Delhi University Digital Infrastructure Support for Colleges and Department

University of Delhi vide its notification no. Estab.II (i)/010/2021/10/1597 dated 30.07.2021 constituted a committee for Delhi University Digital Infrastructure Support for Colleges and Department. The University has constituted this committee with the following objectives:

- To create a futuristic infrastructure for higher education & make teach learning process (including e learning) more effective & engaging.
- To enhance institutional social interface of University of Delhi and its constituent Colleges, by connecting to a larger group of interested students through effective e learning processes.
- To create infrastructure for Colleges and Departments, enabling to execute best practices for educating nearby localities as social responsibility (under NAAC criteria vii)
- To disseminate the expertise of our faculty more effectively to students from far flung areas, especially in distance education.

The committee has connected to all Colleges and Departments for assessing their requirements to create in house digital infrastructure. The colleges have responded positively to this initiative and provided their required list of equipment.

The committee members discussed and resolved the following:

1. The committee recommended to initiate creation of digital infrastructure in Colleges and Departments, to provide effective usage of digital platforms/ video recording environment across Colleges and Departments.

2. The committee recommended to circulate the objectives of DUDISCAD and receive requirements from Colleges and the Departments.
3. It was resolved to obtain information on availability of room for studio, employees deputed by college/departments to manage the studio or be trained for this purpose along with the equipment required for setting up the initial video recording studio. The human resource shall be facilitated training to manage the digital equipment through DUDISCAD.
4. It was suggested to create a resource centre with a state of the art video recording studio equipped with professional editing to extend the reach of University beyond boundaries and produce world class video lectures to be disseminated from one centralised digital platform of University of Delhi, as a long term outcome.
5. The list of equipment is being prepared by the experts and shall be circulated to all Colleges and Departments to select the equipment they need.
