiveness of that Leader. (Should be done in a team)
2. Watch movie screening of movies like Mission Mangal, Lagan, Chak De, Rock On, Lakshay, Super 30 etc, open house for discussing the movie and a report/ presentation on lessons learnt from the movie.
3. Administer Fidler's Least Preferred Coworker scale in the class on all the students to make sure that they understand the theory well.
4. Administer Managerial Grid questionnaire in order to help students assess their style of leadership.
5. Present how E leadership has changed from pre corona period to during corona period to post corona period
6. Practice using collaborative tools online like google docs, mind meister etc.
7. Demonstrate the qualities of good leadership with the help of example.

Suggested Readings:

NOTE: The students are advised to read the articles regularly from HBR and other news items related to Leadership for class discussions and in order to be up to date with the contemporary industry practices.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

General Elective Course- 6.2 (GE-6.2): Data Visualisation

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE 6.2- Data Visualisation	4	2	0	2	Pass in Class XII	Nil

Learning Objectives

The course helps students learn the technique to visualise data and to gain hands-on experience with creating visualisations of financial data.

Learning outcomes

After the completion of the course, the learners will be able to:

1. Recognise the concept of data visualization.
2. Develop data visualization using spreadsheets.
3. Explain effective visualisations and dashboard using spreadsheet.
4. Analyse financial data.
5. Use Tableau public.

SYLLABUS OF GE-6.2

Unit 1: Introduction (3 hours)

Concept of Data Visualisation, Significance and role, Functions of data analyst, Types of charts, Choose an appropriate visualisation based on your data

Unit 2: Data Visualisation using Spreadsheet (4 hours)

Data Visualizations using Conditional Formatting, Sparklines and Number Formats, Charts - line charts, pie charts, scatter charts, area charts, column and bar charts, histogram, Specialized Charts: hierarchical charts, waterfall, funnel, stock charts and combo charts.

Unit 3: Creating Visualisation and Dashboard using Spreadsheet (7 hours)

Working with pivot tables and charts, Slicer, Timeline, Power Query, Power Pivot, Power View, Power Map.

Unit 4: Financial Data Analysis Using Power BI (8 hours)

Introduction to Power BI, Possible Data Sources, Cleansing, Transforming and Loading Data, Add Columns, Remove Columns, Split and Rename column and Change data types, Merge data, Append data, Create report and Power BI Dashboard using visualisation controls, Publish report and export it to PDF.

Unit 5: Working with Tableau Public (8 hours)
Introduction, Loading the Data and Preparing the Sheets, Bar and Line Combination Chart, Horizontal Bars Chart, Candlesticks and stock markets, Creating the Tableau Dashboard, and Adding a Brand Filter and Interpretation

Practical Exercises (60 hours):
The learners are required to:

1. Discuss the significance of data visualisation.
2. Use spreadsheets to create data visualisation.
3. Create dashboards for MIS.
4. Export and share dashboards and visualisations with the help of example
5. Perform financial data analysis using power BI.
6. Practice quantitative analysis through the help of Spreadsheets, Power BI, and Tableau.
7. Prepare a project on how to create the Tableau Dashboard.

Suggested Readings:

- Ferrari, A., & Russo, M. (2017). *Analyzing data with microsoft power bi and power pivot for excel.* PHI.
- Powell, B. (2017). *Microsoft power bi cookbook.* Packt Publishing Limited.
- Brown, L. (2020). *Tableau desktop cookbook.* O'Reilly Media.
- Sleeper, R. (2018). *Practical tableau.* O'Reilly Media.

Note:
The General Purpose Software referred in this course will be notified by the University Department every three years. If the specific features, referred to in the detailed course above, are not available in that software, to that extent it will be deemed to have been modified.
Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

General Elective Course- 6.3 (GE-6.3): Logistics Management

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE-6.3 Logistics Management	4	3	1	0	Pass in Class XII	NIL

Learning Objectives:

The course aims to acquaint the student with the concept, tools and importance of Distribution logistics in Marketing.

Learning Outcomes: After completion of the course, learners will be able to :

1. Describe the basics of logistics management.
2. Discuss the distribution channels and their importance.
3. Evaluate the various modes of transportation for distribution.
4. Demonstrate the basic knowledge about the various tools for operational efficiency.
5. Analyse how the advanced technology used in distribution logistics.

SYLLABUS OF GE-6.3

Unit 1 Introduction to Logistics (5 hours)

Introduction to Logistics: Concept, Evolution, Components and Process. Dimensions of Logistics – Micro and Macro; inbound, outbound, Value-Added Role of Logistics.

Unit 2: Distribution Strategy (11 hours)

Distribution Strategy – Meaning, Marketing channels: nature and importance, conventional and emerging channels, role of online sales and supply chain; Designing strategic distribution network; Factors influencing distribution network.

Unit 3: Transportation and Warehousing Decision (9 hours)

Transportation and Warehousing Decision - Role and importance. Factors influencing transportation and warehousing decisions. Importance of Multimodal Transport and containerization. Cost effectiveness of various modes of transport and types of warehouses.

Unit 4: Operational Efficiency and its tools (11 hours)

Operational Efficiency and its tools: Inventory Management: introduction, objectives, types and importance, EOQ and JIT approach. Third and fourth-party logistic outsourcing– challenges and future directions.

Unit 5: Technology in Logistics (9 hours)

Overview of AI in Logistics, Robotics, Block Chain, Reverse Logistics, Re-engineering the supply chain, RFID, EDI, Bar coding.

Exercises:
The learners are required to:

1. Discuss case studies of firms for logistics management.
2. Analyse the impact of transportation modes.
3. Critically examine the role of transportation modes for distribution.
4. Comment on functional applications – HR, marketing, operations, finance, IT.
5. Explain the role of artificial intelligence in distribution logistics.

Suggested Readings:

- Simchi-Levi, D., Kaminsky, P., Simchi-Levi, E., & Shankar, R. (2008). *Designing and managing the supply chain.* (3rd ed.). India: Tata McGraw-Hill Education.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

General Elective Course- 6.4 (GE-6.4): E-Filing of Returns

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE 6.4 – E-Filing of Returns	4	2	0	2	Pass in Class XII	Nil

Learning Objectives

The course aims to equip students with the practical skills required for filing of returns under Income Tax Laws.

Learning Outcomes: After completing of the course, learners will be able to:

1. Examine the basic concepts of income tax applicable to an individual assessee.
2. Analyse the provisions when business or professional income is computed on an estimated basis.
3. Demonstrate e filing of return.
4. Analyse the provisions of TDS.
5. Demonstrate e filing of TDS returns.

SYLLABUS OF GE-6.4

Unit 1: Income tax: An overview (5 hours)

Incomes taxable under different heads, deductions available from gross total income, computation of total income and tax liability of individuals, PAN and due date of filing of income tax return; Provisions related to advance payment of tax; New tax regime for individuals; Reliefs for an individual.

Unit 2: Maintenance of accounts, audit, and taxation on presumptive basis (7 hours)

Provisions of maintenance of accounts by certain persons carrying on profession or business [Sec.44AA]; Provisions of audit of accounts of certain persons carrying on business or profession [Sec.44AB]; Special provision for computing profits and gains of business on presumptive basis [Sec.44AD]; Special provision for computing profits and gains of profession on presumptive basis [Sec.44ADA]; Special provision for computing profits and gains of business of plying, hiring or leasing goods carriages [Sec. 44AE].

Unit 3: e-Filing: Conceptual framework and filing of Income Tax Returns (9 hours)

Meaning and merits of e-Filing; Filing of income tax returns in ITR-1, ITR-2, ITR-3, ITR-4, ITR-5 and ITR-U.

Unit 4: Tax Deducted at Source (4 hours)

Provisions relating to TDS; Schedule for deposit of TDS; Schedule for submission of TDS returns; Exemption from TDS: Form 13, 15G, 15H; Form 16, AIS.

Unit 5: e-Filing of TDS returns (5 hours)

Prescribed forms for filing of TDS returns; Practical workshop on e-filing of TDS returns [Form 24 Q and Form 26 Q].

Practical Exercises (60 hours):

The learners are required to:

1. Discuss basic concepts of Income taxable under Income-tax Act, 1961 from the official website of Government of India.
    a. Explain relevant provisions to understand basic concepts of income tax applicable to an individual assessee.
    b. Give hands-on simulating exercise relating to due dates and advance payment of income tax.
2. Refer to the Finance Act to know about the amendments done in various provisions of the Income-tax Act, 1961.
3. Explain the process of e-filing by showing the video e-filing 2.0 guided tour on the official website of Income Tax department, Government of India.
4. Do hands-on training to furnish Income Tax Return (ITR) on the official e-filing website of the Government of India i.e., www.incometax.gov.in.
5. Do hands-on training to furnish TDS returns at https://www.incometax.gov.in/iec/foportal/
6. Demonstrate e filing of TDS returns.

Suggested Readings:

SEMESTER-IV
B.Com

Discipline Specific Core Course- 4.1(DSC-4.1): Entrepreneurship & New Venture Planning

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Entrepreneurship & New Venture Planning DSC- 4.1	**4**	**3**	**1**	**0**	**Pass in Class XII**	**NIL**

Learning Objective:

This course aims at instituting entrepreneurial skills in the students by giving an overview of entrepreneurship and the competencies that are needed to become an entrepreneur. To enable students to explore and launch entrepreneurial ventures in their own areas of interest.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Describe distinct entrepreneurial traits.
2. Recognise the process and nature of entrepreneurship.
3. Identify the different ways in which entrepreneurs manifest in start-ups.
4. Comprehend the entrepreneurial process for initiating new venture creation.
5. Design strategies for the successful implementation of innovative ideas of new ventures.

SYLLABUS OF DSC-4.1

Unit 1: Introduction (9 hours)

Concept and Definitions Entrepreneurship, Entrepreneurial Mind-set, Traits/Qualities of Entrepreneurs, Entrepreneurship process; Theories of entrepreneurship; Factors affecting the emergence of entrepreneurship; Role of an entrepreneur in economic growth as an innovator; Generation of employment opportunities; complementing and supplementing economic growth; Bringing about social stability and balanced regional development of industries.

Unit 2: Types of Entrepreneurs (9 hours)

Classification and Types of Entrepreneurs; Women Entrepreneurs; Social Entrepreneurship; Corporate Entrepreneurs, Family Business: Concept, structure, and kinds of family firms; Culture and evolution of family firm; Managing Business.

Unit 3: Business plan (9 hours)

Creating Entrepreneurial Venture: Generating Business ideas, Team building, Sources of Innovation, Creativity, and Entrepreneurship; Challenges in managing innovation; Entrepreneurial strategy and Scaling up, Business planning process; Drawing business plans; Failure of the business plan.

Unit 4: Mobilizing Resources (9 hours)

Resource Mobilization for entrepreneurship: Resources mobilization, types of resources, Process of resource mobilization, Arrangement of funds; writing a Funding Proposal, Traditional sources of financing, Venture capital, Angel investors, Business Incubators.

Unit 5: Managerial Aspects of Business and Government Initiatives (9 hours)

Managing finance; Understanding capital structure; organisation structure and management of human resources of a new enterprise; Marketing-mix; Management of cash; Relationship management; Cost management, Government initiatives for promoting entrepreneurship.

Exercises:
The learners are required to:

1. Discuss various cases of entrepreneurship and distinguish between different entrepreneurial traits.
2. Prepare a business plan for a start-up venture in a rural setting after analyzing the various facets of the rural economy.
3. Analyse and present the key initiatives of the government of india for promoting entrepreneurship in the country in a business area.
4. Analyse and interpret case study on business philosophy at Tata Group, Aditya Birla Group, Reliance Industries Limited, and similar organisations.
5. Participate in business plan competition-designing a business plan proposal and identifying alternative sources of raising finance for the start-ups.

Suggested Readings:

- Barringer, B.R., & Ireland, R.D. (2015). *Entrepreneurship*. Pearson.
- Gersick, K. E., Davis, J. A., Hampton, M. M., & Lansberg, I. (1997). *Generation to generation: Life cycles of the family business*. Boston, United States: Harvard Business School Press.
- Hisrich, R.D., Manimala, M.J., Peters, M.P., & Shepherd, D.A. (2013). *Entrepreneurship*. Delhi, India: Tata McGraw Hill.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Core Course- 4.2(DSC-4.2): Cost Accounting

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Cost Accounting **DSC- 4.2**	**4**	**3**	**1**	**0**	**Pass in Class XII**	**NIL**

Learning Objective: The course aims to develop understanding among learners about contemporary cost concepts and rational approach towards cost systems and cost ascertainment. The course also aims to provide knowledge about various methods of cost determination under specific situations and to acquire the ability to use information determined through cost accounting for decision making purposes.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Discuss and analyze the different cost concepts.
2. Determine various components of cost of production.
3. Compute unit cost and total cost by preparing a cost statement.
4. Compute employee cost, employee productivity and employee turnover.
5. Determine cost for different industries using job costing, process costing, contract costing and service costing.

SYLLABUS OF DSC-4.2

Unit 1: Introduction (11 hours)

Meaning, scope, objectives and advantages of cost accounting; Difference between financial and cost accounting. Cost concepts and classifications, Overview of elements of cost and preparation of Cost Sheet for manufacturing sector. Role of a cost accountant in an organisation. Cost Accounting Standards (CAS – 4 on Cost of Production / Acquisition / Supply of Goods / Provision of Services) and (CAS – 22 on Manufacturing Cost) as amended from time to time.

Unit 2: Elements of Cost : Material and Employee Cost (9 hours)

(a) Materials: Accounting and control of purchases, storage and issue of materials. Techniques of inventory control, Periodic and perpetual systems of maintaining inventory records, an overview of methods of pricing of materials issues — FIFO, LIFO and Weighted Average price method, Valuation of materials as per CAS – 6 on Material Cost, Accounting treatment of losses— Wastage, scrap, spoilage and defectives

(b) Employee (Labour) Cost: Accounting and Control of employee cost. Time-keeping and time-booking. Employee turnover: meaning, methods of measurement and accounting treatment. Concept and treatment of idle time and overtime. Methods of wage payment and Incentive schemes- Halsey, Rowan, Taylor's differential piece wage.

Unit 3: Elements of Cost: Overheads (9 hours)

Classification, allocation, apportionment and absorption of overheads, Under and over- absorption of overheads; Capacity Levels and Costs; Treatments of certain items in costing like interest and financing charges, packing expenses, bad debts, research and development costs.

Unit 4: Methods of Costing (9 hours)

Job costing, Contract costing, Process costing (including process losses, valuation of work-in-progress). Service costing (only transport)

Unit 5: Cost Accounting Book-Keeping Systems (7 hours)

An overview of integral and non-integral systems; Reconciliation of cost accounting profit with financial profits.

Notes :

1. Treatment of various items of cost should be as per the relevant cost Accounting Standards (CAS) issued by Institute of Cost Accountant of India.
2. Use of spreadsheet software should be encouraged for the basic calculation.

Exercises:

The learners are required to:

1. Prepare a cost statement for manufacturing and/ or service organisation.
2. Identify the items to be included and excluded in the material and labour costs.
3. Visit a factory and analyse different elements of overhead costs.
4. Visit industries to understand process costing and prepare a cost statement for any
5. Process industry.
6. Suggest a suitable cost system for different types of services organisation.

Suggested Readings:

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Core Course- 4.3 (DSC-4.3): International Business

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
International Business **DSC- 4.3**	**4**	**3**	**1**	**0**	**Pass in Class XII**	**NIL**

Learning Objectives:

The course aims to impart the core body of knowledge in international business to the students. The course would introduce students to the international trading and investment environment and also create awareness about emerging issues such as outsourcing and sustainable development in the context of international business.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Analyse the process of globalization and its impact on growth of international business.
2. Evaluate the changing dynamics of the diverse international business environment.
3. Analyse the theoretical dimensions of international trade as well as intervention measures adopted.
4. Analyse the significance of different forms of regional economic integration and the role played by various international economic organisations.
5. Evaluate the forms of foreign direct investment and analyse benefits and costs of FDI.

SYLLABUS OF DSC-4.3

Unit 1: **Introduction to International Business (7 hours)**
Globalization - concept, significance and impact on international business; international business contrasted with domestic business; complexities of international business; internationalization stages and orientations; modes of entry into international businesses.

Unit 2: International Business Environment (11 hours)
Role of political and legal systems in international business; cultural environment of international business; implications of economic environment for international business.

Unit 3: International Trade (9 hours)
Theories of international trade – Theory of Absolute Advantage theory, Theory of Comparative Advantage, Factory Proportions theory and Leontief paradox, Product Life Cycle theory, Theory of National Competitive Advantage; Instruments of trade control.

Unit 4: Regional Economic Integration and International Economic Organisations (9 hours)
Forms of regional economic integration; Integration efforts amongst countries in Europe, North America and Asia: EU, USMCA, and SAARC; Cost and benefits of regional economic integration.
International Economic Organisations: WTO- functions, structure and scope; World Bank and IMF

Unit 5: International finance and contemporary issues in IB (9 hours)
Types of FDI - Greenfield investment, Mergers & Acquisition, strategic alliances; benefits and drawbacks of FDI
Overview of Exchange Rate systems
Contemporary issues in international business: Outsourcing and its potential for India; international business and sustainable development.

Exercises:
The learners are required to:

1. Demonstrate through case studies the suitability of each mode of entry in international business.
2. Conduct a comparative analysis of countries which are different in terms of political/legal/economic/cultural environment to understand the impact of these dimensions on international business.
3. Analyse data on trade of select countries to examine if trade patterns conform to different trade theories.
4. Conduct an in-depth study of a regional economic arrangement and evaluate its costs and benefits by applying the theoretical knowledge gained during the course
5. Make presentations on developments in contemporary issues affecting international business such as sustainable development.

Suggested Readings:

- Bennett, R. (2006). *International Business*. Delhi, India: Pearson.
- Cavusgil, S. T., Knight, G., & Riesenberger, J. (2006). *International Business: Strategy, Management and the New Realities*. India: Pearson India.

- Menipaz, E., Menipaz A., & Tripathi S.S. (2017). *International Business: Theory and Practice.* Delhi, India: Sage Publications India Pvt. Ltd.

Additional Resources

- *Economic Survey, various issues.*
- *RBI Report on Currency & Finance, various issues.*
- *World Investment Reports, UNCTAD*
- *Websites: RBI, IMF, WORLD BANK, WTO.*
- *WTO Annual reports*

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

SEMESTER-V
B.Com

Discipline Specific Core Course- 5.1(DSC-5.1): Income Tax Law and Practice

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Income Tax Law and Practice DSC- 5.1	4	3	0	1	Pass in Class XII	NIL

Learning Objectives

The course aims to impart knowledge of law pertaining to levy of income tax in India.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Describe the basic concepts of income tax and determine the residential status of different persons.
2. Compute income under the heads 'salaries' and 'income from house property'.
3. Compute income under the heads 'profits and gains of business or profession' and 'capital gains'.
4. Compute income under the head 'income from other sources' and recognise the provisions relating to income of other persons included in assessee's total income
5. Discuss the various deductions and computation of total income and tax liability of individuals.

SYLLABUS OF DSC-5.1

Unit 1: Introduction (9 hours)

Basic concepts: Income; Agricultural income, Person, Assessee, Assessment year, Previous year, Gross Total Income, Total income, Maximum marginal rate of tax and Permanent Account Number (PAN); Residential status: Scope of total income on the basis of residential

Unit 2: Computation of Income from Salaries and House Property (11 hours)

Income from Salaries; Income from House Property.

Unit 3: Computation of Income from Business or Profession and Capital Gains (11 hours)

Profits and gains of business or profession; Capital gains.

Unit 4: Income from Other Sources, Clubbing of Income and Set-off (7 hours)

Income from other sources; Income of other persons included in assesses total income; Aggregation of income and set-off and carry forward of losses.

Unit 5: Deductions and Computation of Total Income and Tax Liability (7 hours)

Deductions from gross total income; Rebates and reliefs; Computation of total income and tax liability of individuals (On-line filing of Returns of Income & TDS).

Practical Exercises:

The learners are required to:

1. Prepare a case study for a person resident but not ordinarily resident in India having income under the head other sources of income.
2. Prepare a presentation indicating the impact of alternative tax regime structure on the tax liability of an assessee.
3. Present a hypothetical case wherein the impact of change in the capital gains taxes are reflected as per the relevant Financial Act.
4. Learn about various tax services available on the official website of Government of India.
5. Prepare a list of tax deductions available in case of a senior citizen.
6. Explore and attempt on-line filing of Returns of Income & TDS on Income tax e-filing website under ITR-1 and ITR-2.

Suggested Readings:

- Ahuja, G., & Gupta, R. (2022). *Simplified Approach to Income Tax.* Delhi, India: Flair Publications Pvt. Ltd.
- Bandopadhayaya, S. B. (2019). *Taxation I, II.* Delhi, India: Oxford University Press.
- Mittal, N. (2019). *Concept Building Approach to Income Tax Law & Practice.* Delhi, India: Cengage Learning India Pvt. Ltd.

● Singhania, V. K., & Singhania, M. (2021). *Students' Guide to Income Tax, University Edition.* Delhi, India: Taxmann Publications Pvt. Ltd.

Additional Resources

- Current Tax Reporter. Jodhpur, India: Current Tax Reporter.
- Income Tax Reports. Chennai, India: Company Law Institute of India Pvt. Ltd.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Core Course- 5.2(DSC-5.2): Business Economics

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Business Economics **DSC- 5.2**	**4**	**3**	**1**	**0**	**Pass in Class XII**	**NIL**

Learning Objectives

The course aims to acquaint the learners with Microeconomics and its applications.

Learning Outcomes:

After the completion of the course, the learners will be able to:

1. Examine the nature and scope of business economics.
2. Analyse how consumers try to maximize their satisfaction by spending on different goods.
3. Evaluate the relationship between inputs used in production and the resulting outputs and costs.
4. Analyse and interpret various facets of and pricing under different market situations.
5. Discuss the contemporary issues and applications in micro economics.

SYLLABUS OF DSC-5.2

Unit 1: Introduction to Business Economics (5 hours)

Nature and scope of Business Economics, Demand and Supply: Meaning, law, Individual Vs Market, Movement Vs Shift, Market equilibrium. Elasticity of Demand: Price, income and cross elasticity. Measurement of elasticity of demand: outlay and percentage method. Elasticity of supply: concept and measurement (Percentage method).

Unit 2: **Consumer Behaviour (11 hours)**

Cardinal Vs Ordinal Utility, Indifference curves: features, budget line, consumers equilibrium, ICC and Engels curve, PCC and derivation of demand curve, Income and substitution effects of price change (normal, inferior and giffen goods), Applications: effect of interest rates on household savings, lumpsum subsidy Vs excise subsidy.

Unit 3: Production and Cost (11 hours)

Production function: TP, AP and MP, Law of Variable proportions. Isoquants: properties, optimal combination of resources, expansion path and returns to scale.

Cost: Different cost concepts, Derivation of short run and long run cost curves (LAC and LMC), Economies and Diseconomies of scale.

Unit 4: Market Structures (11 hours)

Perfect competition: features, equilibrium under short run and long run, derivation of supply curve under short run and long run.
Monopoly: features, equilibrium under short run and long run, absence of supply curve, Price discrimination: degrees, conditions and dumping.
Monopolistic competition: features, product differentiation and excess capacity and equilibrium.
Oligopoly: Collusive and non- collusive: Cournot's model, Kinked demand curve, Cartels (OPEC and CIPEC)

Unit 5: **Contemporary Issues and applications (7 hours)**

Rent control, Minimum wages, Individual supply curve of labour, Peak load Pricing, Prisoners' dilemma and Game Theory.

Exercises:
The learners are required to:

1. Apply the concept of elasticity of demand and supply in real life.
2. Analyse the impact of changing prices on consumption of necessities by a household.
3. Visit any manufacturing unit and study its production process and costing.
4. Analysis of OPEL as a case of a successful cartel.

5. Comment on contemporary issues and applications of income tax law

Suggested Readings:

Discipline Specific Core Course- 5.3(DSC-5.3): Management Accounting

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Management Accounting DSC- 5.3	4	3	0	1	Pass in Class XII	Studied DSC-4.2 (Cost Accounting)

Learning Objectives

The course aims to enable students to acquire knowledge of concepts, methods and techniques of management accounting for the purpose of managerial planning, control and decision making.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Examine the conceptual framework of Management Accounting and identify the differences between various forms of accounting.
2. Analyse budgetary control system as a tool of managerial planning and control
3. Evaluate the standard costing system as a tool of managerial control.
4. Recognise the concept of marginal costing and cost-volume-profit analysis.
5. Analyse techniques of decision making.
6. Discuss the concept of responsibility accounting and performance measurement.

SYLLABUS OF DSC-5.3

Unit 1: Introduction to Management Accounting

Meaning, objectives, nature and scope of management accounting, Difference between different forms of accounting- Cost, Financial and Management accounting, Cost control and Cost reduction.

Unit 2: Budgetary Control and Standard Costing Systems

(a) Budgeting and Budgetary Control: Concept of budget, budgeting and budgetary control; objectives, merits and limitations; Functional Budgets; Fixed and Flexible budgeting; An overview of different approaches to budgeting (Zero base budgeting, Performance budgeting and Programme budgeting)

(b) Standard Costing and Variance Analysis: Meaning of standard cost and standard costing; advantages, limitations and applications; Variance Analysis – material, labour, overheads and sales variances. Control ratios.

Unit 3: Marginal Costing

Concept of marginal cost and marginal costing; Absorption versus Variable Costing: Distinctive features and income determination; Cost-volume-profit analysis; Break-even

Analysis-Statements, mathematical and graphical approaches; Profit-volume ratio, angle of incidence, margin of safety, key factor, determination of cost indifference point.

Unit 4: Decision Making

Steps in Decision making process. Concept of relevant costs. solving various short -term decision making problems using marginal costing and differential costing techniques – Profitable product mix, Acceptance or rejection of special/ export offers, Make or buy, Addition or elimination of a product line, sell or process further, operate or shut down and Pricing decisions

Unit 5: Performance Measurement

Responsibility Accounting: Concept, Significance, Different Responsibility Centres; Divisional Performance Measurement: Financial and Non-Financial measures;

Note: Spreadsheet may be used for doing basic calculations in Management Accounting and giving students subject related assignments for their internal assessment purposes.

Practical Exercises:

The learners are required to:

The learners are required to:

1. Discuss differences between various forms of accounting.
2. Prepare different types of budgets.
3. Apply the concept of zero base budgeting on a select firm by collecting relevant data.
4. Visit any manufacturing unit and study the relevance of marginal costing.
5. Compute variances and perform analysis.
6. Perform cost-volume-profit analysis.
7. Compute the foreign export sales price for a domestic firm engaged in manufacturing goods/services.
8. Evaluate various decision making techniques using case studies.
9. Identify the responsibility centres of a pharmaceutical industry.
10. Discuss case studies on divisional performance measurement.

Suggested Readings:

- Arora, M. N. (2019). *Management Accounting.* Delhi, India: Himalaya Publishing House.
- Goel, R. K. & Goel, I. (2019). *Concept Building Approach to Management Accounting for B.Com(Hons.).* Delhi, India: Cengage.
- Maheshwari, S. N. & Mittal, S. N. (2019). *Management Accounting.* Delhi, India: Shri Mahaveer Book Depot.
- Maheshwari, S. N., Maheshwari, S. K. & Maheshwari, S. K. (2021). *Principles of Management Accounting.* Delhi, India: Sultan Chand & Sons.
- Maheshwari, S. N. (2015). *Management Accounting and Financial Control.* Delhi, India: Sultan Chand & Sons.
- Shah, P. (2015). *Management Accounting.* Delhi, India: Oxford University Press.

- Singh, S. (2023). *Management Accounting.* Delhi, India: PHI Learning Pvt. Limited.
- Singh, S. K., & Gupta, L. (2021). *Management Accounting: Theory and Practice.* Delhi, India: A. K. Publications.
- Tulsian, P. C., & Tulsian, B. (2023). *Advanced Management Accounting.* Delhi, India: S. Chand.

Additional Readings:

- Drury, C. (2020). *Management and Cost Accounting.* China: Cengage.
- Horngren, C. T., Foster, G., & Dattar, S. M. (2002). *Cost Accounting: A Managerial Emphasis.* Delhi, India: Prentice Hall of India Ltd.
- Khan, M. Y., & Jain, P. K. (2021). *Management Accounting.* Delhi, India: Tata McGraw Hill Publishing Co.
- Usry, M. E., & Lawrence, H. H. (2010). *Cost Accounting: Planning and Control.* Nashville, United States: South Western Publishing Co.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Elective Course- 5.1(DSE-5.1): Organisational Behaviour

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Organization Behaviour DSE- 5.1	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to develop a basic understanding of the concept of organisational behaviour and its relevance in modern organisations. It will enable students to gain theoretical and practical knowledge along with desirable skills to become successful managers and effective employees in organisation.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Demonstrate understanding of the basic concepts of organisational behaviour and their applicability in contemporary organisations.
2. Analyse the various means of managing people at the workplace.
3. Interpret the complex nature of human behaviour and group dynamics.
4. Critically evaluate leadership styles and strategies.
5. Discuss the ways to build supportive organisational culture

SYLLABUS OF DSE-5.1

Unit 1: Introduction (7 hours)

Organisational Behaviour: Concepts and Determinants; Emergence of organizational behaviour; Contributing disciplines of OB; OB models.

Unit 2: Individual Behavior (9 hours)

Foundations of Individual Behaviour; Personality- Type A and B, Big five personality types; Attitude - components, job related attitudes; Learning- concept, theories and reinforcement; Perception - concept, perceptual process, factors influencing perception; Values - concept and types: terminal values and instrumental values.

Unit 3: Communication and Motivation (11 hours)

Communication – Understanding Communication; Communication styles; Transactional Analysis (TA), Johari Window.

Motivation – Early Theories of motivation (Need Hierarchy, Theory X and Theory Y, Two Factors Theory); Contemporary Theories of motivation (Self-Determination Theory, Goal-setting Theory, Reinforcement Theory, Self-efficacy Theory).

Unit 4: Group Behaviour and Leadership (11 hours)

Group Behaviour - concept, types- group norms, group roles, and group cohesiveness;

Leadership - Concept and theories; Styles of leadership; Leadership continuum; Trait, Behavioural and Situational approach; Contemporary leadership issues.

Unit 5: Dynamics of Organisational Behavior (7 hours)

Organisational culture- concept and determinants; Organisational change- types of change, resistance to change, managing change; Stress- source, prevention and management of stress.

Exercises:

The learners are required to:

1. Evaluate personality type as a group activity.
2. Play a role on TA and JOHRI Window
3. Identify the innovative ways to manage counter-productive behavior
4. Study the various leadership styles opted in MNCs
5. Practice stress management techniques.

Suggested Readings:

- Luthans, F. (2017). *Organisational Behavior-An evidence based approach.* (12th ed.). McGraw-Hill Education.
- Pareek, U. (2014). *Understanding Organisational Behavior.* Delhi, India: Oxford University Press.
- Robbins, S. T., & Judge, T. A. (2019). *Essentials of Organizational Behaviour.* (14th ed.). London, United Kingdom: Pearson.
- Singh, A. K., & Singh, B. P. (2007). *Organisational Behavior.* Delhi, India: Excel Books Pvt. Ltd.
- Singh, K. (2015). *Organisational Behavior: Texts & Cases.* (3rd ed.). India: Pearson.

Additional Resources:

- Greenberg, J. (2015). *Behavior in Organizations.* (10th ed.). Delhi, India: Pearson Education India.
- Hersey, P. K., Blanchard, D., & Johnson, D. (2013). *Management of Organizational Behavior.* Pearson.

Note: The course combines learning through analysis and discussion of case studies and active participation in experiential exercises and simulations.

Discipline Specific Elective Course- 5.2 (DSE-5.2): Financial Markets and Institutions

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Financial Markets and Institutions DSE- 5.2	4	3	1	0	Pass in Class XII	NIL

Learning Objective: The course aims to provide students an overview of financial markets and financial institutions.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Describe the components and functions of a financial system.
2. Analyse integration and linkages between different financial systems and describe how they operate.
3. Analyse the functioning and working of money and capital markets.
4. Evaluate the role of commercial banks.
5. Analyse role of insurance, mutual funds and NBFCs.

SYLLABUS OF DSE-5.2

Unit-I Introduction (9 hours)

An introduction to financial system– concept, functions, structure and components, inter-linkages between financial system and economic development; evolution of Indian financial system since 1951; recent reforms and developments in Indian financial system; financial stability; financial crisis – causes and policy response.

Unit-II: Financial Markets I: Money Markets (9 hours)

Money markets – functions, organisations and participants; money market instruments; role of central bank in money market; role of Reserve Bank of India in Indian money market.

Unit III: Financial Markets II: Capital Markets (9 hours)

Capital Markets - introduction, components, role and functions; equity market-methods of issue; debt market-concept, significance and classification; capital market instruments; primary and secondary markets- concept, similarities, differences; stock exchanges in India - NSE, BSE; Stock Indices: concept and major stock indices in India (NIFTY and BSE-SENSEX); SEBI and investor protection.

Unit-IV: Financial Institutions I: Commercial Banking (9 hours)

Commercial banking – introduction, classification and role in economy; asset liability management; non-performing assets; financial inclusion; recent developments including digital banking, universal banking.

Unit-V: Financial Institutions II: Insurance, Mutual Funds and NBFCs (9 hours)

Insurance - life and non-life insurance companies in India: public and private; Mutual Funds - introduction and their role in capital market development, types of mutual fund schemes (open ended vs close ended, equity, debt, hybrid schemes and ETFs; Non-banking Financial Companies (NBFCs)-role and types.

Exercises:

The learners are required to:

1. Identify one Indian and one global financial conglomerate and examine their genesis and evolution.
2. Compare the yield curve of India, another developing country and a developed country. Analyze the reasons for similarities and differences.
3. Pick two leading stock market indices in India, analyse their method of computation, reasons behind the differences and their implications.
4. Pick financial statements of any two Public Sector banks and compare their NPA
5. Pick any three mutual funds and make a comparison on the basis of its risk parameters, Portfolio holdings and historical return.

Suggested Readings:

Discipline Specific Elective Course- 5.3 (DSE-5.3): Sustainability Marketing

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Sustainability Marketing DSE- 5.3	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

This course aims to familiarize the students with the concept and process of sustainable marketing.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Describe the need of sustainable marketing in view of environmental, legal and ethical aspects.
2. Recognise the opportunities for sustainable marketing strategies.
3. Identify the consumer behaviour for sustainable marketing
4. Demonstrate how sustainable marketing can be applied in marketing mix strategies.
5. Discover the case studies of legal framework for sustainable marketing.

SYLLABUS OF DSE-5.3

UNIT 1: Introduction (9 hours)

Sustainability- Concept, Issues, SDG Goals. Sustainability Marketing- Concept, Rationale, Evolution, Pillars of Sustainability Marketing, Linkage with SDGs.

Sustainability and Ethical Decision Making. Challenges of Practising SM- Sustainability and Profitability. Triple Bottom Line- An Overview.

Unit 2: Sustainability Marketing Opportunities (9 hours)

Sustainability Opportunities- Marketing Environment; Segmentation, Targeting and Positioning; Creating Value through Sustainability- Designing the Marketing Mix, Holistic Approach to Sustainability.

UNIT 3: Consumer Behaviour and Sustainability Marketing (9 hours)

Unsustainable Lifestyles, Dimensions of Sustainable Consumer Behaviour. Motives of adapting Sustainable Consumer Behaviour, Attitude-Behaviour Inconsistency in Sustainable Buying Decisions, Environmental Consciousness; Sustainable Consumption- Beliefs, Social Norms, Values, Cases of Mindful Consumption and Responsible Consumption.

Unit 4: Sustainability and Marketing Mix Decisions (9 hours)

Developing and Reinforcing Behaviour through 3 R's- Recycle, Reuse and Reduce.

Sustainable Products, Sustainable Branding and Packaging. Sustainable Pricing Decisions, Sustainable Marketing Communication, Sustainability and Promotion Mix Decision, Marketing Channels and Sustainable Supply Chain.

UNIT 5: Sustainability Legal Framework and its Implementation in India (9 hours)

An Overview of Legal Framework- Leading Cases and Developments. Role of Sustainable Marketing in Global Network.

Exercises:

The learners are required to:

1. Perform a role play (as a marketer and as consumers)
2. Make presentations of companies' case examples where marketers have adapted sustainable marketing mix strategies and how it impacted their business.
3. Represent their own behaviour for mindful and responsible behaviour.
4. Demonstrate how marketers can develop and reinforce consumer behaviour through 3 R's.
5. Find out the leading case studies where sustainable marketing has emerged as an important issue.

Discipline Specific Elective Course- 5.4 (DSE-5.4): Business Mathematics

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Business Mathematics DSE-5.4	4	3	0	1	Pass in Class XII	NIL

Learning Objectives

The course aims to familiarize students with the applications of Mathematics and Statistical techniques in business decision making.

Learning Outcomes

After completion of the course, learners will be able to:

1. Identify proficiency in using different mathematical tools in solving real life business and economic problems.
2. Analyse how matrices are used as mathematical tool in representing a system of equations.
3. Apply differential calculus to solve simple business problems.
4. Discuss mathematical formulation and solution of problems related to finance including different methods of interest calculation, future and present value of money.
5. Identify business problems involving linear relationships between decision variables and their determining factors.

SYLLABUS OF DSE-5.4

Unit 1: Matrices (9 hours)

Definition and types; Algebra of matrices; Applications of matrix operations to simple business and economic problems; Calculation of values of determinants up to third order; Finding the solution of system of linear equations up to three variables by Matrix Inversion and Cramer's Rule.

Unit 2: Differentiation (9 hours)

Concept and rules of differentiation; applications of differentiation - elasticity of demand and supply, Cost, Revenue, Profit and Break Even Point, Maxima and Minima of functions relating to cost, revenue and profit.

Unit 3: Integration (9 hours)

Standard forms of Integration Definite integration. Application of Integration to marginal analysis; Marginal Cost to Cost function, Marginal Revenue to Revenue function, Elasticity of Demand to Demand function.

Unit 4: Basic Mathematics of Finance (9 hours)

Simple and Compound interest (including continuous compounding); Rates of interest - nominal and effective and their inter-relationships; Compounding of a sum using different types of rates.

Unit 5: Linear Programming (9 hours)

Formulation of Linear programming problems (LPPs), Graphical solutions of LPPs. Cases of unique solutions, multiple optional solutions, unbounded solutions, infeasibility, and redundant constraints.

Practical Exercises:

The learners are required to:

1. Identify the decision-making variables and assess their functional relationship with other variables affecting the decision in a hypothetical business situation.
2. Take the business case and assess how the use of matrices helps in deciding about competing alternatives
3. Identify and formulate business problems as an application of calculus
4. Identify and solve business problems of any company of your choice as an application of linear programming
5. Gather information about various deposit and loan schemes of banks to find out interest rate differential, and compounded value.

Note: Use of a simple calculator is allowed. Proofs of theorems/ formulae are not required.

Suggested Readings:

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Discipline Specific Elective Course- 5.5 (DSE-5.5): Accounting for Mergers & Acquisitions and Valuation

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Accounting for Mergers & Acquisitions and Valuation DSE-5.5	4	3	1	0	Pass in Class XII	NIL

Learning Objectives: The course aims to help learners to conceptualise the knowledge of value creation through Mergers and Acquisitions and acquire skills for accounting for Mergers and Acquisitions both from the perspective of India and Internationally.

Learning Outcomes: After completion of the course, learners will be able to understand:

1. Define value creation through Mergers and Acquisitions.
2. Describe valuation tools used during Mergers and Acquisitions.
3. Demonstrate accounting for Mergers and Acquisitions from Indian Perspective.
4. Demonstrate the accounting for Mergers and Acquisitions from International Perspective.

5. Analyse the different types of Synergic effects and the concept of Demerger along with Reverse Merger.

SYLLABUS OF DSE-5.5

Unit 1: Introduction to Mergers and Acquisitions (9 hours)
Introduction to mergers and acquisitions (M&A), Types of Mergers, Participants in Merger and Acquisition, Understanding financial statements and key valuation concepts, Leveraging M&A for value creation, M&A- Cure for Corporate Turbulence, Fast Track Mergers, Significance of Intellectual Property Rights in M&A, Cross Border Mergers.

Unit 2: Modelling and Valuation (9 hours)
Income Approach (Capitalization Method and Discounted Cash Flow Method); Market Approach (Comparable Company Method); Assets Approach (Book Value Method and Liquidation Method); Modelling for Internal Rate of Return calculations; Discounted cash flow valuation; Due Diligence in M&A, Negotiation; Synergistic benefits and distribution of Synergy gains.

Unit 3: Accounting for Mergers and Acquisitions (Indian Perspective) (9 hours)
Looking at the dynamics of an actual transaction, Examining the effects of the transaction, Accounting for Amalgamation in the nature of Purchase, Accounting for Amalgamation in the nature of Merger, Treatment of Reserve on Amalgamation, Amalgamation after balance sheet date, Acquisition under Business Transfer Agreement (BTA), Accounting for Business Combination as per Ind AS 103, Identifying a business combination, Acquisition Method, Acquisition Date, Applications of Acquisition methods, Common Control Accounting as per Ind AS 103, Accounting for Acquisition-related Transaction Costs, Acquisition of control through the acquisition of Equity Shares, Acquisition of Group of Assets.

Unit 4: Accounting for Mergers and Acquisitions (International Perspective) (9 hours)
Identification of the Acquirer, Determining the Acquisition Date, Recognising and Measuring Identifiable Assets Acquired & Liabilities, Conditions for Recognition (IFRS 3 Paras 10-14), Measurement Principle- Fair Values (IFRS 3 Para 18) subject to Exceptions (IFRS 3 Paras 22-31A), Recognising and Measuring any Non-Controlling Interest (NCI), Identifying and Measuring Consideration (IFRS 3 Para 37), Recognising and Measuring Goodwill or Gain from a Bargain Purchase transaction, Controversies and Dilemma in Accounting for M&A, Accounting for M&A, Features of Pooling Accounting, Criteria for Pooling of Interests, Incentives to choose Pooling Over Purchase, Accounting for Valuation of Goodwill, IFRS-3 on International Accounting Standards for M&A, Comparison between Indian GAAP and IFRS-3.

Unit 5: Laws and Regulations affecting M&A, Demerger and Reverse Merger (9 hours)
Tax Laws, The Companies Act, 2013, The Competition Act, 2002, SEBI Regulations and any other laws and regulations affecting M&A, Substantial Acquisitions and Buyouts in listed and unlisted space, Ethical Considerations in M&A; Conceptualization of Demerger; Tax Laws, The Companies Act, 2013, SEBI Regulations and any other laws and regulations affecting Demerger; Accounting Aspects of Demerger, Demerger *vs.* Reconstruction; Reverse Merger.

General Elective Course- 5.5 (GE-5.5): Marketing for Beginners

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Marketing for Beginners GE- 5.5	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The structure of this course is to provide basic understanding of concepts, principles, tools and techniques of marketing and to provide knowledge about various developments in the marketing scenario in India.

Learning Outcomes

After completion of the course, learners will be able to:

1. Recognise the basic concepts and philosophies of marketing.
2. Demonstrate the dynamics of consumer behaviour and the basic product decisions.
3. Analyse the process of value creation through marketing decisions involving product, pricing and its distribution.
4. Discuss marketing decisions involving product promotion
5. Discuss various developments in the marketing area.

SYLLABUS OF GE-5.5

Unit 1 (9 hours)

Introduction to Marketing: Concept, Scope and Importance; Marketing Philosophies; Marketing Mix for goods and services.

Marketing Environment: Need for studying marketing environment; Micro environment- company, suppliers, marketing intermediaries, customers, competitors, publics; Macro environment- demographic, economic, natural technological, politico-legal and socio-cultural factors.

Unit 2 (9 hours)

Consumer Behaviour: Need for studying consumer behavior; Stages in consumer buying decision process, Factors influencing consumer's buying decisions.

Market Selection: Market segmentation-concept and bases of segmenting consumer markets; Market Targeting; Product Positioning- concept and bases.

Unit 3 (9 hours)

Product Decisions: Concept and classification; Product mix; Branding; Packaging; Labeling; Product support services; Product life cycle-concept and marketing strategies.

Unit 4 (9 hours)

Pricing Decisions: Objectives; Factors affecting price of a product; Pricing strategies for new products- penetration pricing and skimming pricing.

Distribution Decisions: Channels of Distribution**:** types and functions; Wholesaling and retailing; factors affecting the channels of distribution; Distribution Logistics Decisions.

Unit 5 (9 hours)

Promotion Decisions: Communication process; Importance of promotion; Promotion tools: advertising, personal selling, sales promotion, public relations, publicity and direct marketing.

Developments in Marketing: Sustainable Marketing, Rural marketing, Social marketing, Digital marketing – an overview.

Exercises:

The learners are required to:

1. Scan the marketing environment of any product/ service on the basis of its demographic and socio-cultural environment affecting it. Make a presentation on the basis of the report.
2. Study the impact of the factors affecting consumer behaviour of a company marketing health products in the Indian market.
3. Suggest the suitable bases for segmentation of a product, service, event, organization of your choice.
4. Identify 20 brand names of real-life products of your choice and justify as to why they are good brand names.
5. Identify 5 real-life products each that have been using penetration pricing and market-skimming pricing.
6. Analyse the rural marketing strategies of a business organization.

Suggested Readings:

- Baines, P., Whitehouse, S., Rosengren, S., & Antonetti, P. (2021). *Fundamentals of Marketing.* United States: Oxford University Press.
- Etzel, M. J., Walker, B. J., Stanton, W. J., & Pandit, A. (2010). *Marketing.* Delhi, India: McGraw Hill.
- Kotler, P., Armstrong, G., & Agnihotri, P. (2018). *Principles of Marketing.* (Indian edition). Delhi, India: Pearson Education.
- Kotler, P., Chernev, A., & Keller, K. L. (2022). *Marketing Management.* United Kingdom: Pearson Education.
- Levy, M., & Grewal, D. (2022). *Marketing.* New York, United States: McGraw-Hill Education.
- Sharma, K., & Aggarwal S. (2021). *Principles of Marketing.* Delhi, India: Taxmann Publications.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

General Elective Course- 5.6 (GE-5.6): Ethics and Governance

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Ethics and Governance GE-5.6	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

This course is designed keeping in view the dominant role that modern corporations play in creating desirable economic, social and environmental outcomes for the society. As corporate governance is intertwined with social responsibility, it requires a multi-disciplinary approach to understand the associated issues and challenges. Therefore, the course outlines the key theoretical and practical issues underpinning the study of both corporate governance (CG) and corporate social responsibility (CSR) in an integrated fashion.

Learning Outcomes

After completion of the course, learners will be able to:

1. Discuss the concepts, tools and theories of ethics and the issues in ethics.
2. Recognize the essence of ethics in business.
3. Analyse the concept of ethical governance.
4. Discuss major aspects of corporate governance principles and various theories and systems of corporate governance.
5. Describe the recent issues and challenges of governance.

SYLLABUS OF GE-5.6

Unit 1: Introduction to Ethics (9 hours)
Concept of moral reasoning and ethics; Contributions of moral thinkers and philosophers to the concepts of morality; Approaches to Moral reasoning; Essence of Ethics, Dimensions of Ethics; Human Values; Ethical concerns and dilemmas

Unit 2:Business Ethics (9 hours)
Concept; Principles; Theories of Business Ethics; Ethical Organisations, Code of Ethics; Ethical issues in business

Unit 3:Governance of Business Entities (9 hours)
The philosophical basis of governance; Corporate Governance- Meaning and significance; Conceptual framework; Corporate governance systems across the world; Corporate governance in India.

Unit 4:Corporate Frauds (9 hours)
Cases of corporate frauds and scams- Enron, Lehman Brothers; Satyam Computer Services; PNB Heist; IL&FS Fraud, ABG Shipyards, Yes Bank; Governance issues and challenges

Unit 5: Recent Issues and Challenges of Governance (9 hours)
Insider Trading; Whistle Blowing; Shareholders Activism; Class Action suits; Gender Diversity in Boards; Governance of Family entities; Governance of multinational corporations.

Exercises:
The learners are required to:

1. Narrate the cases on ethics and values.
2. Perform simulation exercises to present ethics and ethical dilemmas.

3. Discuss corporate governance concerns highlighted in print and virtual media.
4. Organise brainstorming and discussion sessions on corporate frauds.
5. Prepare a project on critical analysis of recent cases on whistle blowing/insider trading/class action suits.

Suggested Readings:

- Crane, A., Matten, D., Glozer, S., & Spence, L. J. (2019). *Business ethics: Managing corporate citizenship and sustainability in the age of globalization*. Oxford, United Kingdom: Oxford University Press.

- Monks, R. A. G., & Minow, N. (2011). *Corporate governance*. Hoboken, NJ, United States: John Wiley & Sons.

- Reddy, N. K., & Ajmera, S. (2015). *Ethics integrity and aptitude: For Civil Services Main Examination*. Delhi, India: McGraw Hill Education (India) Private Limited.

- Sharma, J. P. (2013). *Corporate Governance, Business Ethics and CSR:(with Case Studies and Major Corporate Scandals)*. Delhi, India: Ane Books Pvt.
- Tricker, B., & Tricker, R. I. (2015). *Corporate governance: Principles, policies, and practices*. New York, United States: Oxford University Press.
- Weiss, J. W. (2022). *Business ethics: A stakeholder and issues management approach*. Oakland, CA, United States: Berrett-Koehler.

Additional Readings:

- Mallin, C. A. (2019). *Corporate governance*. Oxford, United Kingdom: Oxford University Press.

- Rani, D. G., & Mishra, R. K. (2017). *Corporate governance: Theory and practice*. Delhi, India: Excel Books India.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

General Elective Course- 5.7 (GE-5.7): Fundamentals of International Business

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Fundamentals of International Business	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to impart the core body of knowledge in international business to the students. The course would introduce students to the international trading and investment environment and also create awareness about emerging issues such as outsourcing and sustainable development in the context of international business.

Learning Outcomes

After completion of the course, learners will be able to:

1. Analyse the process of globalization and its impact on growth of international business.
2. Evaluate the changing dynamics of the diverse international business environment.
3. Analyse the theoretical dimensions of international trade as well as intervention measures adopted.
4. Analyse the significance of different forms of regional economic integration and the role played by various international economic organisations.
5. Evaluate the forms of foreign direct investment and analyse benefits and costs of FDI.
6. Discuss emerging issues in international business such as outsourcing and sustainable development.

SYLLABUS OF GE-5.7

Unit 1: **Introduction to International Business (7 hours)**
Globalization - concept, significance and impact on international business; international business contrasted with domestic business; complexities of international business; internationalization stages and orientations; modes of entry into international businesses.

Unit 2: International Business Environment (11 hours)
Role of political and legal systems in international business; cultural environment of international business;implications of economic environment for international business.

Unit 3: International Trade (9 hours)
Theories of international trade – Theory of Absolute Advantage theory, Theory of Comparative Advantage, Factory Proportions theory and Leontief paradox, Product Life Cycle theory, Theory of National Competitive Advantage; Instruments of trade control.

Unit 4: Regional Economic Integration and International Economic Organisations (9 hours)
Forms of regional economic integration; Integration efforts amongst countries in Europe, North America and Asia: EU, USMCA, and SAARC; Cost and benefits of regional economic integration.
International Economic Organisations: WTO- functions, structure and scope; World Bank and IMF

Unit 5: International finance and contemporary issues in IB (9 hours)
Types of FDI - Greenfield investment, Mergers & Acquisition, strategic alliances; benefits and drawbacks of FDI
Overview of Exchange Rate systems

Contemporary issues in international business: Outsourcing and its potential for India; international business and sustainable development.

Exercises:
The learners are required to:

1. Demonstrate through case studies the suitability of each mode of entry in international business.
2. Conduct a comparative analysis of countries which are different in terms of political/legal/economic/cultural environment to understand the impact of these dimensions on international business.
3. Analyse data on trade of select countries to examine if trade patterns conform to different trade theories.
4. Conduct an in-depth study of a regional economic arrangement and evaluate its costs and benefits by applying the theoretical knowledge gained during the course
5. Make presentations on developments in contemporary issues affecting international business such as sustainable development.
6. Comment on various emerging issues in international business such as outsourcing and sustainable development

Suggested Readings:

- Bennett, R. (2006). *International Business.* Delhi, India: Pearson.
- Cavusgil, S. T., Knight, G., & Riesenberger, J. (2007). *International Business: Strategy, Management and the New Realities.* Delhi, India: Pearson India.
- Chaturvedi, D. D., Jindal, D., & Kaur, R. (2022). *International Business.* Delhi, India: Scholar Tech Press.
- Daniels, J. D., Radenbaugh, L. H., & Sullivan, D. P. (2016). *International Business.* Pearson Education.
- Griffin, R. W., & Pustay, M. W. (2014). *International Business - A Managerial Perspective.* Pearson.
- Hill, C. W. L., & Jain, A. K. (2011). *International Business.* Delhi, India: Tata McGraw Hill.
- Joshi, R. M. (2009). *International Business.* Oxford University Press.
- Menipaz, E., Menipaz A., & Tripathi S. S. (2017). *International Business: Theory and*

Practice. Delhi, India: Sage Publications India Pvt. Ltd.

Additional Resources

- Economic Survey, various issues.
- RBI Report on Currency & Finance, various issues.
- World Investment Reports, UNCTAD
- Websites: RBI, IMF, WORLD BANK, WTO.
- WTO Annual reports

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

General Elective Course- 5.8 (GE-5.8): Project Management

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Project Management GE- 5.8	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to enable the learners to evolve a suitable framework for the preparation, appraisal, monitoring, and control of projects undertaken in an organisation.

Learning Outcomes

After completion of the course, learners will be able to:

1. Discuss the concept and attributes of projects, project management system, process and its principles.
2. Analyse technical feasibility, marketing feasibility and commercial viability of a project.
3. Demonstrate project scheduling and appraisal using various techniques.
4. Describe and calculate project duration and assess the project cost.
5. Evaluate project management in terms of risk and performance.

SYLLABUS OF GE-5.8

Unit 1: Introduction (5 hours)

Concept and attributes of Project, Project Management Information System, Project Management Process and Principles, Role of Project Manager, Relationship between Project Manager and Line Manager, Project Stakeholder Analysis, Identification of Investment opportunities, Project life cycle, Project Planning, Monitoring and Control of Investment Projects, Pre-Feasibility study, Identify common sources of conflict within a project environment.

Unit 2: Project Preparation and Budgeting (11 hours)

Technical Feasibility, Marketing Feasibility, Financial Planning: Estimation of Costs and Funds (including sources of funds), Loan Syndication for the Projects, Demand Analysis and Commercial Viability (brief introduction to NPV), Project budget, Collaboration Arrangements, Tax considerations and legal aspects.

Unit 3: Project Scheduling and Appraisal (9 hours)

Decomposition of work into activities, determining activity-time duration. Business Criterion of Growth, Liquidity and Profitability, Social Cost Benefit Analysis in Public and Private Sector, Investment Criterion and Choice of techniques, Estimation of Shadow prices and Social discount rate.

Unit 4: Project Planning Techniques (11 hours)
Determine project duration through critical path analysis using PERT & CPM techniques. Resource allocations to activities. Cost and Time Management issues in Project Planning and Management.

Unit 5: Project Risk and Performance Assessment (9 hours)
Project Risk Management- Identification, Analysis and Reduction, Project quality management, Project Performance Measurement and Evaluation, Project Report, Project Closure and Audit.

Exercises:
The learners are required to:

1. Discuss project management systems of various organisations through case studies.
2. Analyse technical feasibility, marketing feasibility and commercial viability of a hypothetical project.
3. Discuss case studies on Social Cost Benefit Analysis in the Public and Private sector.
4. Evaluate PERT and CPM techniques using case studies.
5. Analyse case studies on project risk management.

Suggested Readings

- Chandra, P. (2019). *Projects: Planning, Analysis, Selection, Financing, Implementation and Review.* Delhi, India: Tata McGraw Hill.
- Gido, J., & Clements, J. P. (2015). *Project Management.* Delhi, India: Cengage Learning Pvt. Ltd.
- Gray, C. F., Larson, E. W., & Desai, G. V. (2014). *Project Management: The Managerial Process.* Delhi, India: Tata McGraw Hill.
- Khatua, S. (2011). *Project Management and Appraisal.* Oxford, United Kingdom: Oxford Press University.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

General Elective Course- 5.9 (GE-5.9): Computer Applications in Business

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Computer Applications in Business GE- 5.9	4	1	0	3	Pass in Class XII	NIL

Learning Objectives

This paper aims to impart computer knowledge that will enable them with the ability to handle and analyse data for decision making and presenting it to the person concerned in the form of presentations and/or reports in the fast-moving business world.

Learning Outcomes

After completion of the course, learners will be able to:

1. Describe the various concepts and terminologies used in computing, computer networks and the internet.
2. Examine document creation for report making and communication.
3. Create innovative and creative presentations.
4. Analyse various computations using various functions in the area of accounting and finance and represent the business data using suitable charts. S/he should also be able to manipulate and analyse the business data for better understanding of the business environment and decision making.
5. Examine the spreadsheet knowledge acquired through this paper in solving real life problems that help in decision making.

SYLLABUS OF GE-5.9

Unit1: Introduction (4 hours)

Computing: Concept of computing, Data and information; Computing Interfaces Graphical User Interface (GUI), Command Line Interface (CLI), Touch Interface, Natural Language Interface(NLI); data processing; applications of computers in business.

Computer Networks: Meaning of computer network; objectives/ needs for networking; Applications of networking; Basic Network Terminology; Types of Networks; Network

Topologies; Distributed Computing: Client Server Computing, Peer- to- peer Computing; Wireless Networking; Securing Networks: firewall.

Basic Internet Terminology: I.P. Address, Modem, Bandwidth, Routers, Gateways, Internet Service Provider (ISP), World Wide Web (www), Browsers, Search Engines, Proxy Server, Intranet and Extranet; Basic Internet Services; Internet Protocols: TCP/IP, FTP, HTTP(s), Uses of Internet to Society; Cyber Security: Cryptography, digital signature.

Unit 2: Word Processing (3 hours)

Introduction to word Processing, Word processing concepts, Use of Templates and styles, Working with word document: Editing text, Find and replace text, Formatting, spell check, Autocorrect, Auto-text; Bullets and numbering, Tabs, Paragraph Formatting, Indent, Page Formatting, Header and footer, page break, table of contents, Tables:Inserting, filling and formatting a table; Inserting Pictures and Video; Mail Merge (including linking with spreadsheet files as data source); Printing documents; Citations, references and Footnotes.

Unit 3: Preparing Presentations (2 hours)

Basics of presentations: Slides, Fonts, Drawing, Editing; Inserting: Tables, Images, texts, Symbols, hyperlinking, Media; Design; Transition; Animation; and Slideshow, exporting presentations as pdf handouts and videos.

Unit 4: Spreadsheet basics (3 hours)

Spreadsheet concepts, Managing worksheets; Formatting, conditional formatting, Entering data, Editing, and Printing and Protecting worksheets; Handling operators in formula, Project involving multiple spreadsheets, Organizing Charts and graphs; Flash-fill; Working with Multiple worksheets; controlling worksheet views, naming cells and cell ranges.

Spreadsheet functions: Mathematical, Statistical, Financial, Logical, Date and Time, Lookup and reference, Text functions and Error functions

Working with Data: Sort and filter; Consolidate; Tables; Pivot tables; What–if-analysis: Goal seek, Data tables and Scenario manager.

Unit 5: Spreadsheet projects (3 hours)

Creating business spreadsheet: Loan repayment scheduling; forecasting: stock prices, costs & revenues; Payroll statements; handling annuities and unequal cash flows; Frequency distribution and its statistical parameters and break-even analysis.

Note:The General Purpose Software referred in this course will be notified by the University Departments every three years. If the specific features, referred in the detailed course above, is not available in that software, to that extent it will be deemed to have been modified.

Practical Exercises:
The learners are required to:

1. Analyze and compare the different mobile payment apps (at least 5) on the basis of their pros and cons and prepare a report on the same in word document using table of contents, bullets, numbering, citations, etc. Also prepare a presentation for the same.

2. Using mail merge utility of word processing for either sending letters or for creating any other document like salary slip/ utility bills to be delivered to multiple recipients using data from a business organization or of the peer students.

3. Identify a topic related to any business operation and prepare a PowerPoint Presentation with all the above functions therein.

4. Prepare a Spreadsheet document with any hypothesized data and perform all the above functions therein.

5. Take secondary data from a company's income statement and balance sheet for five to ten years. All learners are required to conduct the Ratio Analysis and forecast values for different items of these statements for the next five to ten years.

6. Use logical, mathematical and statistical functions of spreadsheets. The learners should be able to analyse the results of the class test using hypothesized data to determine the students who passed or failed, assigning them ranks like first, second, third, etc., finding out number of absentees, counting no. of students scoring marks with distinction, etc.

7. Prepare repayment schedule of the loans that they borrow, prepare a payroll statement using spreadsheet functions listed above and analyse different investment opportunities using financial functions.

8. Take live data from the website of the Government of India, use Spreadsheet for preparing frequency distribution, graphs, and calculate statistical measures like mean, median, mode, standard deviation, Correlation etc.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Semester-VI
(B.Com)

Discipline Specific Core Course- 6.1 (DSC-6.1): Business Analytics

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Business Analytics DSC- 6.1	4	2	0	2	Pass in Class XII	Studied Business Statistics (DSC-3.1)

Learning Objectives

This course aims to introduce the learners to business intelligence and analytics which includes describing business data, analysing the data using various statistical tools for creating predictive models and making inferences for solving business problems and for providing assistance in business decision making.

Learning Outcomes:

After completion of the course, the learners will be able to:

1. Describe skills for computation and aggregation of data using spreadsheets.
2. Analyse data with the help of pivot tables and pivot charts.
3. Analyse data using R packages and interpret the results.
4. Identify linear regression models using spreadsheet & R and interpret the results.
5. Examine textual data analysis using R.

SYLLABUS OF DSC-6.1

Unit 1: Introduction (3 hours)

Data and Data Science; Data analytics and data analysis, Classification of Analytics, Application of analytics in business, Types of data: nominal, ordinal, scale; Big Data and its characteristics, Applications of Big data. Challenges in data analytics.

Unit 2: Data Preparation, Summarisation and Visualisation Using spreadsheet (6 hours)

Data Preparation and Cleaning, Sort and filter, Conditional formatting, Text to Column, Removing Duplicates, Data Validation, identifying outliers in the data, covariance and correlation matrix, Moving Averages, Finding the missing value from data; Summarisation; Visualisation: scatter plots, line charts, histogram, etc., Pivot Tables, pivot charts and interactive dashboards.

Unit 3: Getting started with R (6 hours)

Introduction to R, Advantages of R, Installation of R Packages, Importing data from spreadsheet files,

Commands and Syntax, Packages and Libraries, Data Structures in R - Vectors, Matrices, Arrays, Lists, Factors, Data Frames, Conditionals and Control Flows, Loops, Functions, and Apply family.

Unit 4: Descriptive Statistics Using R (6 hours)
Importing Data file; Data visualisation using charts: histograms, bar charts, box plots, line graphs, scatter plots. etc; Data description: Measure of Central Tendency, Measure of Dispersion, Relationship between variables: Covariance, Correlation and coefficient of determination.

Unit 5: Predictive and Textual Analytics (9 hours)
Simple Linear Regression models; Confidence & Prediction intervals; Multiple Linear Regression; Interpretation of Regression Coefficients; heteroscedasticity; multi-collinearity.
Basics of textual data analysis, significance, application, and challenges. Introduction to Textual Analysis using R. Methods and Techniques of textual analysis: Text Mining, Categorization and Sentiment Analysis.

Note:
The General Purpose Software referred in this course will be notified by the University Departments every three years. If the specific features, referred to in the detailed course above, are not available in that software, to that extent it will be deemed to have been modified.

Practical Exercises (60 hours):

The learners are required to

1. Showcase their understanding of the basics of Spreadsheet: Organizing data with Spreadsheet – Performing simple computations and aggregations using Spreadsheet - Working with Summing and other Reporting functions in Spreadsheet - Working with pivot tables and charts - Using Spreadsheet for Data Analytics: Power Query - Power Pivot - Power view - Power Map - Building tips – Display tips - Keyboard shortcuts – Mouse shortcuts - Standardized layouts - Understanding table-based and spreadsheet-based layouts.

2. Showcase their understanding of data cleansing techniques using External Data – Searching and Combining Data with Power Query: Getting started with Power Query - Know the Environment tabs and toolbars - Access new or existing reports - Importing and combining data from databases, web, files - Splitting and aggregating data - Discovering and Analyzing Data with Power Pivot: Database concepts - Loading Data into Power Pivot - Using Power Query and Power map add-ins - Designing Pivot Table reports - Filtering data – Creating Custom functions and formulas - Formatting Pivot Tables - Managing Power Pivot Data - Setting Connection properties - Managing Data sources - Configuring Pivot Table Options, Preparation of Histograms - Pareto charts – Boxplots - Treemap and Sunburst charts.

3. Create Linear Regression Models using Spreadsheet; Interpretation of results. Applying tests for heteroscedasticity and multi-collinearity.

4. Read datasets into R - Export data from R - Manipulate and Process Data in R - Use functions and packages in R - Demonstrate with a Case Study to perform basic analytics using R.

5. Use R for analysing textual data; Data loading into Python; Pre-processing and Text Clean up; Generating a TF-IDF (Term Frequency Inverse Document Frequency) Matrix; Data Clustering; Visualization & Reporting.

Discipline Specific Core Course- 6.2 (DSC-6.2): Corporate Governance

Course title & Code	Credits	Credit distribution of the Course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Corporate Governance DSC- 6.2	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to develop critical thinking ability and provide knowledge of corporate governance, its procedures, techniques in accordance with current legal requirements and professional standards.

Learning Outcomes

After completion of the course, learners will be able to:

1. Describe the concept and significance of corporate governance in a business setup
2. Analyse the role of the board of directors.
3. Discuss important dimensions in corporate governance.
4. Analyse global corporate failures; understand International Codes and its implications.
5. Evaluate corporate governance regulatory framework in India.
6. Assess and analyse the problems of corporate governance in Indian Inc.

SYLLABUS OF DSC-6.2

Unit 1: Conceptual Framework of Corporate Governance (9 hours)

Corporate Governance: Meaning, significance and principles; Management and corporate governance; Theories of Corporate Governance: Agency Theory, Stewardship theory, Stakeholder Theory, Resource Dependency Theory, Managerial Hegemony Theory; Models of Corporate Governance; Art of Governance as per Kautilya's Arthashastra.

Unit 2: Recent Issues and Challenges of Corporate Governance (9 hours)

Board structure and Directors; Role of Board; Board Committees and their functions; Insider Trading; Whistle Blowing; Shareholders Activism; Role of institutional investors; Class Action suits. CSR and Corporate Governance, Concept of Gandhian Trusteeship.

Unit 3: Global Corporate Failures and International Codes (9 hours)
BCCI (UK), Maxwell (UK), Enron (USA), World.Com (USA), Vivendi (France), Lehman Brothers; Sir Adrian Cadbury Committee 1992, SOX 2002, OECD Principles of Corporate Governance.

Unit 4: Corporate Governance Regulatory Framework in India (9 hours)
Regulatory framework in India: Kumar Mangalam Birla (1999), NR Narayana Murthy Committee (2005), Relevant provisions of Companies Act, 2013, SEBI: Listing Obligations and Disclosure Requirements Regulations (LODR), 2015 and Uday Kotak Committee (2017).

Unit 5: Corporate Failures and Scams in India (9 hours)
Satyam Computer Services Ltd, Kingfisher Airlines, PNB Heist, IL&FS Group Crisis; ICICI Bank, Yes Bank; Common Governance Problems in various corporate failures in India and abroad.

Exercises:
The learners are required to:
1. Identify and analyse corporate governance models followed by companies incorporated in India and abroad.
2. Analyse Board composition and Board committees of different companies; Analyse cases on the topic of Whistle blowing/ Shareholder activism/ Insider trading.
3. Critically analyse global corporate governance failure and identify corporate governance issues therein.
4. Identify corporate governance issues and concerns raised in context of Indian companies and their implications (from published sources newspapers or websites).
5. Comment on the latest corporate governance regulatory framework in India.
6. Critically analyse major corporate governance failure to suggest common governance problems in Indian context.

Suggested Readings:

- *A handbook of corporate governance*. (2022). (3rd ed.). Institute of Directors. Delhi, India: IOD Publishing.
- Das, S. C. (2018). *Corporate governance in India: an evaluation.* Delhi, India: PHI Learning Private Limited.
- Goel, S. (2019). *Corporate governance: principles and practices.* (1st ed.). Delhi, India: McGraw Hill Education (India) Private Limited.
- Sharma, J. P. (2018). *Corporate governance, business ethics and csr: (with case studies and major corporate scandals).* Delhi, India: Ane Books Pvt. Ltd.
- Tricker, B., & Tricker, R. I. (2015). *Corporate governance: principles, policies, and practices.* United States: Oxford University Press.
- Tricker, B. (2020). *Elements in corporate governance*. United Kingdom: Cambridge University Press.

Additional Resources:

- Mallin, C. A. (2019). *Corporate governance.* (6th ed.). Oxford, United Kingdom: Oxford University Press.
- Rani, D. G., & Mishra, R. K. (2017). *Corporate governance: theory and practice.* Delhi, India: Excel Books.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Latest amendments to the regulations shall be referred.

Discipline Specific Core Course- 6.3(DSC-6.3): Goods & Services Tax (GST) and Customs Law

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Goods & Services Tax (GST) and Customs Law DSC- 6.3	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to impart knowledge of principles and provisions of GST and Customs Law, the important legislation dealing with the indirect tax system in India; and to enable the students to apply the same practically.

Learning Outcomes:

After completion of the course, learners will be able to:

1. Describe the rationale of Goods and Services Tax (GST), constitutional amendment carried out to install GST in India and comprehend the composition and working of the GST council.
2. Interpret the meaning of supply under GST law, differentiate between intra-state and inter-state supply, provisions related to place of supply, time of supply and compute the value of supply.
3. Explain the utilization of input tax credit and the provisions of reverse charge mechanism.
4. Define various returns under GST and payment of taxes.

5. Evaluate the concepts of Customs Act, various custom duties and computation of the assessable value for charging customs duty.

SYLLABUS OF DSC-6.3

Unit 1: Structure, Registration and Exemptions (9 hours)

Constitutional framework of indirect taxes before GST; Rationale for GST; Structure of GST (SGST, CGST, UTGST & IGST); GST Council; GST Network; State compensation mechanism; Registration; Exemptions from GST.

Unit 2: Levy and Collection of GST (15 hours)

Scope of 'Supply'; Nature of supply: Inter-State, Intra-State; Classification of goods and services; Composite and Mixed supplies; Composition levy scheme; Place of supply; Time of supply; Value of supply.

Unit 3: Input Tax Credit and Reverse Charge Mechanism (9 hours)

Eligible and ineligible input tax credit; Apportionments of credit and blocked credits; Tax credit in respect of capital goods; Availability of tax credit in special circumstances; Reverse Charge Mechanism.

Unit 4: Tax invoice, Returns and Payment of Tax (7 hours)

Tax Invoice, Credit and debit notes, and e-Way bills; Returns; Payment of taxes; Taxability of e-Commerce.

Unit 5: Customs Law (5 hours)

Basic concepts, Territorial waters and High seas; Types of custom duties; Valuation.

Note:*In case of any subsequent notifications/amendments regarding GST or customs law by the government, the syllabus would be updated accordingly.*

Exercises:
The learners are required to:

1. Discuss relevant provisions of the CGST Act, IGST Act, GST (Compensation to States) Act and Constitution (One Hundred and First Amendment) Act from the official website of Government of India.
2. Refer relevant notifications and circulars from the official website of Government of India to differentiate between intra-state and inter-state supply and provisions related to place of supply.
3. Illustrate the utilization of input tax credit and the provisions of reverse charge mechanism.
4. Identify the eligible and ineligible tax credit under various circumstances.
5. Study cases related to utilization of input tax credit.

6. Enlist the process of returns under GST and payment of taxes.
7. Illustrate computation of the assessable value for charging customs duty with hands-on exercise.
8. Gather information available under the heading 'Popular help topics' on the official website of the Government of India.

Discipline Specific Elective Course- 6.1 (DSC-6.1): Human Resource Development

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Human Resource Development DSE-6.1	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to make students understand the various aspects of human resource development and its contribution in the organization.

Learning Outcomes

After completion of the course, learners will be able to:

1. Define the concept of human resource management and the role of HR manager.
2. Analyse the role of HRD strategies in organisations
3. Apply and evaluate a learning process starting with training needs, analysis, assessment and evaluation process
4. Explore the role of training needs of employees
5. Evaluate the training methods used in industry

SYLLABUS OF DSE-6.1

Unit 1: Introduction (7 hours)

Human Resource Development (HRD)- concept, components, evolution, need and significance, difference between human resource management and human resource development, Role of HR manager, Contemporary issues in HRD.

Unit 2: Strategic Perspectives in HRD (11 hours)

Concept of Strategic HRD, HRD Interventions-Performance Appraisal, Potential Appraisal, Performance Coaching and Feedback, Career Planning, Training, Systems Development, Rewards, Employee Welfare and Work-Life Balance.

Unit 3: Instructional Technology for HRD (9 hours)
Learning and HRD, Models and Curriculum, Principles of Learning, Individual and Group Learning, Assessment Centre, Transactional Analysis, Behaviour Modeling and Self- Directed Learning, Evaluating the HRD.

Unit 4: Human Resource Training and Development (T&D) (9 hours)
Concept and Importance, Assessing Training Needs, Designing and Evaluating Training & Development Programmes, Role, Responsibilities and Challenges to Training Managers.

Unit 5: Training Methods (9 hours)
Training within Industry: On the Job & Off the Job Training, Management Development: Lecture Method, Role Play, In-basket Exercise, Simulation, Vestibule Training, Management Games, Case Study, Programmed Instruction, Sensitivity Training.

Exercises:

The learners are required to:

1. Engage themselves in manager competencies through developing and implementing experiential sessions
2. List the various rewards and employee welfare schemes
3. Assess the ways of self-directed learning
4. Design and evaluate training and development programs.
5. Analyse the case studies to understand various training methods.

Suggested Readings:

Discipline Specific Elective Course- 6.2 (DSE-6.2): Fundamentals of Investment

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Fundamentals of Investment DSE-6.2	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to familiarize learners with different aspects of investment management and risks, introduce them to the framework of securities analysis and valuation and highlight the process of portfolio management.

Learning Outcomes: After completion of the course, learners will be able to:

1. Analyze the environment of investment and risk return framework.
2. Explain bonds in terms of valuation, yields, and risks.
3. Analyze equity shares using different approaches and models.
4. Construct, analyse, select and evaluate portfolios along with a deep understanding of capital market theory and associated models.
5. Comprehend and analyse futures and options and to be able to devise own investment strategies using various options trading strategies in the derivative market.

SYLLABUS OF DSE-6.2

Unit1: Introduction to Investment (9 hours)

Concept of Investment; Investment Decision Process; Avenues for investment- features and classes; Difference between investment, speculation, and gambling; Primary market and Secondary Markets- Trading of securities; Security market indices; Return and risk: concept, calculation; trade-off between risk and return; Impact of taxes and inflation on investments.

Unit 2: Bond Analysis and Valuation (9 hours)

Bond Fundamentals, Estimating bond yields; Bond Valuation; Relationship between bonds prices, interest rates and term to maturity; bond risks and credit rating.

Unit3: Equity Analysis and Valuation (9 hours)

Fundamental Analysis, Technical Analysis and Efficient Market Hypothesis; Valuation of Equity Shares using Dividend Discount Model and P/E Ratio model.

Unit4: Portfolio Management (9 hours)

Portfolio Management- Concept and need; Measurement of Portfolio Return and risk; Diversification-Markowitz Theory; Capital Asset Pricing Model.

Unit5: Mutual Fund and Derivatives (9 hours)

Mutual Fund-concept and types; Overview of Financial Derivatives-Forwards; Futures and Options.

Exercises:
The learners are required to:

1. Extract historical data on daily/monthly/annual prices for stocks in an index from a financial database. Evaluate them in terms of risk and return using appropriate software.
2. Participate in a group discussion on 'Verifying the existence of Bond price – yield relationship in today's times with real life examples'.
3. Estimate the Yield-to-Maturity of a corporate bond using relevant software.
4. Carry out moving average analysis on a stock of a real company to decide whether to buy, sell or hold the stock for one month using spreadsheets. Further, learners are also required to assess their decision after one month of decision making.
5. a) Draft a case study to devise an investment strategy for yourself in the short term based on your risk aversion.
   b. Prepare a presentation to demonstrate real-life examples of stock market anomalies.
6. Select any 5 companies of your choice. Using appropriate models, forecast their future cash flows, growth rate and cost of capital. Estimate the intrinsic value of stocks of these companies using relevant software.
7. Select any 5 stocks of your choice. Extract past data on their prices and volumes from a financial database. Make investment decisions using appropriate technical analysis tools and techniques. Use any technical analysis software for this purpose.
8. Construct portfolios based on any firm attribute using past data on NSE 500 stocks. Assess the profitability of this investment strategy. Evaluate if the returns on this strategy are explained by standard risk models such as CAPM. Use relevant software for your estimations.
9. Build and analyse option strategies for Index and Stock options using any option building analytical tool.

Discipline Specific Elective Course- 6.3(DSE-6.3): Advertising

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Advertising DSE-6.3	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The objective of this paper is to familiarise the students with concepts and techniques of advertising used in marketing.

Learning Outcomes

After completion of the course, learners will be able to:

1. Discuss communication objectives behind advertising of various products and services.
2. Describe advertising appeals, elements of print and broadcast advertisement.
3. Elucidate various advertising and media elements in the advertising decisions.
4. Discuss advertising effectiveness.
5. Explain various organizational arrangements and examine the ethical and legal issues of advertising.

SYLLABUS OF DSE-6.3

Unit 1: Introduction to Advertising (9 hours)

Communication Process-basic and elements; Communication Response Hierarchy Models: AIDA Model, Hierarchy of Effects Model, Advertising: significance, types and objectives; DAGMAR Approach; Target audience selection – approaches and basis; Setting of advertising budget: determinants and major methods. Integrated marketing communication- meaning and process.

Unit 2: Advertising Message (9 hours)

Advertising appeals – types; Advertising Copy - Elements of print and broadcast advertisements

Unit 3: Advertising Media Decisions (9 hours)

Major media types: merits and demerits; Factors influencing media choice; Media scheduling-types.

Unit 4: Advertising: Effectiveness (9 hours)

Rationale of Measuring Advertising Effectiveness: Evaluating Communication and Sales effects; Pre and Post-testing techniques

Unit 5: Organisational Arrangements (9 hours)

Advertising Agency: Role, types and selection; Agency remuneration - methods
Social, ethical and legal aspects of advertising in India; Role of Advertising Standards Council of India (ASCI), Recent developments and issues in Advertising

Exercises:

The learners are required to:

1. Discuss communication objectives behind advertising of any product or service.
2. Identify advertising appeals used in any advertisement.
3. Identify various media elements in advertising decisions.
4. Discuss a case study on advertising effectiveness.
5. Present a report on the role of ASCI.
6. Comment on various ethical and legal issues in advertising.
7. Perform a content analysis of various advertising campaigns to:
    a. Identify the objective of an advertisement forming part of an advertising campaign.
    b. Find out the target audience of a campaign.
    c. Prepare a report on various media options used in a campaign.
    d. Prepare a report on message strategy and copy elements used in the campaign.
8. Develop an advertising campaign for any product or service.

Suggested Readings:

Discipline Specific Elective Course- 6.4 (DSE-6.4): Business Research Methodology

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Business Research Methodology DSE-6.4	4	3	0	1	Pass in Class XII	NIL

Learning Objectives

The course aims to inculcate research aptitude among the learners and equip them with knowledge and skills required to successfully undertake various steps in the research process.

Learning Outcomes

After completion of the course the learners will be able to:

1. Define various research concepts, its types and steps in the research process.
2. Analyse and formulate research problems and assimilate various types of research design.
3. Discuss different scales, sampling techniques and design data collection tools.
4. Interpret and get acquainted with various techniques of data analysis and interpretation.
5. Analyse and prepare a complete research report in appropriate format.

SYLLABUS OF DSE-6.4

Unit 1: Introduction (9 hours)

Meaning and Scope of Research; Application of research in Business; Types of Research- qualitative, quantitative, longitudinal, cross-sectional, fundamental, applied, conceptual and empirical; Characteristics of Good Research; Steps in Research Process; Terminologies of research- Concept, Construct, Variables, Proposition and Hypothesis. Theory and Model; Literature Review and Formulation of Research Question; Philosophies of Research; Induction and Deduction Approach.

Unit 2: Research Design (9 hours)

Research Design- Meaning and Characteristics; Types of Research Design- Exploratory, Descriptive and Experimental. Meaning, Examples and Characteristics of Exploratory Research Design. Methods of Exploratory Research Design. Steps in Exploratory Research. Meaning, Characteristics and Methods of Descriptive Research Design with examples. Meaning and Types of Experimental Research Design.

Unit 3: Data Collection (9 hours)

Measurement and Scaling; Primary scales of Measurement (Nominal, Ordinal, Interval and Ratio). Scales for Measurements of Constructs- Likert, Semantic Differential Scale and Staple; Reliability and Validity; Meaning and Sources of Primary and Secondary Data; Questionnaire Design (also using online tools); Census and Survey Method; Probability and Non-Probability Sampling Techniques; Sample Size Determination.

Unit 4: Data Analysis Using Spreadsheet (9 hours)

Data Preparation and Cleaning; Graphical Presentation of Data; Frequency Distribution, Descriptive Statistics; Steps in Hypothesis Testing; Hypothesis Testing- parametric (z test and t test) and non-parametric (chi- square test).

Unit 5: Report Writing and Ethics (9 hours)

Types of Reports; Steps in Report Writing; Format and Presentation of Report, Referencing (APA, Chicago manual etc.), Ethics in Business Research.

Practical Exercises (30 hours):

The learners are required to:

1. Prepare literature review from a topic of your choice involving business and economics. Also, comment on the following case 1:

Case 1: A product manager wants to know the viability of a new innovative product being launched by his company. What are the steps that need to be followed in his research?

2. Identify the type of a research design that will be most appropriate in a given scenario as per Case 1..
3. Apply online tools and platforms, design a questionnaire using various kinds of questions including Likert scale statements to address a particular business problem.
4. Use spreadsheet to practice t- test, z-test and Chi- square test on the secondary data from a given sample set of data.
5. Prepare a brief report following proper format in Word processing software.

Discipline Specific Elective Course- 6.5 (DSE-6.5): Social Accounting

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Social Accounting DSE-6.5	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to help learners to know issues in Social Accounting and Reporting and how these issues can be reported more transparently and responsibly.

Learning Outcomes

After completion of the course, learners will be able to:

1. Compare Conventional Accounting System with Social Accounting.
2. Describe and measure various Social Costs and Social Benefits
3. Analyse Corporate Social Accounting.
4. Evaluate the framework and standards of Corporate social reporting.
5. Evaluate the impact of corporate activities at the National and Global Levels.

SYLLABUS OF DSE-6.5

Unit 1: Conventional Accounting and Shift in Paradigm (6 hours)
Traditional Framework of Accounting, Limitations with traditional framework of Accounting, Shift in Paradigm. Historical Development & Evolution of Social Accounting. Rationale for Social Accounting.

Unit 2: Social Benefits and Costs (9 hours)
Social Benefits and Costs. Measurement of Costs and Benefits. Social Impact Assessment of Business Activities. Seidler's Model for Social Income Statement, Abt's Model, Ralph's Comprehensive Social Benefit Cost Model.

Unit 3: Corporate Social Accounting (9 hours)
Definitions of Social Accounting, Responsibility Accounting, Objectives & Scope of Social Accounting. Role & Importance. Social Accounting in India. Approaches, Challenges in Social Accounting. Theories of Social Accounting (Stakeholder, Legitimacy, Institutional).

Unit 4: Corporate Responsibility Approach for Reporting (11 hours)
Social Performance Indicators. Corporate Social Responsibility, CSR Reporting Framework in Companies Act 2013. Sustainability Reporting. Triple Bottom Line. SEBI Guidelines on Business Responsibility & Sustainability Reporting. Stakeholder Engagement and Reporting. Need for Corporate Social Reporting.

Unit 5: National and Global Social Accounting (10 hours)
International accounting standards, frameworks, and guidance – SASB, GRI, SDG. National Income and Social Accounting, Social Accounting Matrix. Social Audit and Assurance. Socially Responsible Investment.

Exercises:

The learners are required to:

1. Prepare a small report on conventional accounting and shift in a paradigm based on the research papers.
2. Identify the different types of social costs based on the financial statements of selected companies.
3. Give a presentation on corporate social accounting by collecting information from the annual reports of select companies.
4. Evaluate the impact of the Corporate Responsibility Approach for Reporting on the financial performance of the select national companies based on their financial statements.
5. Prepare a project on analysing unique aspects of social accounting in the nonprofit sector and reporting on social outcomes and impact for nonprofits.
6. Do a comprehensive analysis of National and Global Social Accounting standards and procedures.

Suggested Readings:

Discipline Specific Elective Course- 6.6 (DSE-6.6): Environmental Accounting

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Environmental Accounting DSE-6.6	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to help learners to know issues in Environmental Accounting and how these issues can be reported more transparently and responsibly.

Learning Outcomes

After completion of the course, learners will be able to:

1. Compare the Conventional Accounting System with Environmental Accounting.
2. Describe the Environmental costs and benefits.
3. Analyse Corporate Environmental Accounting.
4. Analyse the rationale of the New Accounting Framework and the Corporate Responsibility Approach.
5. Evaluate the impact of corporate activities at the National and Global Levels.

SYLLABUS OF DSE-6.6

Unit 1: Conventional Accounting and Shift in Paradigm (6 hours)

Traditional Framework of Accounting, Limitations with traditional framework of Accounting, Shift in Paradigm, Increasing awareness of Environmental Issues. Rationale for Environmental Accounting. Importance of environmental accounting in sustainable development.

Unit 2: Environmental Costs (9 hours)

Different Levels of Environmental Costs, Components of Environmental Costs, Externalities, Costs of Externalities, True Cost and Hidden Cost and Life Cycle Assessment, Role of Environmental Costing, Environmental cost-benefit analysis, Energy and Environmentally Differentiated Accounting

Unit 3: Corporate Environmental Accounting (9 hours)

Corporate Environmental Accounting, Environmental Accounting Methods, Environmental Management Accounting and Environmental Audit. Carbon Accounting, Carbon footprint calculation and reduction strategies. Environmental Performance Indicators

Unit 4: Corporate Reporting on Environmental Impact (9 hours)

Triple Bottom Line Reporting, CSR Reporting and Green Accounting, SEBI Guidelines on Business Responsibility & Sustainability Reporting. Need & Significance of Environmental Reporting Standards, GRI, SASB, BR&SR. Green Energy Stocks & ESG Index

Unit 5: National and Global Environmental Accounting (12 hours)
National Environmental Accounting, System of Integrated Environmental and Economic Accounts (SEEA), Economy-wide material flow accounts, Environmental protection expenditure accounts, Assessment of Environment Cost and Benefits, Green Accounts and Green GDP, Greenhouse Gas Emissions; Global Environmental Accounting, Sustainable Economic Development and Environmental Kuznets Curve.

Exercises:
The learners are required to:

1. Prepare a small report on conventional accounting and shift in a paradigm based on the research papers.
2. Identify the different types of environmental costs based on the financial statements of selected companies.
3. Give a presentation on corporate environmental accounting by collecting information from the annual reports of select companies.
4. Evaluate the impact of the Corporate Responsibility Approach for Reporting on the financial performance of the select national companies based on their financial statements.
5. Make a comparative analysis of National and Global Environmental Accounting based on the policies adopted by selected national and global companies.

Suggested Readings:

Discipline Specific Elective Course- 6.8 (DSE-6.8): Export-Import Management

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Export-Import Management DSE-6.8	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to develop an understanding and build knowledge on the key aspects of export-import management in India and enable students to become export professionals and entrepreneurs in the fast-changing global environment.

Learning Outcomes

After completion of the course, learners will be able to:

1. Analyse the basics of export-import management in India.
2. Evaluate various export incentives and schemes designed for business firms and exporters.
3. Organise and plan the documents required for export and import transactions and export finance.
4. Analyse the different operations involved in executing export orders.
5. Summarize the procedure and documentation formalities, practices and regulations governing export trade.
6. Create awareness about India's policy reforms to promote export competitiveness.

SYLLABUS OF DSE-6.8

Unit 1: **Basics of Export-Import Management (11 hours)**
An overview of Foreign Trade Policy; An overview of export-import management system in India; Deemed exports; Importance of exports to economic growth; Understanding Export--Import Operations; Steps of export shipment from India; Processing of an Export Order; Legal Formalities for Getting Started in Foreign Trade; International Commercial (INCO) Terms 2020; Rules of Origin & Certificates of Origin;

Unit 2: **Export-Import Procedure and Documentation (9 hours)**
EXIM procedure; Export Documents related to goods, shipment and payment; Import documents used in import transaction; Export and Import through Post & Courier. Export finance: pre-shipment and post-shipment;

Unit 3: **An Overview of Export Promotion Schemes and Organisational Support (9 hours)**
NiryatBandhu Scheme, MEIS, SEIS, Information on Registered Exporter (REX) System, SCOMET guidelines; Export Incentives: Scheme For Remission of Duties or Taxes on Export Products (RoDTEP), Scheme For Rebate of State and Central Taxes and Levies (RoSCTL); Export Promotion Capital Goods (EPCG); Organisational support: government regulatory agencies involved in export and import i.e. Department of Commerce and Industry, Directorate General of Foreign Trade (DGFT), Directorate General of Trade Remedies (DGTR), Export Promotion Councils, Commodity Boards and Export Inspection Council (EIC).
Unit 4: **Legal framework of Custom Law (9 hours)**
Indian Customs Electronic Gateway (ICEGATE); Indian Customs EDI System (ICES); Procedure for clearance of imported and export goods.

Unit 5: **Make in India and Export Competitiveness (7 hours)**
NITI's Aayog Export Preparedness Index, 2020 – Policy, Business Ecosystem, Export Ecosystem, Export Performance, Learning and strategies; Emerging export entrepreneurs in India; Micro Exporters Policy (MEP).

Exercises:
The learners are required to:

1. Prepare flow-chart of export-import management system in India by accessing the steps prescribed by DGFT.
2. Access the DGFT website and if possible, interact with officials of DGFT for an in-depth and practical understanding of export import management and export finance.
3. Make field visits to various Export Promotion Councils (EPC) for goods and services established by the Department of Commerce and Industry, GOI.
4. Access the ICEGATE and ICES portal on FAQ to understand the legal framework of custom law.
5. Prepare case studies on emerging exporters in India and learn the contribution of the Make in India initiative in export promotion through survey reports and government decisions.
6. Prepare a campaign to create awareness about India's policy reforms to promote export competitiveness

Discipline Specific Elective Course- 6.9 (DSE-6.9): Business Incubation

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Business Incubation DSE- 6.9	4	3	0	1	Pass in Class XII	NIL

Learning Objectives

The course aims to familiarize the learners with development of business incubators and its management.

Learning Outcomes

After completing the course, the learners will be able to:

1. Explain the incubation as a concept, types of business incubators and the role played by business incubators in supporting entrepreneurial efforts;
2. Describe the process of business incubation, incubator structure, and value propositions leading to start-up development;
3. Explain about various funding opportunities available to business incubators and understand the funding needs of the incubator;
4. Explain about various aspects of development of a business incubator, such as preparation of feasibility study, team building, and preparation of business plan;
5. Carry management of business incubators involving formulation of policy for entry and exit, employee management, identification of key performance indicators and mentoring process.

SYLLABUS OF DSE-6.9

Unit 1: Introduction (5 hours)
Business Incubation- Concept and Principles; Incubator and Incubation; Pre-requisites of incubator; Development of an incubator; Types of incubators; Corporate and educational incubators. Incubation and Entrepreneurship. Business incubation models and success factors. Virtual business incubation. Agribusiness incubation. Government Policies and Programmes, Role of business incubation in the economy.

Unit 2: Incubation Process (7 hours)
Process of business incubation and business incubator; Pre-incubation and post-incubation; Idea lab; Business plan structure; Value proposition. Role of business incubation in start-up development.

Unit 3: Incubator Business Environment (7 hours)
Managing business incubator; Financing business incubator; Owners and Fund providers; Seed funding/venture capital; Angel Financiers: types, nature, and procedures; Services of incubators.

Unit 4: Planning an Incubator (13 hours)
Feasibility study; Team formation and team building; Examining sample business idea and writing business plans; Developing business plan; Business incubation marketing and stakeholder management; Understanding investor/lender's perspective and presenting business plan; Valuation of business plan and elevator pitch.

Unit 5: Managing Business Incubator (13 hours)
Policy formulation for entry and exit; Incubation structures; Roles and responsibilities of key players; Managing incubator employees; Performance indicators of business incubator. Mentoring process; Legal issues and other formalities.

Practical Exercises (30 hours):
The learners are required to:

1. Develop a comparative study of various business incubators in the context of real- life cases.

2. Analyse the case of a start- up and elaborate upon the business incubation process and business plan structure.
3. Identify funding sources for various business incubators on the basis of real-life examples.
4. Develop a business incubator plan and prepare its management plan.
5. Discuss various legal issues and other formalities for business incubator with help of case study

Suggested Readings:

- Adkins, D. (2002). *A brief history of business incubation in the United States*. Athens, Greece: National Business Incubation Association.
- Anand, P., Prasad, S., Mukherjee, S., Shukla, A. (2021). *The sustainability and challenges for entrepreneurship, business incubation and technology start-ups in India*. Eureka Publications.
- Blokdyk, G. (2021). *Business incubator A complete guide*. Brendale, Australia: 5starCooks.
- Gerl, E. (2000). *Brick and mortar, renovating or building a business incubation facility*. Athens, Greece: National Business Incubation Association
- Leonard, J. (2014). *Startup incubators and business accelerators*: *The Easy Way*. United States: CreateSpace Independent Publishing Platform.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on the Department's website.

Note: Students in the team shall visit various centres of Incubation such as Incubation Centre at NSIC, NISBURD, MSME, etc., and other colleges' and Management Institutes' incubation centres. After the visit, the students have to present their learning experiences in the form of a formal report and the same will form a part of joint evaluation by internal and external examiners after taking formal viva-voce of the students. The evaluation of the submitted project report shall be completed after the classes are disbursed but before the commencement of theory examinations.

General Elective Course- 6.1 (GE-6.1): Business Organisation

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Business Organisation GE- 6.1	4	3	1	0	Pass in Class XII	NIL

Learning Objectives

The course aims to familiarize the students with the forms of business organisation and contemporary issues.

Learning Outcomes

- Baron, R. A., & Hmieleski, K. M. (2018). *Essentials of entrepreneurship second edition: Changing the world, one idea at a time*. Glos, United Kingdom: Edward Elgar Publishing.
- Burns, P. (2016). *Entrepreneurship and Small Business: Start-Up, Growth and Maturity*. Bloomsbury Publishing.
- Jain, V. (2022). *Entrepreneurship*. Delhi, India: Singhal Publications.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on Department's website.

BAC: DSC-5 Cost Accounting (Major)

Learning Objectives

The course aims to develop understanding among learners about contemporary cost concepts and rational approach towards cost systems and cost ascertainment. The course also aims to provide knowledge about various methods of cost determination under specific situations and to acquire the ability to use information determined through cost accounting for decision making purposes.

Learning Outcomes

After completion of the course, learners will be able to:

1. Compute unit cost and total cost of production and prepare cost statement.
2. Compute employee cost, employee productivity and employee turnover
3. Classify and estimate overheads.
4. Determine cost under job costing, process costing, contract costing and service costing.
5. Compute the break-even point of a product and firm.

SYLLABUS OF DSC-5

Unit 1: Introduction (9 hours)

Meaning, scope, objectives and advantages of cost accounting; Difference between financial and cost accounting. Cost concepts and classifications, Overview of elements of cost and preparation of Cost Sheet. Role of a cost accountant in an organisation.

Unit 2: Elements of Cost : Material and Employee Cost (9 hours)

(a) Materials: Accounting and control of materials: Concept of material cost and control, accounting and control of purchases, storage and issue of materials. Inventory systems, Methods of pricing of materials issues — FIFO, LIFO, and Weighted Average, Physical Verification, Fixation of stock levels, determination of economic order quantity, ABC analysis. Accounting treatment and control of losses — Wastage, scrap, spoilage and defectives

(b) Employee Cost: Accounting and Control of employee cost; time keeping and time booking; Concept and treatment of idle time, over time and employee turnover

Unit 3: Elements of Cost: Overheads (9 hours)

Classification, allocation, apportionment and absorption of overheads, Treatment of under and over-absorption.

Unit 4: Methods of Costing (9 hours)

Job costing, Contract costing, Process costing (excluding treatment of work-in- progress, joint and by- products). Service costing (only transport).

Unit 5: Cost-Volume-Profit Analysis (9 hours)

Concept of cost-volume-profit analysis, marginal cost and marginal cost equation, profit-volume ratio, break-even analysis, cost break- even point, composite break- even point, margin of safety, simple break-even chart, Identification of key factor and determination of profitability.

Notes :

1. Treatment of various items of cost should be as per the relevant cost Accounting Standards (CAS) issued by Institute of Cost Accountant of India.
2. Use only simple numerical problems in all the above units to explain the various concepts, methods and techniques given therein.
3. Use of spreadsheet software should be encouraged for the basic calculation.

Exercises:

The learners are required to:

1. Prepare a cost statement for manufacturing and/ or service organisation.
2. Visit industries to understand process costing and prepare a cost statement for any process industry.
3. Visit a factory and compute the employee cost of the firm.
4. Analyse the role of overhead costs in the production process of any firm.
5. Analyse case studies on job costing, process costing, contract costing and service costing.
6. Design a hypothetical business plan for a firm selling financial products. Estimate the break-even point for different products.

Work Environment for Human Resource Management (BAC: GE(HRM) - 5.1)	4	3	1	0	Pass in Class XII	NIL

BAC: Discipline (HRM) – A5: Training & Development (Non-Major/Minor)

Learning Objectives

The course aims at equipping the learners with the concept and practice of training and development in the modern organisational setting through the pedagogy of case study, group discussions and recent experiences.

Learning Outcomes

After completion of the course, learners will be able to:

1. Analyse the training and development strategies adopted by various organisations.
2. Identify training needs of an individual by conducting training need analysis.
3. Design training and development programme.
4. Analyse various training and development methodologies.
5. Evaluate and assess the cost and benefits of a training and development programme.

SYLLABUS OF BAC: Discipline (HRM) – A5

Unit 1: Introduction (9 hours)

Concepts and rationale of training and development; overview of training and development systems; training and development policies; difference between training and development, linking training and development to company's strategy; requisites of effective training and development programme.

Unit 2: Learning and Training Need Analysis (TNA) (9 hours)

Logic and process of learning; principles of learning; individual differences in learning, learning process, learning management system; Meaning and purpose of TNA, TNA at different levels, approaches for TNA, output of TNA, methods used in TNA.

Unit 3: Designing Training & Development Programme (9 hours)

Organisation of training and development programmes, training design, kinds of training and development programme-competence based and role-based training; orientation and socialization of new employees, diversity training, e-learning environment; flexible learning modules; self development; training process outsourcing.

Unit 4: Training and Development Methodologies (13 hours)
Training and Development Methodologies:-On the job and off the job training methods; apprenticeship training, informal learning, lectures and seminars using digital technologies, behaviour modeling, vestibule training, e-learning, simulation employee training, group discussion and activities; On the job and off the job development methods:- coaching/under study, experience learning, brainstorming, simulation, counselling, e-learning, knowledge based learning, experiential learning, case studies, position rotation, and sensitivity training.

Unit 5: Evaluation of Training and Development (5 hours)
Reasons for evaluating training and development programmes, problems in evaluation; evaluation planning, obtaining feedback of trainees; evaluating of training and development and its impact on organisational performance.

Exercises

The learners are required to:

1. Analyse the training and development strategies adopted by various organisations through case studies.
2. Participate in simulation exercise in classroom to conduct TNA on oneself and thereby identify their needs. Learners may be assigned the task of preparation of questionnaire for TNA.
3. Select the training strategies on the basis of TNA conducted in the previous exercise.
4. Develop a training and development module on the basis of selected strategies in the previous exercise.
5. Analyse various training and development methodologies used in different organisations.
6. Prepare an evaluation report to assess benefits of the training module prepared in the previous exercise and its impact on organisational performance.

#From the date of implementation of Code on Wages, this syllabus shall be disseminated as per the same.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on Department's website.

BAC: GE(CLCG) - 5.1: Corporate Governance

Learning Objectives

The course aims to provide knowledge of corporate governance, procedures, and techniques in accordance with current legal requirements and professional standards.

Learning Outcomes

After completion of the course, learners will be able to:

1. Discuss the significance of corporate governance in a business setup and the role of board of directors.
2. Explain the important dimensions in corporate governance.
3. Analyse global corporate failures and interpret International Codes.
4. Describe corporate governance regulatory framework in India.
5. Analyse and assess the problems in corporate governance in India.

SYLLABUS OF BAC: GE (CLCG) – 5.1

Unit 1: Conceptual Framework of Corporate Governance (9 hours)

Corporate Governance: Meaning, significance and principles; Management and corporate governance; Theories of Corporate Governance: Agency Theory, Stewardship theory, Stakeholders' Theory; One Tier and Two Tier Boards

Unit 2: Corporate Governance and Role of Stakeholders (9 hours)

Board composition: Executive directors, Non-executive directors and Independent director; Role of Board and board committees; Insider Trading; Shareholder activism; Class action suits; Whistleblowing Mechanism, CSR and Corporate Governance

Unit 3: Global Corporate Failures and International Codes (9 hours)

Maxwell (UK), Enron (USA); Sir Adrian Cadbury Committee Report 1992, SOX Act 2002, OECD Principles of Corporate Governance.

Unit 4: Corporate Governance Regulatory Framework in India (9 hours)

Kumar Mangalam Birla Committee (1999), NR Narayana Murthy Committee (2005) and Uday Kotak Committee (2017); Regulatory framework: Relevant provisions of Companies Act, 2013, SEBI: Listing Obligations and Disclosure Requirements Regulations (LODR), 2015.

Unit 5: Corporate Failures in India (9 hours)

Satyam Computer Services Ltd, Kingfisher Airlines, PNB Heist; ICICI Bank; Common Governance Problems in various Corporate Failures in India and abroad.

Exercises

The learners are required to:

1. Identify and analyse corporate governance models followed by companies incorporated in India and abroad.
2. Analyse Board composition and Board committees of different companies; Analyse cases on the topic of Whistle blowing/ Shareholder activism/ Insider trading.

3. Critically analyse global corporate governance failures and identify corporate governance issues therein.
4. Identify corporate governance issues and concerns raised in context of Indian companies and their implications (from published sources newspapers or websites).
5. Critically analyse major corporate governance failures to suggest common governance problems in the Indian context.

Income Tax: E-Filing BAC: GE (TPP)- 5.1	4	2	0	2	Pass in Class XII	NIL

BAC: Discipline (TTP) -A5: Fundamentals of GST (Non-Major/Minor)

Learning Objectives

This paper aims to provide the basic fundamental knowledge of principles and provisions of Central Goods and Services Tax Act, 2017 and Integrated Goods and Services Tax Act, 2017.

Learning Outcomes

After completion of the course, learners will be able to:

1. Recognise the concept of integrated, central and state GST.
2. Identify the category of persons eligible to apply for registration under GST.
3. Discuss the relevance of time, value and place of supply.
4. Demonstrate their understanding of the composition levy scheme.
5. Recognise the category of goods and services exempted from GST.
6. Review the concept of an input tax credit.

SYLLABUS OF BAC: Discipline (TTP) – A5

Unit 1: Basic Concepts and Structure (9 hours)

Constitutional framework of indirect taxes before GST (taxation powers of union & state Government); Rationale for GST; Structure of GST (SGST, CGST, UTGST & IGST); GST Council; GST Network; State compensation mechanism.

Unit 2: Registration (9 hours)

Types of registration and Procedure for registration.

Unit 3: Levy and Collection of GST (9 hours)

Scope of 'Supply'; Nature of Supply: Inter-State and Intra-State; Place of supply; Time of supply; Value of Supply.

Unit 4: Exemptions from GST (9 hours)

Exemption from GST: Small supplies & composition scheme; List of goods and services exempted; Classification of goods and services: Composite & mixed supplies.

Unit 5: Basics of Input Tax Credit (9 hours)

Basic concept of the input tax credit; Simple illustrations on the calculation of GST and input tax credit; Order of adjustment of an input tax credit against output CGST, SGST and IGST.

Exercises

The learners are required to:

1. Differentiate between the concept of integrated, central, and state GST.
2. Identify the taxpayers who have not applied for GST registration and educate them about the benefits of registration under GST. You can take the help of GST Suvidha Kendra for the same.
3. Explain the relevance of time, value and place of supply with reference to GST.
4. Prepare the report of those persons who are registered under the composition levy scheme and identify the major advantages and challenges faced by them.
5. Enlist the category of consumable goods exempted from GST.
6. Explore various products and services offered as per the definition of composite supply and the taxability for the same.
7. Depict the process of availing input tax credit.

AC: DSE(TPP)- 5.1: Personal Tax Planning: Specific Provisions (Major)

Learning Objectives

This paper aims to provide comprehensive knowledge for the tax planning of Individuals, Hindu undivided family and partnership firm. It explains the relevance of tax planning and how systematically planned investments can lower the tax liability of an assessee in each case.

Learning Outcomes

After completion of the course, learners will be able to:

1. Review the tax planning framework for non-residents.
2. Describe varied provisions for the tax treatment of agricultural income.
3. Describe the provisions for tax planning of income from business or profession.
4. Identify the viability of various short-term and long-term capital gain decisions.
5. Discuss tax planning with respect to the treatment of gifts.

SYLLABUS OF BAC: DSE (TTP) – 5.1

Unit 1: Tax planning for non-residents (7 hours)

Special provisions for computation of total income and tax liability of non-residents; Tax planning of non-residents.

Unit 2: Tax Planning with reference to agricultural income (4 hours)

Agricultural income and partial integration.

Unit 3: Tax Planning with reference to business and profession decisions (9 hours)

Tax planning for business and profession; simplified scheme of computing business income under sections 44AD, 44ADA and 44AE.

Unit 4: Tax Planning with reference to capital gains (14 hours)

Tax planning for capital gains: short-term versus long-term capital gains; capital gains on immovable property, shares, bonds/debentures, units of mutual funds, gold deposits, gold bonds; exemption under section 54, 54B, 54EC, 54F; carry forward and set off of capital losses.

Unit 5: Tax Planning with reference to other sources (11 hours)

Tax planning for gifts, interest income on deposits and units of various mutual funds under the head other sources.

Exercises

The learners are required to:

1. Review the tax planning framework for non-residents.
2. Present a case study detailing the partial agricultural income integration.
3. Enlist the benefits available under head PGBP for CA/CS/Profesionals.

4. Prepare a report on the computation of a hypothetical assessee (Mr. X) assuming his tax liability under the head capital gains and specifically explain the relevance of sections 54, and 54B.
5. Depict the treatment for gifts received from multiple sources.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on Department's website.

C: GE (TPP)- 5.1: Income Tax: E-Filing

Learning Objectives

This paper provides hands-on experience in filing the income tax returns for an Individual.

Learning Outcomes

After completion of the course, learners will be able to :

1. Recognise the relevance of the PAN cards in filing the return.
2. Identify the different returns applicable in the case of various assesses.
3. Describe the meaning and procedure for FORM 26AS.

SYLLABUS OF BAC: GE (TTP) – 5.1

Unit 1: Basic Concepts (12 hours)

Types of return: revised return, defective return; PAN; self-assessment, scrutiny assessment, best judgement assessment; rectification of returns; time limit; annual income statement, returns and assessment.

Unit 2: E-filing of Return (18 hours)

Form 26AS; case studies on e-filing of return using online/ offline utility software, especially for ITR 1, ITR 2 and ITR 3.

Practical Exercises

The learners are required to:

1. Prepare a project showing how PAN is generated and interpreted.
2. Prepare a case on income statement of X and file ITR for the same.
3. Check an ITR and see how income is reported in form 26 AS.

Suggested Readings

Note: Practical examination shall be conducted in the college.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on Department's website.

B.A. Programme with Commerce (Modern Office Management)

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Computer Applications (BAC: Discipline (MOM) – A5) (Non-Major/Minor)	4	2	0	2	Pass in Class XII	Studied Stenography (English)-II (BAC: Discipline (MOM) – A4)
Cost Accounting BAC: DSC-5 (Major)	4	3	1	0	Pass in Class XII	NIL
Practical Stenography and e-Typewriting-I (BAC: DSE(MOM)-5.1) (Major)	4	2	0	2	Pass in Class XII	NIL
Strategic Office Management (BAC: DSE (MOM)- 5.2) (Major)	4	3	1	0	Pass in Class XII	NIL

BAC: Discipline (MOM) – A5: Computer Applications (Non-Major/Minor)

Learning Objectives

To provide computer skills and knowledge to the students about the usefulness of information technology tools for business operations.

Learning Outcomes

After completion of the course, learners will be able to:

1. Discuss the various concepts associated with computers.
2. Discuss the basic terminologies used in computer networks and internet.
3. Describe word document creation for report making and communication.
4. Design good presentations.
5. Make spreadsheets for basic calculations and for making charts.

SYLLABUS OF BAC: Discipline (MOM) – A5

Unit1: Basic knowledge of computers (6 hours)

Computers: meaning, history, generations, characteristics, advantages, limitations and functions of computers; Classification of computers based on size, and digital vs analogue computers; input-output devices; software, hardware, firmware and liveware; types of software: system software and application software; Computing Interfaces: Graphical User Interface (GUI), Command Line Interface (CLI), Touch Interface, Natural Language Interface (NLI); role of CPU in data processing; applications of computers in business.

Unit 2: Basics of Networking and Internet (6 hours)

Computer Networks: Meaning of computer network; objectives/ needs for networking; Applications of networking; Basic Network Terminology; Types of Networks; Network Topologies; Wireless Networking; Securing Networks: firewall.

Basic Internet Terminology: I.P. Address, Modem, Bandwidth, Routers, Gateways, Internet Service Provider (ISP), World Wide Web (www), Browsers, Search Engines, Proxy Server, Intranet and Extranet; Basic Internet Services; Internet Protocols: TCP/IP, FTP, HTTP(s), Uses of Internet to Society; Cyber Security: Cryptography, digital signature.

Unit 3: Word Processing (6 hours)

Introduction to word Processing, Word processing concepts, Use of Templates and styles, Working with word document: Editing text, Find and replace text, Formatting, spell check, Autocorrect, Auto-text; Bullets and numbering, Tabs, Paragraph Formatting, Indent, Page Formatting, Header and footer, page break; Tables: Inserting, filling and formatting a table; Inserting Pictures and Video; Mail Merge; Printing documents; Citations, references and Footnotes.

Unit 4: Preparing Presentations (5 hours)
Basics of presentations: Slides, Fonts, Drawing, Editing; Inserting: Tables, Images, texts, Symbols, hyperlinking, Media; Design; Transition; Animation; and Slideshow, exporting presentations as pdf handouts and videos.

Unit 5: Spreadsheet basics (7 hours)
Spreadsheet concepts: Managing worksheets; Formatting, Entering data, Editing, and Printing and Protecting worksheets; controlling worksheet views; graphical presentation of data using bar chart and pie chart; use of simple formulas in spreadsheets; cell referencing: absolute, relative and mixed cell referencing; Functions: logical functions, financial functions, statistical and mathematical functions.

Note:
1. The General Purpose Software referred in this course will be notified by the University Departments every three years. If the specific features, referred to in the detailed course above, is not available in that software, to that extent it will be deemed to have been modified.

Practical Exercises
The learners are required to:
1. Discuss classification of computers.
2. Enlist the functions of internet in present times.
3. Create a report on MS-Word using all relevant formatting features.
4. Design presentations using all relevant formatting features.
5. Create spreadsheets on MS-Excel using all relevant functions.

Suggestive Readings

Note: The General Purpose Software referred in this course will be notified by the University Departments every three years. If the specific features, referred to in the detailed course above, is not available in that software, to that extent it will be deemed to have been modified.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on Department's website.

BAC: DSE(MOM)- 5.1: Practical Stenography and e-Typewriting-I (Major)

Learning Objectives

The course aims to orient the students to understand the need of writing rapidly and accurately in this speed age. In order to make them a good writer, it is necessary for them to master the fascinating art of good writing. After learning the basic principles of Stenography, it is essential that the students build up speed writing by practicing exercises and learning stenography transcription from Pitman Shorthand Instructor.

Learning Outcomes

After completion of the course, learners will be able to:

1. Analyse the basic concepts of English transcription.
2. Interpret the shorthand basic shortcut concepts.
3. Demonstrate the shorthand speed.
4. Demonstrate the typewriting speed.
5. Demonstrate the typewriting of letters/documents with proper formatting.

SYLLABUS OF BAC: DSE (MOM) – 5.1

Unit I: Figures and Essential Vowels (3 hours)
Figures, transcriptions and Essential Vowels.

Unit II: Stenography – its speed & practical concepts (9 hours)
Contractions & Special Contractions (Section 1 to 5 with exercises), Advanced Phraseography, Intersections.

Unit III: Stenography – Practical (6 hours)

i. Daily practice of seen passages from Pitman Shorthand from the Exercises 111-144 from 'Pitman Shorthand Instructor & Key' in a graded manner up to the speed of 60 words per minute and transcription on computer.

ii. Daily practice of unseen passages from 'Graded Dictation Exercises on Shorthand made easy' in a grader manner up to the speed of 40 words per minute and transcription on computer.

Unit IV: e-Typewriting – Practical (6 hours)
E-typewriting: meaning & importance, advantages and disadvantages. Practice of on and off of computer system.
Keyboard: Meaning & Importance, advantages & disadvantages, types of keyboard, keyboarding - setting of fingers on home keys, guide keys on Computer and their functions.
Touch and Sight methods of typewriting.
Maximum use of shortcut keys on keyboard instead of using mouse.
Typewriting speed and accuracy—use of spacing and punctuation marks, errors and penalty, Calculation of running and accurate speed (gross and net).
E-typewriting speed @30 words per minute.

Unit V: Word Processing – letters/documents preparation (6 hours)
Word Processing (MS Office): working with documents, use of different views, navigation through documents, text manipulation, formatting of documents. Hyperlink, book mark, mail merge.

Document Preparation: Structure and layout of letter, different parts of the letter, different styles of Business letters, preparation of letters in word processor, generate notice, agenda and minutes of the meeting, office orders, circulars, memorandums, resumes, CV & portfolio. Merging of letters through mail merge and printing the same.
The size of papers: National and International.

Practical Exercises

The learners are required to:

1. Learn the basic general English Stenography vocabulary.
2. Learn, understand & practice all types of short cuts for implementation of stenography and typewriting.
3. Practice the shorthand passages to get the speed @60/40 words per minute.
4. Practice the typewriting passages to get the speed @ 30 words per minute.
5. Learn all types of document preparations.

BAC: DSE (MOM)- 5.2: Strategic Office Management (Major)

Learning Objectives

The course aims to understand about the Strategic Office Management which is crucial to perform official functions effectively with the applications of principles of management at all levels in the Business. Effective Office Management play a significant role for success in the Business World.

Learning Outcomes

After completion of the course, learners will be able to:

1. Describe the concept of office management and its structure.
2. Recognise the systems and processes of office management.
3. Recognise the role of group dynamics in an organisation.
4. Discuss various concepts related to business finance and marketing management.
5. Discuss various strategic management dynamics.

SYLLABUS OF BAC: DSE (MOM) – 5.2

Unit 1: Office Management and Its Importance (9 hours)

Objectives of Office Management: Purpose, Environment, Means, Personnel, Scope of Office Management, Principles of Office Organization, Formal and Informal Organization, Types and Systems of Organizations, Organization Chart, Types of Organization Charts, Relation of Office with other Departments, Office Manuals, Authority and Responsibility, Centralization and Decentralization, Information Management, Scientific Office Management, Aims of Scientific Management.

Unit 2: Office Management Systems and Processes (9 hours)

Scope of Office Management, Objectives of Office Management, Functions of Office Management, Planning Office Activity: objectives, policies, programmes and procedures, Organising of Office Activity: staffing, motivating, coordination, direction and controlling, The Job and Position of Manager, Functions, Duties and Responsibilities of Office Manager, Qualities of Office Manager, Administrative Office Management, Office System, Characteristics of sound office System, Principles of Office Systems, Office Routines, Importance of Office Systems.

Unit 3: Organizational Structure, Delegation of Powers and Group Dynamics (9 hours)

Nature of Organization Structure, Role of Functional Manager, Network Organization Structure, Advantages and Disadvantages, Features of Authority, Administrative and Financial Powers, Delegation of Powers and Authority, Formation of Groups and Teams, Formal and Informal Groups, Group Dynamics: Group Norms and Role, Group Cohesiveness, Groups: Behaviour, Tasks, Processes and Effectiveness.

Unit 4: Business Finance and Marketing Management (9 hours)

Concept, Role and Objectives of Financial Management, Financial Planning and its Importance, Capital Structure, Fixed and Working Capital, Financial Markets: Concept, Functions and Types, Money Market and its Instruments, Capital Market, Stock Exchange Functions and Trading Procedure, Objectives and Functions of SEBI, Market Management,

Functions of Marketing, Marketing Mix: People, Product, Price, Process, Physical Distribution, Physical Evidence and Promotion.

Unit 5: Strategic Management Dynamics: Leadership, Motivation and Control (9 hours)
Leadership: Features, Importance, Qualities and Styles of Leadership. Determinants of Leadership Styles, The Managerial Grid, Situational Leadership, Traits of Leadership, and Motivational Theories: Maslow's Need Hierarchy Theory, Herzberg's Two Factor Theory, McGregor's X and Y Theory, Ouchi's Theory "Z", Comparison between Theory 'X' and Theory 'Y', Work Measurement, Techniques of Work Measurement, Standards of Performance, Measurement of Efficiency of Office Staff, Effective Control System, Process of Control: Setting Standards, Measurement of Performance, Comparing the Actual Performance with Standards and Taking Corrective Action.

Exercises

The learners are required to:

1. Identify the nature and importance of the profession of office management, function of office jobs and experience it while paying the visit to the educational, financial or other manufacturing/marketing institutions.
2. Observe the business systems, procedures and practices significant for effective functioning of office management, while visiting industries.
3. Discuss case studies on group dynamics in organisations.
4. Analyse case studies to understand financial management and marketing management practices of firms.
5. Analyse the leadership styles and motivation methods adopted by various organisations.

Suggested Readings

B.A. Programme with Commerce (Commerce as Non-Major/Minor)

BAC: DSC-5 Cost Accounting (Non-Major/Minor)

Learning Objectives

The course aims to develop understanding among learners about contemporary cost concepts and rational approach towards cost systems and cost ascertainment. The course also aims to provide knowledge about various methods of cost determination under specific situations and to acquire the ability to use information determined through cost accounting for decision making purposes.

Learning Outcomes

After completion of the course, learners will be able to:

1. Compute unit cost and total cost of production and prepare cost statement.
2. Compute employee cost, employee productivity and employee turnover
3. Classify and estimate overheads.
4. Determine cost under job costing, process costing, contract costing and service costing
5. Compute the break-even point of a product and firm.

SYLLABUS OF DSC-5

Unit 1: Introduction (9 hours)

Meaning, scope, objectives and advantages of cost accounting; Difference between financial and cost accounting. Cost concepts and classifications, Overview of elements of cost and preparation of Cost Sheet. Role of a cost accountant in an organisation.

Unit 2: Elements of Cost : Material and Employee Cost (9 hours)

(c) Materials: Accounting and control of materials: Concept of material cost and control, accounting and control of purchases, storage and issue of materials. Inventory systems, Methods of pricing of materials issues — FIFO, LIFO, and Weighted Average, Physical Verification, Fixation of stock levels, determination of economic order quantity, ABC analysis. Accounting treatment and control of losses — Wastage, scrap, spoilage and defectives

(d) Employee Cost: Accounting and Control of employee cost; time keeping and time booking; Concept and treatment of idle time, over time and employee turnover

Unit 3: Elements of Cost: Overheads (9 hours)

Classification, allocation, apportionment and absorption of overheads, Treatment of under and over-absorption.

Unit 4: Methods of Costing (9 hours)

Job costing, Contract costing, Process costing (excluding treatment of work-in- progress, joint and by- products). Service costing (only transport).

Unit 5: Cost-Volume-Profit Analysis (9 hours)

Concept of cost-volume-profit analysis, marginal cost and marginal cost equation, profit-volume ratio, break-even analysis, cost break- even point, composite break- even point, margin of safety, simple break-even chart, Identification of key factor and determination of profitability.

Notes :

1. Treatment of various items of cost should be as per the relevant cost Accounting Standards (CAS) issued by Institute of Cost Accountant of India.
2. Use only simple numerical problems in all the above units to explain the various concepts, methods and techniques given therein.
3. Use of spreadsheet software should be encouraged for the basic calculation.

Exercises:

The learners are required to:

1. Prepare a cost statement for manufacturing and/ or service organisation.
2. Visit industries to understand process costing and prepare a cost statement for any process industry.
3. Visit a factory and compute the employee cost of the firm.
4. Analyse the role of overhead costs in the production process of any firm.
5. Analyse case studies on job costing, process costing, contract costing and service costing.
6. Design a hypothetical business plan for a firm selling financial products. Estimate the break-even point for different products.

BAC: DSE (TPP) – 6.1: Corporate Tax Planning: Specific Management (Major)

Learning Objectives

This paper aims to provide an advanced module of corporate taxes in India and its effectiveness in various specific management decisions.

Learning Outcomes

After completion of the course, learners will be able to:

1. Assess tax planning with respect to employee remuneration.
2. Analyse cases of tax planning.
3. Use specific provisions to compute the income of non-residents in specific cases.
4. Discuss the framework of double taxation relief.
5. Analyse ramifications of business restructuring from the viewpoint of tax planning.

SYLLABUS OF BAC: DSE (TTP) – 6.1

Unit 1: Tax Planning with respect to employee remuneration (9 hours)

Tax planning with reference to remuneration of employees from an employee as well as employers' perspective.

Unit 2: Some Specific Cases of Tax Planning (9 hours)

Tax planning with reference to receipt of insurance compensation and tax planning with reference to the distribution of assets in case of liquidation of a company.

Unit 3: Tax Planning with reference to non-resident companies (9 hours)

Computation of income of non-residents from shipping business, foreign companies engaged in the business of civil construction, transfer pricing: computation of arm's length price, and advance ruling.

Unit 4: Tax Planning with reference to double taxation (9 hours)

Double Taxation Avoidance Agreements (DTAA) and Double taxation relief.

Unit 5: Tax Planning with reference to business restructuring (9 hours)

Amalgamation, demerger, slump sale and conversion of sole proprietary concern/ firm into a company.

Exercises

The learners are required to:

1. Design an appropriate pay package for the employee so as to reduce his tax liability and also to make sure that the employer gets maximum benefit.
2. Explain the concept of tax planning with reference to insurance compensation and distribution of assets in case of liquidation of a company, with specific cases.
3. Prepare documentation for the computation of income in case of non-resident.
4. Present a case study on the applicability of transfer pricing rules.
5. Prepare a presentation on double taxation relief.
6. Prepare a report for a sole proprietary concern converting into a firm with reference to tax implications.

Suggested Readings

- Singhania, V.K., & Singhania, M. (2022). *Corporate tax planning & business tax procedures.* (25th ed.). Delhi, India: Taxmann Publications.

Note: Suggested readings will be updated by the Department of Commerce and uploaded on Department's website.

B.A. Programme with Commerce (Modern Office Management)

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Office Automation BAC: Discipline (MOM) – A6 (Non-Major/Minor)	4	2	0	2	Pass in Class XII	Studied Computer Applications (BAC: Discipline (MOM) – A5)
Company Law BAC: DSC-6 (Major)	4	3	1	0	Pass in Class XII	NIL
Practical Stenography and e-Typewriting-II BAC: DSE (MOM) – 6.1 (Major)	4	0	0	4	Pass in Class XII	NIL
Human Resource Management BAC: DSE (MOM) – 6.2 (Major)	4	3	1	0	Pass in Class XII	NIL

BAC: Discipline (MOM) – A6: Office Automation (Non-Major/Minor)

Learning Objectives

The course aims to inculcate the understanding about changing technologies and a revolution towards a paperless environment. It highlights the strategies that can be adopted towards automation and also different challenges that arise with E-Governance.

Learning Outcomes

After completion of the course, learners will be able to:

1. Recognise appropriate technology tools for communication.

2. Analyze the documents in e-offices.
3. Use e file management to move towards a paperless work environment.
4. Adapt to online tour management, online leave management and e tenders.
5. Assess the role of ERP and applications of IoT in offices.

SYLLABUS OF BAC: Discipline (MOM) – A6

Unit I: Online Communication Tools (3 hours)
Importance of online communication, Online Communication Systems Internet, e-mail, video conferencing, VoIP, IVRS, Team Collaboration, Skype, Microsoft Teams, Google Teams, Zoom, Facebook, TinyLetter, Drop Box, Flowdock, HipChat, Go to Meeting and ProofHub.

Unit II: E-Office, Online PIMS, Sparrows and KMS (6 hours)
Meaning and Nature of e-Office, Benefits of e-Office, Features of e-Office.
Online PIMS, Online Service Book, Efficient retrieval system, Online form submission, MIS Reports, Role based Access.
SPARROW: Electronic APARs processing, Centralized Database and Decentralized Administration, Electronic Signing of APARs, Delegation for Manual Processing, APARs Integrated with eService Book.
KMS: Create and Upload documents, Integrated workflow on documents, document security, versioning of documents, Role based access to document folders.

Unit III: E-File Management (8 hours)
Online Diarising of Letters, File Processing, Dashboard view with Alerts, Enhanced Scope Based Search, MIS Reports for Monitoring and Analysis, Multilingual support, Added Data security with DSC and e-Sign, Interdepartmental File Movements, Records Management System, Citizen Interface.

Unit IV: Online Tour Management, Online Leave Management and e-Tender (8 hours)
Online Tour Approval Workflow, Status of Tour Requests, Tours conducted by employees, online settlement of Tour Claims.
Online leave Applications, Online Leave Approvals, Joining Reports, Leave History, Leave in Credit and Work load of office staff.

Unit V: Internet of Things (IoT) and Enterprise Resource Planning (ERP) (5 hours)
Significance and applications of (IoT); Meaning, benefits, and limitations of (ERP); components of ERP; ERP softwares: ERP Tally, Oracle- Data Base Management System and Systems-Applications-and-Products-Software (SAP), Public Financial Management System (PFMS), Implementation of ERP Softwares.

Online Procurement, e-Tenders: Government e-Market place (GeM), E-Publish Date, Bid Submission Closing Date, Tender Opening Date, Tender ID, reference and Date, Name of Department/Organization.

Practical Exercises:

The learners are required to:

1. Assess the role of various technology tools for communication in present times.
2. Analyze the documents in e-offices.
3. Discuss case studies on e file management.
4. Discuss case studies on online tour management, online leave management and e tenders.

5. Evaluate the role of ERP and applications of IoT in offices through case studies.

Suggestive Readings

BAC: DSE (MOM) – 6.1: Practical Stenography and e-Typewriting-II

Learning Objectives

The course aims to orient the students to attain the higher speed in Stenography as well as Typewriting. After completing the practical sessions the students will be prepared to get the job as Executive Secretary/Office Manager/Personal Secretary/Personal Assistant/Stenographer etc. The students will also be ready to type the project report/dissertation themselves.

Learning Outcomes

After completion of the course, learners will be able to:

1. Apply dictation and transcription on seen passages.
2. Apply dictation and transcription on unseen passages.
3. Analyze the different rules of phraseography.
4. Demonstrate e typewriting speed.
5. Prepare documents on MS-Word.

SYLLABUS OF BAC: DSE (MOM) – 6.1

Unit I: Dictation & Transcription – Seen Passages

Daily practice of seen passages of the Exercises 145-191 from 'Pitman Shorthand Instructor & Key' in a graded manner up to the speed of 80 words per minute and transcription on computer.

Unit II: – Dictation & Transcription – Unseen Passages

Daily practice of unseen passages from 'monthly magazines of shorthand ' in a graded manner up to the speed of 60 words per minute and transcription on computer. Practice in different settings (classrooms/interviews for Social/Business Research Survey). Using voice activated word processing in PC and Mobile Applications.

Unit III: Advanced Phraseography

List of Phrases: Advanced Phraseography (Section 1 to 7), Intersection, Business Phrases.

Unit IV: e-Typewriting – Practical
Maximum use of shortcut keys on Keyboard instead of using mouse.
Typewriting speed and accuracy - use of spacing and punctuation marks, errors and penalty, Calculation of running and accurate speed (gross and net).
E-typewriting speed @30 words per minute.

Unit V: Word Processing – Project
Word Processing (MS Office) - Use of style sheets, smart art, inserting table of contents, Insert Object (Picture, Video, Sheet, Power Point Slide). Update table, Insert footnote and endnote, and insert citation. Manage Sources, Index and managing Bibliography/references. Insert caption, insert table of figures, cross reference. Track changes. Convert text to table.
Document Preparation: A resume - on one page.

Practical Exercises

The learners are required to:

1. Practice the shorthand seen passages to get the speed @80 words per minute.
2. Practice the shorthand unseen passages to get the speed @60 words per minute.
3. Learn, understand & practice all types of advanced phraseography for implementation.
4. Practice the typewriting passages to get the speed @40 words per minute.
5. Prepare documents on MS-Word.

BAC: DSE (MOM) – 6.2: Human Resource Management

Learning Objectives

The aim of the paper is to familiarize students with the concepts of human resource management, hiring and managing people, employee pay and compensation, employee morale and welfare schemes and key challenges of HR Managers.

Learning Outcomes

After completion of the course, learners will be able to:

1. Recognise the role of personnel management and human resource development.
2. Analyze the process of human resource planning.
3. Discuss various employee compensation and benefit schemes.
4. Recognise the concept of employee morale, development and employee welfare schemes.
5. Discuss emerging horizons and key challenges in HRM.

SYLLABUS OF BAC: DSE (MOM) – 6.2

Unit 1: Human Resource Management - Introduction (9 hours)

Role of Personnel Management, Human Resource Development and Human Resource Management, Characteristics of the workforce, Importance of Human Resources, HRM Practices, Human Capital, Functions of HRM.

Unit 2: Managing People (9 hours)

Human Resource Planning, Process of Recruitment and Hiring Talent, Online Selection and Placement, Types of Selection Methods, Job Design, Job Description, Job Specification, Employee Engagement, Job Evaluation, Transfer and Job Satisfaction, Training and Development, Employee Development, Create Learning Environment, Management Support, Training Methods, Socialization and Orientation, Employee Counselling, Job Change, Job Transfers, Job Promotion, Employee Retention, Strategic Role of Team Leader, Performance Appraisal, Designing of HR Portals.

Unit 3: Sound Compensation and Employee Benefits (9 hours)

Equity Theory and Fairness, Developing Pay Levels, Job Structure, Pay Structure, Minimum Wage and Compensation, Overtime and Prevailing Wage Laws, High Motivation Compensation System, Recognition of Employee Contributions, Reinforcement Theory, Expectancy Theory, Agency Theory, Career Planning, Competency Based Compensation, Talent Management: Group Incentives, Team Awards, Balance Scorecard, Employee Benefits, Employee Empowerment, Employee Counselling.

Unit 4: Employee Morale, Employee Development and Employee Welfare Schemes (9 hours)

Morale and Productivity, Employee Counselling, Work Stress, Coping of Stress, Emotional Intelligence, Employee Wellbeing, Employee Health and Welfare Programs: Safety Measures, Medical Benefits, Staff Canteen, Housing and Transportation, Credit Societies, Leave Encashment, Social Security-Pension and Gratuity, Group Insurance.

Unit 5: Emerging Horizons and Challenges in HRM (9 hours)

Workforce Diversity, Cross-cultural HRM, Building a Multi-Cultural Organization, Cross Border Merger, Acquisition and Repatriation, Current Challenges in Outsources of human resources, Downsizing, e-HRM, Green HRM, Ethics in HRM, Employee Resilience, Innovations and Creativity at Work.

Exercises

The learners are required to:

1. Evaluate the personnel management process of various organisations.
2. Assess the human resource planning process of different organisations.
3. Compare employee compensation and benefit schemes of competing organisations.
4. Compare employee welfare schemes of different organistions.
5. Evaluate emerging horizons and key challenges of HRM.

B.A. Programme with Commerce (Commerce as Non-Major/Minor)

BAC: DSC-6 Company Law (Non-Major/Minor)

Learning Objectives

The course aims to develop and comprehend business and its processes in accordance with the provisions of the Companies Act, 2013 while analysing case laws.

Learning Outcomes

After completion of the course, learners will be able to:

1. Recognise the different types of companies.
2. Discuss the fundamentals of incorporating the company.
3. Make the memorandum and articles of association.
4. Discuss the difference between different types of prospectus.
5. Recognise the process of calling and conducting company meetings.

SYLLABUS OF BAC: DSC-6

Unit I: Introduction (11 hours)
Characteristics of a company; Lifting of corporate veil; Types of companies including one person company, small company, associate company, dormant company, producer company; Association not for profit; Illegal association.

Unit II: Formation of a company (7 hours)
Formation of company, promoters, functions and their legal position, pre- incorporation contracts, steps in incorporation, and process of on-line registration of a company.

Unit III: Memorandum and Articles of Association (7 hours)
Memorandum of association definition, clauses and its alteration, doctrine of ultra vires, articles of association, contents and its alteration, doctrine of constructive notice and indoor management.

Unit IV: Share Capital (11 hours)
Prospectus, shelf and red herring prospectus, mis-statement in prospectus; issue, allotment and forfeiture of share, calls on shares; issue of sweat equity; employee stock option; issue of bonus shares; right shares, transfer and transmission of shares, buyback; demat system.

UNIT V: Company Meetings (9 hours)
Meetings of shareholders; types of meeting, convening and conduct of meetings, requisites of a valid meeting- notice, agenda, chairman, quorum, proxy, resolutions, minutes; postal ballot, e-voting.

Exercises

The learners are required to:

1. Identify and classify types of companies by taking real-life examples.
2. Fill dummy spice form for incorporation of a company.
3. Read the memorandum and articles of association of a particular company.
4. Enlist steps in the book-building process and examine a red herring prospectus of a latest IPO from SEBI website.
5. Prepare a list of businesses conducted by ordinary resolution.

ANNEXURE - 36

Sub: Amendment to Ordinance V

[E.C Resolution No. 14/ (14-1-9) dated 09.06.2023]

Following addition be made to Appendix-II-A to the Ordinance V (2-A) of the Ordinances of the University;

Add the following:

Syllabi of Semester-IV, V and VI of the Department of Finance & Business Economics under Faculty of Applied Social Sciences & Humanities based on Under Graduate Curriculum Framework -2022 implemented from the Academic Year 2022-23.

SEMESTER -IV

B.A. (Honours) Business Economics

DISCIPLINE SPECIFIC CORE COURSE – 10 (DSC-10): MACROECONOMICS - II

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course Title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Macroeconomics-II (DSC 10)	4	3	1	0	Class 12	Mathematics at Class 12

Learning Objectives

This course aims at inculcating an understanding:
(i) of macroeconomic outcomes arising from assumptions of individual behaviour
(ii) of equilibrium under different assumptions on aggregate demand and supply.
(iii) of the relation between wages, prices, unemployment under different models
(iv) of an economy that trades with others and how it determines the balance of payments and different types of exchange rates.

Learning outcomes

By studying this course, the students will be able to:

- Understand basics of consumption function and different hypotheses regarding aggregate consumption behavior.
- Derive wage setting, price setting relations and labour market equilibrium.
- Derive aggregate demand and aggregate supply and economy's equilibrium conditions in medium run and understand the interaction between the two.
- Understand the relationship between inflation, unemployment and output and role of expectation on policy and their effectiveness.

SYLLABUS OF DSC-10

UNIT–I: Microeconomics foundation of Macroeconomics (9 hours)
Consumption: Keynesian consumption function; Fisher's theory of optimal intertemporal choice; life cycle and permanent income hypothesis; rational expectations and random walk of consumption expenditure, Investment: determinants of business fixed investment; residential investment and inventory investment

UNIT – II: Aggregate Demand and Aggregate Supply (6 hours)
Derivation of aggregate supply curve; Interaction of aggregate demand and supply to determine equilibrium output, price level and employment, The aggregate supply curve and the price adjustment mechanism.

UNIT – III:Labour markets, Employment and Prices (18 hours)
The labour market: - determination of wages, prices, unemployment, Natural rate of unemployment and NAIRU, stagflation, expected inflation. Philips curve, inflation-expectations augmented Phillips curve, the wage-unemployment relationship: Sticky wages; from Phillips curve to the aggregate supply curve; the costs of unemployment and inflation, inflation and indexation: inflation-proofing the economy; Theory of Expectations, Inflation, unemployment and expectations, Phillips curve and adaptive and rational expectations; Dynamics of Inflation and Unemployment: Inflation, expectation and the aggregate supply curve, short and long runaggregate supply curves, dynamic aggregate demand curve; Inflation and output, the adjustment process, dynamic adjustment, interest rate and inflation: the Fishers Equation.

UNIT – IV:Open Economy Macroeconomics (12 hours)
Balance of Payments, Kinds of exchange rate, Nominal and Real Exchange rate, fixed and flexible exchange rate, Marshall Lerner condition & J curve, Mundell Fleming model, Exchange rate determination: Purchasing power parity, asset market approach and monetary approach to Balance of Payments (BoP)

Essential/recommended readings

6. David C. Colander (2017) Macroeconomics (9th edition), McGraw Hill

Suggested readings

1. Bradley R. Schiller and Karen Gebhardt (2019) Macro economy Today (14th edition), McGraw Hill
2. Richard T. Froyen (2013). Macroeconomics: Theories and Policies (10th ed.), Pearson.
3. Government of India (GOI) (Latest Year), Economic Survey, Ministry of Finance New Delhi.
4. Government of India (GOI) (Latest Year), Handbook of Indian Economy, RBI Publication New Delhi.
5. N. Gregory Mankiw, Macroeconomics, Worth Publishers.
6. Chugh, S. (2015) Modern Macroeconomics, MIT Press.
7. D'Souza, E, Macroeconomics, Pearson Education
8. D. N.Dwivedi (2015), Macroeconomics- Theory and Policy, McGraw-Hill.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 11 (DSC-11): Statistics for Business Economics-II

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Statistics for Business Economics - II (DSC 11)	4	3	0	1	Class 12	Mathematics at Class 12 level

Learning Objectives

This course aims to develop an understanding of:

- Theories of probability distribution.
- Sampling techniques and types of sampling.
- Methods of estimation
- Testing of Hypothesis.

Learning outcomes

By studying this course, the students will be able to:

- Understand the formulation of complex decision-making problems in an uncertain environment using different statistical techniques.

- Study various research designs and appropriate sampling techniques.
- Analyze and apply some basic stochastic processes for solving real life situations and to execute statistical analyses with professional software.
- Draw conclusion about the population using hypotheses testing.

. .

SYLLABUS OF DSC-11

UNIT – I: Theoretical Probability Distributions (15 hours)
Discrete: Binomial and Poisson. Continuous: Normal. Mean and variance. Applications. Bivariate distributions: covariance and correlation.

UNIT – II:Sampling (9hours)
Random sampling; sampling methods; statistics and their distributions; central limit theorem, distribution of linear combination of random variables.

UNIT – III:Estimation (12 hours)
Point estimators and properties. Methods of point estimation. Sampling distributions: t, chi square and F. Interval estimation for mean, proportion and variance.

UNIT – IV: Testing of Hypothesis (9 hours)
Null and alternative hypotheses. Types of errors. Testing for the population mean, proportion and variance. One and two tail tests. P-values. Testing for difference in means and proportions; comparing variances.

Practical component (30 hours) –Practicals to be based on aspreadsheet software (Microsoft Excel or equivalent) to enable students to execute all the measures and tests taken up in the theory classes in the course.

Essential/recommended readings

1. Devore, Jay L., (2012). Probability and Statistics for Engineering and the sciences.8th Edition, Cengage Learning.

Suggestive readings

1. *Miller, Irwin and Marylees Miller*. John E. Freund's Mathematical Statistics with Applications, Eighth Edition, Pearson Education.
2. Nagar, A.L., and R.K. Das. Basic Statistics, Second Edition, Oxford University Press
3. Gupta, S.C., Fundamentals of Mathematical Statistics, Himalaya Publishing House

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – (DSC-12): MARKETING MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Essentials of Marketing Management (DSC 12)	4	3	1	0	Class 12	None

Learning Objectives

The course aims to develop an understanding of

- Firm's internal and external marketing environment.
- Segmentation and defining the target market for a selected product or service.
- Product decisions and use of pricing strategies.
- Relevance of distribution and promotional strategies in supporting marketing strategies.

Learning outcomes

By studying this course, students will be able to:

· Understand the business environment including the economic, social, political, legal, and technological forces.

· Develop key strategies for developing brands including brand equity, brand identity and brand and line extensions.

· Recognise different pricing strategies and understand issues related to distribution.

· Understand the elements of promotion- advertising, sales promotion, events, public relations and publicity, direct marketing, interactive marketing, word of mouth and public selling.

SYLLABUS OF DSC-12

UNIT – I: Introduction and Environment (9hours)

Importance and Scope of Marketing; Core Marketing Concepts; Company Orientations. Marketing Environment, an Economic Perspective: Economic, Demographic, Socio- Cultural, Technological, Political and Legal. Influence of Current Economic Situation on Marketing Functions. Michael Porter's Model of Competitive Analysis

Unit 2: Segmentation, Targeting & Positioning (9 hours)

Market Segmentation - Bases for Segmenting Consumer Market.Market Targeting- Evaluating and Selecting Market Segments. Positioning- Positioning Statement, POP and POD

Unit 3: Product & Pricing (12 hours)

Product Life Cycle- Concept and Strategic Implications; Product Mix and Line Decisions- Product Line Length, Modernisation, Line Pruning and Filling; Cannibalisation; BCG Matrix, ANSOFF Matrix; Branding- Brand Identity, Brand Equity, Brand Name Decisions. Services- Characteristics of Services. Pricing Strategies (Geographical Pricing, Price Discounts & Allowances, Promotional Pricing Tactics, Psychological Pricing, Price Discrimination)

Unit 4: Distribution & Promotion (15hours)

Channels Functions and Flows; Channel Levels.Retailing- Marketing Decisions in Retailing. Promotion: Promotion Mix; Concept Of Integrated Marketing Communication.
Advertising- Advertising Objectives, Advertising Budget, Message Generation, Media (Types, Reach Frequency, Impact); Measurement; Sales Promotion (Objectives, Major Decisions in Sales Promotion, brand dilution); Personal Selling; Events and Experiences; Public Relations and Publicity; Direct Marketing; Interactive Marketing (Introduction to Online Marketing).Word Of Mouth and Word of Web.

Essential/recommended readings

1. Kotler, P. & Keller, K. L. Marketing Management. Pearson Publications.
2. Kotler P, Armstrong G., Agnihotri P.Y &UlHaq, E. Principles of Marketing - A South Asian Perspective. Pearson Publications.
3. Ramaswamy V.S, Namakumari S. Marketing Management: Global Perspective Indian Context. Macmillan Publishers.

Suggestive readings

1. Dawn Iacobucci. Marketing Management. Cengage Learning.
2. Etzel M. J, Walker B.J, Stanton W.J and Pandit A. Marketing. Tata McGraw Hill.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 2 (DSE-2): PUBLIC FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical/ Practice		
Public Finance (DSE2)	4	3	1	0	Class 12	None

Learning Objectives

The course aims to develop an understanding of

- Fundamental concepts of Public Finance.
- Economics of government expenditure and taxation
- Efficiency and equity aspect of taxation of centre and state government.
- Different types of canons in taxation.

Learning outcomes

By studying this course, the students will be able to:

- Apply tools of basic microeconomics to key policy issues relating to the spending, taxing and financing activities of the Government.
- Understand difference in impact of direct and indirect taxation.
- Understand the recent developments and issues in Indian Public Finance.

SYLLABUS OF DSE-2

Unit 1: Theory of Public Finance (12 hours)

Public finance: Meaning, nature, scope and importance, difference between private and public finance. Principle of maximum social advantage.Role of state in public finance. Elementary theory of product and factor taxation.
Sources of revenue: taxes, loans, grants and aid – meaning and types, Principle of public expenditure. Public finance and the economic system.

Unit 2: Current Issues in Indian Tax System (12hours)

Direct and Indirect Tax Reform in India, Different forms of direct tax in India,
Changing regime of taxation-direct to indirect taxation.
Introduction of GST and its implication for state finances and fiscal federalism in India,
Latest finance commission and its recommendation for fiscal devolution.

Unit 3: Center State Financial Relations (9hours)

Center state fiscal relations, horizontal and vertical tax devolution in India,

State and local finance in India.
Performance and Equity debate in fiscal devolution in India.
Report of finance commission in post liberalisation period.

Unit 4: Principles of Taxation (12 hours)

Canons of taxation, Meaning of Canons of Taxation -Types of Canons of Taxation-Canon of equality or equity, Canon of certainty, Canon of economy, Canon of productivity, Canon of Diversity, Canon of convenience, Canon of elasticity, Canon of simplicity, Canon of diversity, Characteristics of Canons of Taxation.

Essential/recommended readings

1Musgrave, R. A. and Musgrave, P.B., Public Finance in Theory and Practice (1989), 5th edition. McGraw Hill Education.

2. Bagchi, Amaresh. Reading in Public Finance, Oxford University Press.
3. Bhatia H.L.. Public Finance. Vikas Publishing House;
4. Shankar Acharya, Thirty years of Tax Reforms in India, EPW, May 2005
5. Rao, M. Govinda, "Central transfers to states in India: rewarding performance while ensuring equity." Final report submitted to NITI Aayog (2017) (pages 1 to 18).
6. Government of India, Fifteenth Finance Commission Report 2021-26, Chapter 6

Suggestive readings

1. Report of Finance commission of India, Various years.
2. Economic Survey, GoI, Various year
3. State Finances: - A Study of Budget, RBI, Latest report

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 4 (DSE-4): ADVERTISING MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical/ Practice		
Advertising Management (DSE 4)	4	3	1	0	Class 12	None

Learning Objectives

To provide students with an understanding of:

- Fundamentals of advertising.
- Planning advertisements to target audience needs using product benefits and product characteristics.
- Crafting an effective creative brief to direct the approach to an advertising campaign.
- Various types of advertising media.

Learning outcomes

By studying this course, the students will be able to:

· Understand the role played by advertising agencies.

· Recognise and identify the facet model objectives in any advertisement.

· Conduct situation analysis and consumer insight mining.

· Learn creative execution strategies including application of appeals, layouts and creative copywriting.

· Understand and conduct appropriate media mix selection.

SYLLABUS OF DSE-4

Unit 1: Foundations of Advertising **(12 hours)**

Concept of advertising, Types of advertising, Concept of IMC, Role and functions of Advertising, the key players, functions of advertising agencies, Organisation of agency, Advertising appropriateness- factors influencing advertising budgets, methods of setting advertising budgets.

Unit 2: Planning and Strategy **(12hours)**

Planning Framework-marketing and advertising plan, Facet model of objectives (Perception, Cognition, Affect, Association, Action), DAGMAR, Marketing strategy and situation analysis, consumer insight mining, big idea, positioning for advertising campaigns.

Unit 3: Effective Advertising Execution **(12hours)**

The creative and message strategy, creative brief, themes and appeals, execution styles, message format, message tone, copywriting creativity, body copy, visual layouts, evaluation of effectiveness, pre-testing, post-testing.

Unit 4: Effective Advertising Media (9hours)

Types of media, newer media options, media objectives, developing a media plan, media Plan budget, media mix selection.

Essential/recommended readings

1. Belch,G.E., Michael, A., Keyoor, Purani. Advertising and Promotion-An Integrated Maketing Communications. 12th edition. Tata McGraw Hill Education. 2021.
2. William Wells, Sandra Moriarty, and John Burnett. Advertising: Principles and Practice. Prenctice Hall of India. 2007.
3. Jethwaney, Jaishri., Jain, Shruti. Advertising Management. Oxford University press.
4. Shah, Kruti. Advertising and Integrated Marketing Communications. McGraw Hill Education India. 2014.
5. Aaker, David A., Batra, Rajeev., Myers, John G. Advertising Management. Pearson Education. 2006.
6. Shimp, T.A. .Advertising and Promotion: An IMC Approach. Cengage. 2013.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 4 (DSE-4): INTERNATIONAL FINANCIAL MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
International Financial Management (DSE 6)	4	3	1	0	Class XII	None

Learning Objectives

This course aims at inculcating an understanding of:

- Key features of international finance and foreign exchange markets.
- Theories of International finance that link exchange rates with interest rates and inflation rates in different countries.
- Evolution of exchange rate system in the international financial markets.
- Determination of exchange rate, types of foreign exchange risks and risk management strategies.

Learning outcomes

By studying this course, the students will be able to:

- Gain substantive knowledge of International Financial Management.
- Understand the principles of trading in foreign exchange markets, different instruments traded, risks involved and how to carry out hedging of currency risks.
- Learn how to compute forward rates using cross rates, computation of synthetic quotes and apply rules to determine existence of arbitrage amongst currencies traded.
- Understand how the international markets have evolved and the alternate exchange rate systems world has seen over the years

SYLLABUS OF DSE-6

Unit 1: Introduction To Currency Markets (12 hours)

Spot &Forex market: Introduction and Features, Participants, & their method of communication in forex markets, SWIFT and CHIPS. Currency Quotes and types, Calculation of forward rates using spot rates, Discount/Premium on spot rate, Swap Points and Outright Forward Rates, Forward Rate vs. Expected Future spot rates, Spot rate with and without transaction costs, Payoff Profiles on Forward Exchange, Currency futures and

Pay of Profiles, Mark to Market, Cross Rates & Synthetic quotes. Arbitrage: one point, two point and three point (triangular) arbitrage.

Unit 2: Parity Conditions in Currency Markets (12 hours)
Purchasing Power Parity (both absolute and relative versions), Interest Rate Parity (explanation of borrowing and lending criteria, diagrammatic presentation) , covered interest rate parity, International Fischer Effect. The linkages between parity conditions.

Unit 3: Alternate Exchange Rate Systems and Payment Terms (9 hours)

Gold Standard and Gold Exchange Standard System with price adjustment mechanism , EMS and its price adjustment, Hybrid systems , Fixed vs Flexible System, Overview on Brettonwoods System, IMF, SDR, Triffon Paradox & Smithsonian Agreement. Payment Terms and Methods of Financing International Trade (Letter of Credit, Forfaiting, Factoring, Credit Lines)

Unit 4: Exchange Rate Determination and Exposures (12 hours)

Currency Demand and Supply Curves, Stability of exchange rates and 'J' Curve Effect, Factors Affecting Exchange Rate, Foreign Exchange Exposure: Nature, Definition, Exposure Line and Interpretating Exposure, Statistical Measurement of Exposure, Types of Exposure (Meaning): Transaction, Economic and Translation Exposure, Hedging Strategies to Manage Transaction Exposures. Currency Swaps.

Essential/recommended readings

1. Apte, P G., Multinational Financial Management.Tata-McGraw Hill. New Delhi.
2. Levi, Maurice. International Finance. McGraw Hill Inc. New York.
3. Madura, Jeff. International Financial Management.South Western Cengage Learning.
4. Seth, A.K., International Financial Management. Galgotia Publishing Company. New Delhi.
5. Shapiro, Allen C., Multinational Financial Management. Prentice Hall India Pvt Ltd. New Delhi.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

COMMON POOL OF GENERIC ELECTIVE COURSES OFFERED BY THE DEPARTMENTS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

GENERIC ELECTIVES (GE-2): INTRODUCTION TO DIGITAL MARKETING

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Introduction to Digital Marketing (GE - 2)	4	3	1	0	Class 12	None

Learning Objectives

This course aims to acquaint the students with:

- Key marketing principles and terminology.
- Evolving digital landscape and the strategic role of digital marketing processes and tools in designing the overall Marketing strategy.
- Methodologies, tools and technologies involved in digital marketing.
- Importance of search engines and their role in digital marketing ecosystem.

Learning outcomes

By studying this course, students will be able to:

- Understand the concept of digital marketing and its integration with traditional marketing.
- Understand customer value journey in digital context and behaviour of online consumers.
- Learn email, content and social media marketing and apply the learnings to create digital media campaigns.
- Examine various tactics for enhancing a website's position and ranking with search engines and search advertising.

SYLLABUS OF GE-2

Unit 1: Fundamentals of Marketing **(6hours)**

Importance of marketing; Core marketing Concepts; Company Orientations; Concept of Segmentation, Targeting-Positioning; 7 P's Framework; Product Life cycle; Pricing strategies, Types of distribution channels; Promotion Mix.

Unit 2: Marketing in the Digital World **(9 hours)**

Digital marketing: Concept, Features, Difference between traditional and digital marketing, Moving from traditional to digital Marketing; Digital Marketing Channels: Intent Based- SEO, Search Advertising; Brand Based- Display Advertising; Community Based-SMM; Others- Affiliate, Email, Content, Mobile; Customer Value Journey: 5As Framework; The Ozone O_3 Concept Key; Traits of online consumer.

Unit 3: Content, Email and Social Media Marketing (15 hours)

Content Marketing: Developing a content marketing strategy; Email Marketing: Types of Emails in email marketing, Email Marketing best practices; Social Media Marketing: Building Successful Social Media strategy; Social Media Marketing Channels; Facebook, LinkedIn, YouTube (Concepts and strategies)

Unit 4: Search Marketing (15 hours)

Introduction of SEM: Working of Search Engine; SERP Positioning; Search Engine Optimization: Overview of SEO Process; Goal Setting-Types

On-Page Optimization: Keyword Research, SEO Process -Site Structure, Content, Technical Mechanics, Headings, Image & Alt text, Social Sharing, Sitemaps, Technical Aspects-Compatibility, Structured Data Markup.

Off Page Optimization: Link Formats, Link Building, Content Marketing, Social Sharing; Black and White Hat Techniques

Search Advertising: Overview of PPC Process; Benefits of Paid Search; Basis of Ranking; Goal Setting-Objectives; Account Setting-Creation of Google Ads, Campaign architecture, Campaign setup, Targeting, Bid Strategy, Delivery, Ad Scheduling, Ad Rotation, Keyword Selection; Ad Copy composition, Ad Extension

Overview of Display Advertising: Working of Display Advertising; Benefits and challenges.

Essential/recommended readings

1. Dodson, I. (2016). The art of digital marketing: the definitive guide to creating strategic, targeted, and measurable online campaigns. John Wiley & Sons.
2. Kartajaya, H., Kotler, P., &Setiawan, I. (2016). Marketing 4.0: moving from traditional to digital. John Wiley & Sons.
3. Ryan, Damien. Understanding Digital Marketing - Marketing Strategies for Engaging the Digital Generation. Kogan Page Limited.

Additional References:

1. Kotler, P. (2009). Marketing management: A South Asian perspective. Pearson Education, India.
2. Maity, Moutusy. Internet Marketing: A practical approach in the Indian Context. Oxford Publishing.
3. Gupta, Seema. Digital Marketing. McGraw Hill
4. Ultimate guide to digital Marketing. Digital Marketer

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-4): STATISTICS FOR BUSINESS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Statistics for Business (GE-4)	4	3	0	1	Class 12	Mathematics at Class 12

Learning Objectives

The objective of this course is to enable students to:

- Describe data using summary statistics.
- Develop detailed understanding of discrete and continuous distributions.
- Develop skills in statistical computing, statistical reasoning and inferential methods.
- Comprehend and analyse real data like real indices.

Learning outcomes

By studying this course, students will be able to:

- Learn tools and concepts of statistical analysis and interpretation.
- Comprehend fundamentals of probability theory.
- conduct statistical computing, statistical reasoning and use inferential methods.
- Comprehend and analyse real data like real indices.

SYLLABUS OF GE-4

Unit 1: Descriptive Statistics and Exploratory Data Analysis (12hours)

Types of Variables (Quantitative, Qualitative, discrete, continuous), Scales of Data Measurement (nominal, ordinal, Interval & Ratio), Variable-; Primary & secondary Data.

Frequency distributions, Relative Frequency, Cumulative Distributions, Percentiles, Quartiles; Graphical representation of data- bar charts, pie, histograms, box plots.

Univariate Measures Mean, median, mode, Geometric Mean, Harmonic Mean, Weighted Mean & their properties. Selection of a measure of central tendency. Range, inter-quartile range, quartile deviation, mean deviation, standard deviation, variance, coefficient of variance, properties of standard deviation, merits & demerits. Skewness and Kurtosis: Meaning, measures- Karl Pearson, Bowley, Kelly's, Kurtosis- meaning, Moments, Kurtosis

Bivariate Analysis: Cross-tabulations and Scatter diagram; Correlation, Association and linear regressions

Unit 2: Probability and Distributions (12 hours)

Axioms of probability; Review of counting rules, experiments, sample space, simple and complex events; Addition and multiplication rules; Concepts of Mutually exclusive events, independent events; Concepts of Joint, marginal and conditional probability; Permutation and Combinations

Concept of Discrete and continuous Random Variables; Expected value and variance; Examples of Theoretical Discrete and Continuous Probability Distributions – Binomial, Poisson and Normal distributions.

Unit 3: Sampling, Estimation and Hypotheses (15 hours)

Sample Statistics versus population parameters; Definition and Statistical properties of a Random Sample; Point and Interval Estimation and Small Sample Properties of Estimators (unbiasedness, efficiency); Central Limit Theorem. (Interval estimation for mean for large samples)

Basic concepts of Hypotheses Testing: Formulation of Null and Alternate Hypotheses; One-tailed and two-tailed Tests about population Mean; Concepts of Type I and Type II errors. (Hypothesis testing for mean and difference between mean for large samples only)

Unit 4: Index Numbers (6hours)

Index Numbers: Use and construction of Laspeyres and Paasche indexes; Fixed and chain base index numbers; Construction of real indexes: Consumer Price Index and BSE index.

Practical component (30 hours) - Practicals to be based on a spreadsheet package (Microsoft Excel or equivalent) to enable students to execute all the measures and tests taken up in the theory classes in the course.

Essential/recommended readings

1. Spiegel, M.R.(2003). Theory & Problems of Statistics, Schaum's outline series, McGraw Hill.
2. Levin, Richard I. and Rubin, David (1998). Statistics for Management (7th Edition), Pearson.
3. Gupta, S.C. (2018). Fundamentals of Statistics, Himalaya Publishing House
4. Spiegel, M. and Stephens, Larry (2017). Statistics (Schaum's Outline Series), Tata-Mcgraw-Hill, New Delhi

Suggestive readings

1. Nagar, A. L. and Das. R. K.. Basic Statistics (2nd Edition), Oxford University Press
2. Karmel, P. H. and Polasek, M. (1978). Applied Statistics for Economists (4th edition), Pitman.
3. Larsen, Richard J. and Marx, Morris L. (2011). An Introduction to Mathematical Statistics and its Applications. Prentice Hall.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-6): INTRODUCTION TO FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Introduction to Finance (GE-6)	4	3	1	0	Class 12	None

Learning Objectives

This course aims at providing a comprehensive introduction to:

- Financial system and its primary constituents.
- Sources of finance and time value of money.
- Basics of Investment and various asset classes.
- Key concepts of international financial management.

Learning outcomes

By studying this course, students will be able to:

- Understand the meaning, scope and sources of Finance
- Estimate the present and future values of assets
- Examine the relationship between risk and return, and the nature and sources of risk in a stock market context
- Analyse the currency exchange market to deal exchange rate risk.

SYLLABUS OF GE-6

UNIT – I: A Primer on Financial Markets & Institutions (9hours)

An overview of financial system: characteristics & requirements. Components & functions of financial system. Financial markets: characteristics & types. Types & role of Financial Institutions. An overview of the 2007–2008 Financial Crisis.

Unit 2: Corporate Finance: An Overview (12hours)

Nature, scope and objectives of Finance, Emerging role of Finance Managers in India and Agency problem.Concept & Meaning of Financial Management, goals of financial management, the three financial decisions- Investing, Financing & Dividend.

Sources of Finance: Equity & Preference Capital, Retained earnings, Debt, Bonds, Long term loans, Short term advances from banks, public deposits & advances from customers and trade creditors.

Concept of Time Value of Money, Compound Value, Present Value, Annuity and Perpetuity.

Unit 3: Investment Management: Basics & Process (15 hours)

An overview of investment- Investment process, Types of assets- real & financial.Types of investors, types of financial securities & attributes of a good investment.

Concept of Risk & Return (Single asset), risk-return trade off, types of risk- systematic & unsystematic, types of return-holding period return, expected return, actual return.
Examining four broad asset classes: equity, bonds, mutual funds & derivatives.
Equity- three schools of thought on equity valuation- a brief discussion on fundamental analysis, technical analysis and efficient market hypothesis.
Bonds- types, fundamentals, relationship between interest rates & bond prices& yield curve.
Mutual Funds– meaning, importance, structure, mutual fund schemes, Systematic Investment Plan (SIP), Systematic Withdrawal Plan (SWP), Exchange Traded Fund (ETF), Equity Linked Savings Scheme (ELSS) and NAV of Fund.
Derivatives – Meaning and Types of Derivative Instruments (Forwards, Futures, Options and Swaps).
Concept of diversification & portfolios. Portfolio Risk &Return(two security only).

Unit 4: A Beginners' Guide to International Finance (9hours)
International Monetary System- development of international finance and how the international monetary system evolved. Currency exchange markets and rates- currency exchange markets, exchange rate quotations, currency exchange rate appreciation and, depreciation, factors that affect currency exchange rates and arbitrage. Conducting business internationally. Concept of exchange rate risk.

Essential/recommended readings

1. Bodie, Zvi., Kane, Alex and Marcus, Alan J.. Investments. McGraw Hill.
2. Chandra, P.. Security Analysis and Portfolio Management. Tata McGraw Hill.
3. Pathak, Bharati. Indian Financial System. Pearson.
4. Ronald, W. Melicher and Norton, Edgar A.. Introduction to Finance: Financial Markets, Investment, and Financial Management. Wiley Publishing House. 2012.
5. Rustagi, R.P., Fundamentals of Financial Management. Taxmann.

Suggestive readings

1. Khan, M. Y & Jain P. K., Financial Management: Text and Problems. Tata McGraw Hill. New Delhi.
2. Kohn, Meir. Financial Institutions and Markets. Oxford University Press.
3. Kidwell, David S., Backwell, David W., Whidbee, David A. and Sias, Richard W. Financial Institutions, Markets and Money. Wiley Publications.
4. Madura, Jeff. Financial Markets and Institutions. South Western Cengage Learning.
5. Reilly, Frank K, and Brown, Keith C. Investment Analysis and Portfolio Management. Cengage Learning.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-8): ENVIRONMENTAL ECONOMICS AND

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Environmental Economics and Climate Change (GE-8)	4	3	1	0	Class 12	None

Learning Objectives

This course aims at inculcating an understanding of:

- How economic activities are affecting the environment.
- Social value of environmental resources.
- Climate change and its consequences.
- Efficient and effective policy measures for protecting the environment.

Learning outcomes

By studying this course, students will be able to:

. · Understand the linkage between environment and economics.

· Learn the basic theories of environmental economics.

· Understand the basic terminologies related to environment and Climate change.

· Analyse the effects of climate change on India and its future plan for environmental protection and mitigation.

SYLLABUS OF GE-8

UNIT – I: Introduction **(8 hours)**

Introduction to Environmental Economics, Material Balance model- economy environmental interactions, reasons for environmental degradation (population, technology, GDP), balance between environment and growth.

Unit 2: Economic Growth and Environmental Degradation **(10 hours)**

Theories of relationship between economic growth and environmental degradation: The environmental Kuznets curve hypothesis, The Brundtland Curve hypothesis, The environment Daly Curve hypothesis.

Unit 3: Climate Change and its Challenges **(15 hours)**

Introduction to the Climate Change, Drivers of Climate Change, Global impacts of Climate Change: Anthropogenic, Global warming, ozone hole, biodiversity loss, ecosystem services, natural capital and resources. Effect of Climate Change on India: Agriculture, Biodiversity, vulnerability of Coastal Belt, Rural Livelihoods and Food Security in India.

Unit 4: Actions Taken and Policy Framework (12 hours)

Global Level: Adaptation and Mitigation, Governmental and Intergovernmental Actions to Combat Climate Change: The Role of the Intergovernmental Panel on Climate Change (IPCC), United Nations Framework Convention on Climate Change, The Kyoto Protocol, Paris Agreement etc. The global carbon market (CDM, JI, ET).India's Position on International Climate Negotiations, India's National Action Plan on Climate Change.

Essential/recommended readings

1. Callen,Thomas (2007). Environmental Economics, Thomson Learning Inc. Indian Edition.
2. Dubash, Navroz (2012). Handbook of Climate Change and India: Development, Politics and Governance, Earthscan
3. Bhattacharya, R. N. (ed.) (2001). Environmental Economics, An Indian Perspective, Oxford University Press.

Suggestive readings

1. Romm, J.J. 2018. Climate change: What Everyone Needs to Know. Oxford University Press
2. Dash. S.K. 2008. Climate Change, Cambridge University Press

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

SEMESTER -V

B.A. (Hons) BUSINESS ECONOMICS

DISCIPLINE SPECIFIC CORE COURSE – 13 (DSC-13): BASIC ECONOMETRICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Basic Econometrics (DSC 13)	4	3	0	1	Class 12	Maths at Class XII level

Learning Objectives

The course aims to:

- To introduce classical and functional forms of linear Regression Model.
- To make statements or hypothesis that are mostly qualitative in nature in multi regression model
- To understand interaction between quantitative and qualitative variables and Use of dummy variables.
- To apply multicollinearity, heteroscedasticity, autocorrelation and specification errors, its detection and corrective measures.

Learning outcomes

By studying this course, the students will be able to:

. To explain key econometric concepts.

· Formulate simple econometric models

· Interpret the regression results obtained from software packages.

· Identify the errors in regression models and rectify the same.

· Analyse the suitability of the data for solving the problem at hand

SYLLABUS OF DSC-13

UNIT–I: The Classical Linear Regression Model [18hours]

Types of Data: Time Series, Cross Section and Panel Data. Concept of Population Regression Function and Sample Regression Function, Assumptions of the model, Derivation of Coefficients of Regression in a two-variable model, Estimation of the SRF using OLS, Analysis of variance and R squared.

Expectation and standard errors of the regression coefficients and the error term. Gauss Markov Theorem. Interval estimation and tests on population regression coefficients, variance of population disturbance term and forecasts. Testing the significance of the model as a whole. Testing the normality assumption.
Extensions of the Two Variable Linear Regression Model: Regressions through the origin, Scaling of Variables and Regression on Standardized Variables. Functional forms of Linear Regression Models: The double log, semi-log, reciprocal, log- reciprocal models with applications.

Unit 2: Multiple Regression Model [12hours]

Coefficients of regression in a multi variable model and their properties. Interval estimation, tests on population regression coefficients and model significance. Correlations, Goodness of fit and the Adjusted R square. Hypothesis testing for significance of the contribution of a variable, structural stability, restricted least squares.

Unit 3: Dummy Variable Regression Models [6hours]

Intercept, Slope Dummy variables. Interaction between qualitative variables. Interaction between quantitative and qualitative variables. Use of dummy variables in testing for structural change and for seasonal indices.

Unit 4: Relaxing the Assumptions [9hours]

Introduction to multicollinearity, heteroscedasticity, autocorrelation and specification errors. The nature of the problem, its detection and corrective measures.

Practical Component (30 hours) : Practicals to be based on an econometric software (e.g., Gretl/SPSS/PSPP). The student is expected to implement using the software, all the regressions and tests noted in the syllabus. An econometric project to be taken up ans assessed as part of the practical internal assessment.

Essential/recommended readings

1. Gujarati, D. and Sangeetha, N. (2007) Basic Econometrics. Fourth Edition, Tata McGraw-Hill, New Delhi
2. Dougherty, Christopher. (2011). "Introduction to Econometrics," Oxford University Press,
3. Wooldridge, J. M. (2006). Introductory Econometrics: A modern approach. Mason, OH: Thomson/South-Western.

Suggested readings

1. Asteriou, D., & Hall, S. G. (2011). Applied econometrics. Palgrave Macmillan.
2. Brooks. Chris.(2008) Introductory Econometrics for Finance, Second Edition Cambridge University Press

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 14 (DSC-14): ORGANISATIONAL BEHAVIOUR

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Organisational Behaviour (DSC 14)	4	3	1	0	Class 12	None

Learning Objectives

This course aims at:

- To explain core concepts of organizational behaviour
- To apply motivation theories and analysis of interpersonal relationships
- To apply leadership theories to understand leadership traits and issues
- To manage conflict and enhance well being at workplace

Learning outcomes

By studying this course, the students will able to:

· Understand the importance of organizational behaviour as a field of study.

· Understand the role of perception, personality and learning in explaining Individual behaviour and to Apply different motivational theories and leadership styles to increase the productivity and job satisfaction of employees.

· Understand the foundations of group behaviour and the framework for organizational change and development.

· Identify methods to enhance individual and Organizational wellbeing and resolve organizational problems.

SYLLABUS OF DSC-14

UNIT – I: Core Concepts in Organisational Behaviour (12hours)

Conceptual Foundations and Importance of organizational behaviour. Perception and Attribution: Concept, Factors affecting Perception, Attribution theory, Perceptual Organization and Errors in Perception. Personality: Concept, Factors affecting personality and Theories. Learning: Concept and Theories of Learning, Concept of Reinforcement, Schedules of Reinforcement.

Unit 2: Motivation, Interpersonal Relations and Change Management(12hours)

Motivation: Concepts and their application, Content theories (Maslow, McClelland and Herzberg's Theories); Process theories (Expectancy theory, Equity theory). Analysis of

Interpersonal Relationship: Transactional Analysis, Johari Window. Organisational Change: Concept, Resistance to change, managing resistance to change, Kurt Lewin Theory of Change.

Unit 3: Leadership and Group Processes (9 hours)

Leadership: Trait Approach, Behavioural theories (Ohio and Michigan State Studies, and Blake & Mouton's Managerial grid), and Contingency theories (Fiedler's Contingency Model, Hersey & Blanchard's Situational Leadership Model) Contemporary Leadership issues: Charismatic, Transactional and Transformational Leadership. Groups and Teams: Definition, Stages of Group Development, Group Processes-Group Cohesiveness, Group Think, Group Shift.

Unit 4: Managing Conflict and Enhancing Wellbeing (12 hours)

Organisational Power and Politics: Concept, Sources of Power, Tactics to gain power in Organizations. Nature of organisational politics. Conflict: Concept, Sources, Types, Stages of conflict, Management of conflict. Well-being at Work: Importance and Impact of employee emotions and emotional intelligence in organisations. Work stress and its management.

Essential/recommended readings

1. Stephen P. Robbins, T. A. Organisational Behavior. Pearson.
2. Aswathappa, K., & Reddy, G. S. Organisational behaviour (Vol. 20). Mumbai: Himalaya Publishing House.
3. Luthans, Fred, Organisational Behaviour, Tata Mc Graw Hill.
4. Singh, Kavita, Organisational Behaviour, Pearson.
5. Greenberg Jerald and Baron Robert, A. Behavior in Organisations: Understanding and Managing Human side of work. Prentice Hall of India

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 15 (DSC-15): INDUSTRIAL ECONOMICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Industrial Economics (DSC 15)	4	3	1	0	Class 12	None

Learning Objectives

The course aims to:

- To understand basics of industrial economics and its scope
- To understand concept and theories of market structure.
- To analyse issues related to market conduct like Entry and Exit Barriers, Pricing Behavior, Research and Innovation, Mergers and Acquisitions and Legal Tactics.
- To explore the role of public policy in Indian industries

Learning outcomes

By studying this course, students will be able to:

· Enable the student to understand how the Industries Function in the real world

· Understand what is market concentration and how does it affect market power

· Know how different strategies are used, under the structure-conduct-performance paradigm, by the firms to maximize their market power.

· Know the importance of regulatory public policy in oligopolistic market, in order to ensure maximum consumer welfare.

SYLLABUS OF DSC-9

UNIT – I: Structure- Conduct- Performance Paradigm (12 weeks)

Basic understanding of Industrial Economics, Scope of Industrial Economics, Structure-Conduct- Performance Model, Different School of Thoughts, Theory of Firm and basic conditions of Demand and Cost.

Unit 2: Market Structure and Concentration (12hours)

What is Market Concentration, Theories of Measurement of Concentration, Deterministic and Stochastic Approach, Lerner and Herfindahl Index, Product Differentiation, Horizontal, Vertical and Conglomerate Mergers, Vertical Integration.

Unit 3: Market Conduct (12hours)

Entry and Exit Barriers, Pricing Behavior, Advertising, Product Strategy, Research and Innovation, Mergers and Acquisitions, Legal Tactics.

Unit 4: Public Policy and Indian Industries (9hours)

Role and Importance of Industry Regulation, Regulation of Natural Monopoly, Antitrust Legislations and Indian Industries, Social Concerns and Advertising.

Essential/recommended readings

1. Cabral Luis M.B. (2017). Introduction to Industrial Organization. 2ndEdn. Cambridge, MA: MIT Press
2. Carlton, D.W. and J. M. Perloff. (2005). Modern Industrial Organization. Pearson
3. Shy, Oz. (1996). Industrial Organization: Theory and Applications. The MIT Press.
4. Waldman D.E. and E. J. Jensen. (2019). Industrial Organization: Theory and Practice.

Suggestive readings

1. Tremblay, Victor J., and Carol Horton Tremblay. (2012), "New Perspectives on Industrial Organization", New York: Springer.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 1 (DSE-1): INCOME TAX LAW AND PRACTICE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Income Tax Law and Practice (DSE1)	4	3	1	0	Class 12	None

Learning Objectives

The course aims at

- Introducing basic definitions in Income Tax Act
- Computing taxable income under the heads Salaries and House Property
- Calculate Profits and Gains of Business or Profession, Capital Gains and Income from other sources
- Understand deductions from gross taxable income and filling of returns.

Learning outcomes

By studying this course, the students will be able to:

- Understand the Process of determination of taxable income
- Apply the deductions to taxable income as per the latest provisions of Income-tax Act, 1961
- Acquire the skill of Filling Basic Returns of Income Tax

SYLLABUS OF DSE-1

Unit 1: Introductory Concepts (3 hours)

Permanent Account Number (PAN), Assessment Year, Previous Year, Person, Assessee, Gross Total Income, Total income and its computation, Tax Rates, Residential status; Relationship between Residential Status and Incidence of Tax. Incomes Exempted under section 10.

Unit 2: Computation for "Salaries" and "Income from House Property" (15 hours)

Income under the head "Salaries": Meaning of Salary, basis of charge, Allowances, Perquisites, permissible deductions from salary income, Deduction under Section 80 C.

Income under the head "Income from House Property": Basis of charge, income from let out house property, income from self-occupied property.

Unit 3: Computation for 'Profits and Gains of Business or Profession', 'Capital Gains' and 'Income from other sources' (15 hours)

Profits and gains of business or profession: Basis of charge, important rules regarding assessment of PGBP, computation of Profits from Business or Profession, deductions expressly allowed, expenses expressly disallowed.

Capital gains: basis of charge, meaning of capital asset, cost of acquisition, improvement and indexation, exemptions for capital gains arising from transfer of Capital Assets, calculation of tax on short-term and long-term capital gains.

Income from other sources: basis of charge, dividend, winnings from lotteries, crossword puzzles, etc., interest on securities, advance money received for transfer of a capital asset, permissible deductions.

Unit 4: Computation of Total Income and Tax Liability (12 hours)

Computation of total income; Deductions from gross total income under section 80 C to 80 U; Rebates and reliefs; Set-off and carry forward of losses (Concept only), Concept of advance payment of Tax and Deduction of Tax at Source. Computation of Taxable Income and liability of Tax. e-Filing of Returns: ITR-1 (SAHAJ) and ITR-2

Essential/recommended readings

1. Ahuja, G. and Gupta, R. Simplified Approach to Income Tax. Flair Publications (P) Ltd.
2. Singhania, V.K. and Singhania, M. Students Guide to Income Tax. Taxmann Publications (P) Ltd.

Software which will be used for teaching are

1. 'Excel Utility' available at incometaxindiaefiling.gov.in
2. Vinod Kumar Singhania, e-filing of Income Tax Returns and Computation of Tax Taxmann Publication (P) Ltd, New Delhi. (Latest version)

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 3 (DSE-3): ENTREPRENEURSHIP

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Entrepreneurship (DSE 3)	4	3	1	0	Class 12	None

Learning Objectives

The course aims at:

- To introduce the concept of entrepreneurship and its role in the economy
- To launch an Entrepreneurial Venture and writing a business plan
- To identify and explore legal and financial requirements of a business
- To understand the role and creativity in sustainable Business

Learning outcomes

By studying this course, the students will be able to:

· Develop critical thinking, problem solving skills and entrepreneurial mind-set in students.

· Enhance the understanding of the entrepreneurial process from idea generation, to concept development and creation of the venture.

· Enable the understanding of the business models, legal aspects of enterprise and writing a business plan.

· Apprise students with ways to finance and scale up the business.

SYLLABUS OF DSE-2

Unit 1: Introduction to Entrepreneurship (9 hours)

Concept of Entrepreneurship; Attributes of Entrepreneur; Distinction between entrepreneur and manager; Concept of corporate entrepreneurship/ intrapreneurship; Concept of social entrepreneurship; Role of entrepreneurship for an economy; Understanding business model strategy; Legal forms of enterprise; case study discussion on entrepreneurs, intrapreneurs, business models

Unit 2: Launching Entrepreneurial Venture (12 hours)

Identification of opportunities and Idea generation and screening methods- Brainstorming, mind-mapping, story-telling, SCAMPER, attribute listing, focus group interviews, customer

feedback; Feasibility studies- Marketing, Financial, Technical, Socio-economic Feasibility; Writing Business Plan

Unit 3: Legal and Financial Aspects (12 hours)

Legal requirements of business (Basic concept and relevance of patents, copyrights, and trademark); Financing- Start-up phase financing, growth stage financing, Maturity-phase financing; angel investment and venture capital, other forms of external financing; case study discussion on financing a venture

Unit 4: Sustaining and Scaling Up (12 hours)

Keeping the entrepreneurial spirit alive- Challenges and remedies, Role of creativity and innovation, Barriers to entrepreneurship, Concept of sustainability, Ethical Perspectives; Introducing Shared Innovation into the Business Model; Evolution of CSR from Compliance to Sustainable Entrepreneurship; How to Design CSR Strategies that Optimize Impact for Business and Society

Essential/recommended readings

1. Harvard Business Review Entrepreneur's Handbook: Everything You Need to Launch and Grow Your New Business
2. Hisrich, R. D. International entrepreneurship: starting, developing, and managing a global venture. Sage Publications.
3. Sharma, S., Starik, M., & Wuebker, R. Sustainability, innovation and entrepreneurship: introduction to the volume.

Additional References:

1. Blank, S., Andreessen, M., Hoffman, R., & Sahlman, W. A. (2018). HBR's 10 Must Reads on Entrepreneurship and Startups (featuring Bonus Article "Why the Lean Startup Changes Everything" by Steve Blank). Harvard Business Press.
2. Drucker, P. (2014). Innovation and entrepreneurship. Routledge.
3. Hisrich, R.D., Manimala, M.J., Peters, M.P., Shepherd, D.A.: Entrepreneurship, Tata McGraw Hill.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 5 (DSE-5):
Investment and Portfolio Optimization

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Investment and Portfolio Optimization (DSE 5)	4	3	1	0	Class 12	None

Learning Objectives

This course aims at:

- Provides a broad overview of investment and risk associated with it
- Measurement and analysis of return and risk of an equity on the basis of fundamental and technical analysis
- Understand bond fundamentals and interest rate theories
- Construction, analysis and evaluation of a portfolio of securities.

Learning outcomes

By studying this course, the students will be able to:

· Provide a theoretical and practical background of investments valuation

· Do valuation of equity and debt instruments

· Analyse and manage the bond as well as equity portfolios in the real word.

· Understand how to measure the portfolio performances

SYLLABUS OF DSE-5

Unit 1: Basics of Investment (6 hours)

Investment alternatives and objectives, investment, gambling, speculation, introduction to risk – return trade off: types of risks, sources of risks, measures, analysis, determinants of required rates of return and relationship between risk and return. Types of returns: Holding Period Return (HPR) & Compound Annual Growth Rate (CAGR). Attributes of a good investment. Types of assets: Real Assets versus Financial Assets. Investment Process.

Unit 2: Analysis of Equity (12hours)

Measurement of return and risk of equity shares. Approaches to equity analysis, Fundamental Analysis- Economy, Industry, Company Analysis (EIC framework); Equity Valuation Models (DDM, P/E Ratio model and Free Cash Flow Valuation approach). Valuation based on other ratios-P/B ratio, Price to Sales ratio and Price to Cash flow ratio. Technical Analysis – Concept, market indicators and specific stock indicators.

Random Walk Theory & Efficient Market Hypothesis (EMH): Forms, empirical evidence and tests.

Unit 3: Analysis of Bonds (12hours)

Bond fundamentals, types of bonds & risks in bonds. Valuation of bonds. Bond yields-current yield and Yield-to-maturity (YTM). Bond price-yield relationship, analysis of risks in bonds-duration and modified duration. Theories of term structure-Expectations theory, Segmented markets theory and Liquidity Preference theory. Yield curve.

Unit 4: Portfolio Construction, Management and Evaluation (15hours)

Modern Portfolio theory: Diversification & portfolio risk, Harry Markowitz model, measurement of portfolio risk and return, measurement of co-movements in security returns, calculation of portfolio risk, efficient frontier and optimal risky portfolio. Riskless lending & borrowing and capital market line.
Capital Asset Pricing Model: Development of the CAPM, assumptions, beta and security market line. Sharpe's Single Index Model. Portfolio performance evaluation- Sharpe's index, Treynor's Index, Jensen's alpha, and Information ratio.
Note: Some case studies related to above topics are required to be discussed.

Essential/recommended readings

1. Bodie, Zvi., Kane Alex and Alan J. Marcus. Investments. McGraw Hill.
2. Chandra, P. Security Analysis and Portfolio Management. Tata McGraw Hill.
3. Francis. J.C. & Taylor, R.W. Theory and Problems of Investments. Schaum's Outline Series. TMH. New Delhi,
4. Fischer, Donald E. and Ronald J. Jordan. Security Analysis and Portfolio Management. PHI Learning.
5. Pandian, Punithavathy. Security Analysis and Portfolio Management. 2nd Edition. Vikas Publishing House. New Delhi
6. Reilly, Frank K, and Brown, Keith C. Investment Analysis and Portfolio Management. Cengage Learning.
7. Rustagi, R.P. Investment Management. Sultan Chand & Sons.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 7 (DSE-7): Monetary Economics

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Monetary Economics (DSE 7)	4	3	1	0	Class 12	None

Learning Objectives

This course provides the student the knowledge of:
1. Forms of money and its measures and associated theories
2. Money and capital markets, Financial products, institutions and crises
3. Interest rates, their determination and associated theories
4. Structure and role of the banking system and its reforms
5. Monetary theory, monetary policy, its goals and current practice in India

Learning outcomes

By studying this course, the students will be able to:

- Develop a critical understanding of functioning of financial institutions, markets and instruments and how growth of the real economy is interspersed with financial innovation and crisis.
- Learn an important learning outcome relates to aspects with regard to banks and capital markets as they constitute significant components of a financial system.
- Develop an understanding of theory of monetary policy and how it is conducted in India by Reserve Bank of India.
- Develop some basic understanding of few current issues including demonetization, cryptocurrency and problems faced by the banking sector in their appropriate contexts.

SYLLABUS OF DSE-7

Unit 1: **(8 hours)**

Concept, functions and measurement, and Theories of Money Supply Determination, Demonetization and Cryptocurrency.

Unit 2: **(15 hours)**

Financial Institutions, Markets. Instruments and Financial innovation.
Role of Financial Markets and Institutions; problems of asymmetric information, adverse selection and moral hazard, financial crisis. Money and Capital Markets, Organization, Structure and Reforms in India: Role of Financial Derivatives and other Innovations.

Unit 3: **(8 hours)**
Interest rates Determination, Sources of interest rate differentials, Theories of Term Structure of Interest rates, Interest rates in India.

Unit 4: **(8 hours)**
Banking System, Balance Sheet and Portfolio Management, Indian Banking System, Changing role and Structure, Banking Sector Reforms.

Unit 5: **(6 hours)**
Central Banking and Monetary Policy, Functions, Balance Sheet, Goals, Targets (operating, intermediate and final), Indicators and instruments of monetary control, Tinbergen's theorem, Inflation targeting, monetary management, current monetary policy in India**.**

Essential/recommended readings

1. Fabozzi F Jet al(2009): Foundations of Financial Markets and Institutions, Pearson
2. MishkinF S , Eakins S G,Jayakumar T , Pattnaik R K (2017): Financial Markets and Institutions, Pearson.
3. Dua, P(2020), "Monetary Policy Framework in India", Indian Economic Review, Vol. 55, Issue 1, June 2020
4. Jadhav,Narender: Monetary Policy,Financial stability and Central Banking in India Macmillan,New Delhi,India
5. Kaul,Vivek(2020) Bad money: inside the NPA Mess and how does it threaten the Indian Banking System, Harper Collin Publisher India
6. Ghate, C., & Kletzer, K. M. (Eds.). (2016). Monetary policy in India: A modern macroeconomic perspective. Springer
7. Chibber, Ajay, Salman, Soz, Anees(2021) India's Financial Sector: A Whodunnit
8. EDs in Unshackling India. Haper Collins Publishers India.
9. Report of the Working Group: Money Supply Analytics and Methodology of Compilation, 1998 Annual Report; Master Circular - Prudential Norms on Capital Adequacy - Basel I Framework – 2011; RBI Bulletin; Report of Currency and Finance (latest).
10. Various publications of RBI and other agencies / institutions
11. Raghuram_Rajan_Committee_on_Financial_Sector_Reforms

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 9 (DSE-9): International Economics

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
International Economics (DSE 9)	4	3	1	0	Class 12	None

Learning Objectives

The course aims at:

- To explain ancient view of International trade and production and consumption gains from trade
- To analyse the working of H-O theory and new trade theory
- To understand the international trade policies and its impact on trade
- To Understand the functioning of WTO and its implications for India.

Learning outcomes

By studying this course, the students will be able to:

- Understand basic theories of International Trade and the terms used therein.
- Understand trade policies and instruments used to control international trade.
- Understand what is WTO and how does it affect international trade?
- Understand various concepts related to Regionalism and Integration and their importance.

SYLLABUS OF DSE-9

Unit 1: International Trade Theories (12 hours)

International trade as an Engine of Growth, Ancient view of International Trade, Theory of Mercantilism, Absolute Advantage theory, Comparative Advantage Theory, Opportunity cost theory of trade, Autarky Equilibrium, Production and Consumption Gains from Trade.

Unit 2: Modern Theories of Trade (12 hours)

Introduction, H-O theory- Assumptions, General Equilibrium framework, the working of H-O theory, Factor price equilibrium theorem, Income Distribution effects of H-O theory, Empirical implications of H-O theory, Leontief Paradox, Factor Intensity Reversal, New trade theories (Difference in technology, Economies of Scale and Monopolistic Competition and Trade)

Unit 3: International Trade Policies and Practices (12 hours)

Trade Policy Instruments, Tariffs Barriers, Import Tariff- It's effect and measurement, Non-Tariff Barriers- Import Quotas, Voluntary Export Restraints, Anti-Dumping, Economic Integrations, Regional groups – EU, NAFTA and SAARC/ ASEAN, Theory of Customs Union - Impact of customs union on trade- trade creation and diversion. Import Substitution and Export Promotion.

Unit 4: WTO and Trade (9 hours)

What is WTO, Objectives, Principles, Areas of Function of WTO, Role of WTO in trade, Foreign Trade Policy of India, The Sanitary and Phyto SanitaryAgreement (SPS) of WTO and Its Implications for India, India & World Trade Organization (WTO): WTO Agreement on Agriculture.

Essential/recommended readings

1. Salvatore, D. (Edition 2008) , International Economics, Pearson Education : New Delhi
2. Krugman Paul R. & Obstfeld M. (2013) : International Economics:- Theory and Policy (IXth Edition), Pearson Education , New Delhi.
3. Cherunilam Francis (1998) :International Economics (Vth Edition), McGraw Hill Education (India) Pvt Ltd.
4. WTO and its implications on Indian Agriculture, National Institute of Agricultural Extension Management (MANAGE), Hyderabad.

Additional References:

1. Appleyard Dennis R.; Cobb Steven; Field Alfred J. (2010). International Economics (Vth Edition), McGraw Hill Education (India) Pvt Ltd.
2. Thompson, Henry(2010): International Economics – Global markets and competition 2nd Edition Singapore; Hachensack, N.J: World Scientific.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 11 (DSE-11): Understanding Consumers

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Understanding Consumers (DSE 11)	4	3	1	0	Class 12	None

Learning Objectives

The course aims at:

- To understand psyche of a consumer and his personality traits
- To apply theories to learn and predict consumer behaviour
- To learn culture role and dynamics of Family and Consumer socialization
- To analyse consumer decision making process and diffusion of innovation

Learning outcomes

By studying this course, the students will be able to:

- Understand personality theories and their applications to consumer psychology.
- Analyse consumer perception in advertising through psychology based theories of perception.
- Understand behavioural learning theories and consumer attitude formation in the context of advertisements.
- Understand the role of opinion leaders, family and culture in consumer decisions.
- Identify the use of consumer behaviour concepts in prevalent advertisements.

SYLLABUS OF DSE-11

Unit 1: Personality, Perception and Positioning (12 hours)

Freudian Theory, Neo-Freudian theory of personality; Personality traits; Anthropomorphism; Self-Perception; Sensory information, Absolute and differential thresholds; Perceptual Selection, Perceptual Organisation, Interpretation of cues and imagery, Risk perception; Positioning and Repositioning (including use of perceptual mapping).

Unit 2. Consumer Learning and Attitude (12hours)

Elements, Behavioural learning theories (Classical, Instrumental, Observational); Information processing; Cognitive learning theory, Consumer involvement and hemispheric lateralisation; Recognition and recall measures. Consumer attitude formation; Tri-

component attitude model; Attitudes motivational functions; Elaboration Likelihood Model; Cognitive dissonance and conflict resolution; Causality and attribution theory.

Unit 3. Persuasion, Social Setting and Culture (9hours)

Broadcasted versus Addressable messages, message structure, persuasive appeals; Credibility and persuasive power of reference groups, Opinion leaders (influencers), Word-of-mouth strategic applications
Family and consumer Socialization; family decision making and members' roles; Culture's role and dynamics; Learning Cultural Values; Measuring values; Core values.

Unit 4. Consumer Decision-Making and Diffusion of Innovations (12 hours)

Consumer decision making: need recognition, decision spectrum, pre-purchase search, evaluation, decision rules, rules and marketing strategy, incomplete information, post-purchase evaluation- brand loyalty, disconfirmation of expectations; Consumer gifting behaviour; Diffusion, Types of innovation, Features affecting adoption, Adoption process.

Essential/recommended readings

1. Schiffman, Leon G., Kanuk, Leslie Lazar.,Kumar, S. Ramesh. Consumer Behaviour. 12th ed. Pearson Publications.

Additional References:

1. Hawkins, Roger J., Best, Kenneth A., Coney. Consumer Behaviour: Building Marketing Startegy. Tata McgrawHill.
2. Solomon, Michael. Consumer Behaviour: Buying, Having and Being. 12th ed. Pearson Publications.
3. Nair, Suja. Consumer Behaviour in Indian Perspective. Himalaya Publications.
4. Kumar, S Ramesh. Conceptual Issues in Consumer Behaviour. Pearson Publication.
5. Sheth, Jagdish N., Mittal, Banwari. Customer Behaviour: A Managerial Perspective. Thomson Publication.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY THE DEPARTMENTS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

GENERIC ELECTIVES (GE-1): PRINCIPLES OF ECONOMICS

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Principles of Economics (GE 1)	4	3	1	0	Class 12	None

Learning Objectives

This course aims

- To offer basic understanding of the basic principles of micro economics like problem of scarcity and choice, demand and supply, elasticity.
- To introduce students with basic consumer theory,
- To introduce students with production and cost concept
- to expose the student to the basic principles and concepts in Macroeconomic variables -- GDP, consumption, savings, investment, money and credit etc.
- To learn measurement of national income and related aggregates; nominal and real income
- To determine actual and potential GDP
- To understand the functioning of money market

Learning outcomes

By studying this course, students will be able to:

- Understand the principles of economics of the modern economy.
- Understand the consumer theory, production, and costs etc.
- Understand the basic principles of macroeconomics, national income accounting and determination of GDP.
- Understand the functioning of the money market.

SYLLABUS OF GE-1

Unit 1: Introduction **(6 hours)**

Problem of scarcity and choice: scarcity, choice and opportunity cost; production possibility frontier; economic systems.

Demand and supply: law of demand, determinants of demand, shifts of demand versus movements along a demand curve, market demand, law of supply, determinants of supply, shifts of supply versus movements along a supply curve, market supply, market equilibrium.

Applications of demand and supply: price rationing, price floors, consumer surplus, producer surplus.

Elasticity: price elasticity of demand, calculating elasticity, determinants of price elasticity, other elasticities.

Unit 2: Consumer Theory (9 hours)

Budget constraint, concept of utility, diminishing marginal utility, Diamond-water paradox, income and substitution effects; consumer choice: indifference curves, derivation of demand curve from indifference curve and budget constraint.

Unit 3: Production and Costs (9 hours)

Production: behaviour of profit maximising firms, production process, production functions, law of variable proportions, choice of technology, isoquant and isocost lines, cost minimizing equilibrium condition.

Costs: costs in the short run, costs in the long run, revenue and profit maximizations, minimizing losses, short run industry supply curve, economies and diseconomies of scale, long run adjustments.

Unit 4: Introduction to Macroeconomics (6 hours)

What is macroeconomics, Macroeconomic issues in an economy.

Unit 5: National Income Accounting (6 hours)

Concepts of GDP Aggregates and National Income; measurement of national income and related aggregates; nominal and real income; GDP and welfare and the limitations of the GDP concept.

Unit 6: Determination of GDP (6 hours)

Actual and potential GDP; aggregate expenditure; consumption function; investment function; equilibrium GDP; concepts of MPS, APS, MPC, APC; autonomous expenditure; Concept of multiplier.

Unit 7: **Money and Credit (3 hours)**

Money in a Modern Economy: Concept of money in a modern economy; monetary aggregates; demand for money; quantity theory of money; liquidity preference and rate of interest; money supply and credit creation; monetary policy

Essential/recommended readings

1. Case, K.E., Fair, R. C., and Oster, S. E. (2017). Principles of Economics (12th Ed.). Pearson.
2. Dornbusch, R., Fischer, S. and Startz. R. Macroeconomics (11th Edition). McGraw-Hill.
3. Mankiw, N.G. (2021). Principles of Economics, (9th Edition). Cengage Learning.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-3): LEGAL ENVIRONMENT OF BUSINESS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Legal Environment of Business (GE 3)	4	3	1	0	Class 12	None

Learning Objectives

The course intends:

- To familiarize the student with the concept and essentials of Indian Contract act which govern business for its efficient conduct and to apply them in real life situations.
- To explain the meaning, nature and incorporation of a company.
- To make students understand and apply the provisions of Sale of Goods Act and Consumer Protection Act.
- To recognize and articulate legal principles related to Limited Liability Partnership and Information Technology Act.

Learning outcomes

By studying this course, students will be able to:

- Understand the basic rules and provisions of Contract and Agreements.
- Know the provisions to Formation and functioning of company and LLP.
- Understand the significance and role of law of sale of goods act
- Apply the law correctly to different facts and in different contexts

SYLLABUS OF GE-3

Unit 1: Indian Contract Act **(12 hours)**

Meaning and Essentials of a Contract; Valid, Void and Voidable Contract; Offer and Acceptance; Consideration; Capacity of Parties; Free Consent; Discharge of Contract and Remedies for Breach of a Contract.

Unit 2: Companies Act **(12 hours)**

Meaning and Nature of Company; Promotion and Incorporation of a Company; Memorandum of Association; Articles of Association; Misleading Prospectus and remedies available to the parties; Board of Directors and their qualification, duties, powers. Company Meetings and Resolutions.

Unit 3: Sale of Goods Act and Consumer Protection Act (12 hours)

Essentials of a Contract of Sale; Sale and Agreement to Sell, Conditions and Warranties; Transfer of Title by Non-Owners; Doctrine of Caveat Emptor; Rights of Unpaid Seller. Consumer Protection Act 2009: Scope and Applicability of the Act. Rights of consumer. Procedure for complaints. Duties and power of Central Consumer Protection Authority.

Unit 4: Limited Liability Partnership Act and IT Act (9 hours)

Meaning and nature of LLP; LLP and Company; LLP Agreement, Partners and Designated Partners, Incorporation of LLP; Partners and their Relations, Extent and limitation of liability of LLP.

Information Technology Act 2000: Concept and role; Digital signature, Electronic governance, Attribution, Acknowledgement and dispatch of electronic records, Regulation of certifying authorities, Digital signatures certificates, Duties of subscribers, Penalties and adjudication, Appellate Tribunal, Offences.

Essential/recommended readings

1. Bansal, V & Arora, A. Corporate Laws. Vikas Publishing, House (P) Ltd. New Delhi.
2. Kuchhal M.C & Vivek K. Business Legislation for Management. VIKAS Publishing House (P) Ltd.
3. Kumar, A. Corporate Laws. International Book House (P) Ltd.
4. Bare Acts relating to the laws.

Suggestive readings

1. Chadha, R,. Chadha, S. Corporate Laws. Mayur Paperbacks. New Delhi.
2. Maheshwari & Maheshwari. Business Law. National Publishing House. New Delhi.
3. Singh, Avtar. The Principles of Mercantile Law. Eastern Book Company. Lucknow.
4. Tulsian, P.C. Business Law. Tata McGraw Hill. New Delhi.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-5): OUANTITATIVE TECHNIOUES IN MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Total Hours of Teaching	Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice			
Quantitative Techniques in Management (GE 5)	4	3	1	0	45	Class 12	None

Learning Objectives

To apprise students:

- To understand the concepts, formulation and interpretation of linear programming methods and its application in diverse problems.
- To formulate and solve Transportation and Assignment problems
- To understand basic concept, construction of the Network diagram and Critical Path Analysis
- To introduce game theory and network analysis forms part of the course.

Learning outcomes

By studying this course, students will be able to:

- Identify and develop operational research models from the verbal description of the real system.
- Understand the mathematical tools that are needed to solve optimization problems.
- Develop critical thinking and use PERT and CPM techniques to improve decision making.

SYLLABUS OF GE-5

UNIT – I: Introduction - Operations Research, Linear Programming (15 hours)

(i) Introduction to Operations Research, characteristics, Phases, Methodology, Applications and scope

(ii) Formulation of Linear Programming problems, Graphical Solutions (Special cases: Multiple optimal solution, infeasibility, unbounded solution); Simplex Method, Special cases, Big-M method and Two-phase method; Duality (emphasis on formulation & economic interpretation); Sensitivity Analysis. (Excel Solver application)

UNIT – II: Transportation and Assignment Problem (12 hours)

(i) Transportation Problem: Formulation, Solution by N.W. Corner Rule, Least Cost method, Vogel's Approximation Method (VAM), Modified Distribution Method; Special cases: Multiple Solutions, Maximization case, unbalanced case, prohibited routes.

(ii) Assignment Problem: Hungarian Method, Special cases: Multiple Solutions, Maximization case, Unbalanced case, Restrictions on assignment.

UNIT – III: Network Analysis (9 hours)

Basic Concept, Construction of the Network diagram, Critical Path Analysis, float and slack analysis (Total float, free float, independent float), probability consideration in PERT (Interface with Project Management open-source software)

UNIT – IV: Decision Theory: (9 hours)

Decision making environment, Construction of Pay off Table, Opportunity Loss Table, Decision under uncertainty. Decision under Conflict: Game Theory, Two-person Zero-Sum games, Maximin Minimax Principle, Games without Saddle point - Mixed strategy, Dominance Rule.

Essential/recommended readings

1. Vohra, N.D., Quantitative Techniques in Management (5th ed.). Tata McGraw Hill
2. Swarup, K., Gupta, P.K. and Mohan, Man, Introduction to Management Science Operations Research (19th ed.). Sultan Chand & Sons.
3. Sharma, J.K., Operations Research: Theory and Applications (6th ed.). Trinity.
4. Taha, H.A., Operations Research: An Introduction (9th ed.). Pearson.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-7): ECONOMICS OF STARTUPS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Economics of Startups (GE 7)	4	3	1	0	Class 12	None

Learning Objectives

To apprise students:

- To give an overview of startups and its types that would help students to understand basics of starting up new ventures.
- To build and create a successful Business Plan
- To understand various Business models and learn startups
- To familiarize with central and state level institutions supporting small business entreprises.

Learning outcomes

By studying this course, students will be able to:

. · Understand the process and working of a startup.

· Identify the different ways in which entrepreneurs manifest in start-ups.

· Know how to create one's own business venture and the various factors that influence successful set-up and sustainable operations.

· Explore the funding and other institutions supporting small business units.

SYLLABUS OF GE-7

UNIT – I: Startup, Generation & Experimentation (9 hours)

Concept of Startup, Role of digital technologies, Startup ecosystems, the startup movement in India; Generating a value proposition, how valuable are new ideas, Design thinking principles; Experimenting with the prototype, Introduction to lean start-ups, Lean startup principles, Learning and failing fast.

UNIT – II: Building the Business Plan (15 hours)

Beginning Considerations: Building a competitive advantage. The strategic management processes. Conducting a feasibility analysis. Forms of Business ownership. Franchising and entrepreneurship. Buying an existing business, marketing and financial considerations: Building a powerful marketing plan. E-commerce and Entrepreneur. Pricing strategies. Creating a successful financial plan. Choosing the right location and layout.

UNIT – III: Crafting business models and Lean Start-ups (12 hours)

Introduction to business models; Creating value propositions-conventional industry logic, value innovation logic; customer focused innovation; building and analysing business models; Business model canvas, Business Pitching.

UNIT – IV: Institutions Supporting Small Business Enterprises and Ethics (9 hours)
Central level institutions. State level institutions. Other agencies. Industry Associations. Class exercise- discussions on current government schemes supporting entrepreneurship and finding out which scheme will most suit the business plan devised by the student. Importance of Ethical Entrepreneurship, value of ethics to an entrepreneur.

Essential/recommended readings

1. Scarborough, N. M., Cornwall, J. R., & Zimmerer, T. (2016). Essentials of entrepreneurship and small business management. Boston. Pearson Publications.
2. Hisrich, R.D., Manimala, M.J., Peters, M.P., Shepherd, D.A., Entrepreneurship, Tata McGraw Hill.
3. Shukla, M.B., Entrepreneurship and Small Business Management. Kitab Mahal Publishers.

Suggestive readings

1. Hishrich, R.D. and Peters, M. Entrepreneurship. Irwin Publications.
2. Barringer, B.R. and Ireland, R. Duane. Entrepreneurship: Successfully launching new ventures. (6th Edition) Pearson

GENERIC ELECTIVES (GE-9): INTERNATIONAL ECONOMICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
International Economics (GE9)	**4**	**3**	**1**	**0**	**Class XII**	**NA**

Learning Objectives

This course aims at inculcating:

- Basic understanding of fundamentals of international Trade
- An overview of theories of international trade
- Understand the meaning of Balance of Payment and explore the reasons of disequilibrium.
- Determine exchange rates and understand global capital market

Learning outcomes

By studying this course, students will be able to:

- To understand basic concept and origin of International economics through the prism of classical and new classical trade theories
- To understand different terms of trade and their applicability
- To differentiate between Modern and Classical Trade theories.
- To gain knowledge about the foreign exchange markets and its working
- To learn about global capital market

SYLLABUS OF GE-9

UNIT – I: Introduction to International Trade [12hours]

Globalization and its growing importance in the world economy; Impact of globalization; International business contrasted with domestic businesses; Cost and benefit analysis of tariff, Effective rate of protection and welfare arguments of tariff and developing countries. Foreign direct investment (FDI) in world economy: Trends, Direction, and flow of FDI; Theories of FDI; Political ideology and FDI.

Unit 2: International Trade Theory [15hours]

World Trade: An overview; Theories of international trade – Mercantilism; Absolute advantage theory, Comparative advantage theory, Factory proportion theory and Leontief paradox, Product life cycle theory, New trade theory, National competitive advantage:

Porter's diamond. International Business Environment: Economic, Demographic, Cultural and Political-legal environment.

Unit 3: Balance of Payment (BoP) [6hours]

Balance of Payment: Meaning, Components (Current, Capital and Official reserve), Reasons for disequilibrium in BoP, Measures to correct disequilibrium, Understanding India's BoP and comparing it with markets like USA and China.

Unit 4: Foreign Exchange and Global Capital Market [12hours]

Exchange Rate Determination: Currency Demand and Supply Curves, Factors Affecting Exchange Rate, Global Capital Market: Introduction, Benefits of global capital market, Growth of global capital market, Global capital market risk, Eurocurrency market, Global bond market, Global equity market, Exchange rate risk, Managing exchange rate risk, Methods of Financing International Trade.

Essential/recommended readings

1. Hill, C. (2021). International business: Competing in the global market place (13th Edition). *Strategic Direction*.

2. Krugman, P. R., & Obstfeld, M. (2009). International economics: Theory and policy. Pearson Education.

3. Levi, M.D. (2009). *International Finance* (5th Edition), Taylor and Francis Ltd.

4. Madura, J. (2020). *International financial management*. Cengage Learning.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-11): ECONOMIC POLICY FRAMEWORK

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Economic Policy Framework (GE11)	4	3	1	0	Class 12	None

Learning Objectives

This course will help students

- to understand the importance, meaning and objective of macroeconomic policies
- to understand role and effect of fiscal policy and government expenditure
- to explore role of monetary policy and banking sector in India
- to analyse efficacy of fiscal/monetary policy under fixed and flexible exchange rate

Learning outcomes

By studying this course, students will be able to:

. · Learn the basic concept of macroeconomics

· Understand how different parameters of macroeconomics work under Indian economy.

· Understand how monetary and fiscal policy works.

· Know different exchange rate regimes.

SYLLABUS OF GE-11

UNIT – I: Meaning and objectives of economic policy (8 hours)

Tools and goals (objectives and instruments of policy) Circular flow of income (start with a two sector model and go up to a five sector model); National Income aggregates and the related concepts of national income; input-output table to calculate national income using the income, expenditure and the value added methods.

Unit 2: Fiscal policy (15 hours)

Objectives and meaning; effect of fiscal policy - role of tax policy (T) and government expenditure (G), Aggregate Demand, Meaning of the multiplier. Government expenditure multiplier and balanced budget multiplier Budget –meaning and purpose – example of India's latest Budget (and various heads). Meaning of fiscal, revenue and primary deficits.

Unit 3: Monetary policy (12 hours)

Meaning and objectives; money and credit – credit creation and instruments of credit control; Inflation targeting, Banking in India – structure, recent developments; issues of NPAs and how to resolve it.

Unit 4: Exchange rate policy **(10 hours)**

Structure of BOP; meaning of current account deficit and trade deficit; exchange rate definition (real and nominal); fixed vs flexible exchange rate, efficacy of fiscal/monetary policy under fixed and flexible exchange rate , effect of a change in exchange rate on the current account (imports and exports); structure of capital account and role of capital outflows and inflows.

Essential/recommended readings

1Gupta G.S (2016), Macroeconomics - Theory and Applications (4th edition). McGraw Hill,

2. Shapiro, Edward (1982), Macroeconomic Theory, 5th edition

3. Mankiw, Gregory N. (2010), Macroeconomics (7th edition), Worth Publishers.

4. Sikdar, Soumyen (2011), Principles of Macroeconomics, Oxford University Press

5. Krugman, P.R., Obstfeld, M. and Melitz, M. (2015). International Economics: Theory and Policy, Pearson Education Limited.

6. Dua, P. (2020). Monetary Policy Framework in India, Indian Economic Review, 55(1), June 2020, pp. 117-154.

9. http://www.inclusivejournal.in/about.html.

10. Sengupta, R. and Vardhan, H., Non-Performing Assets in Indian Banks, Economic and Political Weekly, 52(12) March 25, 2017, Money, Banking and Finance Special.

11. Economic Survey, India, latest issue

12. Union Budget Statement, India, Latest issue

Suggestive readings

1Abel, Andrew, Bernanke, Ben and Croushore, Dean (2011). Macroeconomics (7th edition). Pearson

2. Ghate, C., & Kletzer, K. M. (eds.) (2016). Monetary policy in India: A modern macroeconomic perspective. Springer.

3. Kaul, Vivek (2020) Bad Money: Inside the NPA Mess and how it threatens the Indian Banking System, Harper Collins Publisher India.

4. Chhibber, Ajay and Anees, Salman Soz (2021) India's Financial Sector: A Whodunnit. In Unshackling India. Haper Collins Publishers India.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

SEMESTER VI
B.A. (HONOURS) BUSINESS ECONOMICS

DISCIPLINE SPECIFIC CORE COURSE – 16 (DSC-16): OPERATIONS RESEARCH

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical		
Operations Research (DSC 16)	4	3	0	1	Class 12	None

Learning Objectives

The course intends to develop an understanding of:
(i) linear programming problems and their methods of solution
(ii) transportation and assignment problems, theory for solution and software methods
(iii) network analysis, Markov chains and applications
(iii) a decision making environment and theory of games

Learning outcomes

By studying this course, the students will be able to:

- Identify and develop operational research models from the verbal description of the real system.
- Understand the mathematical tools that are needed to solve optimization problems.
- Use mathematical software to solve the proposed models
- Develop critical thinking and use PERT and CPM techniques to improve decision making.

SYLLABUS OF DSC-16

UNIT–I: Introduction - Operations Research, Linear Programming, Integer Programming (15 hours)

(i) Introduction to Operations Research, characteristics, Phases, Methodology, Applications and scope
(ii) Formulation of Linear Programming problems, Graphical Solutions (Special cases: Multiple optimal solution, infeasibility, unbounded solution); Simplex Method, Special cases, Big-M method and Two-phase method; Duality (emphasis on formulation & economic interpretation); Sensitivity Analysis. (Excel Solver application)
(iii) Integer programming problem: Formulation, Solution through Gomory's Cut Method, managerial applications.

Unit 2: Transportation and Assignment Problem (9 hours)

(i) Transportation Problem: Formulation, Solution by N.W. Corner Rule, Least Cost method, Vogel's Approximation Method (VAM), Modified Distribution Method; Special cases: Multiple Solutions, Maximization case, unbalanced case, prohibited routes. (Excel Solver application)
(ii) Assignment Problem: Hungarian Method, Special cases: Multiple Solutions, Maximization case, Unbalanced case, Restrictions on assignment. (Excel solver application)

Unit 3: Network and Markov Analysis (12 hours)

(i) Network Analysis: Basic Concept, Construction of the Network diagram, Critical Path Analysis, float and slack analysis (Total float, free float, independent float), probability consideration in PERT (Interface with Project Management open-source software)
(ii) Markov Analysis: Assumptions of Markov analysis, construction of matrix of transition probabilities, brand switching analysis, vector of state probabilities, prediction of future market share, equilibrium conditions.

Unit 4: Decision Theory: (9 hours)

(i) Decision making environment, Construction of Pay off Table, Opportunity Loss Table, Decision under uncertainty, Decision under Risk: EMV, EOL, EVPI.
(ii) Decision under Conflict: Game Theory, Two-person Zero-Sum games, Maximin Minimax Principle, Games without Saddle point- Mixed strategy, Dominance Rule; Reduction of m x n game. (Application of Excel Solver)

Practical Component (30 Hours) : Practicals based on spreadsheet package (Microsoft Excel or equivalent) to enable students to apply all the concepts taken up in the theory classes in the course.

Essential/recommended readings

1. Vohra, N.D, Quantitative Techniques in Management, 5th ed., Tata McGraw Hill.
2. Gupta ManMohan, SwarupKanti, Introduction to Management Science Operations Research, 19th ed. Sultan Chand & Sons.
3. Sharma J.K., Operations Research: Theory and Applications, 6th ed. Trinity.
4. TahahamdyA.,Operations Research: An Introduction, 9th ed., Pearson.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 17 (DSC-17): Business Legislation in India

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite for the course
		Lecture	Tutorial	Practical	Class 12	None
Business Legislation in India (DSC 17)	4	3	1	0		

Learning Objectives

The course intends to inform and develop an understanding of:
1. The Indian Contract Act, 1872
2. The Sale of Goods Act, 1930
3. The Companies Act, 2013
4. The Intellectual Property Act, Competition Act and Consumer Protection Act

Learning outcomes

By studying this course, the students will able to:

- Understand the fundamentals of the various legislations for conducting business.
- Able to understand and appreciate the need for different legislations and the amendments thereof.
- Enable the student to initiate their own ventures in the form of entrepreneurs, and Company.
- Relate the legal framework with recent cases in the business world so as to have better understanding of their interpretations.

SYLLABUS OF DSC-17

UNIT – I: Indian Contract Act 1872 **(15 hours)**

Definition: Essential elements and Kinds of Contracts. Offer and Acceptance: legal rules, lapse and revocation. Consideration: Definition, Essentials and Exceptions. Capacity of Parties: Minor's agreements, Persons of unsound mind and Disqualified persons. Free Consent: Coercion, Undue Influence, Misrepresentation, fraud and Mistake. Discharge of a Contract and its various ways.Kinds of Remedies for Breach of a Contract.

Unit 2: The Sale of Goods Act 1930 **(8 hours)**

Contract of Sale of Good: Definition and Essentials: Sale and agreement to sell distinguished: Kinds of Goods and concept of price. Conditions and Warranties.Doctrine of caveat emptor and exceptions. Transfer of Property: Concept and Rules. Rights of Unpaid Seller against the goods and buyer.

Unit 3: The Companies Act 2013 **(15 hours)**

The Company: Definition and Characteristics. Kinds of Companies: On the basis of incorporation and liability of Members. Concept of One Person Company.Difference between Public and Private Company.Formation of a company–promotion, incorporation, on-line registration, commencement of business.Memorandum of Association.Articles of Association. Prospectus: Definition, Issue and Contents. Misleading prospectus and its consequences including remedies. Company Management: Definition of Directors, Legal Position of Directors, Number of Directors and Directorship, Qualification and Disqualification, Appointment and Removal, Powers and Duties of Directors.

Meetings and Resolutions: Types: AGM and EGM, Legal provisions, Requisites of a valid meeting, Voting, Proxy, Resolutions and its types, Minutes. Winding up of a Company – Meaning, Winding up and Dissolution distinguished, Modes and Consequences of Winding Up.

Unit 4: Laws of Intellectual Property, Competition and Consumer Protection (7 hours)

Intellectual Property Act: Patent Act, 1970: Meaning and Types. Patentable and Non- Patentable Inventions.Procedure for obtaining a patent. Trade Marks Act, 1999: Essentials and Definition. Conditions for Registration of Trade Marks. Design Act, 2000: Concept and Registration of Designs. Copyright in Registered Designs.General Provisions relating to design under the Act.
Competition Act 2002: Scope and applicability of the Act. Prohibition of Anti- Competitive agreement and abuse of dominant position. Regulation of Combinations. Duties, Powers and Functions of Competition Commission of India
Consumer Protection Act 2009: Scope and Applicability of the Act. Rights of consumer.Procedure for complaints.Duties and power of Central Consumer Protection Authority.

Essential/recommended readings

1Bansal V and Arora, A. Corporate Laws. Vikas Publishing, House (P) Ltd. New Delhi.

2. Chadha, R. Chadha, S. Corporate Laws. Mayur Paperbacks. New Delhi.
3. Kuchhal M.C &Vivek K. Business Legislation for Management. VIKAS Publishing House (P) Ltd.
4. Kumar, A. Corporate Laws. International Book House (P) Ltd.
5. Bare Acts relating to the laws.

Suggestive readings

1 Arora, S. Business Laws. New Delhi. Vikas Publishing House.

2. Gulsan, S.S. Business Laws. Excel Books.
3. Singh, Avtar. The Principles of Mercantile Law. Eastern Book Company. Lucknow.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – (DSC-18): ENVIRONMENTAL ECONOMICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Environmental Economics (DSC 18)	**4**	**3**	**1**	**0**	**Class 12**	**None**

Learning Objectives

The course intends to develop an understanding of:
(i) the concept of sustainability and economy-environment interaction
(ii) public policies to control environmental damage and pollution
(iii) the use of risk and cost-benefit analysis for environmental conservation
(iv) global environmental concerns and their protocols

Learning outcomes

By studying this course, students will be able to:

- Provide the basic understanding interaction between environment and economic activities
- Understand sustainability
- Analyse different tools of environmental policies
- Understand global policies for environment

SYLLABUS OF DSC-18

UNIT – I: Environment and Sustainability (9 hours)

An Introduction to Environmental Economics; Economy–Environment interdependence, materials balance model of economy–environment interactions, the drivers of environmental Impact, Environmental Kuznets Curve Hypothesis. Concepts of sustainability: The Hartwick rule, Weak and strong sustainability, Resilience.

Unit 2: Environmental Policies (12 hours)

Conventional Policy: Environmental Standards, Efficiency of Environmental Standards, Command and Control Approach. Market Based Policy - Pollution Charges and Environmental Subsidies. Deposit Refund System. Pollution Permit Trading Systems.

Unit 3: Environmental Planning & Analytical Tools (12 hours)

Environmental Risk Analysis - Concept of Risk. Risk Assessment and Risk Management
Assessing Benefits for Environmental Decision Making - Environmental Benefits - Conceptual Issues. Approaches to Measuring Environmental Benefits - Physical Linkage Approach, Behavioral Linkage Approach -Direct and Indirect Estimation Methods, Benefit -Cost Analysis

Unit 4: Global Environmental Management and Regulations (12hours)

Ozone depletion, Climate change, International collaborations for environment, Montreal and Kyoto protocol, Paris agreement

Essential/recommended readings

1. Perman Roger, MaYue, McGilvray James and Common Michael. (2003) Natural Resource and Environmental Economics. Financial Times/ Prentice Hall.
2. Thomas Janet M., Callan Scott J.. (2012) Environmental Economics and Management: Theory, Policy, and Applications. South-Western College Publishing.
3. Kolstad Charles. (2012). Intermediate Environmental Economics.Oxford University Press
4. Hanley Nick, Shogren Jason F.and White Ben. (2006). Environmental Economics in Theory and Practice.Palgrave Macmillan

Suggestive readings

1. Henley, Nick and Roberts, Colin Ed. (2002). Issues in Environmental Economics. Wiley-Blackwell
2. Lenschow, Andrea and Lenschow Ed. (2001). Environmental Policy Integration.Routledge.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 2 (DSE-2): PUBLIC FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Public Finance (DSE2)	**4**	**3**	**1**	**0**	**Class 12**	**None**

Learning Objectives

The course intends to develop and understanding of:
(i) scope and importance of public finance, its sources and expenditures
(ii) Evolution of the Indian tax system and current debates
(iii) Finance Commissions and their changing role
(iv) Canons of taxation and relevance to public revenues

Learning outcomes

By studying this course, the students will be able to:

- Apply tools of basic microeconomics to key policy issues relating to the spending, taxing and financing activities of the Government.
- Understand difference in impact of direct and indirect taxation.
- Understand the recent developments and issues in Indian Public Finance.

SYLLABUS OF DSE-2

Unit 1: Theory of Public Finance (12 hours)

Public finance: Meaning, nature, scope and importance, difference between private and public finance. Principle of maximum social advantage. Role of state in public finance.
Elementary theory of product and factor taxation
Sources of revenue: taxes, loans, grants and aid – meaning and types, Principle of public expenditure.
Public finance and the economic system.

Unit 2: Current Issues in India Tax System (12hours)

Direct and Indirect Tax Reform in India, Different forms of direct tax in India,
Changing regime of taxation-direct to indirect taxation,
Introduction of GST and its implication for state finances and fiscal federalism in India, Latest finance commission and its recommendation for fiscal devolution.

Unit 3: Center State Financial Relations (9hours)

Center state fiscal relations, horizontal and vertical tax devolution in India,
State and local finance in India
Performance and Equity debate in fiscal devolution in India
Report of finance commission in post liberalisation period

Unit 4: Principles of Taxation (12 hours)

Canons of taxation, Meaning of Canons of Taxation -Types of Canons of Taxation-Canon of equality or equity, Canon of certainty, Canon of economy, Canon of productivity, Canon of Diversity, Canon of convenience, Canon of elasticity, Canon of simplicity, Canon of diversity, Characteristics of Canons of Taxation.

Essential/recommended readings

1 Musgrave, R. A. and Musgrave, P.B., Public Finance in Theory and Practice (1989), 5th edition. McGraw Hill Education.

2. Bagchi, Amaresh. Reading in Public Finance, Oxford University Press.

3. Bhatia H.L.. Public Finance. Vikas Publishing House;

4. Shankar Acharya, Thirty years of Tax Reforms in India, EPW, May 2005

5. Rao, M. Govinda, "Central transfers to states in India: rewarding performance while ensuring equity." Final report submitted to NITI Aayog (2017) (pages 1 to 18).

6. Government of India, Fifteenth Finance Commission Report 2021-26, Chapter 6

Suggestive readings

1. Report of Finance commission of India, Various years.

2. Economic Survey, GoI, Various year

3. State Finances: - A Study of Budget, RBI, Latest report

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 4 (DSE-4): ADVERTISING MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical/ Practice		
Advertising Management (DSE 4)	**4**	**3**	**1**	**0**	**Class 12**	**None**

Learning Objectives

The course attempts to develop an understanding of :
(i) Advertising, its role, functions, agencies and budgets
(ii) Marketing and advertising plans in a firm's strategy
(iii) Execution of advertising plan and assessing its effectiveness
(iv) Different Media, their cost and options available for effective outcomes

Learning outcomes

By studying this course, the students will be able to:

- Understand the role played by advertising agencies.
- Recognise and identify the facet model objectives in any advertisement.
- Conduct situation analysis and consumer insight mining.
- Learn creative execution strategies including application of appeals, layouts and creative copywriting.
- Understand and conduct appropriate media mix selection.

SYLLABUS OF DSE-4

Unit 1: Foundations of Advertising **(10 hours)**

Concept of advertising, Types of advertising, Concept of IMC, Role and functions of Advertising, the key players, functions of advertising agencies, Organisation of agency, Advertising appropriateness-factors influencing advertising budgets, methods of setting advertising budgets.

Unit 2: Planning and Strategy **(13 hours)**

Planning Framework-marketing and advertising plan, Facet model of objectives (Perception, Cognition, Affect, Association, Action), DAGMAR, Marketing strategy and situation analysis, consumer insight mining, big idea, positioning for advertising campaigns.

Unit 3: Effective Advertising Execution **(12hours)**

The creative and message strategy, creative brief, themes and appeals, execution styles, message format, message tone, copywriting creativity, body copy, visual layouts, evaluation of effectiveness, pre-testing, post-testing.

Unit 4: Effective Advertising Media **(10 hours)**

Types of media, newer media options, media objectives, developing a media plan, media Plan budget, media mix selection.

Essential/recommended readings

1. Belch,G.E., Michael, A., Keyoor, Purani. Advertising and Promotion-An Integrated Maketing Communications. 12th edition. Tata McGraw Hill Education. 2021.
2. William Wells, Sandra Moriarty, and John Burnett. Advertising: Principles and Practice. Prenctice Hall of India. 2007.
3. Jethwaney, Jaishri., Jain, Shruti. Advertising Management. Oxford University press.
4. Shah, Kruti. Advertising and Integrated Marketing Communications. McGraw Hill Education India. 2014.
5. Aaker, David A., Batra, Rajeev., Myers, John G. Advertising Management. Pearson Education. 2006.
6. Shimp, T.A. .Advertising and Promotion: An IMC Approach. Cengage. 2013.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 6 (DSE-6): INTERNATIONAL FINANCIAL MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
International Financial Management (DSE 6)	**4**	**3**	**1**	**0**	**Class 12**	**None**

Learning Objectives

The course aims to give substantive knowledge about:
(i) key features of foreign exchange markets and development over the years
(ii) parity conditions in markets for foreign exchange
(iii) evolution of exchange rate systems from the gold standard to the present
(iv) its operations and hedging of risks in these markets.

Learning outcomes

By studying this course, the students will be able to:

- Gain substantive knowledge of International Financial Management.
- Understand the principles of trading in foreign exchange markets, different instruments traded, risks involved and how to carry out hedging of currency risks.
- Learn how to compute forward rates using cross rates, computation of synthetic quotes and apply rules to determine existence of arbitrage amongst currencies traded.
- Understand how the international markets have evolved and the alternate exchange rate systems world has seen over the years

SYLLABUS OF DSE-6

Unit 1: Introduction To Currency Markets (12 hours)

Spot & Forex market: Introduction and Features, Participants, & their method of communication in forex markets, SWIFT and CHIPS. Currency Quotes and types, Calculation of forward rates using spot rates, Discount/Premium on spot rate, Swap Points and Outright Forward Rates, Forward Rate vs. Expected Future spot rates, Spot rate with and without transaction costs, Payoff Profiles on Forward Exchange, Currency futures and Pay of Profiles, Mark to Market, Cross Rates & Synthetic quotes. Arbitrage: one point, two point and three point (triangular) arbitrage.

Unit 2: Parity Conditions in Currency Markets (12 hours)

Purchasing Power Parity (both absolute and relative versions), Interest Rate Parity (explanation of borrowing and lending criteria, diagrammatic presentation) , covered interest rate parity, International Fischer Effect. The linkages between parity conditions.

Unit 3: Alternate Exchange Rate Systems and Payment Terms (9 hours)

Gold Standard and Gold Exchange Standard System with price adjustment mechanism , EMS and its price adjustment, Hybrid systems , Fixed vs Flexible System, Overview on Brettonwoods System,

IMF, SDR, Triffon Paradox & Smithsonian Agreement. Payment Terms and Methods of Financing International Trade (Letter of Credit, Forfaiting, Factoring, Credit Lines)

Unit 4: Exchange Rate Determination and Exposures (12 hours)

Currency Demand and Supply Curves, Stability of exchange rates and 'J' Curve Effect, Factors Affecting Exchange Rate, Foreign Exchange Exposure: Nature, Definition, Exposure Line and Interpretating Exposure, Statistical Measurement of Exposure, Types of Exposure (Meaning): Transaction, Economic and Translation Exposure, Hedging Strategies to Manage Transaction Exposures. Currency Swaps.

Essential/recommended readings

1. Apte, P G., Multinational Financial Management.Tata-McGraw Hill. New Delhi.
2. Levi, Maurice. International Finance. McGraw Hill Inc. New York.
3. Madura, Jeff. International Financial Management.South Western Cengage Learning.
4. Seth, A.K., International Financial Management. Galgotia Publishing Company. New Delhi.
5. Shapiro, Allen C., Multinational Financial Management. Prentice Hall India Pvt Ltd. New Delhi.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 8 (DSE-8): BEHAVIOURAL ECONOMICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Behavioural Economics (DSE 8)	**4**	**3**	**1**	**0**	**Class 12**	**None**

Learning Objectives

The course attempts to impart an understanding of:
(i) the evolution and growing importance of behavioural economics
(ii) the question of choices when outcomes are known
(iii) formulation of choice under conditions of uncertainty
(iv) the theory of games and Nash equilibria under select circumstances

Learning outcomes

By studying this course, the students will be able to:

- To understand the departures from traditional theory by first explaining the decision-making process in a theoretical framework and then using empirical and experimental findings.
- To build a better understanding of consumer choices and behaviours to enhance his/her decision-making and he/she will be able to differentiate between economic and psychological approaches to human decisions. Understands how behavioural economies incorporates psychological factors such as altruism, fairness trust into standard theories to analyse human choices and also have the knowledge of predictive power of economic theories.
- To understand the main normative and descriptive approaches to know principles of decision making under risks
- To apply behavioural theory to interpretation of real decisions and public policy.

SYLLABUS OF DSE-8

Unit 1: Introduction **(9 hours)**

Introduction to behavioural economics: history, evolution, objective, scope, methods and concepts in behavioural economics.

Unit 2: Choice under certainty **(12 hours)**

Preferences, rationality, utility, menu dependence, decoy effect, endowment effect, heuristics and biases.

Unit 3: Choice under uncertainty **(12 hours)**

Probability, Bayes' Rule, Expected value, Confirmation Bias, Expected Utility, Bundling, Allais Problem.

Unit 4: Strategic Actions **(12 hours)**

Game Theory, Nash Equilibrium, Altruism, Fairness, Justice, Trust, Welfare Economics, Nudge Agenda and behavioural finance.

Essential/recommended readings

1. Angner, Erik (2016), A course in behavioral economics, (Second edition,), Palgrave, London
2. Colin F. Camerer, George Lowenstein & Matthew Rabin (Ed.) (2004), Advances in Behavioral Economics, Princeton University Press.
3. Wilkinson, Nick and Matthias, Klaes (2012), An introduction to Behavioral Economics, 2nd edition, Palgrave Macmillan.
4. Abdukadirov, Sherzod (ed.). Nudge Theory in Action: Behavioral Design in Policy and Markets

Suggestive readings

1. Andrikopoulos, Panagiotis. Modern Finance vs. Behavioural Finance: An Overview of Key Concepts and Major Arguments (June 2005). http://dx.doi.org/10.2139/ssrn.746204
2. Andreoni, James, Justin M. Rao, and Hannah Trachtman. "Avoiding the ask: A field experiment on altruism, empathy, and charitable giving." Journal of political Economy 125, no. 3 (2017): 625-653
3. Fama, Eugene F. "Market efficiency, long-term returns, and behavioral finance." Journal of financial economics 49, no. 3 (1998): 283-306.
4. Falk, Armin, and Christian Zehnder. "A city-wide experiment on trust discrimination." Journal of Public Economics 100 (2013): 15-27.
5. Kahneman, Daniel, Jack L. Knetsch, and Richard H. Thaler. "Experimental tests of the endowment effect and the Coase theorem." Journal of political Economy 98, no. 6 (1990): 1325-1348.
6. Samson, Alain. "An introduction to behavioral economics." The behavioral economics guide (2014): 1-12.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 10 (DSE-10): INDIAN ECONOMY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical/ Practice		
Indian Economy (DSE 10)	4	3	1	0	Class 12	None

Learning Objectives

The course is aimed at developing an understanding of:
(i) the different policy regimes in India since Independence: growth and development
(ii) Demographic trends, human development and state policies
(iii) Fiscal and monetary policies and laws related to labour
(iv) Sectoral growth and changes: agriculture, manufacturing and services

Learning outcomes

By studying this course, the students will be able to:

- Understand major issues and challenges facing the Indian Economy.
- Gain skills to analyze key economic issues and policy documents.
- Relate theoretical frameworks of macroeconomics and microeconomics to the Indian context.

SYLLABUS OF DSE-10

Unit 1: Economic Development since Independence (12 hours)

Major Features of the economy at independence; growth and development under different policy regimes—goals, constraints, institutions and policy framework; an assessment of performance—sustainability and regional contrasts; structural change, savings and investment.

Unit 2: Demographic Trends and policies (12hours)
Population and Human Development Demographic trends and issues; education; health and malnutrition. Policies in poverty; inequality and unemployment.

Unit 3: Macroeconomic Policies and Their Impact (9 hours)

Fiscal Policy; trade and investment policy; financial and monetary policies; labour laws.

Unit 4: Sectoral Growth & Development (12 hours)

Agriculture Growth; productivity; agrarian structure and technology; capital formation; trade; pricing and procurements. Industry: Growth; productivity; diversification; small scale industries; public sector; competition policy; foreign investment. Trends and issues in Service Sector.

Essential/recommended readings

1. Drèze, J., &Sen, A. (2013). An Uncertain Glory.Princeton University Press.

2. Balakrishnan, P. (2007). The Recovery of India: Economic Growth in the Nehru Era. Economic and Political Weekly, 42(45/46), 52–66.

3. Mohan, R. (2008). Growth Record of the Indian Economy, 1950-2008: A Story of Sustained Savings and Investment. Economic and Political Weekly, 43(19), 61–71.

4. Vaidyanathan, A., & Krishna, K. L. (2007). Institutions and markets in India's development. Oxford University Press.

5. T. Dyson, 2008, India 's Demographic Transition and its Consequences for Development in Uma Kapila, Indian Economy Since Independence, 19th edition, Academic Foundation.

6. Shankar Acharya, 2010, Macroeconomic Performance and Policies 2000-08, in Shankar Acharya and Rakesh Mohan, editors, India's Economy: Performances and Challenges: Development and Participation, Oxford University Press.

7. Rakesh Mohan, 2010, India 's Financial Sector and Monetary Policy Reforms, in Shankar Acharya and Rakesh Mohan, editors, India's Economy: Performances and Challenges: Development and Participation, Oxford University Press.

8. PulapreBalakrishnan, Ramesh Golait and Pankaj Kumar, 2008, Agricultural Growth in India Since 1991, RBI DEAP Study no. 27.

9. B.N. Goldar and S.C. Aggarwal, 2005, Trade Liberalisation and Price-Cost Margin in Indian Industries, The Developing Economics, September.

10. P. Goldberg, A. Khandelwal, N. Pavcnik and P. Topalova, 2009, Trade Liberalisation and New Imported Inputs, American Economic Review, Papers and Proceedings, May.

11. KunalSen, 2010, Trade, Foreign Direct Investment and Industrial Transformation in India, ïnPremachandraAthukorala, editor, The Rise of Asia, Routledge.

12. A. Ahsan, C. Pages and T. Roy, 2008, —Legislation, Enforcement and Adjudication in Indian Labour Markets: Origins, Consequences and the Way Forward, in D. Mazumdar and S. Sarkar, editors, Globalization, Labour Markets and Inequality in India, Routledge.

13. DipakMazumdar and SandeepSarkar, 2009, —The Employment Problem in India and the Phenomenon of the Missing Middle, Indian Journal of Labour Economics.

14. J. Dennis Rajakumar, 2011, Size and Growth of Private Corporate Sector in Indian Manufacturing, Economic and Political Weekly, April.

15. Ramesh Chand, 2010, Understanding the Nature and Causes of Food Inflation.Economic and Political Weekly, February.

16. BishwanathGoldar, 2011, Organised Manufacturing Employment: Continuing the Debate. Economic and Political Weekly, April.

17. Basu, K., &Maertens, A. (2012). The new Oxford companion to economics in India.New Delhi Oxford University Press.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE COURSE 12 (DSE-12): RESEARCH METHODOLOGY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical/ Practice		
Research Methodology (DSE 12)	**4**	**3**	**0**	**1**	**Class 12**	**None**

Learning Objectives

The course provide an understanding of the methods of conducting research through:
(i) introducing students to basic concepts of quantitative and qualitative research methods.
(ii) scientific methods of collecting reliable data and appreciating primary and secondary data
(iii) parametric and non parametric tests and interpretation of the results
(iv) publishing of research and issues of ethics in data collection and use.

Learning outcomes

By studying this course, the students will be able to:

- Assess the roles of the researcher and the informant in the research process and be in a position to apply qualitative and quantitative research methodology.
- Perform literature reviews using print and online databases
- Learn about the various formats for citations of materials
- Describe sampling methods, measurement scales and instruments, and their appropriate uses
- Learn the rationale for research ethics
- Provide understanding of appropriate statistical techniques for summarizing and displaying business and economic data.
- Perform the basic qualitative and quantitative data analysis in a clear concise and understandable manner with an in-depth, faster and accurate univariate, bivariate and multivariate data analysis.

SYLLABUS OF DSE-12

Unit 1: Elements of Research (15 hours)

Research- Definition, characteristics, Objectives. Types of Research- Quantitative Vs Qualitative; Descriptive, Exploratory and Causal. Research Methodology- Research Process, Formulating the Research Problem, Research Questions. Hypothesis-Formulation of Hypothesis, Role of Hypothesis, tests of Hypothesis and Errors in hypothesis testing. Research Design - importance and types, features for a good research design. Concept of Population and Sample, Sampling Design- Probability and non-probability Sampling techniques, Sample Size and sampling Error.

Unit 2: Understanding Data and its Collection (15 hours)

Data types - Nominal, Ordinal, Interval and Scale
Primary and Secondary Data- advantages and disadvantages. Primary Data Collection: Observation method, Interview method, Questionnaires-prerequisites and designing, Case Study method Scales-Understanding, Construction and Application (Graphic Rating, Likert scale, paired comparison, ranking, constant sum, semantic differential scale). Secondary sources of data- previous empirical studies, NSSO, CSO, RBI, World Bank.

Unit 3: Processing and Analysis of Data (10 hours)

Data recording, conducting univariate and bi-variate analysis-using-descriptives, Cross-tabs-chi-square tests of independence, goodness of fit, One Sample t-test, Independent Sample t-test, Paired Sample t-test, (Assumptions Testing and Inferential Analysis ANOVA, Repeated measure ANOVA, MANOVA.
PCA, Cluster analysis, Factor Analysis, Discriminant analysis.

Unit 4: Additional Topics in Research (5 hours)

Review of Literature-techniques, do's and don'ts of conducting literature survey, citation, referencing styles, ethics in research.

Practical Component (30 hours) : Practicals to be based on use of a statistical software to enable to student to implement all the concepts and tools taken up in the theory classes in the course.

Essential/recommended readings

1. Donald R Cooper & Pamela S Schindler, "Business Research Methods", McGraw Hill
2. Business Research Methods – Alan Bryman& Emma Bell, Oxford University Press.
3. Ranjit Kumar, "Research Methodology: A Step-by- Step Guide for Beginners" Sage
4. Joseph F. Hair, Jr. William C. Black, Barry J. Babin, Rolph E. Anderson," Multivariate Data Analysis, Seventh Edition-Pearson's New International Edition

Suggestive readings

1. Amir D Aczel, "Complete Business Statistics", McGraw Hill Education.
2. Naresh K. Malhotra, "Marketing Research: An Applied Orientation" PHI
3. Field, Andy, "Discovering Statistics using IBM SPSS Statistics", 5th Edition, SAGE.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-2): INTRODUCTION TO DIGITAL MARKETING

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES OFFERED BY THE DEPARTMENTS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Introduction to Digital Marketing (GE 2)	**4**	**3**	**1**	**0**	**Class 12**	**None**

Learning Objectives

This course aims to acquaint the students with:

- Key marketing principles and terminology.
- Evolving digital landscape and the strategic role of digital marketing processes and tools in designing the overall Marketing strategy.
- Methodologies, tools and technologies involved in digital marketing.
- Importance of search engines and their role in digital marketing ecosystem.

Learning outcomes

By studying this course, students will be able to:

- Understand the concept of digital marketing and its integration with traditional marketing.
- Understand customer value journey in digital context and behaviour of online consumers.
- learn email, content and social media marketing and apply the learnings to create digital media campaigns.
- Examine various tactics for enhancing a website's position and ranking with search engines and search advertising.

SYLLABUS OF GE-2

Unit 1: Fundamentals of Marketing **(6hours)**

Importance of marketing; Core marketing Concepts; Company Orientations; Concept of Segmentation, Targeting-Positioning; 7 P's Framework; Product Life cycle; Pricing strategies, Types of distribution channels; Promotion Mix.

Unit 2: Marketing in the Digital World **(9 hours)**

Digital marketing: Concept, Features, Difference between traditional and digital marketing, Moving from traditional to digital Marketing; Digital Marketing Channels: Intent Based- SEO, Search

Advertising; Brand Based- Display Advertising; Community Based-SMM; Others- Affiliate, Email, Content, Mobile; Customer Value Journey: 5As Framework; The Ozone O_3 Concept Key; Traits of online consumer.

Unit 3: Content, Email and Social Media Marketing (15 hours)

Content Marketing: Developing a content marketing strategy; Email Marketing: Types of Emails in email marketing, Email Marketing best practices; Social Media Marketing: Building Successful Social Media strategy; Social Media Marketing Channels; Facebook, LinkedIn, YouTube (Concepts and strategies)

Unit 4: Search Marketing (15 hours)

Introduction of SEM: Working of Search Engine; SERP Positioning; Search Engine Optimization: Overview of SEO Process; Goal Setting-Types

On-Page Optimization: Keyword Research, SEO Process -Site Structure, Content, Technical Mechanics, Headings, Image & Alt text, Social Sharing, Sitemaps, Technical Aspects-Compatibility, Structured Data Markup.

Off Page Optimization: Link Formats, Link Building, Content Marketing, Social Sharing; Black and White Hat Techniques

Search Advertising: Overview of PPC Process; Benefits of Paid Search; Basis of Ranking; Goal Setting-Objectives; Account Setting-Creation of Google Ads, Campaign architecture, Campaign setup, Targeting, Bid Strategy, Delivery, Ad Scheduling, Ad Rotation, Keyword Selection; Ad Copy composition, Ad Extension

Overview of Display Advertising: Working of Display Advertising; Benefits and challenges.

Essential/recommended readings

1. Dodson, I. (2016). The art of digital marketing: the definitive guide to creating strategic, targeted, and measurable online campaigns. John Wiley & Sons.
2. Kartajaya, H., Kotler, P., &Setiawan, I. (2016). Marketing 4.0: moving from traditional to digital. John Wiley & Sons.
3. Ryan, Damien. Understanding Digital Marketing - Marketing Strategies for Engaging the Digital Generation. Kogan Page Limited.

Additional References:

1. Kotler, P. (2009). Marketing management: A south asian perspective. Pearson Education, India.
2. Maity, Moutusy. Internet Marketing: A practical approach in the Indian Context. Oxford Publishing.
3. Gupta, Seema. Digital Marketing. McGraw Hill
4. Ultimate guide to digital Marketing. Digital Marketer

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-4): STATISTICS FOR BUSINESS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Statistics for Business (GE4)	**4**	**3**	**0**	**1**	**Class 12**	**Mathematics at Class 12 level**

Learning Objectives

The objective of this course is to enable students to:

- Describe data using summary statistics.
- Develop detailed understanding of discrete and continuous distributions.
- Develop skills in statistical computing, statistical reasoning and inferential methods.
- Comprehend and analyse real data like real indices.

Learning outcomes

By studying this course, students will be able to:

- Learn tools and concepts of statistical analysis and interpretation.
- Comprehend fundamentals of probability theory.
- Develop skills in statistical computing, statistical reasoning and inferential methods.
- Comprehend and analyse real data like real indices.

SYLLABUS OF GE-4

Unit 1: Descriptive Statistics and Exploratory Data Analysis (15 hours)

Types of Variables (Quantitative, Qualitative, discrete, continuous), Scales of Data Measurement (nominal, ordinal, Interval & Ratio), Variable-; Primary & secondary Data.

Frequency distributions, Relative Frequency, Cumulative Distributions, Percentiles, Quartiles; Graphical representation of data- bar charts, pie, histograms, box plots.

Measures of central tendency: Mean, median, mode, Geometric Mean, Harmonic Mean, Weighted Mean & their properties. Selection of a measure of central tendency.

Measures of Dispersion: Range, inter-quartile range, quartile deviation, mean deviation, standard deviation, variance, coefficient of variance, properties of standard deviation, merits & demerits.

Skewness and Kurtosis: Meaning, measures- Karl Pearson, Bowley, Kelly's, Kurtosis- meaning, Moments, Kurtosis

Bivariate Analysis: Cross-tabulations and Scatter diagram; Correlation, Association and Simple Regression.

Unit 2: Probability (12 hours)

Axioms of probability; Review of counting rules, experiments, sample space, simple and complex events; Addition and multiplication rules; Concepts of Mutually exclusive events, independent events; Concepts of Joint, marginal and conditional probability; Permutation and Combinations

Concept of Discrete and continuous Random Variables; Expected value and variance; Examples of Theoretical Discrete and Continuous Probability Distributions – Binomial, Poisson and Normal distributions.

Unit 3: Sampling, Estimation and Hypotheses (15 hours)

Population versus Sample; Sample Statistics versus population parameters; Definition and Statistical properties of a Random Sample; Point and Interval Estimation and Small Sample Properties of Estimators (unbiasedness, efficiency); Central Limit Theorem. (Interval estimation for mean for large samples)

Basic concepts of Hypotheses Testing: Formulation of Null and Alternate Hypotheses; One-tailed and two-tailed Tests about population Mean; Concepts of Type I and Type II errors. (Hypothesis testing for mean and difference between mean for large samples only)

Unit 4: Index Numbers (6 hours)

Index Numbers: Use and construction of Laspeyres and Paasche index numbers; Fixed and chain base index numbers; Base shifting, splicing and deflating. Construction of real indexes: Consumer Price Index and BSE index.

Practical Component (30 hours) : Practicals to be based on a spreadsheet package (Microsoft Excel or equivalent) to enable the student to execute all the measures and tests taken up in the theory classes in the course.

Essential/recommended readings

1. Spiegel, M.R.(2003). Theory & Problems of Statistics, Schaum's outline series, McGraw Hill.
2. Levin, Richard I. and Rubin, David (1998). Statistics for Management (7th Edition), Pearson.
3. Gupta, S.C. (2018). Fundamentals of Statistics, Himalaya Publishing House
4. Spiegel, M. and Stephens, Larry (2017). Statistics (Schaum's Outline Series), Tata-Mcgraw-Hill, New Delhi

Suggestive readings

1 Nagar, A. L. and Das. R. K.. Basic Statistics (2nd Edition), Oxford University Press

2. Karmel, P. H. and Polasek, M. (1978). Applied Statistics for Economists (4th edition), Pitman.
3. Larsen, Richard J. and Marx, Morris L. (2011). An Introduction to Mathematical Statistics and its Applications. Prentice Hall.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-6): INTRODUCTION TO FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Introduction to Finance (GE6)	**4**	**3**	**1**	**0**	**Class 12**	**None**

Learning Objectives

This course aims at providing a comprehensive introduction to:

- Financial system and its primary constituents.
- Sources of finance and time value of money.
- Basics of Investment and various asset classes.
- Key concepts of international financial management.

Learning outcomes

By studying this course, students will be able to:

Understand the meaning, scope and sources of Finance

· Estimate the present and future values of assets

· Examine the relationship between risk and return, and the nature and sources of risk in a stock market context

· Analyse the currency exchange market to deal exchange rate risk.

SYLLABUS OF GE-6

UNIT – I: A Primer on Financial Markets & Institutions (9 hours)
An overview of financial system: characteristics & requirements. Components & functions of financial system. Financial markets: characteristics & types. Types & role of Financial Institutions.An overview of the 2007–2008 Financial Crisis.

Unit 2: Corporate Finance: An Overview (12 hours)
Nature, scope and objectives of Finance, Emerging role of Finance Managers in India and Agency problem.Concept & Meaning of Financial Management, goals of financial management, the three financial decisions- Investing, Financing & Dividend.
Sources of Finance: Equity & Preference Capital, Retained earnings, Debt, Bonds, Long term loans, Short term advances from banks, public deposits & advances from customers and trade creditors.
Concept of Time Value of Money, Compound Value, Present Value, Annuity and Perpetuity.

Unit 3: Investment Management: Basics & Process (15 hours)
An overview of investment- Investment process, Types of assets- real & financial.Types of investors, types of financial securities & attributes of a good investment.
Concept of Risk & Return (Single asset), risk-return trade off, types of risk- systematic & unsystematic, types of return-holding period return, expected return, actual return.
Examining four broad asset classes: equity, bonds, mutual funds & derivatives.
Equity- three schools of thought on equity valuation- a brief discussion on fundamental analysis, technical analysis and efficient market hypothesis.

Bonds- types, fundamentals, relationship between interest rates & bond prices& yield curve.
Mutual Funds– meaning, importance, structure, mutual fund schemes, Systematic Investment Plan (SIP), Systematic Withdrawal Plan (SWP), Exchange Traded Fund (ETF), Equity Linked Savings Scheme (ELSS) and NAV of Fund.
Derivatives – Meaning and Types of Derivative Instruments (Forwards, Futures, Options and Swaps).
Concept of diversification & portfolios.Portfolio Risk & Return(two security only).

Unit 4: A Beginners' Guide to International Finance (9hours)
International Monetary System- development of international finance and how the international monetary system evolved. Currency exchange markets and rates- currency exchange markets, exchange rate quotations, currency exchange rate appreciation and, depreciation, factors that affect currency exchange rates and arbitrage. Conducting business internationally. Concept of exchange rate risk.

Essential/recommended readings

1. Bodie, Zvi., Kane, Alex and Marcus, Alan J.. Investments. McGraw Hill.
2. Chandra, P.. Security Analysis and Portfolio Management. Tata McGraw Hill.
3. Pathak, Bharati. Indian Financial System. Pearson.
4. Ronald, W. Melicher and Norton, Edgar A.. Introduction to Finance: Financial Markets, Investment, and Financial Management. Wiley Publishing House. 2012.
5. Rustagi, R.P., Fundamentals of Financial Management. Taxmann.

Suggestive readings

1. Khan, M. Y & Jain P. K., Financial Management: Text and Problems. Tata McGraw Hill. New Delhi.
2. Kohn, Meir. Financial Institutions and Markets. Oxford University Press.
3. Kidwell, David S., Backwell, David W., Whidbee, David A. and Sias, Richard W. Financial Institutions, Markets and Money. Wiley Publications.
4. Madura, Jeff. Financial Markets and Institutions. South Western Cengage Learning.
5. Reilly, Frank K, and Brown, Keith C. Investment Analysis and Portfolio Management. Cengage Learning.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-8): ENVIRONMENTAL ECONOMICS AND

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Environmental Economics and Climate Change (GE8)	**4**	**3**	**1**	**0**	**Class 12**	**None**

Learning Objectives

This course aims at inculcating an understanding of:

- How economic activities are affecting the environment.
- Social value of environmental resources.
- Climate change and its consequences.
- Efficient and effective policy measures for protecting the environment.

Learning outcomes

By studying this course, students will be able to:

. · Understand the linkage between environment and economics.

· Learn the basic theories of environmental economics.

· Understand the basic terminologies related to environment and Climate change.

· Analyse the effects of climate change on India and its future plan for environmental protection and mitigation.

SYLLABUS OF GE-8

UNIT – I: Introduction (8 hours)
Introduction to Environmental Economics, Material Balance model- economy environmental interactions, reasons for environmental degradation (population, technology, GDP), balance between environment and growth.

Unit 2: Economic Growth and Environmental Degradation (12 hours)
Theories of relationship between economic growth and environmental degradation: The environmental Kuznets curve hypothesis, The Brundtland Curve hypothesis, The environment Daly Curve hypothesis.

Unit 3: Climate Change and its Challenges (12 hours)
Introduction to the Climate Change, Drivers of Climate Change, Global impacts of Climate Change: Anthropogenic, Global warming, ozone hole, biodiversity loss, ecosystem services, natural capital and resources. Effect of Climate Change on India: Agriculture, Biodiversity, vulnerability of Coastal Belt, Rural Livelihoods and Food Security in India.

Unit 4: Actions Taken and Policy Framework (13 hours)
Global Level: Adaptation and Mitigation, Governmental and Intergovernmental Actions to Combat Climate Change: The Role of the Intergovernmental Panel on Climate Change (IPCC), United Nations Framework Convention on Climate Change, The Kyoto Protocol, Paris Agreement etc. The global

carbon market (CDM, JI, ET).India's Position on International Climate Negotiations, India's National Action Plan on Climate Change.

Essential/recommended readings

1. Callen,Thomas (2007). Environmental Economics, Thomson Learning Inc. Indian Edition.
2. Dubash, Navroz (2012). Handbook of Climate Change and India: Development, Politics and Governance, Earthscan
3. Bhattacharya, R. N. (ed.) (2001). Environmental Economics, An Indian Perspective, Oxford University Press.

Suggestive readings

1. Romm, J.J. 2018. Climate change: What Everyone Needs to Know. Oxford University Press
2. Dash. S.K. 2008. Climate Change, Cambridge University Press

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-10): INDIAN FINANCIAL SYSTEM

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Indian Financial System (GE10)	**4**	**3**	**1**	**0**	**Class 12**	**None**

Learning Objectives

The course attempts to develop an understanding of:
(i) the history and role of the Indian Financial System in economic development
(ii) the role and importance of financial markets; capital, equity and money markets
(iii) commercial banks, development banks, NBFCs - risk and NPAs; role of ARCs.
(iv) role of financial services in credit market

Learning outcomes

By studying this course, students will be able to:

. Analyse the financial market processes and their factors, and make successful financial decisions at an individual as well as company level.

· Evaluate various ways of raising funds from the financial markets domestically or internationally for the company.

· Study the considerations of banking and other financial institutions in real life.

· Evaluate various financial services offered under financial system of India.

SYLLABUS OF GE-10

UNIT – I: Financial System: An Introduction (6 hours)

Financial System: meaning, characteristics, significance and components; tracing the history of the Indian financial system and its contribution to Economic Development; markets, regulators and participants in the Indian financial system; financial instruments, direct and indirect finance, scams in Indian Financial System.

Unit 2: Financial Markets (18 hours)

Financial Markets – meaning, types, role, importance, and securities traded; linkages between financial markets and economy. Capital market – meaning, functions, organisation; Equity market – primary and secondary market, ways of raising funds, private equity, venture capital, introduction to debt market. Money market – meaning, functions, organisation, participants, instruments, trading mechanism, role of central bank.

Unit 3: Financial Institutions (9 hours)

Commercial Banking, Nationalisation of Commercial Banks, Structure of Commercial Banks in India, Depository and Non-Depository Institutions, Universal Banking, Payments Bank, Development Banks (IFCI, IDBI, NABARD and NHB), NBFCs, Risk Management in Banks, ARCs Problem of NPAs.

Unit 4: Financial Services (12 hours)

Credit Rating – Meaning, Process, Rating Methodology, Rating Symbols and Rating Agencies.
Insurance – Meaning, Importance, Types, Seven Principles and Regulation.
Leasing – Meaning, Features and Types of Leasing; Concept of Hire Purchase, Difference between Hire Purchase and Leasing; Factoring – Meaning, Functions, Types and Procedure; Forfaiting – Meaning, Process, Characteristics, Types, Advantages, Difference between Forfaiting and Factoring; Investment Banking – Meaning, Importance and Services Offered by Investment Bankers.

Essential/recommended readings

1 Khan, M.Y. Indian Financial System. Tata McGraw Hill.

2. Bhole, L.M. Financial Institutions and Markets. Tata McGraw Hill.

3. Varshney, P.N. and Mittal, D.K. Indian Financial System. Sultan Chand & Sons.

4. Pathak, Bharati. Indian Financial System. Pearson Publications.

5. Shahani, Rakesh. Financial Markets in India: A Research Initiative. Anamica Publishing Co.

Suggestive readings

1. Gordon, E. &Natarajan, K. Financial Markets and Services. Himalaya Publishing House.

2. Gupta, Shashi, Aggarwal, Nisha and Gupta, Neeti. Indian Financial System.Kalyani Publishers.

3. Kumar, Vinod., Gupta, Atul. andKaur, Manmeet. Financial Markets, Institutions and Services, Taxmann Publications.

4. Madura, Jeff. Financial Markets and Institutions. South Western Cengage Learning.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-12): BASIC ECONOMETRICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Basic Econometrics (GE12)	**4**	**3**	**0**	**1**	**Class 12**	**Knowledge of Inferential and descriptive Statistics**

Learning Objectives

The course intends to explain to the student:
(i) the classical linear regression model, OLS, its assumptions, testing and functional forms
(ii) the k-variable linear regression model, testing coefficients and ANOVA, and Restricted Least Squares
(iii) treatment of regressions involving qualitative regressors
(iv) the implications, detection and remedies in case of violation of classical assumptions

Learning outcomes

By studying this course, students will be able to:

. · Explain Key econometric concepts.

· Formulate simple econometric models

· Interpret the regression results obtained from software packages.

· Identify the errors in regression models and rectify the same.

· Analyse the suitability of the data for solving the problem at hand

SYLLABUS OF GE-12

UNIT – I: The Classical Linear Regression Model (12 hours)
Types of Data: Time Series, Cross Section and Panel Data. Concept of Population Regression Function and Sample Regression Function, Assumptions of the model, Derivation of Coefficients of Regression in a two-variable model, Estimation of the SRF using OLS, Analysis of variance and R squared.
Expectation and standard errors of the regression coefficients and the error term. Gauss Markov Theorem. Interval estimation and tests on population regression coefficients, variance of population disturbance term and forecasts. Testing the significance of the model as a whole. Testing the normality assumption.
Extensions of the Two Variable Linear Regression Model: Regressions through the origin, Scaling of Variables and Regression on Standardized Variables. Functional forms of Linear Regression Models: The double log, semi-log, reciprocal, log- reciprocal models with applications.

Unit 2: Multiple Regression Model (15 hours)

Coefficients of regression in a multi variable model and their properties. Interval estimation, tests on population regression coefficients and model significance. Correlations, Goodness of fit and the Adjusted R square. Hypothesis testing for significance of the contribution of a variable, structural stability, restricted least squares.

Unit 3: Dummy Variable Regression Models (6 hours)

Intercept, Slope Dummy variables. Interaction between qualitative variables.Interaction between quantitative and qualitative variables.Use of dummy variables in testing for structural change and for seasonal indices.

Unit 4: Relaxing the Assumptions (12 hours)
Introduction to multicollinearity, heteroscedasticity, autocorrelation and specification errors.The nature of the problem, its detection and corrective measures.
Practical Component (30 hours) **:** Practicals to be based on an econometric software (e.g. Gretl/SPSS/Stata/Eviews/PSPP). The student is expected to implement using the software all the regressions and tests noted in the syllabus.

Essential/recommended readings

1 Gujarati, D. and Sangeetha, N. (2007) Basic Econometrics. Fourth Edition, Tata McGraw-Hill, New Delhi

2. Dougherty, Christopher. (2011). "Introduction to Econometrics," Oxford University Press,

3. Wooldridge, J. M. (2006). Introductory econometrics: A modern approach. Mason, OH: Thomson/South-Western.

4. Manual of the relevant software

Suggestive readings

1. Asteriou, D., & Hall, S.G. (2011). Applied econometrics. Palgrave Macmillan.

2. Brooks, Chris (2008). Introductory Econometrics for Finance (2nd edition). Cambridge University Press

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

SEMESTER-IV
Bachelor in Management Studies (BMS)

DISCIPLINE SPECIFIC CORE COURSE – 10: QUANTITATIVE TECHNIQUES FOR MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Quantitative Techniques for Management (DSC 10)	4	3	1	0	XII Class	Basic knowledge of Statistics and Mathematics

Learning Objectives

- To apprise learners with the construction of mathematical models for managerial decision situations and to use spreadsheets or computer software packages to obtain a solution of real business problems.
- To acquaint learners with the techniques of Operational Research for understanding, formulating, solving and interpreting the real-world scenarios.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the basic concepts, principles, and terminology of linear programming, optimization, post optimality analysis, Game theory, Transportation problem, Assignment problem and Network analysis.
- Solve and interpret the results of linear programming, Transportation and Assignment problems, Network Analysis and Game Theory.
- Construct optimization models, linear programming problems, and decision-making frameworks based on given problem statements and real-world scenarios.
- Develop critical thinking and use Optimization techniques to improve decision making.

SYLLABUS OF DSC 10

Unit I: Introduction to Linear Programming Problem (12 hours)

Formulation of linear programming problems, graphical solutions (special cases: multiple optimal solution, infeasibility, unbounded solution), applications of linear programming to marketing, finance, operations management, Data Envelopment Analysis etc.,Simplex Method, Special cases, Big-M method and Two-phase method.

Unit II: Post Optimality Analysis and Game Theory (9 hours)

Duality: primal-dual relationship, shadow price, economic interpretation of dual, duality and simplex method, post optimality analysis: consequences of changes in cost coefficients and resource vector on the optimal solution.

Game theory, two-person zero-sum games, maximin & minimax principle, games without saddle point: mixed strategy, dominance rule, solution of 2 x s, and r x 2 games by graphical method, formulate and solve mixed-strategy m x n games using linear programming technique.

Unit III: Transportation and Assignment Problem (12 hours)

Transportation Problem: Formulation, Solution by N.W. Corner Rule, Least Cost method, Vogel's Approximation Method (VAM), Modified Distribution Method; Special cases: Multiple Solutions, Maximization case, Unbalanced case, Prohibited routes.

Assignment Problem: Hungarian Method, Special cases: Multiple Solutions, Maximization case, Unbalanced case, Restrictions on assignment.

Unit IV: Network Analysis (12 hours)

Basic Concept, Construction of AOA Network diagram, Critical Path Analysis, float and slack analysis (Total float, free float, independent float), probability consideration in PERT, Time-Cost optimization in Project.

Essential/recommended Readings (latest edition of readings to be used)

1. Taha, H. A. (2019). *Operations Research: An Introduction*. Pearson Education, India.
2. Taylor, B. W. (2016). *Introduction to management science*. Pearson Education, India.
3. Hillier, F. S. & Lieberman G. J. (2021) *Introduction to Operations Research.* McGraw Hill, India.
4. Render, B., & Stair Jr, R. M. (2016). *Quantitative Analysis for Management*, 12th ed. Pearson Education, India.
5. Vohra, N. D. (2006). Quantitative Techniques in Management, 5th ed. Tata McGraw Hill, India.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 11: FINANCIAL MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Financial Management (DSC 11)	4	3	1	0	Class XII	Basic knowledge of Accounting

Learning Objectives

- To provide an understanding of the essential elements of the financial environment in which the business firm operates.
- To acquaint learners with the techniques of financial management and their applications for business decision making.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the concept of time value of money and its application in investment, financing and dividend decisions.
- Understand the process of making investments, raising finance for investment in fixed and current assets and distribution of surplus from business operations.
- Evaluate the investment opportunities available, the various financing mix that can be used to derive the maximum value from the investment opportunities, the optimal dividend payout and monitor the current asset requirements.
- Analyse the evaluation outcomes to choose the best investment opportunity at the lowest cost of financing and adopt the optimal dividend payout along with the optimal level of liquidity through the working capital route to derive maximum wealth.
- Create a portfolio of investments at the best possible financing and dividend mix with the most appropriate working capital composition that will create maximum wealth under the given constraints.

SYLLABUS OF DSC 11:

Unit 1: Introduction to Financial Management (6 Hours)

Nature of Financial Management: Finance and related disciplines; Scope of Financial Management; Profit Maximization vs Wealth Maximization. Types of financial decisions – Finance, Investment , Dividend; Risk-Return Trade-off in Finance Functions. Organisation of finance function; Concept of Time Value of Money – present value, future value.

Unit 2: Strategic Investment Decisions and Cost of Capital (15 Hours)

Strategic Investment Decisions: Capital Budgeting - Nature and meaning of capital budgeting; Principles and Process; Estimation of relevant cash flows and terminal value; Evaluation techniques – Payback and Discounted Payback Period, Net Present Value (NPV), Profitably Index Method, Internal Rate of Return (IRR) & Modified IRR, NPV vs. IRR, Net Terminal Value. Cost of Capital: Meaning and concept, Measurement of cost of capital – Cost of debt; Cost of Equity Share; Cost of Preference Share; Cost of Retained Earning; Computation of overall cost of capital based on Historical and Market weights (WACC).

Unit 3 Strategic Financing & Dividend Decisions (12 Hours)

Strategic Financing Decisions – Capital Structure, Theories and Value of the firm – Net Income approach, Net Operating Income approach, Traditional approach. Determining the optimal capital structure. Leverage analysis and EBIT-EPS Analysis: Concept of leverage, Types of leverage: Operating leverage, Financial leverage, Combined leverage; EBIT-EPS Analysis. 5. Singh, S. and Kaur, R. (2020). *Fundamentals of Financial Management: with Excel application s*upplement,, Mayur Paperbacks.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 12: HUMAN RESOURCE MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Human Resource Management (DSC 12)	4	3	1	0	Class XII	Basics of Organizational Behaviour and Management

Learning Objectives

- To help the learners to develop an understanding of the concept & and essential functions of human resource management.
- To focus on Human resource management in context of Indian experiences, approaches and cases.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the concept, functions and role of human resource management and explore the recent trends of human resource management.
- Develop an understanding of human resource management functions of planning, recruitment and selection.
- Apply the concepts of HRM to develop training and development programs for employees.
- Enhance awareness of certain important issues in industrial relations.

SYLLABUS OF DSC 12

Unit 1: Introduction to Human Resource (9 Hours)

Human Resource Management: Concept and Functions; HRD – Definition, goals and challenges; The changing environment of HRM– globalization, cultural environment, technological advances, workforce diversity, corporate downsizing, changing skill requirement, HRM support for improvement programs, Work life balance.

Unit 2: Human Resource Planning, Recruitment and Selection (12 Hours)

Human Resource Planning: Process, Forecasting demand & supply, Skill inventories, Succession planning; Human Resource Information System (HRIS); Job analysis – Uses, methods, Job description & Job specifications; Recruitment: internal & external sources, Selection process, Tests in selection, concept of reliability and validity in selection; Orientation: Concept and process.

Unit 3: Training and Development (12 Hours)

Training: Concept, Training Process, Methods of training. Management Development: Concept & Methods. Performance Management System: concept, uses of performance appraisal, performance management methods, factors that distort appraisal. Career Planning: career life stages, career anchors. Compensation: Steps in determining compensation, job evaluation, components of pay

structure, factors influencing compensation levels, Trends in Compensation. Incentives: Importance and types; Benefits - Types, Brief introduction to social security, health, retirement & other benefits.

Unit 4: Industrial Relations (12 Hours)

Industrial Relations: Introduction to Industrial Relations; Trade unions role, types, functions, problems. Industrial disputes – concept, causes & machinery for settlement of disputes. Employee Grievances – concept, causes & grievance redressal procedure. Discipline – concept, aspects of discipline & disciplinary procedure. Collective bargaining: concept, types, process, problems, essentials of effective collective bargaining.

Essential/recommended Readings (latest edition of readings to be used)

1. Dessler, G., & Varrkey, B. (2005). *Human Resource Management, 15e*. Pearson
2. DeCenzo, D. A., Robbins, S. P., & Verhulst, S. L. (2016). *Fundamentals of human resource management.* John Wiley & Sons.
3. Chhabra, T.N. (2009). *Human Resource Management Concept & Issues*. Dhanpat Rai and company.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - MARKETING (DSE-4)

DSE 4: INTEGRATED MARKETING COMMUNICATION

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Integrated Marketing Communication (DSE 4)	4	3	1	0	Class XII	Basics of Marketing

Learning Objectives

- To equip the learners with knowledge on the nature, purpose and complex construction in the planning and execution of an effective Integrated Marketing Communications (IMC) program.
- Develop understanding of various tools of IMC and the importance of coordinating them for an effective marketing communications program.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the purpose and importance of IMC and Social and ethical aspects of IMC.
- Develop an understanding of the creative aspects of advertising and media strategy.
- Analyse the concepts of the choice of different elements of IMC.
- Evaluate the effectiveness of the promotional program, social and cultural consequences and economic effects of advertising.

SYLLABUS OF DSE 4

Unit 1: Introduction to IMC and the Communications Process (9 Hours)

Evolution of IMC and reasons for its growth, promotional tools for IMC, IMC Planning Process, Role of IMC in Marketing Process, Communication Process; Traditional & Alternative Response Hierarchy models. Setting objectives for the IMC Program, Establishing and Allocation of Promotional budget. Social and ethical aspects of IMC.

Unit 2: Creative and Media Strategy (12 Hours)

The Creative Process, Inputs to the Creative Process, Advertising Appeals, Media planning and scheduling; Key factors influencing media planning; Media decisions: media class, media vehicle & media option; introduction to broadcast, print, support media; Digital and Social media marketing.

4. Dutta, B. (2015). *Sales and distribution management.* I K International Publishing House Pvt. Ltd.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE – HUMAN RESOURCE MANAGEMENT (DSE-2)

DSE 2: RECRUITMENT AND SELECTION MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Recruitment and Selection Management (DSE 2)	4	3	1	0	Class XII	Basics of Management

Learning Objectives

- To equip the learners with knowledge of the role of HR in workforce planning and assessment, sources of recruitment and selection process.
- To familiarize learners with topics like the development of a qualified pool of candidates, contemporary trends, international recruitment and selection.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the theory, practice, principles and concepts of work, role of HR in workforce planning and assessment, sources and factors affecting recruitment.
- Understand the selection process, different types of tests in selection, types of interviews, biases in selection and negotiations during job offer.
- Analyse the fundamentals of international recruitment.
- Evaluate the contemporary issues in recruitment and selection like legal compliance and ethical considerations, e-recruitment and e-selection.

SYLLABUS OF DSE 2

Unit 1: Introduction to Recruitment (12 hours)

Work: Meaning, Evolution of Work Structure, Organizing and Logistics, Strategic Job Redesign, Role of HR in workforce planning and assessment, Recruitment: Concept, internal & external sources

with benefits and limitations, Factors affecting recruitment, Designing external job posting.

Unit 2: Introduction to Selection (12 Hours)

Selection process, Types of tests in selection, concept of reliability and validity in selection tests Types of Interviews, Biases in selection of employees, Negotiations during Job Offer.

Unit 3: International approach to Recruitment and Selection (12 Hours)

International Recruitment; International staffing choice, different approaches to multinational staffing decisions; Types of international assignments; Selection criteria and techniques; Successful expatriation, Causes of expatriate failure, female expatriation, Compensation of Expatriates.

Unit 4: Contemporary, Legal and Ethical Issues (9 Hours)

Contemporary issues in Recruitment and Selection, Legal Compliance and Ethical Considerations, Retention Strategies, E-recruitment and E-selection

Essential/recommended Readings (latest edition of readings to be used)

1. O'Meara, B., & Petzall, S. (2013). *Handbook of Strategic Recruitment and Selection: A Systems Approach.* Emerald Group Publishing.
2. Picardi, C. A. (2019). *Recruitment and Selection: Strategies for Workforce Planning & Assessment*. Sage Publications.
3. Nilanjan, S. & Bhattacharya, M. (2010). *International Human Resource Management.* Excel Books.
4. Dowling, P. J., Festing, M., & Engle, A. D. (2017). *International Human Resource Management*. Cengage Learning.

Unit 1: Basis of Performance Management (9 hours)

Introduction: Concept, Philosophy, History from performance appraisal to performance development; Objectives of performance management system; Aligning Performance Management with Organizational Strategy, Values, and Goals.

Unit 2: Performance Management Practice (15 hours)

Performance planning, Process and Documentation of Performance appraisal; The balanced Scorecard, Analyzing and assessing performance; Managing underperformance – problems and

approaches; Providing feedback – nature, effectiveness and guidelines, 360 -degree feedback and the feed-forward interview, Use of technology and e-PMS; Coaching – process, approach and techniques.

Unit 3: Applications of Performance Management (15 hours)

Managing organizational performance – process and strategic approach, business performance management systems, organizational capability, human capital management, developing a high performance culture; Managing team performance - team competencies, measures and processes for team performance management, performance of individual team members; Performance management and employee engagement – concept, significance and enablers; Performance management and reward – financial and non-financial; International performance management – subsidiaries of multi-national organizations, expatriates performance management.

Unit 4: Performance Management – Reality and Reinvention (6 hours)

Correcting the wrongs in the performance management process – reasons for failure; reinventing performance management – the way forward.

Essential/recommended Readings (latest edition of readings to be used)

1. Michael A., *Armstrong's Handbook of Performance Management: An Evidence - Based Guide to Delivering High Performance*. Kogan Page. (6th ed.)
2. D. Gary. *Human Resource Management*. Prentice Hall. (12th ed.)
3. Bhattacharyya, D.K. *Performance Management systems and strategies*, Pearson Education
4. Rao, T. V. (2016). *Performance management: toward organizational excellence*. Sage Publications India.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time

DISCIPLINE SPECIFIC ELECTIVE – HUMAN RESOURCE MANAGEMENT (DSE-7)

DSE 7: HUMAN RESOURCE PLANNING

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Human Resource Planning (DSE 7)	4	3	1	0	Class XII	Basics of Human Resource Management

Learning Objectives

- To equip the learners to understand the fundamentals of human resource function of workforce planning through application of tools, techniques and various concepts related to human resource planning.
- To familiarise the learners with HR information system, strategic HR planning.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the meaning, need and importance of HRP, various techniques and effective HR planning.
- Understand the meaning objectives HRIS, steps in designing HRIS, trends in HRIS.
- Analyse the HRP Management process HRP evaluation.
- Evaluate the Strategic HRP, Mergers and Acquisition and its impact on HRP, Outsourcing and its impact on HRPs

SYLLABUS OF DSE 7

Unit 1: Fundamentals of Human Resource Planning (12 Hours)

Overview of Human Resource Planning (HRP): Human Resource Planning – Meaning, Nature, Need and Importance; Process of HRP – Steps in HRP; HR Demand Forecasting – Factors, Techniques – Managerial Judgement, Ratio Trend Analysis, Regression Analysis, Work Study Technique, Delphi Technique; HR Supply Forecasting – Factors, Techniques –Skills Inventories, Succession Plans, Replacement Charts, Staffing Tables; Barriers in Effective Implementation of HRP and Ways to Overcome; Requirements for Effective HR Planning.

Unit 2: Human Resource Information System (12 Hours)

Data Information Needs for HR Manager – Contents and Usage of Data; HRIS – Meaning, Features, Evolution, Objectives, Essentials, Components, Functions, Steps in Designing of HRIS, HRIS Subsystems, Mechanisms of HRIS, Benefits, Limitations, Barriers in Effective Implementation of HRIS. Security Issues in Human Resource Information Systems; HRIS for HRP; Trends in HRIS; Job analysis – Uses, methods, Job description & Job specifications.

Unit 3: HRP Practitioner and Evaluation (12 Hours)

HRP Practitioner: Meaning, Role; HRP Management Process; HRP as a Tool to Enhance Organisational Productivity Impact of Globalisation on HRP; Aspects of HRP: Performance Management, Career Management, Management Training and Development, Multi Skill Development; Return on Investment in HRP – Meaning and Importance; HRP Evaluation Meaning, Need, Process, Issues to be considered during HRP Evaluation.

Unit 4: Strategic Human Resource Planning (9 Hours)

Strategic Human Resource Planning – Meaning and Objectives; Link between Strategic Planning and HRP through People, Finance and Technology; Selected Strategic Options and HRP Implications: Restructuring and its Impact on HRP, Mergers and Acquisitions and its Impact on

HRP, Outsourcing and its Impact on HRP.

3. Padoshi, S. (2018). *Talent and Competency Management.* Himalaya Publishing House.
4. Berger, L.A. & Berger, D.R. (2018). *The Talent Management Hand Book*. Tata McGraw Hill.
5. Sanghi, S. (2007). *The Handbook of Competency Mapping: Understanding, Designing and Implementing Competency Models in Organizations*. Sage Books.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE – FINANCE (DSE-1)

DSE 1: PROJECT APPRAISAL, FINANCING AND CONTROL

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical/ Practice		
Project Appraisal, Financing and Control (DSE 1)	4	3	1	0	Class XII	Basics of Accounting and Finance

Learning Objectives

- To familiarize learners about identification of a project and feasibility analysis,
- To equip them to apply project appraisal, control & management Techniques,
- To understand and appraise project risk analysis and financing

Learning Outcomes

On successful completion of his course, the learners will be able to:

- Understand the process of screening of ideas and carry out appraisal for Projects.
- Use Investment Evaluation Techniques for selection of Projects.
- Carry out Risk Analysis for business projects and identify alternative sources of financing.
- Understand the concept and application of Social Cost benefit Analysis
- Apply project control and management techniques for project success.

SYLLABUS OF DSE 1

Unit 1: Introduction to Projects and their Appraisal **(9 hours)**

Project Definition, Project Identification, Project Life Cycle, Project Stakeholder Analysis, Feasibility study. Types of Project Appraisal (Brief Overview): Market and Demand Analysis, Technical Appraisal, Financial Appraisal, Economic Appraisal, Managerial Appraisal, and Social Appraisal.

Unit 2: Financial Appraisal **(9 hours)**

Components of Project Cost, Investment Evaluation Techniques: Non-Discounting Methods (Payback Period, Accounting Rate of Return), Discounting Methods (Net Present Value, Profitability Index, Internal Rate of Return (IRR), Modified Internal Rate of Return (MIRR)). Comparative analysis of Investment Evaluation Techniques, Investment Evaluation in Practice.

Unit 3: Project Risk Analysis and Project Financing **(15 hours)**

Risk Analysis and Management: Sources and Measures of Risk. Methods of Assessing Risk – Sensitivity Analysis, Scenario Analysis, Break-Even Analysis, Simulation Analysis, Decision Tree Analysis. Strategies for Risk Management.
Sources of Financing – Internal Accruals, Equity Capital, Preference Capital, Debentures (or Bonds), Term Loans, Venture Capital, Private Equity, Venture Capital Vs Private Equity, Loan syndication.

Unit 4: Social Appraisal and Aspects of Project Management (12 hours)
Social Appraisal: Rationale for Social Cost Benefit Analysis (SCBA), Approaches of SCBA (UNIDO and Little-Mirrlees Approach Approach), Environment Impact Assessment (EIA) and Social Impact Assessment (SIA) of Projects. Relevant Case Studies. Network Techniques for Project Cost and Time Management (PERT & CPM) (theory only). Pre-Requisites for Successful Project Implementation. Essentials of a Project Report.

Essential/recommended readings (latest edition of readings to be used)

DISCIPLINE SPECIFIC ELECTIVE – FINANCE (DSE-7)

DSE 7: SECURITY ANALYSIS & PORTFOLIO MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical/ Practice		
Security Analysis and Portfolio Management (DSE 7)	4	3	1	0	Class XII	Basics of Financial Management and Statistics

Learning Objectives

- To provide a conceptual framework for analysis from an investor's perspective of maximizing return on investment
- To provide a sound theoretical base with examples and references related to the Indian financial system.
- To emphasize on understanding of the forces that influence the risk and return of financial assets and related models and theories.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Remember the concepts of risk and return, bonds and their valuation, technical and fundamental analysis, asset pricing and risk return of portfolio.
- Understand the process of calculating risk and return, pricing of bonds along with duration, valuation of shares along with trading strategies and portfolio risk and return, pricing research reports and advice of financial firms and brokers.
- Evaluate the best measures of risk and return, bond prices and sensitivity based on other variables, share valuation models and techniques of arriving at portfolio risk and return.
- Analyse the outcomes of evaluation to choose the best return risk asset, change in bond price based on changes in interest rate etc., execute buy and sell transactions based on fundamentals and trends in the respective asset and compare the risk return ratios of various assets and portfolios so as to choose the optimal portfolio.
- Create trading and investment strategies for maximising returns in the financial markets and also create a portfolio of investments to achieve the best risk return trade-off.

SYLLABUS DSE 7

Unit 1: Risk–Return Analysis, Bond Valuation & Fundamental Analysis (11 Hours)

Basics of risk and return: concept of returns, application of standard deviation, coefficient of variation, beta, alpha. Bonds: present value of a bond, yield to maturity, yield to call, yield to put, systematic risk, price risk, interest rate risk, default risk. Fundamental analysis: EIC framework; Economic analysis: Leading lagging & coincident macro-economic indicators, Expected direction of movement of stock prices with macroeconomic variables in the Indian context; Industry analysis: stages of life cycle, SWOT analysis, Company analysis.

Unit 2: Share Valuation & Technical Analysis (11 Hours)

Share valuation: Dividend discount models – no growth, constant growth, and two stage growth model. Relative valuation models using P/E ratio, other ratios. Technical analysis: meaning, assumptions, difference between technical and fundamental analysis; Price indicators – Dow theory, advances and declines, new highs and lows, circuit filters. Volume indicators – Dow Theory, small investor volumes. Other indicators – institutional activity, Trends: resistance, support. Technical charts & patterns. Indicators: moving averages.

Unit 3: Portfolio Analysis and Management (12 Hours)

Portfolio analysis: portfolio risk and return, Markowitz portfolio model: risk and return for 2 and 3 asset portfolios, concept of efficient frontier & optimum portfolio. Market Model: concept of beta, systematic and unsystematic risk. Investor risk and return preferences: Indifference curves and the efficient frontier, Traditional portfolio management for individuals: Objectives, constraints, time horizon, current wealth, tax considerations, liquidity requirements, and anticipated inflation. Asset allocation: Asset allocation pyramid, investor life cycle approach. Portfolio management services: Passive – Index funds, systematic investment plans. Active – market timing, style investing.

Unit 4 – Asset Pricing Models and Mutual Funds **(11 Hours)**

Capital asset pricing model (CAPM): Efficient frontier with a combination of risky and risk-free assets. Assumptions of single period classical CAPM model. Expected return, required return, overvalued and undervalued assets as per CAPM. Multiple factor models: Arbitrage Pricing Theory (APT), APT vs CAPM. Mutual Funds: Introduction, classification of mutual fund schemes by structure and objective, advantages and disadvantages of investing through mutual funds. Performance Evaluation of Managed Funds using Sharpe's, Treynor's and Jensen's measures.

DISCIPLINE SPECIFIC ELECTIVE – FINANCE (DSE-8)

DSE 8: DIGITAL FINANCE

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical/ Practice		
Digital Finance (DSE 8)	4	3	1	0	Class XII	Basics of Finance

Learning Objectives

- To familiarize learners with the fundamentals of digital finance
- To develop awareness about varied kinds of payments system
- To learn about the emergence of cryptocurrency and blockchain

- To learn about the opportunities, challenges and risk management in fintech business

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the nature of the digital revolution in finance
- Develop an insight about the emergence of digital business models, products and services in the ecosystem
- Develop an insight about the functioning of crypto asset and blockchain
- Analyze the key areas of concern in the operation of fintech business models

SYLLABUS OF DSE 8

Unit 1: Digital Transformation of Finance (11 Hours)

A Brief History of Financial Innovation, Digitization of Financial Services, Introduction to FinTech & Funds, FinTech Transformation, FinTech Typology, Collaboration between Financial Institutions and Start-ups. Introduction to Regulation and future of RegTech.

Crowdfunding – Types and functioning of crowdfunding markets, Differences between traditional funding models and crowdfunding markets, Informational problems in the crowdfunding model.

Unit 2: Payment Systems (11 Hours)

Digitalization of the payment system, The historical evolution of the payment system. Attributes of a well-functioning payment system, Banks as guarantors of the payment system. New entrants and new payment models: risks for the banking system. FinTech applications in Banking & Non-Banking Financial Companies (NBFCs); Insurance; Payments; Lending; Audit; and Compliance. Electronic Clearing Service (ECS), Real Time Gross Settlement (RTGS), National Electronic Funds Transfer (NEFT), Immediate Payment Service (IMPS), Unified Payments Interface (UPI), Growth of Digital Payments in India, RBI guidelines on Digital Payments.

Unit 3: Crypto Assets and Blockchains (12 Hours)

Introduction: Crypto an asset for trade and Crypto-currency, Problems with issuers credibility, Fin Tech & Securities Trading; Cryptocurrencies and its future as currency, blockchain as a registration mechanism, Functioning of the block chain system. The integration of digital currency and blockchain and issuers incentive problems; Proptech: FinTech of Real Estate; Possible alternative uses of blockchain technology in the economy and difficulties in its implementation. Use of bitcoin in money laundering. The regulatory debate. Introduction of Central Bank Digital Currency (CBDC). Other Emerging Financial Technologies: Internet of things (IOT) & AR/VR applications.

Unit 4: FinTech, Big Data Analytics and New Financial Business Models (11 Hour)

The use of data in traditional credit decisions, the combination of big data and machine learning to improve financing decisions. Smart accounts, customized financial products, risk management and fraud prevention. High frequency trading: opportunities and risks. Digital security, Challenge of confidentiality, integrity and availability. Digital securities as systemic risk in economy. Regulations on cybersecurity. Latest developments in field of Digital Finance.

Essential/ recommended Readings (latest edition of readings to be used)

1. Lynn, T., Mooney, J. G., Rosati, P., & Cummins, M. (2019). Disrupting finance: FinTech and strategy in the 21st century. New Delhi: Springer Nature.
2. Beaumont, P. H. (2019). Digital Finance: Big Data, Start-ups, and the Future of Financial Services. New Delhi: Routledge.

Additional Readings (latest edition of readings to be used)

1. RBI Guidelines on Payment Systems, Crypto Asset and Fintech Business Model
2. Phadke, S. (2020). FinTech Future: The Digital DNA of Finance. New Delhi: Sage Publications.
3. Maese, V. A., Avery, A. W., Naftalis, B. A., Wink, S. P., & Valdez, Y. D. (2016). Cryptocurrency: A primer.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - GLOBAL BUSINESS MANAGEMENT (DSE 1)

GLOBAL MARKETING

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Global Marketing (DSE 1)	4	3	1	0	Class XII	Basics of Marketing

Learning Objectives

- This course aims to bring to the fore various cultural and regional variables and their impact on businesses in the short-term and long-term future.
- It further aims to explore the nuances of international marketing related activities such as advertising, pricing, supply chain management, market entry, branding and customization etc. while attempting to bring practical elements into study.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Develop the basic understanding of the factors related to global marketing
- Articulate the various deciding factors at international level which have a significant impact on international trade and business.
- Identify the Fundamentals of sustainable (profitable) business growth with focus on international expansion, operating in multiple markets, new business opportunities and market analysis.
- Comprehend the critical roles of (international pricing, advertising and promotions, policies for export and international trade, global marketing strategies etc.) in developing a sound International business relations.

SYLLABUS FOR DSE 1

Unit 1: Introduction (9 Hours)

Reasons behind international expansion; types of MNCs; Expatriates and Inpatriates; Stages of International Exposure; Global Marketing, Using Social Media tools.

Unit 2: International Variables (12 Hours)

National-level variables, regional trading blocs; Physical variables, Geographic distance, Grouping of industries in specific areas/regions, Environment specific impacts, Distribution of Natural Resources; Cultural Variables, Impact on doing business (Distance, Power, Decision Making, People Management, Delegation, Corruption, Quality Benchmarks Etc.), Gender biases, Festivals, Buying Behaviour; PESTEL; Porter's Diamond Model; Positioning; Protectionism and its impact on international trade.

Unit 3; International Expansion (12 Hours)

Porter's Five Forces Model; Ghemawat's CAGE framework; Globalisation; Demographics and Segmentation; Assessing Market Potential, How markets behave, Selling in specific markets (Developed, Developing, Post-Communist); "Right" Market to enter and "Right" Time to enter; What (mis-selling, outdated products), Where, Why, and How are we selling; Customer needs (of the new/foreign market); Location of manufacturing facilities; Labelling and Packaging (Export and Retail); Selling to and in emerging markets; Concerns and issues with available market analysis tools.

Unit 4: International Business (12 Hours)

Strategic (and global) Alliances; Global level of competition; Product Development; E- Commerce and Changing International Marketing Paradigms; Supply Chain as a source of International Advantages; Managing International Sales (Channels and Logistics); International Advertising and Promotions; Pricing for international markets, Pricing wars (War Chests), Approaches – Full-cost v/s Variable, Skimming v/s Penetration (non-numeric), factors influencing pricing; Implementing a Global Marketing Strategy; Support Mechanisms for Exports and International Trade, Export Infrastructure and Assistance in India, ITPO; International Payment Methods, Finance and Raising Funds, Taxation and Tax Havens, Marine and Cargo Insurance. Managing Risks in International Trade.

3. Jeevanandam, C.: Foreign Exchange and Risk Management. Sultan Chand & Sons

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time

DISCIPLINE SPECIFIC ELECTIVE - GLOBAL BUSINESS MANAGEMENT (DSE 7)

GLOBAL TRADE MANAGEMENT (BARRIERS AND BLOCS)

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Global Trade Management (Barriers and Blocs) (DSE 7)	4	3	1	0	Class XII	Basics of Management and Marketing

Learning Objectives

- This course aims to enrich the understanding of learners about the globalization of business in the setting of new opportunities and threats to governments, firms, and individuals.
- This course attempts to introduce elements of strategy in the way of business in the global marketplace as it exists today, with an outlook of the future growth and expansion.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Recognise how the economic, political/legal, and financial environments affect international business operations.
- Interpret international trade theories, international investments, trends toward economic integration around the world; and how government and business decisions influence international trade.
- Illustrate the effects of current regional trade agreements and economic integration on developing countries.
- Judge and implement strategies that will help provide a competitively advantageous position and differentiate between smaller firms and multinational corporations.

SYLLABUS FOR DSE 7

Unit 1: Global Business Environment (9 Hours)

Theories of international business – Mercantilism, Absolute Advantage, Comparative Advantage, Factor Endowment, Competitive Advantage. National Differences, National Differences under PESTEL: Culture, Bureaucracy, CSR, Environmental Consciousness and Sustainability. Porter's Diamond model of National Competitiveness. Doing business globally; supply chain management; currency management; raising capital; making payments for internationally traded goods and services; ease of doing business; marketing across cultures; pricing; costing for internally traded goods and

services; dispersed manufacturing; import-export. Introduction to Analytics for global business operations. Trade hubs. Key regions, companies and countries impacting global trade.
Various businesses and industries operating globally. Global movement of knowledge and unskilled workers.

Unit 2: Globalization and Free Trade (12 Hours)

Globalization: Meaning, Definition, Features, Advantages and Disadvantages. Challenges to global operations: Socio–Cultural, Political, Legal and Economic Implications. Globalization and India: GATT, WTO, Intellectual Property Rights, Industrial promotion schemes such as SEZs and Atmanirbhar Bharat, TRIPS Agreements, India's Trade Policy. Globalisation of Indian Businesses.
Concept of global free trade: role of global bodies such as WTO, IMF; ethical issues; biases and restrictions; global climate agreements; enforcement of global trade pacts and regulations; trade sanctions; preferential and non-preferential treatments
Trade Blocs and Trade Agreements; introduction, need and relevance; pros and cons. Overview of major agreements such as NAFTA, TPP, EU, MERCOSUR, OPEC etc. Impact of such blocs and agreements on strategies for global expansion and global business activities.
Regional Trade Blocks, Preferential Trade Agreements, Free Trade Area, Custom Union, Economic Union. Entering Developed and Emerging Markets.

Unit 3: International Business Management (9 Hours)

Modes of creating an International Business: Global Strategic Management and Multinational Enterprises, International business analysis; modes of entry: exporting (direct and indirect), licensing, franchising, contract manufacturing, management contracts, turnkey projects, Joint ventures, Mergers and Acquisitions, Foreign direct investment; Comparison amongst different modes of entry.
Emerging markets as a unique segment of international business opportunities; bottom of the pyramid; need for innovation; unique operational challenges and circumstances.
Challenges to international business operations and trade barriers.

Unit 4: Protectionism and Trade Barriers (12 weeks)

Introduction to Protectionism: history; stages; current scenario. Various types of protectionist measures: import quotas, tariffs; anti-dumping; bans etc. Protectionist measures since 1945: banana wars, Japanese companies entering USA and Western Europe; anti-dumping and China; political issues affecting imports; trade agreements; export restrictions. Barriers affecting the movement of goods, intellectual property, services and people.
Export driven economies: UK, Germany, USA, Japan, Asian Tigers, Mexico, India, China + Rise of global manufacturing and outsourcing hubs like Mexico, China, Bangladesh, India, Vietnam, parts of Eastern Europe - and their experience with trade barriers - solutions and present scenario
Rise of globally relevant trade agreements: relevance, impact on strategies of international business operations.

Current scenario of trade barriers and protectionism.

DISCIPLINE SPECIFIC ELECTIVE - GLOBAL MANAGEMENT (DSE 8)

GLOBAL SUPPLY CHAIN MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Global Supply Chain Management (DSE 8)	4	3	1	0	Class XII	Basics of Marketing and Operations

Learning Objective

- To provide a balanced and integrated perspective of both the foundational principles and pragmatic, business-oriented functions of SCM.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Define supply chain and its role in organisation.
- Analyse the significance of supply chain strategy in overall business.
- Explain the role of Marketing, Operations, Sourcing and Logistics in supply chain management.
- Evaluate different methods of forecasting and demand planning and maintaining inventory management.
- Analyse the importance of quality control through six-sigma and identify how it affects the sustainability in SCM.

SYLLABUS FOR DSE 8

Unit 1: SCM Strategies and Systems (12 Hours)

Introduction To Global Supply Chain Management: Characteristics of a Competitive Supply Chain, Trends in SCM,; Examples from Different Industries, Services & Continents; Supply Chain Strategy: Achieving a Competitive Advantage, Building Blocks of Supply Chain Strategy, Supply Chain Strategic Design, Strategic Considerations, Productivity as a Measure of Competitiveness; Network and System Design: The Supply Chain System, Designing Supply Chain Networks. Special relevance of SCM for global operations.

Unit 2: Operations, Sourcing And Logistics (12 Hours)

Customer-Driven Supply Chains, Delivering Value to Customers, Global channels of Distribution; International operations Management: Product Design, International Process Design, Facility Layout, Process Automation; International Sourcing: Sourcing and SCM, Measuring Sourcing Performance;

Global Logistics: Transportation, Warehousing, Third-Party Logistics (3PL) Providers. Challenges and advantages of global sourcing.

Unit 3: Forecasting and demand planning (12 Hours)

Role of Forecasting and Demand Planning in SCM: Collaborative Forecasting and Demand Planning, Bull-whip effect. Role of Inventory Management in SCM: Basics of Inventory Management, Inventory Systems, Managing Supply Chain Inventory. Lean Systems and Six-Sigma Quality: Lean Production, Total Quality Management (TQM), Statistical Quality Control (SQC), Six Sigma Quality, The Lean Six Sigma Supply Chain. Variables affecting globally long supply chains.

Unit 4: Sustainable Supply Chain Management (9 Hours)

Supply Chain Relationship Management: Supplier-Retailer Relationships, The Role of Trust. Global Supply Chain Management: Global Market Challenges, Global Infrastructure Design, Cost Considerations, Political and Economic issues. Sustainable Supply Chain Management: Growing trend in sustainable supply chain operations; Evaluating Sustainability in SCM, Sustainability in Practice. Role of IT in SCM: Enterprise Resource Planning (ERP), Tracking; RFID, Digitally networked planning.

DISCIPLINE SPECIFIC ELECTIVE - GLOBAL BUSINESS MANAGEMENT (DSE-9)

INTERNATIONAL EXPANSION STRATEGIES

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
International Expansion Strategies (DSE 9)	4	3	1	0	Class XII	Concepts of International Marketing

Learning Objectives

- This course aims to help learners identify and understand the various strategies that companies can adopt while opting for international expansion.
- This course should also enable the learners to understand the nuances of marketing to a diverse audience and how to adapt to local operating challenges and local variables like culture and governance.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Reproduce factors that impact international expansion.
- Interpret and have a deeper understanding of the various strategies companies can adopt while expanding abroad.
- Organise their knowledge to develop a better understanding of the various challenges that a company faces in international operations.
- Recognize and articulate strategies and actions to help manage international expansion challenges and risks.

SYLLABUS FOR DSE 9

Unit 1: Introduction (6 Hours)

Reasons behind international expansion; types of MNCs; basic factors to consider while expanding abroad; Market Analysis tool: Porter's Five Forces, PESTEL, Porter's Diamond Model.

Unit 2: International Expansion Choices (15 Hours)

Assessing market potential: Demographics, Segmentation, Market behaviour and operational challenges.

Tools for assessing market attractiveness: Ghemawat's CAGE framework, Ghemawat's AAA Framework, Ease of Doing Business.

Selling in specific markets: Developed, Developing/ Emerging, Post-Communist; "Right" Market to enter and "Right" Time to enter;
Product and Market Fit: Who, What, Where, Why, and How are we selling; Customer needs (of the new/foreign market); own capabilities in product development and IP capabilities; Positioning; Market realities.
Market Entry planning: Operational needs and challenges; Location of manufacturing facilities; Location of IP development and management facilities; Labelling and Packaging (Export and Retail); Inport and Export laws and taxes, local business customs and processes, cultural variables and their impact on doing business locally, business risks.
Balance between local and international operations: Which parts to bring in from abroad and what to manufacture locally, IP development centres, level of independence of local operations; managing globally dispersed operations and activities; identifying and adapting to cultural and operational differences amongst home country and non-home country operations and markets.

Unit 3: International Expansion Strategies (15 Hours)
Strategies: Distributor model; Licencing; Franchising; Joint Ventures; Strategic Alliances; Own Operations: Mergers, Acquisitions, Green-field and Brown-field expansion.
Challenges: regulatory environment, sops, staffing, export-import regulations and restrictions, currency conversion, national level variables and advantages, supply chain, infrastructure, financing and funding, new product development; long-term business risks.

Unit 4: Realities of International Operations (9 Hours)
Global competition: Product Development, E- Commerce, Pricing.
Competition from local players: Protectionism, market understanding, tactics used by local players to protect their markets, role and relevance of local partners for specific business activities, amount of resources (raw materials, infrastructure, distribution networks) available in the market, advantages possessed by local players as compared to international companies.
Sources of competitive advantage for international companies (from outside the new market): Supply chain, manufacturing facilities; raising resources and finances; operational excellence and practices, quality partners and vendors.
Managing Risks in International Business operations.

COMMON POOL OF GENERIC ELECTIVES (GE) COURSES

GENERIC ELECTIVES (GE-1): MANAGEMENT WISDOM FROM INDIA

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course	Department offering the course
		Lecture	Tutorial	Practical/ Practice			
Management Wisdom From India (GE 1)	4	3	1	0	Class XII	Concepts of management	Management Studies

Learning Objectives

- This course aims to bring management education and research in India in line with its needs to tackle contemporary challenges
- The course helps learners develop management models that are rooted in India's spiritual and cultural ethos.
- This course attempts to highlight innovative uses of Indian Management thought in the VUCA world of today.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Interpret the various theories, concepts and ideas that constitute 'received knowledge' of Indian Management.
- Learn how to compare and contrast Indian management thought with Western concepts.
- Illustrate ways of how to apply Indian management thought more effectively in an organisation setting.
- Judge how Indian thoughts help enable growth and development of the self, organisations, society and environment in the present as well as future context.

SYLLABUS OF GE-1

UNIT- 1: Indian Wisdom (9 hours)

Understand the principles of materialism (abhyudhaya), spiritualism (nisreyasa), nivṛtti (spiritual contemplation), pravṛtti (worldly duties), coexistence (loka sagraham), cohesion (samanva), arkashastra (Analysis, Reasoning, Argumentation), Diversity Management (Anekanthavada). Relevance of Gurukul concepts in modern corporate world - shadowing, mentoring and coaching; Roots of Indian wisdom - welfare-oriented economy based on moral values. Using Indian wisdom to solve modern management problems.

UNIT- 2: Management Paradigms from Ancient Texts (12 hours)

Relevant concepts: Spiritual dimensions, Karma, Organisation tension, Positive thinking, Integrity, Leadership, Work Ethic. Management learnings from the Bhagavad Gita. Interpersonal Relations in Ramayana and Mahabharata. Pauranic Jagruti and Tourism Management. Management principles from the Guru Granth Sahib. Management learning and Organisational Policies from the Thirukural. Government administration from Kautilya's Arthasastra. Learnings from a study of Manusmriti.

UNIT- 3: Indian Management Practices (15 hours)

Uniquely Indian business scenarios – population density, crowd behaviour, role of the unorganised sector in trade and commerce, or cultural issues in business, infrastructure development, public private partnerships and regulation, how taxation drives business behaviour, logistics management, saving habits of Indians. Indian business practices- Community-based Business Management (Chettiars in Tamil Nadu, Marwaris of Rajasthan, Angadias of Gujarat), Indian family business management, community level success stories- Gupta empire, Gujarati, Marwari, Punjabi traders. Studying Indian business success stories such as Dabbawallas, Amul, Swachh Bharat, Atmanirbhar Bharat, PLI scheme initiatives, Indian corporates working abroad, success of Indians as individuals abroad in domains such as IT, Merchant Navy, Higher Education, Medicine.

UNIT-4: Future for Indian Management Thoughts (9 hours)

Indian models like OSHA, Theory K and Corporate Rishi Model. Management education should be based on four Ds (decision, direction, determination and dedication) and four Es (explore, experience, enjoy and excel) in learners. Indian perspectives on sustainability, creativity, interpersonal skills, business ethics, environment friendly.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time

GENERIC ELECTIVES (GE-3): FINANCE FOR NON FINANCE EXECUTIVES

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course	Department offering the course
		Lecture	Tutorial	Practical/ Practice			
Finance for Non-Finance Executives (GE 3)	4	3	1	0	Class XII	None	Management Studies

Learning Objective

- To familiarise non finance executives with the essentials of finance and investments.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand Investment Environment and concept of Return & Risk.
- Analyse bond valuation & role of credit rating agencies.
- Examine equity analysis approaches.
- Understand two securities portfolios using the Harry Markowitz model and understand CAPM.
- Familiarise with Investors' protection framework.

SYLLABUS OF GE-3

Unit 1: Introduction to Finance (10 hours)

Introduction to Financial Management: Concept and Importance of Finance Function, Objectives of

Financial Management, Financial Decisions and their Risk-Return Trade-off. Time Value of Money – Concept and Rationale, Compounding & Discounting to obtain Future and Present values. Types of Risks and Returns. Sources of Finance.

Unit 2: Investment Decisions (12 hours)

Concept and Importance of Capital Budgeting, Objectives and Problems in Capital Budgeting, Types of Investment Projects and kinds of Investment Decisions, Capital Budgeting Process. Investment Evaluation Techniques: Payback Period, Discounted Payback Period, Net Present Value, Profitability Index, Internal Rate of Return. Selection of suitable evaluation techniques.

Unit 3: Financing Decisions (12 hours)

Cost of Capital: Concept, Cost of Debt Capital, Cost of Preference Share Capital, Cost of Equity Share Capital, Weighted Average Cost of Capital (WACC). Leverage Analysis: Meaning of Leverage; Operating Leverage, Financial Leverage, and Combined Leverage. Capital Structure (Theory only): Concept, Factors affecting Capital Structure, Capital Structure Theories: Net Income Approach, Net Operating Income Approach, and Traditional Approach.

Unit 4: Dividend Decisions and Working Capital Management (11 hours)

Dividend Decisions: Concept, Relevance of Dividend Decisions: Walter's Model and Gordon's Model. Types of Dividends, Dividend Policies and factors determining the Dividend policy. Working Capital Management (Theory only): Concept and need for Working Capital, Types of Working Capital and factors affecting Working Capital requirements.

Essential/recommended Readings (latest edition of readings to be used)

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-4): WEALTH MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course	Department offering the course
		Lecture	Tutorial	Practical/ Practice			
Wealth Management (GE 4)	4	3	1	0	Class XII	None	Management Studies

Learning Objective

- To familiarise learners with the essential concepts and fundamentals of financial investments. The course will enable them to understand and make informed choice about the various available financial investment alternatives.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Provide an overview of various aspects related to wealth management.
- Understand the fundamentals of financial investments and the investment decision process.
- Able to compute various measures of risk and return, and understand their role for evaluating investments.
- Understand and carry out security analysis using different approaches.
- Learn basic approaches to managing portfolios.

SYLLABUS OF GE-4

Unit 1: Basics of Wealth Management and Investments (9 hours)

Introduction to Wealth Management, Need for Wealth Management, Components of Wealth Management, Process of Wealth Management. Concept of Investment, Financial Investment Vs. Real Investment, Investment Vs. Speculation, Objectives or Features of Investment, Risk Return Trade Off, Investment Environment – Overview of Securities Market and Different Types of Financial Investment. Investment Decision Process, Direct Investing Vs Indirect Investing, Approaches to Investing – Active Vs Passive.

Unit 2: Risk – Return Analysis (12 hours)

Concepts of Return and Risk, Types of Return (their calculation & utility): Absolute Return, Average

Return, Expected Return, Holding Period Return, Effective Annualised Return, Portfolio Return, Risk-Adjusted Return. Causes (or Sources) and Types of Risk – Systematic and Unsystematic Risk, Components of Systematic and Unsystematic Risk. Calculation of Total, Systematic and Unsystematic Risk. Impact of Taxes and Inflation on Investment – Computation of Post Tax and Real Returns.

Unit 3: Security Analysis (12 hours)

Approaches to Security Analysis – Fundamental Analysis, Technical Analysis, and Efficient Market Hypothesis (EMH). Fundamental Analysis – EIC Framework, Economic Analysis, Industry Analysis, and Company Analysis. Technical Analysis – Basic Tenets of Technical Analysis, Tool of Technical Analysis – Charts, and Technical Indicators, Limitations of Technical Analysis. Difference between Fundamental Analysis and Technical Analysis.

Unit 4: Portfolio Management & Estate Planning (12 hours)

Traditional portfolio management for individuals: Objectives, constraints, time horizon, current wealth, tax considerations, liquidity requirements, and anticipated inflation. Asset allocation: Asset allocation pyramid, investor life cycle approach. Portfolio management services: Passive – Index funds, systematic investment plans. Active – market timing, style investing. Portfolio Analysis – Portfolio Risk and Portfolio Return. Estate Planning – Fundamentals of Estate Planning, Impact of Property Ownership and Beneficiary Designations, Estate Planning Documents, and Executing Basic Estate Planning.

2. Tillery, S., & Tillery, T. (2018). *Essentials of Personal Financial Planning* (1st ed.). Wiley.
3. Singh, R. (2017). *Security Analysis and Portfolio Management* (2nd ed.). Excel Books.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

GENERIC ELECTIVES (GE-5): FUNDAMENTALS OF MARKETING MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course	Department offering the course
		Lecture	Tutorial	Practical/ Practice			
Fundamentals of Marketing Management (GE 5)	4	3	1	0	Class XII	None	Management Studies

Learning Objectives

- To introduce the nature, scope, and importance of marketing and its evolution over time.
- To explain the core marketing concepts and the various company orientations.
- To explain the various product decisions, including the product life cycle, product classification, product line decision, product mix decision, branding decisions, packaging and labeling.
- To understand the various pricing methods and determinants of price, as well as promotion decisions and marketing channel decisions.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Learners will be able to understand the nature, scope, and importance of marketing and its evolution over time.
- Learners will be able to explain the core marketing concepts and the various company orientations.
- Learners will be able to identify and analyze the various factors affecting the marketing environment in the Indian context.
- Learners will be able to apply the concepts of segmentation, targeting, and positioning to develop effective marketing strategies.
- Learners will be able to make informed decisions regarding product decisions, including the product life cycle, product classification, product line decision, product mix decision, branding decisions, packaging and labeling.
- Learners will be able to analyze the various pricing methods and determinants of price, as well as promotion decisions and marketing channel decisions, to develop effective marketing strategies.
- Learners will be able to develop marketing strategies for service firms based on an understanding of the unique characteristics of services.

SYLLABUS OF GE-5

Unit 1: Introduction and Marketing Environment (12 hours)

Introduction: Nature, Scope and Importance of Marketing, Evolution of Marketing; Core marketing concepts; Company orientation - Production concept, Product concept, Selling concept, Marketing

concept, Holistic marketing concept. Marketing Environment: Demographic, Economic, Political, Legal, Socio cultural, Technological environment (Indian context); Portfolio approach – Boston Consulting Group (BCG) matrix.

Unit 2: Segmentation, Targeting and Positioning and Product Decisions (12 hours)
Segmentation, Targeting and Positioning: Concept; Levels of Market Segmentation, Basis for Segmenting Consumer Markets; Product decisions: Concept of Product Life Cycle (PLC), PLC marketing strategies, Product Classification, Product Line Decision, Product Mix Decision, Branding Decisions, Packaging & Labelling.

Unit 3: Pricing, Promotion and Marketing Channel Decisions (12 hours)
Pricing Decisions: Determinants of Price, Pricing Methods (Non-mathematical treatment), Adapting Price. Promotion Decisions: Factors determining promotion mix, Promotional Tools – Fundamentals of advertisement, Sales Promotion, Public Relations & Publicity and Personal Selling. Marketing Channel Decision: Channel functions, Channel Levels, Types of Intermediaries: Wholesalers and Retailers.

Unit 4: Marketing of Services (9 hours)
Marketing of Services: unique characteristics of services, marketing strategies for service firms – 7Ps.

DISCIPLINE SPECIFIC CORE COURSE – 17: FINANCIAL INSTITUTIONS AND MARKETS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Financial Institutions and Markets (DSC 17)	4	3	1	0	Class XII	None

Learning Objectives

- To apprise the learners about identification and understand the structure and functioning of the Indian financial system and major institutions, such as RBI, SEBI, IRDA.
- To provide a conceptual framework of different types of financial markets in India, such as money market, capital market, and foreign exchange market.
- To provide the key concepts and ideas of capital markets in India, including demutualization of stock exchanges, trading of securities, and construction of Indian stock indices.
- To enrich the understanding of learners about the money market and capital market instruments.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Structure of the Indian financial system and describe major reforms, such as payment banks, GST, innovative remittance services, and insolvency and bankruptcy code.
- Compare and contrast various regulatory institutions in India, including their roles and functions.
- Analyse the role of commercial banks, non-banking financial companies (NBFCs), and core banking solution (CBS) in the Indian financial system.
- Evaluate the importance of financial markets in India, including their types, linkages with the economy, and integration with global financial markets.
- Remember the role of money and debt markets in India, including segments, participants, and different types of securities.

SYLLABUS OF DSC 17

Unit 1: Indian Financial System and major Institutions (12 hours)

Structure of Indian Financial System: An overview of the Indian financial system, major reforms in the last decade: Payment banks, GST, innovative remittance services, Insolvency and Bankruptcy code. Regulatory Institutions in India: RBI, SEBI, IRDA, PFRDA. Commercial Banking: Role of Banks, NPA, Risk Management in Banks. Universal Banking: need and importance, Core banking solution (CBS), NBFCs and its types; comparison between Banks and NBFCs.

Unit 2: Financial Markets in India (9 hours)

Introduction to Financial Markets in India: Role and Importance of Financial Markets, Types of Financial Markets: Money Market; Capital Market; Linkages Between Economy and Financial Markets, Integration of Indian Financial Markets with Global Financial Markets, Primary Market: Instruments, book building process (numerical). Merchant Bank: role and types, Mutual Fund: types of Mutual Funds and different types of schemes. Corporate Listings: Listing and Delisting of Corporate Stocks, Foreign Exchange Market: Introductory, only Conceptual.

Unit 3: Capital Market in India (12 hours)

Introduction to Stock Markets, Regional and Modern Stock Exchanges, International Stock Exchanges, Demutualization of exchanges, Indian Stock Indices and their construction. Major Instruments traded in stock markets: Equity Shares, Debentures,

Exchange Traded Funds. Trading of securities on a stock exchange; Selection of broker, capital and margin requirements of a broker, MTM and VAR Margins (with numerical), kinds of brokers, opening of an account to trade in securities, DEMAT System, placing an order for purchase/sale of shares, contract note and settlement of contracts, Commodity Markets – Structure.

Unit 4: Money Markets & Debt Markets in India (12 hours)

Money Market: Meaning, role and participants in money markets, Segments of money markets, Call Money Markets, Repos and reverse Repo concepts, Treasury Bill Markets, Certificate of Deposit and Commercial Paper (with numerical). Debt Market: Introduction and meaning, Primary Market for Corporate Securities in India: Issue of Corporate Securities, Secondary market for government/debt securities (NDS-OM), Auction process (with Numerical), Corporate Bonds vs. Government Bonds. Retail Participation in Money and Debt Market-RBI Retail Direct platform.

Essential/recommended Readings (latest edition of readings to be used)

1. Madura, J. (2008). *Financial Institutions and markets, Cengage learning EMEA*.
2. Kohn, M. G. (2004). *Financial Institutions and markets*. Oxford University Press.
3. Fabozzi, F. J., Modigliani, Franco, & Capital Markets. (2005). *Institutions and markets, prentice hall of India, New Delhi* (3rd ed)

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC CORE COURSE – 18: OPERATIONS MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Operations Management (DSC 18)	4	3	1	0	Class XII	None

Learning Objectives

- To familiarize learners with the fundamentals of Operations Management and develop awareness about its interface with other managerial functions.
- Enable learners to learn about production processes and associated quantitative techniques instrumental in the management of operations.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the importance of Operations Management to develop organizational competitiveness and processes.
- Appreciate the role of forecasting in the setting up of operations.
- Study about the factors that help to decide about the location and capacity of a production/service facility.
- Analyze the impact of changes in demand, lead time, order quantity on inventory levels
- Develop a forecasting model to cater to the unique requirement of an organization
- Develop an insight about the various options in relation to a production/service layout plan and techniques used therein.

SYLLABUS OF DSC 18

Unit 1: Introduction to Operations Management (12 hours)

Definition, need, key decisions in OM, Operations as key functional area in an organization; Operations Strategies: Definition, relevance and Process of strategy formulation. Lean production: Definition of lean production, Lean demand, Pull logic, waste in operations, 2-card Kanban Production Control system.

Unit 2: Forecasting and Inventory Management (12 hours)

Forecasting: Meaning, Significance and Limitations, types, qualitative (grass roots, market research and Delphi method) and quantitative approach (simple moving average method, weighted moving average and single exponential smoothing method), forecast error, MAD, Forecasting in relation to services. Inventory: Introduction, Types of Inventories, Costs Associated with Inventory, Selective Inventory control Techniques- ABC, VED, FNSD, XYZ; Inventory Model: Deterministic Models – Finite and Infinite Replenishment, Price Break Quantity Discount Models.

Unit 3: Scheduling and Layout Planning (12 hours)

Process Selection: Definition, Characteristics that influence the choice of alternative processes (volume and variety), Type of processes- job shop, batch, mass and continuous processes. Scheduling: Operation scheduling, Goals of short-term scheduling, Job sequencing (FCFS, SPT, EDD, LPT, CR) & Johnson's rule on two machines, Gantt charts, Processing n jobs through 3 machines, Processing n jobs through k machines. Layout planning, Benefits of good layout, importance, different types of layouts (Process, Product, Group technology and Fixed position layout). Assembly line balancing by using LOT rule.

Unit 4: Location and Capacity Planning (9 hours)

Facility Location: Objective, factors that influence location decision, Location evaluation methods – factor rating method, centre of gravity method, Analytical Hierarchical Process. Capacity planning: Definition, input and output measures of capacity; types of capacity planning over time horizon; Decision trees analysis for capacity planning.

Essential/recommended Readings (latest edition of readings to be used)

1. Mahadevan, B. (2015). *Operations management: Theory and practice*. Pearson Education India.
2. Jay, H. and Barry, R. (2017). *Operations Management: Sustainability and Supply Chain Management*, 12th ed. Pearson Education India.
3. Jacobs, F.R., Chase, R.B. & Ravi Shankar. (2018). *Operations and Supply Chain Management*, 14th ed. McGraw Hill Education India.
4. Swarup, K., Gupta, P. K. & Manmohan. (2010). *Operations Research*, 19th ed. Sultan Chand & Sons.
5. Kapoor, V.K. (2020). *Operations Research: Quantitative Techniques for Management*, 9th ed. Sultan Chand & Sons.
6. Sharma, J.K. (2017). *Operations Research: Theory and Applications*, 6th ed. Trinity
7. Russell, R. S., & Taylor, B. W. (2019). *Operations and supply chain management*, 10th ed. John Wiley & Sons.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - MARKETING (DSE-4)

DSE 4: INTEGRATED MARKETING COMMUNICATION

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Integrated Marketing Communication (DSE 4)	4	3	1	0	Class XII	Basics of marketing

Learning Objectives

- To equip the learners with knowledge about the nature, purpose and complex construction in the planning and execution of an effective Integrated Marketing Communications (IMC) program.
- To explore the learners about various tools of IMC and the importance of coordinating them for an effective marketing communications program.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the purpose and importance of IMC and Social and ethical aspects of IMC.
- Develop the creative aspects of advertising and media strategy.
- Analyse the concepts of the choice of different elements of IMC
- Evaluate the effectiveness of the promotional program, Social and Cultural consequences, Economic effects of advertising.

SYLLABUS OF DSE 4

Unit 1: Introduction to IMC and the Communications Process (9 Hours)

Evolution of IMC and reasons for its growth, promotional tools for IMC, IMC Planning Process, Role of IMC in Marketing Process, Communication Process; Traditional & Alternative Response Hierarchy models. Setting objectives for the IMC Program, Establishing and Allocation of Promotional budget. Social and ethical aspects of IMC.

Unit 2: Creative and Media Strategy (12 Hours)

The Creative Process, Inputs to the Creative Process, Advertising Appeals, Media planning and scheduling; Key factors influencing media planning; Media decisions: media class, media vehicle & media option; introduction to broadcast, print, support media; Digital and Social media marketing.

Unit 3: Others Tools of IMC (12 Hours)

Evaluating Sales Promotion, Direct Marketing, Interactive Marketing, Public Relations & Personal

Selling: Objectives and Types of Direct Marketing, Advantages and Disadvantages of Direct Marketing, Objectives of Interactive Media Marketing, Measures of Effectiveness on Internet, Advantages and Disadvantages of Internet, Growth of Sales Promotions, Types of Sales Promotions: Consumer and Trade Promotions, Process, Advantages and Disadvantages of Public Relations, Publicity: Advantages and Disadvantages, Nature, Advantages and Disadvantages of Personal Selling.

Unit 4: Measuring Effectiveness of the Promotional Program & Evaluating Social, Ethical and Economic Aspects (12 Hour)

Measuring Effectiveness: Arguments for and against, Advertising Research – What, When, Where & How, Testing Process. Advertising and Promotion Ethics, Advertising and Children, Social and Cultural Consequences – Stereotypes, Economic Effects of Advertising.

DISCIPLINE SPECIFIC ELECTIVE - MARKETING (DSE-5)

DSE 5: BRAND MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Brand Management (DSE 5)	4	3	1	0	Class XII	Basics of marketing

Learning Objectives

- To attain a comprehensive knowledge on the subject of brands, brand equity and brand management
- Develop understanding of design and implementation of marketing programs to build and manage brand equity.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the process and importance of brand management
- Define the main concepts and explain the purpose of branding
- Develop brand elements and brand associations to build brand equity.
- Design effective branding strategies for products/services.

SYLLABUS OF DSE 5

Unit 1: Introduction to Brand Management (12 Hours)

Brand –Meaning, Definition, Evolution of Brands, Functions of Brand for a consumer, Role of Brand- Advantages of a Brand, Brand Versus Product, Branding- Meaning, Creation of Brands through goods, services, people, organization, retail stores, places, online, entertainment, ideas. Branding Challenges and Opportunities, Brand Management – Meaning & Definition. Strategic Brand Management Process – Steps in Brand Management Process.

Unit 2: Developing Brand Equity (9 Hours)

Customer Based Brand Equity, Brand Equity: Meaning and Sources, Steps in Building Brands, Brand building blocks-Resonance, Judgments, Feelings, performance, imagery, salience- Brand Building Implications. Positioning, Dimensions of brand identity, Brand identity prism, Brand positioning – Meaning, Point of parity & Point of difference, Positioning guidelines Brand Value: Definition, Core Brand values, Brand mantras, Internal branding.

Unit 3: Developing Brand Elements (9 Hours)

Choosing Brand Elements to Build Brand Equity: Criteria for choosing brand elements, options & tactics for brand elements - Brand name, Naming guidelines, Naming procedure, Awareness, Brand Associations, Logos & Symbols & their benefits, Characters & Benefits, Slogans & jingles, Packaging. Designing Marketing Programs to build Brand Equity: New perspectives on Marketing, Product Strategy, Pricing Strategy and Channel Strategy. Leveraging Secondary Brand Associations to build Brand Equity: Conceptualising the leveraging Concept, Company, Country of Origin, Channels of Distribution, Co-Branding, Licensing, Celebrity Endorsements, Sporting, Cultural and Other Events.

Unit 4: Managing Brand Overtime (12 Hours)

Brand Extension: Meaning, Types, Needs, Advantages & Disadvantages. Consumer – brand relationships Understanding how consumers evaluate brand extensions, evaluating brand extension opportunities. Strategic alliances, brand portfolios, global branding: Geographic extension, sources of opportunities for global brand, single name to global brand, consumers & globalization, condition and brand repositioning/revitalization.

Suggestive Readings (latest edition of readings to be used)

1. Kapferer, J. (2012). *The New Strategic Brand Management: Advanced Insights and Strategic Thinking*. 5th edition. Kogan Page Publishers

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - MARKETING (DSE-6)

DSE 6: SALES AND DISTRIBUTION MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Sales and Distribution Management (DSE 6)	4	3	1	0	Class XII	Basics of marketing

Learning Objective

- To understand the evolution of sales management and its importance in modern day business.
- To understand the overall sales management process and various theories of selling.
- To understand actual means of distribution and it's management
- To understand and analyze the Logistics management

Learning Outcomes

On successful completion of the course the learner will be able to:

- Differentiate and implement different types of personal selling and selling skills.
- Explain the sales management process and its various stages.
- Design a customer-oriented distribution channel.
- Manage channel member behavior and resolve channel conflict

SYLLABUS OF DSE 6

Unit 1 **(9 Hours)**

Introduction to Sales Management: Evolution of sales management. Nature, role and importance. Types of personal selling. Types of selling, Selling skills and situations. Modern day sales activity. Emerging trends in sales management. Theories of Selling: AIDAS theory of selling, Right set of circumstances theory of selling, buying formula theory of selling, Behavioral equation theory of selling.

Unit 2 **(12 Hours)**

Sales management process (Selling process), Buyer seller dyads, Management of Sales Territory & Sales Quotas: Introduction, Sales territory, size of sales territory, allocation of sales territory, designing of sales territory. Introduction to sales quotas, procedures of setting quotas, types of sales quotas, methods and problems in setting sales quotas, sales control and analysis.

Unit 3 **(12 Hours)**

Distribution Management: Introduction, Distribution channels: why are they required, activities that a typical distribution channel performs, valuation enhancement through the distribution function, distribution channel strategy, distribution channel management. Designing customer-oriented channel, capturing customer requirement, conducting cost analysis, Case study.

Unit 4 **(9 Hours)**

Customer-Oriented Logistics Management – Managing channel member behaviour: Introduction, objectives of logistics, logistics planning, transportation decisions. Channel relationships, channel control, channel power, channel positioning, channel influence strategies, channel conflict, Case study.

Essential/recommended Readings (latest edition of readings to be used)

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - MARKETING (DSE-10)

DSE 10: INTERNATIONAL MARKETING

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
International Marketing (DSE 10)	4	3	1	0	Class XII	Basics of Marketing

Learning Objectives

- Identify and understand the various cultural and regional variables (and their degree of impact) and how they impact businesses in the short-term and long-term future; what companies can do to utilise these variables and mitigate their impact.
- Understand the nuances of international marketing related activities such as advertising, pricing, supply chain management, market entry, branding and customization etc.
- Anticipate changes in the operating environment of a business on a global level.
- Read, understand, relate and be able to utilise/implement the ideas of great thinkers and researchers in the field of global business, marketing and management.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Identify the key skills that a (good) business (international) manager should have.
- Articulate factors that promote business and business environments.
- Implement various tools and actions for a beneficial situation within a given operating (business) environment.
- Fundamentals of sustainable (profitable) business growth with focus on international expansion, operating in multiple markets, new business opportunities and market analysis.
- Articulate the various support systems that a business can use and access (governmental interventions and policies; operating market level advantages such as access to capital, quality and quantity of labour available; availability of land; size, purchasing power and buying behaviour of the target market; MNC level advantages; etc.)

SYLLABUS OF DSE 10

Unit 1 **(9 Hours)**

Introduction; Reasons behind international expansion; types of MNCs; Expatriates and Inpatriates; Stages of International Exposure; Global Marketing, Using Social Media tools.

Unit 2 **(12 Hours)**

National-level variables, regional trading blocs; Physical variables, Geographic distance, Grouping of industries in specific areas/regions, Environment specific impacts, Distribution of Natural Resources; Cultural Variables, Impact on doing business (Distance, Power, Decision Making, People Management, Delegation, Corruption, Quality Benchmarks Etc.), Gender biases, Festivals, Buying Behaviour; PESTEL; Porter's Diamond Model; Positioning; Protectionism and its impact on international trade.

Unit 3 **(12 Hours)**

Porter's Five Forces Model; Ghemawat's CAGE framework; Globalisation; Demographics and Segmentation; Assessing Market Potential, How markets behave, Selling in specific markets (Developed, Developing, Post-Communist); "Right" Market to enter and "Right" Time to enter; What (mis-selling, outdated products), Where, Why, and How are we selling; Customer needs (of the new/foreign market); Location of manufacturing facilities; Labelling and Packaging (Export and Retail); Selling to and in emerging markets; Concerns and issues

with available market analysis tools.

Unit 4 **(12 Hours)**

Strategic (and global) Alliances; Global level of competition; Product Development; E-Commerce and Changing International Marketing Paradigms; Supply Chain as a source of International Advantages; Managing International Sales (Channels and Logistics); International Advertising and Promotions; Pricing for international markets, Pricing wars (War Chests), Approaches – Full-cost v/s Variable, Skimming v/s Penetration (non-numeric), factors influencing pricing; Implementing a Global Marketing Strategy; Support Mechanisms for Exports and International Trade, Export Infrastructure and Assistance in India, ITPO; International Payment Methods, Finance and Raising Funds, Taxation and Tax Havens, Marine and Cargo Insurance. Managing Risks in International Trade.

Essential/recommended Readings (latest editions of readings to be used)

2. Joshi, Rakesh Mohan: International Marketing, Oxford University Press.

Suggested Readings (latest editions of readings to be used)

1. Keega, Warren J. (2010). *Global Marketing Management*. (15 edition). Prentice Hall India.
2. Muhlbache, Hans. (1999). *International Marketing-A Global Perspective*. (2 edition). Cengage Learning.
3. Varshney & Bhattacharya. (2015). *International Marketing Management*. Sultan Chand & Sons.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - MARKETING (DSE-11)

DSE 11: SUPPLY CHAIN MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Supply Chain Management (DSE 11)	4	3	1	0	Class XII	Basics of Marketing

Learning Objectives

- Explain the primary differences between logistics and supply chain management.
- Describe the key processes involved in supply chain management and their

interrelationships within individual companies and across the supply chain.

- Evaluate the management components of supply chain management, including procurement, production, transportation, and warehousing.
- Identify and analyze the tools and techniques useful in implementing supply chain management, such as demand forecasting, inventory management, and supplier relationship management.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Define supply chain management and its key activities.
- Define the competitive and supply chain strategies.
- Explain the role of supply chain in business operations and how to deal with challenges in it.
- Assess the effectiveness of different strategies for addressing supply chain challenges.
- Analyse the factors that influence supply chain performance.
- Develop a plan to integrate different components of supply chain.

SYLLABUS OF DSE 11

Unit 1: Introduction to Supply Chain Management. (9 Hours)

Basic concept, Transportations, Inventory, Warehousing, Managing logistics, Challenges in supply chain management, Trends in supply chain management, Impact of business environment on supply chain management.

Unit 2: Supply Chain Strategies (12 Hours)

Concepts and importance of a Supply Chain (SC), Key issues of Supply Chain Management, Competitive and SC strategies, achieving strategic fit.

Unit 3: Supply Chain Integration (12 Hours)

Dynamics of supply chain: Supply Chain Integration, Push-based, Pull-based and Push-Pull based supply chain, Demand Forecasting in a Supply Chain (CPFR Model), SCORE Model, Quality Control, Managing inventory in SC environment: Transportation in SC environment.

Unit 4: Strategic Alliances (12 Hours)

Strategic Alliances, Third party and fourth party logistics, Reverse Logistics, Retailer- Supplier partnerships (RSP),Contract Sharing, Supplier evaluation and selection, Use of best practices and Information Technology (IT) in Supply Chain Management.

Essential/recommended Readings (latest edition of readings to be used)

1. Ballou, R. H., & Srivastava, S. K. (2007). *Business Logistics/supply Chain Management: Planning, Organizing, and Controlling the Supply Chain*. Pearson Education India.
2. Chopra, S., & Meindl, P. (2016). *Supply Chain Management: Strategy, Planning, and Operation*.
3. Simchi-Levi, D., Kaminsky, P, Simchi-Levi, E., & Shankar, R.(2008). *Designing and Managing the Supply Chain.* Tata McGraw Hill, New Delhi.

4. Sahay, B.S. (2006), *International Journal of Physical Distribution & Logistics Management*, Vol. 36 No. 9.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - MARKETING (DSE-12)

DSE 12: PRODUCT MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Product Management (DSE 12)	4	3	1	0	Class XII	Basics of marketing

Learning Objectives

- Develop competencies required for managing products.
- Understanding of methods and iterative processes to build and deliver superior value to target users.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understanding marketing orientation of a firm, category environmental analysis, global factors affecting product management.
- Analyze the financial, competitive, and growth prospects for a sector.
- Gather and utilize customer insights to develop a thorough product strategy.
- Develop skills to lead product teams and inspire stakeholders.

SYLLABUS OF DSE 12

Unit 1: Introduction to Product Management (12 Hours)

Marketing organization - Product focused, Market focused, functionally focused; Global factors affecting product management and adapting marketing organizations. The Marketing planning process -Steps and components. Defining the competitive set, levels of market competition – form, category, generic, budget; Methods for determining competition. Category environmental analysis – Porter's five forces and PESTEL.

Unit 2: Competitor Analysis, Customer Analysis and Sales Forecasting (12 Hours)

Competitor Analysis – Various sources of information, creating a product features mix, assessing competitor's objectives and strategies, Competitor marketing strategy and differential advantage analysis; Customer analysis – understanding customers and segmentation analysis; Market Potential and Sales Forecasting – Overview, Methods of Estimating Market and Sales Potential,

Sales forecasting methods - Level of Accuracy Needed, Judgment-Based Methods, Customer-Based Methods, Sales Extrapolation Methods, Model Based Methods: Using Regression Models for Forecasting, Developing Regression Models.

Unit 3: Product Strategy, Positioning, and Pricing (12 Hours)

Developing the Product Strategy – Overview, elements, objectives and selection of product alternatives, Positioning – process and product core benefit recognition and communication; Adapting product strategy over the PLC; New Products; Pricing – Role of Marketing Strategy in Pricing, psychological aspects of pricing, Factors affecting price, Pricing tactics.

Unit 4: Integrated Marketing Communication and Marketing Metrics (9 Hours)

Integrated marketing communication – Objectives, budgets and evaluation; Channel Management – selection, types and monitoring; Marketing Metrics – Overview, Framework for Marketing Metrics, Measurement – Customer-Based Metrics, Product-Market Metrics, Financial Metrics, Marketing Mix Metric.

Essential/recommended Readings (latest edition of readings to be used)

1. Lehmann, D. R., Winer, R.S. Product Management. McGraw Hill Irwin.

Suggestive Readings (latest edition of readings to be used)

1. LeMay, M. Product management in practice: a real-world guide to the key connective role of the 21st century. O'Reilly Media, Inc.
2. Kotler, P. & Keller, K. L. Marketing Management, Pearson.
3. Kotler P, Armstrong G., Agnihotri P.Y & Ul Haq, E. Principles of Marketing - A South Asian Perspective, Pearson.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE – HUMAN RESOURCE MANAGEMENT (DSE-2)

DSE 2: RECRUITMENT AND SELECTION MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Recruitment and Selection Management (DSE 2)	4	3	1	0	Class XII	Basics of Management

Learning Objectives

- To equip the learners with knowledge of the role of HR in workforce planning and assessment, sources of recruitment and selection process.
- To familiarize learners with topics like the development of a qualified pool of candidates, contemporary trends, international recruitment and selection.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the theory, practice, principles and concepts of work, role of HR in workforce planning and assessment, sources and factors affecting recruitment.
- Understand the selection process, different types of tests in selection, types of interviews, biases in selection and negotiations during job offer.
- Analyse the fundamentals of international recruitment.
- Evaluate the contemporary issues in recruitment and selection like legal compliance and ethical considerations, e-recruitment and e-selection.

SYLLABUS OF DSE 2

Unit 1: Introduction to Recruitment (12 hours)

Work: Meaning, Evolution of Work Structure, Organizing and Logistics, Strategic Job Redesign, Role of HR in workforce planning and assessment, Recruitment: Concept, internal & external sources with benefits and limitations, Factors affecting recruitment, Designing external job posting.

Unit 2: Introduction to Selection (12 Hours)

Selection process, Types of tests in selection, concept of reliability and validity in selection tests Types of Interviews, Biases in selection of employees, Negotiations during Job Offer.

Unit 3: International approach to Recruitment and Selection (12 Hours)

International Recruitment; International staffing choice, different approaches to multinational staffing decisions; Types of international assignments; Selection criteria and techniques;

Successful expatriation, Causes of expatriate failure, female expatriation, Compensation of Expatriates.

Unit 4: Contemporary, Legal and Ethical Issues (9 Hours)

Contemporary issues in Recruitment and Selection, Legal Compliance and Ethical Considerations, Retention Strategies, E-recruitment and E-selection

Essential/recommended Readings (latest edition of readings to be used)

1. O'Meara, B., & Petzall, S. (2013). *Handbook of Strategic Recruitment and Selection: A Systems Approach.* Emerald Group Publishing.
2. Picardi, C. A. (2019). *Recruitment and Selection: Strategies for Workforce Planning & Assessment*. Sage Publications.
3. Nilanjan, S. & Bhattacharya, M. (2010). *International Human Resource Management.* Excel Books.
4. Dowling, P. J., Festing, M., & Engle, A. D. (2017). *International Human Resource Management*. Cengage Learning.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE – HUMAN RESOURCE MANAGEMENT (DSE-3)

DSE 3: WORKFORCE DIVERSITY

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Workforce Diversity (DSE 3)	4	3	1	0	Class X11	Basics of Organisational Behaviour

Learning Objective

- To explore the concepts of workforce diversity and to enable learners to recognise its critical issues.
- To familiarize learners with strategies to manage diversity, relation between workforce diversity and human resource management.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the core concepts of workforce diversity and its significance.
- Understand how to develop strategies to manage diversity through training and mentoring and other programs.

- Analyze the fundamentals of global workforce diversity and ethical and legal issues in managing diversity.
- Evaluate the relationship between workforce diversity and various functions of human resource management.

SYLLABUS OF DSE 3

Unit 1: Introduction of Workforce Diversity (12 hours)

Workforce diversity – Meaning, features, significance; Workforce diversity potential pros & cons, Managing Diversity, Reverse Discrimination, Raising cross cultural consciousness.

Unit 2: Strategies to Manage Diversity (9 hours)

Workplace Inclusion, Diversity through training and mentoring, Role of technology in Diversity, Diversity management programs, Leadership's role in leveraging diversity.

Unit 3: Global Workforce Diversity (12 hours)

Diversity and Multiculturalism, Leveraging diversity in global virtual teams, Developing global leaders: Utilising the intercultural effectiveness competencies model; Ethical and legal issues in managing diversity.

Unit 4: Workforce Diversity and HRM Functions (12 hours)

Recruitment and retaining diverse workforce, Diversity and performance management, Diversity and Work-life balance, Workforce diversity as a determinant of sustainable competitive advantage.

Essential/recommended Readings (latest edition of readings to be used)

1. Dessler, G. (2013). *Fundamentals of Human Resource Management.* Pearson.
2. Scott, C. L., & Byrd, M. Y. (2012). *Handbook of Research on Workforce Diversity in a Global Society: Technologies and Concepts.* Business Science Reference/IGI Global.
3. Kossek, E. E., & Lobel, A. (1996). *Managing diversity.* Cambridge, Massachusetts: Blackwell Publishers.
4. Kossek, E. E., Lobel, S. A., & Brown, J. (2006). *Human resource strategies to manage workforce diversity.* Handbook of workplace diversity, 53-74.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE – HUMAN RESOURCE MANAGEMENT (DSE-4)

DSE 4: NEGOTIATIONS

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Negotiations (DSE 4)	4	3	1	0	Class X11	Basics of Organisational Behaviour

Learning Objective

- To provide insight into how to negotiate effectively by applying appropriate strategies and tactics to different negotiation situations.
- To facilitate the understanding of the numerous dynamics involved in the process of negotiation.

Learning Outcomes:

On successful completion of the course the learner will be able to:

- Understand the nature, process, types and tactics of negotiation.
- Understand and practice the communication skills and persuasion tactics necessary for effective negotiation, finding and using power in negotiation.
- Apply negotiation strategies to achieve goals without jeopardizing relationships.
- Apply negotiation concepts to build competence in handling multiparty negotiation, third-party negotiation and resolving impasse in negotiations.

SYLLABUS OF DSE 4

Unit 1: Negotiation Meaning and Styles (12 Hours)

Introduction; Nature and Scope; Foundations of Negotiation: Conflict and Its Management, Conflict Management through Negotiation, Fundamentals of Negotiation Preparations for Negotiation; Negotiation Process and Planning: Four Stages of Negotiation, PRAM Model of Negotiation, Key Steps in Planning for Negotiation; Distributive Negotiation: Bargaining situation, Positions Taken during Negotiation, Closing the Deal, Integrative Negotiation: Overview, Process, Factors for Successful Integrative Negotiation; Negotiation Tactics and Counter Tactics.

Unit 2: Negotiation Styles and Skills (12 Hours)

Negotiation Styles: Meaning, Types, Developing Effective Negotiating Style; Communication in Negotiation: Defining Communication, Kinesthetic Communication, Decoding Communication for Negotiation; Persuasion in Negotiations: Theory and Tactics; Perception and Cognition: Perceptual Distortion, Cognitive Biases in Negotiation, Managing misperception and cognitive

biases in negotiation; Finding and Using Power in Negotiation: Importance, Definition, Sources of Power; Negotiation Ethics.

Unit 3: Relationships in Negotiation (12 Hours)

Challenges, Role of Trust, Reputation and Justice in managing Negotiation within Relationships; Repairing a Relationship; Influence of Culture and Gender on Negotiations: Meaning of Culture, Norms and Values, Negotiation Issues Sensitive to Culture, Culturally Responsive Negotiation Strategies; Gender Differences in Negotiation; Negotiation Via Information Technology: Place – Time Model of Social Interaction, Effects on Social Behavior, Strategies for enhancing Technology– Mediated Negotiations.

Unit 4: Multiple Parties, Groups and Teams in Negotiation (9 Hours)

Analysing Multiparty Negotiation, Coalitions, Principal-Agent Negotiations, Constituent Relationships, Team Negotiation, Intergroup Negotiation; Third-party Negotiation: Conciliation, Mediation, Arbitration, Collective Bargaining, Qualities of a Mediator; Resolving Impasse in Negotiations: Barriers in Negotiation, Causes and Sources of Impasses, Overcoming Barriers, Overcoming Impasses, Alternative Dispute Resolution (ADR).

Essential/recommended Readings (latest edition of readings to be used)

1. Lewicki, R. J., Barry, B., & Saunders, D. M. (2016). *Essentials of negotiation.* New York: McGraw-Hill Education.
2. Rai, H. (2018). *Negotiation.* McGraw Hill Education.
3. Thompson, L. L. (2012). *The mind and heart of the negotiator.* Pearson.
4. Korobkin, R. (2014). *Negotiation Theory and Strategy,* Aspen Publishing.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE – HUMAN RESOURCE MANAGEMENT (DSE-9)

DSE 9: INTERNATIONAL HUMAN RESOURCE MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
International Human Resource Management (DSE 9)	4	3	1	0	Class X11	Basics of Human Resource Management

Learning Objectives

- To explore the concepts and techniques of the essential elements of International HRM and to enable the learners to recognise its critical issues.

- To analyze HRM concerns in the cross-cultural scenario.

Learning Outcomes:
On successful completion of the course the learner will be able to:

- Understand the impact of culture on Human Resource Management,how HRM differs across cultures and comprehend issues and challenges pertaining to International HRM.
- Understand how International HR managers can develop competencies in dealing with cross-cultural issues.
- Analyse the fundamentals of International HRM planning and staffing.
- Analyse the key elements of International HR performance appraisal and selection.
- Evaluate the functional role of HRM in International HR training and development and industrial relations.

SYLLABUS DSE 9

Unit 1: Cultural issues in International HRM (9 Hours)

Introduction to concepts of Culture and Nationality; Impact of culture on International Business Environment; Hofstede's approach; cross cultural differences at work; strategies to managing workforce diversity; Diversity management programme; International Human Resource Management: Difference between domestic and international HRM.

Unit 2: International HRM Planning and Staffing (12 Hours)

International Workforce planning and staffing: Issues in supply of international human resources; International Recruitment; International staffing choice, different approaches to multinational staffing decisions; Types of international assignments; Selection criteria and techniques; Successful expatriation, Causes of expatriate failure, female expatriation.

Unit 3: International HR Performance Appraisal and Selection (12 Hours)

Performance appraisal: Criteria for performance appraisal, Variables that influence expatriate performance appraisal. Issues and challenges in international performance management; Compensation: Objectives of expatriate compensation plan, Factors affecting international compensation, Approaches to expatriate compensation: Going rate approach, Balance sheet approach, Cultural impact on compensation policy.

Unit 4: International HR Training and Development and Industrial Relations (12 Hours)

Training & development of international staff: Areas of global training, cross cultural training, Diversity training. Cross cultural team building; Repatriation: Process, Problems of repatriation; Cross border Mergers and Acquisitions: HRM perspective; International industrial relations: Key Players in industrial relations, Labour unions and MNCs, Employee relations in MNCs, Response of labour unions to MNCs.

Essential/recommended Reading (latest edition of readings to be used)

1. Nilanjan, S. & Bhattacharya, M. (2010). *International Human Resource Management.* Excel Books.
2. Dowling, P. J., Festing, M., & Engle, A. D. (2017). *International Human Resource*

Management. Cengage Learning.

4. Briscoe, D., Briscoe, D.R., Schuler, R.S., & Claus, L. (2008). *International Human Resource Management: Policies and practices for multinational enterprises*. Routledge.
5. Edwards, T., & Rees, C. (2006). *International human resource management: Globalization, national systems and multinational companies.* Pearson Education.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE – HUMAN RESOURCE MANAGEMENT (DSE-10)

DSE 10: COMPENSATION MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Compensation Management (DSE 10)	4	3	1	0	Class X11	NO

Learning Objectives

- To familiarize learners about concepts of compensation management
- To use these concepts in attracting, retaining and motivating employees for higher performance.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Comprehend the components of executive compensation and understand how jobs are priced to establish compensation levels.
- Understand incentive systems and non-economic rewards.
- Understand International aspects of Compensation
- Evaluate the implications of components of compensation on performance of the employees.

SYLLABUS DSE 10

Unit 1 **(12 hours)**

Conceptual dimensions of Wage, Compensation, and Rewards; Labour Market, Intra-Inter Industry differences in wages and compensation; Job Evaluation: Methods and Techniques, Forms of Pay, Pay models, surveying market pay and compensation practices, designing the survey, sources of third party data, Job pricing, Determining the pay structure, determining rates

of pay; Individual and Group Incentive, team-based pay: kinds of teams, skills, knowledge and competency based pay, sales incentive plans: salary plus commission, special sales incentives plan.

Unit 2 **(12 hours)**

Company Wage Policy: Wage Components, Wage Determination, Pay Grades, Wage Surveys, Modern trends in compensation - from wage and salary to cost to company concept. Wages in India: Minimum wage, fair wage and living wage; Methods of state regulation of wages; Wage differentials & national wage policy, Regulating payment of wages, wage boards, Pay commissions, dearness allowances, linking wages with productivity.

Unit 3 **(12 hours)**

Benefits and Services: Benefit Administration , Employee Benefits and Employee Services, Funding Benefits through VEBA, Costing benefits, Flexible Compensation Benefits/Benefits plan, Pay Delivery Administration: Budget process, administration of pay, other administrative issues, due process, statutory benefits including occupational health care, employee welfare and retirement benefits; executive compensation: executive golden parachutes, International compensation managing variations, Expatriate Pay.

Unit 4 **(9 hours)**

Employee Benefits: Discretionary and Statutory; Legal aspects of wage and benefits; Role of Trade Union and Collective Bargaining; Recent trends in rewards, benefits, and services: Equity Stock Options, Investment advisory, Tax planning, Insurance, Wellness, Short and long term incentives: premium and differentials, qualified deferred compensation arrangements: social security, pension plans, profit sharing, Employee Recognition and Motivation.

Essential/recommended Readings (latest edition of readings to be used)

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE – HUMAN RESOURCE MANAGEMENT (DSE-11)

DSE 11: HRD SYSTEMS AND STRATEGIES

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
HRD : Systems and Strategies (DSE 11)	4	3	1	0	Class X11	Basics of Human Resource Management

Learning Objectives

- To equip learners with knowledge of HRD and HRD practices which can develop and improve an Organization's systems and strategies leading to an effective HRD climate.
- To familiarize learners with topics like the HRD process, various approaches to HRD and career management and development.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the relationship between HRM and HRD, areas of training, education and development.
- Develop an understanding of the HRD interventions and HRD diversity management.
- Apply the various approaches for motivation in HRD.
- Analyse the high work performance work system, balanced score cards and integrating HRD with technology.

SYLLABUS OF DSE 11

Unit 1: Human Resource Development (HRD) (12 hours)

Concept; Relationship between human resource management and human resource development; Roles and competencies of HRD professionals; HRD Matrix; HRD as a Total System; HRD areas of Training, Education and Development.

Unit 2: HRD Process (12 hours)

Assessing need for HRD; Designing and developing effective HRD programs; Implementing HRD programs; Evaluating HRD programs; HRD interventions: Integrated Human Resource Development systems, Staffing for HRD; HRD Audit; HRD and diversity management; HRD Climate.

Unit 3: Approaches to HRD (12 hours)

Leadership development; Action learning; Assessment Centers; Motivation approaches for HRD; Industrial relations and HRD: role of Trade Unions.

Unit 4: Career Management and Development (9 hours)

Coaching and mentoring; Employee coaching, mentoring and counselling; Competency mapping;

High Performance Work Systems; Balanced Scorecard; Integrating HRD with technology.

DISCIPLINE SPECIFIC ELECTIVE – HUMAN RESOURCE MANAGEMENT (DSE-12)

DSE 12: ORGANISATIONAL CHANGE AND DEVELOPMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
Organisational Change and Development (DSE 12)	4	3	1	0	Class XII	Basics of Organizational Behaviour and Human Resource Management

Learning Objectives

- To familiarize the learners with fundamentals of organisational change and change processes.
- To acquaint learners with concepts of organisational development and various

interventions for an effective organisational development process.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the Management of Organizational Change, types of change, resistance to change, various models of change.
- Apply the concept of OD, relevance of OD for managers.
- Analyse the process of OD and comprehensive OD interventions.
- Evaluate the types and methods of evaluating OD intervention, emerging trends in OD.

SYLLABUS OF DSE 12

Unit 1: Change Process and Models (12 hours)

Overview of Organisational Change, Strategies for change Types of Changes: internal and external, Model of Change Levin's change model, Action research model, Positive model, Systems model, Action Research as a Process, Resistance to Change, Overcoming resistance to change.

Unit 2: Organisational Development (12 hours)

Organisational Development (OD): Introduction, Meaning and Definition, History of OD, Relevance of Organisational Development for managers, Assumptions of OD.

Unit 3: Process of OD and OD Interventions (15 hours)

Process of OD, Components of OD program, OD program phases, Making an Entry, Developing Contract, Launch, Situational Evaluation, Closure. OD Interventions: An overview; Classification of OD Interventions: Team Interventions, Inter group and third-party peacemaking interventions, Comprehensive OD interventions, Structural Interventions.

Unit 4: Evaluating OD Interventions (6 hours)

Evaluation, Types of Evaluation, Methods of Evaluating Interventions. Future of OD: Organisational Development and Globalization, Emerging Trends in OD.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE -FINANCE (DSE-4)

DSE 4: MERGERS, ACQUISITIONS AND CORPORATE RESTRUCTURING

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Mergers Acquisitions and Corporate Restructuring (DSE 4)	4	3	1	0	1st year Undergraduate	Basics of Accounting and Analysis

Learning Objectives

- This course is designed to provide an understanding of the corporate restructuring, mergers and acquisitions with the basic methods of valuation, methods of payment and financing options at global level.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the concept and importance of corporate restructuring for growth.
- Recognize opportunities for creating value through Mergers and Acquisitions.
- Illustrate and apply methods used in the valuation of a firm for M&A analysis.
- Understand the legal and regulatory framework for Mergers and Acquisitions.

SYLLABUS OF DSE 4

Unit I: Corporate Restructuring – An Overview (11 Hours)

Concept and importance of corporate restructuring, various forms of restructuring: joint ventures (types), Strategic alliance (types), Merger (types), Acquisition (types), Consolidation, Divestiture, Demerger (Spin-off, Split-up, Split-off), Equity carve-out, Management buyout, Leveraged buyout, Buyback of securities, ESOP.

Unit II: Merger & Acquisition (12 Hour)

Motives behind M&A, theories of M&A, process of M&A. Fast track merger. Cross border M&A concept, benefits & difficulties. Due diligence process. Methods of payment and financing options in M&A. Takeover defense tactics. Reasons for failure of M&A.

Unit III: Deal Valuation and Evaluation (11 Hour)

Methods of valuation; cash flow approaches, economic value added (EVA) (with numerical), sensitivity analysis (with numerical), Valuation for slump sale, valuation of synergy (with numerical), cost-benefit analysis and swap ratio determination (with numerical).

Unit IV: Legal and Regulatory Framework of M&A (11 Hour)

Provisions of Companies Act 2013, SEBI Takeover Code 2011, Provisions of Competition Act 2002.

Essential/recommended Readings (latest edition of the readings to be used)

1. Weston, F., Chung, Kwang S. and Siu, Jon A. (1998): *Takeovers, Restructuring and Corporate Governance*. Pearson Education.
2. Gupta, M. (2010). *Contemporary Issues in Mergers and Acquisitions*. Himalaya Publishing.
3. Sundarsanam. (2006). *Creating Value from Mergers and Acquisitions* (1st edition). Pearson Education.
4. Ramanujan. S. (1999). *Mergers: The New Dimensions for Corporate Restructuring*. McGraw Hill.
5. Narayankar, R. (2013). *Merger and Acquisitions Corporate Restructuring, Strategy and Practices* (2nd edition). International Book House Pvt. Ltd.

DISCIPLINE SPECIFIC ELECTIVE -FINANCE (DSE-5)

DSE 5: INVESTMENT BANKING AND FINANCIAL SERVICES

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Investment Banking and Financial Services (DSE 5)	4	3	1	0	Class XII	Basics of Accounting and Finance

Learning Objectives

- To understand the different aspects of Investment banking and financial services.
- To acquaint the learners about Issue Management of stocks in primary market and role of secondary market and it process
- To Understand the concept of Leasing, Hire Purchase, Factoring and Forfaiting, Insurance, Credit Rating, Securitization and Venture Capital Financing, Mergers and acquisition
- To know the guidelines of regulatory bodies like IRDA,SEBI on issue management and insurance.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand the importance and relevance of Investment Bankers in any Financial System.
- Evaluate the entire process of raising funds from primary markets along with the concerned regulations applicable in India.
- Remember and use the various financial services available in financial markets particularly in India along with the latest innovations and technological integration in the field of finance.
- Apply the role and functions of Investment bankers present under the legal framework of SEBI.

SYLLABUS OF DSE 5

Unit I: Introduction to Investment Banking (11 Hours)

Introduction: An Overview of Indian Financial System, Investment Banking in India, Recent Developments and Challenges ahead, Institutional structure and Functions of Investment Banking; SEBI guidelines for Merchant Bankers, Registration, obligations and responsibilities of Lead Managers.

Unit II: Issue Management (11 Hours)

Issue Management: Public Issue, classification of companies, eligibility, issue pricing, promoter's contribution, minimum public offer, prospectus, allotment, preferential allotment, private placement, Book Building process; Green Shoe Option; Right Issue: promoter's contribution, minimum subscription, Bought out Deals, Post issue work & obligations, Investor protection, Broker, sub broker and underwriters.

Unit III: Financial Services 1 (12 Hours)

Leasing: Concepts of leasing, types of leasing, financial & operating lease, direct lease and sales & lease back, advantages and limitations of leasing, Lease rental determination; Finance lease evaluation problems from Lessee's angle. Hire Purchase: Interest & Instalment, difference between Hire Purchase & Leasing, Choice criteria between Leasing and Hire Purchase, numerical problems on of Hire purchase for decision making. Factoring and Forfaiting and its arrangement, Housing Finance: Meaning and rise of housing finance in India, floating vs. fixed rate.

Unit IV: Financial Services 2 (11 Hours)

Venture Capital: Concept, history and evolution of VC, the venture investment process, various steps in venture financing, incubation financing. Securitization: Concept and Process, Credit Enhancement parties to a Securitization Transaction, Instruments of Securitization, Types of Securities, Securitization in India. Credit Rating Agencies: Role and Mechanism, Private Equity. Mergers and Acquisitions – Introduction of mergers and acquisitions, benefits of mergers, Role of Investment bankers in merger, procedure and theories of mergers, acquisitions and takeovers in India, anti-takeover strategies.

Suggestive Readings (latest edition of readings to be used)

1. Verma, J. C. (1996). *Bharat's manual of merchant banking: Concept, practices and procedures with SEBI clarifications*. Bharat Law House.
2. Sriram, K. *Hand book of leasing, hire purchase and factoring*. ICFAI.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time

DISCIPLINE SPECIFIC ELECTIVE -FINANCE (DSE-6)

DSE 6: EARNINGS MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Earnings Management (DSE 6)	4	3	1	0	Class XII	Basics of Accounting

Learning Objectives

To equip the learners with the analytical skills, and competencies to address earnings management issues in organisations.

To acquaint the learners with the core concepts of accounting analytics and via hands-on exercises, build skills and competencies around the management, analysis and representation of data.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Remember the analysis of a company to identify the sources of its competitive advantage (or red flags of potential trouble), and then use that information to forecast its future financial statements.
- Understand the process of earnings management and get a more accurate picture of earnings, so that they can catch the culprits of manipulated financial reporting.
- Apply the knowledge of a very strong tool that will help to red flag the financial statements that may have been manipulated by the managers.
- Understand and Analyze Non-Financial Metrics to set performance targets for optimal financial performance.

SYLLABUS OF DSE 6

Unit I: Ratios and Forecasting (11 Hours)

Review financial statements and sources of financial statement information. The company's strategy and business model. Ratio analysis – short term solvency ratios, long term solvency ratios, turnover ratios and profitability ratios (Historical ratio analysis of real companies using Excel). Du-Pont analysis. How to use all the ratios, to forecast future financial statements? Accounting based valuation.

Unit II: Earnings Management (12 Hours)

Overview of earnings management: Means, motive, opportunity, how managers actually make their earnings look better, their incentives for manipulating earnings, and how they get away with it. Revenue recognition red flags: revenue before cash collection. Revenue recognition red flags: revenue after cash collection. Expense recognition red flags: capitalizing vs. expensing. Expense recognition red flags: Reserve Accounts and write-offs.

Unit III: Big Data and Prediction Models (11 Hours)

Overview: Big Data and Prediction Models. Discretionary Accruals Models: Model the Non-Cash portion of Earnings or Accruals. Discretionary expenditure Models: Model the Cash Portion of Earnings. Fraud Prediction Models and Benford's Law.

Unit IV: Non-Financial Metrics and Financial Performance (11 Hours)

Introduction**:** Connecting numbers to non-financial performance measures. Linking non-financial metrics to financial performance: Overview and steps. Targets setting, incorporation of analysis results in financial models and how to use analytics to choose action plans.

Essential/recommended Readings (latest edition of readings will be used)

1. Diri, M.E. (2017). *Introduction to Earnings Management.* Springer.
2. Richardson, V.J., Teeter, R.A., Terrel, K.L. and Mohapatra, P.S. (2020). *Data Analytics for Accounting.* 2nd Edition, McGraw Hill..
3. Prince, J.T. and Bose, A. (2020). *Predictive Analytics for Business Strategy – Reasoning from Data to Actionable Knowledge*. 1st Ed., McGraw Hill

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Business Analysis and Valuation (DSE 9)	4	3	1	0	Class XII	Basic knowledge of accounting and Finance

Learning Objectives

- This Paper will enable the learners to analyze the health of a company through their annual reports, through management quality analysis, and will equip them to understand what an asset is worth and what determines that value.
- Learners will understand the issues and challenges faced during the valuation of assets especially in conditions of uncertainties.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Remember the various elements of the Income statement and Balance sheet.
- Understand the importance and relevance of the Annual Report of a Company.
- Apply both qualitative (beyond balance sheet) and quantitative information available in the annual reports for determining the financial health of the company, Banks and NBFC.
- Analyze the various methods of Equity and Firm valuations both in certain and risky conditions.
- Evaluate the practical application of different valuation models in valuing equity and firm through modelling of these methods using excel.

SYLLABUS DSE 9

Unit 1: Analysis of Corporate Financial Statements (11 Hours)

Income statements and Balance sheets analysis through Ratio, Du-Pont analysis. How to read the Annual report of a company to evaluate the financial soundness of the company? Financial statements analysis of manufacturing, service sector (Using Excel). Beyond Balance Sheet Analysis: What does the company do? Who are its promoters? What are their backgrounds? What do they manufacture (in case of service company which services they offer)? Who are the company's clients or end- users? Who are their competitors? Who are the major shareholders of the company? Do they plan to launch any new products/service? Do they plan to expand to different countries? What is the revenue mix? Which product sells the most? Do they operate under a heavy regulatory environment?

Unit 2: Introduction and Approaches of Valuation (11 Hours)

Introduction to Valuation: Philosophical Basis for Valuation, Generalities about Valuation, Role of Valuation. Approaches to Valuation: Discounted Cash Flow Valuation – basis for DCF, categorization of DCF models, Applicability and Limitations of DCF models. Relative Valuation – basis for approach, categorization of relative valuation models, applicability and limitations of multiples.

Unit 3: Dividend Discount Model and Discounted Cash Flow Valuations (12 Hours)

Estimating Discount Rates – Cost of Equity and Cost of Capital. Betas: Historical Market Betas, Fundamental Betas, Bottom-Up Betas, Accounting Betas, Unlevered Beta and Levered Beta. Dividend Discount Models (DDM): Two-Stage and Three Stage Dividend Discount Model.

Issues in using the Dividend Discount Model. Free Cash Flow to Equity (FCFE) Discount Models: Free Cash Flows to Equity, FCFE Valuation Models – Constant Growth, Two Stage FCFE Model. FCFE Valuation Vs. Dividend Discount Model Valuation. Firm Valuation: Free Cash Flow to the Firm (FCFF), Firm Valuation Approaches: The Cost of Capital Approach, The Adjusted Present Value (APV) Approach, Cost of Capital Vs. APV Valuation. Applied Valuation of a Company using Excel.

Unit 4: Relative Valuation and Multiples (11 Hours)

Relative Valuation: Concept, Reasons for popularity and potential pitfalls. Standardized Values and Multiples (brief overview) – Earnings Multiples, Book Value Multiples, Revenue Multiples, and Sector-specific Multiples. Basic Steps to using Multiples. Select Multiples – Price-Earnings (PE) Ratio, PEG Ratio, Price to Book Ratio, Enterprise Value to EBITDA Multiple, Enterprise Value/Sales, Enterprise Value/Book Value, Tobin's Q. Reconciling Relative and Discounted Cash Flow Valuation.

Essential/recommended Readings (Latest editions of readings to be used)

1. Foster, George Financial Statement Analysis, Pearson Education Pvt Ltd.
2. Damodaran, A. Damodaran on Valuation, Security Analysis for investment and Corporate Finance (2nd ed.). Wiley India Pvt. Ltd.
3. Damodaran, Investment Valuation, Tools and Techniques for determining the value of any asset, 3rd Edition, Wiley India Pvt. Ltd.

Suggestive Readings (latest edition of readings to be used)

1. K. G., CA, & Sehrawat, N. K (2018). Handbook on Valuation- Concept & Cases. New Delhi, Bharat Law House Pvt. Ltd,
2. Damodaran, Corporate Finance (2000) – Theory and Practical, 2nd Edition, Wiley India Pvt. Ltd.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE -FINANCE (DSE-10)

DSE 10: ADVANCE DERIVATIVES

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Advance Derivatives (DSE 10)	4	3	1	0	Class XII	Basics of options, swaps, interest rates and cryptocurrencies

Learning Objectives

The course will help the learner to:

- Learn how to calculate and apply different options Greeks (delta, gamma, rho, theta, and Vega) for stocks and currencies, and how to use Delta and Gamma hedging techniques.
- Understand the concept of swaps, interest rate futures, and credit default swaps, their valuation, and their use in managing risk.
- Get acquainted with exotic options and their various types, such as gap options, barrier options, and Asian options, among others.
- Explore cryptocurrencies, including Bitcoin, Ethereum, EOS, Litecoin, and Ripple, and their futures and options contract specifications, as well as SWAP contracts.
- Gain knowledge of cryptography and its role in cryptocurrencies, and learn how to calculate and apply BTC and ETH options.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Analyze and evaluate the risk characteristics of various financial instruments, including stock options, currency options, swaps, interest rate futures, and exotic options.
- Apply knowledge of Greeks (delta, gamma, rho, theta, and Vega) to make informed decisions on option pricing, hedging, and portfolio management.
- Create and implement strategies for delta hedging, gamma hedging, and making a portfolio delta/gamma neutral.
- Evaluate the value and risk of nonstandard American options, gap options, forward start options, cliquet options, compound options, chooser options, barrier options, binary options, lookback options, shout options, Asian options, options to exchange one asset for another, and basket options.
- Analyze and evaluate the risks and benefits of investing in cryptocurrencies, including Bitcoin, Ethereum, EOS, Litecoin, Bitcoin Cash, and Ripple, and apply knowledge of crypto futures and options to make informed decisions.

SYLLABUS OF DSE 10

Unit 1: Greeks (11 Hours)

Calculation of delta, gamma, rho, theta and Vega for stock options (with and without dividend) and currency options. Relationship and comparison among stock Greeks. Delta Hedging, Gamma Hedging. Making a portfolio Delta Neutral, Gamma Neutral, Delta positive Gamma Neutral and Delta positive Gamma Neutral.

Unit 2: Swaps & Interest Rate Futures (11 Hours)

Introduction to Swaps, Interest rate swaps, currency swaps, cross-currency swaps. Understanding Credit default swaps (CDS), Valuation of CDS. CDS: Forwards and Options. Interest rate Futures, Interest rate cap and floor, FRA.

Unit 3: Exotic Options (11 Hours)

Nonstandard American options, Gap options, Forward start options, Cliquet options, Compound options, Chooser options, Barrier options, Binary options, Lookback options, Shout options, Asian options, Options to exchange one asset for another, Basket options.

Unit 4: Cryptocurrencies **(12 Hours)**

Introduction to cryptography & crypto currencies. Introduction of Bitcoin (BTC), Ethereum coin (ETH), Electro-Optical System coin (EOS), Litecoin (LTC), Bitcoin Cash (BCH), Ripple (XRP). Futures Contract Specification: BTC, ETH, EOS, LTC, BCH, XRP. Understanding of these coins with USDT. SWAP contract of BTC & ETH. Introduction and calculation of BTC & ETH options.

Essential/recommended Readings (latest edition of readings to be used)

1. Hull, J. C. (2018). Options, futures, and other derivatives. Pearson Education Limited.
2. Fabozzi, F. J. (Ed.). (2016). Handbook of finance, financial markets and instruments. John Wiley & Sons.
3. Haferkorn, M., Zimmermann, K. F., & Grothe, O. (2018). Value drivers of cryptocurrency: Evidence from bitcoin. Economics Letters, 163, 6-8.
4. Wystup, U. (2016). FX options and structured products. John Wiley & Sons.

Suggestive Readings (latest edition of readings to be used)

1. Cryptocurrency Prices | Cryptocurrency List | Market Cap | OKX
2. Buy/Sell Bitcoin, Ether and Altcoins | Cryptocurrency Exchange | Binance
3. Bitcoin and Cryptocurrency Exchange | Huobi Global
4. Jurgen Franke, Wolfgang Hardle and Christian Hafner. Introduction to Statistics of Financial Markets.
5. R. Madhumathi, M. Ranganatham. Derivatives and risk management (1st ed.) Redhead,K.
6. Financial Derivatives – An introduction to futures, forwards, options, swaps. Prentice Hall of India
7. McDonald, Derivatives Markets, (latest ed.), Pearson.
8. Robert Reitano, 2010, Introduction to Quantitative Finance, MIT Press.
9. Chance, 2003, Analysis of Derivatives for the CFA Program.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE -FINANCE (DSE-11)

DSE 11: FINANCIAL ECONOMETRICS

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		

Financial Econometrics DSE-11	**4**	**3**	**1**	**0**	**Class XII**	**Basic knowledge of statistics**

Learning Objectives

- Understand the statistical properties of financial returns, including their distribution, time dependency, and linear dependency across asset returns.
- Develop knowledge of univariate time series analysis, including the Lag operator, ARMA processes, and the Box-Jenkins approach.
- Gain proficiency in modeling volatility using conditional heteroscedastic models, such as ARCH and GARCH models, and forecasting with GARCH models.
- Learn multivariate GARCH models, including the VECH model, diagonal VECH model, and BEKK model, and estimation of a multivariate model.
- Acquire knowledge of vector autoregressive models, Granger causality tests, and Johansen cointegration tests and their hypothesis testing methods.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Analyze the statistical properties of financial returns and evaluate their distribution, time dependency, and linear dependency across assets using knowledge and comprehension skills.
- Create and apply univariate time series models, including AR, MA, and ARMA processes, using synthesis and evaluation skills to forecast financial returns.
- Develop and estimate conditional heteroscedastic models, such as ARCH and GARCH models, using analysis and evaluation skills to model and forecast volatility.
- Construct and evaluate multivariate GARCH models, including VECH, Diagonal VECH, and BEKK models, using synthesis and evaluation skills to model volatility and correlations.
- Evaluate and apply advanced econometric techniques, including VAR, GCT, and JCT, using analysis and evaluation skills to test hypotheses and model complex relationships in financial time series data.

SYLLABUS OF DSE 11

Unit 1: Statistical Properties of Financial Returns & Univariate Time Series and Applications to Finance (15 hours)

Introduction Asset Returns, Calculation of Asset Returns (Continuous and discreate both), Compare Continuous return with non-Continuous return and explain its benefits. Facts about Financial Returns, Distribution of Asset Returns, Time Dependency, Linear Dependency across Asset Returns.

Introduction to Univariate Time Series, The Lag Operator, Properties of AR Processes, Properties of Moving Average Processes, Autoregressive Moving Average (ARMA) Processes, The Box-Jenkins Approach.

Unit 2: Modelling Volatility – Conditional Heteroscedastic Models (9 hours)

Introduction to Modelling Volatility, ARCH Models, GARCH Models, Estimation of GARCH Models, Forecasting with GARCH Model.

Unit 3: Modelling Volatility and Correlations – Multivariate GARCH Models (9 hours)
Introduction to Modelling Volatility and Correlations, Multivariate GARCH Models, The VECH Model, The Diagonal VECH Model, The BEKK Model, Estimation of a Multivariate Model

Unit 4: Vector Autoregressive Models (VAR), Granger Causality Test (GCT) and Johansen Cointegration Test (JCT) (12 hours)
Introduction to VAR, Deep understanding of VAR, Issues in VAR, Hypothesis Testing in VAR. Introduction to GCT, Deep understanding of GCT, Issues in GCT, Hypothesis Testing in GCT Introduction to JCT, Deep understanding of JCT, Issues in JCT, Hypothesis Testing in JCT.

Essential/ recommended Readings

1. Brooks, C. (2014). Introductory econometrics for finance (3rd ed.). Cambridge University Press.
2. Tsay, R. S. (2010). Analysis of financial time series (3rd ed.). Wiley.
3. Bollerslev, T. (2008). Glossary to ARCH (GARCH). Journal of Economic Perspectives, 15(4), 171-174. doi: 10.1257/jep.15.4.171
4. Engle, R. F., & Kroner, K. F. (1995). Multivariate simultaneous generalized ARCH. Econometric Theory, 11(1), 122-150. doi: 10.1017/S0266466600009063

Suggestive Readings

1. Chris, Brooks (2019). Introductory Econometrics for Finance. Cambridge University Press.
2. Pindyck, Robert S. and Daniel L. Rubinfeld Econometric Models and Economic Forecasts. Singapore: McGraw Hill.
3. Ramanathan, Ramu (2002). Introductory Econometrics with Applications (5th ed.). Thomson South Western

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - GLOBAL BUSINESS MANAGEMENT (DSE-4)

DSE 4: INDIA AND THE WORLD ECONOMY

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
India and the World Economy (DSE 4)	4	3	1	0	1st Year Undergraduate	None

Learning Objectives:

The paper aims at providing an overview of economic policies and business environment in the domestic and world arena. learners get deep insight into the stylized economic facts on the main dimensions of the domestic and global economy.

Learning Outcomes:

On successful completion of the course the learner will be able to:

- Understand the evolving development paradigm adopted in India, liberalised and globalised world order, domestic and globalization processes, their main characteristics and their dynamic impact on the economy.
- Comprehend the regulatory structures in India, analyse industrial policy in different sectors, and gauge policies on FDI.
- Appraise major economies of the world, analyse the free trade vs. restrictive trade policies, both from a theoretical perspective and in policy terms.
- Synthesise intellectually on current global economic events and trends.

.

SYLLABUS FOR DSE 4

Unit 1: Overview of the Indian Economy (9 Hours)

Planning and Reforms, Pre-Independence Period, National Development Council, Five Year Plans, Land Reforms, Green Revolution, Evolution of Public Sector in India, Economic Reforms-Liberalisation of economic system, Indian Economy during Post-Planning Period-Role of Niti Aayog, Shift in Economic Policies: Privatisation: Problems and Prospects, Fiscal Policy, Union Budget and Taxation, Monetary Policy and Banking Sector Reforms. Technology and business environment in India.

Unit 2: Regulatory Structures in India (12 Hours)

Industrial Policy, Industry Analysis: Textiles, Electronics and Automobiles, Industry Analysis—FMCG, Chemicals and Pharmaceutical Sectors. Industrial Policy Statement, 1991, Objectives, Features, Micro, Small and Medium Industries and Policies, India's Industrial Progress After 1991, Performance of Small and Medium Enterprises (SME) Sector, Review of Economic Environment in Industrial Sector, Policies on Foreign Direct Investment in India, Foreign Exchange Regulation Act, Recent Industrial Policy Outlook.

Unit 3. World Economy **(12 Hours)**

An overview of the world economy; Major economies of the world, Income and Income Growth of World Economy during the last decades. Linkages in the Major Economies- Trade, Investment and Capital Flows. Development and Underdevelopment in the Developing World, The Historical Development of Capitalism, Resources and Environment, International Trade Patterns, Transportation and Communications, Regional Trading Arrangements, Trade Policies for the Developing Nations, Exchange-Rate Systems and Currency Crises, Macroeconomic Policy in an Open Economy, Nontariff Trade Barriers. International Factor Movements and Multinational Enterprises.

Unit 4: Global Operating Environment **(12 Hours)**

Trade and Climate Change, Trade and Food Security, Trade and Finance, Trade and Geopolitics. Global Recession and New Business Environment, WTO: Agreements and Current Issues; Trade Policy External Sector—BoP, Currency Convertibility issues, Global Outsourcing; Multinational Companies and Foreign Direct Investment. Trends in Global Trade and Economic Integration, Direction of World Trade, Multilateralism and the Multilateral Trading System, Levels of Economic Integration, Contemporary Perspectives: Global Economic Scenario, Public Policy, Business ethics and Corporate Social Responsibility, Consumerism, Major Trade partners, Growth and Poverty, Sustainable Development issues.

Essential/recommended Readings (latest editions of readings should be referred to)

1. Ahmed, F., & Alam, M.A. (2017). *Business Environment: Indian and Global Perspective*. PHI Learning.
2. Paul, J. (2017). *Business Environment, Text And Cases*. PHI Learning.
3. Stutz, F. P. & Warf, B. (2021) *World Economy, The Geography, Business, Development.* Pearson.
4. Carbaugh, R. J. (2017) *Global Economics*. Cengage Learning.

Suggestive Readings (latest editions of readings should be referred to)

1. World Bank (2019). *World Development Report*. Oxford. Various Issues.
2. United Nations Development Programme (2014). *Human Development Report*. UNDP, Various issues.
3. UNCTAD (2022). *Trade and Development Report*, UNCTAD, Various issues.
4. Rosser, J. B. & Rosser M.V. (2018).*Comparative Economics in a Transforming World Economy*. Prentice Hall.
5. Daniels, J.P. & David D.V. (2018). *Global Economic Issues and Policies*. Routledge, New York.
6. Yarbrough, B.V. & Yarbrough R.M. (1997). *The World Economy, Trade and Finance*. Cengage Learning.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - GLOBAL BUSINESS MANAGEMENT (DSE-5)

DSE 5: MULTINATIONAL BUSINESS FINANCE

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Multinational Business Finance (DSE 5)	4	3	1	0	1st Year Undergraduate	Basics of Accounting

Learning Objectives

The course will help the learner to:

- Understand the international monetary system and role of financial institutions.
- Recognize different aspects of foreign exchange markets and their functioning
- Analyze and appraise financial Management of a multinational firm

Learning Outcomes

On successful completion of the course the learner will be able to:

- Understand MNCs operations and finances.
- Explain functioning of Multilateral Agencies and their role in global economic development.
- Analyze different aspects of the foreign exchange markets.
- Apply financial Management concepts and tools for foreign Investment analysis
- Understand International Payment system and investment strategies

SYLLABUS FOR DSE 5

Unit 1: Introduction (12 Hours)

Multinational Business Finance – MNCs (Multinational Corporations) and transnational corporations, Difference between domestic and International financial management, Motivations for International finance. International Monetary System - The Gold standard, The Bretton Woods system, the flexible exchange, alternative exchange rate system, the European monetary system, Euro and its implications for Indian banking, International Financial Institutions – International Monetary Fund (IMF), Asian Development Bank (ADB), International Bank for Reconstruction and Development (IBRD), Bank for International Settlement (BIS) and Organization for Economic Cooperation and Development (OECD).

Unit 2: Forex Markets (9 Hours)

The Foreign Exchange Markets: Introduction, types: Global and Domestic market, spot market and forward market; rates: direct and indirect quotations, bid-ask spread; Functions of the Foreign Exchange Markets; determination of forward premiums and discounts, interest arbitrage – covered interest arbitrage and interest parity theory – forecasting of foreign exchange rates.

Unit 3: Financial Management of Multinational Firms **(12 Hours)**

Financial management of the Multinational Firm – Cost of Capital and Capital Structure of a Multinational Firm – determining capital structure components, Cost of capital for MNCs (Multinational Corporations) and Domestic Firms, Multinational capital budgeting – Problems and issues in foreign investment analysis.

Unit 4: Role of FDI, FII and Payment Systems **(12 Hours)**

Payment Systems: Payment terms and financing international trade, international flow of funds and portfolio investment in India, FDI (Foreign Direct Investment) vs. FIIs (Foreign Institutional Investors), investment strategies of FIIs in India, FIIs and volatility, impact of FIIs investment on stock markets and public policy. Netting (with numerical), pooling, leading and lagging as international payment settlement.

Essential/ recommended Readings (latest editions should be referred to)

1. Eiteman, David K., Stonehill, Arthur I., and Moffett, Michael H (2021). *Multinational Business Finance*.(15th Ed.). Pearson.
2. Alan C. Shapiro, P. H. (2019). *Multinational Financial Management*. (11th, Ed.) Wiley.

Suggestive Readings (latest editions should be referred to)

1. Levi, M. D. (2009). *International Finance*. Taylor & Francis.
2. Madura, J. (2018). *International Financial Management.* (13th, Ed.) Cengage Learning.
3. Buckley, A(2004). *Multinational Finance.* (5th, Ed.). Pearson Education.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - GLOBAL BUSINESS MANAGEMENT (DSE-6)

DSE 6: TRANSNATIONAL HUMAN RESOURCE MANAGEMENT

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Transnational Human Resource Management (DSE 6)	4	3	1	0	1st Year Undergraduate	Fundamentals of Management and Organisational Behavior

Learning Objectives:

- To explore the concepts and techniques of the essential elements of International HRM and to enable the learners to recognise its critical issues.

- To improve understanding of HRM concerns in the cross-cultural scenario.

Learning Outcomes:

Upon completion of the course a learner will be able to:

- Understand the relevance and impact of culture on HRM for global business operations and how HR practices differs across cultures and countries and apply these to deal with complications that come with handling cross cultural issues.
- Develop an understanding of the fundamentals of staffing for global operations.
- Understand the key elements of performance appraisal for global employees.
- Understand the functional role of HRM in the context of training and industrial relations.
- Apply concepts into practice in multinational organizations.

SYLLABUS FOR DSE 6

Unit I: Cross-Cultural issues in HRM (12 Hours)

Introduction to HRM for multinational companies. Introduction to concepts of differences due to language; culture, religion and employee and country; Impact of these on the operations of non-domestic companies; Hofstede's approach; cross cultural differences at the workplace; Managing workforce diversity; Diversity management programs; International Human Resource Management: Difference between HRM for domestic and global companies. Integration of HRM with strategies for global operations. Pros and Cons of Internationally diverse HRM practices and their assimilation by global businesses.

Unit II: Staffing for Global Operations (12 Hours)

International Workforce planning and staffing: Issues in supply of international human resources; Low-cost labour and global staffing; International Recruitment; International staffing choices, Multinational staffing decisions; Types of international assignments; Selection criteria and techniques; Training employees for international assignments; Successful expatriation, Causes of expatriate failure, female expatriation. Repatriation management. Ethical and legal issues in use of low-cost labour. Regulations relevant to the use of low-cost labour from outside the country. Challenges in transferring culturally sensitive business practices across borders. Issues pertinent to hiring local employees for international operations. Strategic fitment for international assignments and operations. Challenges in managing global teams.

Unit III: Performance Appraisal for Global Employees (12 Hours)

Performance appraisal: Criteria for performance appraisal, challenges of appraising employees from different cultural backgrounds; Biases affecting performance appraisal amongst a global workforce; Variables influencing expatriate performance appraisal. Issues and challenges in international performance management; Compensation: Objectives of expatriate compensation plan, Factors affecting international compensation, Approaches to expatriate compensation: COLA; Hardship allowances; Going rate approach, Balance sheet approach, Cultural impact on compensation policy. Strategic questions related to LOC for international assignments. Elements of taxation relevant to compensation for expatriates: tax equalization, tax protection, currency fluctuations

Unit IV: Global Context of Training and Industrial Relations (9 Hours)

Training & development of international staff: Areas of global training, cross cultural training, Diversity training. Cross cultural team building; Cross border Mergers and Acquisitions: HRM perspective; International IR: Key Players, Labour unions, Employee relations. Approaches in IR for global operations; changes in IR landscape across different countries. Strategic decision making for IHRM issues. Control issues in IHRM in global companies - head office vs. local office. Impact of legislation and free trade agreements on HRM issues across national borders.

Essential/ recommended Readings (latest edition of readings to be used)

1. Dowling, P.J., Festing, M. & Engle Sr, A.D. (2013). *International Human Resource Management.* Wiley
2. Nilanjan, S. & Bhattacharya, M. (2010). *International Human Resource Management.* Excel Books.
3. Briscoe, D., Briscoe, D.R., Schuler, R.S., & Claus, L. (2008). *International Human Resource Management: Policies and practices for multinational enterprises*. Routledge.
4. Tayeb, M. (2005). *International human resource management: A multinational company perspective.* Oxford University Press.

Suggestive Readings

1. Dowling, P.J. and Welch, D.E. (2017). *International Human Resource Management.* Cengage Learning
2. Bhattacharyya, D. K. (2010). *Cross-cultural management.* PHI Learning Pvt. Ltd.
3. Edwards, T., & Rees, C. (2006). *International human resource management: Globalization, national systems and multinational companies.* Pearson Education.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - GLOBAL BUSINESS MANAGEMENT (DSE-10)

DSE 10: CORPORATE TAXATION AND GLOBAL COMPANIES

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Corporate Taxation and Global Companies (DSE 10)	4	3	1	0	2nd Year Undergraduate	Basics of Finance and Accounting

Learning Objective

- The objective of this course is to acquaint learners with the international corporate taxation structure and its implications on companies.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Explain the concepts of International taxation.
- Describe the treaties and conventions governing the international taxation.
- Apply the knowledge, improve their understanding of international taxation and identify and evaluate the impact of different tax planning scenarios.
- Prepare for work within an international tax environment in a multinational firm

SYLLABUS FOR DSE 10

Unit 1: Introduction to Corporate Taxation (12 Hours)

Definition of corporate, types of companies: domestic company and foreign company, tax rate and additional benefits, corporation not seeking any incentives / exemption; corporation seeking incentives / exemptions and new manufacturing companies.

Sources of Income of a company: Profits earned from the business, Capital gains, Income from renting property, Income from other sources like dividend, interest etc.

Corporate tax rate for domestic companies and foreign companies, tax rates, Section 115BA, 115BAA, 115 BAB. Surcharge, cess, MAT.

Overview of Transfer Pricing; specified domestic transactions; Generally Accepted Cost Accounting Principles; Arm's Length Pricing; Advance Pricing Agreement; Safe Harbour Rules.

Jurisdiction for Corporate Taxation in international operations.

Unit 2: International Tax Conventions and Treaties (9 Hours)

Overview of Model Tax Conventions

OECD model tax convention, UN model tax convention, US Model tax convention.

Tax treaties, Application and Interpretation: Features of tax treaties, Overview of tax information exchange agreements, commentaries and their importance, role of Vienna convention in application and interpretation of tax treaties.

Overview of tax regimes. Overview of tax harmonization.

Unit 3: Tax Management and Planning for Corporates (12 Hours)

Double taxation: concept, capital export neutrality, capital import neutrality, method of avoiding double taxation.

Double Taxation Avoidance Agreement: Meaning, objectives; types of income included under the DTAA (Services originated and provided within India; Salary from India; income from property within India; Capital gains from India; FD and Savings Account in India),

Double taxation relief: Concept, types of relief, Double taxation provisions under the Income tax Act 1961, concept of permanent establishment, taxation of business process outsourcing units in India.

Unit 4: Taxation Aspects for Global Business (12 Hours)

Tax Planning with reference to business restructuring- Amalgamation, Demerger, Slump Sale, Transfer between holding and subsidiary companies. Taxation aspects of managerial decisions for international expansion. Tax avoidance, tax havens, tax management strategies for international companies. Overview of taxation implications for expatriates and repatriated employees. Planning and Restructuring Foreign Operations. Foreign Currency management for global business operations.

Essential/recommended Readings (latest edition of readings to be used)

1, Bittker, B. I., & Lokken, L. (2018). *Fundamentals of international taxation*. Thomson Reuters.

DISCIPLINE SPECIFIC ELECTIVE - GLOBAL BUSINESS MANAGEMENT (DSE-11)

DSE 11: LEGAL AND FINANCIAL ASPECTS OF INTERNATIONAL TRADE

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Legal and Financial Aspects of International Trade (DSE 11)	4	3	1	0	2nd Year Undergraduate	Legal aspects of Business

Learning Objectives

- This course aims at familiarizing learners with the legal framework of International trade. It covers various aspects such as law on International sale of goods, patent regulations, trademarks, arbitration and conciliation regulations, FEMA and Cyber Laws.

Learning Outcomes

On successful completion of the course the learner will be able to:

- Develop an understanding of various laws impacting the trade at the international level.
- Understand the working of patents and the associated laws.
- Understand the financial aspects of International trade.
- Learn the process of arbitration at the international level and the associated laws

SYLLABUS FOR DSE 11

Unit 1: Laws impacting International Trade (12 Hours)

Uniform Law on International Sale of goods- obligations of the seller – obligations of the buyer, common provisions- rules concerning damages-provisions of passing of risk in international sale contracts. Foreign Trade (Development and Regulations) Act 1992- objectives- Powers of Central Govt. Import/ Export License Application Procedure- Refusal, Suspension of License; Role of DGFT- Exemptions from FTDRAct. Acquisition and transfer of property in and outside India- establishment of branch in India; Enforcement/ penalties under the Act; Cyber Laws- need and significance.

Unit 2: Regulation of International Trade and Patents (12 Hours)

The Patents (Amendment) Act 2005, Patents regulations: Patents- Meaning- varieties- provisions of patent applications procedure- procedures after filling applications – patenting- patents of plant and seeds, Drugs- Life of patents and Rights of patentee. Working of patent- Infringement of patent- surrender and revocation of patent. Provisions related to secrecy direction for patents out of India- Protection for security of India- patent regime under WTO. Trade and merchandise marks regulations: registration- procedure opposing registration- effect of registration- prohibition of registration. Indian Trademarks Act 1999, Foreign Trade Mark- Privileges to nationals and non-

nationals- Licensing of trademark- registered user provisions- violation of trade mark rights- remedies.

Unit 3: Financial Aspects of International Trade (12 Hours)

FEMA Regulations- objectives- Need. Functions of RBI under FEMA, regulations over transactions in foreign exchange and securities – Restriction on capital account and current account transactions- control over realization of Foreign Exchange; Regulations of receipts and payments to resident outside India; Rule of Foreign Exchange possession and retention, realization, repatriation and surrender; provisions regulating export of goods and services- borrowing and lending in Foreign Exchange

Unit 4: International Arbitration (9 Hours)

Arbitration and conciliation regulations- purpose of Arbitration- difficulties in India. Domestic Arbitration- agreement- Tribunal- Arbitral proceedings- Arbitral 83 award- Intervention by Court. Conciliation-enforcement if foreign awards- International Arbitration.

Essential/recommended Readings (latest editions should be referred to)

1. Shaw, M. N. (2017). *International law.* Cambridge university press.
2. Bhala, R. (2019). *International trade law: a comprehensive textbook*. Carolina Academic Press.
3. Subedi, S. P. (2012). *Textbook International Trade and business law.* The People's Public Security Publishing House.

Suggestive Readings (latest editions should be referred to)

1. Verkey, E and Isaac, J.S. *Intellectual Property*. Eastern Book Company
2. Wadhera, B.L. (2016). *Law Relating To Intellectual Property*. Universal Law Publishing
3. Datey, V. S. *Economic laws & practice.* Taxmann Allied Services.
4. Bare Acts: Govt. of India
5. USTR 2021 Trade Policy Agenda and 2020 Annual Report (https://ustr.gov/sites/default/files/files/reports/2021/2021%20Trade%20Agenda/Online%20PDF%202021%20Trade%20Policy%20Agenda%20and%202020%20Annual%20Report.pdf)

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

DISCIPLINE SPECIFIC ELECTIVE - GLOBAL BUSINESS MANAGEMENT (DSE-12)

DSE 12: MULTINATIONAL OPERATIONS

Credit distribution, Eligibility and Pre-requisites of the Course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Multinational Operations (DSE 12)	4	3	1	0	2nd Year Undergraduate	None

Learning Objectives

This course provides learners with a solid foundation in international supply chain, logistics, and foreign currency exchange. The first half of the course reviews critical roles that supply chain management, sourcing, logistics, and transportation play in contemporary global business. In the second half, the focus shifts to foreign currency exchange risks and methods for mitigating those risks, both financial and non-financial.

Learning Outcomes

On successful completion of the course the learner will be able to:

1. Develop the fundamentals of international business and management of global operations.
2. Comprehend the importance of global supply chains, sourcing, and operations management in the execution of global businesses.
3. Compare and select between logistics intermediaries available to assist with the movement of goods and services between nations and across borders.
4. Evaluate foreign currency exchange risks in international transactions and identify means to mitigate those risks.

SYLLABUS FOR DSE 12

Unit 1: Introduction to International Operations (12 Hours)

International Business : Concepts and Organisations, International Business Environment, Multinational Enterprise: Evolution and Rise of Multinational Corporation The Process of Overseas Expansion by Multinationals- Exporting, Overseas Production, Licensing, Trade-offs Between Alternative Modes of Overseas Expansion, Strategic Business Alliances, Managing Global Operations: The Global Manager, Risk and Crisis Management, Managing Subsidiaries, Agents and Associates, Multinational Business Strategy- Developing Competitive Strategies for International Competition, Technology collaborations and Transfer.

Unit 2: Global Supply Chain and Sourcing (9 Hours)

Basics of Supply Chain and Operations Management, Examples of Operations and Supply Chains in different industries, Global Operation and Supply Chain strategies: Value Added and Costs, Strategic Fit; Supply Chain Coordination: BullWhip Effect, Vendor Managed Inventory,

Collaborative Planning, Forecasting and Replenishment, Supply Chain Contracting, Global Sourcing : Sourcing Process and Principles, Sourcing Strategies, Supplier Relationship Management.

Unit 3: Global Logistics and Transportation (12 Hours)

Facility Location Planning and Network Design: Global Supply Chain Design, Regional Facility Location, Factor-Ranking Analysis; Generic Transport Network Structures, Economies of Scale in Transportation, Trade-Off-Based Transportation Network Design, Capacity Allocation in a Many-to-Many Network- The Transportation Problem, Decision Model, Finding the First Feasible Model Solution, Optimality Check, Solution Improvement, Distribution Network Design- Types of distribution Network, Transportation Modes.

Unit 4: Forex Markets and Hedging (12 Hours)

Foreign Exchange Market- Organisation, The Spot and Forward Market, Foreign Exchange Risk and Economic Exposure, The Economic Consequences of Exchange Rate Changes, Identifying Economic Exposure, An Operational Measure of Exchange Risk, Alternative Measures and Management of Foreign Exchange Exposure- Translation, Transaction and Operating Exposure, Designing a Hedging Strategy- Forex hedging techniques. non-financial hedging methods such as cash flow netting, as well as financial hedging methods including forwards, swaps, futures, and options.

Essential/recommended Readings (latest editions should be referred to)

1. Shapiro, A. C., & Hanouna, P. (2019). *Multinational financial management*. (11th ed). John Wiley & Sons.
2. Ivanov, D., Tsipoulanidis, A., & Schönberger, J. (2021). *Global supply chain and operations management*. Springer International Publishing.

Suggestive Readings (latest editions should be referred to)

1. Wolfgang, L. (2017). *The global supply chain: How technology and circular thinking transform our future*. Springer
2. Caniato, F., Caridi, M., Crippa, L., & Moretto, A. (2012). *Environmental sustainability in fashion supply chains: An exploratory case based research.* International journal of production economics, 135(2), 659-670.

Note: Examination scheme and mode shall be as prescribed by the Examination Branch, University of Delhi, from time to time.

POOL OF GENERIC ELECTIVE

The Pool of Generic Electives offered in Semester-IV will also be open for Semester-VI.

Bachelor of Business Administration (Financial Investment Analysis) - BBA (FIA)

SEMESTER-IV

DISCIPLINE SPECIFIC CORE (DSC) COURSES

DSC 10: BASICS OF ECONOMETRICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Basics of Econometrics DSC-10	4	3	1	0	Class XII	Basic knowledge of statistics

Course Objective:

- The primary objective of econometrics is to apply statistical methods to economic data.
- To learn estimation and diagnostic testing of simple, multiple regression models, panel data models, and dummy variable regression with qualitative response regression models.
- Students will learn various econometric techniques such as regression analysis, panel data analysis, and instrumental variable estimation.
- They will also gain basic knowledge in using statistical software packages like Stata, R, or Python to perform econometric analysis.

Learning Outcomes:

After studying this course, the student will be able to:

- Understanding the fundamental concepts of econometrics:
- Understanding the assumptions and limitations of regression analysis:
- Understand basic econometrics and its assumptions and impact of violations of classical assumptions. They should be able to assess the violation of these assumptions and understand the implications for the validity of the results.
- Students should be able to interpret regression results accurately. They should also understand how to assess model fit, using measures like R-squared and adjusted R-squared.
- Understand models using dummy variable and qualitative response regression models.

Unit 1: **(12 hours)**

Introduction to Econometrics and an overview of its applications; Simple Regression with Classical Assumptions; Least Square Estimation and BLUE, Properties of estimators, Multiple Regression Model and Hypothesis Testing Related to Parameters – Simple and Joint. Functional forms of regression models.

Unit 2: **(12 hours)**

Violations of Classical Assumptions: multicollinearity, heteroscedasticity, autocorrelation and model specification errors, their identification, their impact on parameters; tests related to parameters and impact on the reliability and the validity of inferences in case of violations of Assumptions; methods to take care of violations of assumptions.

Unit 3: **(9 hours)**

What is goodness of fit? Test/Statistics used for the goodness of fit. Understanding of R Square, Adjusted R Square, Standard Error of the model, AIC, BIC and SIC. Calculation and comparison of AIC, BIC, SIC. Explain the model selection process.

Unit 4: **(12 hours)**

Dummy variables: Intercept dummy variables, slope dummy variables, Interactive dummy variables, Use of Dummy Variables to model qualitative/Binary/Structural changes, Other Functional Forms, Qualitative Response Regression Models

Recommended Computer Package to be Used: Use of software like E Views, R and STATA solving real life problems and checking assumptions and taking care of assumptions violations and testing goodness of fit.

Essential Readings:

1. Dougherty, C. (n.d.). Introduction to Econometrics. Oxford University Press.
2. Gujarati, N. D. (n.d.). Basic Econometrics. New Delhi: McGraw Hill.
3. Gujarati, N. D. (n.d.). Econometrics by Examples. New Delhi: McGraw Hill.

Additional Readings:

1. Pindyck, R. S., & Rubinfeld, D. L. (n.d.). Econometric Models and Economic Forecasts. Singapore: McGraw Hill.
2. Ramanathan, R. (2002). Introductory Econometrics with Applications. Thomson South Western.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSC 11: INVESTMENT ANALYSIS & PORTFOLIO MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Investment Analysis and Portfolio Management DSC-11	4	3	1	0	Class XII	Financial Management and Statistics

Course Objectives

- To provide a conceptual framework for analysis from an investor's perspective of maximizing return on investment
- To provide a sound theoretical base with examples and references related to the Indian financial system.
- To emphasize on understanding of the forces that influence the risk and return of financial assets and related models and theories.

Learning Outcomes

Upon completion of the course a learner shall be competent to:

- Understand the concepts of risk and return, bonds and their valuation, technical and fundamental analysis, asset pricing and risk return of portfolio.
- Understand the process of calculating risk and return, pricing of bonds along with duration, valuation of shares along with trading strategies and portfolio risk and return, pricing research reports and advice of financial firms and brokers.
- Evaluate the best measures of risk and return, bond prices and sensitivity based on other variables, share valuation models and techniques of arriving at portfolio risk and return.
- Analyse the outcomes of evaluation to choose the best return risk asset, change in bond price based on changes in interest rate etc., execute buy and sell transactions based on fundamentals and trends in the respective asset and compare the risk return ratios of various assets and portfolios so as to choose the optimal portfolio.
- Create trading and investment strategies for maximising returns in the financial markets and also create a portfolio of investments to achieve the best risk return trade-off.

Course Contents:

Unit 1: Risk–Return Analysis, Bond Valuation & Fundamental Analysis (12 hours)

Basics of risk and return: concept of returns, application of standard deviation, coefficient of variation, beta, alpha. Bonds: present value of a bond, yield to maturity, yield to call, yield to put, systematic risk, price risk, interest rate risk, default risk. Fundamental analysis: EIC framework; Economic analysis: Leading lagging & coincident macro-economic indicators,

Expected direction of movement of stock prices with macroeconomic variables in the Indian context; Industry analysis: stages of life cycle, SWOT analysis, Company analysis.

Unit 2: Share Valuation & Technical Analysis (12 hours)

Share valuation: Dividend discount models – no growth, constant growth, and two stage growth model. Relative valuation models using P/E ratio, other ratios. Technical analysis: meaning, assumptions, difference between technical and fundamental analysis; Price indicators – Dow theory, advances and declines, new highs and lows, circuit filters. Volume indicators – Dow Theory, small investor volumes. Other indicators – institutional activity, Trends: resistance, support. Technical charts & patterns. Indicators: moving averages.

Unit 3: Portfolio Analysis and Management (12 hours)

Portfolio analysis: portfolio risk and return, Markowitz portfolio model: risk and return for 2 and 3 asset portfolios, concept of efficient frontier & optimum portfolio. Market Model: concept of beta, systematic and unsystematic risk. Investor risk and return preferences: Indifference curves and the efficient frontier, Traditional portfolio management for individuals: Objectives, constraints, time horizon, current wealth, tax considerations, liquidity requirements, and anticipated inflation. Asset allocation: Asset allocation pyramid, investor life cycle approach. Portfolio management services: Passive – Index funds, systematic investment plans. Active – market timing, style investing.

Unit 4: Asset Pricing Models and Mutual Funds (9 hours)

Capital asset pricing model (CAPM): Efficient frontier with a combination of risky and risk-free assets. Assumptions of single period classical CAPM model. Expected return, required return, overvalued and undervalued assets as per CAPM. Multiple factor models: Arbitrage Pricing Theory (APT), APT vs CAPM. Mutual Funds: Introduction, classification of mutual fund schemes by structure and objective, advantages and disadvantages of investing through mutual funds. Performance Evaluation of Managed Funds using Sharpe's, Treynor's and Jensen's measures.

Essential/recommended Readings

1. Reilly, F. K. & Brown, K.C. (2012) *Analysis of Investments and Management of Portfolios,* (12th edition), Cengage India Pvt. Ltd.
2. Singh, R (2017): *Security Analysis and Portfolio Management,* (2nd Edition). Excel Books.
3. Kane, A., Marcus, A., & Bodie, Z. (2014). *Investments Global Edition*. Pearson.

Suggestive Readings

1. Fischer, D.E. & Jordan, R.J. (2006) *Security Analysis & Portfolio Management,* (6th edition), Pearson Education.
2. Ranganathan, M., & Madhumathi, R. (2006). *Investment Analysis and Portfolio Management*. Pearson Education.

Note: Latest edition of the readings may be used.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSC 12: INCOME TAX LAW & PRACTICE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Income Tax Law & Practice DSC-12	4	3	0	1	Class XII	NA

Course Contents:

Unit 1: Basic Concepts (12 hours)

Origin of Tax System in India; Taxation – Voluntary practice to involuntary system, Kautilya's philosophy of Taxation;

Income, person, assessee, assessment year, previous year, gross total income, total income. Residential status of individual person and its effect on tax incidence.

Unit 2: Computation of Income (21 hours)

Salaries, Income from house property, Profits and gains of business or profession (Only theory), Capital gain, Income from other sources.

Unit 3: Clubbing, Setoff and Deductions (6 hours)

Clubbing of income (Only theory), set-off and carry forward of losses (Only theory), Deductions under Chapter VI-A, rebates and reliefs,

Unit 4: Total Income & Tax Liability (6 hours)

Computation of total income and tax liability of individuals. E filing of income tax by individuals (Practical).

Essential Readings:

- Singhania V. and Singhania, M., *Students Guide to Income Tax*, Taxman Publications.
- Ahuja, G. and Gupta, R., *Systematic Approach to Income Tax*: Bharat Law House.
- Chandra, M. and Shukla, D.C., *Income Tax Law and Practice*: Pragati Publications.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DISCIPLINE SPECIFIC ELECTIVE (DSE) COURSES

DSE 1: STRATEGIC CORPORATE FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Strategic Corporate Finance DSE-1	4	3	1	0	Class XII	Basic of Finance

Course Objectives:

- To know the details of corporate finance and the strategies involved in the corporate decisions.
- To enable the students to steer the corporate strategies issues and challenges in better manner.
- To provide the key concepts and ideas of decision tree analysis and the Black-Scholes model in the valuation of real options.
- To assess the considerations and strategies involved in company disposals, including non-core subsidiary sales, valuation, timing, and tax planning.

Learning Outcomes:

After studying this course the learners will be able to:

- Understand the role of strategy and planning in financial decisions
- Understand the importance and components of a Value Added Statement.
- Identify different types of strategic costing and their relevance.
- Discuss strategic cost reduction techniques.
- Determine the feasibility of a management buy-out.
- Develop a business plan and financial forecasts for submission to potential funders.
- Define bankruptcy and Identify factors leading to bankruptcy.
- Understand the process of reorganizing distressed firms and liquidation process of firms
- Gain an overview of company valuation.
- Analyze the substitutability of capital structure.

Course Contents:

Unit 1 **(12 hours)**

Introduction to strategic corporate finance: Strategy Vs Planning, significance of strategy in financial decisions, Different types of financial strategy for Shareholders Wealth Maximization, Economic Value Addition, Value added statement. Strategic Cost Management:

Traditional costing Vs Strategic Costing, Relevant costs Vs Irrelevant costs, Different types of strategic costing and their relevance- Target Costing, Activity based Costing, Life Cycle Costing, Quality Costing, Zero Based Budgeting, Strategic cost reduction techniques and value chain analysis.

Unit 2 **(12 hours)**

Management Buy-outs: Establishing feasibility of the buy-out, Negotiating the main terms of the transaction with the vendor including price and structure, Developing the business plan and financial forecasts in conjunction with the buy-out team for submission to potential funders.
Management Buy-ins: Management Buy-in/Buy-outs ("BIMBOs"), Vendor-initiated buyouts/buy-ins.
Real options: Financial and real options compared, various types of real options, the Black Scholes model, Decision tree analysis, application of Real options, Drawbacks of Real options.

Unit 3 **(12 hours)**

Financial Distress and restructuring: Meaning of Bankruptcy, Factors leading to bankruptcy, symptoms and predictions of bankruptcy, reorganization of distressed firms, liquidation of firms.
Company disposals: sale of a non-core subsidiary, Exit strategy, valuation, timing of sale and tax planning opportunities and calculation of the various tax implications.
Fundraising: identification of different sources of development capital, determination of capital structure and factors affecting the capital structure, cost of capital and cost saving strategy.

Unit 4 **(9 hours)**

Company Valuation: an overview of valuation, valuation principles and practices, the impact of "what if" scenarios. Other strategic issues: managing credit ratings, dividend and share repurchase policy. Strategic risk management, substitutability of capital structure, risk management choices, financial, physical and operational hedging.

Essential Readings:

1. Pettit, J., *Strategic Corporate Finance Applications in Valuation and Capital Structure,* John willey & sons, Inc.
2. Damodaran, A, *Corporate finance theory and practice*, John willey & sons.

Additional Readings:

1. Jakhotia, *Strategic Financial Management*, Vikas Publication.
2. Damodaran, A., *Applied Corporate Finance*, John willey & sons.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSE 2: CORPORATE ANALYSIS & VALUATION

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Corporate Analysis & Valuation DSE-2	4	3	1	0	Class XII	Basic of accounting

Objective:

- To enable the learners to analyse the health of a company through their annual reports and will equip them to understand how to determines its value.

Learning Outcomes:

After studying this course the learner will be able to understand:

- The financial health of a company through qualitative and quantitative analysis.
- The basic of valuation and Cash Flows Forecasting.
- The various valuation techniques for company's valuation and their application.

Course Contents

Unit 1: Analysis of Corporate Financial Statements (12 hours)

Analysis of Corporate Financial Statements: Income statements and Balance sheets through ratio analysis and analysing the Chairman's statement, Directors' report, management discussion & analysis, report on corporate governance, auditor's report to evaluate the financial soundness of the company. Understanding financial statements of manufacturing and service organisations. Common size analysis and relevant ratios (Study from the Annual Reports of the companies).

Unit 2: Introduction to Valuation Techniques & Cash Flows Forecasting (12 hours)

Introduction to Valuation: Value and price, Balance sheet-based methods, Income statement-based methods. Cash flow discounting-based methods. Deciding the appropriate cash flow for discounting, The free cash flow to the firm, free cash flow to equity. Forecasting Cash flows: simple model for forecasting income and cashflows. Earnings, Tax effect, Reinvestment needs, dividend.

Unit 3. DCF Valuation, Discount Rates & Beta (12 hours)

Discounted Cash flow Valuation: Valuation of a company with no growth, constant growth, variable growth and infinite life. Estimating Discount Rates – cost of equity, cost of debt, tax shield, weighted average cost of capital. Calculation of beta, instability of beta, adjusted beta, levered and unlevered beta.

Unit 4: Relative Valuation & Other Applications (9 hours)

Relative Valuation: standard multiples, comparable companies, potential pitfalls; estimating multiples using regression. Valuation of brands and intellectual capital. Interest rates and company valuation. Impact of inflation on valuation. Reconciling relative and discounted cash flow valuation. Case studies in valuation.

Essential Readings:

1. Damodaran, A. (2016). Damodaran on Valuation: Security Analysis for Investment and Corporate Finance. John Wiley & Sons.

2. Chandra, P. (2019). Corporate Valuation and Value Creation. Tata McGraw-Hill. Education.

Additional Readings:

1. Foster, G. (1986). Financial Statement Analysis. Prentice Hall.

Latest Editions of the Readings may be used.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSE 10: ENTREPRENEURIAL FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Entrepreneurial Finance DSE-10	**4**	**3**	**1**	**0**	**Class XII**	**Basic understanding of concepts related Entrepreneurship**

Course Objectives:

The Learning Objectives of this course are as follows:

- To develop an understanding of the principles of entrepreneurial finance and the role of finance in the successful venture life cycle.
- To identify and analyze the key elements of a business plan and choose an appropriate form of business organization for the venture.
- To apply short-term and long-term financial planning techniques to forecast sales, estimate sustainable growth rates, and determine additional financing needs to support growth.
- To analyze different valuation methods, including discounted cash flow and venture capital valuation, and apply them to value early-stage ventures and venture capital investments.
- To evaluate different financing alternatives, including professional venture capital, business incubators, seed accelerators, and foreign investor funding sources, and design appropriate security structures for growing ventures, such as common stock, preferred stock, convertible debt, and warrants/options.

Learning Outcomes:

Upon completion of the course the learner will be competent to:

- Apply the principles of entrepreneurial finance and understand the role it plays in the successful venture life cycle, including the key elements of a business plan and forms of business organizations.
- Develop short-term and long-term financial plans using systematic forecasting techniques and estimate sustainable sales growth rates and additional financing needed to support growth.
- Evaluate early-stage ventures using different valuation methods, including present value, discounted cash flow, and venture capital valuation techniques.
- Compare and analyze different financing alternatives, including professional venture capital, business incubators, seed accelerators, and foreign investor funding sources, and design appropriate security structures for growing ventures.

Adopt a life cycle approach for entrepreneurial finance and understand financial bootstrapping and business angel funding as alternative financing options for the different stages of the venture life cycle.

Course Contents

Unit I: Introduction to Finance for Entrepreneurs (9 hours)
Principles of Entrepreneurial Finance, Role of Entrepreneurial Finance. The Successful Venture Life Cycle. Key Elements of a Business Plan. Forms of Business Organisations and Choosing the Appropriated Organization. Financing through the Venture Life Cycle, Financial Bootstrapping and Business Angel Funding. Life Cycle Approach for Entrepreneurial Finance.

Unit 2: Financial Planning for Enterprises (12 hours)
Short Term Financial Planning: Short Term Cash Planning Tools, Cash Planning from a Projected Monthly Balance Sheet. Long Term Financial Planning: Systematic Forecasting – Forecasting Sales for Seasoned Firms, Forecasting Sales for Early-Stage Ventures. Estimating Sustainable Sales Growth Rates. Estimating Additional Financing needed to support Growth.

Unit 3: Valuing Ventures (12 hours)
Valuing Early-Stage Ventures: Concept, Basic Mechanics of Valuation – Present Value Concept, Estimates and Discounted Cash Flow. Just in Time Equity Valuation. Venture Capital Valuation Methods: Review of Basic Cash Flow Based Equity Valuations, Basic Venture Capital Valuation – Using Present Values and Future Values. Earning Multipliers and Discounted Dividends.

Unit 4: Structuring Financing for Growing Venture (12 hours)
Professional Venture Capital – History and Overview, Professional Venture Investing Cycle. Other Financing Alternatives – Business Incubators and Seed Accelerators; Intermediaries, Facilitators and Consultants; Business Crowdsourcing and Crowdfunding; Commercial and Venture Bank Lending, Foreign Investor Funding Sources. Designing Security Structures – Common Stock, Preferred Stock, Convertible Debt, Warrants and Options, Other Concerns.

Essential Readings

1. Leach, C. J., Melicher, R. W. (2017). Entrepreneurial finance. Cengage Learning.
2. Stancill, J. M. (2016). Entrepreneurial finance: A casebook. Thomson.
3. Shepherd, D. A., & Zacharakis, A. (2014). Entrepreneurial finance: Strategy, valuation, and deal structure. Academic Press.

Additional Readings:

1. Hornsby, J. S., Kuratko, D. F., & Zahra, S. A. (2002). Middle managers' perception of the internal environment for corporate entrepreneurship: assessing a measurement scale. Journal of business venturing, 17(3), 253-273.
2. Sahlman, W. A. (1990). The structure and governance of venture-capital organizations. Journal of financial economics, 27(2), 473-521.

3. Hsu, D. H. (2004). What do entrepreneurs pay for venture capital affiliation? Journal of finance, 59(4), 1805-1844.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSE 12: WEALTH MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Wealth Management DSE-12	4	3	1	0	Class XII	NA

Course Objectives:

- To equip students with the knowledge and practical understanding of important dimensions of wealth management.
- To understand and do planning for their tax liabilities, investments, insurance coverage, retirement and estate needs.

Learning Outcomes:

After the completion of this course the student will be able:

- To provide an overview of various aspects related to wealth management.
- To acquaint the learners with issues related to taxation in wealth management.
- To study the relevance and importance of insurance in wealth management.
- To understand the importance and process of choosing right investments.
- To understand various components of retirement and estate planning.

Course Contents

Unit I: Basics of Wealth Management and Tax Planning (12 hours)

Introduction to Wealth Management, Need for Wealth Management, Components of Wealth Management, Process of Wealth Management, Code of Ethics for Wealth Managers, Wealth Management in India. Tax Planning – Tax Avoidance versus Tax Evasion, Fundamental Objectives of Tax Planning, Tax Structure in India for Individuals, Common Tax Planning Strategies – Maximizing Deductions, Income Shifting, Tax-Free and Tax-Deferred Income.

Unit 2: Managing Insurance Needs (12 hours)

Basics Concepts – Risks, Risk Management and Underwriting. Insuring Life – Benefits of Life Insurance, evaluating need for Life Insurance, Determining the Right Amount of Life Insurance. Choosing the Right Life Insurance Policy – Term Life Insurance, Whole Life Insurance, Universal Life Insurance, Variable Life Insurance, Group Life Insurance, Other Special Purpose Life Policies. Buying Life Insurance – Compare Costs and Features, Select an Insurance Company, and Choose an Agent. Life Insurance Contract Features. Insuring Health – Importance of Health Insurance Coverage. Making Health Insurance Decision – Evaluate Your Health Care Cost Risk, Determine Available Coverage and Resources, Choose a Health Insurance Plan. Types of Medical Expense Coverage. Policy Provisions of Medical Expense

Plans. Property Insurance – Basic Principles, Types of Exposure, Principle of Indemnity, and Coinsurance.

Unit 3: Managing Investments (12 hours)

Role of Investing in Personal Financial Planning, Identifying the Investment Objectives, Different Investment Choices. The Risks of Investing, The Returns from Investing, The Risk-Return Trade-off. Managing Your Investment Holdings – Building a Portfolio of Securities, Asset Allocation and Portfolio Management, Keeping Track of Investments. Investing in Equity – Common Considerations, Key Measures of Performance, Types of Equity Stocks, Market Globalization and Foreign Stock, Making the Investment Decision. Investing in Bonds – Benefits of Investing in Bonds, Bonds Versus Stocks, Basic Issue Characteristics, The Bond Market, Bond Ratings. Investing in Mutual Funds and Exchange Traded Funds (ETFs) – Concept of Mutual Funds and ETFs, Benefits of Investing in Mutual Funds or ETFs, Some Important Cost Considerations, Services Offered by Mutual Funds, Selecting appropriate Mutual Fund and ETF investments, Evaluating the performance of Mutual Funds and ETF.

Unit 4: Retirement Planning and Estate Planning (9 hours)

Retirement Planning – Role of Retirement Planning in Personal Financial Planning, Pitfalls to Sound Retirement Planning, Estimating Income Needs, Sources of Retirement Income. Estate Planning – Fundamentals of Estate Planning, Impact of Property Ownership and Beneficiary Designations, Estate Planning Documents, and Executing Basic Estate Planning.

Essential Readings:

1. Randall S. Billingsley, Lawrence J. Gitman, and Michael D. Joehnk (2017): *Personal Financial Planning*. Cengage Learning.
2. Susan M. Tillery, and Thomas N. Tillery: *Essentials of Personal Financial Planning*. Association of International Certified Professional Accountants.

Additional Readings:

1. Indian Institute of Banking & Finance. (2017). Introduction to Financial Planning (4th Edition).
2. Sinha, M. *Financial Planning: A Ready Reckoner*. July 2017. Mc Graw Hill.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

GENERIC ELECTIVE (GE) COURSES

GE 2: FINANCIAL MANAGEMENT OF FAMILY BUSINESS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Financial Management of Family Business GE-2	4	3	1	0	Class XII	NA

Course Objectives:

- To familiarize students with various financial and quantitative techniques of analysis required at different stages for management of family business.
- To acquaint the students with qualitative aspects related to starting a new venture and various options for financing.

Learning Outcomes:

On successful completion of his course, the learner will be able to:

- Understand the process of screening of ideas and carrying out appraisal of new venture
- Learn various quantitative methods for demand forecasting and financial projections
- Evaluate projects using capital budgeting techniques
- Evaluate risk for business projects and identify alternative sources of financing

Course Contents

Unit 1: Capital Investments & Starting a Venture (9 hours)

Capital investments importance and difficulties, types of capital investments, phases of capital budgeting, levels of decision making, facets of project analysis, key issues in major investment decisions. Generation of ideas, monitoring the environment, corporate appraisal, tools for identifying investment opportunities, scouting for project ideas, preliminary screening, project rating index, sources of positive net present value.

Unit 2: Demand Forecasting & Financial Projections (12 hours)

Methods of demand forecasting: qualitative methods – jury of executive and Delphi method. Time series projection methods: trend projection, exponential smoothing and moving average method. Causal methods: chain ratio, consumption level, end use, bass diffusion, leading indicator and econometric method. Uncertainties in demand forecasting, improving forecasts, coping with uncertainties.

Financial estimates and projections: cost of project, estimates of sales and production, cost of production, working capital requirement and its financing, profitability projections, projected cash flow statement, projected balance sheet and multi-year projections.

Unit 3: Capital Budgeting & Project Selection (12 hours)

Project appraisal: market appraisal, technical appraisal, financial appraisal, economic appraisal, and managerial appraisal. Project cash flows: components of cash flow, basic principles of cash flow estimation, cash flows for a replacement project. Biases in cash flow estimation: overestimation and underestimation of profitability. Time value of money: concept, present and future value of a single amount, present and future value of an annuity. Investment evaluation criteria: payback period, accounting rate of return, net present value, profitability index, internal rate of return (IRR), modified internal rate of return (MIRR). Assessment of various methods, investment evaluation in practice.

Unit 4: Risk Analysis and Financing (12 hours)

Risk Analysis: sources and measures of risk. methods of assessing risk: sensitivity analysis, scenario analysis, break-even analysis, simulation analysis, decision tree analysis. Managing risk. Project selection under risk – judgmental evaluation, payback period requirement, risk adjusted discount rate method, certainty equivalent method. Risk analysis in practice.

Financing: capital structure, choices of financing, internal accruals, equity capital, preference capital, debentures (or bonds), term loans, raising capital in international markets, venture capital, private equity, venture capital vs private equity. Credit rating and appraisal by financial institutions – what information they want and how they appraise.

Essential Readings:

1. Chandra, P, *Projects – Planning, Analysis, Selection, Financing, Implementation, and Review*. 2019 Edition. McGraw Hill Education.
2. Agrawal, R., & Mehra, Y. S. (2017). *Project Appraisal and Management*. Taxmann Publications.

Essential Readings:

1. Chandra, P. (2019). *Projects: planning, analysis, selection, financing, implementation, and review.* Mcgraw Hill Education (India) Private Limited.
2. Agarwal, R, & Mehra, Y. (2021). *Project Appraisal and Management*. Taxmann Publications.

Additional Readings:

1. Goodpasture, C. J (2004): *Quantitative Methods in Project Management*. J. Ross Publishing.
2. Chandra, P. (2019). *Financial management : theory and practice.* Tata Mcgraw-Hill Pub.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

GE4: FUNDAMENTALS OF ECONOMETRICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Fundamentals of Econometrics GE-4	4	3	1	0	Class XII	Basics of statistics

Course Objectives:

- Understanding the role of econometrics: Students should grasp the link between economic theory, data, and econometric methods.
- Understanding and addressing regression assumptions.
- Introduction to econometric modelling.
- Students would be introduced to use of statistical software packages like Stata, R, or Python to perform econometric analysis.

Learning Outcomes:

The course will help the student to**:**

- Students should be able to demonstrate a clear understanding of key concepts in econometrics, such as causality, heteroscedasticity, autocorrelation, and multicollinearity.
- Students should be able to assess the violation of these assumptions and understand the implications for the validity of the results.
- Students should be able to interpret regression results accurately. They should also understand how to assess model fit, using measures like R-squared and adjusted R-squared.
- Analysing and interpreting dummy variables and interaction terms: Students should be able to incorporate categorical variables, including binary variables (dummy variables) and interaction terms, into regression models.

Unit 1 **(9 Hours)**

Introduction to Econometrics and an overview of its applications; Simple Regression with Classical Assumptions; Least Square Estimation and BLUE, Properties of estimators, Multiple Regression Model and Hypothesis Testing Related to Parameters – Simple and Joint. Functional forms of regression models.

Unit 2 **(12 Hours)**

Violations of Classical Assumptions: multicollinearity, heteroscedasticity, autocorrelation, and model specification errors, their identification, their impact on parameters; tests related to parameters and impact on the reliability and the validity of inferences in case of violations of Assumptions; methods to take care of violations of assumptions.

Unit 3 **(12 Hours)**

Understanding the impact of change in scale of variables on output. Understanding and calculation of information criteria for model selection: AIC, BIC, and HQC. Understanding and calculation of R Square and adjusted R Square. Understanding of outliers and their impact on the model's output.

Unit 4 **(12 Hours)**

Dummy variables: Intercept dummy variables, slope dummy variables, Interactive dummy variables, Use of Dummy Variables to model qualitative/Binary/Structural changes, Other Functional Forms, Qualitative Response Regression Models.

Recommendation Computer Package to be Used: Use of softwares like E-Views, R, and STATA to solve real-life problems and check assumptions, taking care of assumption violations, and test goodness of fit.

Essential Readings:

1. Dougherty, C. (n.d.). *Introduction to Econometrics*. Oxford University Press.
2. Gujarati, N. D. (n.d.). *Basic Econometrics*. New Delhi: McGraw Hill.
3. Gujarati, N. D. (n.d.). *Econometrics by Examples*. New Delhi: McGraw Hill.

Additional Reading

1. Pindyck, R. S., & Rubinfeld, D. L. (n.d.). *Econometric Models and Economic Forecasts*. Singapore: McGraw Hill.
2. Ramanathan, R. (2002). *Introductory Econometrics with Applications*. Thomson South Western.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

GE 6: PERSONAL FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Personal Finance GE-6	4	3	1	0	Class XII	NA

Course Objectives:

- To equip students with the knowledge and practical understanding of important dimensions of managing one's personal finance.
- To understand and plan for their tax liabilities, investments, insurance coverage, and retirement.

Learning Outcomes:

On successful completion of his course, the students will be able to:

- Understand the fundamentals of Personal Financial Planning
- Learn the basics of managing personal tax liabilities
- Learn the basic concepts and underlying principles for Retirement Planning.
- Ascertain and choose appropriate insurance policies for managing personal risks.
- Evaluate various asset classes on the basis of risk-return and personal investment goals
- Create, maintain and grow personal investment portfolio

Course Contents

Unit 1: Basics of Personal Finance and Tax Planning (12 Hours)

Understanding Personal Finance. Rewards of Sound Financial Planning. Personal Financial Planning Process. Personal Financial Planning Life Cycle. Making Plans to Achieve Your Financial Goals. Common Misconceptions about Financial Planning. Financial Planning as a career choice. The Financial Planning Environment. Personal Tax Planning – Tax Avoidance versus Tax Evasion, Fundamental Objectives of Tax Planning, Tax Structure in India for Individuals, Common Tax Planning Strategies – Maximizing Deductions, Income Shifting, Tax-Free and Tax-Deferred Income.

Unit 2: Managing Insurance Needs **(12 Hours)**

Basics Concepts – Risks, Risk Management and Underwriting. Insuring Life – Benefits of Life Insurance, evaluating need for Life Insurance, Determining the Right Amount of Life Insurance. Choosing the Right Life Insurance Policy – Term Life Insurance, Whole Life Insurance, Universal Life Insurance, Variable Life Insurance, Group Life Insurance, Other Special Purpose Life Policies. Buying Life Insurance – Compare Costs and Features, Select an Insurance Company, and Choose an Agent. Life Insurance Contract Features. Insuring Health – Importance of Health Insurance Coverage. Making Health Insurance Decision – Evaluate Your Health Care Cost Risk, Determine Available Coverage and Resources, Choose a Health Insurance Plan. Types of Medical Expense Coverage. Policy Provisions of Medical Expense Plans. Property Insurance – Basic Principles, Types of Exposure, Principle of Indemnity, and Coinsurance.

Unit 3: Managing Investments **(12 Hours)**

Role of Investing in Personal Financial Planning, Identifying the Investment Objectives, Different Investment Choices. The Risks of Investing, The Returns from Investing, The Risk-Return Trade-off. Managing Your Investment Holdings – Building a Portfolio of Securities, Asset Allocation and Portfolio Management, Keeping Track of Investments. Investing in Equity – Common Considerations, Key Measures of Performance, Types of Equity Stocks, Market Globalization and Foreign Stock, Making the Investment Decision. Investing in Bonds – Benefits of Investing in Bonds, Bonds Versus Stocks, Basic Issue Characteristics, The Bond Market, Bond Ratings. Investing in Mutual Funds and Exchange Traded Funds (ETFs) – Concept of Mutual Funds and ETFs, Benefits of Investing in Mutual Funds or ETFs, Some Important Cost Considerations, Services Offered by Mutual Funds, Selecting appropriate Mutual Fund and ETF investments, Evaluating the performance of Mutual Funds and ETF.

Unit 4: Investing in Real Estate and Retirement Planning **(9 Hours)**

Investing in Real Estate – Some Basic Considerations. Modes of Real Estate Investment – Raw Land, Commercial Properties, Residential Properties, Real Estate Investment Trusts (REITs). Planning for Retirement – Role of Retirement Planning in Personal Financial Planning, Pitfalls to Sound Retirement Planning, Estimating Income Needs, Sources of Retirement Income.

Essential Readings:

1. Billingsley R., Gitman L., & Joehnk M. (2017). *Personal Financial Planning*. Cengage Learning.

2. Tillery S., & Thomas N. Tillery. (2017). *Essentials of Personal Financial Planning*. Association of International Certified Professional Accountants.

Additional Readings:

1. Indian Institute of Banking & Finance. (2017). *Introduction to Financial Planning* (4th ed.).

2. Sinha, M. (2017). *Financial Planning: A Ready Reckoner*. Mc Graw Hill.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

GE 8: WORKING CAPITAL MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Working Capital Management GE-8	4	3	1	0	Class XII	NA

Course Objective(s):

- To provide understanding of the concept and importance of sound working capital strategies of a firm.
- To have an understanding of the impact of working capital policies relating to Cash management, inventory and receivables management on firm's profitability.

Learning Outcomes:

On successful completion of his course, the students will be able to:

- understand the concept and scope of working capital, assess and compute the working capital requirement, and evaluate the techniques for effective management of working capital.
- analyze the importance of cash management, evaluate the motives for holding cash and marketable securities, and apply the strategies and techniques of cash management.
- develop and apply effective receivables management policies to optimize credit policy, analyze creditworthiness, and minimize costs associated with managing accounts receivable.
- analyze and apply different techniques of inventory management, including EOQ, minimum order quantity, ABC analysis, and JIT, to minimize inventory costs while ensuring adequate stock levels.

Course Contents:

Unit 1: Working Capital Management – Introduction (15 Hours)

Concept and Scope of Working Capital, Types of working Capital, Determinants of working capital, Working Capital Cycle, Assessment and Computation of Working Capital Requirement, Profitability–Liquidity trade-off, Working Capital Policies. Brief about working capital financing.

Unit 2: Management of Cash & Marketable Securities (12 Hours)

Meaning of Cash, Motives for holding cash, objectives of cash management, factors determining cash needs, Cash Management: basic strategies, techniques, Lock Box system and

concentration banking. Marketable Securities: Concept, types, reasons for holding marketable securities.

Unit 3: Management of Receivables (9 Hours)

Concept & cost of maintaining receivables, objectives of receivables management, factors affecting size of receivables, policies for managing accounts receivables, analysis for optimum credit policy including credit analysis, credit standards, credit period, credit terms, etc.

Unit 4: Inventory Management (9 Hours)

Inventory: Need for monitoring & control of inventories, objectives of inventory management, Benefits of holding inventory, risks and costs associated with inventories, Techniques of Inventory Management – EOQ, Minimum order quantity, ABC Analysis, JIT etc.

Essential Readings:

1. Bhattacharya, H. (2016). *Working Capital Management: Strategies and Techniques* (4th ed.). PHI.
2. Rustagi, R.P. (2021). *Working Capital Management* (Reprint ed.). Taxmann..
3. Bhalla, V.K. (2011). *Working Capital Management: Text And Cases.* (13th ed.). Anmol Publishing.
4. Periasamy, P. (2012). *Working Capital Management: Theory & Practice*. 2nd Edition. Himalaya Publishing House.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

SEMESTER-V

BBA (FIA)

DISCIPLINE SPECIFIC CORE (DSC) COURSES

DSC 13: FINANCIAL DERIVATIVES

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Financial Derivatives DSC-13	**4**	**3**	**1**	**0**	**Class XII**	**Basic understanding of financial market**

Course Objectives:

The course will help the learner to:

- Understand the basics of spot, forwards, and futures markets, including their history and participants, and learn about the different types of margins and valuation methods.
- Gain knowledge of currency markets and learn how to calculate bid and ask in cross-currency pairs, and how to hedge with futures and forwards.
- Develop an understanding of options trading strategies, including spreads and combinations, and learn how to calculate P/L in option trades.
- Learn about the factors that affect option prices and how to calculate upper and lower bounds of call and put options with and without dividends, as well as the put-call parity theorem.
- Study option valuation models such as the Binomial and Black-Scholes models for stocks and currencies with and without dividends.

Learning Outcomes:

The course will help the learner to:

- Analyze the different types of derivatives and their features, including margins, valuations, and convergence of spot and futures.

- Evaluate the currency market and the strategies involved in hedging using futures and forwards.
- Synthesize the knowledge of options and their trading strategies, including spreads and combinations.
- Apply the binomial and Black-Scholes models to value options with and without dividends.
- Understand the factors affecting option prices and the put-call parity theorem.

Unit 1: Spot, Forwards and Futures **(12 hours)**

Introduction of Spot Market. History of derivatives and origin of derivatives in India. Margins: VaR Margin, ELM, Maintenance margin, Delivery Margin, SPAN Margin. Convergence of Spot and Futures. Participants of Derivatives Markets. Valuation of Forwards and Futures. Contango and Backwardation. Hedging: Long security-sell futures, Speculation: With and Without derivative market, Arbitrage: Buy spot-sell futures & Sell Spot-Buy futures.

Unit 2: Currency Market **(12 hours)**

Currency futures: understand and valuation, Quotations- direct, indirect. Calculation of Bid & Ask in cross currency Pair. Hedging with futures: Concept of Basis & impact of change in basis on Payment/receivables. Hedging with Forwards: Early Delivery, Early Cancelation, Early Extension, Maturity Cancelation and Maturity Extension.
https://www.bseindia.com/downloads/Training/file/NISM-Series-I%20Currency%20Derivatives%20(new%20workbook%20effective%2021-Feb-2012).pdf

Unit 3: Options and Trading Strategies **(9 hours)**

Options: Type – Call and Put &American and European, Payoffs. Calculation of P/L in Option Trade. Factors affecting option Prices. Upper Bound and Lower Bound of Call and Put option with and without dividend. Put - call parity theorem. Spreads (Bull, Bear, Box, Butterfly and Calendar Spread), combinations (Straddle, Strangle, Strip, Straps).

Unit 4: Option Valuation **(12 hours)**

Binomial model: One Period, Two Period and multiple Period. Black-Scholes option model (For stock and currency both) with and without dividend.

Essential Readings:

- NISM. (2012). Currency Derivatives (New Workbook Effective 21-Feb-2012). BSE Institute Limited. https://www.bseindia.com/downloads/Training/file/NISM-Series-I%20Currency%20Derivatives%20(new%20workbook%20effective%2021-Feb-2012).pdf
- Hull, J. C. (2018). *Options, Futures, and Other Derivatives* (10th ed.). Pearson.
- Tuckman, B., & Serrat, A. (2011). *Fixed Income Securities: Tools for Today's Markets* (3rd ed.). John Wiley & Sons.

- McDonald, R. L. (2014). *Derivatives Markets* (3rd ed.). Pearson.

Additional Readings:

- Bhalla, V. K., & Singh, N. (2015). Currency derivatives: A beginner's module. National Stock Exchange of India Limited. https://www.nseindia.com/content/ncfm/ncfm_modules.htm
- Lipton, A. (2015). Mathematical methods for foreign exchange: A financial engineer's approach. World Scientific Publishing Co. Pte. Ltd

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSC 14: CORPORATE RESTRUCTURING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Corporate Restructuring DSC-14	4	3	1	0	Class XII	NA

Course Objective(s):

To provide an understanding of the corporate restructuring, mergers and acquisitions with the basic methods of valuation in methods of payment and financing options at global level.

Learning Outcomes:

After studying this course, the student will be able to:

- Understand the concept and importance of corporate restructuring for growth.
- Recognise opportunities for creating value through Mergers and Acquisitions.
- Illustrate and apply leading methods used in the valuation of a firm for M&A analysis.
- Learn the legal and regulatory framework of Mergers and Acquisitions.

Unit 1: Corporate Restructuring – An Overview (12 hours)

Concept and importance of corporate restructuring, various forms of restructuring: joint ventures (types), Strategic alliance (types), Merger(types), Acquisition(types), Consolidation, Divestiture, Demerger (Spin-off, Split-up, Split-off), Equity carve-out, Management buyout, Leveraged buyout, Buyback of securities, ESOP.

Unit 2: Merger & Acquisition (12 hours)

Motives behind M&A, theories of M&A, process of M&A. Fast track merger. Cross border M&A – concept, benefits & difficulties. Due diligence process.Methods of payment and financing options in M&A.Takeover defence tactics. Reasons for failure of M&A.

Unit 3: Deal Valuation and Evaluation (15 hours)

Methods of valuation; cash flow approaches, economic value added (EVA) (with numerical), sensitivity analysis (with numerical), Valuation for slump sale, valuation of synergy (with numerical), cost-benefit analysis and swap ratio determination (with numerical).

Unit 4: Legal and Regulatory Framework of M&A (6 hours)

Provisions of Companies Act 2013, SEBI Takeover Code 2011, Provisions of Competition Act 2002.

Essential Readings:

1. Weston, F., Chung, K. S., & Siu, J. A. (n.d.). *Takeovers, Restructuring, and Corporate Governance*. Pearson Education.
2. Gupta, M. (2010). *Contemporary Issues in Mergers and Acquisitions*. Himalaya Publishing.
3. Sundarsanam (2006). *Creating Value from Mergers and Acquisitions* (1st ed.). Pearson Education.

Additional Readings:

1. Ramanujan, S. (1999). Mergers: The New Dimensions for Corporate Restructuring. McGraw Hill.
2. Narayankar, R. (2013). Merger and Acquisitions: Corporate Restructuring, Strategy, and Practices (2nd ed.). International Book House Pvt. Ltd.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSC 15: BUSINESS ENVIRONMENT AND POLICY

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Business Environment and Policy DSC-15	4	3	1	0	Class XII	NA

Course Objective(s):

- To evolve a clear understanding of impact of various macroeconomic variables (both internal and external) on business.
- To discuss the various government policies and its impact on the business outcomes.
- To focus on the importance of economic environment and policy in decision making.

Learning Outcomes:

After studying the course the student will be able to

- Become aware and sensitive towards the overall Business environment within country and at global level. Students will be able to:
- Understand and critically evaluate the factors affecting business environment.
- Identify business opportunities both in the country and abroad.
- Understand Economic Survey and its implications for Indian Business Environment.
- Critically evaluate the government policies related to business environment.

Unit 1 Introduction & Macroeconomic Indicators of Indian Economy:

Learning Outcomes:

- Recall the key concepts and definitions related to business environment, macroeconomic indicators, and Sustainable Development Goals.
- Describe the types of business environment, interaction between internal and external environments, nature and structure of the economy.
- Analyze macroeconomic indicators and assess their impact on business operations.
- Evaluate the effectiveness of government policies in addressing economic challenges.
- Evaluate the impact of technology transfers on business operations.
- Develop strategies for businesses to operate in different types of business environments.

(12 hours)

Content:

Introduction: Concept, Significance and Nature of Business Environment, Types of environment, Interaction between Internal and External environments, Nature and Structure of Economy, Techniques for Environment Analysis, Approaches and Significance of Environment Forecasting. Social Responsibility of Business. Technological environment – nature of technology, interface between technology and business, Management of technology transfers. Availability of natural resources and demographic conditions in India.

Macroeconomic Indicators of Indian Economy: Inflation, interest rates, Yield on 91 days Treasury Bills and 10 years Government Securities, changes in exchange rates, Fiscal Deficit, Current account balance (deficit/Surplus) of India's Balance of Payments. India's achievements vis-a vis Sustainable Development Goals (SDG).

Unit 2 Government Policies related to Businesses

Learning Outcomes:

- Recall the key policies related to industrial development, trade, and finance.
- Describe the benefits of digitization and unification of payment systems.
- Apply the concept of ease of doing business to identify strategies to improve business environment in India.
- Analyze the impact of "Make in India" and "Atmanirbhar Bharat" policies on various sectors of the Indian economy.
- Evaluate the impact of digitization and unification of payment systems on the Indian economy.
- Develop strategies to address the challenges faced by businesses in doing business in India.

Content: **(12 hours)**

Industrial Policies; EXIM Policies; Monetary Transmission- Bank's credit to Non- Agriculture sectors; Digitization and Unification of Payment system – UPI; Ease of Doing Business – Concept, Parameters and their measurement, issues and challenges in 'Doing Business'; Disinvestment in Public Sector Units; Understanding of "Make in India" and "Atmanirbhar Bharat" and its impact on Indian Economy.

Unit 3 Relationship between Business and Government

Learning Outcomes:

- Recall the relationship between business and government.
- Understand recent changes in fiscal and monetary policies and their implications for businesses.
- Apply knowledge of government policies to identify opportunities and challenges for businesses.
- Analyze the impact of government policies on the Indian business environment.
- Evaluate the performance of the Indian economy based on the latest Economic Survey.
- Create proposals for new policies to improve the Indian business environment.

(12 hours)

Content:

Relationship between Business and Government; Union Budget as an instrument of growth and its Impact on Business; Recent Changes in Fiscal and Monetary Policies; Impact of Government Policies on Indian Business Environment; Analysis of latest Indian Economic Survey with respect to the performance Indicators and changes from the previous year.

Unit 4 Global Business Environment

Learning Outcomes:

- Understand foreign direct investment (FDI), foreign institutional investment (FII), and their impact on the global business environment
- Understand the role of WTO in regulating international trade and its implications for India.
- Apply knowledge of economic indicators to compare and contrast the performance of India and China.
- Analyze the relative performance of India as a member of BRICS and BIMSTEC.
- Evaluate the attractiveness of specific markets for FDI and FII.
- Develop strategies for attracting FDI and FII to specific markets.
- Create proposals for improving India's comparative performance with China on key economic indicators.

Content: **(9 hours)**

Global Business Environment: Foreign Direct Investment, Foreign Institutional Investment, WTO and India: an overview, Regulation of Foreign Trade; Relative performance of India as a member of BRICS and BIMSTEC; Comparative analysis of India Vs China on major economic indicators.

Essential Reading:

1. Latest Economic Survey of India
2. Latest Union Budget
3. Business Environment by A. C. Fernando, Pearson India, ISBN: 9788131731581.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DISCIPLINE SPECIFIC ELECTIVE (DSE) COURSES

DSE 3: PROJECT APPRAISAL AND FINANCING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Project Appraisal and Financing DSE-3	4	3	1	0	Class XII	NA

Course Objectives:

- To provide an understanding to the students about identification of a project, feasibility analysis, alternative project appraisal techniques, Project financing.

Learning Outcomes:

On successful completion of this course, the students will be able to:

- Apply various methods of project Appraisal.
- Use Capital Budgeting techniques for financial evaluation and selection of Projects.
- Understand the concept and application of Social Cost and Benefit Analysis.
- Carry out Risk Analysis for business projects and identify alternative sources of financing.
- Apply appraisal techniques for evaluating live projects.

Course Contents

Unit 1: Introduction to Projects and their Appraisal (9 hours)

Project Definition, Project Identification, Project Life Cycle, Project Stakeholder Analysis, Feasibility study. Types of Project Appraisal (Brief Overview): Market and Demand Analysis, Technical Appraisal, Financial Appraisal, Economic Appraisal, Managerial Appraisal, and Social Appraisal.

Unit 2: Financial and Social Appraisal (15 hours)

Project Cost and its components, Investment Evaluation Methods (Non-Discounting and Discounting Methods): Payback Period, Accounting Rate of Return, Discounted Payback Period, Net Present Value, Profitability Index, Internal Rate of Return (IRR), Modified Internal Rate of Return (MIRR). Suitability of Methods to different Projects, Investment Evaluation in Practice. Social Appraisal: Rationale for Social Cost Benefit Analysis, Approaches of SCBA (UNIDO and Little-Mirrlees Approach), Environment Impact Assessment (EIA) and Social Impact Assessment (SIA) of Projects. Relevant Case Studies.

Unit 3: Project Risk Analysis (12 hours)

Risk Analysis and Management: Sources and Measures of Risk. Methods of Assessing Risk – Sensitivity Analysis, Scenario Analysis, Break-Even Analysis, Simulation Analysis, Decision Tree Analysis, Project Selection under Risk – Judgmental Evaluation, Payback Period, Risk Adjusted Discount Rate Method, Certainty Equivalent Method, Strategies for Risk Management.

Unit 4: Project Financing (9 hours)

Capital Structure; Choices of Financing; Sources of Financing – Internal Accruals, Equity Capital, Preference Capital, Debentures (or Bonds), Term Loans, Venture Capital, Private Equity, Venture Capital Vs Private Equity, Loan Syndication, Consortium Financing, Public Private Partnership (PPP), Securitization, Crowd Funding; Raising Capital from International Markets: Foreign Issue, Foreign Direct Investment (FDI), External Commercial Borrowings (ECB).

Essential Readings:

1. Chandra, P: *Projects – Planning, Analysis, Selection, Financing, Implementation, and Review*. 2019 Edition. McGraw Hill Education.

2. Agrawal, R., & Mehra, Y. S. (2017). *Project Appraisal and Management*. Taxman Publications.

Additional Readings:

1. Goodpasture, C.J *Quantitative Methods in Project Management*. J. Ross Publishing.
2. Chandra, P, *Financial Management: Theory and Practice*, McGraw Hill Publishing.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSE 5: DIGITAL FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Digital Finance DSE-5	4	3	1	0	Class XII	NA

Course Objective(s):

- To get the students acquainted with the dramatic changes in the financial sector generated by the digital revolution.

Learning Outcomes:

After studying this course the student will get the:

- Understanding of the nature of digital revolution in finance.
- Knowledge of key digital technologies and products, and state reaction to the digital revolution.
- Knowledge of FinTech, big data analytics and new financial business models.

Course Contents:

Unit 1: Digital Transformation of Finance (8 Hours)

Learning Outcomes:

By the end of the unit, students will be able to:

- Recall the major milestones in the history of financial innovation.
- Understand the process of digitization in financial services and its impact on the industry.
- Apply the concepts of FinTech to assess their potential for transforming the financial industry.
- Analyze the different types of FinTech and their specific applications in the financial industry.
- Critically evaluate the impact of different types of FinTech on traditional financial services.
- Propose innovative ideas for further advancing the digitization of financial services.

Content:

A Brief History of Financial Innovation, Digitization of Financial Services, Introduction to FinTech & Funds, FinTech Transformation, FinTech Typology, Collaboration between Financial Institutions and Start-ups. Introduction to Regulation and future of RegTech.

Crowdfunding- Role of finance in economy, the role of financial intermediaries, Types and functioning of crowdfunding markets, Differences between traditional funding models and crowdfunding markets, Informational problems in the crowdfunding model.

Unit 2: Payment Systems **(12 Hours)**

Learning Outcomes:

By the end of the unit, students will be able to:

- Recall the process of digitalization in the payment system.
- Understand the attributes that contribute to a well-functioning payment system.
- Apply understanding of electronic payment systems to assess their suitability for different transaction types.
- Assess the risks and benefits associated with new entrants and payment models for the banking system.
- Evaluate the impact of the growth of digital payments in India on financial inclusion and economic development.
- Develop comprehensive guidelines and policies for digital payments that align with the evolving financial landscape and regulatory requirements.

Content:

Digitalization of the payment system. The historical evolution of the payment system., Attributes of a well-functioning payment system., Banks as guarantors of the payment system, new entrants, and new payment models: risks for the banking system. FinTech applications in Banking & Non-Banking Financial Companies (NBFCs); Insurance; payments; Lending; Audit; and Compliance. Electronic Clearing Service (ECS), Real Time Gross Settlement (RTGS), National Electronic Funds Transfer (NEFT), Immediate Payment Service (IMPS), Unified Payments Interface (UPI), Growth of Digital Payments in India, RBI guidelines on Digital Payments.

Unit 3: Crypto Assets and Blockchains **(20 Hours)**

Learning Outcomes:

By the end of the unit, students will be able to:

- Define crypto assets, cryptocurrencies, and blockchain.
- Summarize the future prospects of cryptocurrencies as a form of currency.
- Apply knowledge of Proptech to evaluate its applications in the real estate industry.
- Evaluate the regulatory debate surrounding cryptocurrencies and blockchain.
- Compare and contrast different blockchain systems and their functioning.
- Propose innovative use cases of Internet of Things (IoT) and Augmented/Virtual Reality (AR/VR) in the financial industry to enhance customer experience and efficiency.

Content:

Introduction: Crypto an asset for trade and Crypto-currency, Problems with issuers credibility, Fin Tech & Securities Trading; Cryptocurrencies and its future as currency, blockchain as a

registration mechanism, Functioning of the block chain system. The integration of digital currency and blockchain and issuers incentive problems; Proptech: FinTech of Real Estate; Possible alternative uses of blockchain technology in the economy and difficulties in its implementation. Use of bitcoin in money laundering., The regulatory debate. Introduction of Central Bank Digital Currency (CBDC). Other Emerging Financial Technologies: Internet of things (IOT) & AR/VR applications.

Unit 4: FinTech, Big Data Analytics, and new Financial Business Models (20 Hours)

Learning Outcomes:

By the end of the unit, students will be able to:

- Recognize the characteristics and features of smart accounts and customized financial products.
- Comprehend the relationship between big data, machine learning, and improved financing decisions.
- Utilize big data and machine learning techniques to improve financing decisions.
- Analyze the risks associated with high-frequency trading and propose mitigation strategies.
- Critically evaluate the role of digital securities as a new systemic risk in the economy.
- Design innovative approaches to leverage big data and machine learning for financing decisions.

Content:

The use of data in traditional credit decisions, the combination of big data and machine learning to improve financing decisions., Smart accounts, customized financial products, risk management and fraud prevention., High frequency trading: opportunities and risks.

Digital security, Challenge of confidentiality, integrity and availability, Digital securities as a new systemic risk in the economy. Regulations on cybersecurity. Latest development in the field of Digital Finance.

Essential Readings:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi..

DSE 6: MICROFINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Microfinance DSE-6	4	3	1	0	Class XII	NA

Course Objective: The course is aimed at evolving clear understanding of role of Microfinance and Insurance in addressing the problem of poverty and income generating activities to the poor people. The participants will be equipped with Microfinance concepts, functions, products and strategies that will help in pertinent policy making in their respective departments/organizations. Participants should concentrate more on the latest publications on various online sites and concerned reports.

Learning Outcomes:

Students after reading this course will become aware and sensitive towards the people at the bottom of the pyramid. They will be able to understand:

- Facts and figures regarding Poverty in India.
- The need and relevance of Microfinance.
- The role of Micro Finance Institutions for financial Inclusions.
- The Role of NGOs in implementing the Governments welfare policies.

Course Contents

Unit 1: Introduction to Microfinance (9 hours)

Learning Outcomes:

By the end of the unit, students will be able to:

- Identify the emerging trends in microfinance.
- Understand the Human Development Index and the Hunger Index.
- Apply the knowledge of the Human Development Index and the Hunger Index to evaluate and compare countries.
- Critically evaluate India's position on the poverty index.
- Evaluate the strengths and weaknesses of different poverty indices.
- Propose strategies for improving India's position on the poverty index.

Content:

Background, evolution, and Overview; Emerging trends in Micro finance; Poverty: Sources and Consequences of Poverty, Understanding the construct of Poverty Indices - The Human Poverty Index (HPI) developed by UN and Global Multidimensional Poverty Index (MPI),

critical evaluation of India's position on the Poverty Index; Understanding of Human Development Index and Hunger Index.

Unit 2: Microfinance Models (12 hours)

Learning Outcomes:

By the end of the unit, students will be able to:

- Identify and describe different models in microfinance.
- Understand the objectives and operations of the different models in microfinance.
- Apply the principles and practices of the models to design and implement microfinance initiatives.
- Analyze the strengths and weaknesses of the models and their impact on rural development.
- Evaluate the success and limitations of the various models in meeting the financial needs of micro-entrepreneurs and assess their scalability.
- Propose innovative microfinance initiatives based on the lessons learned from case studies, considering local context and challenges.

Content:

NABARD model, SIDBI model, SGSY model, Grameen Banking model, NMDFC model, Associations model, Community Banking Model, Credit unions etc. Strategic Issues in Microfinance: Significance of NGOs: their role and responsibilities; case studies.

Unit 3: Microfinance Institutions (12 hours)

Learning Outcomes:

By the end of the unit, students will be able to:

- Recall the different types of MFIs.
- Understand the issues and challenges involved in pricing micro-loans.
- Apply risk management techniques and tools in the context of microfinance operations.
- Assess the commercial viability of MFIs based on financial and operational indicators.
- Evaluate the strengths and limitations of different MFI models and their suitability for different target populations.
- Design innovative MFI models that combine commercial viability with social impact to maximize financial inclusion.

Content:

Eligibility, Regulations, types, Commercial Microfinance: Investing in Microfinance, Viability of MFIs, Risk management in Micro finance; Pricing of Micro-loans: issues and challenges; Strategic Issues in Microfinance, Role of RBI in Financial Inclusion.

Unit 4: Social Rating, Credit Rating of MFIs (12 hours)

Learning Outcomes:

By the end of the unit, students will be able to:

- Recall the concepts of social rating, credit rating and their importance in evaluating the performance of MFIs.

- Understand the significance of impact assessment in evaluating the effectiveness and outcomes of microfinance initiatives.
- Apply the principles and guidelines of the MUDRA Yojana to facilitate access to finance for microenterprises.
- Analyze the challenges and opportunities in implementing microinsurance in the context of microfinance.
- Evaluate the impact and outcomes of different Government welfare schemes in achieving financial inclusion.
- Generate new case studies highlighting successful approaches and lessons learned from government welfare schemes for financial and social inclusion.

Content:

Social Rating, Credit Rating of MFIs and Impact assessment in Micro finance; Micro insurance: issues and challenges; MUDRA Yojana; PMJDY. Government's welfare schemes for financial and social inclusions like Deendayal antyodaya yojana, Pradhan Mantri Garib Kalyan Yojana (PMGKY) (Case Studies).

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSE 7: MANAGEMENT OF FINANCIAL INSTITUTIONS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Management of Financial Institutions DSE-7	4	3	1	0	Class XII	NA

Course Objective(s):

- This course aims at enabling the students to understand and to contribute to the strategic operational policies and risk management practices of financial institutions in a competitive environment.

Learning Outcomes:

After studying this course the student will be able:

- Understand the functioning of a financial institution.
- Understand the entire process of operating a bank and other financial institutions with respects to the rules and regulations prescribed by the regulators.
- Understand the problems faced by the banks like that of NPA or of liquidity challenge etc. and tools and techniques to manage them.

Course Contents:

Unit 1: Foundation and Key Concepts (9 hours)

Financial Intermediation: Types of Financial Services-Depository Institutions, Finance Companies, Security Firms and Investment Banks, Mutual Funds and Hedge Fund Companies, Insurance Companies. An Overview of the Indian Financial System; Regulation of Banks, NBFCs & FIs, Capital Adequacy: Capital adequacy norms; Basel agreement-II&III, CRR & SLR management.

Unit 2: Financial Statement Analysis of Banks (12 hours)

Statement of Financial Sector: Statements of Financial Institutions: Analysing Bank's Financial Statement: The balance sheet; income statement; Cash Flow Statement; profitability, liquidity and solvency analysis; Sources and Uses of Banks Funds, Performance Analysis of banks: CAMELS Risk system; Key Performance Indicators; Data Envelopment Analysis, Asset Liability Management: RBI guidelines on asset liability management.

Unit 3: Measuring and Managing Risk Part 1 (12 hours)

Institutional Risk Management: Interest Rate Risk: Level and Movement of Interest Rates, Term Structure of Interest Rates, Interest Rate Risk Management: Measurement of Interest Rate Risk; Duration and its kinds; Convexity. Managing Interest Rate Risk: Repricing Gap Model, Duration Gap Model, Cash Flow Matching Model; Convexity Adjustments. Credit Risk: Individual Loan Risk, Return on Loans , Measurement of Credit Risk- Models of Credit Risk Measurement and Pricing, Qualitative and Quantitative Models, Loan Portfolio and Concentration Risk, Moody's Analytics Portfolio Manager Model, Loan Volume–Based Models, Loan Loss Ratio–Based Models, Regulatory Models. NPA & its types, Management of NPA Market Risk; Liquidity Risk, Operational Risk.

Unit 4: Measuring and Managing Risk Part 2 (12 hours)

Liquidity Risk Management: Measurement of Liquidity Risk; Measures of Liquidity Exposure; Causes of Liquidity risk: Asset-Side and Liability-Side; Managing Liquidity Risk: Purchased Liquidity management and Stored Liquidity management; Liquidity Planning; Deposit Insurance; Discount Window. Market risk; Banking Book and Trading Book, The Riskmetrics Model, The Historic (Back Simulation) Model, The Monte Carlo Simulation Approach, Regulatory Models: The Bis Standardized Framework, Off- Balance Sheet Risk: Off-Balance-Sheet Activities, Returns and Risk of Off-Balance-Sheet Activities; Technology and Other Operational Risk, Securitization.

Essential Readings:

1. Saunders & Cornett – *"Financial Institutions Management – A risk management approach"* Tata McGraw Hill.
2. Paul, J & Suresh, P -" *Management of Banking and Financial Services*" Pearson.

Additional Readings:

1. Resti & Sironi – *"Risk management and shareholders" value in banking".* John Wiley.
2. RBI Master Circulars and other Regulatory documents applicable at the time of teaching the course.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSE 9: INSURANCE MANAGEMENT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Insurance Management DSE-9	4	3	1	0	Class XII	NA

Course Objectives: To enable students to identify and manage different types of risks. They will be able to understand the concepts, types and principles of Insurance. Further, they will know the important aspects and technical components of management of Insurance business.

Learning Outcomes:

On successful completion of his course, the students will be able to:

- identify and analyze various types of risks faced by individuals and businesses, evaluate the role and importance of insurance in mitigating these risks, and differentiate between different types of insurance
- understand the principles of risk management, techniques for managing risks, and legal principles governing insurance contracts, and develop an understanding of real-world risk management scenarios.

2. Horne, J. C. V., & Wachowicz, J. M. (n.d.). Fundamentals of Financial Management (13th ed.). FT Prentice Hall, Pearson Education.
3. Pandey, I. M. (n.d.). Financial Management. Pearson.

Additional Readings:

1. Khan, M. Y., & Jain, P. K. (n.d.). Financial Management Text, Problems, and Cases. Tata McGraw Hill Publishing Co. Ltd.
2. Brealey, R. R., Myers, S., Allen, F., & Mohanty, P. (n.d.). Principles of Corporate Finance. New Delhi: Tata Mc-Graw Hill.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

GE 3: FUNDAMENTALS OF STOCK TRADING

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Fundamentals of Stock Trading GE-3	**4**	**3**	**1**	**0**	**Class XII**	**Basic understanding of financial concepts and terminology**

Course Objectives:

The course will help the learner to:

- Understand the fundamentals of investment, investment environment, and the principles of sound investment.
- Gain knowledge of the Indian securities market, including primary and secondary markets, IPOs, stock exchanges, and stock indices.
- Learn about online security trading, including trading mechanisms, settlement processes, and different types of orders.
- Understand mutual funds, their structure, advantages, and limitations, as well as different types of schemes and plans.
- Gain knowledge of how to evaluate investment alternatives, including criteria for evaluating mutual funds, and performance evaluation of mutual funds.

Learning Outcomes:

The course will help the learner to:

- Understand the fundamentals of investment, investment environment and principles of sound investment, and evaluate different investment alternatives based on criteria such as risk and return.

- Analyze the Indian securities market, differentiate between capital and money markets, primary and secondary markets, and comprehend the role of market participants such as issuers, investors, and intermediaries.
- Explain the trading mechanism on exchanges, online trading mechanisms, and the types of orders and conditions associated with it.
- Evaluate mutual fund schemes, their structures, advantages, and limitations, and comprehend the factors affecting the choice of mutual funds.
- Analyze the performance evaluation of mutual funds and comprehend the ranking methodology used by CRISIL for mutual funds.

Course Contents

Unit 1: Basics of Investment & Investment Environment (9 Hours)

Fundamentals of Investment, Features of Investment, Investment Environment. Principles of sound Investment. The Investment Decision Process. Modes of Investment – Direct Investing and Indirect Investing, Approaches to Investing – Active Investing and Passive Investing. Risk Return Trade Off. Types of Securities – Equity Shares, Bonds and Debentures, and Government Securities. Alternative Investments (Briefly) – Mutual Funds, Derivatives, Unit Linked Insurance Policy (ULIP), Exchange-traded funds (ETFs), Collective Investment Schemes (CIS), Real Estate Investment Trusts (REITs). Criteria for Evaluation of Investment Alternatives.

Unit 2: Indian Securities Market (12 Hours)

Securities Market – Capital Market and Money Market, Difference between Capital and Money Market, Primary and Secondary Market, Difference between Primary and Secondary Market. Over the Counter (OTC) and Exchange Traded market. Modes of offering Equity Shares – Initial Public Offering (IPO), Follow-on Public Offering (FPO), Difference between IPO and FPO, Difference between Offer for sale (OFS) and Public offer (IPO/FPO). GE 5: ESSENTIALS OF FINANCIAL INVESTMENTS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Essentials of Financial Investments GE-5	4	3	1	0	Class XII	NA

Course Objectives:

- To familiarize students with the essential concepts and fundamentals of financial investments.
- To enable students to understand and make informed choice about thevarious available financial investment alternatives.

Learning Outcomes:

On successful completion of his course, the students will be able to:

- Understand the fundamentals of financial investments and the investment decision process.
- Able to compute various measures of risk and return, and understand their role for evaluating investments.
- Understand and carry out security analysis using different approaches.
- Understand basic approaches to valuation of securities and carry out portfolio analysis.

Course Contents

Unit 1: Investments – An Overview (9 Hours)

Concept of Investment, Financial Investment Vs. Real Investment, Investment Vs Speculation, Objectives or Features of Investment, Risk Return Trade Off, Investment Environment – Overview of Securities Market and Different Types of Financial Investment. Investment Decision Process, Direct Investing Vs Indirect Investing, Approaches to Investing – Active Vs Passive. Diversification, Hedging and Arbitrage.

Unit 2: Risk – Return Analysis (12 Hours)

Concepts of Return and Risk, Types of Return - their Calculation & Utility: Absolute Return, Average Return, Expected Return, Portfolio Return, Holding Period Return, Effective Annualized Return, Risk-Adjusted Return. Causes (or Sources) and Types of Risk – Systematic and Unsystematic Risk, Components of Systematic and Unsystematic Risk, Calculation of Total, Systematic and Unsystematic Risk. Impact of Taxes and Inflation on Investment – Computation of Post Tax and Real Returns.

Unit 3: Security Analysis (12 Hours)

Approaches to Security Analysis – Fundamental Analysis, Technical Analysis, and Efficient Market Hypothesis (EMH). Fundamental Analysis – EIC Framework, Economic Analysis, Industry Analysis, and Company Analysis. Technical Analysis – Basic Tenets of Technical Analysis, Tool of Technical Analysis – Charts, and Technical Indicators, Limitations of Technical Analysis. Difference between Fundamental Analysis and Technical Analysis. Efficient Market Theory (EMH) – Concept, Forms of Market Efficiency, Weak Form Hypothesis, Semi Strong Form, and Strong Form of Market Efficiency. Implications of EMH.

Unit 4: Fundamentals of Valuation and Portfolio Analysis (12 Hours)

Valuation of Equity Shares – Peculiar features of Equity Shares, Dividend Discount Model, Earning Multiplier or Price-Earnings (P/E) Model, and Capital Asset Pricing Model (CAPM). Valuation of Fixed Income Securities – Bond Fundamentals, Types of Bonds, Bond Valuation. Portfolio Analysis – Portfolio Management Process, Portfolio Analysis – Markowitz Model, Portfolio Risk, Portfolio Return.

Essential Readings:

1. Tripathi, V. (n.d.). Security Analysis and Portfolio Management. Taxmann Publications.

Essential Readings:

1. Pathak, B. (2018). *Indian Financial System*. Pearson Publication. (5th ed).
2. Khan, M. Y. (2017). *Financial services*. McGraw Hill Education. (6th ed).
3. Machiraju, H. R. (2002). *Indian Financial System*. Vikas Publication House. (5th ed).

Additional Readings:

1. Verma, J. (1996). *Bharat's manual of merchant banking: Concept, practices and procedures with SEBI clarifications, guidelines, rules and regulations.* Bharat Law House.
2. Sriram K. *Hand Book of Leasing, Hire Purchase & Factoring*. Institute of Chartered Financial Analysts of India.
3. Wright M., Watkins T. & Ennew C. (2016). *Marketing of Financial Services*. Routledge

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

GE 9: ECONOMIC LEGISLATION

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Economic Legislation GE-9	4	3	1	0	Class XII	NA

Course Objective(s):

- To familiarise students with various legislations in the areas of foreign trade, competition, bankruptcy and economic offences.
- To provide an overview of detailed provisions of various economic legislation.
- To enable students to understand the legal implications of unlawful practices and legal recourse available.

Learning Outcomes:

On successful completion of his course, the students will be able to:

- Understand the legal framework relating to foreign exchange, competition, insolvency and fugitive economic offenders.
- Recognise the legal issues in any business transaction and understand lawful way of conduct of economic activities.
- Analyse the legal implications of any economic decision.
- Evaluate legal remedies available in case of bankruptcy or any wrongdoing.

Course Contents:

Unit 1: Competition Act and Fugitive Economic Offenders Act (15 Hours)

The Competition Act, 2002: Introduction, Prohibition of certain agreements, abuse of dominant position and regulation of combinations, Competition Commission of India, Duties, Powers and Functions of Commission, Penalties, Appellate Tribunal.

The Fugitive Economic Offenders Act: Scope and applicability of Act, Confiscation of property, Powers of Directors, Power of Survey, Search and Seizure, notice, procedure for hearing application, Declaration of Fugitive Economic Offender, Power to disallow civil claims, Management of properties confiscated under this Act, Rules of evidence, Appeals.

Unit 2: The Insolvency and Bankruptcy Code (9 Hours)

The Insolvency and Bankruptcy Code, 2016: Introduction of Insolvency and bankruptcy code, Corporate Insolvency Resolution Process, Liquidation Process, Fast Track Insolvency Resolution for Corporate Persons, Voluntary Liquidation of Corporate Persons, Adjudicating Authority for Corporate Persons, Offences and Penalties, Insolvency resolution and bankruptcy

for individuals and partnership firms, Regulation of Insolvency professionals, agencies and information utilities.

Unit 3: The Prevention of Money Laundering Act (12 Hours)

The prevention of money laundering Act, 2002: Introduction and definitions, Punishment for the offence of Money Laundering, Attachment, Adjudication and Confiscation, Obligation of Banking Companies, Financial Institutions and Intermediaries, Summons, Searches And Seizures, Appellate Tribunal and Special Courts, Recovery of fine or penalty.

Unit 4: The Foreign Exchange Management Act (9 Hours)

The Foreign Exchange Management Act, 1999: Introduction of FEMA, Difference between FERA and FEMA, Application and Commencement of FEMA, Regulation and Management of Foreign Exchange, Authorised Person, Contraventions and Penalties, Compounding of Offences, Adjudication and Appeal, Directorate of Enforcement.

Essential Readings:

1. Maheshwari & Maheshwari. *Principle of Business Law.* Himalaya Publishing House

2. Aggarwal R. (2014). *Mercantile & Commercial Law*. Taxmann Publications
3. Kucchal M. & Kuchhal V. (2018). *Mercantile Law*. Vikas Publishing House (P) Ltd.

4. Kapoor N. D. (2018). *Elements of Mercantile Law*. Sultan Chand Publications

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

Semester-VI

BBA(FIA)

DSC 16: INTERNATIONAL FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
International Finance DSC-16	4	3	1	0	Class XII	NA

Course Objective(s):

- To equip the students with the techniques that can help them in managing the financial issues in international environment.
- To help them to manage MNCs in more effective manner.

Learning Outcomes:

By the end of the course, students will be able to

- Understand foreign exchange market.
- Understand country's position in International trade through Balance of Payments.
- Identify risk relating to exchange rate fluctuations and develop strategies to deal with them.
- Understand the various types of exposures and will develop the strategy to handle them.
- Express well considered opinion on issues relating to international financial management.

Course Contents:

Unit 1: International Trade and International Financial Systems (6 hours)

Learning Outcomes:

By the end of the unit, students will be able to:

- Recall the major theories of international trade.
- Understand the components and structure of the Balance of Payments (BoP) and its role in measuring a country's economic relationships with the rest of the world.
- Analyze the strengths and weaknesses of different exchange rate mechanisms and their impact on international trade and financial stability.
- Analyze the components of the Balance of Payments (BoP) and assess their implications for a country's economic performance and external position.
- Assess the effectiveness and limitations of the Balance of Payments (BoP) as a tool for monitoring and managing a country's external transactions.
- Propose strategies to improve the Balance of Payments (BoP) position of a country, considering its economic objectives and external challenges.

Content:
Concept of International Trade, Theories of International Trade. Balance of Payments (BoP) of India. International Monetary System: Different types of Exchange Rate Mechanisms – the Classical Gold Standard, the Gold Exchange Standard, The Bretton Woods System, Current Monetary System.

Unit 2: Forex Market and Forecasting Exchange Rate (15 hours)
Learning Outcomes:
By the end of the unit, students will be able to:

- Recall the concepts of forward rates, swaps, discounts, and premiums in the forward market.
- Understand the concept of currency arbitrage and how it can be utilized in spot markets.
- Apply the models of exchange rate forecasting to predict future exchange rate movements based on relevant economic indicators.
- Analyze the various factors affecting exchange rates and their relative importance in determining currency values.
- Assess the impact of economic, political, and market factors on exchange rates and their potential implications for financial decision-making.
- Develop innovative approaches to minimize the costs and risks associated with forward rates, swaps, discounts, and premiums in the forward market.

Content:
Foreign Exchange Management: Forex Market – Spot and Forward market, Quotations – Direct, Indirect and Cross currency; Types of Transactions and their Settlement Dates. Forward rates, Swaps. Discounts and Premiums in Forward Market. Currency Arbitrage in Spot Markets. Exchange Rate Determination and Forecasting: Models of Exchange Rate Forecasting, Purchasing Power Parity, The Fisher Effect, The International Fisher Effect, Interest Rate Parity Theory, Forward Rate as an Unbiased Predictor. Factors affecting Exchange Rates.

Unit 3: Managing Foreign Exchange Exposures (12 hours)
Learning Outcomes:
By the end of the unit, students will be able to:

- Recall three types of foreign exchange exposures: translation exposure, economic exposure, and transaction exposure.
- Understand the methods for measuring foreign exchange exposures.
- Apply knowledge of different hedging techniques to select and implement the most suitable hedge strategy.
- Analyze the advantages and disadvantages of different hedging techniques.
- Assess the potential economic exposures faced by multinational companies and evaluate strategies to manage and mitigate those exposures.
- Create a hedging strategy that effectively manages transaction exposure in a multinational company.

Content:
Foreign Exchange Exposures – Translation Exposure, Economic Exposure, and Transaction Exposure. Management of Translation Exposure – Alternative Currency Translation Methods. Management of Economic Exposure – Measuring Economic Exposure, Managing Operating Exposure. Management of Transaction Exposure – Forward Market Hedge, Money Market Hedge, and Options Market Hedge.

Unit 4: Multinational Financial Management (12 hours)
Learning Outcomes:
By the end of the unit, students will be able to:

- Recall the concept of international project appraisal and the use of the Adjusted Present Value (APV) method.
- Explain the concept of multinational working capital management and the significance of cash management through bilateral and multilateral netting.
- Apply risk measurement and management techniques to mitigate political risk in international financial management.
- Analyze the advantages and disadvantages of different methods of raising funds from abroad and evaluate their suitability for multinational companies.
- Assess the effectiveness of multinational working capital management strategies in optimizing cash flows and reducing financial risks.
- Create an optimal international portfolio investment strategy that balances risks and returns based on specific investment objectives and market conditions.

Content:
International Project Appraisal – APV method. Multinational Working Capital Management: Multinational Cash Management (Bilateral and Multilateral Netting). Measuring and Managing Political Risk. International Investment Management: International Portfolio Investment – The Risks and Benefits of International Equity Investing, International Diversification, International Bond Investing, Optimal International Asset Allocation, Measuring Returns from Foreign Portfolio Investment. Raising Funds from abroad – GDR, ADR, Euro bonds, and Global bonds.

Essential Readings:
1. Apte, P. G. (2020). *International Financial Management*. Tata McGraw Hill.
2. Shapiro, A. C. (2019). *Multinational Financial Management*. Prentice Hall.

Additional Readings:
1. Eun, C. S., & Resnick, B. G. (2021). *International Financial Management*. McGraw Hill.
2. Levi, M. D. (2009). *International Finance. Routledge*, Taylor & Francis Group.
Latest editions of references may be used.
Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSC 17: CORPORATE ETHICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Corporate Ethics DSC-17	4	3	1	0	Class XII	NA

Course Objective:

- To provide a detailed insight into issues and practices of corporate ethics, corporate governance and CSR to encourage moral practices and sensitivity towards the ethical dimension of managerial problems.
- To highlight the role of business in sustainable development and current regulation in this field.
- To enable students to handle ethical dilemmas in decision making

Learning Outcomes:

After studying the course the student will be able to:

- Understand the role of ethics, governance and CSR as an organization practice.
- Understand various aspects of corporate governance and apply the same in their role as future managers and directors of various business enterprises.
- Understand the corporate sustainability and its reporting requirements.
- Evaluate ethical aspects of any decision
- Create ethically and socially responsible businesses

Course Contents:

Unit 1: Corporate Ethics (9 hours)

Meaning, role and importance, theories of ethics: utilitarianism: weighing social cost and benefits, virtue ethics, teleological theories, egoism, rights and duties, justice and fairness, ethics of care. Worker's and employee's rights and responsibilities. Ethics in compliance, Ethics in finance, Ethics in human resources: gender ethics, sexual harassment and discrimination, ethics in marketing. Ethical dilemma.

Unit 2: Corporate Governance (12 hours)

Need and Importance, Role of Board of Directors, Code of Ethics, Code of Conduct, Model Code of Business Conduct & Ethics and Corporate Governance Committees: International and Indian Experience, Whistle Blower Policy and Whistle Mechanism. Anti-Corruption Policy and integrity training.

Unit 3: Sustainable Development (12 hours)

Role of business in sustainable development, corporate sustainability. Sustainability reporting: government role in improving sustainability reporting, triple bottom line (TBL). Global Reporting Initiative (GRI), UN global compact, sustainability indices, sustainability reporting framework in India, challenges in sustainability reporting. Contemporary developments:

integrated reporting, integrated reporting by listed entities in India. Relation between integrated reporting and sustainability reporting.

Unit 4: Corporate Social Responsibility (12 hours)

Corporate Social Responsibility (CSR): Meaning and definitions of CSR, CSR and philanthropy, factors influencing CSR, CSR in India. Corporate Social Responsibility Voluntary Guidelines, 2009. CSR under the Companies Act, 2013.Corporate citizenship – beyond the mandate of law, CSR audit, profit maximization vs. social responsibility.

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSC 18: FINANCIAL SERVICES

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Financial Services DSC-18	4	3	1	0	Class XII	NA

Course Objective:

- To arm students with the key concepts, evaluative tools and techniques necessitated by today's dynamic banking environment to work cross-functionally within retail and institutional clients across an extensive range of financial services.

Learning Outcomes:

After studying the course the student will be able to:

- Understand the various financial services available in financial markets particularly in India along with the latest innovations and technological integration in the field of finance.

Course Contents:

Unit 1: Introduction to Financial Services (9 hours)

Introduction to Financial Services: Constituents of the Financial Sector – Institutional Structure (Banking, Insurance, Mutual Funds, Pension Funds, Foreign Institutional Investors) – Financial Markets (Money, Equity, Debt, G-Sec, Forex & Commodities)) – Financial Sector and the Pandemic, Basel Accords and Banking Regulation, Emergence of Digital Finance and AI Based Asset Managers, Discount Broking v/s Full-service Broking.

Unit 2: Merchant Banking (12 hours)

Merchant Banking –meaning, nature and function; merchant banking in India, role in issue management; Book building process, green shoe option. Mutual Fund: types of Mutual Funds and different types of schemes, concept of NAV, Credit Rating Agencies: Role and mechanism. Depository services- meaning, role of depository and their services, Depository in India- NSDL & CDSL.

Unit 3: Leasing and Hire Purchase (15 hours)

Leasing and Hire Purchase :Concepts of leasing, types of leasing – financial & operating lease, direct lease and sales & lease back, advantages and limitations of leasing, Lease rental determination; Finance lease evaluation problems, Hire Purchase interest & Installment, difference between Hire Purchase & Leasing, Choice criteria between Leasing and Hire

Purchase mathematics of HP, Factoring, forfaiting and its arrangement, Housing Finance : Meaning and rise of housing finance in India, Fixing the amount of loan, repricing of a loan, floating vs. fixed rate, Practical problems on housing finance.

Unit 4: Venture Capital (9 hours)

Alternative Investments: Venture Capital: Concept, history and evolution of VC, the venture investment process, various steps in venture financing, incubation financing, buy-outs. Real Estate, Private Equities, Commodities: Concepts, Classification, history Insurance: concept, classification, principles of insurance, IRDA and different regulatory norms, operation of General Insurance, Health Insurance, Life Insurance. Securitization: concept, securitization as a funding mechanism, Traditional and non-traditional mortgages, Graduated-payment mortgages (GPMs), Pledged-Account Mortgages (PAMs), Centralized Mortgage obligations (CMOs), Securitization of non-mortgage assets, Securitization in India. US 2008 sub-prime mortgage crisis. Cases of Bear Stearn, Lehman Brothers.

Essential Readings:

1. Khan, M. Y., *Financial Services*, Tata McGraw –Hill.
2. Machiraju, *Indian Financial System*, Vikas Publishing House.

Additional Readings:

1. Verma, J. C., *A Manual of Merchant Banking*, Bharath Publishing House.
2. Sriram, K, *Hand Book of Leasing, Hire Purchase & Factoring*, ICFAI, Hyderabad.
3. Ennew. C., Watkins, T & Wright, M. *Marketing of Financial Services*, Heinemann Professional.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DISCIPLINE SPECIFIC ELECTIVE (DSE) COURSES

DSE 1: STRATEGIC CORPORATE FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Strategic Corporate Finance DSE-1	4	3	1	0	Class XII	Basic of Finance

Course Objectives:

- To know the details of corporate finance and the strategies involved in the corporate decisions.
- To enable the students to steer the corporate strategies issues and challenges in better manner.
- To provide the key concepts and ideas of decision tree analysis and the Black-Scholes model in the valuation of real options.
- To assess the considerations and strategies involved in company disposals, including non-core subsidiary sales, valuation, timing, and tax planning.

Learning Outcomes:

After studying this course the learners will be able:

- Understand the role of strategy and planning in financial decisions
- Understand the importance and components of a Value Added Statement.
- Identify different types of strategic costing and their relevance.
- Discuss strategic cost reduction techniques.
- Determine the feasibility of a management buy-out.
- Develop a business plan and financial forecasts for submission to potential funders.
- Define bankruptcy and Identify factors leading to bankruptcy.
- Understand the process of reorganizing distressed firms and liquidation process of firms
- Gain an overview of company valuation.
- Analyze the substitutability of capital structure.

Course Contents:

Unit 1 **(12 hours)**

Introduction to strategic corporate finance: Strategy Vs Planning, significance of strategy in financial decisions, Different types of financial strategy for Shareholders Wealth Maximization, Economic Value Addition, Value added statement. Strategic Cost Management:

Traditional costing Vs Strategic Costing, Relevant costs Vs Irrelevant costs, Different types of strategic costing and their relevance- Target Costing, Activity based Costing, Life Cycle Costing, Quality Costing, Zero Based Budgeting, Strategic cost reduction techniques and value chain analysis.

Unit 2 **(12 hours)**

Management Buy-outs: Establishing feasibility of the buy-out, Negotiating the main terms of the transaction with the vendor including price and structure, Developing the business plan and financial forecasts in conjunction with the buy-out team for submission to potential funders.
Management Buy-ins: Management Buy-in/Buy-outs ("BIMBOs"), Vendor-initiated buyouts/buy-ins.
Real options: Financial and real options compared, various types of real options, the Black Scholes model, Decision tree analysis, application of Real options, Drawbacks of Real options.

Unit 3 **(12 hours)**

Financial Distress and restructuring: Meaning of Bankruptcy, Factors leading to bankruptcy, symptoms and predictions of bankruptcy, reorganization of distressed firms, liquidation of firms.
Company disposals: sale of a non-core subsidiary, Exit strategy, valuation, timing of sale and tax planning opportunities and calculation of the various tax implications.
Fundraising: identification of different sources of development capital, determination of capital structure and factors affecting the capital structure, cost of capital and cost saving strategy.

Unit 4

(9 hours)

Company Valuation: an overview of valuation, valuation principles and practices, the impact of "what if" scenarios. Other strategic issues: managing credit ratings, dividend and share repurchase policy. Strategic risk management, substitutability of capital structure, risk management choices, financial, physical and operational hedging.

Essential Readings:

1. Pettit, J., *Strategic Corporate Finance Applications in Valuation and Capital Structure*, John willey & sons, Inc.
2. Damodaran, A., *Corporate finance theory and practice*; John willey & sons.

Additional Readings:

3. Jakhotia, *Strategic Financial Management*, Vikas Publication.
4. Damodaran, A., *Applied Corporate Finance*, John willey & Sons.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSE 2: CORPORATE ANALYSIS & VALUATION

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Corporate Analysis & Valuation DSE-2	4	3	1	0	Class XII	Basic of Accounting and finance

Objective:

- To enable the learners to analyse the health of a company through their annual reports and will equip them to understand how to determines its value.

Learning Outcomes:

After studying this course the learner will be able to understand:

- The financial health of a company through qualitative and quantitative analysis.
- The basic of valuation and Cash Flows Forecasting.
- The various valuation techniques for company's valuation and their application

Course Contents

Unit 1: Analysis of Corporate Financial Statements (12 hours)

Analysis of Corporate Financial Statements: Income statements and Balance sheets through ratio analysis and analysing the Chairman's statement, Directors' report, management discussion & analysis, report on corporate governance, auditor's report to evaluate the financial soundness of the company. Understanding financial statements of manufacturing and service organisations. Common size analysis and relevant ratios (Study from the Annual Reports of the companies).

Unit 2: Introduction to Valuation Techniques & Cash Flows Forecasting (12 hours)

Introduction to Valuation: Value and price, Balance sheet-based methods, Income statement-based methods. Cash flow discounting-based methods. Deciding the appropriate cash flow for discounting, The free cash flow to the firm, free cash flow to equity. Forecasting Cash flows: simple model for forecasting income and cashflows. Earnings, Tax effect, Reinvestment needs, dividend.

Unit 3. DCF Valuation, Discount Rates & Beta (12 hours)

Discounted Cash flow Valuation: Valuation of a company with no growth, constant growth, variable growth and infinite life. Estimating Discount Rates – cost of equity, cost of debt, tax

shield, weighted average cost of capital. Calculation of beta, instability of beta, adjusted beta, levered and unlevered beta.

Unit 4: Relative Valuation & Other Applications (9 hours)

Relative Valuation: standard multiples, comparable companies, potential pitfalls; estimating multiples using regression. Valuation of brands and intellectual capital. Interest rates and company valuation. Impact of inflation on valuation. Reconciling relative and discounted cash flow valuation. Case studies in valuation.

Essential Readings:

1. Damodaran, A. (2016). Damodaran on Valuation: Security Analysis for Investment and Corporate Finance. John Wiley & Sons.

2. Chandra, P. (2019). Corporate Valuation and Value Creation. Tata McGraw-Hill. Education.

Additional Readings:

1. Foster, G. (1986). Financial Statement Analysis. Prentice Hall.

Latest Editions of the Readings may be used.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSE 4: FINANCIAL ECONOMETRICS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Financial Econometrics DSE-4	**4**	**3**	**1**	**0**	**Class XII**	**Basic understanding of statistics and time series analysis**

Learning Objectives

The course will help the learner to:

- Understand the statistical properties of financial returns, including their distribution, time dependency, and linear dependency across asset returns.
- Develop knowledge of univariate time series analysis, including the Lag operator, ARMA processes, and the Box-Jenkins approach.
- Gain proficiency in modeling volatility using conditional heteroscedastic models, such as ARCH and GARCH models, and forecasting with GARCH models.
- Learn multivariate GARCH models, including the VECH model, diagonal VECH model, and BEKK model, and estimation of a multivariate model.
- Acquire knowledge of vector autoregressive models, Granger causality tests, and Johansen cointegration tests and their hypothesis testing methods.

Learning Outcomes:

The course will help the learner to:

- Analyze the statistical properties of financial returns and evaluate their distribution, time dependency, and linear dependency across assets using knowledge and comprehension skills.
- Create and apply univariate time series models, including AR, MA, and ARMA processes, using synthesis and evaluation skills to forecast financial returns.
- Develop and estimate conditional heteroscedastic models, such as ARCH and GARCH models, using analysis and evaluation skills to model and forecast volatility.

- Construct and evaluate multivariate GARCH models, including VECH, Diagonal VECH, and BEKK models, using synthesis and evaluation skills to model volatility and correlations.
- Evaluate and apply advanced econometric techniques, including VAR, GCT, and JCT, using analysis and evaluation skills to test hypotheses and model complex relationships in financial time series data.

Course Contents:

Unit 1: Statistical Properties of Financial Returns & Univariate Time Series and Applications to Finance (15 hours)

Introduction Asset Returns, Calculation of Asset Returns (Continuous and discreate both), Compare Continuous return with non-Continuous return and explain its benefits. Facts about Financial Returns, Distribution of Asset Returns, Time Dependency, Linear Dependency across Asset Returns.

Introduction to Univariate Time Series, The Lag Operator, Properties of AR Processes, Properties of Moving Average Processes, Autoregressive Moving Average (ARMA) Processes, The Box-Jenkins Approach.

Unit 2: Modelling Volatility – Conditional Heteroscedastic Models (9 hours)

Introduction to Modelling Volatility, ARCH Models, GARCH Models, Estimation of GARCH Models, Forecasting with GARCH Model, Asymmetric GARCH Models, The GARCH-in-Mean Model

Unit 3: Modelling Volatility and Correlations – Multivariate GARCH Models (9 hours)

Introduction to Modelling Volatility and Correlations, Multivariate GARCH Models, The VECH Model, The Diagonal VECH Model, The BEKK Model, The Constant Correlation Model, The Dynamic Correlation Model, Estimation of a Multivariate Model

Unit 4: Vector Autoregressive Models (VAR), Granger Causality Test (GCT) and Johansen Cointegration Test (JCT) (12 hours)

Introduction to VAR, Deep understanding of VAR, Issues in VAR, Hypothesis Testing in VAR.
Introduction to GCT, Deep understanding of GCT, Issues in GCT, Hypothesis Testing in GCT
Introduction to JCT, Deep understanding of JCT, Issues in JCT, Hypothesis Testing in JCT.

Essential Essential/ recommended Readings

DSE 8: MARKETING OF FINANCIAL SERVICES

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Marketing of Financial Services DSE-8	4	3	1	0	Class XII	NA

Course Objective:

- To introduce students to the marketing of financial services. All financial institutions, including consumer banks and corporate finance services, practice some form of marketing. Some firms market themselves better than others, as evidenced in the competitive value of their brands. This course also operationalizes several marketing concepts such as segmentation, targeting, and positioning.

Learning Outcomes:

After studying this course the student will be able to:

- Explain and illustrate some of the frameworks and approaches that are helpful in marketing financial services**.**
- Outline how to efficiently manage multiple product or brand portfolios across multiple customer segments, and how to develop an effective marketing strategy in modern financial service organizations.

Course Contents:

Unit 1: Introduction to Marketing of Services (12 hours)

Growth of the Service Sector – The Concept of Service – Characteristics of Services, Classification of Services, Service Marketing Mix (Additional Dimensions in Services Marketing – People, Physical Evidence and Process). Internal Marketing of a Service - External versus Internal Orientation of Service Strategy, Service Encounter, Service Failure and Service Recovery, learning from customer feedback.

Unit 2: Marketing Strategy (12 hours)

Planning, organizing and implementing marketing operations; marketing as a management function. Market Research – Establishing a marketing information system; the marketing research process. Market segmentation – Target marketing; Market segmentation, targeting and positioning the financial services organization in the market place.

Unit 3: Banking and Insurance Services (12 hours)

Retail Financial Services: Retail banking, meaning of banking business, introduction to various bank products, selling bank products. Concept of cross selling, Impact of technology on bank marketing (Internet banking, mobile banking and UPI). Insurance – Meaning, advantages

various types of insurance, financial planning process. Risk Management – Strategy to cover risk, introduction to IRDAI, selling of insurance plans. Bancassurance – Bank as a distribution channel for insurance services**.**

Unit 4: Regulations Governing Financial Services Marketing (9 hours)

Ethical issue in the marketing of financial services, Ethics in relation to the individual and society as a whole. Mutual Fund Structure, sales and distribution channels. Distribution channels; the impact of technology; online marketing, The dimension of customer care; services quality and services recovery; global marketing.

Essential Readings:

1. Zeithaml, V. A., Bitner, M. J., Gremler, D. D., & Pandit, A. (n.d.). *Services Marketing*. McGraw Hill.

2. Avdhani, V. A. (n.d.). *Marketing of Financial Services*. HPH.

3. Gupta, P. K. (n.d.). *Insurance and Risk Management*. HPH.

4. Estelami, H. (n.d.). *Marketing Financial Services*.

Examination scheme and mode:

Evaluation scheme and mode will be as per the guidelines notified by the University of Delhi.

DSE 10: ENTREPRENEURIAL FINANCE

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Entrepreneurial Finance DSE-10	4	3	1	0	Class XII	Basic understanding of concepts related Entrepreneurship

Course Objectives:

The Learning Objectives of this course are as follows:

- To develop an understanding of the principles of entrepreneurial finance and the role of finance in the successful venture life cycle.
- To identify and analyze the key elements of a business plan and choose an appropriate form of business organization for the venture.
- To apply short-term and long-term financial planning techniques to forecast sales, estimate sustainable growth rates, and determine additional financing needs to support growth.
- To analyze different valuation methods, including discounted cash flow and venture capital valuation, and apply them to value early-stage ventures and venture capital investments.
- To evaluate different financing alternatives, including professional venture capital, business incubators, seed accelerators, and foreign investor funding sources, and design appropriate security structures for growing ventures, such as common stock, preferred stock, convertible debt, and warrants/options.

Learning Outcomes:

Upon completion of the course the learner will be competent to:

- Apply the principles of entrepreneurial finance and understand the role it plays in the successful venture life cycle, including the key elements of a business plan and forms of business organizations.
- Develop short-term and long-term financial plans using systematic forecasting techniques and estimate sustainable sales growth rates and additional financing needed to support growth.
- Evaluate early-stage ventures using different valuation methods, including present value, discounted cash flow, and venture capital valuation techniques.

- Compare and analyze different financing alternatives, including professional venture capital, business incubators, seed accelerators, and foreign investor funding sources, and design appropriate security structures for growing ventures.
- Adopt a life cycle approach for entrepreneurial finance and understand financial bootstrapping and business angel funding as alternative financing options for the different stages of the venture life cycle.

Course Contents

Unit I: Introduction to Finance for Entrepreneurs (9 hours)
Principles of Entrepreneurial Finance, Role of Entrepreneurial Finance. The Successful Venture Life Cycle. Key Elements of a Business Plan. Forms of Business Organisations and Choosing the Appropriated Organization. Financing through the Venture Life Cycle, Financial Bootstrapping and Business Angel Funding. Life Cycle Approach for Entrepreneurial Finance.

DEPARTMENT OF PUNJABI

FIFTH SEMESTER

Category I

Discipline Specific Courses offered by Department of Punjabi for the UG Programme with Punjabi as the Single Core Discipline

[UG Programme for Bachelor in **Punjabi (Honours)** degree in three years]

DISCIPLINE SPECIFIC CORE COURSE- 13 (DSC-13)

MADHKALI PUNJABI SAHIT DA ITIHAS

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Madhkali Punjabi Sahit da Itihas (DSC-13)	4	3	1	0	Class 12th pass in any subject	Studied Punjabi up to 10th Standard or *Working knowledge of Punjabi language*

Learning Objectives:

- The course is structured to provide students with a comprehensive idea about the development of medieval Punjabi literature and language over the ages.
- The course will trace the trajectory of the growth of Punjabi literature from the period of its inception, dating back to the 12th century to the 19th Nine century.
- The course is also designed to help the students to develop an understanding of the structural development of the Punjabi language and literature and also to inform them about the various external linguistic influences that have contributed to the making of the language as we now know it to be.

Learning Outcomes:

- The course will offer extensive insight into the history of medieval Punjabi literature, while laying special emphasis on various literary movements, genres and writers that are held to be the representatives of their times.
- The students will be able to evaluate the ways, socio-cultural and historical phenomena influence the literary production of a particular period.

- By familiarizing students with the socio-cultural ambience and the discursive frameworks of various ages, the course helps them to develop a nuanced appreciation of the literary stalwarts of those times.
- The students are also offered an in-depth understanding on the growth of the Punjabi language under the influence of various other languages including Sanskrit and Persian.

Unit- I: ਪੰਜਾਬੀ ਸਾਹਿਤ ਦਾ ਮੁਢਲਾ ਦੌਰ (Punjabi Sahit da Mudhla Daur) (12 hours)

- ਮੱਧਕਾਲ ਬਾਰੇ ਸੰਖੇਪ ਜਾਣ-ਪਛਾਣ

  Madhkaal Bare Sankhep Jaan-Pachhan
- ਮੱਧਕਾਲ ਦੇ ਸਮਾਜਕ-ਰਾਜਨੀਤਕ ਮਸਲੇ

  Madhkaal de Smajak-Rajnitak Masle
- ਨਾਥ ਜੋਗੀਆਂ ਦਾ ਸਾਹਿਤ

  Naath Jogiyan da Sahit
- ਲੋਕ ਵਾਰਾਂ

  Lok Varan

Unit-II: ਗੁਰਮਤਿ ਕਾਵਿ ਧਾਰਾ (Gurmat Kaav Dhara) (11 hours)

- ਗੁਰੂ ਬਾਣੀਕਾਰਾਂ ਨਾਲ ਸੰਖੇਪ ਜਾਣ-ਪਛਾਣ

  Guru Banikaran Naal Sankhep Jaan-Pachhan
- ਗੁਰਮਤਿ ਕਾਵਿ ਦੇ ਪ੍ਰਮੁੱਖ ਰੂਪਾਕਾਰ (ਸ਼ਬਦ, ਸਲੋਕ, ਪਦ, ਬਾਰਾਂਮਾਂਹ)

  Gurmat Kaav de Parmukh Roopakar (Shabad, Salok, Pad, BarahManh)
- ਗੁਰਮਤਿ ਕਾਵਿ ਦਾ ਸਮਾਜਕ-ਸਭਿਆਚਾਰਕ ਪੱਖ

  Gurmat Kaav da Samajak-Sabhyacharak Pakh
- ਗੁਰੂ ਗ੍ਰੰਥ ਸਾਹਿਬ ਦੀ ਸੰਪਾਦਨ ਕਲਾ

  Guru Granth Sahib di Sampadan Kala

Unit-III: ਸੂਫ਼ੀ ਤੇ ਕਿੱਸਾ ਕਾਵਿ ਧਾਰਾ (Sufi te Qissa Kaav Dhara) (11 hours)

- ਪ੍ਰਮੁੱਖ ਸੂਫ਼ੀ ਕਵੀਆਂ ਨਾਲ ਸੰਖੇਪ ਜਾਣ-ਪਛਾਣ

  Pramukh Sufi Kaviyan Naal Sankhep Jaan-Pachhan
- ਸੂਫ਼ੀ ਕਾਵਿ ਦੇ ਪ੍ਰਮੁੱਖ ਰੂਪਾਕਾਰ (ਕਾਫ਼ੀ, ਅਠਵਾਰਾ, ਗੰਢਾਂ, ਡਿਉਢਾਂ)

  Sufi Kaav de Pramukh Roopakar (Kafi, Athvara, Gandhan, Diodhan)
- ਪ੍ਰਮੁੱਖ ਕਿੱਸਾ ਕਵੀਆਂ ਨਾਲ ਸੰਖੇਪ ਜਾਣ-ਪਛਾਣ

  Pramukh Qissa Kavian Naal Sankhep Jaan-Pachhan
- ਕਿੱਸਾ ਕਾਵਿ ਦਾ ਸਮਾਜਕ-ਸਭਿਆਚਾਰਕ ਪੱਖ

  Qissa Kaav da Samajak-Sabhyacharak Pakh

Unit- IV: ਬੀਰ ਕਾਵਿ ਤੇ ਮੱਧਕਾਲੀ ਵਾਰਤਕ (Bir Kaav te Madhkali Vartak) (11 hours)

- ਵਾਰ ਕਾਵਿ: ਨਿਕਾਸ ਤੇ ਵਿਕਾਸ

  Vaar Kaav: Nikas te Vikas
- ਜੰਗਨਾਮਾ ਕਾਵਿ: ਨਿਕਾਸ ਤੇ ਵਿਕਾਸ

  Jangnama Kaav: Nikas te Vikas
- ਸਾਖੀ ਤੇ ਜਨਮਸਾਖੀ ਪਰੰਪਰਾ: ਨਿਕਾਸ ਤੇ ਵਿਕਾਸ

  Sakhi te Janamsakhi Parampara: Nikas te Vikas
- ਗੋਸਟਿ, ਟੀਕਾ, ਨਾਮਾ ਸਾਹਿਤ: ਨਿਕਾਸ ਤੇ ਵਿਕਾਸ

  Gosht, Teeka, Nama Sahit: Nikas te Vikas

Essential Readings:

DISCIPLINE SPECIFIC CORE COURSE -15 (DSC-15)

PUNJABI SUFI KAAV

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Punjabi Sufi Kaav (DSC-14)	4	3	1	0	Class 12th pass in any subject	Studied Punjabi up to 10th Standard or *Working knowledge of Punjabi language*

Learning Objectives:

- The course is designed to learn the origin of Sufism, philosophy of Sufis and relevance of that philosophy in the contemporary scenario.
- The course will help the students to understand how the Sufis changed socio-religious structure of Punjab through their spiritual experiences.
- To analyse the thematic patterns of Punjabi Sufi Poetry and various literary genres used in Sufi poetry.

Learning Outcomes:

- Students will be able to examine the religious diversity and reflection of human experiences of shared spaces in Punjabi society.
- They will examine Punjabi religion and culture through poetic texts written by Sufis.
- They will develop the sense of awareness about the environment and they will realize the inter-relationship between man and environment by a close reading of Sufi poetry.

COMMON POOL OF Discipline Specific Elective COURSES (DSE)
OFFERED BY THE DEPARTMENT OF PUNJABI

DISCIPLINE SPECIFIC ELECTIVE (DSE-9)
DELHI DA PUNJABI SAHIT

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Delhi da Punjabi Sahit (DSE-9)	4	3	1	0	Class 12th pass in any subject	**Studied Punjabi up to 10th Standard** **or** ***Basic knowledge of Punjabi language***

Learning Objectives:

- The course is structured to provide students with a comprehensive idea about the development of Punjabi literature in Delhi.
- The course will trace the trajectory of the growth of Punjabi literature from the period of Partition when most of the Punjabi authors settled in Delhi.
- The course is also designed to inform the students about the various dialects' influences on the Punjabi literature written in the National capital.

Learning Outcomes:

- The students will come to know about various literary movements, genres and writers that are held to be the representatives of their times.
- The students will be able to evaluate the ways, socio-cultural and historical phenomena influence the literary production of a particular period.
- They will understand the importance of cosmopolitan consciousness through a deep reading of the Punjabi literature written in the National capital.

DISCIPLINE SPECIFIC ELECTIVE (DSE-16)
SAHIT ATE ALOCHNA NAAL SAMBANDHAT PRAMUKH SANKALP

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Sahit ate Alochna naal Sambandhat Pramukh Sankalp (DSE-16)	4	3	1	0	Class 12th pass in any subject	**Studied Punjabi up to 8th Standard or** ***Working knowledge of Punjabi language***

LEARNING OBJECTIVE:

- Sophisticated critical engagement with literary and cultural texts, including consideration of the relationship between imaginative expression and the cultural and material circumstances in which that expression takes place and is received.
- Knowledge of literary critical methodologies: close reading, textual analysis, ability to make a disciplinary argument based on disciplinary use of evidence.

LEARNING OUTCOMES:

- The students will get an understanding of the major methods and interpretive theories in the field of literary studies.
- Students will develop an ability to propose arguments that present, develop, and defend insightful claims about texts through formal analysis, engagement with existing criticism, and when appropriate, engagement with primary and secondary material from the historical period.
- They will develop a feeling of belongingness through the reading of literary theories in the Indian and western academics.

Unit-I: ਭਾਰਤੀ ਕਾਵਿ ਸ਼ਾਸਤਰ ਨਾਲ ਸੰਬੰਧਤ ਸੰਕਲਪਾਤਮਕ ਸ਼ਬਦਾਵਲੀ (Bharti Kaav Shastar Naal Sambandhat Sankalpatmak Shabdawali) (12 hours)

- ਸ਼ਬਦ ਸ਼ਕਤੀਆਂ: ਅਭਿਧਾ, ਲਖਸ਼ਣਾ, ਵਿਅੰਜਨਾ

  Shabad Shaktian: Abhidha, Lakhshna, Vianjana
- ਮਾਤਰਕ ਛੰਦ: ਕਬਿੱਤ,ਕੋਰੜਾ, ਚੋਪਈ, ਬੈਂਤ, ਸਵੱਯਾ

  Matrak Chand: Kabit, Korda, Chopai, Baint, Savayya
- ਰਸ: ਸਿੰਗਾਰ ਰਸ, ਕਰੁਣਾ ਰਸ, ਰੌਦਰ ਰਸ ਅਤੇ ਬੀਰ ਰਸ

  Ras: Singar Ras, Karuna Ras, Raudar Ras ate Beer Ras
- ਸ਼ਬਦ ਅਤੇ ਅਰਥ ਅੰਲਕਾਰ : ਅਨੁਪ੍ਰਾਸ, ਸਲੇਸ਼, ਉਪਮਾ, ਰੂਪਕ ਅਤੇ ਦ੍ਰਿਸ਼ਟਾਂਤ

Shabad ate Arth Alankaar: Anupras, Shlesh, Upma, Rupak ate Drishtant

Unit-II: ਪੱਛਮੀ ਅਤੇ ਪੰਜਾਬੀ ਕਾਵਿ ਸ਼ਾਸਤਰ ਨਾਲ ਸੰਬੰਧਤ ਸੰਕਲਪਾਤਮਕ ਸ਼ਬਦਾਵਲੀ (Pachhmi ate Punjabi Kaav Shastar Naal Sambandhat Sankalpatmak Shabdawali) (11 hours)

- ਕਲਾਸੀਕਲ ਪੱਛਮੀ ਕਾਵਿ: ਅਨੁਕਰਨ, ਤ੍ਰਾਸਦੀ, ਕਥਾਰਸਿਸ ਅਤੇ ਉਦਾਤ (ਸੰਖੇਪ ਜਾਣ-ਪਛਾਣ)

  Classical Pachhmi Kaav: Anukaran, Trasdi, Ktharsis ate Udaat (Sankhep Jaan-Pachhan)
- ਆਧੁਨਿਕ ਪੱਛਮੀ ਆਲੋਚਨਾ-I: ਰੁਮਾਂਸਵਾਦ, ਯਥਾਰਥਵਾਦ, ਅਸਤਿਤਵਵਾਦ, ਮਨੋਵਿਗਿਆਨ (ਸੰਖੇਪ ਜਾਣ-ਪਛਾਣ)

  Adhunik Pachhmi Alochana-I: Rumansvad, Yatharthvaad, Astitvavaad, Manovigian (Sankhep Jaan-Pachhan)
- ਆਧੁਨਿਕ ਪੱਛਮੀ ਆਲੋਚਨਾ-II: ਚਿਹਨ, ਚਿਹਨਿਕ, ਚਿਹਨਿਤ, ਅਗਰਭੂਮਣ, ਪ੍ਰਤੀਕਵਾਦ, ਪ੍ਰਵਚਨ, (ਸੰਖੇਪ ਜਾਣ-ਪਛਾਣ)

  Adhunik Pachhmi Alochana-II: Chihan, Chihnik, Chihnit, Agarbhuman, Prateekvaad, Pravachan (Sankhep Jaan-Pachhan)
- ਪੰਜਾਬੀ ਆਲੋਚਨਾ: ਪ੍ਰਗਤੀਵਾਦ, ਪ੍ਰਯੋਗਵਾਦ, ਜੁਝਾਰਵਾਦ, ਸੁਹਜਵਾਦ (ਸੰਖੇਪ ਜਾਣ-ਪਛਾਣ)

  Punjabi Alochana: Pragativad, Prayogvad, Jujharvad, Sohajvad (Sankhep Jaan-Pachhan)

Unit-III: ਕਾਵਿ ਦੀ ਸੰਕਲਪਾਤਮਕ ਸ਼ਬਦਾਵਲੀ (Kaav Di Sankalpatmak Shabdawali) (11 hours)

- ਗ਼ਜ਼ਲ: ਮਿਸਰਾ, ਮਤਲਾ, ਮਕਤਾਅ, ਕਾਫ਼ੀਆ, ਰਦੀਫ਼

  Ghazal: Misra, Matla, Maktaa, Kafia, Radeef
- ਕਾਵਿ ਪ੍ਰਬੋਧਕ, ਅਧਿਆਤਮਕ ਕਾਵਿ, ਕਾਵਿ ਰੀਤ, ਕਾਵਿ ਲਕਸ਼ਣ

  Kaav Prabodhak, Adhyatmak Kaav, Kaav Reet, Kaav Lakshan
- ਕਾਵਿ ਅਨੁਭੂਤੀ, ਕਾਵਿ ਸ਼ੈਲੀ, ਕਾਵਿ ਹੇਤੂ, ਕਾਵਿ ਕਲਾ

  Kaav Anubhuti, Kaav Shelly, Kaav Hetu, Kaav Kala,
- ਕਾਵਿ ਬਿੰਬ, ਕਾਵਿ ਭਾਸ਼ਾ, ਕਾਵਿ ਪ੍ਰਵਚਨ, ਕਾਵਿ ਪ੍ਰਯੋਜਨ

  Kaav Bimb, Kaav Bhasha, Kaav Pravachan, Kaav Prayojan

Unit-IV: ਗਲਪ ਅਤੇ ਨਾਟਕ ਦੀ ਸੰਕਲਪਾਤਮਕ ਸ਼ਬਦਾਵਲੀ (Galap ate Natak di Sankalpatmak Shabdawali) (11 hours)

- ਨਾਵਲ: ਐਪਿਕ ਨਾਵਲ, ਐਪਿਸੋਡਿਕ ਨਾਵਲ, ਐਪਿਸਟੋਲਰੀ ਨਾਵਲ, ਇਰਾੱਟਿਕ ਨਾਵਲ, ਗੁਪਤ ਨਾਵਲ , ਮਲਟੀ ਡੈਕੱਰ ਨਾਵਲ ਅਨੁਭਵ

  Novel: Epic Novel, Episodic Novel, Apistolary Novel, Erotic Novel, Gupt Novel, Multi Decker Novel Anubhav
- ਕਹਾਣੀ: ਕੋਲਾਜ, ਟਕਰਾਓ, ਕਥਾ, ਕਥਾਨਕ, ਬਿਰਤਾਂਤ ਅਤੇ ਬਿਰਤਾਂਤਕਾਰ, ਮੋਟਿਫ, ਮੋਟੀਵੇਸ਼ਨ, ਵਿਚਲਨ, ਪਿੱਛਲਝਾਤ, ਰੀਮ, ਥੀਮ

Kahani: Kolaj, Takrao, Katha, Kathanak, Birtant ate Birtantkar, Motif, Motivation, Vichlan, Pichhaljhaat, Ream, Theme

- ਨਾਟਕ: ਉਪੇਰਾ/ਸੰਗੀਤ ਨਾਟਕ, ਨਕਲ, ਅੰਕੀਆ ਨਾਟ, ਟੀ.ਵੀ ਨਾਟਕ, ਨੁੱਕੜ ਨਾਟਕ, ਆਂਚਲਿਕ ਨਾਟਕ, ਐਪਿਕ ਥੀਏਟਰ, ਐਬਸਰਡ ਥੀਏਟਰ, ਐਰੀਨਾ ਥੀਏਟਰ, ਐਲਿਜ਼ਾਬੇਥਨ ਥੀਏਟਰ

  Natak: Upera/Sangeet Natak, Nakal, Ankia Naat, T.V Natak, Nukkad Natak, Aanchlik Natak, Epic Theatre, Absurd Theatre, Arena Theatre, Elizabethan Theatre

बी.ए.ऑनर्स (हिंदी)

भारतीय काव्यशास्त्र

Core Course – DSC10

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical		
भारतीय काव्यशास्त्र(DSC10)	4	3	1	0	हिंदी के साथ12वीं उत्तीर्ण	NIL

पाठ्यक्रम का उद्देश्य (Course Objective):

1. विद्यार्थियोंकोभारतीय काव्य-चिंतन की परंपरा का बोधकराना।
2. काव्य-चिंतन के विभिन्नसंप्रदायों से अवगतकराना।
3. काव्य के विभिन्न रूपों एवंछंदों की संरचना से परिचितकराना।

पाठ्यक्रम अध्ययन के परिणाम(Course Learning Outcomes):

1. भारतीय काव्यशास्त्र की चिंतनपरंपरा से अवगतहोसकेंगे।
2. काव्य समीक्षा की प्रद्धतियों का उपयोगकरसकेंगे।
3. पारंपरिकऔरआधुनिककाव्य-विवेक केनैरंतर्य की समझ समृद्धहोगी।

इकाई–1(12 घंटे)

- भारतीय काव्यशास्त्र की परंपरा(आचार्यभरतमुनि से पंडितराजजगन्नाथ तक)
- प्रमुख संप्रदायों का संक्षिप्तपरिचय (रस, अलंकार, रीति, ध्वनि, वक्रोक्ति, औचित्य)

इकाई–2(12 घंटे)

- काव्य लक्षण
- काव्य हेतु
- काव्य प्रयोजन

इकाई –3(12 घंटे)

- रसः स्वरूप, अवयवऔरभेद
- रसनिष्पत्ति
- साधारणीकरण

इकाई–4(9घंटे)

- **शब्द-शक्ति:**अभिधा, लक्षणा, व्यंजना
- **अलंकार:** शब्दालंकार–अनुप्रास, यमक, श्लेष, वक्रोक्ति
  अर्थालंकार–उपमा, रूपक, उत्प्रेक्षा, अतिशयोक्ति
- **छंद:**समवर्णिक–सवैया, घनाक्षरी
  सममात्रिक –चौपाई, हरिगीतिका
  अर्द्धसममात्रिक –बरवै, सोरठा
  विषमसममात्रिक –कुंडलिया, छप्पय

सहायकग्रंथ:

1. रस-मीमांसा–आचार्यरामचंद्र शुक्ल, काशीनागरी प्रचारिणी सभा, वाराणसी।
2. साहित्य-सहचर–आचार्यहजारीप्रसाद द्विवेदी, नैवेद्य निकेतन, वाराणसी।
3. रस-सिद्धांत–डॉ. नगेंद्र, नेशनलपब्लिशिंगहाउस, दिल्ली।
4. भारतीय काव्यशास्त्र की भूमिका (भाग2) –डॉ. नगेंद्र, ओरियंटलबुकडिपो।

जनसंचार माध्यमऔर तकनीक
Elective Course – DSE6

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisiteof the course
		Lecture	Tutorial	Practical		
जनसंचार माध्यम और तकनीक (DSE6)	4	3	1	0	हिंदी के साथ12वीं उत्तीर्ण	NIL

पाठ्यक्रम के उद्देश्य (Course Objectives):

10. विद्यार्थियोंकोजनसंचार माध्यमों के विस्तृतक्षेत्रसेपरिचितकराना।
11. जनसंचार माध्यमों में प्रयुक्त तकनीक का ज्ञान देना।
12. जनसंचार माध्यम और तकनीकसे जुड़ी आचार संहिताओं काबोधकराना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

1. विद्यार्थी जनसंचार के विभिन्नमाध्यमोंकीपहुँचऔरप्रसारक्षमतासेपरिचितहोंगे।
2. जनसंचार माध्यमों में प्रयुक्त तकनीकी पक्ष को जान पायेंगे।
3. फेक न्यूज आदि से बचने के लिए इंटरनेट से जुड़ी आचार संहिताओं का सही ज्ञान होगा।

इकाई–1:जनसंचार : स्वरूपएवंअवधारणा (12 घंटे)

- जनसंचार: अर्थ, परिभाषाव स्वरूप
- जनसंचारकेउद्देश्य
- जनसंचारका प्रसार एवं महत्त्व
- जनसंचार के प्रकार

इकाई–2 : जनसंचार केमाध्यम (12 घंटे)

- प्रिंट ,रेडियोऔरटेलीविज़न
- डिजिटल माध्यम
- सोशलमीडिया–फेसबुक, ट्विटर, यूट्यूब, व्हाट्सएप, इंस्टाग्राम
- सोशलनेटवर्किंगसाइट्सतथा अन्यमाध्यम

इकाई–3 :जनसंचार :तकनीकी पक्ष(12घंटे)

- जनसंचार तथा सूचना तकनीक
- इंटरनेट पत्रकारिता
- ब्लॉग

- न्यू मीडिया

इकाई 4 : जनसंचार और लोकतंत्र (9 घंटे)

- जनसंचार माध्यमों का प्रयोग और नागरिक की ज़िम्मेदारी
- आपात स्थितियों में जनसंचार की भूमिका
- प्रेस कानून : सामान्य परिचय
- साइबर कानून :सामान्य परिचय

सहायकग्रंथ:

1. भूमंडलीकरण और मीडिया –कुमुदशर्मा।
2. जनसंचारमाध्यम : भाषाऔरसाहित्य–सुधीशपचौरी।
3. जनसंचार – हरीश अरोड़ा, युवा साहित्य चेतना मंडल, नई दिल्ली।
4. जनसंचार माध्यमों का राजनीतिक चरित्र – जवरीमल्ल पारख।
5. इंटरनेट पत्रकारिता –सुरेश कुमार।
6. सोशलनेटवर्किंग: नएसमयकासंवाद–(संपादक)संजयद्विवेदी।
7. वर्चुअलरिएलिटिऔरइंटरनेट- जगदीश्वरचतुर्वेदी।
8. सोशलमीडियाऔरब्लॉगलेखन–स्नेहलता।
9. नएमाध्यम, नईहिंदी–प्रो. हरिमोहन।
10. सोशल मीडिया–स्वर्ण सुमन।
11. मीडियाऔरबाज़ार – वर्तिकानंदा।
12. संचारक्रांतिऔरबदलतासामाजिकसौंदर्यबोध–कृष्णकुमाररत्तू।

ब्लॉग लेखन
GE Hindi Course – GE7

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisiteof the course
		Lecture	Tutorial	Practical		
ब्लॉग लेखन (GE7)	4	3	1	0	12वीं उत्तीर्ण	NIL

पाठ्यक्रमकाउद्देश्य (Course Objective):

1. ब्लॉगकेविकासकेसाथ-साथभाषा, समाजऔरसंस्कृतिकीजानकारी देना।
2. ब्लॉगलेखनकेविभिन्नप्रभावोंकाअध्ययनकरना।

पाठ्यक्रमअध्ययनकेपरिणाम (Course Learning Outcomes):

1. ब्लॉगलेखनऔरसमाजकेसंबंधकीव्यावहारिकजानकारी प्राप्त होगी।
2. ब्लॉगलेखनकेमाध्यमसेसामाजिक, सांस्कृतिकसमझविकसित होगी।

इकाई –1 : ब्लॉगलेखन: अवधारणा(12 घंटे)

- ब्लॉगकास्वरूप
- ब्लॉगलेखनकाविकास
- ब्लॉगलेखन: भाषा, समाजऔरसंस्कृति
- ब्लॉगलेखनकाप्रभाव

इकाई –2 : ब्लॉगलेखन : व्यक्तिऔरसमाज(12 घंटे)

- ब्लॉगलेखनऔरव्यक्तिरचनात्मकता
- ब्लॉगलेखनऔरसामाजिकरचनात्मकता
- ब्लॉगलेखनऔरजनभागीदारी
- ब्लॉगलेखनऔरसोशलमीडिया

इकाई –3 : ब्लॉगलेखनकेप्रकार(12 घंटे)

- साहित्यिक-सांस्कृतिक
- राजनीतिक-सामाजिक
- शिक्षा-मीडिया
- खेलकूदएवंअन्य

इकाई –4: ब्लॉगनिर्माण(9घंटे)

- भाषाएवंसंरचना
- ब्लॉगनिर्माणकीप्रक्रिया
- किसीविशिष्टविषयपरब्लॉगलेखन

सहायक ग्रंथ:

1. न्यू मीडिया और बदलता भारत–प्रांजलधर, कृष्णकांत,भारतीय ज्ञानपीठ, दिल्ली।
2. इंटरनेट जर्नलिज़म–विजय कुलश्रेष्ठ, साहिल प्रकाश, जयपुर।
3. सोशल मीडिया और सामाजिक सरोकार–कल्याण प्रसाद वर्मा, साहिल प्रकाशन,जयपुर।
4. ऑनलाइन मीडिया–सुरेश कुमार, पीयर्सन प्रकाशन,भारत।
5. हिंदी ब्लॉगिंग का इतिहास,रवींद्र प्रभात, हिंदी साहित्य निकेत, बिजनौर।

भारतीय और पाश्चात्य रंगमंच

Course Code & Title	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course (If any)
		Lecture	Tutorial	Practical/ Practice		
DSE भारतीय और पाश्चात्य रंगमंच	4	3	1	0	Class 12th pass with Hindi	—

पाठ्यक्रम का उद्देश्य (Course Objective):

- भारतीय एवं पाश्चात्य रंग सिद्धांतों का स्वरूपगत विभेद तथा परंपरा का आद्यंत परिचय।
- भारतीय एवं पाश्चात्य विविध नाट्य रूपों के दार्शनिक चिंतन के अंतर की जानकारी।
- भारतीय तथा पाश्चात्य नाट्य रूपों की व्यावहारिक तथा प्रयोगात्मक जानकारी।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- भारतीय एवं पाश्चात्य रंग परंपराओं के भेद तथा प्रकारों का परिचय प्राप्त हो सकेगा।
- भारतीय एवं पाश्चात्य रंग परंपराओं के आदान-प्रदान से निर्मित आधुनिक नाट्य रूपों की जानकारी प्राप्त हो सकेगी।
- भारतीय एवं पाश्चात्य नाट्य रूपों की विविधता से परिचय के बाद समकालीन रंग परिदृश्य की बेहतर समझ विकसित होगी।

इकाई-1 : **(12 घंटे)**

- नाटक की भारतीय अवधारणाएं (उत्पत्ति तथा स्वरूप संबंधी मान्यताएं)
- नाटक की पाश्चात्य अवधारणाएं (उत्पत्ति तथा स्वरूप संबंधी मान्यताएं)

इकाई-2 : **(12 घंटे)**

- भारतीय नाट्यरूप : रूपक, उपरूपक, नाटक (प्रकार तथा भेद)
- आधुनिक भारतीय नाट्यरूप : काव्य नाटक, एकांकी, रेडियो नाटक, नुक्कड़ नाटक

इकाई-3 : **(9 घंटे)**

- अरस्तू : अनुकरण सिद्धांत
- अरस्तू : विरेचन सिद्धांत

इकाई-4 : **(12 घंटे)**

- पाश्चात्य नाट्यरूप : त्रासदी, ड्रामा
- पाश्चात्य नाट्यरूप : कामदी, मेलोड्रामा

सहायक ग्रंथों की सूची:

1. भरतमुनि; नाट्यशास्त्र
2. नगेंद्र, डॉ.; भारतीय नाट्य चिंतन
3. चेनी, शेल्डान; रंगमंच
4. ओझा, दशरथ; हिंदी नाटक : उद्भव और विकास
5. त्रिपाठी, राधावल्लभ; नाट्यशास्त्र विश्वकोश
6. गार्गी, बलवंत; रंगमंच
7. दीक्षित, सुरेंद्रनाथ; भरत और भारतीय नाट्यकला, मोतीलाल बनारसी दास, नई दिल्ली।
8. चातक, गोविंद; रंगमंच : कला और दृष्टि
9. चतुर्वेदी, सीताराम; भारतीय एवं पाश्चात्य रंगमंच, हिंदी समिति, सूचना विभाग, लखनऊ।
10. जैन, नेमिचंद्र; रंगदर्शन
11. लाल, लक्ष्मीनारायण; रंगमंच : देखना और जानना
12. त्रिपाठी, वशिष्ठ नारायण; नाटक के रंगमंचीय प्रतिमान
13. राय, डॉ. नर्वदेश्वर; हिंदी नाट्यशास्त्र का स्वरूप

कंप्यूटर और हिंदी

Course Code & Title	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course (If any)
		Lecture	Tutorial	Practical/ Practice		
DSE कंप्यूटर और हिंदी	4	3	0	1	Class 12th pass with Hindi	—

पाठ्यक्रम का उद्देश्य (Course Objective):

- हिंदी के संदर्भ में कंप्यूटर की दुनिया से परिचित कराना।
- हिंदी के विभिन्न फ़ॉन्ट्स से परिचित कराना।
- हिंदी में कंप्यूटर संबंधी कौशल का विकास करना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- कंप्यूटर से जुड़ी चुनौतियों और संभावनाओं का ज्ञान होगा।
- ई-लर्निंग और ई-शिक्षण में हिंदी का प्रयोग सीख सकेंगे।
- हिंदी में कंप्यूटर संबंधी कौशल का विकास होगा।

इकाई 1 : कंप्यूटर तकनीक का विकास और हिंदी **(12 घंटे)**

- कंप्यूटर : सामान्य परिचय और विकास
- हिंदी के विविध फॉन्ट्स
- कंप्यूटर में हिंदी की चुनौतियाँ और संभावनाएं

इकाई 2 : हिंदी भाषा और प्रौद्योगिकी **(9 घंटे)**

- इंटरनेट और हिंदी
- देवनागरी और यूनिकोड
- हिंदी भाषा और ब्लॉग निर्माण

इकाई 3 : हिंदी भाषा, कंप्यूटर और ई-शिक्षण **(12 घंटे)**

- हिंदी भाषा और ई-शिक्षण

- ई-लर्निंग और हिंदी
- हिंदी भाषा में ई-पुस्तकालय और ई-पाठशाला

इकाई 4 : हिंदी भाषा और कंप्यूटर : प्रायोगिक पक्ष (12 घंटे)

- इंटरनेट पर हिंदी पत्र-पत्रिकाओं का परिचय
- हिंदी में वेब पेज तैयार करना
- हिंदी में वीडियो मॉड्यूल और पॉडकास्ट तैयार करना

सहायक ग्रंथों की सूची:

1. हरिमोहन; कंप्यूटर और हिंदी, तक्षशिला प्रकाशन, दिल्ली।
2. हरिमोहन; आधुनिक जनसंचार और हिंदी, तक्षशिला प्रकाशन, दिल्ली।
3. मल्होत्रा, विजय कुमार; कंप्यूटर के भाषिक अनुप्रयोग, वाणी प्रकाशन, दिल्ली।
4. गोयल, संतोष; हिंदी भाषा और कंप्यूटर, श्री नटराज प्रकाशन, दिल्ली।
5. शर्मा, पी. के.; कंप्यूटर के डाटा प्रस्तुतिकरण और भाषा सिद्धांत, डायनेमिक पब्लिकेशन, दिल्ली।
6. द्विवेदी, संजय (संपादक); सोशल नेटवर्किंग : नए समय का संवाद, यश पब्लिकेशन, दिल्ली।
7. बिसारिया, यादव, कुशवाहा, पुनीत, बीरेंद्र सिंह, यतेंद्र सिंह; कार्यालयीय हिंदी और कंप्यूटर, प्रभात प्रकाशन, दिल्ली।

- हिंदी भाषा के व्याकरणिक नियमों की आधारभूत जानकारी देना।
- भाषा की विविध ध्वनियों के उच्चारण के नियमों का समुचित ज्ञान कराना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- विद्यार्थी व्याकरणिक संरचना का ज्ञान प्राप्त करेंगे।
- मौखिक अभिव्यक्ति के मानक-अमानक रूपों से परिचित होंगे।
- हिंदी भाषा के सर्वमान्य रूपों की समझ विकसित होगी।

इकाई 1 : भाषा और व्याकरण **(12 घंटे)**

- भाषा की परिभाषा एवं विशेषताएँ
- व्याकरण की परिभाषा और महत्त्व
- भाषा और व्याकरण का अंतःसंबंध
- ध्वनि, वर्ण एवं मात्राएँ

इकाई 2 : शब्द परिचय **(12 घंटे)**

- शब्दों के भेद – तत्सम, तद्भव, देशज और विदेशी
- शब्दों की व्याकरणिक कोटियाँ – संज्ञा, सर्वनाम, क्रिया (केवल परिभाषा एवं भेद)

- शब्द निर्माण – उपसर्ग, प्रत्यय
- शब्द और पद में अंतर
- शब्दगत अशुद्धियाँ

इकाई 3 : व्याकरण व्यवहार **(12 घंटे)**

- लिंग, वचन, कारक
- संधि और समास
- मुहावरे और लोकोक्तियाँ

इकाई 4 : वाक्य-परिचय **(9 घंटे)**

- वाक्य के अंग, उद्देश्य और विधेय
- रचना के आधार पर वाक्य के भेद
- वाक्यगत अशुद्धियाँ

सहायक ग्रंथों की सूची:

1. गुरु, कामता प्रसाद; हिंदी व्याकरण, साहित्य सरोवर पब्लिकेशन, आगरा।
2. वाजपेयी, किशोरीदास; हिंदी शब्दानुशासन, नागरी प्रचारिणी सभा, काशी।
3. श्रीवास्तव, रवींद्रनाथ; हिंदी भाषा : संरचना के विविध आयाम, राजकमल प्रकाशन, दिल्ली।
4. वर्मा, धीरेंद्र; हिंदी भाषा का इतिहास, हिंदुस्तानी अकादमी, प्रयागराज।

व्यावसायिक संप्रेषण और हिंदी भाषा

Course Code & title	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course (If any)
		Lecture	Tutorial	Practical / Practice		
DSE व्यावसायिक संप्रेषण और हिंदी भाषा	4	3	1	0	12th Pass	—

पाठ्यक्रम के उद्देश्य (Course Objectives):

- व्यावसायिक संप्रेषण और हिंदी भाषा के स्वरूप से परिचित कराना
- हिंदी भाषा के प्रभावी संप्रेषण की क्षमता विकसित करना
- हिंदी भाषा को व्यावहारिक रूप से व्यावसायिक जगत से जोड़ना
- छात्रों को हिंदी से जुड़े रोजगार क्षेत्रों के लिए तैयार करना

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- विद्यार्थी व्यावसायिक संप्रेषण की प्रक्रिया से अवगत होंगे
- व्यावसायिक क्षेत्र में हिंदी के व्यावहारिक ज्ञान से परिचित होंगे
- हिंदी के वैश्विक और व्यावसायिक अंतःसंबंधों को समझेंगे
- व्यावसायिक लेखन की प्रक्रिया से परिचित होंगे

इकाई 1: संप्रेषण का स्वरूप और महत्त्व **(12 घंटे)**

- संप्रेषण की परिभाषा एवं स्वरूप
- संप्रेषण का महत्त्व
- भूमंडलीकरण के युग में संप्रेषण की महत्ता
- संप्रेषण की बाधाएं

इकाई 2: व्यावसायिक संप्रेषण और हिंदी भाषा **(9 घंटे)**

- व्यावसायिक संप्रेषण का स्वरूप
- व्यावसायिक संप्रेषण के प्रकार
- तकनीकी व्यावसायिक संप्रेषण

इकाई 3: हिंदी जनसंचार और व्यावसायिक संप्रेषण **(12 घंटे)**

- संप्रेषण के विविध माध्यम – परंपरागत और आधुनिक
- प्रिंट मीडिया और व्यावसायिक संप्रेषण
- इलेक्ट्रॉनिक मीडिया और व्यावसायिक संप्रेषण
- हिंदी भाषा, सोशल मीडिया और व्यावसायिक संप्रेषण

इकाई 4: हिंदी में व्यावसायिक लेखन **(12 घंटे)**

- हिंदी में व्यावसायिक लेखन का महत्त्व
- हिंदी में व्यावसायिक लेखन के प्रकार (प्रतिवेदन लेखन, कार्यसूची, कार्यवृत्त का रूप निर्माण)
- व्यावसायिक पत्र और ईमेल का प्रारूप निर्माण
- स्ववृत्त-निर्माण और उसके विविध स्वरूप

सहायक ग्रंथों की सूची:

1. पाल एवं शर्मा, डॉ. हंसराज एवं डॉ. मंजुलता; व्यावसायिक संप्रेषण, हिंदी माध्यम कार्यान्वय निदेशालय, दिल्ली विश्वविद्यालय, दिल्ली।
2. झालटे, डॉ. दंगल; प्रयोजनमूलक हिंदी, वाणी प्रकाशन, दिल्ली।
3. तिवारी, डॉ. भोलानाथ; हिंदी भाषा की वाक्य संरचना, साहित्य सहकार प्रकाशन, दिल्ली।
4. पांडेय, कैलाशनाथ; प्रयोजनमूलक हिंदी की भूमिका, लोकभारती प्रकाशन, प्रयागराज।
5. गोस्वामी, कृष्ण कुमार; प्रयोजनमूलक भाषा और कार्यालयी हिंदी, कलिंगा प्रकाशन, दिल्ली।

		Lecture	Tutorial	Practical / Practice		
DSE हिंदी की प्रमुख संस्थाएँ एवं पत्र-पत्रिकाएँ	**4**	**3**	**1**	**0**	**12th Pass**	**—**

पाठ्यक्रम के उद्देश्य (Course Objectives):

- विद्यार्थियों को हिंदी की प्रमुख संस्थाओं से परिचित कराना।
- हिंदी के विकास में पत्र-पत्रिकाओं की भूमिका से अवगत कराना।
- संस्थाओं और पत्र-पत्रिकाओं के माध्यम से हिंदी के प्रति विद्यार्थियों में अभिरुचि का विकास करना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- विद्यार्थी हिंदी के विकास में विभिन्न साहित्यिक संस्थाओं के योगदान को समझ सकेंगे।
- प्रारंभिक हिंदी पत्र-पत्रिकाओं के विविध रूपों से परिचित हो सकेंगे।
- हिंदी साहित्य के इतिहास में विभिन्न संथाओं और पत्र-पत्रिकाओं की भूमिका को रेखांकित कर सकेंगे।

इकाई 1 : हिंदी की आरंभिक संस्थाएँ **(12 घंटे)**

- नागरी प्रचारिणी सभा, काशी
- हिंदी साहित्य सम्मेलन, प्रयागराज
- दक्षिण भारत हिंदी प्रचार सभा, मद्रास
- राष्ट्रभाषा प्रचार समिति, वर्धा

इकाई 2 : स्वातंत्र्योत्तर हिंदी संस्थाएँ **(12 घंटे)**

- केंद्रीय हिंदी निदेशालय, दिल्ली
- केंद्रीय हिंदी संस्थान, आगरा

- बिहार राष्ट्रभाषा परिषद, पटना
- हिंदुस्तानी अकादमी, प्रयागराज

इकाई 3 : हिंदी के विकास में पत्र-पत्रिकाओं का योगदान **(12 घंटे)**

- आरंभिक पत्र – उदन्त मार्तण्ड, बंगदूत, समाचार सुधा वर्षण
- साहित्यिक पत्रिकाएं – कविवचन सुधा, हिंदी प्रदीप, ब्राह्मण, सरस्वती
- हिंदी के विकास में प्रमुख पत्रकारों का योगदान – भारतेंदु हरिश्चंद्र, महावीर प्रसाद द्विवेदी, बाबू बालमुकुंद गुप्त।

इकाई 4 : स्वातंत्र्योत्तर हिंदी पत्र-पत्रिकाएं **(9 घंटे)**

- प्रमुख स्वातंत्र्योत्तर पत्र-पत्रिकाएं – धर्मयुग, दिनमान, साप्ताहिक हिंदुस्तान
- आपातकाल के दौर की पत्रकारिता और चुनौतियां
- समकालीन पत्र-पत्रिकाएं

सहायक ग्रंथों की सूची :

1. शुक्ल, आचार्य रामचंद्र; हिंदी साहित्य का इतिहास, राजकमल प्रकाशन, दिल्ली।
2. गुप्त, गणपतिचंद्र; हिंदी साहित्य का वैज्ञानिक इतिहास, लोकभारती प्रकाशन, प्रयागराज।
3. वैदिक, वेदप्रताप; हिंदी पत्रकारिता के विविध आयाम, हिंदी बुक सेंटर, दिल्ली।
4. पांडेय, डॉ. पृथ्वीनाथ, पत्रकारिता : परिवेश एवं प्रवृत्तियाँ, लोकभारती प्रकाशन, प्रयागराज।
5. शर्मा, रामविलास; महावीर प्रसाद द्विवेदी और हिंदी नवजागरण, राजकमल प्रकाशन, दिल्ली।
6. शर्मा, कुमुद; भूमंडलीकरण और मीडिया, प्रभात प्रकाशन, दिल्ली।
7. मिश्र, कृष्ण बिहारी; हिंदी पत्रकारिता, भारतीय ज्ञानपीठ, नई दिल्ली।
8. चतुर्वेदी, जगदीश प्रसाद; हिंदी पत्रकारिता का इतिहास, प्रभात प्रकाशन, दिल्ली।
9. श्रीधर, विजयदत्त; भारतीय पत्रकारिता कोश, वाणी प्रकाशन, दिल्ली।

हिंदी भाषा का व्यावहारिक व्याकरण

Course title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
DSE हिंदी भषा का व्यावहारिक व्याकरण	4	3	1	0	Class 12th pass with Hindi	—

पाठ्यक्रम का उद्देश्य (Course Objective):

- भाषा के स्वरूप और महत्त्व का परिचय कराना।
- भाषा के व्याकरणिक रूप का परिचय देना।
- हिंदी भाषा के विकारी रूपों की रचना को सिखाना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- भाषा और व्याकरण के संबंध का परिचय प्राप्त होगा।
- हिंदी की ध्वनि व्यवस्था का परिचय प्राप्त होगा।
- हिंदी की वाक्य रचना, अर्थ रचना का परिचय प्राप्त होगा।

इकाई 1 : भाषा और व्याकरण **(9 घंटे)**

- भाषा की परिभाषा और विशेषताएं
- व्याकरण की परिभाषा और महत्त्व
- भाषा और व्याकरण का अंतःसंबंध
- हिंदी की ध्वनियों का वर्गीकरण: स्वर, व्यंजन और मात्राएं

इकाई 2 : शब्द एवं पद विचार **(12 घंटे)**

- शब्द की परिभाषा और उसके भेद : रचना एवं स्रोत के आधार पर
- शब्द-निर्माण : उपसर्ग, प्रत्यय, संधि, समास
- विकारी शब्दों की रूप-रचना : संज्ञा, सर्वनाम, विशेषण, क्रिया

इकाई 3: वाक्य-विचार **(12 घंटे)**

- वाक्य की परिभाषा और उसके अंग
- वाक्य के भेद : रचना एवं अर्थ के आधार पर
- वाक्य संरचना : पदक्रम, अन्विति और विराम-चिह्न

इकाई 4: अर्थ-विचार **(12 घंटे)**

- अर्थ की अवधारणा, शब्द-अर्थ संबंध
- अर्थ बोध के साधन
- अर्थ परिवर्तन के कारण और दिशाएं

सहायक ग्रंथों की सूची:

1. वर्मा, धीरेंद्र; हिंदी भाषा का इतिहास : हिंदुस्तानी एकेडमी, प्रयागराज।
2. पांडेय, डॉ. राजबलि; भारतीय पुरालिपि : लोकभारती प्रकाशन, प्रयागराज।
3. शुक्ल, डॉ. हनुमान प्रसाद; हिंदी भाषा : पहचान से प्रतिष्ठा तक, लोकभारती प्रकाशन, प्रयागराज।
4. श्रीवास्तव, रवींद्रनाथ; हिंदी भाषा : संरचना के विविध आयाम, राजकमल प्रकाशन, दिल्ली।
5. गुरू, कामताप्रसाद; हिंदी व्याकरण, साहित्यसरोवर पब्लिकेशन, आगरा।
6. प्रसाद, डॉ. वासुदेव नंदन; आधुनिक हिंदी व्याकरण और रचना, भारती भवन, मेरठ।
7. वाजपेयी, किशोरीदास; हिंदी शब्दानुशासन, नागरी प्रचारिणी सभा, काशी।
8. तिवारी, भोलानाथ; हिंदी भाषा की संरचना, साहित्य सहकार, दिल्ली।
9. तिवारी, भोलानाथ; हिंदी भाषा की आर्थी संरचना, साहित्य सहकार, दिल्ली।
10. तिवारी, भोलानाथ; भाषा विज्ञान, किताब महल, दिल्ली।

भाषा दक्षता और तकनीक

Course title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
DSE भाषा दक्षता और तकनीक	4	3	1	0	Class 12th pass with Hindi	—

पाठ्यक्रम का उद्देश्य (Course Objective):

- भाषा दक्षता के महत्त्व, प्रयोग विस्तार, शैली, भाषिक संस्कृति और भाषिक कौशलों की समझ विकसित करना।
- तकनीक के साथ भाषा के संबंध की समझ विकसित करना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- भाषा के शुद्ध उच्चारण, रचनात्मक लेखन, समीक्षा आदि पहलुओं को सीख सकेंगे।
- भाषा और तकनीक के सह-संबंध के माध्यम से भाषा के व्यावहारिक रूप को जान सकेंगे।

इकाई 1 : भाषा दक्षता का स्वरूप एवं महत्त्व (12 घंटे)

- भाषा दक्षता : तात्पर्य और महत्त्व
- भाषा दक्षता : श्रवण एवं वाचन
- भाषा दक्षता : पठन और लेखन

इकाई 2 : भाषा व्यवहार एवं प्रक्रिया (12 घंटे)

- भाषा व्यवहार : भाषा प्रयोग एवं शैली का महत्त्व
- भाषा को प्रभावित करने वाले कारक : आयु, वर्ग, लिंग, व्यवसाय, शिक्षा और संस्कृति
- भाषा दक्षता में श्रवण, उच्चारण, शुद्ध पठन और रचनात्मक लेखन की प्रक्रिया

इकाई 3 : भाषा दक्षता और तकनीक (12 घंटे)

- भाषा दक्षता में यूनिकोड का महत्त्व
- गूगल वॉयस सर्च और हिंदी दक्षता
- डिजिटल हिंदी और तकनीक का सह-संबंध

इकाई 4 : भाषा दक्षता : व्यावहारिक पक्ष ((9 घंटे)

- वाचन : भाषण, समूह चर्चा, वार्तालाप, किसी साहित्यिक कृति का पाठ
- लेखन : संक्षेपण,पल्लवन, समीक्षा, रिपोर्ट

संदर्भ ग्रंथों की सूची:

1. श्रीवास्तव, रवींद्रनाथ, सृजनात्मक साहित्य, राधाकृष्ण प्रकाशन, दिल्ली।
2. सिंह, दिलीप; भाषा,साहित्य और संस्कृति शिक्षण, वाणी प्रकाशन, दिल्ली।
3. सिंह, सावित्री; हिंदी शिक्षण, गया प्रसाद एंड संस, आगरा।
4. प्रकाश, डॉ. ओम; व्यावहारिक हिंदी शुद्ध प्रयोग, राजपाल एंड संस, दिल्ली।
5. मुकुल, डॉ. मंजु; संप्रेषण : चिंतन और दक्षता, शिवालिक प्रकाशन, दिल्ली।
6. शर्मा, शिवमूर्ति; हिंदी भाषा शिक्षण, नीलकमल प्रकाशन, हैदराबाद।
7. स्वयं अधिगम सामग्री, हिंदी शिक्षण प्रविधि, इग्नू, नई दिल्ली।

Semester VI : DSE
गांधी-दर्शन और हिंदी साहित्य

Course title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
DSE गांधी-दर्शन और हिंदी साहित्य	4	3	1	0	Class 12th pass with Hindi	—

पाठ्यक्रम के उद्देश्य (Course Objectives):

- विद्यार्थियों को महात्मा गांधी के शब्द और कर्म से परिचित कराना।
- महात्मा गांधी के चिंतन और हिंदी साहित्य के अंतर्संबंधों का ज्ञान देना।
- स्वाधीनता आंदोलन के मूल्यों से परिचित कराना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- विद्यार्थी महात्मा गांधी के जीवन-दर्शन से परिचित होंगे।
- विद्यार्थी राष्ट्रीय आंदोलन में गांधी जी के नेतृत्व और उनकी लोकप्रियता के कारकों को समझेंगे।
- विद्यार्थी गांधी-दर्शन और हिंदी साहित्य के संबंधों को जानेंगे।

इकाई 1 : गांधी-दर्शन : अवधारणा और महत्त्व (12 घंटे)

- गांधी-दर्शन की अवधारणा
- गांधी-दर्शन का विकास
- सत्य और अहिंसा
- विश्व पटल पर गांधी-दर्शन

इकाई 2 : भारतीय साहित्यिक-सांस्कृतिक परंपरा और महात्मा गांधी (9 घंटे)

- गांधी का गीता भाष्य
- गांधी और रामराज
- गांधी और सनातन संस्कृति

इकाई 3 : हिंदी कविता में गांधी ((12 घंटे)

- जय गांधी – सोहनलाल द्विवेदी
- महात्मा जी के प्रति – सुमित्रानंदन पंत
- बापू (चार प्रारंभिक अंश) – रामधारी सिंह दिनकर
- तुम कागज पर लिखते हो – भवानी प्रसाद मिश्र

इकाई 4 : हिंदी गद्य में गांधी (12 घंटे)

- पहला गिरमिटिया (अंतिम 50 पृष्ठ) – गिरिराज किशोर
- दांडी यात्रा (पृष्ठ संख्या 30-67) – मधुकर उपाध्याय
- भारत का स्वराज और महात्मा गांधी (उपसंहार) – बनवारी
- रचनाकार गांधी – विद्यानिवास मिश्र

सहायक ग्रंथों की सूची:

1. गांधी, महात्मा; हिंद स्वराज, नवजीवन प्रकाशन, अहमदाबाद।
2. गांधी, महात्मा; सत्य के प्रयोग अथवा आत्मकथा, नवजीवन प्रकाशन, अहमदाबाद।
3. कृपलानी, कृष्ण; गांधी एक जीवनी, राष्ट्रीय पुस्तक न्यास, नई दिल्ली।
4. कृपलानी, जे. बी.; गांधी : जीवन और दर्शन, प्रकाशन विभाग, नई दिल्ली।
5. गिरि, राजीव रंजन; गांधीवाद रहे न रहे, अनन्य प्रकाशन, नई दिल्ली।

शोध प्रविधि

Course title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
DSE शोध-प्रविधि	4	3	1	0	Class 12th pass with Hindi	—

पाठ्यक्रम के उद्देश्य (Course Objectives):

- साहित्यिक शोध से परिचित कराना।
- शोध के नए आयामों का ज्ञान देना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- विद्यार्थियों में साहित्यिक शोध के ज्ञान का विस्तार होगा।
- शोध के प्रतिमानों से परिचित होकर शोध-कार्य कर सकेंगे।

इकाई 1 : शोध की अवधारणा **(9 घंटे)**

- शोध : अवधारणा और स्वरूप
- शोध का क्षेत्र एवं शोध-प्रविधि
- शोध की प्रक्रिया

इकाई 2 : प्रमुख शोध पद्धतियाँ **(12 घंटे)**

- भाषा-वैज्ञानिक, समाजशास्त्रीय, मनोवैज्ञानिक, तुलनात्मक शोध, पाठालोचन

इकाई 3 : शोध प्रक्रिया के विविध चरण **(12 घंटे)**

- विषय चयन
- सामग्री संकलन
- तथ्य विश्लेषण
- रूपरेखा निर्माण
- शोध प्रबंध लेखन

इकाई 4 : शोध संबंधित अन्य पक्ष **(12 घंटे)**

- शोध संबंधी समस्याएं
- एक अच्छे शोधार्थी के गुण
- शोध के साधन और उपकरण
- संदर्भ सूची निर्माण

सहायक ग्रंथों की सूची:

1. सिन्हा, सावित्री; अनुसंधान का स्वरूप।
2. सिन्हा एवं स्नातक, सावित्री एवं विजयेन्द्र; अनुसंधान की प्रक्रिया।
3. शर्मा, विनयमोहन; शोध प्रविधि, नैशनल पब्लिशिंग हाउस, नई दिल्ली।
4. सिंह, सरनाम; शोध प्रक्रिया एवं विवरणिका, आत्माराम एंड संस, नई दिल्ली।
5. अरोड़ा, हरीश; शोध प्रविधि और प्रक्रिया, के. के. पब्लिकेशन्स, नई दिल्ली।
6. त्रिपाठी, विनायक; शोध प्रविधि : अवधारणा एवं तकनीक, ओमेगा पब्लिकेशन, नई दिल्ली।
7. पांडेय एवं पांडेय, गणेश एवं अरुण; राधा पब्लिकेशन, नई दिल्ली।
8. गणेशन, एस. एन.; अनुसंधान प्रविधि : सिद्धांत और प्रक्रिया, लोकभारती प्रकाशन, प्रयागराज।

भारतीय ज्ञान परंपरा

Course title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
GE भारतीय ज्ञान परंपरा	4	3	1	0	Class 12th pass with Hindi	—

पाठ्यक्रम का उद्देश्य (Course Objectives):

- भारतीय ज्ञान परंपरा का परिचय देना।
- भारत की गौरवशाली परंपरा का ज्ञान प्रदान करना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- विद्यार्थी भारत की गौरवशाली परंपरा से परिचित होंगे।
- विद्यार्थी भारत की प्राचीन और आधुनिक शिक्षा पद्धति का विश्लेषण कर सकेंगे।
- विद्यार्थी भारतीय ज्ञान परंपरा के सूत्रों द्वारा आधुनिक जीवन की समस्याओं से मुक्ति का समाधान प्राप्त कर सकेंगे।

इकाई 1 : भारतीय ज्ञान परंपरा की अवधारणा **(12 घंटे)**

- भारतीय ज्ञान परंपरा : अवधारणा और आयाम
- भारतीय ज्ञान परंपरा का संक्षिप्त इतिहास
- भारतीय ज्ञान परंपरा की प्रासंगिकता

इकाई 2 : ज्ञान के रचनात्मक स्रोत : संक्षिप्त परिचय **(12 घंटे)**

- वेद और उपनिषद
- पुराण और इतिहास
- धर्म-शास्त्र और स्मृति ग्रंथ
- रामायण, महाभारत और रामचरित मानस

इकाई 3 : भारतीय ज्ञान परंपरा के प्राचीन अनुशासन **(9 घंटे)**

- प्राचीन शिक्षा पद्धति और विद्यापीठ

- पर्यावरणीय चेतना और भारतीय ज्ञान परंपरा
- प्राचीन योग पद्धति और आधुनिक जीवन शैली

इकाई 4 : भारतीय ज्ञान परंपरा के नव्य-दर्शन **(12 घंटे)**

- नव्य-दर्शन और आधुनिक भारत
- स्वामी विवेकानंद नव्य-वेदांत दर्शन और भारत
- पंडित दीनदयाल उपाध्याय का एकात्म मानव दर्शन
- श्री अरविंद का जीवन दर्शन और भारत-बोध

सहायक ग्रंथों की सूची:

- शुक्ल, रजनीश कुमार; भारतीय ज्ञान परंपरा और विचारक, प्रभात प्रकाशन, नई दिल्ली।

न्यू मीडिया

Course title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical / Practice		
GE न्यू मीडिया	4	3	1	0	Class 12th pass with Hindi	—

पाठ्यक्रम के उद्देश्य (Course Objectives):

VII. विद्यार्थियों को नए मीडिया माध्यमों से परिचित कराना।

VIII. नए मीडिया में प्रयुक्त तकनीक का ज्ञान देना।

IX. जनसंचार माध्यम और तकनीक से जुड़ी आचार संहिताओं का बोध कराना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

VIII. विद्यार्थी नए मीडिया की पहुँच और प्रसार क्षमता से परिचित होंगे।

IX. विद्यार्थी नए मीडिया माध्यमों में प्रयुक्त तकनीकी पक्ष को जान पायेंगे।

X. फेक न्यूज से बचने के लिए इंटरनेट से जुड़ी आचार संहिताओं का सही ज्ञान होगा।

इकाई 1 : न्यू मीडिया : स्वरूप एवं अवधारणा **(12 घंटे)**

- न्यू मीडिया : परिभाषा और स्वरूप
- न्यू मीडिया के विविध रूप
- न्यू मीडिया का प्रसार एवं महत्त्व
- न्यू मीडिया बनाम पारंपरिक मीडिया

इकाई 2 : न्यू मीडिया : नए रूप **(12 घंटे)**

- न्यू मीडिया तथा सूचना तकनीक
- नेटवर्किंग साइट्स तथा एप्स
- सोशल मीडिया
- डिजिटल आर्काइव

इकाई 3 : न्यू मीडिया: तकनीकी पक्ष **(9 घंटे)**

- इंटरनेट पत्रकारिता
- ब्लॉग
- वेबसाइट

- पॉडकास्ट

इकाई 4 : न्यू मीडिया: कानूनी पक्ष **(12 घंटे)**

- पाइरेसी तथा कॉपीराइट अधिकार
- न्यू मीडिया माध्यमों का प्रयोग और नागरिक की ज़िम्मेदारी
- साइबर कानून : सामान्य परिचय
- कृत्रिम मेधा

सहायक ग्रंथों की सूची:

1. कुमार, सुरेश; इंटरनेट पत्रकारिता, तक्षशिला प्रकाशन, दिल्ली।
2. द्विवेदी, संजय (संपादक); सोशल नेटवर्किंग : नए समय का संवाद, यश पब्लिकेशन, नई दिल्ली।
3. चतुर्वेदी, जगदीश्वर; वर्चुअल रियलिटी, साइबर संस्कृति और इंटरनेट, एकेडेमिक पब्लिकेशन, दिल्ली।
4. लता, डॉ. स्नेह; सोशल मीडिया और ब्लॉग लेखन, नटराज प्रकाशन, दिल्ली।
5. अरोड़ा, डॉ. हरीश (संपादक); पत्रकारिता का बदलता स्वरूप और न्यू मीडिया, साहित्य संचय प्रकाशन, दिल्ली।
6. हरिमोहन, प्रो.; नए माध्यम, नई हिंदी, तक्षशिला प्रकाशन, दिल्ली।
7. सुमन, स्वर्ण; सोशल मीडिया : संपर्क क्रांति का कल आज और कल, हार्पर, दिल्ली।
8. नंदा, वर्तिका; मीडिया और बाज़ार, सामयिक प्रकाशन, दिल्ली।

DSC-11 साहित्य चिंतन	4	3	1	0	12th pass	—

पाठ्यक्रम के उद्देश्य (Course Objectives):

- विद्यार्थियों को विभिन्न विधाओं से परिचित कराना।
- साहित्य के अवधारणात्मक पदों का समुचित ज्ञान कराना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- विद्यार्थी साहित्य की आधुनिक विधाओं से परिचित हो सकेंगे।
- साहित्य के अवधारणामूलक पदावली का ज्ञान प्राप्त हो सकेगा।

इकाई 1 : काव्य की प्रमुख आधुनिक विधाओं का सामान्य परिचय (12 घंटे)

- आख्यानपरक कविता
- प्रगीतात्मक कविता
- मुक्तछंद, छंदमुक्त कविता
- नवगीत

इकाई 2 : गद्य की प्रमुख आधुनिक विधाओं का सामान्य परिचय (12 घंटे)

- उपन्यास
- कहानी
- नाटक
- निबंध
- अन्य गद्य विधाएँ – आत्मकथा, जीवनी, संस्मरण, रेखाचित्र, यात्रा वृतांत, डायरी।

इकाई 3 : आलोचना के अवधारणात्मक पदों का सामान्य परिचय – 1 **(12 घंटे)**

- लोकमंगल की अवधारणा
- पुनर्जागरण
- आधुनिकता और आधुनिकता बोध
- अनुभूति की प्रामाणिकता

इकाई 4 : आलोचना के अवधारणात्मक पदों का सामान्य परिचय – 2 **(9 घंटे)**

- बिंब, प्रतीक और मिथक
- विसंगति
- विडंबना

सहायक ग्रंथों की सूची:

1. अमरनाथ, डॉ.; हिंदी आलोचना की पारिभाषिक शब्दावली, राजकमल प्रकाशन, नई दिल्ली।
2. सिंह, डॉ. बच्चन; हिंदी आलोचना के बीज शब्द, वाणी प्रकाशन, नई दिल्ली।

हिंदी नवजागरण

Course Code & Tittle	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE हिंदी नवजागरण	**4**	**3**	**1**	**0**	**12th pass**	**—**

पाठ्यक्रम के उद्देश्य (Course Objectives):

- विद्यार्थियों को नवजागरण संबंधी विभिन्न मान्यताओं से परिचित कराना।
- नवजागरणकालीन साहित्य का जानकारी देना।
- नवजागरण संबंधी चिंतन परंपरा से जुड़े पक्षों का बोध कराना।

पाठ्यक्रम अध्ययन के परिणाम (Course Learning Outcomes):

- विद्यार्थी नवजागरण संबंधी धारणाओं से परिचित होंगे।
- नवजागरणकालीन साहित्यिक गतिविधियों को जानेंगे।
- नवजागरणकालीन चिंतकों के सरोकारों और गतिविधियों से परिचित होंगे।

इकाई 1 : पुनर्जागरण : अवधारणा एवं महत्त्व **(12 घंटे)**

- पुनरुत्थान एवं पुनर्जागरण की अवधारणा
- पुनर्जागरण व समाज सुधार
- पुनर्जागरण व राष्ट्रीय स्वाधीनता आंदोलन
- हिंदी पुनर्जागरण की पृष्ठभूमि

इकाई 2 : नवजागरणकालीन प्रमुख संस्थाएं **(12 घंटे)**

- ब्रह्म समाज
- प्रार्थना समाज
- आर्य समाज
- रामकृष्ण मिशन

इकाई 3 : नवजागरण और हिंदी पत्रकारिता **(12 घंटे)**

- कविवचन सुधा – भारतेंदु हरिश्चंद्र
- आनंद कादंबिनी – बदरी नारायण चौधरी 'प्रेमघन'
- हिंदी प्रदीप – बालकृष्ण भट्ट
- सरस्वती – महावीर प्रसाद द्विवेदी

इकाई 4 : हिंदी नवजागरण से संबंधित चयनित पाठ **(9 घंटे)**

- भारतवर्षोन्नति कैसे हो सकती है – भारतेंदु हरिश्चंद्र
- जातीयता के गुण – बालकृष्ण भट्ट
- भारत दुर्दशा – प्रताप नारायण मिश्र
- शिवशंभु के चिट्ठे – बालमुकुंद गुप्त

सहायक ग्रंथों की सूची:

1. द्विवेदी, हजारी प्रसाद; हिंदी साहित्य : उद्भव और विकास, राजकमल प्रकाशन, दिल्ली।
2. भट्ट, बालकृष्ण; निबंध संग्रह, उत्तर प्रदेश हिंदी संस्थान, लखनऊ।
3. शर्मा, रामविलास; भारतेंदु और हिंदी नवजागरण की समस्याएं, राजकमल प्रकाशन, दिल्ली।
4. शर्मा, रामविलास; महावीरप्रसाद द्विवेदी और हिंदी नवजागरण, राजकमल प्रकाशन, दिल्ली।
5. शर्मा, रामविलास शर्मा; परंपरा का मूल्यांकन, राजकमल प्रकाशन, दिल्ली।

3. विकास और मीडिया के अंतर्संबंधों की समझ प्रदान करना
4. ग्रामीण और क्षेत्रीय पत्रकारिता में रोजगार के अवसरोंकी जानकारी देना।

Course Learning Outcomes

1. छात्र समावेशी विकास से अवगत होंगे।
2. छात्रों में विकास और आपदा सम्बंधित समाचार लेखन का कौशल विकसित होगा।
3. विकास और मीडिया के अंतर्संबंधों की समझ विकसित होगी।
4. छात्रों को ग्रामीण और क्षेत्रीय पत्रकारिता में रोजगार के अवसर मिलेंगे।

1. विकासपत्रकारिताएकपरिचय10घंटे

- विकास की अवधारणा: अर्थ, स्वरूप और महत्व
- विकास के सिद्धांत और मॉडल
- मैकब्राइट कमीशन और मीडिया की भुमिका

2. ग्रामीणविकासऔरक्षेत्रीयपत्रकारिता10घंटे

- भारत का ग्रामीण परिदृश्य और क्षेत्रीय पत्रकारिता
- ग्रामीण विकास, सरकारी योजनाएं और स्वयं सेवी संगठनों की भूमिका

- पंचायती राज व्यवस्था व ग्रामीण मुद्दों की रिपोर्टिंग और चुनौतियां

3. स्वास्थ्य, शिक्षा और पर्यावरण क्षेत्र की पत्रकारिता10घंटे

- स्वास्थ्य और शिक्षा के क्षेत्र की पत्रकारिता और चुनौतियां
- पर्यावरण, प्राकृतिक संसाधन, आपदा प्रबंधन और मीडिया
- असंगठित क्षेत्र की पत्रकारिता, समस्याएँ और चुनौतियाँ

4.ग्रामीण प्रेस की आवश्यकता और चुनौतियां15घंटे

- ग्रामीण और स्थानीय समाचार पत्र - पत्रिकाओं की स्थिति और समस्याएं
- सामुदायिक रेडियो, ग्रामीण मुद्दें(वंचित समुदाय, ग़रीबी कुपोषण, आदि)
- मुख्यधारा की मीडिया में क्षेत्रीय विकास संबंधी कवरेज

प्रायोगिककार्य30घंटे

- विकास संबंधित मुद्दों पर रिपोर्ट लेखन।
- किसी एक समाचार पत्र में प्रकाशित एक सप्ताह की ग्रामीण विकास संबंधी कवरेज का अध्ययन एवं उसकी रिपोर्टिंग।
- विकास संबंधित सरकारी नीतियों का अध्ययन करना एवं समीक्षात्मक लेख तैयार करना।
- पर्यावरण पर फील्ड विजिट और साक्षात्का करना।
- मुख्यधारा की मीडिया एवं क्षेत्रीय मीडिया में वंचित समुदाय के मुद्दों पर समूह चर्चा
- ग्रामीण एवं विकास के मुद्दों से जुड़ी समस्याओं पर डाक्यूमेंट्री अथवा पीपीटी तैयार करना।

Learning Objectives

The Learning Objectives of this course are as follows:

1. नागरिक पत्रकारिता के स्वरूप एवं मुद्दों को समझाना।
2. नागरिक हितों के संरक्षण में पत्रकारिता की उपयोगिता से अवगत कराना।
3. नागरिक पत्रकारिता की नैतिकता का ज्ञान कराना।

Course Learning Outcomes

1. छात्र नागरिक पत्रकारिता के महत्व से अवगत होंगे।
2. लोकतंत्र, नागरिक हित एवं पत्रकारिता के आपसी संबंधों की जानकारी प्राप्त होगी।
3. नागरिक पत्रकारिता की नैतिकता के मुद्दों को जान पायेंगे।

1.नागरिक पत्रकारिता : परिचय एवं सिद्धान्त **10घंटे**

- नागरिक पत्रकारिता : अर्थ और महत्त्व
- नागरिक पत्रकारिता के तत्व और सिद्धांत
- नागरिक पत्रकारिता एवं सामाजिक सक्रियता

2.नागरिक पत्रकारिता –प्लेटफ़ार्म एवं टूल 10घंटे

- नागरिक पत्रकारिता के विविध उपकरण
- नागरिक पत्रकारिता की चुनौतियाँ
- नागरिक पत्रकारिता के मुद्दें

3.नागरिक पत्रकारिता एवं नैतिकता 10घंटे

- नागरिक पत्रकारिता की आचार संहिता की आवश्यकता
- नैतिकता एवं नागरिक पत्रकारिता
- प्रमुख नागरिक आंदोलन एवं नागरिक पत्रकारिता

4.नागरिक पत्रकारिता एवं सोशल मीडिया 15घंटे

- सोशल मीडिया : क्षेत्रीय मुद्दों की अभिव्यक्ति
- नागरिक पत्रकारिता में फ़ेक न्यूज़ के ख़तरे
- नागरिक पत्रकारिता की संभावनाएँ

प्रायोगिक कार्य : 30घंटे

- नागरिक हितों से जुड़ी स्टोरी की विषयवस्तु का तुलनात्मक विश्लेषण करना।
- जन आंदोलन में नागरिक पत्रकारिता की भूमिका का विश्लेषण करना।
- सोशल मीडिया में आने वाले नागरिक मुद्दों पर रिपोर्ट तैयार करना।
- सोशल मीडिया ट्रेंड में जनहितों के मुद्दों का लोगों पर प्रभाव का विश्लेषण करना।

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
जनमाध्यम के सिद्धांत	4	3		1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

1. छात्रों में जनमाध्यमों की समझ विकसित करना
2. छात्र को भारतीय संचार की अवधारणा से परिचित कराना
3. छात्रों को जनमाध्यम और समाज के बीच संबंध से अवगत कराना।
4. छात्रों को जनमाध्यम संदेशों पर व्यक्तिगत प्रतिक्रिया की पहचान कराना
5. जनसंचार के विविध प्रारूप और सिद्धांतों से परिचित कराना।

Learning Outcomes

1. जनमाध्यमों की समझ विकसित होगी।
2. संचार की भारतीय अवधारणा से परिचित होंगे।
3. जन माध्यमों के समाज पर प्रभाव का आकलन कर सकेंगे।
4. जनमाध्यमों के सिद्धांतों से परिचित होंगे।
5. जनमाध्यम के संदेशों से व्यक्तिगत प्रभाव का आकलन कर सकेंगे।

1. जनमाध्यम : परिचय **10 घंटे**

- जनमाध्यम: स्वरूप एवं प्रकार
- जन माध्यम: कार्यशैली एवं उद्देश्य
- जनमाध्यमों की जनमत निर्माण में भूमिका : एग्जिट पोल, ओपिनियन पोल

2. संचार के मॉडल **10 घंटे**

- संचार प्रारूप (मॉडल) के प्रकार : लीनियर, नॉन लीनियर एवं मिश्रित
- प्रमुख संचार प्रारूप: अरस्तु, शैनन एवं वीवर,ऑसगुड, लासवेल एवं विल्बर श्रैम
- आधुनिक संचार प्रारूप: न्यूकॉम्ब, गर्बनर, वेस्तले एवं मैकलीन, व्हाइट गेटकीपिंग

3. जनसंचार के सिद्धांत **10 घंटे**

- जनसंचार के समाजशास्त्रीय, मनोवैज्ञानिक सिद्धांत
- जनसंचार का नियामक सिद्धांत (प्रभुत्ववादी, उदारवादी, सामाजिक उत्तरदायित्व, साम्यवादी सिद्धांत, लोकतांत्रिक सहभागिता का सिद्धांत, मीडिया विकास का सिद्धांत)
- अन्य सिद्धांत: बुलेट सिद्धांत, गेटकीपिंग का सिद्धांत, क्लटीवेशनल सिद्धांत, जनसमाज सिद्धांत

4. माध्यम-प्रभाव अध्ययन **15 घंटे**

- जनमाध्यमों की प्रस्तुति की समीक्षा
- फीड बैक, फीड फ़ारवर्ड
- उपभोक्तावादी संस्कृति से मीडिया में आये बदलावों की समीक्षा

प्रायोगिक कार्य **30 घंटे**

- किसी एक चयनित संचार सिद्धांत की प्रासंगिकता का सर्वे और आपसी बातचीत के आधार पर पीपीटी तैयार करना
- किसी समसामयिक राष्ट्रीय और अंतरराष्ट्रीय समाचार की मीडिया प्रस्तुति की केस स्टडी तैयार करना
- किसी समसामयिक सामाजिक/ आर्थिक/ राजनीतिक/ तकनीकी मुद्दे पर भाषण तैयार कर उसकी प्रस्तुति करना
- किन्ही दो प्रिंट अथवा इलेक्ट्रॉनिक माध्यमों की समाचार प्रस्तुति का तुलनात्मक अध्ययन एवं प्रस्तुति
- जनमत निर्माण हेतु प्रश्नावली निर्माण और उसके आधार पर सर्वेक्षण की रिपोर्ट तैयार करना।

DSC 14 हाशिए का समाज और हिंदी मीडिया

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSC 14 हाशिए का समाज और हिंदी मीडिया	4	3		1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

1. हाशिए के समाज की अवधारणा से परिचित करवाना।
2. हाशिए के समाज की समस्याओं से अवगत करवाना।
3. हिंदी मीडिया में हाशिए के समाज की भूमिका बताना।
4. सामाजिक बदलाव के लिए छात्रों को तैयार करना।

Course Learning Outcomes

1. छात्र हाशिये के समाज के बारे में जानकारी प्राप्त करेंगे।
2. छात्र समाज का महत्त्व समझेंगे।
3. छात्र समाज परिवर्तन के लिए तैयार होंगे।

1. भारतीय सामाजिक व्यवस्था और हाशिए का समाज **10 घंटे**

- हाशिए का समाज – अर्थ और अवधारणा
- भारतीय सामाजिक व्यवस्था और समस्याएं
- सामाजिक विकास में हाशिए के समाज का योगदान

2. दलित- आदिवासी समाज और मीडिया **10 घंटे**

- दलित और आदिवासी वर्ग की समस्याएं
- मीडिया की मुख्यधारा दलित और आदिवासी समाज
- मीडिया की ख़बरें और समतामूलक समाज – निर्माण का उद्देश्य एवं सामाजिक समरसता

3. जेंडर समानता और अस्मिता विमर्श 10 घंटे

- स्त्री विमर्श की भारतीय अवधारणा
- मीडिया के जेंडर समानता के सवाल
- थर्ड जेंडर का मुद्दा और हिंदी मीडिया

4. अस्मिता विमर्श और माध्यम व्यवहार 15 घंटे

- लोक संस्कृति के पहलू और हाशिए का समाज
- जन माध्यमों का बाजार और हाशिए का जीवन
- सामाजिक न्याय और मीडिया

प्रायोगिक कार्य 30 घंटे

- महाविद्यालय में हाशिए के समाज सम्बन्धी कार्यक्रम की रिपोर्टिंग करवाना।
- किसी एक अख़बार की हाशिए के समाज सम्बन्धी ख़बरों का विश्लेषण।
- किसी एक चैनल की हाशिए के समाज सम्बन्धी ख़बरों का विश्लेषण।
- हाशिए के समाज के प्रमुख व्यक्तित्व से भेंटवार्ता और साक्षात्कार।

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSC 15 विज्ञापन	4	3	0	1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

Course Objective

1. छात्रों को मीडिया में विज्ञापन के महत्व से अवगत कराना।
2. छात्रों को विज्ञापन निर्माण का व्यवहारिक अभ्यास कराना।
3. छात्रों को विज्ञापन के भारतीय समाज पर पड़ने वाले प्रभाव की जानकारी देना।

Course Learning Outcomes

1. छात्र मीडिया के अर्थतंत्र को जान पायेंगे।
2. विज्ञापन के कॉपी निर्माण का व्यावहारिक ज्ञान होगा।
3. विज्ञापन में भाषा की रचनात्मकता का महत्व सीख सकेंगे ।
4. विज्ञापन की आचार संहिता को जान पायेंगे।

1. विज्ञापन : अर्थ एवं सिद्धांत **10 घंटे**

- विज्ञापन : अर्थ, प्रकार एवं उद्देश्य
- विज्ञापन के सिद्धांत : AIDA व DAGMAR
- ब्रांड की अवधारणा

2. माध्यमगत विज्ञापन **10 घंटे**

- प्रिंट एवं ई/डिजिटल विज्ञापन की विशेषता
- रेडियो विज्ञापन
- वीडियो/टेलीविजन विज्ञापन की विशेषता

3. विज्ञापन निर्माण एवं भाषा **10 घंटे**

- विज्ञापन कॉपी निर्माण एवं तत्व
- विज्ञापन में रचनात्मकता एवं भाषाई प्रयोग
- विज्ञापन अभियान एवं चरण

4. विज्ञापन एवं समाज **15 घंटे**

- विज्ञापन का समाज एवं संस्कृति पर प्रभाव
- विज्ञापन परिषद की आचार संहिता
- विज्ञापन एजेंसी की संगठन संरचना

प्रायोगिक कार्य : **30 घंटे**

- किसी एक विषय पर विज्ञापन की कॉपी तैयार करना।
- रेडियो जिंगल तैयार करना।
- सामाजिक जागरूकता हेतु वीडियो विज्ञापन तैयार करना।
- समाज पर विज्ञापन के प्रभाव का विश्लेषणात्मक अध्ययन करना।

		Lecture	Tutorial	Practical/ Practice		
DSE 3 हिंदी सिनेमा (क)	4	3		1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

Course Objectives

1. हिंदी सिनेमा के उद्भव और विकास यात्रा से अवगत करवाना।
2. हिंदी सिनेमा में प्रयुक्त तकनीकी दक्षता प्रदान करना।
3. हिंदी सिनेमा जगत के विविध आयामों से परिचित कराना।

Course Learning Outcomes

1. विद्यार्थी हिंदी सिनेमा विकास यात्रा की जानकारी प्राप्त करेंगे।
2. विद्यार्थी हिंदी सिनेमा निर्माण प्रक्रिया से अवगत होंगे।
3. विद्यार्थी हिंदी सिनेमा के विविध आयामों से परिचित होंगे।
4. सिनेमा के क्षेत्र में उत्पन्न रोज़गार के अवसरों का लाभ ले पायेंगे।

1. हिंदी सिनेमा : सामान्य परिचय **10 घंटे**

- हिंदी सिनेमा की विकास यात्रा
- सिनेमा के विषय : सामाजिक, धार्मिक, ऐतिहासिक, राजनैतिक, पारिवारिक, कॉमेडी, हॉरर
- हिंदी सिनेमा का वर्गीकरण : लोकप्रिय सिनेमा, समानांतर सिनेमा, क्षेत्रीय सिनेमा

2. हिंदी सिनेमा : तकनीक एवं प्रविधियाँ **10 घंटे**

- सिनेमा : तकनीकी एवं कौशल : पटकथा, अभिनय, संवाद, गीत, संगीत, नृत्य, निर्देशन, प्रस्तुतीकरण

- स्पेशल इफ़ेक्ट्स तकनीक
- सिनेमेटोग्राफ़ी

3. हिंदी सिनेमा : अर्थशास्त्र और प्रबंधन **10 घंटे**

- हिंदी सिनेमा का बाज़ार **:** राष्ट्रीय एवं अंतर्राष्ट्रीय
- हिंदी सिनेमा की मार्केटिंग तकनीक
- सिनेमा समीक्षा, सेंसर बोर्ड, सिनेमा संबंधी तकनीकी शब्दावली

4. हिंदी सिनेमा का समकालीन परिदृश्य **15 घंटे**

- हिंदी सिनेमा का बदलता स्वरूप : न्यू सिनेमा, ओटीटी प्लेटफॉर्म, शॉर्ट फ़िल्म्स
- हिंदी सिनेमा का समाजशास्त्र
- लोकप्रिय हिंदी फ़िल्मों का समीक्षात्मक अध्ययन : दो बीघा ज़मीन, मदर इंडिया, पूरब-पश्चिम, स्वदेश, तारे ज़मीन पर, चक दे इंडिया

प्रायोगिक कार्य **30 घंटे**

- किसी चर्चित फ़िल्म की समीक्षा
- किसी साहित्यिक कहानी का संवाद लेखन एवं दृश्य रूपांतरण करना
- समसामयिक विषयों पर 5 मिनट की लघुफ़िल्म का निर्माण
- समाचार पत्र के फ़िल्म आधारित परिशिष्ट पेज का अध्ययन कर रिपोर्ट तैयार करना

सहायक पुस्तकें :

9. सिनेमा का जादुई सफ़र : प्रताप सिंह, राजकमल प्रकाशन
10. फ़िल्म निर्माण के कारक तत्व : बालकृष्ण राव, राजमंगल प्रकाशन
11. हिंदी सिनेमा का इतिहास : मनमोहन चड्ढा, शशि प्रकाशन
12. Encyclopedia of Hindi Cinema, Govind nihlani, Gulzar, Saibal Chatterjee, Britannica Press
13. Great Movies 100 years of cinema, parragon Books
14. Reviewing Hindi Cinema since 1945, Suman Shakya, Notion Press

DSE 2 खोजी पत्रकारिता (ख)	4	3	0	1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

Course Objective

4. स्टिंग पत्रकारिता के स्वरूप की जानकारी देना।
5. छात्रों को स्टिंग पत्रकारिता के महत्व से परिचित कराना।
6. स्टिंग पत्रकारिता क्षेत्र में रोजगारपरक संभावनाओं पर प्रकाश डालना।

Course Learning Outcomes

4. स्टिंग पत्रकारिता और उसके प्रयोग की जानकारी प्राप्त कर सकेंगे।
5. स्टिंग पत्रकारिता के महत्व को समझेंगे।
6. छात्रों को रोजगारपरक प्रशिक्षण प्राप्त होगा।

1. खोजी पत्रकारिता : अवधारणा एवं स्वरूप **10 घंटे**

- खोजी पत्रकारिता : अर्थ, परिभाषा एवं विभिन्न प्रकार
- सामान्य रिपोर्टिंग तथा खोजी पत्रकारिता में अंतर
- खोजी पत्रकारिता में मौलिकता का महत्व

2. खोजी रिपोर्ट एवं शोधपरक पड़ताल **10 घंटे**

- खोजपरक रिपोर्टिंग में शोध का महत्व एवं प्रयोग
- आंकड़ों का व्यवस्थित एवं प्रासंगिक अध्ययन
- आंकड़ों का तथ्यपरक एवं तुलनात्मक विश्लेषण

3. स्टिंग ऑपरेशन : सिद्धांत, तकनीक, उपकरण एवं प्रयोग **10 घंटे**

- स्टिंग ऑपरेशन : विधा की विशेषताएं एवं प्रशिक्षण
- स्टिंग ऑपरेशन : आवश्यक उपकरण एवं तकनीक
- स्टिंग ऑपरेशन : व्यावहारिक चुनौतियां एवं संभावित खतरे और क़ानूनी पहलू

4. खोजी पत्रकारिता तथा स्टिंग ऑपरेशन : सामाजिक प्रभाव एवं विश्वसनीयता **15 घंटे**

- खोजी पत्रकारिता : सामाजिक प्रभाव
- व्यवस्था परिवर्तन एवं खोजी पत्रकारिता : (बोफोर्स तथा टू जी घोटाले के उदाहरण)
- स्टिंग ऑपरेशन : विश्वसनीयता एवं नैतिकता के प्रश्न

प्रायोगिक कार्य **30 घंटे**

- प्रमुख 5 स्ट्रिंग ऑपरेशन का अध्ययन कर उनकी रिपोर्ट प्रस्तुति करना।
- स्टिंग ऑपरेशन प्रविधि का आकलन करते हुए एक खोजी रिपोर्ट तैयार करना।
- ऑफलाइन – ऑनलाइन स्टिंग ऑपरेशन से जुड़े विवादों पर एक आलोचनात्मक लेख तैयार करना।
- स्टिंग ऑपरेशन के प्रभावों की समीक्षा विषय पर समूह चर्चा।

सहायक पुस्तकें :

1. इलेक्ट्रॉनिक मीडिया और स्टिंग ऑपरेशन – सतीश शर्मा जाफराबादी, तक्षशिला प्रकाशन
2. स्टिंग ऑपरेशन का सच भूपेन पटेल, पेंगुइन
3. इन्टरनेट जर्नलिज़्म - विजय कुलश्रेष्ठ -साहिल प्रकाशन जयपुर
4. स्टिंग ऑपरेशन सिध्द्धांत एवं व्यवहार – डॉ एस श्रीकान्त ,श्री नटराज प्रकाशन

DSE 3 लोक संस्कृति और समाज (ग)

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE 3 **लोक संस्कृति और समाज (ग)**	4	3	0	1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

Course Objective

- लोक संस्कृति की जानकारी प्रदान करना।
- लोक साहित्य की विविध विधाओं की जानकारी देना।
- भूमंडलीकरण के दौर में लोक संस्कृति की जानकारी देना।
- सभ्यता-संस्कृति की समझ विकसित करना।

Course Learning Outcomes

- विद्यार्थी लोक संस्कृति से परिचित हो सकेंगे।
- लोक साहित्य की विविध विधाओं का अध्ययन कर अर्जित ज्ञान और अनुभव से शोध कार्य कर सकेंगे।
- भूमंडलीकरण के दौर में लोक संस्कृति की व्यवहारिक जीवन में उपयोग कर सकेंगे।
- सभ्यता और संस्कृति की समीक्षा कर सकेंगे।
- लोक संस्कृति की व्यवसायी संभावनाओं का उपयोग करना सीख सकेंगे।

1. लोक संस्कृति : परिचय **10 घंटे**

- लोक संस्कृति : अर्थ, अवधारणा, विशेषताएँ, सभ्यता और संस्कृति

- लोक संस्कृति और समाज का अंतर्संबंध
- लोक संस्कृति : महत्व, संकट और संभावनाएँ

2. लोक साहित्य,समाज एवं संस्कृति 10 घंटे

- लोक साहित्य के विविध रूप : लोकगीत, लोकनाट्य, लोक कथाएं, लोक साहित्य में प्रमुख ऐतिहासिक घटनाओं की उपस्थिति (1857 का स्वाधीनता संग्राम, स्वाधीनता आंदोलन, स्वतंत्र भारत में युद्ध)
- लोक साहित्य और भाषा का सामाजिक जीवन पर प्रभाव
- लोक संस्कृति और अभिजनवादी संस्कृति, लोक साहित्य एवं शिष्ट साहित्य

3. जनमाध्यम और लोक संस्कृति 10 घंटे

- जनमाध्यम में लोक संस्कृति की स्थिति (पत्र-पत्रिकाएँ, रेडियो, टेलीविजन, फिल्म, ओटीटी, सोशल मीडिया), कंटेंट और भाषा
- पॉपुलर कल्चर और लोक संस्कृति, मीडिया और संस्कृति का अंतर्संबंध
- जनमाध्यमों पर अभिव्यक्ति की चुनौतियाँ तथा लोक भाषा

4. विमर्श और लोक संस्कृति 15 घंटे

- आधुनिकता और लोक संस्कृति : इतिहास, विज्ञान, आख्यान, प्राच्यवाद
- लोक और विमर्श : आदिवासी, स्त्री, दलित, पर्यावरण,
- स्व और लोक संस्कृति, सांस्कृतिक वर्चस्व और लोक संस्कृति

प्रायोगिक कार्य : 30 घंटे

- लोकगीतों का अध्ययन कर रिपोर्ट प्रस्तुति करना
- हिंदी उपन्यास अथवा किसी हिंदी कहानी पर बनी फिल्म की पटकथा पर समूह चर्चा।
- लोक साहित्य लोक कथाओं का संकलन तथा अनुवाद करना।
- किसी लोक संस्कृतिकर्मी से भेंटवार्ता एवं साक्षात्कार करना।
- लोक संस्कृति के किसी रूप पर परियोजना कार्य (रामलीला, रासलीला, आल्हा)
- लोक संस्कृति की जानकारी के लिए किसी एक गाँव की सर्वे के आधार पर रिपोर्ट प्रस्तुत करना।

सहायक पुस्तकें :

Learning Objectives

The Learning Objectives of this course are as follows:

Course Objective

- विद्यार्थियों को वेब पत्रकारिता के परिवर्तित स्वरूप से परिचित कराना।
- वेब लेखन तकनीक की जानकारी देना।
- वेब पत्रकारिता के नैतिक और कानूनी आयामों से अवगत कराना।

Course learning outcomes

- विद्यार्थी वेब समाचार,फीचर और लेखन तकनीक में दक्ष होंगे।
- वेब सामग्री का निर्माण और संपादन कार्य की जानकारी प्राप्त करेंगे।
- वेब सामग्री निर्माण के वैधानिक पक्ष की जानकारी से समृद्ध होंगे।

1. वेब पत्रकारिता **10 घंटे**

- वेब पत्रकारिता की परिभाषा महत्त्व और प्रकार
- वेब पत्रकारिता की उत्पत्ति और विकास
- वेब पत्रकारिता का सांस्कृतिक परिप्रेक्ष्य, बदलते समाज में वेब पत्रकारिता की भूमिका

2. वेब पत्रकारिता के रूप और प्रारूप **10 घंटे**

- वेब के लिए फोटो, वेब के लिए ऑडियो और वीडियो
- सूचना-ग्राफिक्स और डेटा विज़ुअलाइज़ेशन, मल्टीमीडिया पैकेज और मल्टी-मीडिया वृत्तचित्र
- वेब पत्रकारिता के रूप और उपकरण, वेब समाचार, वेब विज्ञापन, मार्केटिंग की पैकेजिंग और वितरण

3. वेब पत्रकारिता के लिए लेखन **10 घंटे**

- समाचार लेखन बनाम वेब के लिए लेखन

- वेब पत्रकारिता के लिए हेडलाइंस, हाइपरलिंक्स और सर्च इंजन अनुकूलित लेखन, सोशल नेटवर्किंग साइट्स में लेखन
- लिखने के लिए ग्राफिक्स और छवियों का उपयोग, वेब, वेब सामग्री लेखन और सर्च इंजन के साथ इसका संबंध

4. कन्वर्जेंट पत्रकारिता और वेब **15 घंटे**

- कन्वर्जेंट पत्रकारिता की परिभाषा, इसका विकास, प्रौद्योगिकी और अभिसरण (कन्वर्जेंस)
- कन्वर्जेंट पत्रकारिता का क्षेत्र, आभासी और वास्तविक कन्वर्जेंट पत्रकारिता के बीच अंतर, कम्युनिकेशन कन्वर्जेंस बिल 2001, प्रमुख भारतीय समाचार पोर्टलों का संक्षिप्त परिचय
- नेटवर्किंग वेबसाइटें, वेब 2.0 आदि की विशेषताएं एवं अनुप्रयोग

प्रायोगिक कार्य: **30 घंटे**

- किसी वेबसाइट के लिए फीचर तैयार करना।
- ब्लॉग बनाना और उसमें समसामयिक विषयों पर लेख लिखना।
- किसी न्यूज पोर्टल के लिए समाचार तैयार करना।
- अपने संस्थान की महत्वपूर्ण गतिविधियों की फोटोग्राफी करना, वीडियो रिपोर्ट और पॉडकास्ट बनाना।

Community outreach	2			2	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

1. समाज के विभिन्न मुद्दों के प्रति मीडिया छात्रों को जागरूक करना।
2. छात्रों में सामाजिक सरोकार की समझ विकसित करना।
3. समाज, संस्थान और मीडिया उद्योग में समन्वय स्थापित करना।
4. छात्रों में मीडिया व्यवसाय की व्यावहारिक समझ विकसित करना।

Course Learning Outcomes

1. समाज के विभिन्न मुद्दों के प्रति छात्र जागरूक होंगे।
2. छात्रों में सामाजिक सरोकार की समझ विकसित होगी।
3. मीडिया व्यावसाय का व्यवहारिक कौशल विकसित होगा।
4. समाज, संस्थान और मीडिया उद्योग में समन्वय स्थापित होगा।

Syllabus : 120 घंटे

1. विविध समुदायों के साथ मीडिया जागरूकता पर कार्यशाला।
2. विभिन्न मीडिया चैनलों द्वारा आयोजित चर्चा में हिस्सा लेना।
3. मीडिया संस्थानों का भ्रमण (समाचार-पत्र, पत्रिका, रेडियो एवं टीवी)
4. विभिन्न समसामयिक मुद्दों पर चर्चा की रिकॉर्डिंग तैयार करना।
5. विश्वविद्यालय एवं कॉलेजों के विविध कार्यक्रमों की कवरेज करना (प्रिंट, रेडियो, वीडियो, लाइव)
6. भ्रमण एवं गतिविधियों की साप्ताहिक रिपोर्ट तैयार कर प्रकाशित करना।

7. समाज के विविध क्षेत्रों में उत्कृष्ट कार्य करने वाले लोगों के साक्षात्कार करना।
8. संबंधित शिक्षक से नियमित चर्चा एवं मार्गदर्शन में विभिन्न मीडिया गतिविधियों को कार्यान्वित करना।
9. स्थानीय मुद्दों पर रिपोर्टिंग और परिचर्चा का आयोजन कराना।
10. मीडिया लैब में मीडिया कार्यक्रम तैयार करना।

फील्ड वर्क सेमेस्टर में :

- सप्ताह में न्यूनतम 4 घंटे छात्र को समाज में देने होंगे। कार्य की जांच (1 घंटा) समूह मार्गदर्शन (1 घंटा)
- छात्रों की सामुदायिक भ्रमण में 80 प्रतिशत उपस्थिति अनिवार्य होगी।
- छात्रों का मीडिया संस्थान या समाज में भ्रमण शिक्षकों के देख-रेख एवं निर्देशन में होगा।

नोट : हिंदी पत्रकारिता एवं जनसंचार पाठ्यक्रम के लिए आधुनिक सुविधाओं से लैस ऑडियो-वीडियो मीडिया लैब अनिवार्य है। छात्रों के प्रायोगिक प्रशिक्षण हेतु महाविद्यालय में अपेक्षित मीडिया उपकरण, तकनीकी क्षमता रखने वाले सहायक कर्मी, उपयोगी सॉफ्टवेयर एवं कम्प्यूटर के साथ प्रोजेक्टर और इंटरनेट की सुविधा की व्यवस्था होनी चाहिए।

The Learning Objectives of this course are as follows:

1. जनसंपर्क की अवधारणा से परिचित कराना।
2. विभिन्न क्षेत्रों में जनसंपर्क के उपयोग से अवगत कराना।
3. जनसंपर्क की कार्यप्रणाली पर प्रकाश डालना।
4. जनसंपर्क में कौशल विकसित करना।

Learning Outcomes

1. जनसंपर्क की अवधारणा से परिचित होंगे।
2. विभिन्न क्षेत्रों में जनसंपर्क कर लाभान्वित होंगे।
3. जनसंपर्क की कार्यप्रणाली का ज्ञान अर्जित करेंगे।
4. जनसंपर्क के क्षेत्र में दक्ष बनेंगे।

1. जनसंपर्क: अवधारणा और विकास **10 घंटे**

- जनसंपर्क का अर्थ, परिभाषा और स्वरूप
- जनसंपर्क के विकास का भारतीय परिदृश्य, जनसंपर्क के विकास का वैश्विक परिदृश्य
- जनसंपर्क के सिद्धान्त और साधन

2 जनसंपर्क विभाग: संरचना और कार्य प्रक्रिया **10 घंटे**

- जनसंपर्क विभाग की संरचना और कार्य
- जनसंपर्क के क्षेत्र : सरकारी व निजी क्षेत्र का जनसंपर्क
- जनसंपर्क : आंतरिक एवं बाह्य

3 जनसंपर्क अभियान एवं जनमत निर्माण **10 घंटे**

- जनसंपर्क अभियान
- जनमत निर्माण में जनसंपर्क अधिकारी की भूमिका
- जनसंपर्क अधिकारी के गुण एवं दायित्व

4 जनसंपर्क के विविध आयाम **15 घंटे**

- आपदा प्रबंधन और जनसंपर्क
- जनसंपर्क, विज्ञापन, प्रचार और प्रोपेगेंडा
- जनसंपर्क उद्योग और जनमाध्यम

प्रायोगिक कार्य **30 घंटे**

- किसी एक सरकारी जनसंपर्क विभाग के संगठन और कार्य योजना पर रिपोर्ट लिखना।
- किसी जनसंपर्क अधिकारी का साक्षात्कार लेना।
- आपदा प्रबंधन में जनसंपर्क की भूमिका पर रिपोर्ट तैयार करना।
- किसी एक सामाजिक या स्वास्थ्य विषयक जनसंपर्क अभियान की रूपरेखा तैयार करना।

संदर्भ पुस्तकें :

1. जनसंपर्क प्रबंधन, डॉ कुमुद शर्मा, प्रभात प्रकाशन
2. जनसंपर्क सिद्धांत और व्यवहार, डॉ सुशील त्रिवेदी, शशि कांत शर्मा, मध्य प्रदेश हिंदी ग्रंथ अकादमी, भोपाल
3. जनसंपर्क अवधारणा एवं बदलता स्वरूप, कृ शि मेहता, किताब घर प्रकाशन
4. जनसंपर्क के विविध आयाम, पवित्र श्रीवस्तव सी के सक्सेना, राजकमल प्रकाशन
5. जनसंपर्क, विज्ञापन एवं प्रसार माध्यम, एन सी पंत, तक्षशिला प्रकाशन

DSC 17 डिजिटल संचार के नए आयाम

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSC 17 **डिजिटल संचार के नए आयाम**	4	3	0	1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

1. विद्यार्थियों को डिजिटल संचार के नए रूपों से परिचित कराना।
2. डिजिटल संचार लेखन में विद्यार्थियों को सक्षम बनाना ।
3. डिजिटल संचार लेखन के व्यावहारिक, नैतिक और वैधानिक आयामों से अवगत कराना।

Course Learning Outcomes

1. विद्यार्थी विभिन्न नए डिजिटल प्लेटफार्म की लेखन पद्धति सीखेंगे।
2. विद्यार्थियों को डिजिटल संचार के नए रूपों से परिचित होने और सीखने का अवसर प्राप्त होगा ।
3. डिजिटल संचार लेखन के विविध कानूनी और नैतिक आयामों की जानकारी प्राप्त कर सकेंगे।

1. डिजिटल संचार 10 घंटे

- डिजिटल संचार: स्वरूप और विकास
- डिजिटल संचार के प्रकार, विशेषताएं और सीमाएं
- डिजिटल संचार के उपकरण: इन्टरनेट, सोशल नेटवर्किंग साइट्स, वेबसाइट, न्यूज पोर्टल, ऐप्स, ओटीटी प्लेटफार्म, इन्टरनेट रेडियो, एचडीटीवी, ई मेल आदि।

2. डिजिटल संचार के नए आयाम **10 घंटे**

- वेब ट्रेफिक, गूगल ट्रेंड्स, FB पोस्ट, ट्वीट, ऑडियो बुक, वेब सीरिज
- लाइव चैट, चैट बॉट, चैट जीपीटी, वीडियो चैट, वेब कॉलिंग, लाइव स्ट्रीमिंग, सर्च इंजन मार्केटिंग
- डिजिटल विज्ञापन, शॉर्ट्स वीडियो, रील, मीम्स, ऑडियो वीडियो किस्सागोई, एसएमएस, इमोजी, स्टीकर

3. डिजिटल संचार, मार्केटिंग और जनसम्पर्क **10 घंटे**

- डिजिटल जनसम्पर्क के उपकरण, डिजिटल जनसम्पर्क में मार्केटिंग और ब्रांड प्रचार
- मिक्स मार्केटिंग में डिजिटल संचार का उपयोग और ब्रांड निर्माण में डिजिटल संचार का उपयोग, मार्केटिंग लक्ष्यों को प्राप्त करने के लिए डिजिटल मार्केटिंग और जनसम्पर्क के संबंध
- डिजिटल मार्केटिंग के लिए ऑनलाइन स्पॉन्सरशिप और ब्रांड प्रचार, डिजिटल संचार का उपयोग करने वाले ब्रांड्स की केस स्टडी

4. डिजिटल संचार की संस्कृति और सूचना युग **15 घंटे**

- मीडिया सामग्री बनाम डिजिटल मीडिया सामग्री और वर्तमान विचारधारा
- डिजिटल सामग्री और बौद्धिक संपदा, डिजिटल सामग्री के कार्यान्वयन का उपयोग, महत्व और क्षेत्र
- सोशल मीडिया पर डिजिटल सामग्री प्रबंधन का महत्त्व

प्रायोगिक कार्य: **30 घंटे**

- सोशल नेटवर्किंग साइट्स के लिए कंटेंट निर्माण करना।
- किसी सामाजिक मुद्दे पर ऑडियो निर्माण करना।
- किसी कॉलेज इवेंट के लिए शॉर्ट वीडियो का निर्माण करना।
- डिजिटल प्लेटफॉर्म के लिए विज्ञापन का निर्माण करना।
- ब्लॉग बनाकर उसमें फीचर और लेख लिखना।
- डिजिटल मार्केटिंग के लिए डिजिटल जनसंपर्क उपकरण का निर्माण करना।

DSC 18 मीडिया शोध

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSC 18 **मीडिया शोध**	4	3	0	1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

Course Objective

4. छात्रों को शोध के महत्व से अवगत कराना।
5. शोध की सामाजिक उपयोगिता की जानकारी देना।
6. मीडिया में शोध सर्वे एवं विषयवस्तु विश्लेषण का महत्व बताना।

Course Learning Outcomes

5. छात्र वैज्ञानिक अध्ययन का महत्व जान पायेंगे।
6. शोध के विविध चरणों की जानकारी से छात्रों की विश्लेषण क्षमता बढ़ेगी।
7. शोधकर्ता के उत्तरदायित्व को जान पायेंगे।
8. साहित्य चोरी एवं संदर्भ लेखन के महत्व का ज्ञान होगा।

1. शोध : अर्थ एवं सिद्धांत **10 घंटे**

- शोध : अर्थ, उपयोगिता एवं उद्देश्य
- शोध के विभिन्न प्रकार एवं चरण
- शोध की नैतिकता, शोधकर्ता के उत्तरदायित्व

2. शोध-प्रक्रिया **10 घंटे**

- शोध – समस्या का चयन, विषय निर्धारण, चर (वेरिएबल) प्रकार

- साहित्य अवलोकन, उद्देश्य एवं शोध परिकल्पना : अर्थ, प्रकार
- सैंपलिंग : अर्थ, प्रकार एवं आवश्यकता

3. शोध प्रविधि **10 घंटे**

- शोध में आँकड़ें : प्राथमिक एवं द्वितीयक
- शोध विधि : सर्वे -अनुसूची एवं प्रश्नावली, विषयवस्तु विश्लेषण, प्रयोगात्मक, केस स्टडी आदि
- प्रश्नावली के प्रकार एवं निर्माण

4. शोध परिणाम एवं साहित्य चोरी **15 घंटे**

- आँकड़ों का एकत्रीकरण, व्यवस्थिकरण एवं विश्लेषण
- शोध परिणाम : सामान्यकरण, समस्या, संभावनाएँ एवं उपयोगिता
- संदर्भ सूची: आवश्यकता एवं स्टाइल, साहित्य चोरी

प्रायोगिक कार्य : **30 घंटे**

- विभिन्न विषयों पर शोध प्रश्नावली तैयार करना एवं आकड़ें एकत्रित करना।
- सामाजिक महत्व के किसी विषय पर छात्रों में सर्वे करना।
- सर्वेक्षण से प्राप्त आँकड़ों का व्यवस्थिकरण एवं विश्लेषण करना।
- समाचार पत्रों की विषयवस्तु का विश्लेषण करना।
- ओपिनियन पोल जानने हेतु चुनावी सर्वे करना।

सहायक पुस्तकें :

5. शोध पद्वति, सी आर कोठारी, न्यू ऐज प्रकाशन, नई दिल्ली
6. अनुसंधान : प्रक्रिया और प्रविधि, साहित्य सरोवर प्रकाशन, नई दिल्ली
7. रिसर्च मैथडोलॉजी, लक्ष्मी नारायण कोहली, वायी के प्रकाशन, नई दिल्ली
8. रिसर्च मैथडोलॉजी : ए स्टेप बाय स्टेप गाइड फॉर बिग्नर्स, रणजीत कुमार, सेज पब्लिकेशन

DSE 3 मीडिया प्रबंधन (क)

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE 3 (क) मीडिया प्रबंधन	4	3	0	1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

1. विभिन्न मीडिया संस्थानों के प्रबंधन से परिचित करना।
2. प्रिंट एवं इलेक्ट्रॉनिक मीडिया प्रबंधन के स्वरुप एवं संगठन की जानकारी प्रदान करना।
3. मीडिया के अर्थशास्त्रीय प्रबंधन की समस्याओं एवं चुनौतियाँ से अवगत करना।

Course Learning Outcomes

1. विद्यार्थी विभिन्न मीडिया संस्थानों के प्रबंधन से परिचित होंगे।
2. विद्यार्थी प्रिंट एवं इलेक्ट्रॉनिक मीडिया प्रबंधन के स्वरुप संगठन की जानकारी प्राप्त करेंगे।
3. विद्यार्थी मीडिया अर्थशास्त्रीय यथार्थ से अवगत होंगे।

1 मीडिया प्रबंधन की अवधारणा **10 घंटे**

- मीडिया प्रबंधन : अर्थ और महत्त्व
- मीडिया प्रबंधन के सिद्धांत
- मीडिया प्रबंधन : प्रबंधन विभाग, नीतियाँ और क्रियान्वयन

2 मीडिया संस्थान : संरचना एवं प्रबंधन **10 घंटे**

- मीडिया स्वामित्व और प्रबंधन
- प्रबंधन नियंत्रण कौशल
- राजनीतिक और प्रशासनिक दवाब

3 मीडिया संस्थानों में प्रबंधन का स्वरुप **10 घंटे**

- प्रिंट मीडिया का प्रबंधन स्वरुप **:** (समाचार पत्र और पत्रिकाओं के संदर्भ में संपादकीय प्रबंधन, मुद्रण प्रबंधन एवं वितरण प्रबंधन)
- रेडियो की प्रबंधन प्रक्रिया : (ऑल इंडिया रेडियो और एफ़०एम० चैनल के संदर्भ में)
- टेलीविज़न की प्रबंधन प्रक्रिया : (प्रोडक्शन, प्रसारण, विज्ञापन, जनसंपर्क और केबल नेटवर्क प्रबंधन)

4 मीडिया प्रबंधन का आर्थिक पक्ष **15 घंटे**

- प्रबंधन और पूँजी नियोजन, मीडिया संस्थानों का अर्थशास्त्र
- विदेशी पूँजी निवेश, मीडिया का बदलता परिदृश्य
- मीडिया संस्थानों की आर्थिक समस्याएँ

प्रायोगिक कार्य **30 घंटे**

- किसी एक मीडिया हाउस के प्रबंधक का साक्षात्कार।
- इलेक्ट्रॉनिक मीडिया के किसी एक संस्थान का भ्रमण कर उसके प्रबंधन पर रिपोर्ट तैयार करना।
- किसी समाचार पत्र अथवा पत्रिका के प्रबंधन विभाग की जानकारी प्रस्तुत करना।
- किसी भी विषय पर जनसंपर्क अभियान की रूपरेखा तैयार करना।

सहायक पुस्तकें :

1. समाचार एवं प्रबंधन – गुलाब कोठारी – राधाकृष्ण प्रकाशन
2. आधुनिक मीडिया प्रबंधन – डॉ० भगवान देव पाण्डेय – मिथिलेश कुमार पाण्डेय - तक्षशिला प्रकाशन
3. मीडिया प्रबंधन के सांस्कृतिक आयाम – डॉ० टी०एस० 'आलोक' – वाणी प्रकाशन
4. मीडिया प्रबंधन 5 का मंत्र – विजय जोशी और श्री राजेंद्र सिंह – राजकमल प्रकाशन
5. मीडिया प्रबंधन – डॉ० ऋतु गोठी खत्री - लक्ष्य प्रकाशन
6. मानव संसाधन विकास एवं प्रबंधन की रूपरेखा – आर०बी०एस० वर्मा / अतुल प्रताप सिंह- न्यू रॉयल बुक कंपनी (NCBC)

DSE 2 शैक्षिक पत्रकारिता (ख)

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE 2 शैक्षिक **पत्रकारिता (ख)**	4	3	0	1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

1. शैक्षिक पत्रकारिता के महत्त्व से परिचित कराना।
2. शैक्षिक पत्रकारिता के विविध आयामों की जानकारी देना।
3. शिक्षा एवं शिक्षण के स्तर पर जानकारी विकसित करते हुए इस क्षेत्र में प्रशिक्षु पत्रकारों का रुझान पैदा करना।
4. शैक्षिक पत्रकारिता क्षेत्र में रोजगारपरक संभावनाओं से परिचित कराना।

Course Learning Outcomes

1. विद्यार्थी शैक्षिक पत्रकारिता से परिचित होंगे।
2. समाजहित में शैक्षिक पत्रकारिता की उपादेयता को समझेंगे।
3. शैक्षिक पत्रकारिता के महत्त्व से परिचित हो सकेंगे।
4. इस क्षेत्र में रोजगारपरक संभावनाओं से अवगत होंगे।

1 शैक्षिक पत्रकारिता : परिचय — 10 घंटे

- शैक्षिक पत्रकारिता: अवधारणा एवं उद्देश्य
- शैक्षिक पत्रकारिता की आवश्यकता और महत्त्व
- शैक्षिक पत्रकारिता का इतिहास

2 शैक्षिक पत्रकारिता: विविध रूप — 10 घंटे

- प्रिंट माध्यम और शैक्षिक पत्रकारिता
- इलेक्ट्रोनिक माध्यमों – रेडियो टेलीविज़न में शैक्षिक पत्रकारिता का स्वरूप
- सोशल मीडिया और शैक्षिक पत्रकारिता- (गूगल याहू क्योरा पॉडकास्ट ट्विटर ब्लॉग फेसबुक)

3 शैक्षिक पत्रकारिता : रिपोर्टिंग तकनीक **10 घंटे**

- शैक्षिक पत्रकारिता के स्रोत
- शैक्षिक पत्रकारिता–कवरेज क्षेत्र
- शैक्षिक रिपोर्टिंग और लेखन कौशल

4 शैक्षिक पत्रकारिता: विविध आयाम **15 घंटे**

- शैक्षिक पत्रकारिता और सामाजिक विकास
- व्यावसायिक दौर में शैक्षिक पत्रकारिता और नैतिक प्रश्न
- शैक्षिक पत्रकारिता चुनौतियाँ और संभावनाएं

प्रायोगिक कार्य : **30 घंटे**

- किसी समाचार पत्र के शैक्षिक परिशिष्ट अथवा एक सप्ताह की शैक्षिक खबरों का अध्ययन कर रिपोर्ट प्रस्तुति
- शिक्षा चैनल या रेडियो पर प्रसारित शिक्षा संबंधी कार्यक्रमों की समीक्षा
- शिक्षा संबंधी मुद्दों पर समूह चर्चा
- अपने विद्यालय अथवा महाविद्यालय परिसर में आयोजित शैक्षिक कार्यक्रमों पर रिपोर्ट लेखन\ साक्षात्कार \न्यूज़ रील\ पॉड कास्ट अथवा ब्लॉग लेखन

सहायक पुस्तकें :

1. शिक्षा, मीडिया और राजनीति (वैचारिकी)– तेजपाल सिंह 'तेज़'– बुक वन ग्राफिक्स, दिल्ली
2. हिन्दी पत्रकारिता का इतिहास- मीनाक्षी सिंह, ओमेगा पब्लिकेशन्स , दिल्ली
3. संचार दर्पण – रमेशचंद्र त्रिपाठी, न्यू रॉयल बुक कंपनी, लखनऊ
4. सामाजिक पत्रकारिता – भरत झुनझुनवाला , श्री नटराज प्रकाशन , दिल्ली
5. इलेक्ट्रोनिक पत्रकारिता – डॉ. अजय कुमार सिंह , लोकभारती प्रकाशन , नई दिल्ली

DSE 2 खेल पत्रकारिता (ग)

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
DSE 2 खेल पत्रकारिता (ग)	4	3	0	1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

1. खेल पत्रकारिता के स्वरूप से परिचित करवाना।
2. खेल पत्रकारिता की विशेषताओं से अवगत कराना।
3. खेल पत्रकारिता में रोजगार की संभावनाओं पर प्रकाश डालना।

Course Learning Outcomes

1. विद्यार्थी खेल पत्रकारिता के स्वरूप से परिचित होंगे।
2. खेलों का जीवन में महत्व समझेंगे।
3. खेल पत्रकारिता में रोजगार के अवसर प्राप्त होंगें।

1. **खेल पत्रकारिता : सामान्य परिचय** **10 घंटे**
   - खेल पत्रकारिता की अवधारणा और विकास
   - प्रमुख खेल एवं प्रतियोगिताएं (ओलंपिक, पैरालम्पिक, राष्ट्रमंडल, एशियाई खेल, क्रिकेट विश्व कप फीफा विश्व कप, सुपर सीरीज, ग्रैंड स्लैम राष्ट्रीय खेल, लीग प्रतियोगिताएँ)
   - प्रमुख खेल संस्थाएं : भारतीय खेल प्राधिकरण, भारतीय ओलंपिक संघ, भारतीय खेल फेडरेशन एवं PEFI (फिजिकल एजुकेशन फाउंडेशन ऑफ़ इंडिया)

2. **प्रिंट मीडिया में खेल लेखन** **10 घंटे**
   - समाचार पत्र का खेल-पृष्ठ, मैच रिपोर्ट्स, रिव्यु और फॉलो-अप, रिपोर्टिंग
   - फीचर प्रोफाइल लेखन, कॉलम लेखन, इंटरव्यू, फोटो पत्रकारिता

- खेल पृष्ठ सम्पादन, खेल आंकड़ों और रिकॉर्ड का महत्त्व

3. खेल प्रसारण एवं लेखन 10 घंटे

- रेडियो, टीवी, सीधा प्रसारण, ओबी वैन प्रसारण व्यवस्था, रिकार्डेड प्रसारण, विशेष कार्यक्रम निर्मिति
- खेल बुलेटिन, खेल एंकर, कमेंटटेटर, मल्टीस्पोर्ट्स प्रसारण, खेल प्रोग्राम पैकेजिंग
- न्यू मीडिया एवं खेल : खेल केन्द्रित वेबसाईट, ब्लॉग, सोशल मीडिया,मोबाइल पत्रकारिता

4. खेल पत्रकारिता एवं समाज 15 घंटे

- खेल पत्रकारिता और अंतर्राष्ट्रीय सम्बन्ध
- खेल पत्रकारिता और आचार संहिता
- खेल पत्रकारिता और बाज़ार : खेल मार्केटिंग, खेल आयोजन और मीडिया का व्यवसायिक सम्बन्ध, मर्चेनडाइजिंग

प्रायोगिक कार्य 30 घंटे

- खेल विषयक 10 समाचारों का लेखन करना।
- किसी खिलाड़ी अथवा खेल पत्रकार का साक्षात्कार करना।
- खेल पृष्ठ निर्माण करना।
- केस स्टडी (खिलाड़ी/खेल/मुद्दे) पर करना।
- खेल देखकर मोबाइल कमेंट्री करना।
- खेल विषयक डॉक्युमेंट्री निर्माण करना।
- किसी एक खेल की पारिभाषिक शब्दावली का प्रयोग करते हुए रिपोर्ट लिखना।

GE (क) वैकल्पिक मीडिया

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE (क) वैकल्पिक मीडिया	**4**	**3**	0	**1**	**12th Pass**	**NIL**

Learning Objectives

The Learning Objectives of this course are as follows:

1. वैकल्पिक मीडिया से परिचित कराना।
2. मुख्यधारा मीडिया और वैकल्पिक मीडिया की कार्य-संस्कृति की जानकारी देना।
3. लोकतंत्र में वैकल्पिक मीडिया का महत्व बताना।
4. वैकल्पिक मीडिया की व्यावसायिक संभावनाओं से परिचित कराना।

Course Learning Outcomes

1. विद्यार्थी वैकल्पिक मीडिया से परिचित हो सकेंगे।
2. मुख्यधारा मीडिया तथा वैकल्पिक मीडिया की कार्य-संस्कृति में दक्षता प्राप्त करेंगे।
3. लोकतंत्र में सरोकारपरक पत्रकारिता से परिचित होंगे।
4. वैकल्पिक मीडिया में व्यावसायिक संभावनाओं से अवगत होंगे।

1. वैकल्पिक मीडिया : परिचय **10 घंटे**

- वैकल्पिक मीडिया : अर्थ, अवधारणा, उद्देश्य

- वैकल्पिक मीडिया और मुख्यधारा मीडिया में अंतर (संगठन और कार्य-संस्कृति)
- वैकल्पिक मीडिया की आवश्यकता और इतिहास

2. वैकल्पिक मीडिया: स्वरूप और संरचना **10 घंटे**

- वैकल्पिक मीडिया के विविध रूप (पारंपरिक और आधुनिक)
- सूचना प्रौद्योगिकी और वैकल्पिक मीडिया
- वैकल्पिक मीडिया की विषयवस्तु और भाषा, रिपोर्टिंग का स्वरूप

3. वैकल्पिक मीडिया: विविध परिप्रेक्ष्य **10 घंटे**

- वैकल्पिक मीडिया का सामाजिक जीवन पर प्रभाव, वैकल्पिक पत्रकारिता (लघु पत्र-पत्रिकाएं, शार्ट फिल्म्स, ओटीटी, यूट्यूब, ब्लॉग)
- रोजगार के परिप्रेक्ष्य में वैकल्पिक मीडिया, अर्थ-स्रोत
- वैकल्पिक मीडिया की चुनौतियां और संभावनाएं, न्यू मीडिया और अभिव्यक्ति की स्वतंत्रता

4. वैकल्पिक मीडिया: समसामयिक विमर्श **15 घंटे**

- वैकल्पिक मीडिया में हाशिए का समाज, संस्कृति उद्योग और वैकल्पिक मीडिया
- वैकल्पिक मीडिया : विचारधारा, एजेंडा सेटिंग, सामाजिक आंदोलन
- वैकल्पिक मीडिया का वर्ग-चरित्र और नैरेटिव (तुलनात्मक परिप्रेक्ष्य)

प्रायोगिक कार्य : **30 घंटे**

- मुख्यधारा मीडिया तथा वैकल्पिक मीडिया के स्वरूप का अध्ययन कर रिपोर्ट प्रस्तुति
- वैकल्पिक मीडिया के विस्तार, विषय, कार्य-संस्कृति पर समूह चर्चा और वार्ता
- समसामयिक विमर्शों से संबद्ध व्यावहारिक परियोजना कार्य
- वैकल्पिक मीडिया में सामाजिक आंदोलनों की उपस्थिति पर केस स्टडी
- वैकल्पिक मीडिया में भारतीय संस्कृति से संबंधित कार्यक्रमों की उपस्थिति पर टिप्पणी लेखन
- सर्वे के आधार पर किसी एक वैकल्पिक मीडिया की कार्यशैली, टारगेट ऑडियंस तथा अर्थ-तंत्र पर रिपोर्ट प्रस्तुत करना

सहायक पुस्तकें :

GE (ख) साइबर मीडिया

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
GE (ख) साइबर मीडिया	4	3	0	1	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

- जनसंचार में साइबर मीडिया का महत्व बताना।
- साइबर मीडिया के विविध आयामों की जानकारी देना।
- साइबर मीडिया के एप्लीकेशन्स से अवगत कराना।
- समाचार वेबसाइट, ब्लॉग और मोबाइल कम्युनिकेशन के लिए कंटेंट निर्माण का परिचय देना।
- साइबर कानून और उसमें नैतिकता के महत्व से अवगत कराना।

Course Learning Outcomes

- संचार प्रौद्योगिकी की समझ विकसित होगी।
- साइबर मीडिया का प्रभावशाली तरीके से प्रयोग करना सीखेंगे।
- ऑनलाइन समाचार मीडिया के लिए रिपोर्टिंग एवं लेखन का कौशल प्राप्त करेंगे।
- ऑनलाइन मीडिया के लिए विभिन्न प्लेटफॉर्म पर कंटेंट विकसित करने का ज्ञान प्राप्त करेंगे।
- साइबर कानून, साइबर अपराध और साइबर सुरक्षा संबंधी समझ विकसित होगी।

1 साइबर मीडिया: परिचय एवं अवधारणा 10 घंटे

- साइबर मीडिया: परिभाषा, महत्व और भारत में साइबर पत्रकारिता
- साइबर मीडिया तकनीक और विशेषताएं
- साइबर मीडिया और मीडिया के अन्य रूपों में अंतर, संचार माध्यम के रूप में साइबर मीडिया

2 ऑनलाइन मीडिया रिपोर्टिंग 10

- ऑनलाइन पत्रकारिता: उद्देश्य, प्रकार एवं विशेषताएं
- ऑनलाइन समाचार मीडिया के लिए रिपोर्टिंग: परंपरागत रिपोर्टिंग, मुक्त स्रोत (ओपन सोर्स) रिपोर्टिंग एवं वर्गीकृत रिपोर्टिंग
- ऑनलाइन पत्रकारिता के ट्रेंड्स एवं ऑनलाइन पत्रकार की विशेषताएं

3 ऑनलाइन मीडिया के लिए लेखन 10 घंटे

- ऑनलाइन लेखन : तत्व एवं विशेषताएं, कहानी एवं समाचार विकास के लिए डिजिटल मीडिया पर ग्राफ, इंफो ग्राफिक्स, मानचित्र, कार्टून, संकेतों और प्रतीकों का उपयोग
- ऑनलाइन लेखन के प्रकार: ब्रेकिंग न्यूज़, न्यूज़ स्टोरी , मल्टीमीडिया दृश्य स्टोरी लेखन, प्लेटफॉर्म आधारित ऑनलाइन मीडिया लेखन: न्यूज़ वेबसाइट और ब्लॉग, सोशल नेटवर्किंग साइट्स के लिए लेखन, अंतर्संबंध (इंटरएक्टिव) लेखन, एसईओ (SEO) आधारित ऑनलाइन मीडिया लेखन, फैक्ट चेकिंग
- ई-मेल लिखना, ट्विटर के लिए लेखन – ट्वीट, ट्वीट संबंधी लेखन दिशानिर्देश, ट्विटर टिप्स और उपकरण, फेसबुक पर लेखन, ब्लॉग लेखन, विषय-वस्तु का चुनाव करना, कहानियों का क्रम बनाना, पाठकों की संख्या बनाए रखना, चुनौतियाँ एवं ब्लॉग कमेंट

4 साइबर अपराध और कानून 15घंटे

- साइबर मीडिया और साइबर कानून, परिचय एवं आवश्यकता
- आईसीटी (ICT) 2000, 2008, 2021, बैंक और ई-रिकॉर्ड के रखरखाव संबंधी नीति
- हैकिंग: नैतिक और अनैतिक, स्थिति, साइबर अपराध एवं भारत में वेबसाइटों की निगरानी और ब्लॉक करने की शक्तियाँ

प्रायोगिक कार्य : 30 घंटे

- ब्लॉग निर्माण एवं लेखन।
- हिंदी के प्रमुख ब्लॉगों का स्वरूप और सामग्री की दृष्टि से अध्ययन और समीक्षा।
- किसी वेब पोर्टल की सामग्री का विश्लेषण और उसकी रिपोर्ट तैयार करना।

- ऑनलाइन मीडिया संबंधित केस स्टडी का अध्ययन और उसकी रिपोर्ट तैयार करना।
- मल्टीमीडिया के प्रयोग से विविध डिजिटल डिवाइस पर कंटेंट बनाना।
- सामाजिक संदेशों के लिए ट्विटर का प्रयोग और सामग्री पर ऑनलाइन मीडिया हेतु रिपोर्ट तैयार करना।
- वेबसाइट डिजाइन करना और कंटेंट बनाना।

सहायक पुस्तकें :

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Community Outreach	2			2	12th Pass	NIL

Learning Objectives

The Learning Objectives of this course are as follows:

5. समाज के विभिन्न मुद्दों के प्रति मीडिया छात्रों को जागरूक करना।
6. छात्रों में सामाजिक सरोकार की समझ विकसित करना।
7. समाज, संस्थान और मीडिया उद्योग में समन्वय स्थापित करना।
8. छात्रों में मीडिया व्यवसाय की व्यावहारिक समझ विकसित करना।

Course Learning Outcomes

5. समाज के विभिन्न मुद्दों के प्रति छात्र जागरूक होंगे।
6. छात्रों में सामाजिक सरोकार की समझ विकसित होगी।
7. मीडिया व्यावसाय का व्यवहारिक कौशल विकसित होगा।
8. समाज, संस्थान और मीडिया उद्योग में समन्वय स्थापित होगा।

Syllabus : **120 घंटे**

11. विविध समुदायों के साथ मीडिया जागरूकता पर कार्यशाला।
12. विभिन्न मीडिया चैनलों द्वारा आयोजित चर्चा में हिस्सा लेना।
13. मीडिया संस्थानों का भ्रमण (समाचार-पत्र, पत्रिका, रेडियो एवं टीवी)
14. विभिन्न समसामयिक मुद्दों पर चर्चा की रिकॉर्डिंग तैयार करना।
15. विश्वविद्यालय एवं कॉलेजों के विविध कार्यक्रमों की कवरेज करना (प्रिंट, रेडियो, वीडियो, लाइव)
16. भ्रमण एवं गतिविधियों की साप्ताहिक रिपोर्ट तैयार कर प्रकाशित करना।

17. समाज के विविध क्षेत्रों में उत्कृष्ट कार्य करने वाले लोगों के साक्षात्कार करना।
18. संबंधित शिक्षक से नियमित चर्चा एवं मार्गदर्शन में विभिन्न मीडिया गतिविधियों को कार्यान्वित करना।
19. स्थानीय मुद्दों पर रिपोर्टिंग और परिचर्चा का आयोजन कराना।
20. मीडिया लैब में मीडिया कार्यक्रम तैयार करना।

फील्ड वर्क सेमेस्टर में :

- सप्ताह में न्यूनतम 4 घंटे छात्र को समाज में देने होंगे। कार्य की जांच (1 घंटा) समूह मार्गदर्शन (1 घंटा)
- छात्रों की सामुदायिक भ्रमण में 80 प्रतिशत उपस्थिति अनिवार्य होगी।
- छात्रों का मीडिया संस्थान या समाज में भ्रमण शिक्षकों के देख-रेख एवं निर्देशन में होगा।

नोट : हिंदी पत्रकारिता एवं जनसंचार पाठ्यक्रम केलिए आधुनिक सुविधाओं से लैस ऑडियो-वीडियो मीडिया लैब अनिवार्य है। छात्रों के प्रायोगिक प्रशिक्षण हेतु महाविद्यालय में अपेक्षित मीडिया उपकरण, तकनीकी क्षमता रखने वाले सहायक कर्मी, उपयोगी सॉफ्टवेयर एवं कम्प्यूटर केसाथ प्रोजेक्टर और इंटरनेट की सुविधा की व्यवस्था होनी चाहिए।

ANNEXURE - 38

Sub: Amendment to Ordinance V

[E.C Resolution No. 27/ (27-1-10) dated 25.08.2023]

Following addition be made to Appendix-II-A to the Ordinance V (2-A) of the Ordinances of the University;

Add the following:

Syllabi of following courses of the Department of Physical Education & Sports Sciences under Faculty of Interdisciplinary and Applied Sciences based on Under Graduate Curriculum Framework -2022 implemented from the Academic Year 2022-23:

1. **Semester-IV**
   - (i) BSc. (Hons.) Physical Education, Health Education & Sports – DSC
   - (ii) Pool of Discipline Specific Electives (DSEs)
   - (iii) Pool of Generic Electives

   (As per Annexure-1)

2. **Semester-IV, V & VI**
   - (i) BA (Prog.) Physical Education – DSC
   - (ii) Pool of Discipline Specific Electives
   - (iii) Pool of Generic Electives

   (As per Annexure-2)

Annexure-1

INDEX

Department of Physical Education

Semester-IV

Sl.No.	Content	Page No.
1	**BSc. (Hons.) Physical Education, Health Education and Sports – DSC** 1. Sports Sociology 2. Biomechanics 3. Exercise Prescription for Health & Fitness	2-8
2	**Pool of Discipline Specific Electives (DSEs) :** 1. Athletics 2. Badminton 3. Basketball 4. Cricket 5. Football 6. Gymnastics 7. Handball 8. Hockey 9. Judo 10. Kabaddi 11. Kho-Kho 12. Volley Ball **13.** Yoga	9-34
3	**Pool of Generic Electives (GEs)** 1. Yoga and Stress Management **2.** Injury Prevention and Rehabilitation in Athletics	35-40

SEMESTER- 4
BSc-PE-DSC-10(4) (DSC)
SPORTS SOCIOLOGY
DSC

SPORTS SOCIOLOGY

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical		
1.	SPORTS SOCIOLOGY	04	03	0	01	XII Pass	NIL

Objective:

To provide the knowledge and applications of Sports sociology as well as to familiarize the learners with the culture and sport, Socialization and sports, Gender and sports, Stratification as well as sports education with application point of view.

Learning Outcomes:

At the end of the course the student will be able to-

1. Acquire the knowledge of meaning and importance of sports sociology and inculcate the knowledge of various theories in order to apply in best suitable modern aspects.
2. Understand the concept of culture and sports along with its components to deal with cultural lag.
3. Recognize the basic differences between various feminist theories in sport in order to understand the development of women in sports at present day context.
4. Apply the knowledge and practices of social mobility and stratification in the emergence of commercial and professional sports.
5. Understand the importance and applications of sports sociology.
6. Articulate sociological perspectives with sports.
7. Inculcate the sports culture in their life & society.
8. Establish the relationship between society and sports.
9. Analyze gender inequality in sports and application of the same for equality.
10. Understand the significance of socialization through games and sports for the development of the society.

Theory Syllabus

UNIT I - Introduction (09 Hours)

1.1 Meaning and importance of sociology and sports sociology
1.2 Sports as social phenomenon
1.3 Functional theory and sports
1.4 Conflict theory and sports
1.5 Interaction theories and Sports

UNIT II - Culture and sports **(09 Hours)**

2.1 Concept of sports culture and its characteristic
2.2 Sports culture and its components
2.3 Sports club culture
2.4 Cultural lag and sports

UNIT III - Socialization and sports **(09 Hours)**

3.1 Concept of Socialization and Sports Socialization
3.2 Type of socialization
3.3 Agents of socialization
3.4 Importance of socialization

UNIT IV - Gender and Sports **(09 Hours)**

4.1 Meaning and Concept of Gender, Liberal feminist theory and sports, Radical feminist theory and sports.
4.2 Marxist feminist theory and sports
4.3 Third Gender (Transgender) and Sports
4.4. Development of Women in Sports in India

UNIT V - Stratification and sports **(09 Hours)**

5.1 Meaning and concept of stratification and sports
5.2 Types of sports stratification
5.3 Social mobility and sports
5.4 Emergence of commercial and professional sports

Practical **(30 Hours)**

1. Conduct a survey on the status of sports in society/ community of a given area of context.
2. Measurement of Group Dynamics.
3. Application of Methods and Scales for selection of Leader/ Captain in games & sports setup.
4. Measurement of Social Desirability.

SEMESTER- 4
BSc-PE-DSC-11(4) (DSC)
BIOMECHANICS
DSC

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/Practice		
2.	Biomechanics	04	3	0	1	XII Pass	NIL

Objective:
The objective of this course is to provide an understanding with practical skills to the learners about Sports Biomechanics and its applications to sports as well as to develop the foundation of sports biomechanics for performance analysis and improvement.

Learning Outcomes:
1. The learners will be able to understand the fundamental concepts and practices related to Sports Biomechanics.
2. The learners will be able to develop an understanding for practical applications of the fundamental structure of movement with related mechanics and its principles.
3. The learners will be able to analyze the sport movements and design movement-oriented exercise for improvement of performance.
4. The learners will be able to develop the program for improving performance as an innovative approach applying biomechanics.
5. The learners will be able to apply the knowledge and skills related to science of movement to create a strong foundation for better sports performance and research.

SYLLABUS

PART-A: THEORY

Unit – I Introduction to Sports Biomechanics (08 Hours)

- Meaning and Definition of Sports Biomechanics.
- Importance of Sports Biomechanics to Physical Education Teacher, Athletes and Sports Coaches.
- Terminology of Fundamental Movements
- Fundamental concepts of Centre of Gravity, Equilibrium, Line of Gravity

Unit – II Mechanical Concepts (10 Hours)

- Force - Meaning, definition, types and its application to sports activities
- Lever - Meaning, definition, types and its application to human body.
- Newton's Laws of Motion – Meaning, definition and its application to sports activities (linear and angular).
- Projectile – Factors influencing projectile trajectory.

Unit – III Kinematics of Human Movement (08 Hours)

- Linear Kinematics – Distance and Displacement, speed and velocity, Acceleration
- Angular kinematics – Angular Distance and Displacement, Angular Speed and velocity, Angular Acceleration.

Unit – IV Kinetics of Human Movement **(09 Hours)**

- Linear Kinetics – Inertia, Mass, Momentum, Friction.
- Angular Kinetics – Moment of Inertia, Couple, Stability.

Unit – V Biomechanical Principles **(10 Hours)**

- The Principle of the Optimum Path of Acceleration.
- The Principle of the Initial Force.
- The Principle of Reaction.
- The Principle of Conservation of Momentum.

PART-B: PRACTICALS **(30 Hours)**

1. Evaluation of Velocity- Time Graph.
2. Determination of Centre of Gravity by Reaction Board Method.
3. Determination of Centre of Gravity by Joint Point Method.
4. Determination of Centre of Gravity by Main Point Method.
5. Determination of Centre of Combined Gravity (Joint Point Method).
6. Demonstration of the Principle of Conservation of Angular Momentum.
7. Demonstration of the Principle of Action and Reaction.

Suggested Readings:

SEMESTER- 4
BSc-PE-DSC-12(4) (DSC)
EXERCISE PRESCRIPTION FOR HEALTH AND FITNESS
DSC

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical		
3.	EXERCISE PRESCRIPTION FOR HEALTH AND FITNESS	04	03	0	01	XII Pass	NIL

Objective:
The objective of this course is to provide an understanding, skill and practices to the learners about exercise prescription for health and fitness.

Learning Outcomes:

At the end of the course the student will be able to-
1. Acquire the knowledge and practices of exercise prescription on the behalf of health status.
2. Deal with differentiation and relation between exercise & physical activity.
3. Understand and demonstrate the direct and indirect health benefits of the exercise
4. Get understanding and applications of acronyms FITT (Frequency, Intensity, Time (duration), type (Mode of Exercise) (Training principles for batter training)

Theory Syllabus

UNIT I - (09 Hours)

1.1 Background of exercise prescription to non-sports person, basis of exercise prescription and measurement of motivation for physical exercise/activity health status
1.2 Physical personality in relation to physique, attitude, interests.
1.3 Exercise for recreation, health, fitness, wellness and competition.

UNIT II - (09 Hours)

2.1 Meaning and definition of exercise & physical activity
2.1.1Differences between exercise & physical activity (chronic and acute effect for adaptation)
2.1.2 Relation between exercise & physical activity

UNIT III - (09 Hours)

3.1 Health benefits of exercise, exercise as pro-active health care.

3.2 Exercise for prevention of heart disease, osteoporosis, diabetes type-II, hypertension, obesity etc.

UNIT IV - (09 Hours)

4.1 Necessity of exercise prescription

4.1.1 Sedentary population

4.1.2 Different-population

4.1.3 Self-responsibilities and behaviour change stages for exercise regularity

UNIT V - (09 Hours)

5.1 Steps for exercise prescription.

5.2 Exercise, stress test, physical fitness test,

5.3 Understanding acronyms FITT (Frequency, Intensity, Time (duration), Type (Mode of Exercise).

5.4 Principles of fitness training

PART- B Practical Syllabus (30 Hours)

1. Assessment of fitness (At least three)
2. Assessment of physical activity readiness of a person
3. Measurement of health status
4. Prescribing exercise / Programme
5. Evaluation of an exercise Programme

Semester-IV

NOTE: Choose a maximum of two DSE papers (Games/ Sports), One DSE paper is compulsory, not repeating from semester I, II & III (DSC/ DSE).

BSc-PE-DSE-3 or 4 (4)-101:
ATHLETICS

Sr. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite ofthe Course (if any)
			Lecture	Tutorial	Practical/Practice		
1	Athletics	04	2	0	2	XII Pass	NIL

Objective: - The Students will acquire knowledge and understanding of a specific sport/ games in regard to practices, skills and practical in which an individual wish to excel.

Learning Outcome: -The students will attain knowledge, understanding, interpreting and analyzing proficiency in a game of one's choice.

After the Completion of First Month:

The student will be able to gain knowledge with respect to Historical Development, Organizational Structure and Playfield Technology of the respective sport/game.

After the Completion of Second Month:

A student will be able to understand, application and interpret the rules of game as well as game knowledge in the areas of psychological and physiological basis of Warming up and technical aspects of coaching.

After the Completion of Third Month:

A student will be able to learn and acquire various skills of sports / game, gain knowledge about different techniques of fitness and skills of evaluation as well as the evaluation of player's performance. The technical practice of sprint races, middle and long distance races, hurdles races, jumping event- long jump, throwing events- shot put, hammer throw.

After the Completion of Fourth Month:

A student will be learning about various fitness components and its forms. Further, the student will be able to practice and improve performance on the basis of knowledge and skill gained in understanding various fitness components. Track marking and marking of different arenas for selected events as in unit-III.

THEORY SYLLABUS (30 hrs lectures)

Unit-I **(08 hrs lectures)**

- Historical Development and Modern Trends (National and International Level)
- Organisational Structure (State, National and International Level)
- Playfield Technology – Marking and Construction of the playfields.

Unit-II **(08 hrs lectures)**

- Rules and their interpretation of the sport.
- Warming up and psychological as well as physiological basis of Warming up, Cooling down and its effect.
- Techniques of Coaching – Pep talk, Pre, during and Post match competition Coaching.

Unit-III **(07 hrs lectures)**

- Basic skills and techniques of the Sports/Game- – sprint races, middle and long distance races, hurdlesraces, jumping event- long jump, throwing events- shot put, hammer throw.
- Motor Fitness Components Testing
- Skill/Technique Evaluation
- Evaluation of Player's Performance.

Unit-IV **(07 hrs lectures)**

- Introduction to Physical and Motor Fitness components related to sport: Strength, Speed, Endurance, Coordinative Abilities and Flexibility.
- Track marking and marking of different arenas for selected events in unit-III.

Practical Syllabus - **(60 hrs.)**

1. Learning and demonstrating various skills/techniques of sports- sprint races, middle and longdistanceraces, hurdles races, jumping event- long jump, throwing events- shot put.
2. Learning to demonstrate various tests to evaluate motor components as listed in unit IV above.
3. Track marking and marking of different arenas for selected events in unit-III.

SUGGESTED READINGS:

Semester IV
BSc-PE-DSE-3 or 4 (4)-102:
BADMINTON

Sr. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite ofthe Course (if any)
			Lecture	Tutorial	Practical/Practice		
2	Badminton	04	2	0	2	XII Pass	NIL

Objective: - The Students will acquire knowledge and understanding of a specific sports / game in which an individualwishes to excel.

Learning Outcomes: -The student attains knowledge, understanding, interpreting and analyzing proficiency in agame of one‟s choice.

After the Completion of First Month:

A student will be able to gain knowledge with respect to Historical Development, Organisational Structure and Playfield Technology of a sport/game.

After the Completion of Second Month:

A student will be able to understand and interpret the rules of game as well as game knowledge in the areas of physiological basis of Warming up and technical aspects of coaching.

After the Completion of Third Month:

A student will be able to learn and acquire various skills of sports/game, gain knowledge about different techniques evaluation as well as the evaluation of player's performance.

After the Completion of Fourth Month:

A student will be learning about various fitness components and its forms. Further, the student will be able to practice and improve performance on the basis of knowledge gained in understanding various fitness components and its testing.

THEORY SYLLABUS **(30 hrs lectures)**

Unit-I **(08 hrs lectures)**

- Historical Development and Modern Trends (National and International Level)
- organizational Structure (State, National and International Level)
- Playfield Technology – Marking and Construction of the playfields.

Unit-II **(08 hrs lectures)**

- Rules and their interpretation.
- Warming up and physiological basis of Warming up and its effect on performance.
- Cooling down and its effect.
- Techniques of Coaching – Pep talk, Pre, during and Post match coaching.

Unit-III **(07 hrs lectures)**

- Basic skills and techniques of the Sports/Game.
- Skill/Technique Evaluation
- Evaluation of Player's Performance.

Unit-IV

(07 hrs lectures)

- Introduction to Physical and Motor Fitness components: Strength, Speed, Endurance, CoordinativeAbilities and Flexibility.
- Motor Fitness Components Testing of above components.

Practical Syllabus - **(60 hrs.)**

Learning and demonstrating various skills/techniques of sports.

Learning to demonstrate various tests to evaluate motor components as listed in unit IV above.

Semester IV
BSc-PE-DSE-3 or 4 (4)--103:
BASKETBALL

Sr. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite ofthe Course (if any)
			Lecture	Tutorial	Practical/Practice		
3	Basketball	04	2	0	2	XII Pass	NIL

Objective: - The Students will acquire knowledge and understanding of a specific sport/game in which an individual wish to excel.
Learning Outcome: -The student attains knowledge, understanding, interpreting and analyzing proficiency in a game of one's choice.

After the Completion of First Month:

A student will be able to gain knowledge with respect to Historical Development, Organisational Structure and Playfield Technology of a sport/game.

After the Completion of Second Month:

A student will be able to understand and interpret the rules of game as well as game knowledge in the areas of physiological basis of Warming up and technical aspects of coaching.

After the Completion of Third Month:

A student will be able to learn and acquire various skills of sports/game, gain knowledge about different techniques evaluation as well as the evaluation of player's performance.

After the Completion of Fourth Month:

A student will be learning about various fitness components and its forms. Further, the student will be able to practice and improve performance on the basis of knowledge gained in understanding various fitness components and its testing.

THEORY SYLLABUS **(30 hrs lectures)**

Unit-I **(07 hrs lectures)**

- Historical Development and Modern Trends (National and International Level)
- Organisational Structure (State, National and International Level)
- Playfield Technology – Marking and Construction of the playfields.

Unit-II **(08 hrs lectures)**

- Rules and their interpretation.
- Warming up and physiological basis of Warming up and its effect on performance.
- Cooling down and its effect.
- Techniques of Coaching – Pep talk, Pre, during and Post match coaching.

Unit-III **(07 hrs lectures)**

- Basic skills and techniques of the Sports/Game.
- Skill/Technique Evaluation
- Evaluation of Player‟s Performance.

Unit-IV **(08 hrs lectures)**

- Introduction to Physical and Motor Fitness components: Strength, Speed, Endurance, Coordinative Abilities and Flexibility.
- Motor Fitness Components Testing of above components.

Practical Syllabus - **(60 hrs.)**

Learning and demonstrating various skills/techniques of sports.

Learning to demonstrate various tests to evaluate motor components as listed in unit IV above.

BSc-PE-DSE-3 or 4 (4)-111:
KHO-KHO

Sr. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite ofthe Course (if any)
			Lecture	Tutorial	Practical/Practice		
11	Kho-Kho	04	2	0	2	XII Pass	NIL

Objective: - The Students will acquire knowledge and understanding of a specific sport in which an individual wish to excel.

Learning Outcomes: -The student will attain knowledge, understanding, interpreting and analyzing proficiency in a game of one's choice.

After the Completion of First Month:

A student will be able to gain knowledge with respect to Historical Development, Organisational Structure and Playfield Technology of a sport/game.

After the Completion of Second Month:

A student will be able to understand and interpret the rules of game as well as game knowledge in the areas of physiological basis of Warming up and technical aspects of coaching.

After the Completion of Third Month:

A student will be able to learn and acquire various skills of sports/game, gain knowledge about different techniques evaluation as well as the evaluation of player's performance.

After the Completion of Fourth Month:

A student will be learning about various fitness components and its forms. Further, the student will be able to practice and improve performance on the basis of knowledge gained in understanding various fitness components and its testing.

THEORY SYLLABUS

Unit-I

- Historical Development and Modern Trends (National and International Level) **(08 hrs lectures)**
- Organisational Structure (State, National and International Level)
- Playfield Technology – Marking and Construction of the playfields.

Unit-II

- Rules and their interpretation. **(08 hrs lectures)**
- Warming up and physiological basis of Warming up and it's effect on performance.
- Cooling down and its effect.
- Techniques of Coaching – Pep talk, Pre, During and Post match Coaching.

Unit-III

- Basic skills and techniques of the Sports/Game. **(07 hrs lectures)**
- Skill/Technique Evaluation
- Evaluation of Player's Performance.

Unit-IV (07 **hrs** lectures)

- Introduction to Physical and Motor Fitness components: Strength, Speed, Endurance, CoordinativeAbilities and Flexibility.
- Motor Fitness Components Testing of above components.

PRACTICAL SYLLABUS- (60 hrs.)

Learning and demonstrating various skills/techniques of sports.

Learning to demonstrate various tests to evaluate motor components as listed in unit IV above.

Semester IV
BSc-PE-DSE-3 or 4 (4)-112:
VOLLEYBALL

Sr. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite ofthe Course (if any)
			Lecture	Tutorial	Practical/Practice		
12	Volleyball	04	2	0	2	XII Pass	NIL

Objective: - The Students will acquire knowledge and understanding of a specific sport in which an individual wishes to excel.
Learning Outcomes: -The student will attain knowledge, understanding, interpreting and analyzing proficiency ina game of one‟s choice.

After the Completion of First Month:

A student will be able to gain knowledge with respect to Historical Development, Organisational Structure and Playfield Technology of a sport/game.

After the Completion of Second Month:

A student will be able to understand and interpret the rules of game as well as game knowledge in the areas of physiological basis of Warming up and technical aspects of coaching.

After the Completion of Third Month:

A student will be able to learn and acquire various skills of sports/game, gain knowledge about different techniques evaluation as well as the evaluation of player's performance.

After the Completion of Fourth Month:

A student will be learning about various fitness components and its forms. Further, the student will be able to practice and improve performance on the basis of knowledge gained in understanding various fitness components and its testing.

THEORY SYLLABUS

Unit-I

- Historical Development and Modern Trends (National and International Level) **(08 hrs lectures)**
- Organisational Structure (State, National and International Level)
- Playfield Technology – Marking and Construction of the playfields.

Unit-II

- Rules and their interpretation. **(08 hrs lectures)**
- Warming up and physiological basis of Warming up and it's effect on performance.
- Cooling down and its effect.
- Techniques of Coaching – Pep talk, Pre, During and Post match Coaching.

Unit-III (07 hrs lectures)

- Basic skills and techniques of the Sports/Game.
- Skill/Technique Evaluation
- Evaluation of Player's Performance.

Unit-IV (07 hrs lectures)

- Introduction to Physical and Motor Fitness components: Strength, Speed, Endurance, CoordinativeAbilities and Flexibility.
- Motor Fitness Components Testing of above components.

PRACTICAL SYLLABUS - (60 hrs.)

Learning and demonstrating various skills/techniques of sports.

Learning to demonstrate various tests to evaluate motor components as listed in unit IV above.

Semester IV
BSc-PE-DSE-3 or 4 (4)-113:
YOGA

Sr. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite ofthe Course (if any)
			Lecture	Tutorial	Practical/Practice		
13	Yoga	04	2	0	2	XII Pass	NIL

Objective: -The Students will acquire knowledge and understanding of a specific sport in which an individual wish to excel.
Learning Outcome: -The student will attain knowledge, understanding, interpreting and analyzing proficiency in a game of one's choice.

After the Completion of First Month:

The Students will develop the understanding and knowledge of Origin of yoga, definition and scope of yoga, limitations and misconceptions, importance of yoga in physical education and other fields, Yoga asana completion at: - State, National, International, SGFI, AIU etc. Philosophical aspects of Yoga. Pre-Vedic, Vedic period; Buddhism, Upanishad period, Jainism & tantra, qualifications, qualities and responsibilities of a coach, Duties/responsibilities of technical official, Scoring system and judgment criteria, Protocols for referees, judges and officials.

The student will learn about the prayer.

After the Completion of Second Month:

The Students will develop the understanding and knowledge of Meaning, techniques, precautions & effects of the following:-Asanas : padmasana, vajrasana, sidhasana, paschimottanasa, halasana, sarvangasana, shalabhasana, ardh-matsyendrasana, bhujangasana, tadasana, vrikshasana, matsyasana, gomukhasana, ushtrasana, shavasana, makarasana, vrishchikasana, dhanurasana, purna matsyendrasana, chakrasana, ek pad sikandasana, bakasana, mayurasana, shirshasanaPranayama : anulom-vilom, bhastrika, suryabhedhen pranayama, sheetali, sheetkari, bhramari, ujjayiShatkarma : neti, dhauti, nauli, basti, kunjal, kapal bhati, shankh prakshalanaBandhas : jalandhar, uddyana, mool bandha.

The student will be able to perform Asanas, pranayama, shatkarma, bandha.

After the Completion of Third Month:

The Students will gain knowledge of Disease wise treatment through yoga therapy- Asthma, high & lowB.P, diabetes, obesity, heart disease, insomania, arthritis, backache & female disease.

The student will learn Yoga-nidra/relaxation techniques

After the Completion of Fourth Month:

The Students will gain knowledge of Diet & constitution, components of nutrition, water, natural diet, balanced diet,fasting-its benefits, types & preparation. Importance of vegetarianism in yogic diet.

The student will learn Visit to yoga centers/institutes

THEORY SYLLABUS

UNIT-I **(07 hrs lectures)**

- Origin of yoga, definition and scope of yoga, limitations and misconceptions of Yoga
- Importance of yoga in physical education and other fields
- Yoga asana competition at: - State, National, International, SGFI, AIU etc.

UNIT-II **(07 hrs lectures)**

- Philosophical aspects of Yoga-Pre-Vedic, Vedic period; Buddhism, Upanishad period, Jainism & tantra
- Qualifications, qualities and responsibilities of a coach,
- Duties/responsibilities of technical official, Scoring system and judgment criteria,

- Protocols for referees, judges and officials.

UNIT-III **(09 hrs lectures)**

- Meaning, techniques, precautions & effects of the following:-
- Asanas : padmasana, vajrasana, sidhasana, paschimottanasa, halasana, sarvangasana, shalabhasana, ardh-matsyendrasana, bhujangasana, tadasana, vrikshasana, matsyasana, gomukhasana, ushtrasana, shavasana, makarasana, vrishchikasana, dhanurasana, purna matsyendrasana, chakrasana, ek pad sikandasana, bakasana, mayurasana, shirshasana
- Pranayama : anulom-vilom, bhastrika, suryabhedhen pranayama, sheetali, sheetkari, bhramari, ujjayi
- Shatkarma : neti, dhauti, nauli, basti, kunjal, kapal bhati, shankh prakshalana
- Bandhas : jalandhar, uddyana, mool bandha

UNIT-IV **(07 hrs lectures)**

- Disease wise treatment through yoga therapy- Asthma, high & low B.P, diabetes, obesity, heart disease, insomania, arthritis, backache & female disease
- Diet & Nutrition, components of nutrition, water, natural diet, balanced diet, fasting-its benefits, types & preparation, importance of vegetarianism in yogic diet.

PRACTICALS SYLLABUS (60 hrs.)

1. Prayer
2. Asanas, pranayama, shatkarma, bandha (as mentioned in theory)
3. Yoga-nidra/relaxation techniques
4. Visit to yoga centers/institutes

SEMESTER- IV
BSc-PE-GE-4 (4)-304:
YOGA AND STRESS MANAGEMENT
GE

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/Practice		
1	YOGA AND STRESS MANAGEMENT	04	3	0	1	XII Pass	NIL

Learning objective:

The objective of this course is to provide the understanding of Yoga and stress management through practical knowledge skill and practices with enough scope of creativity/Innovations.

Learning outcomes:

At the end of the syllabus the student will be able to-

1. Understand the concept of stress management through various practises like yoga.
2. Demonstrate different asanas to achieve healthy lifestyle.
3. Apply Pranayama and Shat karmas to reduce day to day stress in our life.
4. Management of Stress by using different yogic relaxation techniques.
5. Develop Physical Fitness Program to manage stress. Based on yoga

PART – A Theory Syllabus

SYLLABUS

Unit-1: INTRODUCTION (9 hrs. Lectures)

1.1 Meaning, Definition and Importance of Yoga.

1.2 Origin and Historical development of Yoga.

1.3 Concept of the importance of Yogic Diet.

Unit-II: YOGA-ASANAS (9 hrs. lectures)

2.1 Ashtanga Yoga (Maharishi Patanjali): Meaning and importance.

2.2 Supine Position Asanas (Ardh-Halasana, Sarvangasana, Pawanmuktasana); Prone Position Asanas (Bhujangasana, Salabhasana, Dhanurasana)

2.3 Sitting Asanas (Ardh Matsyendrasana, Paschimmotanasana, SuptaVajrasana); Standing Asanas (Utkatasana, , Trikonasana and Tadasana).

Unit-III: PRANAYAMAS AND SHAT KARMAS (9 hrs. lectures)

3.1 Meaning, Procedure, Precautions and Benefits of the following Pranayamas: Anulom-Vilom, Suryabheden, Bhrameri, Sheetali, Sheetkari Pranayamas.

3.2 Meaning, Procedure, Precautions and Benefits of the following Shatkarmas: Kapalbhati, Trataka and Neti (Jal and sutra).

3.3 Relevance of yoga for holistic health development in the society.

Unit-IV: STRESS MANAGEMENT (9 hrs. lectures)

3.1 Concept, Causes and Effects of Stress.

3.2 Non-communicable diseases (due to stress), Stress prevention and good health.

3.3 Stress Management through relaxation techniques (autogenic training and progressive muscle relaxation, deep breathing, meditation), and sports, recreational, adventure sports, physical activities and developing healthy relationships as coping strategies**.**

Unit V: HOLISTIC HEALTH DEVELOPMENT AND STRESS MANAGEMENT

(9 hrs. lectures)

5.1 Physiology of stress and mind.

5.2 Holistic well-being and dimensions of holistic health: physical, emotional, social, mental, spiritual, and environmental.

5.3 Planning and maintaining a Personal Fitness Program.

PART – B Practical Syllabus (30 Hours)

1. Suryanamaskar and any four asanas.
2. Pranayamas (any one).
3. Practice Meditation for 10-15 minutes.
4. Assessment of stress (Questionnaire-PSQ)

Suggested Readings:

SEMESTER- IV
BSc-PE-GE- 4(4)-303:
INJURY PREVENTION AND REHABILITATION IN ATHLETICS

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/ Practice		
2	**INJURY PREVENTION AND REHABILITATION IN ATHLETICS**	04	3	0	1	XII Pass	NIL

Learning objective:

The objective of this course is to provide the understanding, skill and practices related to injury prevention and rehabilitation in athletics along with enough scope of creativity/Innovations.

Learning outcomes:

At the end of the syllabus the student will be able to-

1. Understand the concept of injury prevention and rehabilitation in athletes.
2. Apply the principles of rehabilitation for fast and batter recovery in collaborative work of athlete, coaches and medical professionals.
3. Identify and classify the particular injury in order to deal or suggest to apply suitable exercise and other related aids.
4. Practice related modalities (e.g., heat therapy, cold therapy, electrical stimulation) used in rehabilitation.
5. Apply functional training and return-to-play criteria

PART – A Theory Syllabus

SYLLABUS

Unit-1: INTRODUCTION TO INJURY PREVENTION AND REHABILITATION **(9 hrs. Lectures)**

1.1 Overview of injury prevention and rehabilitation in athletes

1.2 Importance of injury prevention and rehabilitation in sports

1.3 Principles of injury prevention and rehabilitation

1.4 Role of athletes, coaches, and medical professionals in injury prevention and rehabilitation

Unit-II: COMMON SPORTS INJURIES **(9 hrs. lectures)**

2.1 Identification and classification of common sports injuries

2.2 Causes and risk factors associated with sports injuries

2.3 Understanding the mechanisms of injury

2.4 Assessment and diagnosis of sports injuries

2.5 Introduction to treatment modalities for different types of injuries

Unit-III: INJURY PREVENTION STRATEGIES **(9 hrs. lectures)**

3.1 Pre-season preparation and conditioning programs

3.2 Warm-up and cool-down protocols

3.3 Proper technique and form to minimize injury risk

3.4 Equipment selection and fitting for injury prevention

3.5 Nutritional considerations for injury prevention

Unit-IV: REHABILITATION TECHNIQUES **(9 hrs. lectures)**

4.1 Overview of the rehabilitation process

4.2 Goals of rehabilitation and its stages.

4.3 Rehabilitation exercises and techniques for specific injuries (e.g., sprains, strains, fractures)

4.4 Modalities used in rehabilitation (e.g., heat therapy, cold therapy, electrical stimulation)

4.6 Functional training and return-to-play criteria

Unit V: PSYCHOSOCIAL ASPECTS OF INJURY PREVENTION AND REHABILITATION

(9 hrs. lectures)

5.1 Psychological impact of sports injuries

5.2 Strategies for coping with injury and promoting mental resilience

5.3 Role of social support in the recovery process

5.4 Injury prevention and rehabilitation education for athletes, coaches, and parents

5.5 Ethical considerations in injury prevention and rehabilitation

PART – B Practical Syllabus **(30 Hours)**

1. Preparation of first aid box.
2. Application of PRICE and sports massage.
3. Demonstration of functional training.
4. Development of rehabilitation / Exercise Programme.
5. Preparation of warming up and cooling dawn exercise to prevent injury in general context.
6. Preparation of warming up and cooling dawn exercise to prevent injury in specific context.

Suggested Readings:

ATHLETIC CARE AND REHABILITATION

DSC

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical		
1.	Athletic Care and Rehabilitation	04	3	0	1	XII Pass	NIL

Objective:

The objective of this course is to provide an understanding and practices to the learners about Athletic Care, Sports Injuries with their management and rehabilitation.

Learning Outcomes:

1. The learners will be able to understand the concept of Athletic Care and Sports Medicine.
2. The learners will be able to comprehend the prevention and safety measures to avoid injuries in sports.
3. The learners will be able to classify the types of injuries in sports with their causes.
4. The learners will be able to apply the skills of first aid and management of sports injuries.
5. The learners will be able to develop rehabilitation programmes for overcoming injuries in sports and also in general.
6. The learners will be able to learn the application of various therapeutic modalities in sports rehabilitation with creativity.

SYLLABUS

CREDITS: 4 [Theory-3, Practical-1]

Theory-45 hours

Practical-30 hours

PART-A: THEORY

Unit-1: Introduction to Athletic Care (10 hours)

1.1 Meaning, Definition, and Significance of Athletic Care and Sports Medicine

1.2 Principles of injury prevention, Concept of safety measures in games/ sports

1.3 Important aspects of Athletic Care- Nutrition, Supplements, Ergogenic Aids, Ethical Considerations, psychological support, etc.

Unit-2: Sports Injuries (8 hours)

2.1 Meaning and Definition of Sports Injuries, Causes of Sports Injuries

2.2 Classification of Injuries in Sports

2.3 Basic concept of Sports Injuries- Sprain, Strain, Fracture, Dislocation, Frozen Shoulder, Tennis Elbow, Golfers Elbow, Shin Splint, Blister, Abrasion, Laceration, Haematoma

Unit-3 Therapeutic Modalities **(8 hours)**

3.1 Concept and Significance of Physiotherapy and Therapeutic Modalities in Sports Rehabilitation

3.2 Introduction to various Therapeutic Modalities- Steam Bath, Contrast Bath, Wax Bath, Therapeutic Ultrasound, Infrared Lamp, Interferential Therapy Unit, T.E.N.S, Short Wave Diathermy, Hot Fomentation

3.3 Sports Massage, Types of Massage, Physiological Effect of Massage

Unit-4: First Aid and Management of Sports Injuries **(12 hours)**

4.1 Meaning and Significance of First Aid

4.2 Basic concepts and applications of PRICE, DRABC, CPR

4.3 Management of Sports Injuries- Immediate and Later Management (Sprain, Strain, Fractures, Dislocations, Frozen, Shoulder, Tennis Elbow, Golfers Elbow, Shin Splint, Blister, Abrasion, Laceration, Haematoma).

Unit-5: Rehabilitation **(7 hours)**

5.1 Meaning and Definition of Rehabilitation

5.2 Importance of Rehabilitation in Sports

5.3 Rehabilitation Techniques- Active (Concentric, Eccentric, and Static) and Passive Exercises (Relaxed, Forced, Passive- Stretching), Strengthening, and Conditioning Exercises.

PART-B: PRACTICALS: **(30 hours)**

1. Demonstrate Warming Up and Cooling Down Exercises- 5 exercises each
2. Visit any Physiotherapy Center and prepare a report
3. Demonstrate First Aid and PRICE in different Sports situations.
4. Demonstrate Muscle Strengthening Exercises.
5. Survey of safety measures for prevention of Sports Injury

SEMESTER-4

B.A.-PE-DSC-4 (MAJOR)

CORRECTIVES IN PHYSICAL EDUCATION

DSC

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical		
1.	Correctives in Physical Education	04	3	0	1	XII Pass	NIL

Objective:

The objective of this course is to provide an understanding and practical applications to the learners about the posture mechanics, anatomy and movement of the spine, common postural deformities with their corrective measures, strengthening exercises, and ergonomics application in sports.

Learning Outcomes:

1. The learners will be able to understand and analyze the concept of posture and its impact on overall health.
2. The learners will be able to comprehend and correlate the significance of good posture and the risks associated with poor posture.
3. The learners will be able to apply the knowledge of the anatomy of the spine and movement around the spine to avoid related problems.
4. The learners will be able to identify common postural deformities and apply the acquired knowledge of corrective exercises for posture improvement and management.
5. The learners will be able to demonstrate the strengthening and stretching exercises for better posture.
6. The learners will be able to better their posture in the workplace and in everyday life.

SYLLABUS

CREDITS: 4 [Theory-3, Practical-1]

Theory- 45 hours

Practical-30 hours

PART-A: THEORY

Unit-1: Introduction to Posture (9 hours)

1.1 Meaning of Posture, Significance of Good Posture

1.2 Factors affecting posture, Risks associated with Poor Posture.

1.3 Posture and Body Mechanics - sitting, standing, walking, sleeping, lifting

Unit-2: Anatomy and Movement of Spine (8 hours)

2.1 Structure and the Function of the Spine

2.2 Types of Spinal Movement

2.3 Role of the Spine in Maintaining Posture.

Unit-3: Common Postural Deformities (12 hours)

3.1 Types of Postural Deformities- Kyphosis, Lordosis, Scoliosis, Rounded Shoulder, Knock Knees, Bow Legs, Flat Foot, Duck Feet.

3.2 Causes of Postural Deformities, Prevention Methods for Postural Deformities

3.3 Corrective Exercises and Management of Postural Deformities-Kyphosis, Lordosis, Scoliosis, Rounded Shoulder, Knock Knees, Bow Legs, Flat Foot, Duck Feet.

Unit-4: Strengthening Exercises (8 hours)

4.1 Core Strengthening Exercises

4.2 Strengthening Exercises for Back and Neck Muscles

4.3 Stretching Exercises for Muscles Stiffness

Unit-5: Ergonomics in the Workplace, Everyday Life and Sports (8 hours)

5.1 Ergonomics of Workplace

5.2 Active Lifestyle for Corporates/occupations with long seating hours

5.3 Sports Ergonomics-Meaning, Importance, and Applications (shoes and apparel)

PART-B: PRACTICALS: (30 hours)

1. Demonstration of corrective exercises for Kyphosis, Scoliosis, Lordosis, Knock knees, Bow Legs, Flat Foot, and Duck Feet (2 exercises for each postural deformity)
2. Demonstrate strengthening exercises for Core, back, and neck (3 exercises each)
3. Demonstrate stretching exercises for improving range of motion (5 exercises)
4. Assessment of own posture and recommendation for improvement (if any)

SEMESTER-5

B.A.-PE-DSC-5 (MINOR)

SPORTS PSYCHOLOGY

DSC

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical		
1.	Sports Psychology	04	3	0	1	XII Pass	NIL

Objective:

The objective of this course is to provide an understanding and practices to the learners about psychology and sports psychology, growth and development, the concept of learning, personality, motivation, and psychological factors affecting sports performance.

Learning Outcomes:

1. The learners will be able to understand the concept and practices of sports psychology and its significance for sports performance.
2. The learners will be able to manage various psychological factors like stress, aggression etc.
3. The learners will be able to analyze the personality

SYLLABUS

CREDITS: 4 [Theory-3, Practical-1]

Theory- 45 hours

Practical-30 hours

PART-A: THEORY

Unit – 1: Psychology and Sports Psychology (9 hours)

1.1 Meaning, Definition, and Dimensions of Psychology.

1.2 Meaning, Definition, and Importance of Sports Psychology, Scope of Sports Psychology

1.3 Concepts of Sports psychology intervention

Unit – 2: Growth and Development (9 hours)

2.1 Meaning and Definition of Growth and Development, Difference between Growth and Development

2.2 Principles and Factors Affecting Growth and Development

2.3. Stages of Growth and Development -Infancy, Childhood, Adolescence, Adulthood

Unit – 3: Learning (9 hours)

3.1 Definition and Types of Learning

3.2 Theories of Learning (Trial and Error, Conditioned Response and Learning by Insight)

3.3 Laws of Learning (Law of readiness, Exercise, Effect), Transfer of Training, Learning Curve and its application in the field of Sports.

Unit –4: Personality (9 hours)

4.1 Meaning and Types of Personality, Factors Affecting Personality

4.2. Dimensions and Characteristics of Personality

4.3. Role of Physical Activity in the Development of Personality

Unit – 5: Motivation and Psychological Factors **(9 hours)**

5.1. Concept and Role of Motivation in Sports

5.2 Types and Techniques of Motivation in Sports

5.3 Psychological Factors Affecting Sports Performance — Stress, Anxiety, Tension, Aggression, Emotion, Leadership, Goal Setting, Mental Imagery.

PART-B: PRACTICALS: (30 hours)

1. Eysenck Personality Questionnaire (EPQ)
2. Sports Competitive Anxiety Test (SCAT)
3. Demonstrate the technique of Progressive Muscle Relaxation for stress management.
4. Practical Application of Autogenic Training for Relaxation.
5. Practical Application of Visualization in Games/ Sports.

SUGGESTED READINGS:

1. Arora S., Agarwal M., **"Sports Psychology"**, Khel Sahitya Kendra ISBN: 978-81-947808-8-5, (2020)

SEMESTER-5

B.A.-PE-DSC-5 (MAJOR)

SPORTS SOCIOLOGY

DSC

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical		
1.	Sports Sociology	04	3	0	1	XII Pass	NIL

Objective:

The objective of this course is to provide an understanding and practices to the learner about sports sociology, the interrelationship between society and sports, and also gender and socialization.

Learning Outcomes:

1. The learner will understand the importance and applications of sports sociology.
2. The learners will be able to articulate sociological perspectives with sports.
3. The learners will be able to inculcate the sports culture in their life & society.
4. The learner will be able to establish the relationship between society and sports.
5. The learner will be able to analyze gender inequality in sports.
6. The learner will be able to understand the significance of socialization through games and sports.

SYLLABUS

CREDITS: 4 [Theory-3, Practical-1]

Theory- 45 hours

Practical-30 hours

PART-A: THEORY

Unit – I: Sports Sociology (9 hours)

1.1 Meaning and Definition of Sociology and Sport Sociology

1.2 Nature and Scope of Sociology, Importance of Sports Sociology

1.3 Sociological Perspectives in Sports and Physical Education (Functionalism, conflict and Interactionism)

Unit-2: Culture and Sports (9 hours)

2.1 Meaning of Culture and Sports Sub Culture

2.2 Characteristics of Sports Culture, Elements of Culture in Relation to Sports

2.3 Club Culture and Sports

Unit-3: Sports and Society (9 hours)

3.1 Meaning and Structure of Society

3.2 Historical Development of Sports in different types of Societies.

3.3 Changes in Sports (Amateur, Professional, Commercial).

Unit-4: Gender and Sports **(9 hours)**

4.1 Gender Inequality in Sports
4.2 Women's Participation in Sports
4.3 Barriers to Women's Participation in Sports

Unit-5: Socialization and Sports **(9 hours)**

5.1 Meaning of Socialization and Sports Socialization
5.2 Agencies of Sports Socialization, Role of Family, School, College, and Peer Group in Sports Socialization
5.3 Socialization through games and sports, De-socialization, Violence, and Deviance in Sports.

PART-B: PRACTICALS: **(30 hours)**

1. Conduct a survey on the status of sports in society/ community.
2. Measurement of Group Dynamics.
3. Selection of Leader/ Captain in games & sports setup.
4. Measurement of Social Desirability.

SUGGESTED READINGS:

1. Bhupinder Singh (2004), **Sports Sociology-An Indian Perspective**. New Delhi: Friends Publications, ISBN 978-8172160852.

SPORTS TRAINING
DSE

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/Practice		
1.	**SPORTS TRAINING**	04	3	0	1	XII Pass	NIL

Learning Objective:

The objective of this course is to provide the understanding through practical knowledge, skills and practices with enough scope of creativity/Innovations.

Learning Outcomes:

- The learner will be able to apply the concept of sports training for improvement of sports performance.
- The learner will be able to develop strength, endurance, speed, flexibility and coordination through various scientific methods and programme.
- The learner will be able to draw and prepare phases of technical and tactical training of sportsperson.
- The learner will be able to analyse the adjustment of load and intensity in different phases of training.
- The learner will be able to create sports training plan and develop methods for Talent Identification & Development.

Syllabus

CREDITS: 4 [Theory-3, Practical-1]
Theory-45 hours
Practical-30 hours

PART-A: THEORY

UNIT-I INTRODUCTION TO SPORTS TRAINING (9 Hours)

1.1 Meaning & Definition of Sports Training
1.2 Aim & Objective of Sports Training
1.3 Principles of sports Training
1.4 Systems of sports training-Basic, Good and high-performance training

UNIT- II FITNESS COMPONENTS (9 Hours)

2.1 Strength-Definition, types and methods of improving strength- Isometric, Isotonic and Isokinetic.

2.2 Endurance-Definition, Types and Methods to develop Endurance- Continuous Training, Interval Training and Fartlek Training

2.3 Speed-Definition, types and methods to develop different speed abilities.

2.4 Flexibility- Definition, Types and Methods to improve Flexibility (static and dynamic)

2.5 Coordinative Abilities-Definition, Types and methods of improvement of coordinative abilities.

UNIT – III Training Process **(9 Hours)**

3.1 Technical Training – Meaning, stages and Methods of Technique Training

3.2 Tactical Training – Meaning and Methods of Tactical Training

3.3 Circuit training and weight training

UNIT – IV Load Adaptation and Planning **(9 Hours)**

4.1 Training Load and recovery - Definition and Process

4.2 Principles of Intensity and Volume of stimulus

4.3 Planning-Training Session, Different types of training cycle (macro cycle, meso cycle, micro cycle, yearly cycle and Olympic Cycle)

UNIT -V TRAINING, PROGRAMMING & PLANNING **(9 Hours)**

5.1 Periodization-Meaning & Types of Periodization

5.2 Aims & Contents of Periods-Preparatory, Competition, Transitional

5.3 Talent Identification & Development

PART B- PRACTICALS **(30 Hours)**

1. Develop a training session.
2. Develop a micro cycle training program.
3. Develop a meso cycle training program.
4. Develop a macro cycle training program.
5. Develop a yearly training program.
6. Develop of Strength training program.
7. Develop of circuit training program.
8. Develop of weight training program.

Suggested Readings:

STRENGTH AND CONDITIONING

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/Practice		
2	STRENGTH AND CONDITIONING	04	3	0	1	XII Pass	NIL

Objective:

The objective of this course is to provide an understanding, practices and practical skills to the learners about Strength and Conditioning, Load and Adaptation, Warming-Up and Limbering Down, Strength and Conditioning Programme Design.

Learning Outcomes:

1. The learners will be able to understand the concept and applications of Strength and Conditioning.
2. The learners will be able to understand the concept and applications of Load and Adaptations.
3. The learners will be able to understand and analyse the popular trends and updated research in the sports industry, specifically in the area of strength and conditioning.
4. The learners will be able to design strength and conditioning programme.

Syllabus

CREDITS: 4 [Theory-3, Practical-1]
Theory-45 hours
Practical-30 hours

PART-A: THEORY

UNIT-I Introduction to Strength and Conditioning (7 Hours)

1.1 Meaning and Concept of Strength and Conditioning.
1.2 Aim and Objectives of Strength and Conditioning.
1.3 General Principles of Strength and Conditioning.

UNIT-II Load and Adaptation (8 Hours)

2.1 Training Load- Definition and types of training load.
2.2 Principles of training load (Frequency, Intensity, Density, and Volume).
2.3 Relationship between load and adaptation. Over load and critical load.
2.4 Concept of load and factor affecting of load and adaption.

UNIT-III Strength Training (10 Hours)

3.1 Strength – Definition, types and their characteristics.

3.2 Types of muscular contraction.
3.3 Development of strength using own body weight and external resistance, field tests for measuring strength.
3.4 Core Strength and Functional training

UNIT-IV: Warming-Up and Limbering Down (10 Hours)

4.1 Concept of Warming-Up and Limbering Down
4.2 Importance of Warming-Up and Limbering Down
4.3 Types of Stretching- Static Stretching Techniques and Dynamic Stretching Techniques

UNIT-V: Strength and Conditioning Programme Design (10 Hours)

5.1 Exercise Selection, Training Frequency, Exercise Order, Training Load and Repetitions, Volume, Rest Periods.
5.2 Means and Methods of Training (Resistance Training)
5.3 Plyometric Training, Circuit Training, Free Weight Training Methods, Bodyweight Training Methods, Core Stability and Balance Training Methods

PART-B: PRACTICALS (30 hours)

1. Design a Warming Up Exercise Programme.
2. Design a Limbering Down Exercise Programme.
3. Prepare a Strength and Conditioning Programme for a specific games/sport.
4. Demonstrate Exercises for Core Stability and Balance (any five).

FITNESS FOR SENIOR CITIZENS

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/Practice		
3.	FITNESS FOR SENIOR CITIZENS	04	3	0	1	XII Pass	NIL

Learning Objectives:

This course will help the learner to understand the process of aging and develop the basic concepts of the physiological, psychological and social issues affecting the fitness levels of senior citizens in society. Also, learners will be able to test and design exercise programs for the Senior Citizen.

Learning Outcomes:

1. Learners will be able to identify the physical, psychological and social aspects of aging.
2. Learners will be able to understand aging adults' limitations, common medical conditions, aging process, and frequent fitness obstacles.
3. Learners will be able collect information regarding events organized by state, national and international sports federations to promote physical activity among the aged population.
4. Learners will be able to test and design exercise programs for the Senior Citizen.
5. Learners will be able to understand and demonstrate importance of fitness for senior citizens.
6. Learners will be able to evaluate fitness of senior citizen.
7. Learners will be able to improve the quality of life of senior citizen.

Syllabus

CREDITS: 4 [Theory-3, Practical-1]
Theory-45 hours
Practical-30 hours

PART-A: THEORY

UNIT- I Introduction – Ageing and Physical Activity (9 hours)

1.1 Meaning, Definition of ageing.
1.2 Countries and policies that are sensitive and caring for the ageing population
1.3 Scope of practice for Senior Fitness Specialists and understand their role in the healthcare industry

UNIT -II Physical and Physiological Considerations of Aging (9 hours)

2.1 Physical and Physiological changes that occur in the ageing population
2.2 Changes in the nervous system with relation to the aged.
2.3 Cardiorespiratory system and its changes according to age.

2.4 Effects of ageing on the musculoskeletal system
2.5 The physical effects of exercise and physical activity of aged people.

UNIT -III Psychological Considerations of Aging (9 hours)

3.1 Age-related influences on the quality of life,
3.2 Self-perception for the senior citizen.
3.3 Emotional well-being of aged populations
3.4 Psychosocial effects of exercise and physical activity of aged people.

UNIT-IV Fitness Assessments for the Active Older Adult (9 hours)

4.1 Functional fitness of older adults.
4.2 Health risks related to aged and physical activity.
4.3 Diet and Nutrition - caloric requirements, and nutrition guidelines for aged population
4.4 Chronic conditions and comorbidities associated with active senior citizens

UNIT-V Training the Senior Citizen (9 hours)

5.1 Cardiorespiratory Training for Active Senior Citizens
5.2 Resistance Training for Active Senior Citizens
5.3 Flexibility and Balance for Active Senior Citizens
5.4 Sports for Veterans and Active Senior Citizens

PART-B: PRACTICALS (30 hours)

1. Develop Cardiorespiratory Training Programme for Active Senior Citizens
2. Develop Resistance Training programme for Active Senior Citizens
3. Develop Flexibility exercises for Active Senior Citizens
4. Develop Balancing exercises for Active Senior Citizens
5. Physical Fitness Testing and Evaluation of Senior citizen (men and women)

SYLLABUS OF GENERIC ELECTIVE PAPERS (GE)

SEMESTER- V

B.A.-PE-GE- 5 (4)

YOGA AND STRESS MANAGEMENT

GE

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/Practice		
1.	YOGA AND STRESS MANAGEMENT	04	3	0	1	XII Pass	NIL

GE-5 (4)-YOGA AND STRESS MANAGEMENT

Learning objective:

The objective of this course is to provide the understanding through practical knowledge and practices with enough scope of creativity/Innovations.

Learning outcomes:

1. Understand the concept of yoga.
2. Demonstrate different asanas to achieve healthy lifestyle.
3. Apply Pranayama and Shat karmas to reduce day to day stress in our life.
4. Management of Stress by using different yogic relaxation techniques.
5. Develop Physical Fitness Program.

SYLLABUS

No. of Credits: 04 (Lecture-03, Practical-1)
Theory: 45 hours, Practical: 30 hours.

Unit-1: INTRODUCTION (9 hrs. Lectures)

1.1 Meaning, Definition and Importance of Yoga.

1.2 Origin and Historical development of Yoga.

1.3 Concept of the importance of Yogic Diet.

Unit-II: YOGA-ASANAS (9 hrs. lectures)

2.1 Ashtanga Yoga (Maharishi Patanjali): Meaning and importance.

2.2 Supine Position Asanas (Ardh-Halasana, Sarvangasana, Pawanmuktasana); Prone Position Asanas (Bhujangasana, Salabhasana, Dhanurasana)

2.3 Sitting Asanas (Ardh Matsyendrasana, Paschimmotanasana, SuptaVajrasana); Standing Asanas (Utkatasana, , Trikonasana and Tadasana).

Unit-III: PRANAYAMAS AND SHAT KARMAS **(9 hrs. lectures)**

3.1 Meaning, Procedure, Precautions and Benefits of the following Pranayamas: Anulom-Vilom, Suryabheden, Bhrameri, Sheetali, Sheetkari Pranayamas.

3.2 Meaning, Procedure, Precautions and Benefits of the following Shatkarmas: Kapalbhati, Trataka and Neti (Jal and sutra).

3.3 Relevance of yoga for holistic health development in the society.

Unit-IV: STRESS MANAGEMENT **(9 hrs. lectures)**

3.1 Concept, Causes and Effects of Stress.

3.2 Non-communicable diseases (due to stress), Stress prevention and good health.

3.3 Stress Management through relaxation techniques (autogenic training and progressive muscle relaxation, deep breathing, meditation), and sports, recreational, adventure sports, physical activities and developing healthy relationships as coping strategies**.**

Unit V: HOLISTIC HEALTH DEVELOPMENT AND STRESS MANAGEMENT

(9 hrs. lectures)

5.1 Physiology of stress and mind.

5.2 Holistic well-being and dimensions of holistic health: physical, emotional, social, mental, spiritual, and environmental.

5.3 Planning and maintaining a Personal Fitness Program.

Practicals **(30 hrs.)**

1. Suryanamaskar and any four asanas.
2. Pranayams (any one).
3. Practice Meditation for 10-15 minutes.
4. Assessment of stress (Questionnaire-PSQ)

Suggested Readings:

SEMESTER-6

B.A.-PE-DSC-6 (MINOR)

KINESIOLOGY

DSC

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical		
1.	Kinesiology	04	3	0	1	XII Pass	NIL

Objective:

The objective of this course is to provide an understanding and practices to the learners about Kinesiology and its application in sports and develop the foundation to learn sports biomechanics and performance analysis.

Learning Outcomes:

1. The learners will be able to understand the fundamental concepts and practical applications related to kinesiology.
2. The learners will be able to demonstrate and correlate different components of science of motion (human).
3. The learners will be able to analyze the sports/ exercise movements and design movement-oriented exercises.
4. The learners will be able to develop the exercise program for strengthening and stretching the muscles based on kinesiology (science of motion).
5. The learners will be able to apply the knowledge and skills related to the science of movement to create a strong foundation for better sports performance.

SYLLABUS

CREDITS: 4 [Theory-3, Practical-1]

Theory- 45 hours

Practical-30 hours

PART-A: THEORY

Unit-I: Introduction to Kinesiology (8 hours)

1.1 Meaning and Definition of Kinesiology,

1.2 Aim, Objectives, and Scope of Kinesiology for Physical Education and Sports

1.3 Importance of Kinesiology for Physical Education Teachers, Athletes, and Coaches

Unit-II: Anatomical Fundamental Concepts in Kinesiology (8 hours)

2.1 Fundamental Anatomical positions (Anterior, Posterior, Superior, Inferior, Lateral, Medial)

2.2 Fundamental Movements- Flexion, Extension, Abduction, Adduction, Rotation, Circumduction, Medial and Lateral rotation, Inversion, Eversion, Supination, Pronation

2.3 Fundamental Concepts- Centre of Gravity, Line of Gravity, Axis and Planes of motion.

Unit-III: Physiological Fundamentals Concept of Kinesiology (7 hours)

3.1 Classification of Joints and Muscles in Relation to Motion.

3.2 Types of Muscle Contractions (Isometric, Isotonic and Isokinetic)

3.3 Physiological Fundamental concepts- Angle of Pull, All or None Law, Reciprocal Innervation

Unit-IV: Location and Action of Muscles (10 hours)

4.1 Location and action of muscles at various joints: upper extremity: pectoralis major – pectoralis minor – deltoid – biceps brachii – triceps – teres major – latissimus dorsi – trapezius

4.2 Location and action of muscles at various joints: Lower extremity: rectus femoris – vastus group – Sartorius – biceps femoris – semi membranosus – semi tendinosus– gluteus – gastrocnemius muscles

Unit-V: Muscular and Movement Analysis (12 hours)

5.1 Muscular Analysis of fundamental movements – walking/ running, jumping and throwing.

5.2 Movement Qualities: Movement Rhythm, Movement precision, Movement Amplitude, Movement Coupling, Movement tempo, Movement Flow

5.3 Structure of motor action: cyclic – acyclic motor action – movement combination.

PART-B: PRACTICALS: (30 Hours)

1. Demonstration of planes and axes of a given movement.
2. Determination of the location of muscles at various joints.
3. Muscular analysis of any technique/exercise/skill of your choice.
4. Suggest any five exercises to stretch and strengthen the muscles of the shoulder and hip joint.

SEMESTER-6

B.A.-PE-DSC-6 (MAJOR)

SPORTS KINANTHROPOMETRY

DSC

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical		
1.	Sports Kinanthropometry	04	3	0	1	XII Pass	NIL

Objective:

The objective of this course is to provide an understanding and practices to the learners about the concepts in kinanthropometry, knowledge/skills of various methods of measuring body composition, physical and physiological considerations of kinanthropometry, and knowledge about norms and standards for kinanthropometric data for different applications.

Learning Outcomes:

1. The learners will have the knowledge and practices of Kinanthropometry.
2. The learners will be able to practically measure & evaluate different kinanthropometric measurements related to movement, kinesiology, health, fitness, growth & development including sports performance.
3. The learners will be able to safely and effectively use instrumentation and equipment to assess and record human anthropometry, physique and somatotype.
4. The learners will be able to acquire the knowledge/skills in regard to various methods of measuring body composition.

SYLLABUS

CREDITS: 4 [Theory-3, Practical-1]

Theory- 45 hours

Practical-30 hours

PART-A: THEORY

Unit-I: Introduction to Anthropometry and Kinanthropometry (8 Hours)

1.1 Meaning and Definition of Anthropometry, Kinanthropometry, sports kinanthropometry

1.2 History and development of Anthropometry and Kinanthropometry

1.3 Applications and Significance of kinanthropometric knowledge in sports promotion.

Unit-II: Physical and Physiological Considerations of Kinanthropometry (8 Hours)

2.1 Classification of Body Types- Kretchmer, Sheldon, and Heath Carter, Somatotype- Endomorphy, Mesomorphy, Ectomorphy

2.2 Relationship between kinanthropometric measurements and sports performance.

2.3 Kinanthropometric considerations of sports selection (players).

Unit-III: Kinanthropometric Landmarks and Tools (8 Hours)

3.1 Kinanthropometric Landmarks: Vertex, Acromiale, Subscapular, Supralliac, Trochanterion, Stylion, Sphyrion, Femoral Bicondylar, Humeral Bicondylar.

3.2 Anthropometric Instruments: Tools and Techniques (Skinfold Caliper, spreading caliper, anthropometer with rod and anthropometric tape)

Unit-IV: Body Composition (8 Hours)

4.1 Meaning and Definition of Body Composition, Importance of Body Composition in sports

4.2 Body Compositions for health and different games & sports.

4.3 Assessment of Fat mass, Assessment of Fat free mass and Assessment of Lean body mass

Unit-V: Body Measurement and Procedures (13 Hours)

5.1 Gross Body Measurements and Procedures- (i) Gross mass and size; (ii) Segment Lengths or heights of body parts; (iii) Skinfold measurements.

5.2 Kinanthropometric Measurements: Height, Sitting Height, Leg Length, Bi-acromian Diameter, Bi-iliocristal Diameter, Bitrochantaerian Diameter, Femoral Bicondylar, Humeral Bicondylar

5.3 Measurements for Body Composition: (a) Skinfold Measurements: Biceps, Triceps, Supra-iliac, Chest, Subscapular, Thigh, Calf; (b) Circumference Measurements: Chest, Upper Arm, Fore Arm, Abdominal, Hip, Thigh, Calf

PART-B: PRACTICALS: (30 Hours)

1. Measurement of Height and Weight for 10 individuals.
2. Calculation of BMI for 10 individuals with interpretation.
3. Calculation of Waist-Hip Ratio for 10 individuals with interpretation.
4. Identification of Kinanthropometric landmarks and marking of anatomical sites for five measurements.
5. Measurement of Segmental Lengths/ Circumference/ Skinfolds (Any five measurements) for 05 individuals with interpretation.

SUGGESTED READINGS:

1. **Genetic and Anthropological Studies of Olympic Athletes** by De Garray, Louis Levine & Cater, Academic Press, London
2. H.S. Sodhi: **Sports Anthropometry (A Kinanthropometric Approach),** Anova Publications

SYLLABUS OF DISCIPLINE SPECIFIC ELECTIVE COURSE PAPER (DSE)
SEMESTER – VI
B.A P.E.DSE-(4)-2.1
Research Methods in Physical Education and Sports

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/ Practice		
04	RESEARCH METHODS IN PHYSICAL EDUCATION AND SPORTS	04	3	0	1	XII Pass	NIL

Learning Objective:

The student will be able to use the knowledge of Research for analysis of data leading to logical conclusion on any field of investigation in physical education and sports.

Learning Outcomes:

1. The learner will be able to understand the concept and types of research for different applications.
2. The learner will be able to apply different sampling technique and tools in research.
3. The learner will be able to apply the criteria of selection of a problem.
4. The learner will be able to collect review of literature from different resources.
5. The learner will be able to develop a research proposal.
6. The learner will be able to develop the concept of writing a research paper/ article/ project/ dissertation.

Syllabus

CREDITS: 4 [Theory-3, Practical-1]
Theory-45 hours
Practical-30 hours

PART-A: THEORY

Unit I Introduction (7 Hours)

1.1. Definition and concept of Research, Need and importance of Research in Physical Education and sports.
1.2. Scope of Research in Physical Education and sports
1.3. Types of Research: Analytical, Descriptive, Experimental, Qualitative etc.

Unit II Sampling Techniques and Hypothesis (8 Hours)

2.1. Identification of Research Problem

2.2. Meaning, definition and importance of Hypothesis
2.3. Meaning, definition and importance of Sampling
2.4. Types of Sampling Techniques

Unit III Tools in Research (8 Hours)

3.1. Types of data, collection of data, data interpretation and result analysis.

3.2. Different types of tools of research: questionnaires, Interviews, observation, test and inventories

Unit IV Criteria of Selection of Research and Literature Search (11 Hours)

4.1 Criteria of Selection of Problem, Statement of a Research Problem, Limitations and Delimitations. Review of related literature

4.2 Reason for surveying related literature

4.3 Major literature resources- Documentation over-view, Library sources, Research reviews, Card catalogue indices – physical education indices, Abstracting material

Unit V Method of Writing Research Proposal/ Thesis/ Research articles (11 Hours)

5.1 Method of writing Research proposal

5.2 Method of writing Thesis

5.3 Method of writing abstract

5.4 Method of writing research paper for conference and journals

5.5 Method of Writing Footnote and Bibliography

5.6 Method of representing data through tables, graphs and illustrations

PART-B: PRACTICALS (30 hours)

1. Prepare ten footnotes and bibliography containing references from books, journals, dissertation, periodicals and websites etc.
2. Prepare a review of literature (any ten researches) related to any one topic of your choice.
3. Prepare a research proposal

Suggested Readings:

- Author`s Guide. (1991) **Research Methods applied to Health Physical and Recreation** Washington, D.C.
- Best John & Kahni, J.V. (1992) **Research in Education** New Delhi: Prentice Hall of India (Pvt.) Ltd.

SYLLABUS OF GENERIC ELECTIVE PAPERS (DSE)

SEMESTER-VI

B.A.-PE-DSE-(4)-2.2-

PUBLICATION ETHICS IN PHYSICAL EDUCATION AND SPORTS SCIENCES

DSE

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/ Practice		
5	PUBLICATION ETHICS IN PHYSICAL EDUCATION AND SPORTS SCIENCES	04	3	0	1	XII Pass	NIL

Learning Objective:

The objective of this course is to provide the understanding through practical knowledge and practices about publication ethics in physical education and sports sciences for enough scope of creativity/Innovations in the field of physical education.

Learning Outcomes:

1. The learner will be able to understand the concepts with practices and skills of research integrity and publication ethics.
2. The learner will be able to (Hands-on-sessions are designed) identify research misconduct and predatory publications, Indexing and citation databases, open access publications, research metrics (citations, h-index, Impact Factor, etc.) and plagiarism tools along with the contents of the theory and practical syllabus.

Syllabus

CREDITS: 4 [Theory-3, Practical-1]
Theory-45 hours
Practical-30 hours

PART-A: THEORY

UNIT-I Philosophy and Ethics (7 Hours)

1.1 Introduction to Philosophy: definition, nature and scope, content, branches
1.2 Ethics: definition, moral philosophy, nature of moral judgements and reactions

UNIT-II Ethics and Research (8 Hours)

2.1 Ethics with respect to science and research
2.2 Intellectual honesty and research integrity

UNIT-III Scientific Conduct (10 Hours)

3.1 Scientific misconducts: Falsification, Fabrication, and Plagiarism (FFP)
3.2 Redundant publications: duplicate and overlapping publications, salami slicing
3.3 Selective reporting and misrepresentation of data

UNIT-IV Publication Ethics (10 Hours)

4.1 Publication ethics: definition, introduction and importance
4.2 Best practices / standards setting initiatives and guidelines: COPE, WAME, etc.
4.3 Conflicts of interest

UNIT-V Publication Violations (10 Hours)

5.1 Publication misconduct: definition, concept, problems that lead to unethical behavior and vice versa, types
5.2 Violation of publication ethics, authorship and contributorship
5.3 Identification of publication misconduct, complaints and appeals
Predatory publishers and journals

PART: B- PRACTICALS (30 hours)

1. Open access publications and initiatives
2. SHERPA/RoMEO online resource to check publisher copyright & self-archivingpolicies
3. Software tool to identify predatory publications developed by SPPU
4. Journal finder/ journal suggestion tools viz. JANE, Elsevier Journal Finder, SpringerJournal Suggester, etc.
5. Group Discussions
   a. Subject specific ethical issues, FFP, authorship
   b. Conflicts of interest
   c. Complaints and appeals: examples and fraud from India and abroad

6. Software tools uses: Use of plagiarism software like Turnitin, Urkund and other open source software tools

7. Databases and Research Metrics
   a. Databases

b. Indexing databases
c. Citation databases: Web of Science, Scopus, etc.

8. Research Metrics
a. Impact Factor of journal as per Journal Citation Report, SNIP, SJR, IPP, CiteScore
b. Metrics: h-index, g index, ilO index, altmetrics

Suggested Readings:

SYLLABUS OF GENERIC ELECTIVE PAPERS (DSE)

SEMESTER-VI
B.A.-PE-DSE-(4)-2.3-
THESIS WRITING IN PHYSICAL EDUCATION AND SPORTS
DSE

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/Practice		
6	THESIS WRITING IN PHYSICAL EDUCATION AND SPORTS	04	3	0	1	XII Pass	NIL

Learning Objective:

The objective of the course is to provide an understanding and practices to the learners about thesis writing mechanism, skill and practices in physical education and sports

Learning Outcomes:

1. Learners will be able to develop a synopsis/ research proposal.
2. Learners will be able to prepare abstract of a research article/ thesis/ project.
3. Learners will be able to cite references in different formats.
4. Learners will be able to write the dissertation/thesis.

Syllabus

CREDITS: 4 [Theory-3, Practical-1]
Theory-45 hours
Practical-30 hours

PART-A: THEORY

UNIT I Introduction to Scientific Writing (9 hours)

1.1 Thesis Writing
1.2 Dissertation
1.3 Project Report
1.4 Short Article
1.5 Long article

UNIT II Introduction to Research Proposal and Case Study (9 hours)

2.1 Synopsis
2.2 Research Proposal
2.3 Abstract and Short Abstract
2.4 Case Study

UNIT III Different Format of Thesis Writing (Basic Introduction) (12 hours)

3.1 APA- American Psychological Association
3.2 MLA - Modern Languages Association
3.3 MHRA- Modern Humanities Research Association
3.4 Turabian
3.5 IEEE- Institute for Electrical and Electronics Engineers
3.6 Chicago
3.7 Harvard System

UNIT IV Bibliography and References (7 hours)

4.1 Bibliography and Working Bibliography
4.2 References
4.3 Scientific Abstracting
4.4 Footnote/Citation

UNIT V General Thesis Format (8 hours)

5.1 Certifications and Preliminaries
5.2 Introduction

5.3 Review of Related Research
5.4 Procedure
5.5 Analysis of the Data and Findings of the Study
5.6 Summary, Conclusions and Recommendations
5.7 Appendix

PART-A: PRACTICALS **(30 hours)**

1. Prepare an abstract of a research article
2. Prepare bibliography of atleast 10 references from a topic
3. Prepare a research proposal of your choice

Suggested Readings:

- Author's Guide (1991) **Research Methods Applied to Health Physical and Recreation** Washington, D.C.
- Best John & Kahni, J.V. (1992) **Research in Education**, New Delhi. Prentice Hall of India (Pvt.) Ltd.

SYLLABUS OF GENERIC ELECTIVE PAPERS (GE)

SEMESTER- VI

B.A.-PE-GE-6 (4)

OBESITY AND WEIGHT MANAGEMENT

GE

Sl. No.	Course Title & Code	Credits	Credit Distribution of the Course			Eligibility Criteria	Pre-Requisite of the Course (if any)
			Lecture	Tutorial	Practical/Practice		
1.	Obesity and Weight Management	04	3	0	1	XII Pass	NIL

GE-6(4)-OBESITY AND WEIGHT MANAGEMENT

Learning Objective:

The objective of this course is to provide the understanding through practical knowledge and practices with enough scope of creativity/Innovations.

Learning Outcomes:

1. The learner will learn about the concept of obesity and its causes.
2. The learner will practice and manage the ways to prevent obesity.
3. The learner can assess the obesity (Basic methods).
4. The learner can practice and maintain healthy weight.
5. The learner can make behaviour modification to control weight through diet and physical activities.
6. The learner can design the balance diet chart for his/her own requirements.

SYLLABUS

No. of Credits: 04 (Lecture-03, Practical-1)
Theory: 45 hours, Practical: 30 hours.

Unit-I: OBESITY & IT'S ASSESSMENT (9 hrs. lectures)

1.1 Concept and Causes of Obesity.

1.2 Health Risks Associated with Obesity.

1.3 Assessment of Obesity-Body Mass Index (BMI), Waist-Hip Ratio, Waist-Height ratio, Skinfold Thickness (Abdomen, triceps, thigh, Suprailliac).

Unit-II: MANAGEMENT OF OBESITY THROUGH DIET (9 hrs. lectures)

2.1 Nutrition and Balanced Diet.

2.2 Dietary Aids and Gimmicks.

2.3 Obesity and weight management through diet.

Unit- III: WEIGHT MANAGEMENT (9 hrs. lectures)

3.1 Concept of weight, Importance of weight Management in Life.

3.2 Cultural and social aspect, Life style patterns in contemporary system.

3.3 Goal setting and goal accomplishment, Self-control skills for weight management.

Unit-IV: WEIGHT MANAGEMENT THROUGH PHYSICAL ACTIVITIES AND BEHAVIOUR MODIFICATION (9 hrs. lectures)

4.1 Importance of maintaining Healthy Weight; Weight Management and Energy Balance.

4.2 Principles of weight management; Aerobic & Anaerobic activities.

4.3 Behaviour Modification techniques for weight management.

Unit- V METABOLISM AND WEIGHT CONTROL (9 hrs. lectures)

5.1 Metabolism and factors affecting metabolism, Basal Metabolic Rate and Methods for Measuring BMR.

5.2 Strategies for weight control, concept of weight loss and fat loss

5.3 Weight control for special population.

Practical (30hrs.)

1. Use BMI to identify the actual body weight status and desirable body weight status of at least ten students.

2. Calculate Waist-Hip ratio, waist-height ratio of ten persons.

3. Suggested exercises for Obesity (Jogging, Running, Aerobics and calisthenics exercises)

4. Development of a Diet chart for a sportsperson

Suggested Reading

1. **Pawar,B., Joshi.A., Chaudhary,V.(2022), "Practical Manual for Physical Education",** Friends Publications. New Delhi (India) ISBN-978-93-95829-30-4.
2. Kumar, P (2022). **"Assessment & Management of Obesity"**. Friends Publication (India)

Syllabus for DSC Papers

SEMESTER - IV

DSC – 10: Life and contribution of musicians

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
LIFE AND CONTRIBUTION OF MUSICIANS (401)	4	3	1	0	• Class XII Pass • Must have learnt for a minimum of 4 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • General Theory (Sem I) • Theory of Indian Music (Sem II) • Ragas and talas of Sem I, II & III OR • Must have an understanding of the basic concepts such as Shruti, Svara, Raga, Tala etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the 10 Thaatas • Knowledge of the Time Theory of ragas • Ragas and talas of Sem I, II & III

Learning Objectives:

- To discuss about the life and works of legendary musicians of Karnatak music
- To discuss the contribution of Hindustani musicians of the medieval and modern eras

Learning Outcomes:

- The student will come to know about the works of the Karnatak music composers, popularly
  known as Trinity
- The student will know about the life and contribution of legends like Amir Khusrau and Tansen,
  and how their works have shaped the present Hindustani music
- He will also study the contribution of various stalwarts belonging to the main gharanas of
  Hindustani music

Syllabus:

Unit I (9 hours)

Life and contribution of Karnatak musicians 'Trinity' –

- Thyagaraja
- Muthuswamy Dikshitar
- Shyama Sastri

Unit II (12 hours)

Life sketch and contributions of the medieval-era musicians -

- Jayadeva
- Amir Khusrau
- Raja Man Singh Tomar
- Tansen
- Sadarang-Adarang

Unit III (12 hours)

Life sketch and contribution of the modern-era vocalists -

- Alladiya Khan
- Abdul Karim Khan
- Faiyyaz Khan
- Bade Ghulam Ali Khan
- Amir Khan
- Omkarnath Thakur

Unit IV (6 hours)

Life sketch and contributions of the modern-era instrumentalists -

- Allauddin Khan
- Radhika Mohan Maitra
- Ravi Shankar
- Abdul Halim Jaffer Khan
- Vilayat Khan

Unit V (3 hours)

- Study of the following talas in detail – Tilwada & Jhoomra
- Study of the application of talas in musical forms
- Ability to write the notation of the talas in dugun, tigun and chaugun

Unit VI (3 hours)

- Study of the ragas of this semester – Bhairavi, Malkauns, Bageshri, Bhimpalasi, Hameer
- Comparative study of the ragas with each other
- Ability to write the notation of compositions in prescribed ragas

Suggestive reading:

- Shastri, Babulal Shukla (2009) Natya Shastra, Delhi, Chaukhamba Sanskrit Sansthan
- Kumar, Pushpendra (2010) Natya Shastra of Bharatamuni, Delhi, New Bharatiya Book Corporation

DSC – 11: Stage Performance (4)

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
STAGE PERFORMANCE (4) (402)	4	0	0	4	• Class XII Pass • Must have learnt for a minimum of 4 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • General Theory (Sem I) • Theory of Indian Music (Sem II) • Ragas and talas of Sem I, II & III OR • Must have an understanding of the basic concepts such as Shruti, Svara, Raga, Tala etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the 10 Thaatas • Knowledge of the Time Theory of ragas • Ragas and talas of Sem I, II & III

Learning Objectives:

- To focus more on the Stage Performance of the student
- To encourage the student to attempt to improvise while singing/playing.
- To focus on his learning of newer talas

Learning Outcomes:

- The student will develop the confidence to perform a raga for a long duration of time.
- The student will be able to demonstrate the finer nuances of raga in a detailed performance.
- The student will have the opportunity to showcase his skill in semi-classical and folk genres of music

Syllabus:

Prescribed Ragas:

- *Bhairavi*
- *Malkauns*
- *Bageshri*
- *Bhimpalasi*
- *Hameer*

Unit I – Vocal Music (120 hours):

- A detailed performance of Vilambit and Drut Khayal with gayaki to be presented in any one raga
- Presentation of one semi classical, devotional or folk song

OR

Unit II – Instrumental Music (120 hours):

- A detailed performance of Maseetkhani and Razakhani gats with elaboration to be presented in any one raga
- Presentation of a dhun, devotional or light music composition

Note: Students of Vocal and Instrumental music will have to prepare according to the requirements of their respective Units.

Suggestive reading:

- Bhatkhande, V.N. (2000) Kramik Pustak Malika, Part I, Hathras, U.P., Sangeet Karyalya
- Bhatkhande, V.N. (2002) Kramik Pustak Malika, Part II, Hathras, U.P., Sangeet Karyalya

- Bhatkhande, V.N. (2002) Kramik Pustak Malika, Part III, Hathras, U.P., Sangeet Karyalya
- Bhatkhande, V.N. (1970) Kramik Pustak Malika, Part IV, Hathras, U.P., Sangeet Karyalya
- Patwardhan, V.R. (2001) Raga Vigyan, Part I, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1996) Raga Vigyan, Part II, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1991) Raga Vigyan, Part III, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1959) Raga Vigyan, Part IV, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Thakur, Omkar Nath (1977) Sangeetanjali, Part I, Bombay, Maharashtra, Pandit Omkar NathThakur Estate
- Thakur, Omkar Nath (1975) Sangeetanjali, Part II, Bombay, Maharashtra, Pandit Omkar NathThakur Estate
- Thakur, Omkar Nath (2005) Sangeetanjali, Part III, Bombay, Maharashtra, Pandit Omkar NathThakur Estate
- Thakur, Omkar Nath (2003) Sangeetanjali, Part IV, Bombay, Maharashtra, Pandit Omkar NathThakur Estate
- Mishra, Lalmani (1979) Tantrinada, Kanpur, U.P. Sahitya Ratnalaya
- Aggarwal, V.K. and Nagpal, Alka (2004) Sitar and its Compositions, Part I-II, Delhi, Sanjay Prakashan
- Mahajan, Anupam (2003) Compositions in Instrumental Music (Traditional and New Creation), Delhi, Sanjay Prakashan

DSC – 12: Ragas, talas and their applications (4)

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
RAGAS, TALAS AND THEIR APPLICATIONS (4) (403)	4	0	0	4	• Class XII Pass • Must have learnt for a minimum of 4 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • General Theory (Sem I) • Theory of Indian Music (Sem II) • Ragas and talas of Sem I, II & III OR • Must have an understanding of the basic concepts such as Shruti, Svara, Raga, Tala etc and their associated

						components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the 10 Thaatas • Knowledge of the Time Theory of ragas • Ragas and talas of Sem I, II & III

Learning Objectives:

- To focus more on the Viva-Voce of the student.
- To teach new compositions based on various talas

Learning Outcomes:

- The student will be able to explain the grammatical rules of a raga in detail.
- He will develop the confidence to differentiate between similar ragas.
- The student will be able to sing new compositions in new talas

Syllabus:

Prescribed Ragas:

- *Bhairavi*
- *Malkauns*
- *Bageshri*
- *Bhimpalasi*
- *Hameer*

Unit I – Vocal Music (120 hours):

- Vilambit and Drut Khayal with gayaki in all the prescribed ragas mentioned above.
- Dhrupad-Dhamar or Sadra composition in each of the prescribed Ragas with Alap, Layakari & Upaj
- Knowledge and demonstration of the following talas – Tilwada & Jhoomra
- Ability to tune the Tanpura

OR

Unit II - Instrumental Music (120 hours):

- Maseetkhani and Razakhani Gats with elaboration in all the ragas
- Knowledge and demonstration of the following talas – Tilwada & Jhoomra
- Ability of the student to tune his respective instrument

Note: Students of Vocal and Instrumental music will have to prepare according to therequirements of their respective Units.

Suggestive reading:

- Bhatkhande, V.N. (2000) Kramik Pustak Malika, Part I, Hathras, U.P., Sangeet Karyalya

B.A. (Hons.) Music
Hindustani Music - Vocal/Instrument (Sitar/Sarod/Guitar/Violin/Santoor)

Syllabus for DSE - Khayal

SEMESTER – IV

DSE – Khayal (2)

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
DSE – Khayal (2)	4	1	0	3	• Class XII Pass	Must have studied the following papers – • Theory topics in Sem III • Ragas and talas of Sem III OR • Must have an understanding of the basic concepts such as Shruti, Svara, Raga, Tala etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the 10 Thaatas • Ragas and talas of Sem III

Learning Objectives:

- To initiate the student to the rich history of Indian music, through the study of ancient musical concepts.
- To teach him the concept of every raga being performed according to a specific time
- To make the student aware of the life and contribution of two legends – Pt. Bhatkhande and Pt. Paluskar, credited with the revival of Hindustani Classical Music
- To continue to focus on the basics of singing/playing.
- To encourage the student to attempt to improvise while singing/playing.
- To focus on his learning of newer talas.
- To further his training in performance, with other basic ragas as prescribed.

Learning Outcomes:

- The student will come to know how ragas were performed in ancient times.
- He will learn the principles governing the Time Theory of Ragas, in that every raga is tobe performed according to a designated time. This will enhance his understanding of theraga and their associated moods.
- The student will appreciate the pioneering work done by the aforementioned legends

of Hindustani music, and how the state of modern music is a direct result of their tireless efforts in reviving the dying art.

- The basics of the student will get further strengthened.
- The student will start to gain self-belief and make attempts to improvise while performing a raga.
- The student will begin to gain some command over increasingly complex talas.
- With other basic ragas, the student will understand how to use the flat and sharp notes in ragas with varied tonal phrases.
- He will gain confidence with the Tabla accompanying him in performances of larger time-duration

Syllabus:

Theory

Unit I (3 hours)

- Sthaya
- Kaku
- Gamak
- Alaptva-Bahutva
- Avirbhav-Tirobhav

Unit II (3 hours)

Time Theory of Ragas

- Sandhiprakash ragas
- Ragas of daytime
- Ragas of nighttime

Unit III (2 hours)

Life and contribution of the following:

- Pt. Vishnu Narayan Bhatkhande
- Pt. Vishnu Digambar Paluskar

Unit IV (3 hours)

Study of the ragas of this semester – Kafi, Khamaj & Bhupali

Unit V (2 hours)

Ability to write the notation of compositions in the prescribed ragas

Unit VI (2 hours)

- Study of the following talas in detail – Dadra & Kaharva
- Ability to write the notation of the talas in dugun, tigun and chaugun

Practical component

Prescribed ragas:

1. Kafi
2. Khamaj
3. Bhupali

Unit I (30 hours)

Five alankars to be presented in the prescribed ragas.

Unit II (10 hours)

One Sargam Geet each in the prescribed ragas

Unit III (10 hours)

One Lakshan Geet each in the prescribed ragas

Unit IV (15 hours)

Two Drut Khyals with elaborations in any of the prescribed ragas

Unit V (15 hours)

Knowledge and demonstration of the following talas with dugun, tigun and chaugun - Dadra & Kaharva

Unit VI (10 hours)

Basic knowledge of Tanpura and its tuning

Learning Outcomes:

- The student will come to know about Indian music during the Vedic times. He/she will thus understand its progress and development from then to now. It will enhance his knowledgein the field of musicology, and also help him in the field of research in ancient Indian music.
- He/she will understand how music was sung and played during the times of the Ramayana and the Mahabharata.
- He/she will gain knowledge about the works of medieval authors, and understand how the svara systems and ragas have evolved to their modern-day avatars

Syllabus:

Unit I (9 hours)

Study of the Vedic music -

- Sama (Panchavidha and Saptavidha Sama) and Stobhaksharas
- Gramgeya Gana
- Aranyageya Gana
- Poorvarchika
- Uttararchika

Unit II (6 hours)

Study of the ancient svaras and scales –

- Vedic svaras
- Vedic and Loukik scales

Unit III (3 hours)

- Study of the Vedic instruments

Unit IV (9 hours)

Musical references in the following texts –

- The Ramayana
- The Mahabharata
- The Puran

Unit V (3 hours)

Classification of ragas

Unit VI (9 hours)

Works of the following authors –

- Ramamatya
- Somnath
- Ahobal
- Vyankatamakhi
- Lochan
- Bhavbhatt

Unit VII (3 hours)

- Study of the following talas in detail – Sooltala and Adachautala
- Study of the application of talas in musical forms

- Ability to write the notation of the talas in dugun, tigun and chaugun

Unit VIII (3 hours)

- Study of the ragas of this semester - Poorvi, Pooriyadhanashri, Kedar, Kamod, Jaijaiwanti, Patdeep
- Comparative study of the ragas with each other
- Ability to write the notation of compositions in prescribed ragas

Suggestive readings:

- Prajnanananda, Swami (2014) Historical Development of Indian Music, Gurgaon, Haryana,Shubhi Publication
- Paranjape, S.S. (1975) Bhartiya Sangeet ka Itihas, Varanasi, UP, Chaukhamba Vidya Bhawan

- Bhatkhande, V.N. (2002) Kramik Pustak Malika, Part III, Hathras, U.P., Sangeet Karyalya
- Bhatkhande, V.N. (1970) Kramik Pustak Malika, Part IV, Hathras, U.P., Sangeet Karyalya
- Patwardhan, V.R. (2001) Raga Vigyan, Part I, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1996) Raga Vigyan, Part II, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1991) Raga Vigyan, Part III, Pune, Maharashtra, Publisher – Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1959) Raga Vigyan, Part IV, Pune, Maharashtra, Publisher – Dr. Madhusudhanan Patwardhan
- Thakur, Omkar Nath (1977) Sangeetanjali, Part I, Bombay, Maharashtra, Pandit Omkar NathThakur Estate
- Thakur, Omkar Nath (1975) Sangeetanjali, Part II, Bombay, Maharashtra, Pandit Omkar NathThakur Estate
- Thakur, Omkar Nath (2005) Sangeetanjali, Part III, Bombay, Maharashtra, Pandit Omkar NathThakur Estate

- Thakur, Omkar Nath (2003) Sangeetanjali, Part IV, Bombay, Maharashtra, Pandit Omkar NathThakur Estate
- Mishra, Lalmani (1979) Tantrinada, Kanpur, U.P. Sahitya Ratnalaya
- Aggarwal, V.K. and Nagpal, Alka (2004) Sitar and its Compositions, Part I-II, Delhi, Sanjay Prakashan
- Mahajan, Anupam (2003) Compositions in Instrumental Music (Traditional and New Creation), Delhi, Sanjay Prakashan

Syllabus for DSE - Sitar

SEMESTER – V

DSE – Sitar (3)

Course Title & Code	redits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
DSE – **Sitar** (3)	4	1	0	3	• Class XII Pass • Must have learnt **Sitar** for a minimum of 1 year at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • Theory topics in Sem III & IV • Ragas and talas of Sem III & IV OR • Must have an understanding of the basic concepts such as Shruti, Svara, Raga, Tala etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the 10 Thaatas • Understanding of theory topics covered in Sem III & IV • Ragas and talas of Sem III & IV

Learning Objectives:

- To develop the interest of the students in musicology by introducing them to the ancienttexts of music.
- To teach them about the various musical instruments from the ancient to the modern times.
- To focus on the ancient musical forms that were the precursor to the current musical forms.
- To discuss about the various musical forms of Karnatak music.
- To focus more on the Stage Performance of the student

- To encourage the student to attempt to improvise while singing/playing.
- To focus on his learning of newer talas

Learning Outcomes:

- The student will come to know about the origin of many current musical forms of Hindustani Instrumental music, such as Tantrakari and Gayaki style of playing. This knowledge is useful for further study of musicology as well as for purposes of research.
- He will understand how various musical instruments of India are made, and are categorized on the basis of solids, animal skin, wind and metallic strings. This will enhance his knowledge and will be beneficial in future research on musical instruments.
- He will gain valuable knowledge on the various musical forms, as they existed in ancientIndia, and how they gave rise to some of the musical forms that are played today, such as Dhrupad anga, , Khayal anga and Trantrakari anga .
- The student will gain parallel knowledge about the musical forms of Karnatak music, which will be useful not only while hearing a Karnatak concert, but also for the purposeof comparative research.

Syllabus:

Theory

Unit I (4 hours)

Detailed study of the ancient texts –

- Natya Shastra
- Sangeet Ratnakar

Unit II (2 hours)

Classification of Instruments

Unit III (2 hours)

- Grama
- Moorcchana
- Jati Gayan
- Prabandha

Unit IV (3 hours)

Study of the ragas of this semester – Jaunpuri, Des & Vrindavani Sarang

Unit V (2 hours)

Ability to write the notation of compositions in the prescribed ragas

Unit VI (2 hours)

- Study of the following talas in detail – Roopak & Jhaptala
- Ability to write the notation of the talas in dugun, tigun and chaugun

Practical component

Prescribed Ragas:

- Jaunpuri
- Des
- Vrindavani Sarang

Unit I (35 hours)

Maseetkhani and Razakhani Gats in all the prescribed ragas mentioned above.

Unit II (30 hours)

Knowledge of all the ragas

Unit III (15 hours)

Knowledge and demonstration of the following talas with dugun, tigun and chaugun – Roopak & Jhaptala

Unit IV (10 hours)

The ability to tune the Sitar.

Suggestive readings:

- Shastri, Babulal Shukla (2009) Natya Shastra, Delhi, Chaukhamba Sanskrit Sansthan
- Kumar, Pushpendra (2010) Natya Shastra of Bharatamuni, Delhi, New Bharatiya Book Corporation
- Matang (1994) Brihaddeshi, Delhi,Indra Gandhi National Centre for the Arts

- A detailed performance of Maseetkhani and Razakhani gats with elaboration to be presented in any one raga
- Presentation of a dhun, devotional or light music composition

Note: Students of Vocal and Instrumental music will have to prepare according to the requirements of their respective Units.

Suggestive readings:

- Bhatkhande, V.N. (2000) Kramik Pustak Malika, Part I, Hathras, U.P., Sangeet Karyalya
- Bhatkhande, V.N. (2002) Kramik Pustak Malika, Part II, Hathras, U.P., Sangeet Karyalya
- Bhatkhande, V.N. (2002) Kramik Pustak Malika, Part III, Hathras, U.P., Sangeet Karyalya
- Bhatkhande, V.N. (1970) Kramik Pustak Malika, Part IV, Hathras, U.P., Sangeet Karyalya
- Patwardhan, V.R. (2001) Raga Vigyan, Part I, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1996) Raga Vigyan, Part II, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1991) Raga Vigyan, Part III, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1959) Raga Vigyan, Part IV, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Thakur, Omkar Nath (1977) Sangeetanjali, Part I, Bombay, Maharashtra, Pandit Omkar NathThakur Estate
- Thakur, Omkar Nath (1975) Sangeetanjali, Part II, Bombay, Maharashtra, Pandit Omkar NathThakur Estate
- Thakur, Omkar Nath (2005) Sangeetanjali, Part III, Bombay, Maharashtra, Pandit Omkar NathThakur Estate

- Thakur, Omkar Nath (2003) Sangeetanjali, Part IV, Bombay, Maharashtra, Pandit Omkar NathThakur Estate
- Mishra, Lalmani (1979) Tantrinada, Kanpur, U.P. Sahitya Ratnalaya
- Aggarwal, V.K. and Nagpal, Alka (2004) Sitar and its Compositions, Part I-II, Delhi, Sanjay Prakashan
- Mahajan, Anupam (2003) Compositions in Instrumental Music (Traditional and New Creation), Delhi, Sanjay Prakashan

---

DSC – 18: Ragas, talas and their applications (6)

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
RAGAS, TALAS AND THEIR APPLICATIONS (6) (603)	4	0	0	4	• Class XII Pass • Must have learnt for a minimum of 5 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • General Theory (Sem I) • Theory of Indian Music (Sem II) • Ragas and talas of Sem I-V OR • Must have an understanding of the basic concepts such as Shruti, Svara, Raga, Tala etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the 10 Thaatas • Knowledge of the Time Theory of ragas • Ragas and talas of Sem I-V

Learning Objectives:

- To focus more on the Viva-Voce of the student.
- To teach new compositions based on various talas

Learning Outcomes:

- The student will be able to explain the grammatical rules of a raga in detail.
- He/she will develop the confidence to differentiate between similar ragas.
- The student will be able to sing new compositions in new talas

Syllabus:

Prescribed Ragas:

1. Miyan ki Todi
2. Multani
3. Gaud Sarang
4. Chhayanat
5. Ramkali
6. Vibhas

Unit I – Vocal Music (120 hours):

- Vilambit and Drut Khayal with gayaki to be presented in all ragas prescribed above
- Dhrupad-Dhamar or Sadra composition in each of the prescribed ragas with Alap, Layakari & Upaj
- Knowledge and demonstration of the following talas – Teevra & Deepchandi
- Ability to make a comparative analysis of similar ragas from all the ragas prescribed in all the semesters
- Ability to tune the Tanpura

OR

Unit II – Instrumental Music (120 hours):

- Masitkhani and Razakhani gats with elaboration to be presented in all ragas prescribed above
- Gat with elaboration in any 3 of the following Talas - Dhamar, Ektal, Jhaptal & Adachautala
- Knowledge and demonstration of the following talas – Teevra & Deepchandi
- Ability to make a comparative analysis of similar ragas from all the ragas prescribed in all the semesters
- To demonstrate the ability to tune one's respective instrument

Note: Students of Vocal and Instrumental music will have to prepare according to the requirements of their respective Units.

Suggestive readings:

- The student will know about the life and contribution of legends like Amir Khusrau and Tansen, and how their works have shaped the present Hindustani music
- The student will develop the confidence to perform a raga for a long duration of time.
- The student will be able to demonstrate the finer nuances of raga in a detailed performance.
- The student will have the opportunity to showcase his skill in semi-classical and folkgenres of music

Syllabus:

Theory

Unit I (2 hours)

Life sketch and contributions of the Medieval-era musicians -

- Amir Khusrau
- Tansen
- Sadarang-Adarang

Unit II (3 hours)

Life sketch and contribution of the Modern-era musicians (vocalists) -

- S.N. Ratanjankar
- Omkarnath Thakur
- Vilayat Hussain Khan

Unit III (3 hours)

Life sketch and contributions of the Modern-era musicians (instrumentalists) -

- Allauddin Khan
- Ravi Shankar
- Vilayat Khan

Unit IV (3 hours)

Study of the ragas of this semester – Ramkali, Bageshri and Bhimpalasi

Unit V (2 hours)

Ability to write the notation of compositions in the prescribed ragas

Unit VI (2 hours)

- Study of the following talas in detail – Tilwada and Jhoomra
- Ability to write the notation of the talas in dugun, tigun and chaugun

Practical component

Prescribed Ragas:

1. *Ramkali*
2. *Bageshri*
3. *Bhimpalasi*

Unit I (35 hours)

Vilambit and Drut Khayal with gayaki in all the prescribed ragas mentioned above

Unit II (30 hours)

Knowledge of all the ragas

Unit III (15 hours)

Knowledge and demonstration of the following talas with dugun, tigun and chaugun – Tilwada & Jhoomra

Unit IV (10 hours)

The ability to tune the Tanpura

Suggestive readings:

- Mishra, Sushila (1990) Some Immortals of Hindustani Music, Delhi, Harman Publishing House
- Chaturvedi, Narmadeshwar (1955) Sangeetagya Kaviyon ki Hindi Rachnayen, Allahabad, UP, Sahitya Bhawan Ltd
- Sharma, Amal Das (1993) Musician of India, Kolkata, West Bengal, Naya Prakash
- Divedi, Harihar Niwas (2010) Mansingh aur Mankutuhal, Gwalior, Vidyamandir Prakashan

- Brihaspati, Sulochana (1986) Khusro Tansen tatha anya kalakar, Delhi, Rajkamal Prakashan Pvt. Ltd.
- Bhatkhande, V.N. (2000) Kramik Pustak Malika, Part I, Hathras, U.P., Sangeet Karyalya
- Bhatkhande, V.N. (2002) Kramik Pustak Malika, Part II, Hathras, U.P., Sangeet Karyalya
- Bhatkhande, V.N. (2002) Kramik Pustak Malika, Part III, Hathras, U.P., Sangeet Karyalya
- Bhatkhande, V.N. (1970) Kramik Pustak Malika, Part IV, Hathras, U.P., Sangeet Karyalya
- Patwardhan, V.R. (2001) Raga Vigyan, Part I, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1996) Raga Vigyan, Part II, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1991) Raga Vigyan, Part III, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Patwardhan, V.R. (1959) Raga Vigyan, Part IV, Pune, Maharashtra, Publisher - Dr. Madhusudhanan Patwardhan
- Thakur, Omkar Nath (1977) Sangeetanjali, Part I, Bombay, Maharashtra, Pandit Omkar NathThakur Estate

B.A. (Hons.) Music
Hindustani Music - Vocal/Instrument (Sitar/Sarod/Guitar/Violin/Santoor)

Syllabus for DSE – Research Methodology

SEMESTER – VI / VII

DSE – Research Methodology

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
DSE – Research Methodology (1)	4	3	1	0	• Class XII Pass	Must have studied the following papers – • Theory topics in Sem III-V OR • Must have an understanding of the basic concepts such as Shruti, Svara, Raga, Tala etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the 10 Thaatas • Understanding of theory topics covered in Sem III-V

Learning Objectives:

- To understand the concept of 'Research' and its various components
- To study the importance of selecting the correct research topic

- To understand the importance of preparing a Synopsis
- To focus on the various primary and secondary sources of information and how they are used in research
- To discuss the sources of information specifically related to research in Music
- To understand the various aspects of data collection such as Questionnaire, Interview etc.
- To study as to how to write a Report and understand the significance of aspects like References, Footnotes, Bibliography etc.

Learning Outcomes:

- The student shall be able to understand what Research is and its various related aspects
- He/she shall be able to understand the importance of a correct Research Topic, and later on, shall be able to do the same dissertation and thesis
- He/she will be able to demonstrate the ability to write a Synopsis on any given research topic
- The student will be able to understand the significance of the various sources of information in research and how they are to be applied in research on subjects related to Music
- To student shall be able to grasp the various methods of data collection that shall help him in his research later on
- He/she shall be able to understand the correct ways of giving References, Footnotes and other related aspects in his dissertation and thesis later on

Syllabus:

Unit I (10 hours)

Understanding Research and its components -

- Definition
- Aims and objectives
- Varieties
- Methodology
- Process.

Unit II (2 hours)

Selection of the research topic

Unit III (6 hours)

Understanding the importance of Synopsis in Research -

- Definition
- Importance
- Making a synopsis

Unit IV (9 hours)

Primary and Secondary sources of information and their importance in research -

- Manuscripts and Books
- Journals and Magazines
- Sculpture
- Paintings & Frescoes
- Archaeological findings
- Inscriptions
- Musical Pillars and Stones
- Museums
- Coins

Unit V (8 hours)

Study of the following sources of information related to Music:

- Musical compositions
- Oral traditions
- Music performances – live and recorded:
    - Gramophone records
    - Discs
    - Cassettes
    - On the internet
- Media - Print and electronic
- Academic councils.

Unit VI (5 hours)

Understanding methods of data collection:

- Questionnaire
- Interview
- Observation
- Case study
- Experimental Schedule

Unit VII (5 hours)

Report writing and its aspects -

- References
- Footnotes
- Bibliography
- Appendix
- Index

Suggestive readings:

- Survey Research Methods – Floyd. J.F., Sage Publications, New Delhi.
- Methods in Social Research- Goode C.V. & D.E. Scates, McGrawHill, 1954.
- The Art Heritage of India- Havell. E.B.; D.B Taraporevala Sons and Co. Pvt. Ltd. 1964.
- Ragamala Paintings, Kaus, Ebling, Kumar gallery, New Delhi, 1973.
- Research Methodology, Misra R.P, Concept publishing company, New York,1989.
- Exploring research, Salkind N.J., Prentice Hall, New Jersey, 1997.
- Advanced Research Methodology, Srivastava, G.N.P. Radha Publications, New Delhi, 1994.
- The Elements of Research, Whitney F.L., Prentice Hall, New York, 1950.
- Research Methods in Indian Music, Najma Perveen Ahmad, Manohar Publishersand Distributors, New Delhi.
- Research Methodology: Methods and techniques, C.R. Kothari, Wiley Eastern Ltd. NewDelhi,1985
- Sources of research in Indian Classical Music, ReenaGautam, Kanishka Publishers, New Delhi, 2002.
- Research Methodology, Madan Mohan Lavaniya, College Book House, Jaipur, 1985. (In Hindi)
- "Shodh Pravidhi" Vinaymohan Sharma, National Publishing House, Delhi, 1980 (In Hindi)
- Research Methodology, B.M. Jain, Research Publications, Jaipur, 1987 (In Hindi)

Historical Study of the following:

- Tana
- Gandharava
- Marga,
- Desi
- Prabandha
- Alapa- Alapti

UNIT – II (8 hours)

- Raga classification From: Medieval to modern period.

UNIT – III (8 hours)

Patronage of Music in Post independent India

- Sangita Sabha
- Mass Media
- Government Organisations
- Corporate

UNIT – IV (4 hours)

Biographies -Vocal: -

- Gopal Nayak
- Mysore Vasudevachar
- Vinakuppier
- Chengalvaraya Shastri
- Kavi Kunjara Bharati
- Ghanam Krishna Iyer
- Subbaraya Shastri
- Papanasam Sivan

Biographies - Violin: -

- Dwaram Venkataswami Naidu
- Mysore Chowdiah and any Six biographies from the list given for Vocal.

Biographies -Veena: -

- Veena Seshanna
- Aatoor Krishna Pisharoti
- Kaaraikudi Sambasivayyar and any six biographies from the list given for Vocal.

UNIT – V (8 Hours)

- Notation of Ata tala Varnam in 2-degrees of speed.

UNIT – VI (06 Hours)

- Raga Lakshana of prescribed ragas.

UNIT – VII (06 Hours)

- Introduction to musical forms figuring in Abhyasa Ganam

Suggestive readings

- Prajnanananda, Swami, (1963), A Historical Study of Indian Music, Calcutta, Ramakrishna Vedanta Muth, Page No 5 to 73

- Journal of Music Academy, Madras.

DSC- 11: Stage Performance(4)

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		L	T	P		
Stage Performance - 4 **(402)**	**4**	**0**	**0**	**4**	• Class XII Pass • Must have learnt for a minimum of 4 years at an established music institute or a reputed Guru	Must have studied the following papers •General Musicology (Sem- I) • Theory of Indian Music (Sem – II) • Ragas, Talas of Semester. -I,II & III OR •Understanding of the basic concepts such as Shruti, Swara, Raga, Tala etc and their associated components • Knowledge of notation systems • Knowledge of the 10 Mela And ragas

Learning Objectives

- The main focus of this course is to develop an aptitude towards the practical ability in singing the compositions of the prominent composers of Karnatak Music and develop an understanding about the concert pattern of it.

Learning outcomes

- Ability to demonstrate various musical forms and creative aspects of ragas from the prescribed syllabus

SYLLABUS

Prescribed Ragas

- **Todi**
- **Dhanyasi**
- **Varali**
- **Natakuranji**
- **Hindolam**
- **Darbar**
- **Nadhanamakriya**
- **Malayamarutam**
- **Athana**

UNIT – I (20 Hours)

- One Javali and One Tillana

UNIT – II (20 Hours)

- Two Advanced Varnam in Ata tala (in two degrees of speed)

UNIT – III (20 hours)

- 2 kritis of Muthuswamy Dikshitar (Including one Panchalinga Kriti)

UNIT - IV (20 Hours)

- One kriti each of Shyama Shastry, Subbraya Shastri, Papanasam Sivan, Gopala krishna Bharati, Patnam Subramanya Iyer and Swati Tirunal.

UNIT – V (20 Hours)

- 2 Tyagarajakritis (including one Pancharathnam)

UNIT – VI (20 hours)

- Brief Alapana of Bhairavi, Bilahari, Saveri , Kambhoji, Madhyamavati Suddha Dhanyasi ,Purvi Kalyani and Kalpana Swaras in two speeds.

Suggestive readings

- PanchapakesaIyer, A.S. (2002), Ganamrutha Varna Malika, Chennai, Karnatic Music Book Centre
- Kriti Mani Malai - T K Govinda Rao
- Kriti Mani Malai - Ranga Ramanuja Iyenkar

DSC- 12: Ragas, Talas and their Application – (4)

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		L	T	P		
Ragas, Talas and their Application-(4) **(403)**	**4**	**0**	**0**	**4**	• Class XII Pass • Must have learnt for a minimum of 4 years at an established music institute or a reputed Guru	Must have studied the following papers •General Musicology (Sem- I) • Theory of Indian Music (Sem – II) • Ragas, Talas of Sem.-I, II & III OR •Understanding of the basic concepts such as Shruti, Swara, Raga, Tala etc and their associated components • Knowledge of notation systems • Knowledge of the 10 Mela & ragas

Learning Objectives

- This course aims at practically elaborate and illustrate the compositions mentioned in the syllabus and orally demonstrate the creativity and know-how of the ragas and details about the compositions

Learning outcomes

- Ability to improvise and demonstrate characteristic features of ragas through various musical forms

SYLLABUS

Prescribed Ragas

- **Todi**
- **Dhanyasi**

- Kriti Mani Malai - Ranga Ramanuja Iyenkar

Course - III K V -409 DSE – II Fundamental Knowledge Of Karnatak Music

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical		
Fundamental Knowledge of Karnatak Music	**4**	**1**	**0**	**3**	**Class XII Pass**	**Basic understanding about Ragas, Talas and Musical Forms of Karnataka Music**

Course Objective

- The focus of the course is to establish a better understanding of basic theory of the Karnatak Music
- To study the basic concept of opted musical instrument's basic structure and tuning

Course Learning Outcome

- Gain knowledge of the basic terminologies of Karnatak music as well as tuning and structure of respective musical instrument.
- Ability to demonstrate elementary concepts of mela and raga classification
- The student understands the characteristics of selected Raga of the unit
- Gain basic knowledge of musical forms – Geetam, Varnam and kriti

Content

Unit 1 Knowledge about Swara (2 Hours)

- Nada and Its Varieties
- Sruti and its varieties
- Shodasa Swara

Unit 2 Elementary knowledge about terms (2 Hours)

- Raga Clasification
- Janya -Janaka
- Varjya - Vakra

Unit 3 Basic elements of Tala (3 Hours)

- Anga
- Shadanga
- Jati
- Sapta suladi talas

Unit 4 Basic knowledge about the musical forms (3 Hours)

- Geetam
- Varnam
- Kriti

Unit 5 Ragalakshana of Ragas prescribed in Elective-I (3 Hours)

- Kalyani
- Kambhoji
- Shuddha dhanyasi

Unit 6 Basic knowledge of parts structure of Tambura (2 Hours)

- One Pancharatnam,
- One Padavarnam.
- Two Kritis of Tyagaraja,
- One Kriti of Muthuswamy Dikshitar,

- Two kritis of Swati Tirunal
- One Kriti of any other composer.

Unit II (30 Hours)

- Brief exposition of prescribed ragas from Unit 3.
- Ragalapana – Niraval-Kalpanaswaras in general.

Unit III (42 Hours)

- Ragam – Tanam-Pallavi in Adi, Khanda Triputa and Jhampa talas
- Ragas like Kalyani, Kharahara Priya, Shanmukhapriya and Mohanam.

Unit IV (28 Hours)

Ragas to be covered for Composition:

- Asaveri,
- Mayamalavagoula,
- Valaji,
- Poornachandrika,
- Yadukulakamboji,
- Revagupti,
- Poorvi Kalyani,
- Senchurutti,

Suggestive Readings:

• Panchapakesa Iyer, A.S. (2002), Ganamrutha Varna Malika, Chennai, Karnatic Music Book Centre
• Kriti Mani Malai - T K Govinda Rao
• Kriti Mani Malai - Ranga Ramanuja Iyenkar.

DSC- 18: Course -603, (Practical – 12)
Ragas, Talas and their Application

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		L	T	P		
Ragas, Talas and their Application **(603)**	**4**	**0**	**0**	**4**	• Class XII Pass • Must have learnt for a minimum of 5 years at an established music institute or a reputed Guru	Must have studied the following papers •General Musicology (Sem- I) • Theory of Indian Music (Sem – II) • Ragas, Talas of Sem.-I & Sem.- II OR •Understanding of the basic concepts such as Shruti, Swara, Raga, Tala etc and their associated components • Knowledge of notation systems • Knowledge of the 10 Mela & ragas

Learning Objectives:

- The main focus of this course is to develop an aptitude towards the practical ability in singing the compositions of the prominent composers of Karnatak Music and develop an understanding about the concert pattern of it.

Learning Outcomes:

• Ability to demonstrate the practical nuances inherent in compositions of prominent composers.
• Developing the competency at the performance level.

Content

Unit I (20 Hours)

- One Pancharatnam,
- One Padavarnam.
- Two Kritis of Tyagaraja,
- One Kriti of Muthuswamy Dikshitar,

- Two kritis of Swati Tirunal
- One Kriti of any other composer.

Unit II (30 Hours)

- Brief exposition of prescribed ragas from unit 3.
- Ragalapana – Niraval-Kalpanaswaras in general.

Unit III (48 Hours)

- Ragam – Tanam-Pallavi in Adi, Khanda Triputa and Jhampa talas
- Ragas like Kalyani, Kharahara Priya, Shanmukhapriya and Mohanam.

Unit IV (22 Hours)

Ragas to be covered for Composition:

- Asaveri,
- Mayamalavagoula,
- Valaji,
- Poornachandrika,
- Yadukulakamboji,
- Revagupti,
- Poorvi Kalyani,
- Senchurutti,

Suggestive Readings:

- Panchapakesa Iyer, A.S. (2002), Ganamruta Varna Malika, Chennai, Karnatic Music Book Centre
- Kriti Mani Malai - T K Govinda Rao
- Kriti Mani Malai - Ranga Ramanuja Iyenkar.

Semester -VI

DSE - IV - Fundamental Knowledge of Karnatak Music (4)

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course
		Lecture	Tutorial	Practical		
Fundamental Knowledge of Karnatak Music (4)	4	1	0	3	Class XII Pass	Basic understanding about Ragas, Talas and Musical Forms of Karnataka Music

Learning Objectives:

- The main focus of the course is to establish a better understanding of the Karnatak Music to the students of other music disciplines. Therefore, the course is more practically inclined along with relevant theory for achieving better understanding. This helps the students of other disciplines to acquire theoretical and practical skills and idea about this stream from the foundation level, thus giving them a holistic approach in Karnatak Music Learning.
- To study basic concept of Karnatak music notation Course
- To study the basic concept of the tala of Karnatak Music and musical forms
- The main focus is to study the simple musical forms and Talas
- To study the concept of rendering /bowing musical exercises in various speed

Learning Outcomes:

- Students will gain knowledge of the basic terminologies of Karnatak music and its importance in the musical rendition
- Ability to demonstrate elementary concepts of mela and raga classification
- The student will understand the characteristics of selected Raga of the unit and to notate musical form Geetam
- Students will able to demonstrate the preliminary lessons of Karnatak Music
- The student will understand the simple talas through Alankaras and Geetams.
- Ability to give a brief shade of ragas through musical forms- Geetam and Varnam
- Ability to demonstrate the seven basic talas through Alankaras and geetams.

- Gain knowledge of ragas and structures of musical forms through kriti and varnam

Syllabus

Unit : I Technical Terms (3 Hours)

- Manodharma Sangitam
- Raga Alapana
- Kalpanaswaram

Unit: II Basic knowledge of Lakshana Granthas (2 Hours)

- Chaturdanti Prakashika
- Sangita Sampradaya Pradarshini

Unit: III Brief knowledge of Musical Forms (3 Hours)

- Kriti - Keertana
- Padam
- Javali

Unit: IV Knowledge of Notation (2 Hours)

- Notate any Kriti
- Notate any Varnam

Unit: V Brief life Sketch and contribution of Trinity (3 Hours)

- Tyagaraja
- Shyama Shastri
- Muttuswamy Dikshitar

Unit: VI Ragalakshana of Prescribed ragas (2 Hours)

Suggestive Readings:

- Sambamoorthy, P. Prof. (Vol 3, 1971), A dictionary of South Indian Music, Madras,
- Indian Music Publishing House
- Sambamoorthy, P. Prof. (Vol. 1, 1983), South Indian Music, Madras, Indian Music
- Publishing House,
- Sambamoorthy, P. Prof. (Vol. 2, 1982), South Indian Music, Madras, Indian Music
- Publishing House,
- Sambamoorthy, P. Prof. (Vol. 3, 1964), South Indian Music, Madras, Indian Music
- Publishing House,
- Bhagyalekshmy, Dr. S. (1990), Ragas in Carnatic Music, Trivandrum, CBH Publications
- Kuppuswamy, Gowry Dr. (1990), Textbook of Comparative Music, Trivandrum, CBH publications

Syllabus:

Unit: I (15 Hours)

- **Ability to sing Varnam in Two Speeds**

Unit: II (25 Hours)

- **One kriti each composed by Tyagaraja, Shyama Shastri and Muttuswami Dikshitar**
- **One Simple Padam**

Unit: III (15 Hours)

- **One Javali**

Unit: IV (25 Hours)

- **Basic Understanding of Ragalapana and Swarakalpana**

Unit : V (10 Hours)

- **Ability to Tune tambura**

Ragas Prescribed:

- **Abhogi**
- **Khamas**
- **Vasantha**
- **Madhyamavati**
- **Bhairavi**

Suggestive Readings:

• Panchapakesa Iyer, A.S. (2002), Ganamrutha Bodhini , Chennai, Karnatic Music Book Centre

• Panchapakesa Iyer, A.S. (2002), Ganamrutha Varna Malika, Chennai, Karnatic Music Book Centre

• Kriti Mani Malai - T K Govinda Rao

• Kriti Mani Malai - Ranga Ramanuja Iyengar

Discipline Specific Core Course (DSC)

DSC – 10: HISTORY OF INDIAN TALA SYSTEM

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
History of Indian Tala System (401)	4	3	1	0	• Class XII Pass • Must have learnt for a minimum of 3 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • General Terminology (Sem I) • Biographies & Composers of Music (Sem II) • Talas and compositions of Sem I, II & III OR • Must have an understanding of the basic concepts such as Laya, playing techniques,Sound production on Tabla/Pakhawaj Tala & Basic compostions etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the Kayada,Rela,Tukda,Paran • Knowledge of the Prachalit Tala. • Talas of Sem I, II & III

Course Objective

- Knowledge about the history of Indian Tala system and its findings in the leading Medieval texts.
- Enabling the students to read and write talas in Bhatkhande and Paluskar notation systems.

Course Learning Outcome

- The student studies about the history of Indian Music
- Student studies the texts of ancient scholars of Hindustani music
- Student studies of Tala Notations System
- Student learns to write the practical compositions according to the Notation system
- Student studies about the theoretical aspects of Talas

Theory Contents (45 Hours)

Unit 1 (7 Hours)

Brief history of Indian Tala system.

Unit 2 (7 Hours)

General Introduction of medieval leading texts of music with their references to tala system.

Unit 3 (4 Hours)

Importance of Tala in Hindustani music.

Unit 4 (8 Hours)

Detailed knowledge of Vishnu Narayan Bhatkhande Tala notation systems.

Unit 5 (8 Hours)

Study of Vishnu Digambar Palushkar Tala system.

Unit 6 (2 Hours)

Ability of writing different Layakari in notation system 5/4, 7/4.

Unit 7 (9 Hours)

- Practice of writing of Tabla & Pakhawaj compositions in Bhatkhande notation system in prescribed Talas.
- Notation of compositions in prescribed Talas.

Suggestive reading:

- Mishra Pt. Chhote Lal, Taal Prasoon, Kanishka Publishers, New Delhi.
- Kumar, Dr. Ajay (2010) Pakhawaj Ki Utpatti Vikash Ewam Vadan Shailiyan, Kanishka Publishers
- Chaudhary, Subhadra (2004) Bhartiye Sangeet me Nibaddha, Radha Publication, New Delhi
- Chaudhary, Subhadra (1984) Bhartiye Sangeet me Tala aur Roop Vidhan, Krishna Brothers, Ajmer, R.J
- Kumar, Dr. Ajay, Banaras Gharane Ke Pravartak Pandit Ram Sahai Ji Ki Tabla Vadan Parampra (2022) Kanshika Publishers, Delhi
- Sen, Dr. Arun Kumar, Bhartiye Taalon Ka Shastriye Vivechan, Madhya Pradesh Hindi Granth Academy, Bhopal
- Mishra, Dr. Lal Mani,Bhartiye Sangeet Vadya,Jnanpith, Delhi
- Das, Purushottam (1983), Mridangam Vadan, Sangeet Natak Academy, New Delhi
- Mishra, Pt. Chhote Lal (2004) Taal Prabandh, Kanishka Publications, New Delhi

- Mainkar, Pt.Sudhir, Kala Aur Shastra, Gandharv Mahavidyalaya, Mumbai
- Dandage Pt. Amod, Tabla ke Antarang, Nhairav Prakashan, Kolhapur.

DSC – 11: STAGE PERFORMANCE

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
Stage Performance (402)	4	0	0	4	• Class XII Pass Must have learnt for a minimum of 3 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • All units of Stage Performance (Sem I) • All units of Stage Performance (Sem II) • Talas of Sem I, II & III OR • Must have an understanding of the basic concepts such as, Laya, Tala, Bols etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the Kayadas, Rela, Tukda, Paran etc. • Knowledge of the prescribed talas of Sem I,II&III

Course Objective

- Advanced contents to enrich Solo presentation in Tabla/Pakhawaj performance
- Concept of Chakradar Tihais in Indian Tala system in prescribed Talas

Course Learning Outcome

The student is able to give a detailed practical demonstration of any Tala

Practical Contents (120 Hours)

TABLA

Unit 1 (5 Hours)

- **Prescribed Talas: Teentala, Jhaptal, Ektala, Chautala, Dhamar, Addha, Adachautala & Jata.**

Unit 2 (25 Hours)

- Solo recital of minimum 10 minutes in Teentala with followings: Uthan/Peshkar, Kayada, Baant, Rela, Gat,Tukra, Chakradar &Tihai.

Unit 3 (20 Hours)

- Solo Performance of minimum 10 minutes in Jhaptala with followings: Uthan/Peshkar, Kayada, Rela,Tukra, Chkradar &Tihai.

Unit 4 (10 Hours)

- Paraal ang ka Uthan.

Unit 5 (20 Hours)

- Two Kayada with six Paltas & Tihai.
- One Baant with six palta and Tihai.

Unit 6 (10 Hours)

- One Ada laya Kayada with six Palta &Tihai.

Unit 7 (10 Hours)

- Two Tukda, One Sadharan Chakradar and One Farmaishi Chakradar.

Unit 8 (20 Hours)

- Two Mukhda, Two SadharanTukdas& Two Tihai each in Ada Chautala ,Ektala and Teentala.
- Notation book to be submitted for internal assessment.

Practical Contents (120 Hours)

PAKHAWAJ

Unit 1A (5 Hours)

- **Prescribed Talas : Sultala, Dhamar, Tevra, Chautala, Adachautala, Gajajhampa**

Unit 2A (25 hours)

- Solo recital of minimum 10 mints. in Chautala with Uthan, Rela, Chakradar, Paran and Tihai.

Unit 3A (20 Hours)

- Solo Performance of minimum 10 mints. in Sooltala with Uthan, Rela, Chakradar, Paran and Tihai.

Unit 4A (10 Hours)

- Stuti Paran in Chautala.

Unit 5A (20 Hours)

- Two damdar, Two bedamdar & two simple Tihai in Dhamar Tala.

Unit 6A (10 Hours)

- Rela in Chautala.

Unit 7A (10 Hours)

- Dumkit ka baaj in Chautala.

Unit 8 A (20 Hours)

- Basic knowledge of Pakhawaj tuning.
- Notation book to be submitted for internal assessment.

Suggestive reading:

- Mishra, Pt. Chhote Lal (2006) Tabla Granth, Kanishka Publishers, New Delhi
- Das, Ram Shankar Pagal (1964)Tabla Kaumudi, Ramchandra S Publishers
- Mishra, Pt. Chhote Lal (2006) Taal Prabandh, Kanishka Publishers, New Delhi
- Kumar, Dr. Ajay, Banaras Gharane Ke Pravartak Pandit Ram Sahai Ji Ki Tabla Vadan Parampra (2022) Kanshika Publishers, Delhi
- Das, Ram Shankar Pagal (1976) Mridanga Tabla Prabhakar Bhag I,II, Sangeet Karyalaya, Hathras, U.P
- Mishra, Pt. Chhote Lal (2004) Taal Prasoon, Kanishka Publishers, New Delhi
- Mainkar Pt. Sudhir, Tabala vadan mein nihit Soundarya, Gandharva Mahavidyalaya, Mumbai
- Mainkar, Pt.Sudhir, Kala Aur Shastra, Gandharv Mahavidyalaya, Mumbai
- Dandage Pt. Amod, Tabla ke Antarang, Bhairav Prakashan, Kolhapur.
- Mulgaonkar Pt. Arvind, Tabla, Populer Prakashan, Mumbai
- Kumar, Dr. Ajay, Pakhawaj ki Utpatti, Vikash ewam Vadan Shaileyan (2010), Kanishka Publishers, Delhi

DSC – 12: PRACTICAL ASSESSMENT OF TALA

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
Practical Assessment of Tala (403)	4	0	0	4	• Class XII Pass Must have learnt for a minimum of 3 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • All units of Practical Assesment of Tala (Sem I,II,II) OR • Must have an understanding of the basic concepts such as, Laya, Tala, Bols etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the Kayadas, Rela, Tukda, Paran etc. • Knowledge of the prescribed talas of Sem I,II&III

*Practical assessment is a viva paper.

Course Objective

- Enabling the students to face the technical and critical questions both in practical and theoretical aspects of Tabla and Pakhawaj
- Most importantly the accompanying aspect of the instrument while accompanying with Vocal and Instrumental compositions is rendered to the students

Course Learning Outcome

- The student is able to demonstrate various aspects of Talas

- Student is also able to differentiate between similar Talas, thereby making a comparative analysis

Practical Contents (120 Hours)

TABLA

Unit 1 (5 Hours)

- **Prescribed Talas: Teentala, Jhaptala, Pancham Sawari, Adachutala, Ektala, Roopak, Dhamar, Chautala, Jata, Tilwada, Keharwa & Dadra**

Unit 2 (30 Hours)

- Ability to perform in Teentala and Jhaptala with various compositions.

Unit 3 (10 Hours)

- Ability to recite padhant compositions in Tali-Khali.

Unit 4 (15 Hours)

- Demonstrate the prescribed Theka with hand beats in different layakari such as Dedhagun & Tigun.

Unit 5 (20 Hours)

- Ability to accompany with Vocal Music: Chhota Khayal, Tarana and Dadra.

Unit 6 (20 Hours)

- Knowledge of accompaniment with (Razakhani Gat and Dhun) Instrumental Music.

Unit 7 (20 Hours)

- Basic knowledge of Tabla tuning.
- Notation book to be submitted for internal assessment.

Practical Contents (120 Hours)

PAKHAWAJ

Unit 1A (5 Hours)

- **Prescribed Tala: Chautala, Dhamar, Sooltala,Tevra, Adachautala, Ektala, Jhaptala, Rupak, Keherwa and Dadra.**

Unit 2A (30 hours)

- Ability to perform in Chautala and Sooltala with various compositions.

Unit 3A (10 Hours)

- Ability to recite Padhant compositions in Tali Khali.

Unit 4A (20 Hours)

- Playing knowledge of Thah Dugun, Tigun & Chaugun laya of the following Talas: Chautala, Dhamar, Sooltala, Tevra, Adachautala, Ektala, Jhaptala, Roopak, Keherwa and Dadra.

Unit 5A (20 Hours)

- Ability to accompany with Dhrupad Dhamar style of Vocal Music.

Unit 6A (10 Hours)

- Accompaniment knowledge of Instrumental Music .

Unit 7A (10 Hours)

- Demonstration of theory units accordingly.

Unit 8A (15 hours)

- Basic knowledge of Pakhawaj tuning.
- Notation book to be submitted for internal assessment.

Note: Students of Percussion Music have to prepare according to the requirements of their respective Units.

Suggestive reading:

- Kumar, Dr. Ajay, Banaras Gharane Ke Pravartak Pandit Ram Sahai Ji Ki Tabla Vadan Parampra (2022) Kanshika Publishers, Delhi
- Singh, Thakur Jaidev (1994),Bhartiye Sangeet ka Itihaas, Sangeet Research Academy, Kolkata

Syllabus for DSE TABLA

SEMESTER – IV

DSE – 2 : NOTATION SYSTEM

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
DSE – 2 : Notation System	1	1	0	0	Class XII Pass	Student have studied the following papers – • Theory topics in Sem III • Talas and compostions of Sem III OR • Must have an understanding of the basic concepts such as Laya, Varna Nikas,Tala etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the nilkas of various varnas. • Compositions and talas of Sem III

Course Objective

The students are taught primarily the techniques and art of playing Tabla in this course. Music being a primary form of Art, is a very specialized subject, which needs specialized training too, especially the Practical, i.e. Tabla playing. Different Talas, finger techniques and compositions are taught in an age-old 'Oral tradition', imbibing this vital element of teaching-learning from the traditional 'Guru-Shishya Parampara', wherein both the teacher and the students sit on the carpeted floor facing each other, and the students repeat all that the teacher plays/ demonstrates practically. The students are encouraged to improvise after learning the basic techniques, be it in the slow elaborations of different Thekas, or in the fast presentation of compositions. The students are taught to keep in mind the aesthetics of both the tala, playing style, clarity of bols and the overall performance in the mind at all times. The students, thus, get trained towards becoming young budding Solo performing artistes and accompanists as well.

Side by side, the theory about the Tabla instrument, different Talas, as also the study of Indian percussion music and its various aspects, in both the historical and the modern context, is also taught, for students to better understand the techniques and musical content that they are learning, and gradually develop a research-oriented mind tuned to asking questions related to any topic. The library of the Department, is well-equipped and there are books for a student to refer for supplementary information.

Course Learning Outcome

- The students of this course get the knowledge of playing the Theka of Jhaptala.
- Students learn about 'Te Te', 'Tirakit' compositions with variations, SadharanTukda, Paran and Tihai in Jhaptala.

- The students develop the ability to play Theka with Thah, Dugun, Tigun and Chougun in Rupak Tala Tala.
- The students learn about the accompaniment with Bhajan.

Course Objective

The students are taught primarily the techniques and art of playing Tabla in this course. Music being a primary form of Art, is a very specialized subject, which needs specialized training too, especially the Practical, i.e. Tabla playing. Different Talas, finger techniques and compositions are taught in an age-old 'Oral tradition', imbibing this vital element of teaching-learning from the traditional 'Guru-Shishya Parampara', wherein both the teacher and the students sit on the carpeted floor facing each other, and the students repeat all that the teacher plays/ demonstrates practically. The students are encouraged to improvise after learning the basic techniques, be it in the slow elaborations of different Thekas, or in the fast presentation of compositions. The students are taught to keep in mind the aesthetics of both the tala, playing style, clarity of bols and the overall performance in the mind at all times. The students, thus, get trained towards becoming young budding Solo performing artistes and accompanists as well.

Course Learning Outcome

- The students of this course get to know the Structure, Tuning, Syllables and playing techniques of Tabla.
- The students get the knowledge of the following technical terms- Laya, Taal, Matra, Theka, Tali, Khali, Vibhag, Sam, Avartan, ,Thah, Dugun, Tigun, Chaugun, Peshkaar, Uthaan, Kayada, Rela, Palta, Mukhda, Tukda, Paran, Tihai.
- The students learn about different talas like Teentala, Ektala, Choutala, Dhamar.
- Students get to learn the notation system given by Pt. V.N. Bhatkhande.
- Students develop the ability to write notations of Theka and composition in prescribed talas with Dugun, Tigun and Chaugun.

Theory Contents (15 Hours)

Unit 1 (2 Hours)

Detailed study of V.N. Bhatkhande Tala Notation System

Unit 2 (2 Hours)

Brief Knowledge of V.D. Palushkar Tala Notation System.

Unit 3 (3 Hours)

Knowledge of the following terms:-

- Thah
- Dugun
- Tigun
- Chaugun
- Peshkaar
- Uthaan

- Kayada
- Rela
- Palta
- Mukhda
- Tukda
- Paran
- Tihai

Unit 4 (4 Hours)

Ability to write the Theka of Teentala, Jhaptala, Ektala, Chautala, Keharva & Dadra with Tala Notation System in different laya.

Unit 5 (2 Hours)

Writing knowledge of Kayada, Palta, Tihai & Chakradar with Tala Notation System in Teentala.

Unit 6 (2 Hours)

- Notation book prepare for compositions writing.

Suggestive Reading :

- Mistry. Dr. Aban E, Pakhawaj our Tabla ke Gharane(2000), Pt. Keki S Jijina,Swar Sadhna Samiti, Mumbai
- Kumar, Dr. Ajay, Banaras Gharane Ke Pravartak Pandit Ram Sahai Ji Ki Tabla Vadan Parampra (2022) Kanshika Publishers, Delhi

The library of the Department, is well-equipped and there are books for a student to refer for supplementary information.

Course Learning Outcome

- The students learn to carry out a research on the life and contribution of various musicians and musicologists and present the collected data and material in the form of a well prepared report/brief dissertation
- The students get to know the approach and process of research, beneficial in M.Phil. and Ph.D. programmes later.

Practical Contents (90 Hours)

Unit 1 (10 Hours)

Prescribed Talas : Teentala, Jhaptala, Ektala, Choutala, Addha, Jhumara, Keharwa & Dadra

Unit 2 (25 Hours)

Ability to Play four Kayada with Palta & Tihai in Teentala.

Unit 3 (15 Hours)

One Tirkita Rela with four Palta and Tihai in Teentala.

Unit 4 (10 Hours)

Two Sadharan Tukra, Two Chakradar Tukra, One Paran Two Tihai One Dumdar & One Bedumdar in Teentala.

Unit 5 (10 Hours)

One Kayada with four Palta and Tihai in Jhaptala.

Unit 6 (10 Hours)

Knowledge of playing the Theka of prescribed Talas in different laya.

Unit 7 (10 Hours)

Ability to play one laggi in Keharva and one in Dadra Tala.

PERCUSSION MUSIC TABLA/PAKHAWAJ

SEMESTER V

DSC – 13: GHARANA & STYLE OF PERCUSSION MUSIC

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
Gharana & Style of Percussion Music (501)	4	3	1	0	• Class XII Pass • Must have learnt for a minimum of 3 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • General Terminology • Histroy of Avanaddha vadyas • Biographies & Composers of Music • Talas and compositions of Sem I, II, III & IV OR • Must have an understanding of the basic concepts such as Laya, playing techniques,Sound production on Tabla/Pakhawaj Tala & Basic compostions etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the Kayada,Rela,Tukda,Paran • Knowledge of the Prachalit Tala. • Talas of Sem I, II III & IV

Course Objective

- Knowing about the Historical development and evolution of various Gharanas and Paramparas of Tabla/Pakhawaj .
- Knowing about the Contribution and the Biographies of various Stalwarts of Tabla/Pakhawaj .

Course Learning Outcome

- The students learn about the Gharana system of Hindustani music
- The students study development of various Gharana & Paramparas of Tabla & Pakhawaj
- The students learn to write the practical compositions according to the Notation system
- The students study about the theoretical aspects of Talas

Theory Contents (45 Hours)

Unit 1 (5 Hours)

History of Gharana system

Unit 2 (8 Hours)

Historical development of Gharanas of Tabla & Pakhawaj.

Unit 3 (7 Hours)

Playing techniques and their salient features of Gharana of Tabla.& Pakhawaj.

Unit 4 (5 Hours)

Historical development of various paramparas of Pakhawaj.

Unit 5 (5 Hours)

Contribution of Percussion Artists in the field of Percussion Music.

Unit 6 (5 Hours)

Brief study of aesthetics of Tabla/Pakhawaj Gharana system in Hindustani Music.

Unit 7 (5 Hours)

Study of Gharanedar Bandish.

Unit 8 (5 Hours)

- Notation of compositions in prescribed Talas.

DSC – 14: STAGE PERFORMANCE

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
Stage Performance (502)	4	0	0	4	• Class XII Pass • Must have learnt for a minimum of 3 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • General Terminology (Sem I) • Biographies & Composers of Music (Sem II) • Talas and compositions of Sem I, II, III & IV OR • Must have an understanding of the basic concepts such as Laya, playing techniques,Sound production on Tabla/Pakhawaj Tala & Basic compostions etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the Kayada,Rela,Tukda,Paran • Knowledge of the Prachalit Tala. • Talas of Sem I, II III & IV

Course Objective

- Enabling the students to present the compact and effective Solo performance balancing both the Technical and Aesthetical aspects of Tabla/Pakhawaj playing.
- Advanced learning of aesthetical accompaniment with Classical and Semi Classical styles of Indian Vocal and Non-percussion Instruments.

Course Learning Outcome

- The students are able to give a practical demonstration of the prescribed Talas with various compositions.
- The students are able to demonstrate various aspects of Talas and their differentiation

Practical Contents (120 Hours)

TABLA

Unit 1 (10 Hours)

- **Prescribed Talas: Teentala,Jhaptal, Ektala, Rupak, Adachutala, Deepchandi, Jata, Tilwarda, Jhumara, Addha**

Unit 2 (25 Hours)

- Solo recital of 10 minutes in Teentala with Peshkar/Uthan, Kayada, Rela, Baant, Gat & Chakradars.

Unit 3 (15Hours)

- Solo performance in Rupak with Peshkar/ Uthan, Kayada, Rela, Tukra, Chakradar for at least 10 minutes.

Unit 4 (10 Hours)

- One Gharanedar Kayada in Teentala.

Unit 5 (10 Hours)

- One Farmaishi Chakradar in Teentala.

Unit 6 (10 Hours)

- One Kamali Chakradar in Teentala.

Unit 7 (10 Hours)

- Two Damdar & Bedamdar Tihai in Rupak.

Unit 8 (10 Hours)

- One Rela of Dhere Dhere in Rupak.

Unit 9 (10 Hours)

- Notation book to be submitted for internal assessment.

Unit 10 (10 Hours)

- Ability to tune own instrument.

Practical Contents (120 Hours)

PAKHAWAJ

Unit 1A (10 Hours)

- **Prescribed Talas: Chautala, Sultala, Dhamar, Tevra**

Unit 2A (40 Hours)

- Ability to perform solo recital in Chautala, Sultala & Dhamar.

Unit 3A (20 Hours)

- Solo performance of 10 minutes in Dhamar with Uthan, Rela, Paran & Chakradars.

Unit 4A (10 Hours)

- Ability to playing compositions (2 each) of different Gharanas in Chautala.

Unit 5A (15 Hours)

- Stuti Paran, improvisation of Theka, Rela and Chakradars in Dhamar.

Unit 6A (15 Hours)

- Ability to tune one's own instrument.

Unit 7A (10 Hours)

- Notation book to be submitted for internal assessment.

Note: Students of Percussion Music have to prepare according to the requirements of their respective Units.

DSC – 15: PRACTICAL ASSESSMENT OF TALA

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
Practical Assessment of Tala (503)	4	0	0	4	• Class XII Pass • Must have learnt for a minimum of 3 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • General Terminology (Sem I) • Biographies & Composers of Music (Sem II) • Talas and compositions of Sem I, II, III & IV OR • Must have an understanding of the basic concepts such as Laya, playing techniques,Sound production on Tabla/Pakhawaj Tala & Basic compostions etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the Kayada,Rela,Tukda,Paran • Knowledge of the Prachalit Tala. • Talas of Sem I, II III & IV

Course Objective

- Enabling the students to face the technical and critical questions both in practical and theoretical aspects of Tabla and Pakhawaj
- Most importantly the accompanying aspect of the instrument while accompanying with Vocal and Instrumental compositions is rendered to the students

Course Learning Outcome

- The student is able to demonstrate various aspects of Talas
- Student is also able to differentiate between similar Talas, thereby making a comparative analysis

Practical Contents (120 Hours)

TABLA

Unit 1 (10 Hours)

- **Prescribed Talas : Teentala, Jhaptala, Pancham Sawari, Adachartala, Ektala, Roopak, Dhamar, Chautala, Jata, Tilwada, Keharwa & Dadra**

Unit 2 (40 Hours)

- Ability to perform in Teentala, Jhaptala & Rupak with various compositions.

Unit 3 (10 Hours)

- Ability to padhant compositions in Tali-Khali.

Unit 4 (10 Hours)

- Demonstrate the prescribed Theka with hand beats in different layakaries such as Dedhagun & Tigun.

Unit 5 (10 Hours)

- Ability to accompany with Vocal Music : Chhota Khayal, Tarana, Bhajan & Dadra.

Unit 6 (10 Hours)

- Knowledge of accompaniment with Sitar & Violin.

Unit 7 (10 Hours)

- Accompaniment with light compositions with Laggi-Ladi.

Unit 8 (10 Hours)

- Basic knowledge of Tabla tuning.

Unit 9 (10 Hours)

- Notation book to be submitted for internal assessment.

Practical Contents (120 Hours)

PAKHAWAJ

Unit 1 (10 Hours)

- **Prescribed Tala : Chautala, Dhamar, Sooltala,Tevra, Adachautala, Ektala, Jhaptala, Rupak, Keherwa and Dadra.**

Unit 2 (30 Hours)

- Ability to perform in Chartala and Sooltala with various compositions.

Unit 3 (10 Hours)

- Ability to Padhant compositions in Tali Khali.

Unit 4 (10 Hours)

- Playing knowledge of Thah Dugun, Tigun & Chaugun laya of the following Talas: Chautala, Dhamar, Sooltala, Tevra, Adachautala, Ektala, Jhaptala, Roopak, Keherwa and Dadra.

Unit 5 (10 Hours)

- Ability to play and keep in the hand beats in prescribed Talas.

Unit 6 (10 Hours)

- Accompaniment with vocal compositions :Dhrupad Dhamar,

Unit 7 (10 Hours)

- Accompaniment with Instrumental Drut Gat and Jhala.

Unit 8 (10 Hours)

- Demonstrate theory units accordingly.

Unit 9 (10 Hours)

- Basic knowledge of Pakhawaj tuning.

Unit 10 (10 Hours)

- Notation book to be submitted for internal assessment.

Note : Students of Percussion Music have to prepare according to the requirements of their respective Units.

PERCUSSION MUSIC TABLA/PAKHAWAJ

Syllabus for DSE TABLA

SEMESTER – V

DSE – 3 : HISTORY OF AVANADDHA VADYAS

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
DSE-3 : History of Avanaddha Vadyas	1	1	0	0	Class XII Pass	Student have studied the following papers – • Theory topics in Sem III & IV • Talas and compostions of Sem III &IV OR • Must have an understanding of the basic concepts such as Laya, Varna Nikas,Tala etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the nilkas of various varnas. • Compositions and talas of Sem IV

Course Objective

The students are taught primarily the techniques and art of playing Tabla in this course. Music being a primary form of Art, is a very specialized subject, which needs specialized training too, especially the Practical, i.e. Tabla playing. Different Talas, finger techniques and compositions are taught in an age-old 'Oral tradition', imbibing this vital element of teaching-learning from the traditional 'Guru-Shishya Parampara', wherein both the teacher and the students sit on the carpeted floor facing each other, and the students repeat all that the teacher plays/ demonstrates practically. The students are encouraged to improvise after learning the basic techniques, be it in the slow elaborations of different Thekas, or in the fast presentation of compositions. The students are taught to keep in mind the aesthetics of both the tala, playing style, clarity of bols and the overall performance in the mind at all times. The students, thus, get trained towards becoming young budding Solo performing artistes and accompanists as well.

Side by side, the theory about the Tabla instrument, different Talas, as also the study of Indian percussion music and its various aspects, in both the historical and the modern context, is also taught, for students to better understand the techniques and musical content that they are learning, and gradually develop a research-oriented mind tuned to asking questions related to any topic. The library of the Department, is well-equipped and there are books for a student to refer for supplementary information.

Course Learning Outcome

- The students of this course get the knowledge of playing the Theka of Jhaptala/Sultala.
- Students learn about 'Te Te', 'Tirakit'/'Dhumkit' compositions with variations, SadharanTukda, Paran and Tihai in Jhaptala/Sultala.
- The students develop the ability to play Theka with Thah, Dugun, Tigun and Chougun in Rupak Tala/Tevra Tala.
- The students learn about the accompaniment with Chhota Khayal/Dhrupad and Bhajan.

Course Objective

The students are taught primarily the techniques and art of playing Tabla in this course. Music being a primary form of Art, is a very specialized subject, which needs specialized training too, especially the Practical, i.e. Tabla playing. Different Talas, finger techniques and compositions are taught in an age-old 'Oral tradition', imbibing this vital element of teaching-learning from the traditional 'Guru-Shishya Parampara', wherein both the teacher and the students sit on the carpeted floor facing each other, and the students repeat all that the teacher plays/ demonstrates practically. The students are encouraged to improvise after learning the basic techniques, be it in the slow elaborations of different Thekas, or in the fast presentation of compositions. The students are taught to keep in mind the aesthetics of both the tala, playing style, clarity of bols and the overall performance in the mind at all times. The students, thus, get trained towards becoming young budding Solo performing artistes and accompanists as well.

Course Learning Outcome

- The students of this course get to know the Structure, Tuning, Syllables and playing techniques of Tabla.
- The students get the knowledge of the following technical terms- Laya, Taal, Matra, Theka, Tali, Khali, Vibhag, Sam, Avartan, ,Thah, Dugun, Tigun, Chaugun, Peshkaar, Uthaan, Kayada, Rela, Palta, Mukhda, Tukda, Paran, Tihai.
- The students learn about different talas like Teentala, Ektala, Choutala, Dhamar.
- Students get to learn the notation system given by Pt. V.N. Bhatkhande.
- Students develop the ability to write notations of Theka and composition in prescribed talas with Dugun, Tigun and Chaugun.

Theory Contents (15 Hours)

Unit 1 (2 Hours)

History of Avanaddha vadyas.

Unit 2 (2 Hours)

Origin & development of Tabla.

Unit 3 (2 Hours)

Study of Pushkar & Tripuskar vadya.

Unit 4 (2 Hours)

Study of Pakhawaj, Mridangam, Khol & Naal.

Unit 5 (3 Hours)

Study of following Avanaddha vadyas :-

- Bhumi Dundubhi
- Dundubhi
- Panava
- Dardur
- Karata
- Ghadas

Unit 6 (2 Hours)

Study of making puddi of Avanaddha vadyas.

Unit 7 (2 Hours)

- Notation book prepare for compositions writing.

Suggestive Reading :

- Kumar, Dr. Ajay, Banaras Gharane Ke Pravartak Pandit Ram Sahai Ji Ki Tabla Vadan Parampra (2022) Kanshika Publishers, Delhi
- Mistry. Dr. Aban E, Pakhawaj our Tabla ke Gharane(2000), Pt. Keki S Jijina,Swar Sadhna Samiti, Mumbai

The library of the Department, is well-equipped and there are books for a student to refer for supplementary information.

Course Learning Outcome

- The students learn to carry out a research on the life and contribution of various musicians and musicologists and present the collected data and material in the form of a well prepared report/brief dissertation
- The students get to know the approach and process of research, beneficial in M.Phil. and Ph.D. programmes later.

Contents

Unit 1 (10 Hours)

Prescribed Talas : Teentala, Jhaptala, Ektala, Choutala, Addha, Jhumara, Dhamar, Keharwa & Dadra

Unit 2 (20 Hours)

Solo recital with following : Kayada, Rela, Tukra, Chakradar, Paran & Tihai in Teentala.

Unit 3 (10 Hours)

Two advance Kayada with four Palta and Tihai in Teentala.

Unit 4 (15 Hours)

One Uthan, Two Sadharan Tukra, Two Chakradar Tukra, One Paran Two Tihai One Dumdar & One Bedumdar in Teentala.

Unit 5 (10 Hours)

Two Kayada with four Palta and Tihai in Jhaptala.

Unit 6 (5 Hours)

One Dhere Dhere Rela with four Palta & Tihai in Jhaptala.

Unit 7 (10 Hours)

One Uthan, Two Sadharan Tukra, Two Chakradar Tukra, Two Tihai One Dumdar & One Bedumdar in Jhaptala.

Unit 8 (5 Hours)

Knowledge of playing the Theka of prescribed Talas in different laya.

Unit 9 (5 Hours)

Ability to accompaniment with Bhajan & Geet.

PERCUSSION MUSIC TABLA/PAKHAWAJ

Discipline Specific Core Course (DSC)

SEMESTER VI

DSC – 16 : Study of Indian Tala System & Present Musical Forms

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
Study of Indian Tala System & Present Musical Forms (601)	4	3	1	0	• Class XII Pass • Must have learnt for a minimum of 5 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • General Terminology (Sem I) • Biographies & Composers of Music (Sem II) • Talas and compositions of Sem I, II, III & IV OR • Must have an understanding of the basic concepts such as Laya, playing techniques,Sound production on Tabla/Pakhawaj Tala & Basic compostions etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the Kayada,Rela,Tukda,Paran • Knowledge of the Prachalit Tala. • Talas of Sem I, II III & IV

Learning Objective

- Student is introduced to ancient Margi Deshi tala system
- Critical study of their respective instruments mentioned in ancient texts

- To know how abouts of various popular classical and semiclassical vocal genres such as Dhrupad, Khayal, Hori, Thumri, Ghazal etc
- Elementary knowledge of western staff notation

Learning Outcome

- The student studies about the ancient Tala system
- He learns about the musical forms of Hindustani music
- He learns to write the practical compositions according to the Notation system
- He studies about the theoretical aspects of Talas

Components (45 Hours)

Unit 1 (6 Hours)

Brief introduction of Tala Ke Dus Pran.

Unit 2 (6 Hours)

Brief study of Margi and Deshi Tala Paddhati.

Unit 3 (6 Hours)

Merits and Demerits of Awanaddha Vadak according to ancient

Unit 4 (9 Hours)

Brief knowledge of Dhrupad, Dhamar, Khayal , Hori, Sadra, Thumri, Tappa, Bhajan , Ghazal and qauvali and also the Talas used to accompany these styles.

Unit 5 (6 Hours)

Elementary knowledge of staff notation system.

Unit 6 (6 Hours)

Basic principles of art of accompanying various instrumental and vocal styles.

Unit 7 (6 Hours)

Notation of compositions in prescribed Talas.

Suggestive Reading :

DSC – 17 STAGE PERFORMANCE

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
Stage Performance (602)	4	0	0	4	• Class XII Pass • Must have learnt for a minimum of 5 years at an established music institute or from a reputed artiste /guru	Must have studied the following papers – • General Terminology • Biographies & Composers of Music • Talas and compositions of Sem I, II, III IV OR • Must have an understanding of the basic concepts such as Laya, playing techniques,Sound production on Tabla/Pakhawaj Tala & Basic compostions etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the Kayada,Rela,Tukda,Paran • Knowledge of the Prachalit Tala.

						• Talas of Sem I, II III & IV

Learning Objective

A complete aesthetical tabla/Pakhawaj solo playing with the sound knowledge of different gharans/paramparas thus enabling the students to have a vast and deep view of the rich legacy of the instrument.

- Advanced learning in accompanying the Hindustani Vocal and Instrumental music.This enhances the students skill to face the challenges at his work place too.

Learning Outcome

- The student is able to give a practical demonstration of the prescribed Talas
- He is able to demonstrate various aspects of Talas and their differentiation.

Components (120 Hours)

TABLA

Unit 1 (20 Hours)

- **Prescribed Talas :Teentala, Jhaptala, Ektala, Chautala, Dhamar, Sooltala Deepchandi, Jata, Tilwarda, Jhumara & Tevra.**

Unit 2 (18 Hours)

- Complete aesthetical Tabla solo recital with different Gharanedar Compostions in Teentala for 10 minutes and in Jhaptala and Rupak for 10 minutes.

Unit 3 (18 Hours)

- Solo performance in Ektala with Uthan/Peshkar, Kayada, Rela, Tukra, Chakradar & Tihai.

Unit 4 (10 Hours)

- Darjje ki Gat in Teentala.

Unit 5 (8 Hours)

- Farda in Teentala.

Unit 6 (10 Hours)

- Gat kayada in Teentala.

Unit 6 (10 Hours)

- One Kayada of Takatirakitaka in Ektala.

Unit 7 (10 Hours)

- One Rela of Dhere Dhere in Ektala.

Unit 8 (10 Hours)

- One Farmaishi Chakradar in Ektala.

Unit 9 (8 Hours)

- Knowledge of Tuning of Tabla.

Unit 10 (8 Hours)

- Notation book to be submitted for internal assessment.

PAKHAWAJ

Unit 1 A (20 Hourse)

Prescribed Talas :Chautala, Sooltala, Dhamar, Ektala, Keharwa & Dadra

Unit 2 A (20 Hours)

Complete rendering of solo Pakhawaj for at least 15 minutes in Chautala and 10 minutes in Sooltala / Tevra with following: Uthan, Rela, Stuti & Paran etc.

Unit 3 A (20 Hours)

- Knowledge of accompaniment with Instrumental styles: Instrumental composition of Dhrupad – Dhamar styles.

Unit 4 A (12 Hours)

- Knowledge of accompaniment with vocal styles: Dhrupad, Dhamar.

Unit 5 A (12 Hours)

- Knowledge of talas of Tabla: Jhaptala, Ektala, Keharwa and Dadra.

Unit 6 A (12 Hours)

- Ability to play advance compositions in Chautala and Dhamar.

Unit 7 A (12 Hours)

- Knowledge of Tuning of Pakhawaj.

Unit 8 A (12 Hours)

- Notation book to be submitted for internal assessment.

Note: Students of Percussion Music have to prepare according to the requirements of their respective Units.

TABLA

Unit 1 (20 Hours)

- Prescribed Talas :Teentala, Jhaptala, Ektala, Chautala, Dhamar, Sooltala Deepchandi, Jata, Tilwarda, Jhumara & Tevra.

Unit 2 (20 Hours)

- Complete aesthetical Tabla solo recital with different Gharanedar Compostions in Teentala for 10 minutes and in Jhaptala and Rupak for 10 minutes.

Unit 3 (20 Hours)

- Solo performance in Ektala with Uthan/Peshkar, Kayada, Rela, Tukra, Chakradar & Tihai.

Unit 4 (15 Hours)

- Knowledge of accompaniment in Instrumental styles. Masitkhani Gat, Thumri/Dhun.

Unit 5 (15 Hours)

- Knowledge of accompaniment with vocal styles i.e. Khayal (Bada & Chhota) Tarana, Thumri/Dadra with Laggi Ladi.

Unit 6 (10 Hours)

- Playing techniques of Talas of Pakhawaj: Chautala, Dhamar , Sooltala and Tevra.

Unit 7 (10 Hours)

- Knowledge of Tuning of Tabla.

Unit 8 (10 Hours)

- Notation book to be submitted for internal assessment.

PAKHAWAJ

Unit 1 A (20 Hours)

- Prescribed Talas :Chautala, Sooltala, Dhamar, Ektala, Deepchandi, Jata, Tilwarda, Jhumara & Dadra.

Unit 2 A (15 Hours)

- Complete rendering of solo Pakhawaj for at least 10 minutes in Chautala, Sultala, Dhamar.

Unit 3 A (15 Hours)

- Solo Performance 10 minutes in Gajjhampa with following: Uthan, Rela, Stuti & Paran etc.

Unit 4 A (15 Hours)

- Knowledge of accompaniment with Instrumental styles: Instrumental composition of Dhrupad – Dhamar styles.

Unit 5 A (10 Hours)

- Knowledge of accompaniment with vocal styles: Dhrupad, Dhamar.

Unit 6 A (15 Hours)

- Knowledge of talas of Tabla: Jhaptala, Ektala, Keharwa and Dadra.

Unit 7 A (10 Hours)

- Ability to play advance compositions in Chautala and Dhamar.

Unit 8 A (10 Hours)

- Knowledge of Tuning of Pakhawaj.

Unit 9 A (10 Hours)

- Notation book to be submitted for internal assessment.

Note: Students of Percussion Music have to prepare according to the requirements of their respective Units.

PERCUSSION MUSIC TABLA/PAKHAWAJ

Syllabus for DSE TABLA

SEMESTER – VI

DSE – PERCUSSION TABLA (4)

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
DSE- PERCUSSION TABLA (4)	4	1	0	3	Class XII Pass	Student have studied the following papers – • Theory topics in Sem III, IV& V • Talas and compostions of Sem III, IV&V • Must have an understanding of the basic concepts such as Laya, Varna Nikas,Tala etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the nilkas of various varnas. • Compositions and talas of Sem V • Practical contents in Sem III, IV &V • Talas and compostions of Sem V • Must have an understanding of the basic concepts such as Laya, Varna Nikas,Tala etc and their associated components • Knowledge of the nikas of various varnas. • Knowledge of Kayada, Rela & Tukda • Compositions and talas of Sem V

Learning Objective

- The students are taught primarily the techniques and art of playing Tabla in this course. Music being a primary form of Art, is a very specialized subject, which needs specialized training too, especially the Practical,
- Different Talas, finger techniques and compositions are taught in an age-old 'Oral tradition', imbibing this vital element of teaching-learning from the traditional 'Guru-Shishya Parampara',
- The teacher and the students sit on the carpeted floor facing each other, and the students repeat all that the teacher plays/ demonstrates practically.
- The students are encouraged to improvise after learning the basic techniques, be it in the slow elaborations of different Thekas, or in the fast presentation of compositions.

- The students are taught to keep in mind the aesthetics of both the tala, playing style, clarity of bols and the overall performance in the mind at all times.
- The students, thus, get trained towards becoming young budding Solo performing artistes and accompanists as well.

Learning Outcome

- The students of this course get the knowledge of playing the Theka of Jhaptala/Sultala.
- Students learn about 'Te Te', 'Tirakit'/'Dhumkit' compositions with variations, SadharanTukda, Paran and Tihai in Jhaptala/Sultala.
- The students develop the ability to play Theka with Thah, Dugun, Tigun and Chougun in Rupak Tala/Tevra Tala.
- The students learn about the accompaniment with Chhota Khayal/Dhrupad and Bhajan.

Theory Component

Unit 1 (2 Hours)

History of Gharana System

Unit 2 (2 Hours)

Origin & development of various Gharanas of Tabla.

Unit 3 (2 Hours)

Various Gharanas of Pakhawaj

Unit 4 (2 Hours)

Specialties of the Gharana of Tabla.

Unit 5 (3 Hours)

Study of various Gharanedar Bandish

Unit 6 (2 Hours)

Biographies of the Gharanedar Legend artistes .

Unit 7 (2 Hours)

- Notation book prepare for compositions writing.

Practical Component

Unit 1 (5 Hours)

Prescribed Talas : Teentala, Jhaptala, Ektala, Choutala, Addha, Jhumara, Dhamar, Adachartala, Deepchandi, Keharwa & Dadra

Unit 2 (15 Hours)

Solo recital with following : Kayada, Rela, Tukra, Chakradar, Paran & Tihai in Teentala.

Unit 3 (10 Hours)

Solo recital with following Two advance Kayada, Rela, Tihai & Tukda etc in Jhaptala.

Unit 4 (10 Hours)

One Uthan, Two Sadharan Tukra, Two Chakradar Tukra, One Paran Two Tihai One Dumdar & One Bedumdar in Teentala.

Unit 5 (10 Hours) Two Kayada with four Palta and Tihai in Ektala.

Unit 6 (5 Hours)

One Dhere Dhere Rela with four Palta & Tihai in Jhaptala.

Unit 7 (15 Hours)

One Uthan, Two Sadharan Tukra, Two Chakradar Tukra, Two Tihai One Dumdar & One Bedumdar in Jhaptala.

Unit 8 (10 Hours)

Knowledge of playing the Theka of prescribed Talas in different laya.

Unit 9 (10 Hours)

Ability to accompaniment with Bhajan & Geet.

			L	T	P	
Musicology of Indian music DSC-4	DSC-4(A/B) –CORE (NON MAJOR)	4	2	0	2	

Course: DSC 4 (A)

Paper Name: Musicology of Indian Music

Theory: Component-1

Credit: 2

Hours: 30

Learning Objectives

- The course is formulated with an objective to enhance the knowledge of the students through definitions, descriptions and explanations, with the teaching of-

- The theory of Indian Music with reference to terminologies, musical forms, Ragas and Talas and essays.
- The purpose of studying the Medieval Granthas is to impart the information of the development of music during this period.
- The aim behind the study of contributions of musicians and musicologists is to share their life and achievements with the students.

Learning Outcomes

- The indepth knowledge of the semi-classical forms like Thumri, Dadra, Tappa will be imparted.
- Elaborate knowledge of the popular Ragas- Bageshree, Bhupali ,Bhimpalasi and Des will be given.

- Students will be able to recite the Thekas and their Dugun, Tigun and Chaugun recitation of many Talas.
- The students shall attain knowledge of significant Granthas with special reference to their time period.

Content

Detailed study of the following:

Unit I-

- Thumri, Dadra, Tappa.

Unit II-

- Description of Raga Lakshnas and types.

Unit III-

- Time Theory of Ragas,
- Sandhiprakash Raga,
- Parmelapraveshak Raga.

Unit IV-

- Detailed study of the following Ragas:
- Bageshree, Bhupali, Bhimpalasi.

Unit V-

General study of following Granthas with special reference to their time period and contents :-

- Sangeet Parijat
- Chaturdandiprakashika.

Unit VI-

Writing of the following Talas, their Vibhags, Bols, Matras, Sam, Tali and Khali and their Dugun, Tigun & Chaugun :

- Ektala, Chautala, Jhaptala, Teentala and Kaharwa.

Unit VII -

Life & Contributions of the following musicians and musicologist:-

- Pt. Krishna Narayan Ratanjankar,

- Beethoven,
- Vilayat Khan,
- Muthuswami Dikshitar.

Unit VIII-

Comparative study between following ragas-

- Bhimpalasi- Bageshri.

Unit IX-

Writing of compositions in notation-

- Vilambit Khayal/ Drut Khayal/ Dhrupad/ Dhamar.(For Vocal Music students)
- Maseetkhani Gat/ Razakhani Gat (For Instrumental Music students)

Or

Only Visually challenged students have the option of attempting either notation or an essay on the following topics:

- Raga ka Samay Siddhant.
- Hindustani Sangeet mein Laya.
- Shastreeya Sangeet evam Sugam Sangeet.

Practical: Component-2

Performance & Viva-Voce

Credit: 2

Hours: 60

Learning Objective

- The practical aspects are intended at increasing the degree of mastery in the subject through performance and viva-voce

Learning Outcomes

- The student will acquire proficiency in singing Vilambit and Drut Khayals, Dhrupad, Dhamar thereby elaborating them through Alaap, Taan and Layakari respectively.
- The students of instrumental music will skillfully play various Gat with Taan and Jhala.
- The students will understand the significance of the Raga.
- The students will get the understanding of folk music by singing Lokgeet or playing folk-dhun.
- The students will obtain the basic knowledge of Harmonium or any other instrument playing which will facilitate their musical learning process.

Content:

Prescribed Ragas – Bageshree, Bhoopali, Bhimpalasi.Des.

Prescribed Talas - Ektala,Chautala, Jhaptala, Teentala,Kaharwatala.

Vocal Music

- One Vilambit Khayal with Alaaps and Taans in any one of the prescribed Ragas.
  - Madhyalaya Khayal in all of the prescribed Ragas.
  - One Dhrupad or Dhamar with Dugun, Tigun and Chaugun .
  - One Raga based Bhajan/Lokgeet.

Instrumental Music

- Maseetkhani Gat with Alaaps and Tanas in any one of the prescribed Ragas.
- Razakhani Gat (Tanas and Jhala) in all of the prescribed Ragas.
- Gat in any Tala other than Teentala.
- Raga or Folk music based dhun.

Vocal & Instrumental

- Identifying Ragas and Talas of the prescribed syllabus while being sung or played.
- Ability to recite the Thekas of the following Talas with Tali and Khali , Dugun, Tigun and Chaugun- Ektala,Chautala,Jhaptala,Teentala,Kaharwatala.
- Practical file with details of Ragas, Notations of compositions & Talas with Dugun, Tigun and Chaugun.

DSC-4-C Ancient and Medieval history of Indian Music (Major)

Course Title	Nature of the Course	Total Credits	Components			Eligibility Criteria/Prerequisite
			L	T	P	
Ancient and Medieval history of Indian Music	DSC-4-C-CORE (MAJOR)	4	2	0	2	

Course: DSC 4 (C) MAJOR

Paper Name: Ancient and Medieval history of Indian Music

Theory: Component-1

Credit: 2

Hours:30

Learning Objectives:

- To develop the interest of the students in musicology by introducing them to the ancienttexts of music.
- To explain the Ragang-Rag Paddhati for classification of ragas
- To teach them about the various musical instruments from the ancient to the modern times.
- To focus on the ancient musical forms that were the precursor to the current musicalforms.

Learning Outcomes:

- The students will come to know about the Music found in ancient works like Puranas .This knowledge is useful for further study of musicology as well as for purposes of research.
- Students will be able to have an understanding of the Ragang-Raga Paddhati for classifying ragas.
- Students will come to know about various musical instruments found in Music

ancient Granth Natya Shastra.

- Students will gain valuable knowledge of Jati and its Lakshnas which are the root of present Raga system.

Contents:

Unit I

Music in Puranas-

- Harivansh Puran
- Vishnu Puran

Unit II

- Instruments in Natya shasta

Unit III

- Definition of Jati & its Lakshnas
- Names of Eighteen Jatis described in Natya Shasta

Unit IV

Raga- Ragini Vargikaran

Unit V

- Ragang- Paddhati

Unit VI

- Study of the following talas in detail – Chautala & Sooltala
- Ability to write the notation of the talas in dugun, tigun and chaugun

Unit VII

- Study of the ragas – Bageshwari , Bhimpalasi, Bhairavi
- Comparative study of the ragas with each other
- Ability to write the notation of compositions in prescribed ragas

DSC:4 (C)
Practical: Component -2
Performance & Viva-Voce
Credit -2
Hours: 60

Learning Objectives:

- To focus more on the Stage Performance of the student
- To encourage the student to attempt to improvise while singing/playing.
- To focus on his learning of newer talas
- To focus more on the Viva-Voce of the student.

Learning Outcomes:

- Students will develop the confidence to perform a raga for a long duration of time.
- Students will be able to sing new compositions in new talas
- Students will be able to explain the grammatical rules of a raga in detail.
- Student will develop the confidence to differentiate between similar ragas.

Content:

Prescribed Ragas:

- Bageshwari
- Bheempalasi

- Bhairavi

Unit I – Vocal Music:

- A performance of Vilambit and Drut Khayal with gayaki to be presented in anyone raga
- Drut Khayal with gayaki in all the ragas
- Dhrupad or Dhamar composition in any one of the prescribed ragas with Layakari
- Knowledge and demonstration of the following talas – Chautala & Sooltala
- Ability to tune the Tanpura

Unit II – Instrumental Music:

- A performance of Maseetkhani and Razakhani Gats with elaboration to be presented in any one raga
- Presentation of a dhun other than Teentala
- Razakhani Gat with elaboration in all the ragas
- Knowledge and demonstration of the following talas – Chautala & Sooltala
- Ability to tune the Instrument -Sitar

Note**:** Students of Vocal and Instrumental music will have to prepare according to the requirements of their respective Units.

SEMESTER-4

GE-4

Paper Name: Rudimentary Elements of Hindustani Music

Theory: Component -1

Credit: 2

Hours: 30

Learning Objectives

- The core aim of this course it to give an expansive gamut of the learning of various facets of Hindustani music,
- Such as the knowledge of the Time theory of the Ragas,
- The comparative study of the Hindustani and Karnatak systems,
- Writing notations of the Raga compositions and the Talas are intended to enrich the students understanding of the heritage bandishes, as well as documentation of the old transcripts.

- Project work on semi classical, light and folk music is envisioned to stimulate research culture.

Learning Outcomes

- The students have learned the structural details of instruments to understand them.
- By the knowledge of the Time theory of ragas, the students understand the significance and dogmatism of this principle.
- Essays on the prescribed topics give a wider and research oriented perspective to the students.
- Ability to recite Talas and its Layakaries give command over the rhythm.
- A comparative study of the two major music systems of Indian Music increases the knowledge about the rich heritage of Classical Music.
- A project work on other musical forms have been introduced for creating interest amongst the students.

Content

Unit 1

- Detailed study in prescribed Ragas: Jaunpuri, Bihag.

Unit 2

- Ability to write notation of Vilambit Khayal / Drut Khyal/Maseetkhani Gat/ Razakhani Gat with Tanas in prescribed Ragas.

Unit 3

- Structural details of Harmonium and Tabla with sketch.

Unit 4

- Writing an essay on the following topics :
- Devotional Music
- Music Therapy

Unit 5

- Elementary knowledge of Time theory of Ragas in Hindustani Music.

Unit 6

- Ability to write Teentala, Dhamar, Deepchandi with Thaah, Dugun and Chaugun

Unit 7

- Comparative study of Hindustani music and Karanatak music in brief.

Unit 8

- Project work: Semi Classical/ Light/ Folk music of any region.

GE-4

Practical: Component-2

Performance &Viva –Voce

Credit: 2

Hours: 60

Learning Objectives

- The practical facet targets towards endowing the student with live performance skills in adeptly presenting a skillful demonstration in Vilimbat & Drut Khayals/Maseetkhani &Razakhni gats in Raga Jaunpuri and Bihag,
- They would also be performing a semi classical composition in Raga Kafi or Khamaj,
- Ably demonstrate Thekas on hand in prescribed talas such as Teental, Dhamar and Deepchandi,
- Discussions on International music, Semi Classical forms and Karnatak music are selected to give a wide perspective on the subjects.

Learning Outcomes

- The students have been given an opportunity to increase their calibre of performance by singing and playing compositions in varied Ragas.
- They have learned to gain command on various Talas, an important element of Indian Music.
- Guided listening sessions have been introduced where they have an opportunity to hear great artists and benefit from them.
- Learning the tuning of one's own instrument increases confidence amongst the students and helps them in performance.

Content

Unit 1

- Prescribed ragas: Jaunpuri, Bihag

Unit 2

- Ability to sing one Vilambit khayal and Drut khayal or play one Maseetkhani gat and one Razakhani Gat with tanas and Jhala in Raga Jaunpuri and Bihag.

Unit 3

- Ability to keep thekas of the following talas by hand beats in Teentala, Dhamar with Thaah & Dugun

Unit 4

- Ability to sing one Semi classical composition in Raga Kafi/ Khamaj(For vocal students)
- Ability to play one Razakhani or Madhya Laya Gat in other than Teentala

Unit 5

- Guided listening with discussions of Instrumental Music/ Semi Classical forms/ composition of Karnatak Music.

Unit 6

- Tuning of one's own instrument Tanpura/Sitar

SEMESTER-5

Course: DSC 5 (A)

Paper Name: Study of Ancient Granthas and Ragas of Indian Music.

Theory:

Component-1

Credit : 2

Hours : 30

Learning Objectives:

- The study of ancient texts aims at providing the knowledge of the historical era and its reference to the subject.
- Discussions on different terminology to make the subject more comprehenciv and perceptive.
- The study of Ragas, Talas and compositions aim at crafting the theoretical aspect of presentation.
- Learning to write notation of compositions and the visually challenged students have an option of writing essays on the given topics.

Learning Outcomes:

- The students will learn about the musical references and instruments found in the epic Ramayan .
- Indepth study of ancient texts the students will gain a deep insight into the evolution of Indian music.
- The students will understand the concept of Margi and Desi Sangeet and will be able to demonstrate its significance in modern times.

- The students will gain the knowledge of theoretical aspects of prescribed Ragas and Talas which will enhance the quality of projects and their practical illustrations.
- Students will also learn to write Talas and compositions in notation with minute details.
- Comparative study of Talas having equal number of beats will further enhance their ability to understand the salient features of various Talas.
- The visually challenged students will be able to apply their minds to write essays on prescribed topics there by developing their expression and learning better utterance skills.

Contents

General discussion and study of the following:

Unit I

Musical references in the following text

- The Ramayan

Unit II

- General study of Brihaddeshi of Matang Muni
- Detailed study of Sangeet Ratnakar of Pt. Sharang Dev. ·

Unit III

Study of the following:-

- Dashvidh Raga Vargikaran
- Gaan: Nibaddha Gaan, Anibaddha Gaan
- Kaku
- Sthaya
- Margi and Desi Sangeet

Unit IV

Description of the following

- Vaggeyakar
- Avirbhav- Tirobhav

·Unit V

- Writing of Talas in notation with their Vibhags, Matras, Bols, Sam, Tali and Khali with Dugun, Tigun and Chaugun:

- TilwadaTala, Dhamar tala, Choutala, Jhaptala, Teentala,Ektala, Dadra.

Unit VI

- Comparative study of Talas:
- Ektala –Choutala
- Teentala - Tilwada

Unit VII

Comparative study of the following

- Dhrupad – Dhamar
- Thumri -Tappa

Unit VIII

Detailed study of the following Ragas :

- Kedar
- Jaunpuri
- Patdeep

Unit IX

Writing of compositions in notation:

- Vilambit Khayal, Dhrupad, Dhamar(For Vocal students),
- Maseetkhani Gat, Razakhani Gat (For Instrumental students).

Or

Only Visually challenged students have the option of attempting either notation or an essay on the following topics:

- Importance of Media in promotion of Music
- Significance of Music in human life
- Importance of music in Fine Arts

Practical : Component-2

Performance & Viva –Voce

Credit : 2

Hours : 60

Learning Objectives:

- The prime design of this course is to enable students to develop performance skills by learning to-
- Demonstrate various forms of music in different Ragas and Talas as a part of performance and Viva-Voce.
- To identify the Ragas and Talas.
- Sing or play one Light Dhun/Bhajan/Lokgeet based on Raga.

Learning Outcomes:

- A variety of musical forms in each Raga will be taught to the students, thus building their repertoire and preparing them for stage performance.
- The students will learn the customary and traditional Gayaki of Dhrupad-Dhamaar.
- ·The students will learn to identify different Ragas and Talas while being sung and played .
- Reciting the Thekas of the Talas and playing basic Talas will enable students to get acquainted with the rhythmic patterns.
- The knowledge of playing Harmonium will aid the students in understanding the placement of fingers and swaras on the instrument.
- The practical file with details of each topic covered in the syllabus will teach the students the method of systematic documentation and presentation.

Content:

Prescribed Ragas – Kedar, Jaunpuri, Patdeep

Prescribed Talas - Chautala, Jhaptala, Teentala,Tilwadatala,Dhamar tala, Ektala .

Vocal Music

- One Vilambit Khayal with Alaaps and Taans in any of the prescribed Ragas.
- Madhyalaya Khayal in all the prescribed Ragas.
- One Dhrupad with Dugun, Tigun and Chougun.

Or

- One Dhamar with Dugun, Tigun and Chougun.
- One Raga based Bhajan/Lok geet.

Instrumental Music

- Maseetkhani Gat in any one of the prescribed Ragas.
- Razakhani Gat in all the prescribed Ragas.
- Gat in any Tala other than Teentala

Vocal & Instrumental

- Identifying Ragas and Talas of the prescribed syllabus while being sung or played.
- Ability to recite the Thekas of the following Talas along-with Tali – Khali and with Dugun, Tigun, Chaugun :
- Tilwada tala, Dhamar tala,Chautala, Jhaptala, Teentala, Ektala, Dadra tala.
- Elementry knowledge of playing Harmonium.
- Practical file with details of Ragas, Notations of compositions & Talas with Dugun, Tigun and Chaugun.

DSC-5-C – Theoretical & Practical Aspects of Hindustani Music

Course Title	Nature of the Course	Total Credits	Components			Eligibility Criteria/Prerequisite
			L	T	P	
Theoretical & Practical Aspects of Hindustani Music	DSC-5-C-CORE (MAJOR)	4	2	0	2	12 PASS

Course: DSC 5 (C)

Paper Name: Theoretical & Practical Aspects of Hindustani Music

Theory: Component-1

Credit: 2

Hours: 30

Learning Objectives:

The focus of the course is:

- To study the text of medieval period to understand the music of that period.
- To have in depth understanding of Moorchchhana.
- To have in depth Knowledge of Geeti.
- To gain understanding of the 'That Paddhati' in Hindustani Music.
- To get the skill of writing notation of compositions
- To understand the significance of Alap in gradual unfoldment of Raga.
- To understand the characteristics of Pure and mixed Ragas and also gain the ability to compare the Ragas of similar notes.

Learning Outcomes:

- The study of medieval granthas will give a speculative insight to the students to understand classical Music of that period.
- The students will learn about the Moorchchhana Paddhati .
- The students will learn about the 'That system' and its importance for Raga classification.
- Students will also learn to write Talas and compositions in notation with minute details.
- Detailed study of the Ragas will enable students to attain proficiency in the subject.

Content:

Unit I

Study of the following texts:

- Rag Tarangini of Pt. Lochan
- Sangeet Damodar of Pt. Shubhankar

Unit II

Study of the following:

- ` Bhinna, Gaudi, Vesara, Sadharani

Unit III

- Description and development of 'That Paddhati' in Hindustani music

Unit IV

- Suddha, Chhayalag and Sankeern Ragas

Unit V

- Shadja Madhyam and Shadja Pancham Bhav in Hindustani Music

Unit VI

- Role of Alap in presentation of Rag (Prastuti karan) in present context
- Significance of string instruments as accompaniment in stage performance

Unit VII

Comparative study of Ragas studied in previous semester:

- Bhairav – Ramkali
- Bhupali – Deshkar
- Kedar – Kamod

Unit VIII

Writing of compositions in notation:

- Vilambit Khayal, Drut Khayal , Dhrupad, Dhamar(For Vocal students),
- Maseetkhani Gat, Razakhani Gat (For Instrumental students).
- Writing of Talas in notation - Chautala, Jhaptala, Teentala, Ektala, Dadra tala

Unit IX

Detailed study of the following Ragas :

- Kamod
- Pooriya Dhanashree

- Patdeep

DSC-5-C

Practical: Component -2

Performance & Viva Voce

Credits: 2

Hours: 60

Learning Objectives:

- To focus on the professionally performing ability of the student, in conjunction with his capability to understand the intricacies of various ragas.
- To teach the students the proper way of doing Alap or tonal elaborations before the start of Dhrupad
- To encourage the students to perform with thoughtful and aesthetic improvisations.
- To differentiate between similar ragas like Kedar and Kamod.
- To focus more on the Viva-Voce of the student.
- To teach new compositions based on various talas

Learning Outcomes:

- The student will gain self-confidence in performing a raga, after practising its finer details
- He will also be able to demonstrate how to separate similar sounding ragas
- He will be able to sing Dhrupad and Dhamar with an in-depth knowledge of its style of performance.
- A detailed performance of Vilambit and Drut Khayal with gayaki to be presented .
- A detailed performance of Maseetkhani and Razakhani gats with elaboration to be presented.
- Presentation of a dhun, devotional or light music composition

Content:

Prescribed Ragas:

1. Pooriyadhanashri
2. Kamod
3. Patdeep

Vocal Music:

- Vilambit and Drut Khayal with gayaki inall the prescribed ragas mentioned above.
- Dhrupad Dhamar composition in each of the prescribed Ragas with Alap, Layakari & Upaj
- Knowledge and demonstrate of the following talas- Sooltala , Adachautala, Dhamar tala
- The ability to tune the Tanpura

Instrumental Music:

- Masitkhani and Razakhani Gats with elaboration to be presented in all the prescribed ragas mentioned above
- Gat with elaboration in any of the following Talas - Ektala, Jhaptala,
- Knowledge and demonstration of the following talas – Sooltala & Adachautala,Dhamar tala.
- The ability of the student to tune his respective instrument

Note: Students of Vocal and Instrumental music will have to prepare according to the requirements of their respective Units.

SEMESTER-5

GE-5

Paper Name: Theory: Theory of Indian Music, Granthas and Ragas

Theory: Component -1

Credit: 2

Total – 30 Hrs

Learning Objective

- The study of the ancient text aims at providing the knowledge of the historical era and its reference to the subject.
- Discussions on different terminologies to make the subject more comprehensive and perceptive.
- The study of Ragas, Talas and compositions aim at crafting the theoretical aspect of their presentation.

Learning Outcome (CLO)

- The students have obtained wisdom and understood the musical references and instruments found in the epic Ramayan and its relevance to present time.
- With the indepth study of the ancient text, Sangeet Ratnakar by Pt. Sharangdev, the students gained a deep insight into the origin of Indian music.
- The general study of Matang Muni's Granth Brihaddeshi provided an axis to the students who are now able to communicate the result of studies undertaken on this ancient treatise.

- Students have understood the concept of Margi and Desi sangeet and are able to demonstrate its significance in modern times.

- The students have attained a detailed study of the theoretical aspects of the prescribed Ragas and Talas which enhance the quality of projects and their practical illustrations.
- They have also acquired skills in writing the notations of traditional compositions of Ragas with Dugun of given Talas.
- The comparative study of Talas bearing equal number of beats further enhances their ability to understand the salient features of various Talas.
- The students have developed skills in writing notatioins of traditional compositions in Khayal/ Dhrupad/ Dhamar/ Razakhani/ Maseetkhani Gats thereby getting empowered to learn authentic compositions independently by reading notations.
- Visually challenged students have commissioned their mind to write an essay on prescribed topics thereby developing their expression and learing better utterance skills.

Content

There will be three sections; candidates shall have to answer one question from each section & two from any of the three sections, thus five questions in all.

Unit I

Musical references & Instruments as found in Ramayana. (4 hrs.)

Unit II

Detailed study of Sangeet Ratnakar. (2 hrs.)

Unit III

Detailed study of the following as treated in Sharangdev's Sangeet Ratnakar- (4 hrs.)

- Nibaddha, Anibaddha, Kaku, Sthaya.

Unit IV

General study of Matang Muni's Granth Brihaddeshi. (2 hrs.)

Unit V

Margi evam Desi Sangeet. (2 hrs.)

Unit VI

Detailed study of the following Ragas: (2 hrs.)

- Todi, Kedar, Patdeep.

Unit VII

Notation Writing of Talas, these: (4 hrs.)

- Vibhags, Bols, Matras, Sam, Tali and Khali: Tilwada, Dhamar, Ektala, Choutala, Dadra, Keherwa, Teentala.

Unit VIII

Ability to write Dugun of the prescribed Talas. (2 hrs.)

Unit IX

Comparative study of the following Talas: (2 hrs.)

- Ektal-Choutal, Teental-Tilwada

Unit X

Writing of compositions in notation of: (2 hrs.)

- Vilambit Khayal, Dhrupad or Dhamar (For Vocal students)

Unit XI

Notation Writing of Maseetkhani Gat in Teentaal, Razakhani Gat in Teentala and Gat other than Teentaala. (For Instrumental students) Or Only Visually challenged students have the option of attempting either notation or an essay on the following topics: (4 hrs.)

- Importance of media in promotion of Music.
- Significance of Music in human life.
- Importance of Music in Fine Arts.

GE -5

Practical: Unit-2

Practical: Performance &Viva-Voce

Credit: 4
Total – 60 Hrs

Learning Objective

- The Objective behind the teaching of various forms of vocal and instruments is to take the students a step forward into the domains of Indian Classical Music.

Learning Outcome (CLO)

- The student is able to give a practical demonstration of the prescribed Ragas and Talas with improvisation and also learnt folk Music and Dhun.
- They have been taught the customary and traditional Gayaki of Dhrupad-Dhamaar.
- Reciting the Thekas of the Talas and playing basic Talas has enabled them to get acquainted with the rhythmic patterns.
- The practical file with details of each topic covered in the syllabus has taught the students the art of systematic documentation and presentation.

Content

- Prescribed Ragas – Kedar, Patdeep.

Vocal Music

One Vilambit Khayal with Alaaps and Tanas in any of the prescribed Ragas.

- Madhyalaya Khayal in the prescribed Ragas.
- Dhrupad with Dugun, Tigun and Chaugun. Or Dhamar with Dugun, Tigun and Chaugun.

Instrumental Music

- Maseetkhani Gat in any one of the prescribed Ragas.
- Razakhani Gat in the prescribed Ragas.
- Gat in any Tala other than Teentala.

Vocal & Instrumental

- Identifying Ragas and Talas of the prescribed syllabus while being played or sung.
- Ability to recite the Thekas of the following Talas with Tali and Khali: Tilwada, Dhamar, Ektala, Chautala, Dadra, Kaharwa, Teentala.
- Elementary knowledge of playing Harmonium.
- Practical file with details of Ragas, Notations of compositions & Talas with Dugun, Tigun and Chaugun.

SEMESTER-6

Course: DSC 6 (A)

Paper Name: Musicology and study of Ragas and Talas.

Theory:

Component-1

Credit: 2

Hours: 30

Learning Objectives:

The main focus of the course is

- To provide a deep understanding of the historical text and its content which is of great significance in Indian Music.
- To establish better understanding about the musical forms and various elements of Raga and Tala.
- The detailed study of important and divers aspects would provide a grip on the subject.
- To make aware the students about The Gun- Avagun of a singer as told in old music Granthas.
- The writing of compositions and assays are intended to increase writing skill and develop research oriented knowledge of the student.
- The visually challenged students have an option of writing essays on the given topics.

Learning Outcomes:

- The students will acquire knowledge and understanding of the musical references found in the epic Mahabharata.
- The students will gain proficiency in the comparative study of the two major notation systems, which will provide them with virtual understanding of the two methods.
- The students will achieve discernment of the four fold classification of the musical instruments.
- The students will imbibe the importance of Gharanas and will be able to apply the same to better understand the evolution and presentation of Ragas.

- The students will understand the assets and flaws of performing musicians which they will employ to their advantage during performances.
- The study of the elements and forms of Indian music will open new horizons and create interest amongst the students for the subject.
- Students will also learn to write Talas and compositions in notation with minute details.
- The visually challenged students are given an option of attempting either writing of notation or an essay on a general topic.
- Detailed study of the Ragas will enable students to attain proficiency in the subject.

Content

General discussion and study of the following:-

Unit I

Musical references in the following text

- The Mahabharata

Unit II

- Comparative study of notation system of Pt. Vishnu Narayan Bhatkhande and Pt. Vishnu Digamber Paluskar.
- Harmony and Melody
- Gayak ke Gun- Avagun

Unit III

Study of the following musical forms:

- Tarana
- Chaturang
- Trivat
- Sadra

Unit IV

Classification of musical instruments:

- Tata Vadya

- Avanaddha Vadya
- Sushir Vadya
- Ghan Vadya

Unit V

Definition of Gharana and study of the following khyal Gharanas:

- Gwalior Gharana
- Dilli Gharana
- Kirana Gharana

·Unit VI

- Writing of Talas in notation with their Vibhags, Matras, Bols, Sam, Tali and Khali with Dugun, Tigun and Chaugun:
- TilwadaTala, Dhamar tala, Choutala, Jhaptala, Teentala,Ektala, Dadra.

Unit VII

Comparative study of Talas:

- Ektala –Choutala
- Teentala - Tilwada

·Unit VIII

Comparative study of the following Ragas:

- Kedar - Hameer
- Bageshree - Bhimpalasi

Unit IX

Detailed study of the following Ragas:

- Todi
- Jaijaivanti

- Hameer

Unit X

Writing of compositions in notation:

- Vilambit Khayal, Drut Khayal , Dhrupad, Dhamar(For Vocal students),
- Maseetkhani Gat, Razakhani Gat (For Instrumental students).

Or

Only Visually challenged students have the option of attempting either notation or an essay on the following topics:

- Bhartiya Sangeet ke vividh roop
- Vyaktitva nirman mein sangeet ki bhoomika
- Rashtriya ekta mein Sangeet ka yogdaan

Performance & Viva –Voce

Credit: 2

Hours: 60

Learning Objectives:

The prime design of this course is to enable students to develop performance skills by learning to-

- Demonstrate various forms of music in different Ragas and Talas as a part of performance and Viva-Voce.
- To identify the Ragas and Talas.
- Sing or play one Light Dhun/Bhajan/Lokgeet based on Raga.

Learning Outcomes:

- A variety of musical forms in each Raga will be taught to the students, thus building their repertoire and preparing them for stage performance.
- The students will learn the customary and traditional Gayaki of Dhrupad-Dhamaar.
- ·The students will learn to identify different Ragas and Talas while being sung and played .
- Reciting the Thekas of the Talas and playing basic Talas will enable students to get acquainted with the rhythmic patterns.
- The knowledge of playing Harmonium will aid the students in understanding the placement of fingers and swaras on the instrument.
- The practical file with details of each topic covered in the syllabus will teach the students the method of systematic documentation and presentation.

Content:

Prescribed Ragas – Todi, Jaijaivanti, Hameer

Prescribed Talas - Chautala, Ektala,Jhaptala, Tilwada tala,Teentala, Dadra tala, Roopak tala, Keharwa tala.

Vocal Music

- One Vilambit Khayal with Alaaps and Taans in any of the prescribed Ragas.
- Madhyalaya Khayal in all the prescribed Ragas.
- One Dhrupad with Dugun, Tigun and Chougun.

Or

- One Dhamar with Dugun, Tigun and Chougun.
- One Raga based Bhajan/Lok geet.

Instrumental Music

- Maseetkhani Gat in any one of the prescribed Ragas.
- Razakhani Gat in all the prescribed Ragas.
- Gat in any Tala other than Teentala

Vocal & Instrumental

- Identifying Ragas and Talas of the prescribed syllabus while being sung or played.
- Ability to recite the Thekas of the following Talas along-with Tali – Khali and with Dugun, Tigun, Chaugun :
  Tilwada tala, Dhamar tala,Chautala, Jhaptala, Teentala, Ektala, Dadra tala,Roopak tala, Keharwa tala.
- Elementry knowledge of playing Harmonium.
- Practical file with details of Ragas, Notations of compositions & Talas with Dugun, Tigun and Chaugun.

Course: DSC 6 (C)

Paper Name: Theoretical & Practical Aspects of Hindustani Music

Theory: Component-1

Credit: 2

Hours: 30

Learning Objectives:

The focus of the course is:

- To understand the Texts of medieval period.
- To understand Guru-Shishya parampara & Gharana system in Indian Music.
- To understand of musical sound and vibrations.
- To get the skill of writing notation of compositions and the thekas of theTalas.
- To understand the significance of Swasthan Niyam.
- To gain the ability to compare the Ragas of similar notes.

Learning Outcomes:

- The study of medieval granthas will give a speculative insight to the students to understand about classical Music of that time**.**
- The students will learn about the old tradition of music learning: Guru-Shishya parampara & Gharana system.
- The students will learn about different vibrations of musical sound.

- Students will also learn to write Talas and compositions in notation with minute details.
- Detailed study of the Ragas will enable students to attain proficiency in the subject.
- Students will understand how to attain 22 shrutis in a Saptak through Srnna Chatustayi.

Content:

Unit I

Study of the following text :

- Swar Mela Kalanidhi of Pt. Ramamatya

Unit II

Guru Shishya Parampara and Gharanas in Indian Music. Study of the following Gharanas:

- Rampur Gharana
- Jaipur Gharana
- Agra Gharana
- Indore Gharana

Unit III

- Vibration
- Forced Vibration
- Free Vibration
- Equal tempered scale
- Just Intonation

Unit IV

- Swasthan Niyam

Unit V

- Sarna Chatustayi

Unit VI

Placement of Swaras on Veenas strings as described by Pt. Ahobal in Sangeet Parijaat and Pt. Shrinivasa in Rag Tatva Vibodh.

Unit VII

Comparative study of Ragas studied in previous semester:

- Kedar - Hameer
- Todi – Multani
- Bageshree - Bhimpalasi

Unit VIII

Writing of compositions in notation:

- Vilambit Khayal, Drut Khayal , Dhrupad, Dhamar(For Vocal students),
- Maseetkhani Gat, Razakhani Gat (For Instrumental students).
- Writing of Talas in notation - Chautala, Jhaptala, Teentala, Ektala, Adachautala,Jhoomra tala.

Unit IX

Detailed study of the following Ragas:

- Multani
- Gaud Sarang
- Jaijaivanti

DSC-6-C

Practical: Component -2

Performance & Viva Voce

Credits: 2

Hours: 60

Course Objectives:

• To focus on the professionally performing ability of the student, in conjunction with his capability to understand the intricacies of various ragas.

• To teach the students the proper way of doing Alap or tonal elaborations before the start of Dhrupad
• To encourage the students to perform with thoughtful and aesthetic improvisations.
• To differentiate between similar ragas like Kedar and Kamod.
- To focus more on the Viva-Voce of the student.
• To teach new compositions based on various talas

Course Outcomes:
• The student will gain self-confidence in performing a raga, after practicing its finer details
• He will also be able to demonstrate how to separate similar sounding ragas
• He will be able to sing Dhrupad and Dhamar with an in-depth knowledge of its style of performance.
• A detailed performance of Vilambit and Drut Khayal with gayaki to be presented.
• A detailed performance of Maseetkhani and Razakhani gats with elaboration to be presented.
• Presentation of a dhun, devotional or light music composition

Content:

Prescribed Ragas:

1. Multani

2. Gaud Sarang

3. Jaijaivanti

Vocal Music:

- Vilambit and Drut Khayal with gayaki inall the prescribed ragas mentioned above.
- Dhrupad Dhamar composition in each of the prescribed Ragas with Alap, Layakari & Upaj
- Knowledge and demonstrate of the following talas- Sooltala & Adachautala.
- The ability to tune the Tanpura

Instrumental Music:

- Masitkhani and Razakhani Gats with elaboration to be presented in all the prescribed ragas mentioned above
- Gat with elaboration in any 3 of the following Talas - Ektala, Jhaptala,
- Knowledge and demonstration of the following talas – Sooltala & Adachautala
- The ability of the student to tune his respective instrument

Note: Students of Vocal and Instrumental music will have to prepare according to the requirements of their respective Units.

		Lecture	Tutorial	Practical/practical			
Study of Ragas and Talas and Musicology	4	2	0	2	Class XII Pass	NIL	Music

SEMESTER-6
GE-6
Course: Theory: Study of Ragas and Talas and Musicology
Credit: 2
Total – 30 Hrs

Learing Objective

- The course has been precisely structured to provide a deep understanding of the historical texts and their content which are of great significance in Indian Music.
- The in detail study of the important and diverse elements would provide a grip on the subject.
- The writing of compositions and essays are intended to increase an appropriate and research oriented knowledge of the students.

Course Learning Outcome (CLO)

- Students have acquired knowledge and understood the musical references found in the epic Mahabharata.
- Gained proficiency in the comparative study of the two major notation systems, which has provided them with virtual understanding of the two methods.
- Achieved discernment on the classification of instruments – such as a) String instruments, b) Drum instruments, c) Wind instruments, and d) Percussion instruments.
- Imbibed erudition of the importance of Raga Lakshanas and are able to apply the same to the definition of Ragas.
- They have understood the assets and flaws of the performing musicians which they employ to their advantage during performances.
- Acquried cognition of writing notations of traditional compositions and further developing their skills to independently read and learn authentic compositions on their own.
- Visually challanged students have engaged their mind to writing on prescribed topics, thereby developing their expression and learning better skills for declaration.

Content

- There will be three sections; candidates shall have to answer one question from each section & two from any of the three sections, thus five questions in all.

Unit I - Musical references as found in Mahabharata. (2 hrs.)

Unit II - Comparative study of notation system (4 hrs.)

- Pt.Vishnu Narayana Bhatkhande and Pt.Vishnu Digambar Paluskar.

Unit III - Classification of Musical Instruments: (2 hrs.)

- TataVadya, Avanaddha Vadya, Sushir Vadya, Ghan Vadya.

Unit IV - Gayak ke Gun-Avgun. (2 hrs.)

Unit V - Raga Lakshan. (2 hrs.)

Unit VI - Detailed study of the following Ragas: (2 hrs.)

- Puriyadhanashri, Hamir

Unit VII - Writings of Talas with their Vibhags, Bols, Matras, Sam, Tali
Khali of the following: (2 hrs.)

- Ektala, Jhaptala, Teentala, Tilwada, Roopak, Kaharwa, Dhamar, Chautala, Dadra.

Unit VIII - Ability to write Dugun, Tigun and Chaugun of the prescribed Talas. (2 hrs.)

Unit IX - Detailed study of the following musical forms: (2 hrs.)

- Sadra, Trivat, Chaturang, Tarana.

Unit X - General study of western instruments adapted in Indian Classical Music – (2 hrs.)

- Violin, Guitar.

Unit XI - General understanding of Harmony or Melody. (2 hrs.)

Unit XII - Writing of compositions in Notation of Vilambit Khyal, Dhrupad/ Dhamar. (2 hrs.)
(For Vocal students)

Unit XIII - Notation writing of Maseetkhani Gat, Razakhani Gat in Teentala and Gat in other than Teentala. Or Only Visually challenged students have the option of attempting either notation or an essay on the following topics: (4 hrs.)

- Bhartiya Sangeet Ke Vividh Roop.
- Vyaktitva nirman mein Sangeet ki bhoomika.
- Rashtreeya Ekta mein Sangeet ka yogdan.

GE-6
Practical: Component-2

Practical: Performance &Viva –Voce
Credit: 2
Hours: 60

Course Objective

- The performance and viva voce aim at enhancing the understanding and propensity of the students to take this subject as a part of their higher study.

Course Learning Outcome (CLO)

- The students have gained competence in demonstrating the Vilambit & Madhyalaya Khayals/ Maseetkhani and Razakhani Gats, their Alaps, Taans, variations in the traditional compositions of the prescribed Ragas, thereby developing performance skills.
- They accomplish erudition and ability of performing Dhrupad/ Dhamar and demonstrating their Dugun, Tigun and Chaugun.
- The students are able to skillfully display their understanding of the prescribed Talas different Laya.
- They have acquired the judgement of desciphering the various Ragas and Talas by listening and observing.
- Having learnt the basic technique of playing the Harmonium, the students exhibit a vivid view of sound and placement of notes. This has empowered them to independently play and learn songs and compositions.

Content

- Prescribed Ragas – Puriyadhanashri, Hameer.

Vocal Music

- One Vilambit Khayal with Alaaps and Tanas in any of the prescribed Ragas.
- Madhyalaya Khayal in the prescribed Ragas.
- One Dhrupad with dugun, tigun, chougun. Or One Dhamar with Dugun, Tigun and Chaugun.

Instrumental Music

- Maseetkhani Gat in any one of the prescribed Ragas.
- Razakhani Gat in the prescribed Ragas.
- Gat in any Tala other than Teentala or a Dhun.

Vocal & Instrumental

- Identifying Ragas and Talas of the prescribed syllabus while being played or sung.
- Ability to recite the Thekas of the following Talas along-with Tali and Khali: Ektala, Jhaptala, Teentala, Tilwada, Roopak, Keherwa, Dhamar, Chautala, Dadra.
- Ability to recite Dugun and Chaugun of any two of the prescribed Talas.
- Elementary knowledge of playing Harmonium.
- Practical file with details of Ragas, Notations of compositions & Talas with Dugun, Tigun and Chaugun.

B.A. (Prog.) Music
Hindustani Music - Vocal/Instrument (Sitar)

Syllabus for DSE – Research Methodology

SEMESTER – VI / VII
DSE – Research Methodology

Course Title & Code	Credits	Credit distribution of the course			Eligibility Criteria	Pre-requisite of the course
		L	T	P		
DSE – Research Methodology (1)	4	3	1	0	• Class XII Pass	Must have studied the following papers – • Theory topics in Sem III-V OR • Must have an understanding of the basic concepts such as Shruti, Svara, Raga, Tala etc and their associated components • Knowledge of the Bhatkhande and Paluskar notation systems • Knowledge of the 10 Thaatas • Understanding of theory topics covered in Sem III-V

Learning Objectives:

- To understand the concept of 'Research' and its various components
- To study the importance of selecting the correct research topic
- To understand the importance of preparing a Synopsis
- To focus on the various primary and secondary sources of information and how they are used in research
- To discuss the sources of information specifically related to research in Music

- To understand the various aspects of data collection such as Questionnaire, Interview etc.
- To study as to how to write a Report and understand the significance of aspects like References, Footnotes, Bibliography etc.

Learning Outcomes:

- The student shall be able to understand what Research is and its various related aspects
- He/she shall be able to understand the importance of a correct Research Topic, and later on, shall be able to do the same dissertation and thesis
- He/she will be able to demonstrate the ability to write a Synopsis on any given research topic
- The student will be able to understand the significance of the various sources of information in research and how they are to be applied in research on subjects related to Music
- To student shall be able to grasp the various methods of data collection that shall help him in his research later on
- He/she shall be able to understand the correct ways of giving References, Footnotes and other related aspects in his dissertation and thesis later on

Syllabus:

Unit I (10 hours)

Understanding Research and its components -

- Definition
- Aims and objectives
- Varieties
- Methodology
- Process.

Unit II (2 hours)

Selection of the research topic

Unit III (6 hours)

Understanding the importance of Synopsis in Research -

- Definition
- Importance
- Making a synopsis

Unit IV (9 hours)

Primary and Secondary sources of information and their importance in research -

- Manuscripts and Books
- Journals and Magazines
- Sculpture
- Paintings & Frescoes
- Archaeological findings
- Inscriptions
- Musical Pillars and Stones
- Museums
- Coins

Unit V (8 hours)

Study of the following sources of information related to Music:

- Musical compositions
- Oral traditions
- Music performances – live and recorded:
    - Gramophone records
    - Discs
    - Cassettes
    - On the internet
- Media - Print and electronic
- Academic councils.

Unit VI (5 hours)

Understanding methods of data collection:

- Questionnaire
- Interview
- Observation
- Case study
- Experimental Schedule

Unit VII (5 hours)

Report writing and its aspects -

- References
- Footnotes
- Bibliography
- Appendix
- Index

Suggestive readings:

- Survey Research Methods – Floyd. J.F., Sage Publications, New Delhi.
- Methods in Social Research- Goode C.V. & D.E. Scates, McGrawHill, 1954.

ANNEXURE-40

Sub: Amendment to Ordinance V

Following addition be made to Appendix-II-A to the Ordinance V (2-A) of the Ordinances of the University;

Add the following:

Following Value Addition Course (VAC) has been added to the Pool of Value Addition Courses based on Undergraduate Curriculum Framework -2022 implemented from the Academic Year 2022-23 :

1. VAC : National Cadet Corps – IV

   (Details are as per Annexure-I)

REGISTRAR

Annexure - 1

VAC : NATIONAL CADET CORPS – IV

Credit distribution, eligibility criteria and pre-requisites of the course

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/Practice		
National Cadet Corps -IV	2	1	0	1	Pass in Class 12th	Enrolled as NCC Cadet and in semester four.

Learning Objectives:

The course aims to:

- Develop a sense of time management and social skills.
- Understand the life history and leadership qualities of personalities who have contributed in Nation Building.
- Develop awareness about various types of Natural and Manmade disasters.
- Understand importance of Environmental Awareness & Conservation.

Learning Outcomes:

After completing this course, the cadets will be able to:-

- Effectively manage time.
- Develop the qualities of social skills.
- Imbibe leadership qualities.
- Effectively contribute in managing disaster relief tasks.
- Contribute in environmental awareness and conservation activities.

SYLLABUS OF NATIONAL CADET CORPS-IV

Unit I: Personality Development (5 Weeks)

Group Discussion-

- Social Skills- Types of etiquettes, Improving Social Skills
- Time Management-Principles

Unit II: Leadership (4 Weeks)

- Case Studies- Ratan Tata, Rabindra Nath Tagore, Jhansi ki Rani

Unit III: Disaster Management (4 Weeks)

- Do's and Don'ts
- Natural Disasters
- Man Made Disasters

Unit IV: Environmental Awareness (2Weeks)

- Water Conservation-Ways to conserve water
- Energy Conservation-Energy conservation measures

Practical Component: (15 Weeks)

- Drill
- Map Reading/Aero Modelling/Naval Communication, Seamanship, Ship & Boat Modelling
- Weapon Training
- Field Craft & Battle Craft
- Social Service & Community Development
- Health & Hygiene

Suggested Readings:

- DGNCC Cadet's Hand Book - Common Subjects -All Wings (in English)
- DGNCC Cadet's Hand Book - Common Subjects -All Wings(in Hindi)
- DGNCC Cadet's Hand Book — Specialised Subjects —Army, Navy and Air Wing

Examination scheme and mode: Subject to directions from the Examination Branch, University of Delhi from time to time.

A N NEXURE - 41

Sub: Amendment to Ordinance V

Following addition be made to Appendix-II-A to the Ordinance V (2-A) of the Ordinances of the University;

Add the following:

Syllabi of Semester-IV of BA (Vocational Studies) under the College of Vocational Studies based on UGCF-2022 implemented from academic year 2022-2023

B.A. (VS) Small and Medium Enterprises
Semester IV
DISCIPLINE SPECIFIC CORE COURSE -4.2 (DSC-4.2)
Cost Accounting

CREDIT DISTRIBUTION, ELIGIBILITY AND PRE-REQUISITES OF THE COURSE

Course title & Code	Credits	Credit distribution of the course			Eligibility criteria	Pre-requisite of the course (if any)
		Lecture	Tutorial	Practical/ Practice		
Cost Accounting (DSC-4.2)	**4**	**3**	**1**	**-**	**12th Pass**	**Nil**

Learning Objectives: The objectives of the paper are to:

1. understand different cost concepts and enable the students to compute unit cost and total cost by preparing a cost statement;
2. learn various material costing techniques;
3. enable the learners to compute labour cost, productivity and employee turnover;
4. know overhead costs and their allocation;
5. familiarize the learners with various costing techniques and methods.

Learning Outcomes: After completion of the course, students will be able to:

1. explain the cost concept, components of cost of production and the preparation of statement of cost;
2. compare and contrast the material costing techniques;
3. analyse labour cost, productivity and employee turnover of **MSMEs**;
4. explain and allot overhead costs to different activities and products;
5. ascertain costs using various costing techniques and methods.

Unit 1: Introduction **9 Hours**

Meaning, scope, objectives and advantages of cost accounting; Difference between financial and cost accounting; Role of a cost accountant in an **MSME**. Cost concepts and classifications, Different components of cost and preparation of Cost Sheet.

Unit 2: Accounting and Control of Material Cost **9 Hours**

Concept of Material Cost and Control, Accounting and Control of Purchases, Storage and Issue of Materials. Inventory Systems, Methods of Pricing of Materials Issues — FIFO, LIFO, Simple and Weighted Average, Techniques of Inventory Controls: Inventory Systems, EOQ, Stock Levels, FSN Analysis, ABC Analysis, JIT Etc. Accounting Treatment and Control of Losses — Wastage, Scrap, Spoilage and Defectives

Unit 3: Accounting and Control of Employee (Labour) Cost 7 Hours

Employees Cost: Definition and Scope, Time-Keeping and Time-Booking. Employee Turnover: Meaning, Measurement and Accounting Treatment. Concept, Treatment and Control of Idle Time and Overtime. Methods of Wage Payment and Incentive Schemes- Halsey, Rowan, Taylor's Differential Piece Wage.

Unit 4: Accounting and Control of Overheads 9 Hours

Overhead: Concept, Classification, Allocation, Apportionment and Absorption, Machine Hour Rate, Treatment Of Over and Under-Absorption, Treatments of Certain Items in Cost Accounts Like Interest and Research and Development Cost, Packing Expenses and Bad Debts.

Unit 5: Methods of Costing 11 Hours

Job Costing, Contract Costing, Process Costing (Including Process Losses, Valuation of Work-In-Progress), Service Costing (Transport and Hospitality Industry)

Practical Exercises:

The learners are required to:

1. prepare a cost statement for an manufacturing or service **MSME** on and identify the items to be included and excluded in the cost system. (Unit 1)
2. prepare various documents used in purchase, storage of materials and do practical exercise on different inventory control techniques for any **MSME**. (Unit 2)
3. compute the employee cost of an **MSME**. (Unit 3)
4. compute of overheads absorption rate and practical exercise on over and under absorption of overheads.(Unit 4)
5. ascertain of cost in different industries using suitable methods of costing. (Unit 5)
